DSCI4280 - Supply Chain Management

Credits: 3

Examines the coordination of material flows and information through networks of suppliers, producers, warehouses, and

0930

customers that are linked by transportation modes.

Prerequisite: DSCI 3210, junior class standing, advanced business standing.

DSCI4900 - Problems in Decision Sciences

Credits: 1-4

Max Credit (Max. 4)

Studies, on an individual basis, any decision science topic not included in currently offered courses.

Prerequisite: DSCI 3210, advanced business standing, senior class standing and written consent of instructor.

DSCI5890 - Advanced Problems in Decision Science

Credits: 1-8

Max Credit (Max. 8)

An arrangement whereby a student is permitted to develop some advanced phase of decision sciences not offered in the formally structured courses or to investigate a particular decision sciences problem. A written report is required.

Prerequisite: consent of instructor and acceptance into a graduate program.

Dental Hygiene

DHYG3230 - Clinical Seminar II

Credits: 2

This course is a continuation of the Clinical Seminar Series. Course content will focus on the review and enhancement of instrumentation skills; the essentials of instrument selection; the role of root planing in dental hygiene; the development and refinement of skills needed for treatment of more advanced periodontal cases, which includes the initiation of a periodontal case study; and the introduction and preparation for the use of state-of-the-art clinical technologies.

Prerequisite: DHYG 2420.

DHYG3250 - Clinical Seminar III

Credits: 2

This course prepares the dental hygiene student to make the transition from an educational setting to private practice. Focus is on applying, synthesizing, and transferring clinical and didactic knowledge to clinical and ethical decision-making. Students will be engaged in problem-based case studies, application of motivational theories, and analysis of evidence-based research.

Prerequisite: DHYG 3230, DHYG 3300 and DHYG 3350 or concurrent enrollment.

DHYG3300 - Clinical Dental Hygiene II

Credits: 5

This course provides students the opportunity to gain further practical experience in dental hygiene procedures by providing comprehensive patient care in clinical settings. A flexible format allows students to meet requirements in procedures for patient record-keeping, patient education, dental prophylaxis, dental radiography and routine clinical procedures.

Prerequisite: DHYG 2350.

DHYG3350 - Clinical Dental Hygiene III

Credits: 5

This course assists students in gaining practical experience in clinical procedures requiring greater skill and knowledge than procedures previously undertaken. This course prepares students for the transition to private office practice.

Prerequisite: DHYG 3300.

DHYG3400 - General and Oral Pathology

Credits: 3

This course is designed to teach students the concepts underlying general and oral manifestations of human disease states, manifestations of specific diseases, relationships to body defense mechanisms, and potential implications for medical and dental hygiene treatment. To the extent possible, applications to clinical situations in dental hygiene practice will be made.

Prerequisite: one year pre dental hygiene (including general pathology); MOLB 2021 or equivalent.

DHYG3550 - Community Dental Health

Credits: 3

This course provides the dental hygiene student with an introduction to basic skills needed to evaluate the dental health community, including research methodology and basic statistical analysis. It provides the student with a basic understanding of the significant social, political, psychological and economic factors influencing the American Health System.

Prerequisite: DHYG 2100.

DHYG3600 - Ethics and Law in Dental Hygiene

Credits: 2

This course provides an introduction to basic concepts in the analysis of ethical theories, principles, values, the professional code of ethics, and legal aspects associated with the dental hygiene healthcare profession. Contemporary issues are examined in dentistry and medicine as a strategy to explore and apply ethical principles in diverse cultures and situations.

Prerequisite: successfully complete all first-year dental hygiene courses.

DHYG3720 - Office Practice

Credits: 2

This course is designed to provide the dental hygiene student with both current information and experience in office practice and

management. Also included are discussions of professionalism, decision-making and leadership roles, including legal and ethical responsibilities, team responsibilities in the dental office and discussion of selecting, securing and maintaining employment.

Prerequisite: DHYG 2300, 2350, DHYG 3300 and a communications course.

DHYG3750 - Periodontology

Credits: 3

This course reviews the anatomy and histology of periodontal structures and dental accretions followed by a study of the classifications and etiology of periodontal diseases including both local and systemic factors. A thorough exploration of the hygienist's role in disease recognition, prevention, therapeutic procedures and maintenance is also included.

DHYG3770 - Pain Management

Credits: 2

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/oxygen.

Prerequisite: successful enrollment in dental hygiene major or consent of instructor.

DHYG3775 - Pain Management Lab

Credits: 1

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/ oxygen.

Prerequisite: successful completion of sophomore year course work in dental hygiene, current certifications in CPR, and curriculum enrollment in dental hygiene major or consent of instructor.

DHYG3800 - Board Review

Credits: 1

This course is designed to assist dental hygiene students in preparing for the National Board Dental Hygiene Exam, the western and central regional clinical and anesthesia board exams, and state jurisprudence exams. These exams are required for licensure to practice dental hygiene in the United States. This course includes discussion of the distinction between various agencies in the education, healthcare and legal system which have jurisdiction over the licensure process, and the impact of cheating during any portion of the process on the public welfare.

Prerequisite: DHYG 3300.

DHYG4850 - Education Practicum in Dental Hygiene

Credits: 6

Allows students to experience both clinical and didactic elements of dental hygiene teaching.

Prerequisite: completion of dental hygiene didactics, all requirements of program. Only available by permission of instructor. For students wishing to teach in dental hygiene programs.

Early Childhood Education

EDEC1020 - Introduction to Early Childhood Education

Credits: 3

Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

EDEC1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

EDEC2000 - Engaging Families in Early Childhood Settings

Credits: 3

Focus on the philosophical, psychological, and sociocultural aspects of working with families and children in early childhood educational, home, and community settings.

EDEC3000 - Observing Young Children

Credits: 3

The general goal of the course is to introduce students to observation and recording techniques appropriate for assessing the growth and development of young children in the school setting. A secondary goal is to understand how observation and recording techniques can facilitate curriculum planning and parent-teacher conferences.

Prerequisite: EDEC 1020 and FCSC 2121.

EDEC3220 - Curriculum and Learning Environments in Early Childhood Education

Credits: 3

Early childhood curriculum and instructional practices will be reviewed, developed, and integrated with a focus on the role of learning environments, materials and play in supporting the teaching and learning process. Students have the opportunity to design meaningful learning experiences through practicum.

Former Course Number [EDCI 3220]

Prerequisite: EDEC 1020 and FCSC 2121 (or both PSYC 2300 and FCSC 2122).

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

EDEC4350 - Health Management Issues in Early Education

Credits: 3

Provides the student the opportunity to examine the implications of a child's health status on his/her personal, educational, social and cognitive development. Provides personnel working closely with the young child with disabilities and his/her family an understanding of the issues related to health concerns and a framework for intervention planning. Special emphasis is placed on concerns specific to the child in a day care, preschool or other school setting.

Prerequisite: junior standing and consent of the instructor.

EDEC4580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 5580.

Prerequisite: permission of the instructor is required.

EDEC5220 - Children with Disabilities

Credits: 3

Purpose is to introduce students to the effects of a disability on the development of the young child. Recent research in the area of early childhood special education will be examined. Educational implications will be emphasized.

Prerequisite: Bachelor's degree in education.

EDEC5230 - Curriculum and Materials for Young Children with Disabilities

Credits: 3

Involves the study and development of curriculum strategies appropriate for the child with disabilities from birth through age five.

Prerequisite: graduate standing.

EDEC5240 - Evaluation of Young Children with Disabilities

Credits: 3

Prepares students to select, administer, and interpret evaluation tools appropriate for planning with young children with disability.

Prerequisite: graduate standing.

EDEC5250 - Legal Issues in Early Childhood Special Education

Credits: 2

Introduces students to the legal issues surrounding the education of young children with disabilities. The intent and implications of P. L. 99457 will be explored and examined to better assist the specialist in serving children with disabilities and their families.

Prerequisite: EDEC 5220.

EDEC5580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 4580.

Prerequisite: permission of the instructor is required.

Ecology

ECOL5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ENR 5050/GEOG 5050 .

Prerequisite: graduate standing.

ECOL5060 - Advanced Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with

an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed BOT 5060/ZOO 5060.

When Offered (Offered every other year)

Prerequisite: graduate student in good standing.

ECOL5100 - Ecology as a Discipline

Credits: 3

Covers the range of ecological questions, processes, scales, and research approaches, in context of the history and philosophy of science in general and of ecology in particular. Aimed at first-year students in the doctoral program in Ecology, although students in other graduate programs are welcome.

Prerequisite: graduate standing.

ECOL5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed REWM 5400.

Prerequisite: LIFE 3410 or equivalent.

ECOL5500 - Quantitative Analysis of Field Data

Credits: 3

A practical guide to the analysis of messy field data, including data exploration, generalized linear and additive models, mixed models, autocorrelation, and model selection using Program R. Students will spend one intensive week learning methods and the rest of the semester analyzing their own data and writing a manuscript.

Prerequisite: graduate standing.

ECOL5520 - Habitat Selection

Credits: 2

In this course we will cover theory and behavioral/evolutionary concepts related to the process of habitat selection, the contexts under which habitat choices are adaptive or maladaptive, and different types of anthropogenic habitat change and the consequences for animals in the wild. Prerequisite: Graduate students in good standing.

Cross Listed ZOO 5520

Prerequisite: Graduate students in good standing.

ECOL5540 - Microbial Diversity and Ecology

0937

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540/SOIL 4540.

Dual Listed MOLB 5540/SOIL 5540.

Prerequisite: MOLB 2210.

ECOL5550 - Ecology as a Scientific Profession

Credits: 2

A capstone that prepares doctoral students for success and leadership in their careers as professional ecologists. Intended for students enrolled in the doctoral Program in Ecology in their final year.

Prerequisite: graduate standing.

ECOL5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed REWM 5580.

ECOL5610 - Quantitative Modeling in Landscape Ecology

Credits: 3

Emphasis on quantitative, spatial analysis of landscapes and application of these quantitative tools to making sound management decisions. Work with real data, acquire high-level quantitative skills, develop problem-solving skills, and discuss management application of model results. Analysis will encompass abiotic, biotic (plant and animal), and human use of ecological systems in a spatial context.

Cross Listed REWM 5610.

When Offered (Offered during even-year fall semesters)

Prerequisite: upper division stats course (e. g. , STAT 4015 or STAT 4025) and graduate standing.

ECOL5620 - Advanced Topics in Ecology

Credits: 1-4

Max Credit (Max. 12)

Provides advanced treatment of specific topics in ecology that are not covered in regular courses.

Prerequisite: graduate standing and consent of instructor.

ECOL5650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Cross Listed ECOL 5650.

Prerequisite: graduate standing.

ECOL5680 - Landscape Genetics

Credits: 3-4

Provides a unique opportunity for interdisciplinary training and international collaboration uniting some of the most active landscape genetics groups in North America and Europe. A key objective of landscape genetics is to study how landscape modification and habitat fragmentation affect organism dispersal and gene flow across the landscape. Meeting this and other landscape genetic objectives requires highly interdisciplinary specialized skills making intensive use of technical population genetic skills and spatial analysis tools (spatial statistics, GIS tools and remote sensing). To bring these diverse topics and skills together effectively, we are using a distributed model of teaching. Population genetics, spatial analysis/ statistics, and previous experience in Rare all extremely useful but not required.

Cross Listed Cross listed with: REWM 5680.

ECOL5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 5775 and BOT 5775.

When Offered (Offered during even-year fall semesters)

Prerequisite: LIFE 3400.

ECOL5780 - Research in Ecology

Credits: 1-6

Max Credit (Max. 12)

Designed for doctoral students pursuing exploratory research before they have determined a dissertation project, and for students to pursue independent research that will not comprise part of their dissertation. Research must be conducted under supervision of an Ecology Faculty member or Affiliate.

Prerequisite: admission to doctoral Program in Ecology.

ECOL5920 - Continuing Registration: On Campus,

0939

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5940 - Continuing Registration: Off Campus,

Credits: 1-12
Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Economics

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP Code [CS,G<>H]

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP Code [CS<>H]

ECON1020 - Principles of Microeconomics

0940

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP Code [CS<>H]

ECON1101 - First-Year Seminar: Viking Economics

Credits: 3

The people we've come to know as the Vikings were major influencers on the history and economic development of Western and Eastern Europe, the Middle East, North Africa, and North America. In this course, we will come to understand the Vikings not only as warriors, but also in other roles for which they should be known: merchants, social and economic innovators, entrepreneurs and explorers, shipbuilders and seafarers, and creators of a remarkable literature of myths and sagas.

USP Code [(none)<>FYS]

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP Code [V<>V]

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP Code [CS,G<>(none)]

ECON1400 - Sports Economics

Credits: 3

Examines economic issues pertaining to professional and collegiate sports. Topics include: determinants of player salaries, owner profits and team values; effects of salary caps, revenue sharing, etc. on competitive balance; labor markets and discrimination; antitrust issues, and the impact of franchises on local economies.

USP Code [CS<>H]

ECON2100 - Introduction to Money and Banking

Credits: 3

An introduction to the entire area of money and public finance. Oriented towards students wishing to obtain a broad general understanding of importance of money and public finance upon economic activity. Covers money and private financial institutions, monetary theory and policy, as well as public finance and fiscal policy. Credit will not be allowed for more than one of: ECON 2100 or FIN 3520.

Prerequisite: ECON 1010, ECON 1020.

ECON2190 - High Country Economics

Credits: 3

Max Credit (Max. 3)

Allows students to connect economic theory to tangible Wyoming and Rocky Mountain West issues.

Prerequisite: ECON 1010 and ECON 1020, or written consent of instructor.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP Code [WB,G<>COM2]

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ECON2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students will experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students will explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed GEOG 2500 and HIST 2500.

ECON2910 - Topics in Economics

Credits: 3

A study of selected topics & problems in modern economics. Topics include but are not limited to sports economics, managerial economics, and behavioral economics.

ECON3010 - Intermediate Macroeconomics

0942

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ERS 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300, and sophomore class standing.

ECON3900 - Economics Internship/Research

Credits: 1-3

Max Credit (Max. 3)

Students gain practical experience in economic applications and research. A contract with an Economics adviser and cooperating sponsor required before enrolling. Requires student paper and sponsor assessment.

Prerequisite: ECON 1010, ECON 1020, and sophomore class standing.

ECON4000 - Conference

Credits: 1-4

A tutorial-conference course intended to give economics majors an opportunity to engage in extensive research in some aspect of economics. Specific topics vary with students' needs and interests.

Prerequisite: ECON 3010, ECON 3020, or the consent of the instructor.

ECON4030 - Managerial Economics

Credits: 3

An advanced course on the theory of demand, production, cost, and supply; the theory of the firm, including market price under monopoly, monopolistic competition and oligopoly. Attention is given to the theory of factor prices and topics on welfare economics.

Note: Credit cannot be earned for this course and ECON 3020.

Prerequisite: senior standing or above.

ECON4115 - Time Series Analysis and Forecasting

Credits: 3

Designed to have an applied orientation in a number of estimation procedures, such as exponential smoothing and forecasting with and without the presence of trends and seasonal repetitive patterns. The Box-Jenkins procedure will be covered in detail. Students become proficient in the application of statistical tools used in time series analysis of economic data.

Cross Listed STAT 4115.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [4110]

Prerequisite: STAT 3050 or equivalent; STAT 4015/STAT 5015 recommended.

ECON4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGECE 4230.

Dual Listed ECON 5230.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

ECON4240 - Evolution of Economic Ideas

Credits: 3

Focuses on the most influential economists who have shaped the evolution of economic thinking throughout history. Emphasis is on tracing the evolution of economic thought into the modern intellectual foundation of economics. Traces changing economic thought from mercantilism through modern paradigms.

USP Code [WC<>COM3]

Restricted Restricted to Seniors in Economics, Business Economics, or a concurrent major with Economics.

Prerequisite: Senior standing and ECON 3010 and ECON 3020, or permission of instructor.

ECON4350 - Game Theory

0944

Credits: 3

Discusses a variety of important concepts from game theory - the study of how individuals interact strategically. The course focuses on the development of students' ability to think strategically. To that end the course covers basic concepts in game theory; notions related to credibility; and notions related to forming and evaluating strategies.

Prerequisite: ECON 3010 and ECON 3020.

ECON4360 - Seminar in Economics

Credits: 1-3

Max Credit (Max. 6)

An analysis of selected problems of economics theory. Topics vary with student interest and with current stress in economics theory.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010, ECON 3020.

ECON4390 - Mathematical Economics

Credits: 3

This course provides a broad set of practical tools that allow an analysis of important economic problems. The mathematical tools analyze human behavior and predict the response of economic systems to changes in circumstances and alternative policies, for applications such as investment project evaluation, capacity expansion, production decisions, or demand for various goods.

Dual Listed ECON 5390.

Former Course Number [4320]

Prerequisite: ECON 3010, ECON 3020, MATH 2205 or MATH 2355.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4420 - Seminar: Economics for ENR

Credits: 2-4

For students with little or no background in economics interested in economic perspectives on ENR. Emphasis is on integrated ecology-economics approach to investigate the economics environmental services, biological resources, and the ecosystems that contain them. CBEC and ECON majors cannot earn upper-division economics credit for this course.

Prerequisite: successful completion of Q and senior standing.

ECON4430 - Energy Economics

Credits: 3

Economics of energy, particularly oil and gas. Includes a discussion of the history of the oil industry, as well as aspects of contemporary markets. Apply a variety of concepts from microeconomics, particularly related to industrial economics.

Prerequisite: ECON 3020, MATH 2200 or MATH 2350.

ECON4450 - Monetary Theory

Credits: 3

Topics in this course center on theories of the value of money and price levels; central banking theory and policy; international exchange; world monetary institutions.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010, MATH 2200 or MATH 2350.

ECON4520 - Public Economics

Credits: 3

Studies the role of government within a market economy. The focus is on how governments fund and provide non-market goods demanded by society, e. g. , health care, military, education. Examines public goods, taxation, environmental challenges, affects on economic growth and stability, benefit-cost analysis, and state/local finance.

Prerequisite: ECON 3010, ECON 3020.

ECON4530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 5530.

Prerequisite: ECON 3020, and one of STAT 2010, STAT 2050, STAT 2070, or STAT 2110.

ECON4700 - Economic Development

Credits: 3

Encompasses the study of institutional and social, as well as economic, mechanisms for modernizing an economy while eliminating absolute poverty. Covers the economic concepts that help us explain why some countries are poor and how economic policies can assist those countries in becoming more developed. Case studies of specific country experiences are presented along with the economic theories in an integrated manner.

Prerequisite: ECON 3010.

ECON4710 - Why Economies Succeed and Fail

Credits: 3

The study of the successes and failures of alternative economic systems; origins, similarities, and differences across capitalist, socialist, and communist systems, including the UW, Chinese, European, Russian, Latin American, and African economies. What does history teach us? Are there different tools to grow economy?

Cross Listed INST 4710.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010; Q.

ECON4720 - International Trade

Credits: 3

The gains from specialization and trade are studied, as are explanations of trade patterns among countries, policies affecting trade such as tariffs, quotas, tax breaks, subsidies, cartels and price stabilization plans. Topics on labor migration and multinational corporations are covered.

When Offered (Normally offered fall semester)

Prerequisite: ECON 3020 and Junior class standing.

ECON4740 - International Economics and Policy

Credits: 3

The focus is on foreign exchange markets, balance of payments analysis and effects of international trade and capital flows on the domestic economy. Policies to correct payment deficits, gold, international liquidity and international financial institutions are studied.

Prerequisite: ECON 3010 and ECON 3020; QA.

ECON4800 - Labor Economics

Credits: 3

The study of labor supply, labor demand, wage determination, resource allocation and income distribution. Emphasis is on public

policy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010 and ECON 3020; QA.

ECON4820 - Industrial Organization and Public Policy

Credits: 3

The conduct and performance of market structures is analyzed. Structures include perfect competition, monopolistic competition, oligopoly and monopoly. Special attention is given to the study of strategic behavior in industry. Game theory is introduced. Public policy against monopoly practices is reviewed.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Q.

ECON4840 - Public Utility Economics

Credits: 3

The economic foundations of the public utility industries; the theory of public utility rate making; pricing and resource allocation; and the effectiveness of utility regulation.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 1010 and ECON 1020; QA.

ECON4900 - Problems in Economics

Credits: 1-4

Max Credit (Max. 4)

Students register as individuals or small groups to study any facet of economics not included in organized courses. Written report required. Limit 6 students per section.

Prerequisite: ECON 3020 and Senior class standing, or written consent of instructor.

ECON4910 - Special Topics in Economics

Credits: 3

Max Credit (Max. 6)

Topics are extensive in-depth investigations in specialty areas of the instructor(s). Investigations are anticipated to be interdisciplinary and may be in cooperation with non-UW entities. Limit 6 students.

Prerequisite: STAT 2050, ECON 3020, junior class standing, or written consent of instructor.

ECON5010 - Advanced Macroeconomic Analysis

0948

Credits: 3

An advanced application of economic theory to complex macroeconomics problems facing the economy of the state and nation, such as inflation, unemployment, and fiscal and monetary policies.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5020 - Advanced Microeconomic Analysis

Credits: 3

A rigorous course in the analysis of demand and the theory of consumer behavior, supply and the theory of the firm, market equilibrium and stability, and income distribution.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5110 - Advanced Topics in Economic Theory

Credits: 3

A study of selected topics in modern economic theory. Topics include growth theory, optimal control, dynamics, uncertainty, and game theory.

Prerequisite: ECON 5010, ECON 5020.

ECON5115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling.

Cross Listed STAT 5115.

Dual Listed ECON 4115.

Prerequisite: STAT 3050 or equivalent, STAT 4015/STAT 5015 recommended.

ECON5120 - Advanced Analysis II-Microeconomics

Credits: 3

Part of a sequence with ECON 5020. It is advanced microeconomic analysis covering general equilibrium and welfare economics, and advanced topics in consumption and production theory.

Prerequisite: ECON 5010, ECON 5020.

ECON5130 - Dynamic Optimization

Credits: 3

Covers methods for obtaining the optimal choice for economic variables that change over time, including calculus of variations and optimal control. These methods are applied to various dynamic economic problems, including optimal resource extraction, optimal capital allocation, and optimal growth.

Prerequisite: ECON 5020, ECON 5370.

ECON5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGE 5230.

Dual Listed ECON 4230.

Prerequisite: admission to the Master's Program in Economics.

ECON5300 - Game Theory

Credits: 3

Discusses a variety of important concepts in the application of game theory to modern microeconomics, including Nash equilibrium, subgame perfect equilibrium, and Bayesian Nash equilibrium. Time permitting, the class will also explore some relatively new uses of game theory, including evolutionary games and differential games.

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5310 - Research Methods

Credits: 3

A variety of topics of importance to the advanced student who is preparing to write his or her dissertation are discussed.

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5330 - Advanced Mathematical Economics

Credits: 3

Study of the principal mathematic techniques used in economic theory and modeling. Taught jointly with ECON 5020.

Prerequisite: graduate standing.

ECON5340 - Applied Econometrics

Credits: 3

Presents a thorough coverage of the general and normal linear regression models. Then proceeds to deal with the standard methodologies for estimating variations of this model including autocorrelation and hetero-skedasticity, extreme multicollinearity, disturbance-related sets of regression equations, simultaneous equation bias, and simultaneous equation models.

Prerequisite: ECON 3010, ECON 3020 and STAT 2010.

ECON5350 - Advanced Econometrics Theory I

Credits: 3

Review topics in probability theory and mathematical statistics. Also provides an introduction to the classical linear regression model, estimation, hypothesis testing, and prediction.

Prerequisite: Calculus and Basic Statistics.

ECON5360 - Advanced Econometrics Theory II

Credits: 3

Continue the analysis in ECON 5350 and cover topics such as panel data, limited-dependent variables, simultaneous systems, nonlinear models, Bayesian analysis, and time series methods.

Prerequisite: ECON 5350.

ECON5370 - Advanced Econometric Theory III

Credits: 1-3

Max Credit (Max. 9)

More in-depth coverage of topics in ECON 5350 and ECON 5360. Topics are selected based on current advancements in econometrics and students' research interests and may include generalized method of moments (GMM), nonparametric estimation, state-space models and the Kalman filter, mixed and nested logit models, multinomial discrete-choice models, and simulated maximum likelihood.

Prerequisite: ECON 5360.

ECON5380 - Experimental Methods in Economics

Credits: 3

Accepted experimental techniques in behavioral economics are studied. Critical review of previous experimental work is used to learn proper procedure. The value of subject control and creative construction is stressed.

Former Course Number [5320]

Prerequisite: graduate standing.

ECON5390 - Math Microeconomics

Credits: 3

This course provides a broad set of practical tools that allow an analysis of important economic problems. The mathematical tools analyze human behavior and predict the response of economic systems to changes in circumstances and alternative policies, for applications such as investment project evaluation, capacity expansion, production decisions, or demand for various goods.

Dual Listed ECON 4390.

Prerequisite: ECON 3010, ECON 3020, MATH 2205 or MATH 2355.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ECON5520 - Advanced Public Economics

Credits: 3

This course examines when and what policies maximize welfare, and their distributional impact. It addresses market failures and behavioral biases as potential justifications for government intervention. It also addresses preferences for redistributions, benefit-cost analysis, the economics of taxation, information and nudges.

Prerequisite: ECON 5010, ECON 5020 or equivalent.

ECON5530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 4530.

Prerequisite: admission to the Master's program in Economics.

ECON5640 - Financial Economics I

Credits: 3

Focuses on theoretical topics. Covers optimal portfolio selection under uncertainty and differential information as well as fundamental theoretical issues in banking and financial intermediation. In the latter part of the semester, students have an opportunity to present one of the assigned articles in class and lead a discussion on it, with active participation by the entire class.

Prerequisite: PhD-level microeconomics class (5020) and at least one 4000-level finance class.

ECON5650 - Financial Economics II

Credits: 1-3

Max Credit (Max. 6)

Topics include corporate finance, capital structure and the theoretical valuation of financial securities; also, asset pricing and financial econometrics.

Prerequisite: ECON 5640.

ECON5700 - Advanced Economic Development

Credits: 3

Explores basic growth theory, "economic history" models of economic expansion, theories of natural resource based development and trade-resource models, the role of institutions and public policy in influencing development, and the effects of population, trade and finance on development.

Prerequisite: ECON 5010, ECON 5020.

ECON5720 - Advanced International Economics

Credits: 3

Studies the economics of trade between nations. Important trade theories are studied along with their empirical evaluation. Time is devoted to the importance of international trade growth. Government trade policies are given theoretical and empirical evaluation.

Prerequisite: ECON 5020.

ECON5730 - Advanced Regional Analysis

Credits: 3

An advanced study of regional economic models. Included are structural and simulation models, regional growth models, and income estimation models. Emphasis is placed on quantitative analysis of regional growth and development.

Prerequisite: ECON 3010, ECON 3020 and 4600 or equivalents.

ECON5820 - Advanced Industrial Organization and Public Policy

Credits: 3

An application of market and price theory to concentration, size, competition; antitrust; close-knit and loose-knit combinations; business practices; price leadership and discrimination; delivered pricing; fair trade; unfair competition; and public policy.

Prerequisite: ECON 5010, ECON 5020, or equivalent.

ECON5830 - Empirical Industrial Organization

Credits: 3

Focuses on methods of analyzing data and testing hypotheses arising in the field of industrial organization. Much of the material builds on concepts introduced in ECON 5020 along with concepts presented in econometrics classes. Although many of the relevant concepts are primarily covered in ECON 5820, this course can be taken before or without taking ECON 5820.

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5890 - Seminar in Advanced Economics

Credits: 1-3

Max Credit (Max. 9)

An advanced tutorial-conference course intended to give graduate students experience in research in economic problems.

Prerequisite: consent of instructor.

ECON5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

ECON5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ECON5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ECON5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

0954

Note: credit in this course may not be included in a graduate program of study for degree purposes.

ECON5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ECON5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Ecosystem Science and Management

ESM4990 - Topics

Credits: 1-4
Max Credit (Max 8)

Topics pertaining to ecosystem science and natural resource management. Intended to accommodate instruction in various specialized subjects being offered for the first time or not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Prerequisite: Appropriate to the particular topic will be specified in the course advertisement.

ESM5995 - Topics

Credits: 1-4
Max Credit (Max 8)

Topics pertaining to ecosystem science and natural resource management. Intended to accommodate instruction in various specialized subjects being offered for the first time or not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Prerequisite: Appropriate to the particular topic will be specified in the course advertisement.

Educational Leadership

EDAD1000 - Schools and Democracy

0955

Credits: 1

Content-based course focuses on critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry; introducing students to the themes of the agenda of the National Network for Educational Renewal which focuses on the purpose of schools in America.

USP Code [I< >(none)]

EDAD5010 - Leadership for Curriculum Development

Credits: 3

Focuses on leadership skills that support curriculum and curriculum development in student learning and achievement. Key topics include: K-12 curriculum alignment; incorporating standards and community values; curriculum development, implementation, and evaluation; equity and access for diverse learning needs; and effective communication about curriculum.

Prerequisite: Admission to program or consent of instructor.

EDAD5020 - Leadership for School Organization

Credits: 3

Focuses on organizational leadership. Topics include: history of organizational leadership, leadership styles, change process, strategic planning, federal, state, and local governance as well as politics, power and policy, and school operations, to include budget, facilities, scheduling, recruitment, selection and induction.

Prerequisite: Admission to program or consent of instructor.

EDAD5030 - Leadership for School and Community Relations

Credits: 3

Focuses on the leadership role of the principal in building relations with students, staff, family, and community. Topics include school culture and climate, community and family involvement, public relations and communications, student discipline, and crisis management.

Prerequisite: admission to program or consent of instructor.

EDAD5040 - Leadership for Instruction

Credits: 3

Focuses on the principal as instructional leader. Topics include: developing a school vision of learning; employing effective instructional strategies, supervision and evaluation of teacher performance; integration of supervision, evaluation, and student achievement with professional development and professional learning communities, and instructional trends and issues within diverse learning communities.

Prerequisite: Admission to program or consent of instructor.

EDAD5050 - Leadership for Democratic Schools

Credits: 3

Designed to increase awareness of future school leaders of the principles of equity and excellence in education focused on democratic practices. Topics include democratic educational practices, ethical leadership, renewal of public schools, and educational leadership in urban, suburban, and rural communities, and in ethnically and socio-economically diverse settings.

Prerequisite: graduate standing.

EDAD5060 - Capstone in Educational Leadership

Credits: 3

Designed to assist the student in the creation of their master's program final project, which will be used as the written demonstration of mastery of the course outcomes as well as meeting the educational leadership (ELCC) standards.

Prerequisite: complete Core (EDAD) courses.

EDAD5080 - Introduction to School Law

Credits: 3

This course provides legal foundations of U. S. public schools and examines general principles of statutory and case law and applies judicial decisions to educational environments. Additionally, the course focuses on legal responsibilities, constraints, and opportunities for school leaders.

Prerequisite: admission into UW Educational Administration, K-12.

EDAD5150 - Assessment, Accountability, and Student Learning

Credits: 3

Focuses on the knowledge and skills necessary to lead schools in the alignment of standards, assessment, and instruction. Topics include analysis and interpretation of assessment results and educational data, recent history and current context of educational accountability in Wyoming, role of assessment and accountability in improving student learning.

Prerequisite: graduate standing.

EDAD5580 - Supervised Internship in Educational Administration

Credits: 1-8

Max Credit (Max. 12)

Expand student knowledge by providing an intensive clinical experience in educational administration along with other activities that involve practical experiences with peers and with practising K-12 administrators.

Prerequisite: Admission into the UW Educational Leadership Principal Certificate, Master's or EdD Doctoral program.

EDAD5600 - Educational Leader as Manager of Human Resources

0957

Credits: 3

Focuses on linking theory related to organizations (including Bureaucracy Theory), decision-making and organizational effectiveness with effective practices in management of organizational personnel.

Prerequisite: graduate standing.

EDAD5650 - Educational Leader as Communicator

Credits: 3

Focuses on inter- and intra-personal communication skills; group facilitation; organization and community public relations; parent and community involvement; negotiation; and conflict management.

Prerequisite: graduate standing.

EDAD5700 - Educational Leader For Instruction

Credits: 3

Focuses on the study of curriculum development and implementation, instructional practice, assessment and staff development.

Prerequisite: graduate standing.

EDAD5720 - Educational Leader as Change Agent

Credits: 3

Focuses on the study of change theory, change processes, change dynamics, decision-making models, and implementation of change in the organization setting.

Prerequisite: graduate standing.

EDAD5750 - Educational Leader for the Board and Community

Credits: 3

Concentrates on the administrator as the leader of an organization's board and community.

Prerequisite: graduate standing.

EDAD5800 - Educational Leader as Resource Manager

Credits: 3

Focuses upon the successful management and operation of the organizations fiscal resources, facilities, and support services. Includes work in the areas of transportation, food service, funding and budget, compensation, facilities, legal issues, calendar, special education, and policy influence.

Prerequisite: graduate standing.

EDAD5815 - Advanced School Law

Credits: 3

Designed to provide advanced information concerning K-12 school law as it relates to public education. Students will acquire a deeper understanding of legal issues that routinely arise in the K-12 school setting.

Prerequisite: Admission into the UW Educational Leadership EdD/ PhD Doctoral Program.

EDAD5850 - Educational Leader as Direction Setter

Credits: 3

Investigates how the educational leader can effectively create a futuristic vision and mission for the organization after assessing the existing culture and climate, and organizational readiness for change.

Prerequisite: graduate standing.

EDAD5870 - Seminar in Legal Issues

Credits: 1-6

Max Credit (Max. 8)

Advanced students in education work together intensively on current issues and problems relevant to educational administration and participate in systematic, critical interpersonal evaluation. Eight hours are permitted on a doctoral program.

Prerequisite: consent of instructor and graduate standing.

EDAD5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: advanced degree candidacy.

Educational Research

EDRE5000 - Educational Research

Credits: 3

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

EDRE5580 - Supervised Internship

Credits: 1-8

Max Credit (Max. 12)

EDRE5600 - Educational Research I: Descriptive Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

Prerequisite: EDRE 5530.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Educational Research: Correlational Research

Credits: 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5530 and EDRE 5600.

EDRE5630 - Educational Research IV: Multivariate Research

Credits: 3

An advanced educational research, statistics, and measurement course. Design and analysis of results from studies with several dependent and independent variables. Includes multivariate statistics such as MANOVA, discriminant analysis, canonical correlation, multidimensional scaling, structural equation modeling, logit regression. Measurement topics include generalizability theory, item response theory, equating, and standard setting.

Prerequisite: EDRE 5530, EDRE 5600, EDRE 5610, and EDRE 5620.

EDRE5640 - Introduction to Qualitative Research

Credits: 3

This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3

In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5530 and EDRE 5640.

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3

In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini study.

Prerequisite: EDRE 5530 and EDRE 5640.

EDRE5660 - Dissertation/Thesis Prospectus Writing

Credits: 3

Prepare graduate students to plan, develop, and write research proposals suitable for a dissertation/thesis. In consultation with the committee chair, students will focus on their own problem for research, conduct a literature review, choose appropriate methods for investigating the problem, and write a research proposal.

0961

Prerequisite: at least two of the following: EDRE 5600, EDRE 5610, EDRE 5620, EDRE 5630, EDRE 5640, EDRE 5645, EDRE 5655, EDRE 5670, or EDRE 5870.

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

EDRE5870 - Seminar

Credits: 1-8

Max Credit (Max. 8)

EDRE5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 9)

EDRE5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

Educational Studies

EDST1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

EDST1200 - Practicum I

Credits: 1

The course is designed to build educator identity, develop skills in observing the physical environment of educational settings, understand the responsibilities and ethics of educational professionals, and engage in and reflect on service learning activities. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Prerequisite: Background check on file in the Teacher Preparation and Advising Office.

EDST1230 - The Citizen Factory: Schooling and Democracy in the US

Credits: 3

Introduction to active learning, inquiry of pressing issues, and individual and collaborative processing of ideas through the curriculum, skills which will be reinforced throughout the baccalaureate experience. Open to all, the course appeals to any student with an interest in the public schools or schooling for democracy.

USP Code [I,L<>(none)]

EDST1500 - Education for Social Justice

Credits: 3

Provides an introduction to the College of Education, UW, and the field of education in general. Students discover the primary intellectual activities associated with diversity, multiculturalism, and social justice. Will be of most interest to those interested in teaching as a career.

USP Code [I,L<>(none)]

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP Code [CS<>H]

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

EDST2475 - Independent Studies

Credits: 1-3

Max Credit (Max. 9)

Offers students the opportunity to complete special course-related work independently under direction of a college faculty member. Directed readings are done and projects are completed. Requires at least two conferences with instructor.

Former Course Number [EDUC 2475]

Prerequisite: consent of instructor.

EDST3000 - Teacher as a Practitioner

Credits: 6

Begins Phase II of the teacher education sequence. Practicum experiences are integral. Links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

Prerequisite: Prerequisites: successful completion of WA or COM1, grade C or better in QA or Q, 2.75 cumulative GPA, Grade C or better in EDST 2480, grade C or better in ITEC 2360, Grade C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license.

EDST3100 - Teacher as Practitioner

Credits: 3

Begins Phase II of the teacher education sequence. Practicum experiences are integral. Links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP Code [WB,O<>COM2]

Former Course Number [EDUC 3000]

Prerequisite: successful completion of WA, grade of C or better in QA, 2.750 cumulative GPA, grade of C or better in EDST 3480 , grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

EDST3200 - Foundations of ESL Learning

Credits: 3

This course introduces students to basic principles of second language acquisition and factors that influence the processes. Understanding the processes of language acquisition, will better equip students to plan instructional strategies that facilitate English language learners' language.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

Prerequisite: Prerequisites: grade C or better in DEST 2450, sophomore standing, 2.5 cumulative gpa.

EDST3550 - Educational Assessment

Credits: 2

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs. Addresses the basic ideas of classroom test design.

Prerequisite: Prerequisites: Grade of C or better in QA or Q course, and EDST 2480, 2.75 Cumulative UW Institutional GPA.

EDST4000 - Foundations of Education for a Diverse Society

Credits: 3

Designed to acquaint students with philosophical, social, and political influences of North American education; to develop an understanding of the qualities of critical thinking for reflective teaching; to raise awareness of contemporary critical issues in education; to develop an understanding of individual differences, diversity, and multiculturalism. Practicum included.

Prerequisite: earned bachelor's degree from an accredited institution, a cumulative UW institutional GPA of 2.750 or better and EDST 2450.

EDST4050 - Diversity & Social Justice: Theory and Practice

Credits: 3

Addresses multiple disciplines. Expose students to domestic and international perspectives of diversity and social justice. This course will move students from a theoretical lens of diversity and social justice toward becoming change agents.

Prerequisite: Junior/senior standing and completion of EDST 1500 or WMST/CHST/AMST/AAST/NAIS 1040.

EDST4110 - Foundations of American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political and societal factors before, during and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed NAIS 4110.

USP Code [D<>(none)]

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

EDST4600 - Diversity & Social Justice Minor Capstone

Credits: 3-6

Max Credit (Max. 6)

In community-engaged learning, sometimes called "service learning," students have the privilege of gaining work experience with the benefit of a community mentor. This course is a seminar class with a field experience. Students will meet as a group as

well as assigned a community field placement experience.

Electrical Engineering

EE1010 - Introduction to Electrical and Computer Engineering

Credits: 1

Introduction to Electrical and Computer Engineering through a laboratory experience. Students perform both hardware and computer laboratory exercises in a wide range of areas of electrical and computer engineering.

EE1101 - First-Year Seminar

Credits: 3

USP Code [(none)< >FYS]

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE2390 - Digital Systems Design

Credits: 4

Binary logic, digital logic gates, reduction of Boolean expressions, combinational logic design. MSI and LSI combinational logic ICs, flip-flops, synchronous and asynchronous sequential systems design, MSI and LSI sequential system ICs, and algorithmic state machines.

Prerequisite: COSC 1010 or COSC 1015 or COSC 1030 or ES 1060, and MATH 2205.

EE2800 - Problems In:

Credits: 1-3

Max Credit (Max. 3)

Section 1 is individual study. Other sections are group study by seminar or class format. Features topics not included in regularly offered courses.

Prerequisite: consent of instructor.

EE3150 - Electromagnetics

Credits: 3

A thorough study of static electric and magnetic fields using vector methods with an introduction to dynamic fields.

Prerequisite: ES 2210, or ES 2215 and ES 2216, MATH 2210, and PHYS 1220 or concurrent enrollment.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution; difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

EE3310 - Electronics I

Credits: 4

Physical characteristics and models of semiconductor devices with application to electronic circuit design. Diode circuits, single transistor amplifiers, biasing, and load lines. Laboratory.

When Offered (Offered fall semester only)

Prerequisite: PHYS 1220 or PHYS 1320 or EE 3150, and EE 2220.

EE3330 - Electronics II

Credits: 4

Current sources, differential and multistage amplifiers; circuits with ideal and non-ideal operational amplifiers; low and high band frequency response, feedback, stability, gain and phase margin of amplifiers; output stages, class A and push-pull; monolithic operational amplifier; oscillators; transistors as switches and introduction to digital electronic circuits. Laboratory.

When Offered (Offered spring semester only)

Prerequisite: EE 2220 and EE 3310.

EE3510 - Electric Machines and Power Systems

Credits: 4

Polyphase AC circuits; single phase and polyphase transformers; AC synchronous and induction machines; introduction to power systems and per unit system; transmission line parameters; steady-state operations of transmission lines; power flows; transient stability; synchrophasor system and its applications.

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/COSC 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

EE4075 - C++ with Numerical Methods for Engineers

Credits: 4

Introduction to the fundamentals of practical engineering programming, using specific applications of numerical methods to demonstrate these principles. The use of an object oriented approach using C++ in an efficient manner is emphasized. Other solution approaches, including C and Matlab will be discussed as appropriate.

Note: Credit will not be allowed in both EE 4075 and ES 3070.

Prerequisite: MATH 2205 and (COSC 1010, COSC 1015, or ES 1060) and (MATH 2250 or MATH 2310) or consent of instructor.

EE4220 - Probabilistic Signals and Systems

Credits: 3

Fundamentals of probability and statistics for engineers; reliability in engineering systems; random processes, statistical estimation, auto/ cross correlation and power spectral density functions and linear filtering of random signals.

Prerequisite: MATH 2210 and EE 3220. EE 3220 may be taken concurrently.

EE4245 - Digital Signal Processing

Credits: 3

Sampling and oversampling A/D's; FIR and IIR digital filter design, effects of quantization, practical realizations; applications of the discrete and fast Fourier Transform (DFT and FFT); correlation, periodograms, window effects, multi-rate techniques, multi-dimensional signal processing, and other topics in digital signal processing.

Prerequisite: EE 3220.

EE4250 - Network Synthesis

Credits: 3

Characterization and design specification of analog filters. First and second order passive and active filters. Butterworth and Chebyshev filter responses. Audio frequency active filter synthesis using operational amplifiers. Introduction to frequency transformations and sensitivity.

Prerequisite: EE 2220 and EE 3330 or concurrent enrollment.

EE4300 - Microwave and RF Circuits

Credits: 3

Analysis and design of microwave and RF circuits with applications to communication and radar systems. Review of transmission line concepts and the Smith Chart, scattering parameters, microstrip lines, and matching networks. Analysis and design of microwave and RF amplifiers, oscillators, and mixers.

Dual Listed EE 5300.

Prerequisite: EE 3150 or PHYS 1220, EE 3330 or concurrent enrollment, or consent of instructor.

EE4330 - Electronic Systems Design

Credits: 4

Analog integrated circuits such as amplifiers (operational, instrumentation, isolation, video, transconductance, comparator, logarithmic and exponential); voltage regulators; analog multipliers and dividers; AC to DC converters; sample and hold circuits; digital to analog converters; analog to digital converters; function generators; phase locked loops. Includes design procedures for electronic systems implementing analog integrated circuits. Laboratory.

Former Course Number [4370]

Prerequisite: EE 2390 and EE 3330.

EE4340 - Semiconductor Materials and Devices

Credits: 3

Physical properties of semiconductor materials and devices, including crystal lattices and energy bands, carrier generation, transport, and recombination. PN, metal-semiconductor, and heterojunction operation. Field Effect Transistors, including Metal Oxide Semiconductor (MOSFET), Junction (JFET), MEtal Semiconductor (MESFET), and High Electron Mobility (HEMT) transistors. Bipolar Junction (BJT) and Heterojunction (HBT) Transistor operation.

Cross Listed PHYS 4340.

Prerequisite: PHYS 1220 or PHYS 1320.

EE4345 - Hardware Digital Signal Processing

Credits: 3

Hands-on introduction to real-time digital signal processing. Programming DSP algorithms using C on modern DSP hardware. Students gain deep understanding of fundamental DSP concepts by implementing selected applications including sampling, reconstruction, FIR and IIR filters, signal generation, and FFT. Hardware concepts include EDMA, memory maps, interrupts, buffered serial ports.

Prerequisite: EE 3220.

EE4360 - VLSI Design

Credits: 3

Introduction to CMOS processing, MOS fundamentals including devices models; switching and timing; analog subcircuits and amplifiers; inverters and CMOS gates; concept of standard cells and fully custom design; use of SPICE, digital simulation, and chip layout and verification software.

Prerequisite: EE 2390, and EE 3330 or concurrent enrollment.

EE4390 - Microprocessors

Credits: 3

Design of microcomputers, controllers and instruments which use microprocessors. Semiconductor memory design, CPU architecture, bus structure and timing, input-output interfaces and devices, assembly language programming, assemblers, compilers, editors and simulators. Emphasizes design techniques. Laboratory.

When Offered (Normally offered once a year)

Prerequisite: EE 2390.

EE4440 - Communication Theory

Credits: 3

Amplitude and angle modulation and demodulation; digital baseband and carrier communication systems; performance of communication systems; and current topics in communication systems.

When Offered (Normally offered once a year)

Prerequisite: EE 3220 and EE 4220.

EE4490 - Hardware Descriptive Language (HDL) Digital Design

Credits: 3

Hardware Description Language design of digital systems. Industrial CAD tools are used to produce a functional description of hardware that is both simulated and then synthesized into hardware. Methods to describe both combinational logic and synchronous devices are given. Devices such as CPLDs and FPGAs are targeted in this design process. Emphasizes design techniques.

Prerequisite: EE 2390.

EE4510 - Power Systems

Credits: 3

Electric power distribution and transmission. Distribution systems, transmission line calculations, installation and protection; substations, corona, protective relaying and carrier current communication and telemetering. Introduction to system stability studies.

Prerequisite: ES 2210 and EE 3510.

EE4590 - Real Time Embedded Systems

0970

Credits: 3

Emphasizes a systems approach to real time embedded systems. Students are expected to apply methodical system design practices to designing and implementing a microprocessor-based real time embedded system. Students employ a robot-based educational platform to learn the intricacies of real time embedded systems, distributed processing, and fuzzy logic. Students learn processor input/output interfacing techniques. Students use state-of-the-art design and troubleshooting tools.

Dual Listed EE 5590.

Prerequisite: EE 4390.

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

EE4621 - Honors Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers. Honors students will at the end of the semester design a high-performance control system for a sophisticated plant with realistic feedback limitations.

Prerequisite: EE 2220 or ME 3020.

EE4800 - Problems in _____

Credits: 1-6

Max Credit (Max. 6)

Section 1 is individual study. Other sections are group study by seminar or class format. Features topics not included in regularly offered courses.

Prerequisite: consent of instructor.

EE4820 - Senior Design I

Credits: 2

Students choose a senior design project and complete the preliminary design. This stage of senior design includes investigation of alternative solutions that meet the project's requirements, cost analysis, and building the prototype circuit. Periodic oral and written project progress reports are required.

When Offered (Offered fall semester only)

Prerequisite: EE 2220, EE 2390, and EE 3310 or concurrent enrollment, plus 6 hours of 4000 level EE/BE classes, or concurrent enrollment. COM2 must be passed with a C or better grade.

EE4830 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in EE 4820. The final result of the senior design project includes assembly of a PC board hardware that meets the project's requirements and final report describing the design procedure, designed hardware and software, and results of final testing. Periodic oral and written project progress reports are required.

When Offered (Offered spring semester only)

Prerequisite: EE 4820 and selected courses in the area of the design project.

EE4870 - Computer Network Hardware

Credits: 4

Basic LANs, Ethernet LAN architecture, and classical Ethernet CSMA/CD MAC protocol. 10Mbps, 100 Mbps, and gigabit Ethernet architecture. Introduction to switching, queuing theory, architecture, design and performance analysis of switch fabrics. Architecture, design, algorithms and performance analysis of Routing. Cellular Networks. TCP/IP Protocol.

Prerequisite: EE 2390.

EE4990 - Advanced Microprocessors

Credits: 3

Architecture and instruction set of Intel family of microprocessors; Intel System Development Kit and its monitor program; Microsoft Macro Assembler (MASM) and Visual C/C++ Express; modular programming; High level language compilers of object code; Interface design issues of peripheral devices to Personal Computer.

Prerequisite: EE 4390.

EE5210 - Systems Theory

Credits: 3

Review of linear time-invariant systems theory. Laplace, Fourier, and Z-transforms. Introduction to complex variable theory and its application to integral transform inversion. State variable formulation of physical systems. Application of linear algebra and matrices to the analysis of finite-state constant differential systems. Controllability and observability.

Prerequisite: EE 4620.

EE5300 - Microwave and RF Circuits

Credits: 3

Analysis and design of microwave and RF circuits with applications to communication and radar systems. Review of transmission line concepts and the Smith Chart, scattering parameters, microstrip lines, and matching networks. Analysis and design of microwave and RF amplifiers, oscillators, and mixers.

Dual Listed EE 4300.

Prerequisite: EE 3150 or PHYS 1220, EE 3330 or concurrent enrollment, or consent of instructor.

EE5330 - Advanced Electronic Systems Design

Credits: 3

Theory of errors. High accuracy: multiplexers; voltage references; sample and hold circuits. Amplifiers: programmable gain; high speed voltage feedback; current feedback. Noise in integrated circuits. Pulse code modulation ADC; sigma delta ADC; oversampling; undersampling. Analog and digital audio systems. CD players. Superheterodyne and digital receivers. Signal transmission and conditioning. Hardware design techniques.

Prerequisite: EE 4330 and EE 4210.

EE5340 - Advanced Semiconductor Material and Devices

Credits: 3

Advanced semiconductor materials and device concepts including noise in semiconductors, heterostructure and quantum fundamentals, high power materials and devices, high performance transistors including the MESFET, HEMT, and HBT. Also discusses GUNN and IMPATT diodes, Resonant Tunneling devices, and future computing devices based on the quantum properties of semiconductors.

Prerequisite: EE 4340.

EE5350 - Optoelectronic Semiconductor Materials and Devices

Credits: 3

Optoelectronic properties of semiconductor materials and devices. Includes a review of the basic electronic properties of semiconductor materials, epitaxial growth, optical properties including absorption and emission of light, effects of quantum confinement and strain, and Heterostructures. Operation and optimization of basic optoelectronic devices including: photodetectors, LEDs Lasers, and modulators.

Prerequisite: EE 4340.

EE5360 - Digital VLSI Design

Credits: 3

Digital building blocks, stick diagrams, CMOS cells and arrays, CMOS digital subsystems and systems. Chip design software such as layout, simulators and digital synthesis using HDL. Digital design verification and timing issues.

Prerequisite: EE 4360.

EE5390 - Computer Architecture

Credits: 3

Examines the various methodologies used in the design of high-performance computer systems. Topics include CISC and RISC architecture and instruction sets, pipelining, instruction-level parallelism, memory hierarchy (including cache) design and

0973

computer networks.

Prerequisite: EE 4390.

EE5400 - Introduction To Robotics

Credits: 3

Representation of pose using Euler angles, quaternions and homogeneous coordinate transformations. Forward and inverse kinematics of rigid body manipulators. Velocity and force transformation in a rigid robot using Jacobians. Trajectory generation using splines. Robotic vision for depth measurement. Analysis of actual robotic systems.

Prerequisite: MATH 2250.

EE5410 - Neural and Fuzzy Systems

Credits: 3

Theory of feed forward and recurrent neural networks. Supervised and unsupervised learning theories. Fuzzy logic and systems. Associative memories. Matching and self-organizing networks. Application of neural and fuzzy systems.

Prerequisite: EE 3220.

EE5430 - 3-D Computer Vision

Credits: 3

This course is intended to provide a mathematical framework for describing three dimensional imaging and computer vision. Topics include 3-D coordinate transforms, image formation, camera calibration, reconstruction from two views, SIFT detection, hidden Markov models, Markov random fields, and "bag-of-words" visual description.

Prerequisite: EE 4220, MATH 2250.

EE5450 - Topics in Robotics

Credits: 3

Topics vary between offerings, but include exponential coordinates for describing rigid motion, parallel machines, robotic vision, actuators and sensors, calibration, quaternions, motion planning, multifinger grasp dynamics, singularities, and singularity-free design, and limited-DOF machines.

Prerequisite: MATH 2250 senior or higher level standing and permission of the instructor.

EE5460 - Probabilistic Robotics

Credits: 3

Fundamental theory underlying the robust sensing and planning used in self-driving machines is developed. Topics covered are: Bayesian, Kalman, and Particle Filters; simple ground robot motion models; mobile robot localization; simultaneous localization and mapping; partially observable Markov decision processes.

Prerequisite: EE 4220.

EE5490 - Convex Optimization

Credits: 3

Covers fundamentals of numerical convex optimization. These methods have potential applications in many fields, so the goal of the course is to develop the skills and background needed to recognize, formulate, and solve convex optimization problems. Covers convex sets, convex functions, convex optimization problems and applications.

Prerequisite: MATH 2250 and senior or higher level standing.

EE5590 - Real Time Embedded Systems

Credits: 3

Emphasizes a systems approach to real time embedded systems. Students are expected to apply methodical system design practices to designing and implementing a microprocessor-based real time embedded system. Students employ a robot-based educational platform to learn the intricacies of real time embedded systems, distributed processing, and fuzzy logic. Students learn processor input/output interfacing techniques. Students use state-of-the-art design and troubleshooting tools.

Dual Listed EE 4590.

Corequisite: EE 4390.

EE5600 - Statistical Signal Processing in:

Credits: 2-4

Max Credit (Max. 9)

Topics vary between offerings but include signal detection, feature extraction and pattern recognition, information theory and coding, spectral analysis, identification, speech processing, image processing, and seismic processing.

Prerequisite: EE 4220.

EE5610 - Random Processing Theory I

Credits: 3

Introduction to statistical models. Applications of sampling theorems. Correlation functions and spectra. Shot noise and thermal noise. Introduction to measurements and computational techniques. Nonlinear random processes. Term papers on special problems.

Prerequisite: EE 4220.

EE5620 - Digital Image Processing

Credits: 3

Methodologies and algorithms for processing digital images by computer. Includes gray level transformations, histogram analysis, spatial domain filtering, 2D Fourier transforms, frequency domain filtering, image restoration, and reconstruction of

computer tomography (CT) medical images.

When Offered (Offered fall of even-numbered years)

Former Course Number [4530]

Prerequisite: EE 3220 or equivalent background.

EE5625 - Spectral Analysis

Credits: 3

Spectral estimation including nonparametric methods such as Welch and Blackman-Tukey; modern parametric methods for AR, MA and ARMA spectra including Yule-Walker and Levinson-Durbin. Parametric line spectral subspace methods including MUSIC and ESPRIT. Filterbank and spatial methods such as beamforming.

Prerequisite: EE 3220, EE 4220 or equivalent.

EE5630 - Advanced Image Processing

Credits: 3

Introduces students to advanced aspects of image processing (IP), using specific applications to demonstrate these principles. Concepts such as medical imaging; color IP; wavelets and multiresolution IP; image compression; morphological IP; image segmentation, representation, description and understanding are covered.

Prerequisite: EE 5620.

EE5640 - Adaptive Filters and Signal Processing

Credits: 3

Adaptive filtering including eigenanalysis, low-rank modeling, Wiener filters, linear prediction, steepest descent methods, least mean-squares and recursive least squares methods, adaptive beamforming. Performance, convergence, and stability issues. Realization techniques.

Prerequisite: EE 4220.

EE5650 - Object and Pattern Recognition

Credits: 3

Introduces students to both fundamental and advanced aspects of object and pattern recognition, using specific applications to demonstrate these principles. Concepts such as Bayesian, maximum-likelihood, principal components, nonparametric, linear discriminant, multi-layer neural networks, etc., and the trade-offs and appropriateness of classification techniques are covered.

Prerequisite: EE 4220.

EE5660 - System Identification

Credits: 3

Fundamental and advanced topics in identification of system models from measured data. A variety of model structures are

studied such as ARX, ARMAX, and State Space. Both non-parametric and parametric identification techniques are investigated with applications to real world systems and data. Experiment design and model validation are also examined.

Prerequisite: EE 4220.

EE5670 - Digital Image Formation

Credits: 3

This course introduces fundamental aspects of practical digital image formation, using specific applications to demonstrate these principles. Standard CCD and CMOS cameras (both still and video) and standard camera lens systems are assumed.

Prerequisite: EE 3220 or equivalent background.

EE5700 - Power Engineering

Credits: 2-6

Max Credit (Max. 6)

Design of transmission lines and distribution systems. Coordination studies. System stability studies, load distribution and dispatching. System interconnections. Correlation of machines and transmission systems.

Prerequisite: EE 3510.

EE5740 - Digital Control Systems

Credits: 3

Mathematical models of digital control system components; Sample-and-Hold Device, A/D and D/A conversion, Pulse transfer function, Modified Z-transform; Jury's and Routh-Hurwitz test, Bilinear Transformations, Nyquist Criterion, Root Locus; Frequency Domain Techniques (Bode Diagrams, Nichols Charts); Digital Control Design, Observers; DT state space representation; Sampling and Quantization, Aliasing. Design Project.

Prerequisite: EE 4620.

EE5770 - Non Linear Systems

Credits: 3

Time variable parameter systems, approximation methods for small nonlinearities. Phase-plane methods. The second method of Liapunov. Describing function. Optimum switched systems. Adaptive control systems.

Prerequisite: EE 4620.

EE5880 - Problems In Electrical Engineering

Credits: 1-6

Max Credit (Max. 9)

A graduate special topics course in which advanced developments are studied. Section 1 is individual study. Other sections are primarily seminar format in which participants present reports on the subject under study.

Prerequisite: Prior approval of the instructor is required.

EE5885 - Special Topics in Electrical Engineering

Credits: 1-6

Max Credit (Max. 30)

Features topics not included in regularly offered classes. Normally offered in regular class lecture format; may include a lab component if appropriate.

Prerequisite: Prior approval of the instructor is required.

EE5890 - Reliability of Engineering Systems

Credits: 3

This course will cover general reliability modeling and evaluation; probability and stochastic processes; system modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis, decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Prerequisite: MATH 2310 with a grade of C or better.

EE5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

EE5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EE5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EE5959 - Enrichment Studies:

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

EE5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 12)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

EE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

EE5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Elementary Education

EDEL1000 - Exploring Hot Topics in Education

Credits: 2
Academic, content-based course designed for first year students. Focuses on critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry.

USP Code [L,L<>(none)]

EDEL1010 - Field Experience for Prospective Elementary and Secondary Teachers

Credits: 1-4

Introductory course in teacher education. Provides an overview of the theory and practice of what is required to become and be a teacher. An initial practicum is included.

Cross Listed EDSE 1010.

When Offered (Offered based on sufficient demand and resources.)

Former Course Number [EDCI 1010]

Prerequisite: sophomore standing.

EDEL1200 - Introduction to Elementary Education

Credits: 3

This course is designed to introduce first-year elementary education majors to educational issues relevant to teaching, learning, curriculum, assessment, school politics, and special needs of students in elementary settings.

EDEL1430 - Life Science in the Elementary School

Credits: 1

Covers selection of basic life science concepts, materials and curricula appropriate for elementary school. This course parallels the content of LIFE 1020 and concurrent enrollment in LIFE 1020 is expected.

Former Course Number [EDCI 1430]

EDEL2000 - Undergraduate Seminar in (TOPIC)

Credits: 1-2

Max Credit (Max. 8)

Designed to discuss strategies and instructional activities used in content courses the students take and to be a linkage between what the prospective teachers study and what they will teach. It provides the opportunity to discuss appropriate activities, strategies and programs in a teaching area related to the content area being studied.

Cross Listed EDSE 2000.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [EDCI 2000]

Prerequisite: consent of instructor.

EDEL2140 - Teaching Literacy in the Elementary School

Credits: 3

Provides an acquaintance with basic assumptions underlying curriculum and processes in literacy and to give opportunity for selecting and using instructional materials.

Prerequisite: ENGL 1010, sophomore standing, admitted into Elementary Education program.

EDEL2170 - Art in the Elementary School

Credits: 3

Provides a foundation for understanding art in order to facilitate the teaching of art and the integration of art education into the elementary school curriculum. Involves both applied reading and studio production. Attention is given to development of artistic skills and meaningful art experiences based on DBAE principles.

USP Code [CA<>(none)]

Former Course Number [EDCI 3170]

Prerequisite: junior classification,

EDEL2275 - Literature for Young Children

Credits: 3

Introduce major genres and conventions. Will develop critical skills for reading and writing about children's literature and culture; interpretive skills to enrich the understanding of literature for readers

USP Code [CH<>(none)]

Prerequisite: ENGL 1010 and sophomore standing.

EDEL2280 - Literature for Children

Credits: 3

A survey course, the purpose of which is to prepare prospective elementary teachers and library-media specialists to provide knowledgeable service in the use of print and non-print materials for children. Includes study of evaluative criteria, wide reading, viewing and listening as well as discussion of literature for children.

USP Code [CH<>H]

Former Course Number [LIBS 2280]

Prerequisite: successful completion of ENGL 1010, sophomore standing, education major.

EDEL3140 - Teaching Reading in the Elementary School

Credits: 2-4

Provides an acquaintance with basic assumptions underlying curriculum and processes in reading and to give opportunity for selecting and using instructional materials.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [EDCI 3140]

Prerequisite: junior standing,

EDEL3710 - Disciplinary/Genre-Based Literacy

Credits: 3

Introduction to instruction in genre-specific and disciplinary appropriate literacy practices, with a focus on characteristics of a variety of genres and disciplines and how those characteristics inform appropriate comprehension instruction.

Prerequisite: EDEL 2140.

EDEL3720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Focuses on the causes of student difficulties with reading and writing and assessment and instruction for students with such difficulties.

Prerequisite: EDEL 2140.

EDEL4000 - Becoming a Reflective Practitioner: Practicum

Credits: 2

Part of Phase IIIa of the teacher education program. Practicum experience is integral to EDUC 4250 and must be taken concurrently.

Former Course Number [EDUC 4000]

Prerequisite: 2.500 cumulative GPA, successful completion of EDST 3100 (grade, interview and portfolio).

EDEL4109 - Elementary Humanities Education

Credits: 5

Content and pedagogy to develop the reflective practitioner of teaching humanities in the elementary school. The following themes are addressed: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4109]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EDST 2550; concurrent enrollment in EDEL 4309 and EDEL 4409.

EDEL4309 - Elementary Literacy Education

Credits: 2-5

Max Credit (Max. 6)

Encompasses content and pedagogy to develop the reflective practitioner for teaching literacy in the elementary school.

Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4309]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; Grade C or better in EDST 3100, successful completion of specific content courses required in major; grade C or better in EDST 2550. Concurrent enrollment in EDEL 4109 and EDEL 4409.

EDEL4409 - Elementary Math/ Science Education

0982

Credits: 5

Max Credit (Max. 6)

Includes content and pedagogy in teaching math/science in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP Code [WC<>(none)]

Former Course Number [EDUC 4409]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EST 2550; concurrent enrollment in EDEL 4109 and EDEL 4309.

EDEL4500 - Residency in Teaching

Credits: 1-16

Max Credit (Max. 24)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDSE 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDEL4740 - Field Studies in (TOPIC)

Credits: 1-12

Offered only through extension services. Broad and flexible and can be utilized in numerous situations to meet local needs. Credit in this course is not applicable toward advanced degrees.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [EDCI 4740]

Prerequisite: 6 hours of education.

EDEL4975 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction.

Cross Listed EDSE 4975.

Former Course Number [EDCI 4975]

Prerequisite: 12 hours of education courses and consent of instructor.

Engineering Science

ES1000 - Orientation to Engineering Study

Credits: 1

Skills and professional development related to engineering. Involves problem solving, critical thinking and ethics, as well as activities to help transition to university environment. Required of all freshmen entering engineering curricula.

USP Code [I,L<>(none)]

Note: Students with credit in UNST 1000 may not receive credit for this course.

ES1002 - Introduction to Engineering Information Literacy

Credits: 0.5

Offers transfer students the opportunity to satisfy the College of Engineering and Applied Science requirements for the Information Literacy and the initial O component of the University Studies Program.

USP Code [L<>(none)]

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES1061 - Engineering Problem Solving with Spreadsheets

Credits: 1

An introduction to engineering problem solving through the use of computer spreadsheets. Topics include functions, referencing, conditional statements, graphs, trendlines, and iterative solvers.

Prerequisite: MATH 1400 or MATH 1450 or ACT Math Score of 25 or Math Placement Exam score of 4.

ES1062 - Introduction to Structured Programming

Credits: 1

Introduction to structured programming through the use of computer applications. Topics include built-in functions, user functions, logical operators, flowcharts, pseudo code, selection structures, repetition structures, and plotting.

Prerequisite: ES 1061.

ES1063 - Graphical Communication and Solid Modeling

Credits: 1

An introduction to solid models and graphical communication. Topics include geometric relationships, solid parts, solid assemblies, constraints, orthogonal projection, multiview representation, dimensioning, and drawing annotation.

Prerequisite: MATH 1400 or MATH 1450 or ACT Math Score of 25 or Math Placement Exam score of 4.

ES1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2215 - Electric Circuit Analysis Lecture

Credits: 2

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. No laboratory.

Restricted Available for Outreach students only.

Prerequisite: MATH 2205.

ES2216 - Electric Circuit Analysis Laboratory

Credits: 1

Laboratory activities focusing on basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits.

0985

Prerequisite: ES 2215.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

ES3001 - International Systems Engineering

Credits: 3

This 4-week service learning course will offer students hands-on experience in fabricating, assembling and installing a system as part of a team. Students will learn about materials, welding, electrical systems, and aerodynamics, all the while experiencing international life and cultures.

Prerequisite: MATH 2310.

ES3010 - Culture and Engineering in Latin America

Credits: 3

Engineering and Culture of Latin America - A study of ancient engineering problems in Latin America that are applicable to civil engineering. Students will be exposed to cultural aspects that influenced Mayan infrastructure.

USP Code [(none)<>H]

Prerequisite: ES 2110 or PHYS 1210.

ES3020 - Comparison of Entrepreneurial Ecosystems

Credits: 3

The goal of this course is to expose students to different entrepreneurial ecosystems and let them think about how the environment, legal, technical, cultural, and economic, could impact their entrepreneurial endeavors. The class will accomplish this by visiting a developed country (e.g. Spain) and a developing country (e.g. Morocco) to learn about the ecosystems and talk with entrepreneurs to see how the forces impacted their startups.

Cross Listed ENTR 3020.

ES3100 - Internship Prepared

Credits: 1

The purpose of this Internship Preparation course is to prepare students for applying to internships in all applicable facets. Students will learn how to build their resume, write job specific cover letters, search for positions, and communicate with employers effectively. This course is a self-study with assignments given weekly. Students will be required to complete assignments and schedule individual appointments with an instructor in order to follow up on assignments.

Prerequisite: 6 credits within your discipline.

ES3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ES4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department.

Cross Listed ATSC 4580/BE 4580/CE 4580/CHE 4580/COSC 4580/ESE 4580/PETE 4580.

Restricted Must be in the Engineering Honors Program.

Prerequisite: junior or senior standing.

ES4910 - Survey of Engineering Management

Credits: 3

Offers a survey of a variety of topics related to engineering management. The objective is to introduce students to some of the nontechnical aspects of engineering practice and management.

Prerequisite: junior standing in an engineering degree program.

ES4920 - Entrepreneurship for Engineers

Credits: 3

Traditional engineering education does not prepare graduates for work in entrepreneurial ventures. The goal of this course is to have students demonstrate skills in developing business ideas, performing preliminary market research, estimating cash flow, and launching a business.

Prerequisite: 9 hours within an engineering discipline and junior standing.

ES4970 - Engineering CO-OP

Credits: 1

Max Credit (Max. 6)

Provides a mechanism for students on engineering co-op to maintain continuous registration and have the co-op experience reflected on their transcript. Credit earned will not normally count toward graduation credit.

Prerequisite: must be involved in an engineering co-op experience.

ES5600 - Research Data Management

Credits: 3

A general approach to research data management for graduate students and researchers. Topics include: the case for data management, data management planning, meeting grant requirements, formatting and organizing, storing and transferring, legal and ethical issues, strategies for research teams, sharing data, and publishing, citing, and rights to research data.

Cross Listed GRAD 5600/LBRY 5600.

Prerequisite: graduate standing.

Energy Resources

ERS1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ENR 1000.

USP Code [O<>PN]

ERS1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ERS1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ECON 1300.

USP Code [CS,G<>H]

ERS1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed GEOL 1650.

USP Code [(none)<>PN]

ERS2000 - Ethics & Leadership

Credits: 3

This course provides an examination of the principles and practice of (1) personal, group and organizational leadership; and (2) ethics and morals as they relate to conduct in the leadership context.

Prerequisite: USP WA/COM1.

ERS2010 - Introduction to Land Management

Credits: 2

Provides an introduction to land management in the petroleum industry. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry.

ERS2500 - Communication Across Topics in Energy

Credits: 3

Students will develop interdisciplinary communication skills from an Energy Resources perspective. Communication will include oral, digital, and written forms. Audiences for communication projects will often be live, and from a variety of backgrounds.

USP Code [(none)<>COM2]

Prerequisite: WA/COM1.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

ERS4010 - Petroleum Exploration and Production

Credits: 3

The purpose of this course is to provide students with information and skills necessary to understand the oil and gas modeling process from exploration to production. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, reservoir characterization, reservoir production, well planning and decision making.

Cross Listed GEOL 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

ERS4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed CHEM 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

ERS4100 - Property I

Credits: 3

Property I addresses the nature of property ownership and the rights associated with property as well as the acquisition and transfer of ownership rights in property and the sharing of ownership rights over time, including estates, future interest, and concurrent estates.

ERS4105 - Property II

Credits: 3

Property II covers rights inherent to the ownership of property and public limitations on those rights.

Prerequisite: ERS 4100.

ERS4110 - Law of Contracts

Credits: 3

The Law of Contracts addresses the formation of a contract and the meaning of agreements and the justification of non-performance and breach.

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4130 - Oil and Gas Law

Credits: 3

Focuses on the basic legal rules and principles governing the ownership and development of oil and gas, derived from a combination of property, contract, administrative, tort, and constitutional law.

ERS4135 - Advanced Oil and Gas Law

Credits: 3

Covers oil and gas financing arrangements including farmout, JOA, and production sharing agreements, conservation and oil/gas commission practice, drilling/ service agreements, downstream marketing and purchase agreements, purchase/sale of petroleum properties, and oil/gas development on federal/indian lands. Includes basic introduction to taxation of mineral interests including depreciation, intangible drilling costs, and depletion.

USP Code [{none}< >COM3]

Prerequisite: ERS 4130.

ERS4960 - Energy Field Studies1

Credits: 1-3

Various facets of energy resource management and development are covered by visits to oil and gas wells, coal mines, power plants, wind farms, and other energy production and research sites. A trip is normally planned for 5 to 6 days.

Prerequisite: WB; ERS 1000/ENR 1000 or ECON 1300/ERS 1300. Undergraduate Research.

ERS4970 - Internship

Credits: 1-3

Max Credit (Max. 3)

A formalized internship designed to provide students with relevant practical experience in the energy sector allowing synthesis and application of principles in energy science to energy asset management.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4975 - Global Experience in Energy

Credits: 2-4

Max Credit (Max. 4)

A 1-3 month integrative energy experience in China or Australia. Students will participate, in collaboration with partnering energy professionals, in outcomes focused education and research programs designed to address globally relevant challenges. Students will gain a global perspective within the cultural context of the partner institution.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4985 - Seminar

Credits: 1-3

Max Credit (Max. 3)

Energy professionals, including accredited professional landmen, practicing attorneys, and other energy professionals will present a colloquium styled course to bridge conceptual content with realistic workforce focused applications.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300 and WA and QB.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6

Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

Energy Systems Engineering

ESE3005 - Engineering Experimentation

Credits: 3

A combined lecture/laboratory course introducing students to experimental methods in the context of dynamics. Written technical communication, intermediate structured programming, experimental design, fundamental statistics, and uncertainty methods (numerical and analytical) are emphasized. Collaborative writing and teamwork is introduced.

Cross Listed ME 3005.

Former Course Number [2010; 2020]

Prerequisite: Completion of the ME Success Curriculum, ES 1060; ES 2120; corequisite ME/ENGL 2005.

ESE3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ME 3020.

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ESE3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ME 3040.

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ESE3060 - Numerical Methods for Engineers

Credits: 3

Numerical solutions of problems commonly encountered in mechanical engineering including differentiation, integration, differential equations, system of linear and nonlinear equations, and optimization. The structured programming approach will be emphasized and applications from solid mechanics, thermal fluid sciences, materials science, and dynamic systems will be covered.

Cross Listed ME 3060.

Prerequisite: Completion of the ME Success Curriculum, ES 1060 and corequisite of MATH 2310.

ESE3160 - Thermal/Fluid Science Lab

Credits: 3

A laboratory course to introduce students to experimental methods for temperature measure and pressure/flow characteristics of fluids. Continuation of experience with communication (written, oral, and digital), intermediate programming, experimental design, data analysis, and teamwork skills is emphasized.

Cross Listed ME 3160.

Former Course Number [2140; 2160]

Prerequisite: Completion of the ME Success Curriculum, ES 2330; ME 3005/ESE 3005.

ESE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics

include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ME 3360/ARE 3360.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310 and ES 2330.

ESE4060 - Energy Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience on an energy-related project. Multidisciplinary teams prepare a project proposal or Statement of Qualifications, generate a morphological study of their project, develop mathematical models of their design, and prepare project plans and specifications. Project management and methods are also presented.

Prerequisite: Completion of the ME Success Curriculum, ESE 3040 and ESE 3360.

ESE4070 - Energy Systems Design II

Credits: 3

Continuation of a two-course design sequence. The design teams refine their designs, fabricate the project, test the project for compliance with the design specifications, write a comprehensive engineering design report including socioeconomic factors, and prepare and deliver a presentation of the project in a public forum.

USP Code [WC<>(none)]

Prerequisite: Completion of the ME Success Curriculum, ME 4060/ESE 4060 and WB.

ESE4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems. Cross-listed with ME 4455 and dual-listed with ME 5455.

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ESE4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ME 4460.

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ESE4470 - Wind and Ocean Energy Engineering

0994

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented.

Cross Listed ME 4470.

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ESE4474 - Topics in Energy Systems Engineering

Credits: 1-3

Max Credit (Max. 4)

Directed research in mechanical engineering.

Prerequisite: Completion of the ME Success Curriculum, ME 3005/ESE 3005.

ESE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing faculty research mentor.

Prerequisite: junior or senior standing.

English

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement.

USP Code [WA<>COM1]

Note: Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

ENGL1030 - Intellectual Community in Cinema Etc

Credits: 3

Introduces students to a range of issues within the humanities through the analysis of film, television, and theater.

USP Code [I<>(none)]

ENGL1080 - Introduction to Women's Studies

0995

Credits: 3

An introduction to key issues in women's studies. A topical examination of women's participation in and relationship to institutions of society, such as family and school, as well as processes and activities, such as work, art, and politics in historical and cross-cultural analysis.

Cross Listed GWST 1080.

USP Code [CH,D<>(none)]

ENGL1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP Code [WB<>COM2]

Prerequisite: successful completion of WA/COM1.

ENGL2015 - College Composition and Rhetoric II: College and Career

Credits: 3

ENGL 2015 helps students become stronger writers, speakers, and thinkers, and features assignments that explore issues that pertain to students' majors and future careers. Students will engage in different genres for a range of audiences, revise substantially, and practice critical thinking in academic, civic, and professional contexts.

USP Code [(none)<>COM2]

Prerequisite: ENGL 1010/Synergy 1010 (COM1).

ENGL2020 - Literature, Media and Culture

Credits: 3

Introduces students to the basic tools of literary, film, and media analysis and develops students' critical writing, digital analysis, and oral communication skills. No expertise in literary criticism or film theory is necessary in this course; all majors are welcome.

USP Code [CH,WB<>COM2]

Prerequisite: COM1. COM1 may not be taken concurrently.

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options

available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP Code [(none)<>COM2]

Prerequisite: COM1; English major status.

ENGL2035 - Writing for Public Forums

Credits: 3

Introduction to professional writing that focuses on analyzing and producing texts designed to influence public opinion. Genres may include letters, editorials, web pages, pamphlets, e-mail, speeches, and position papers. Focuses on skills in collaboration and use of technology necessary for ethical, effective participation in public discourse.

USP Code [WB<>COM2]

Prerequisite: WA/COM1.

ENGL2125 - Writing Tutor Pedagogy/Practicum

Credits: 3

Prepares students for professional employment as writing tutors in a writing center environment. Students will gain a detailed understanding of the history of writing centers, the development of writing center studies and theory, and the innovative trends in contemporary writing center practices and organization.

USP Code [WB<>COM2]

Prerequisite: ENGL 1010 or COM1/transfer equivalent with a grade of B or higher; 3.000 GPA or higher.

ENGL2170 - The Bible as Literature

Credits: 3

A study of the Bible as a body of literary expression with an introduction to critical technique appropriate to such study.

Prerequisite: WA/COM1.

ENGL2190 - African Literature

Credits: 3

A study of the modern literature of Africa written in English, against its background of the continent's oral traditions.

Prerequisite: WA/COM1.

ENGL2240 - Arthurian Legend

Credits: 3

An introduction to both Arthurian romance and writing about literature. Traces the Arthurian Legend from its roots in Welsh mythology through its development in the Middle Ages and to its current manifestations in popular culture.

0997

Prerequisite: WA/COM1; sophomore standing.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP Code [CH,D<>(none)]

Prerequisite: WA/COM1.

ENGL2345 - American Indians in Hollywood Film

Credits: 3

Examines the ways Hollywood film has constructed various forms of racial identity for American Indians.

Cross Listed NAIS 2345.

USP Code [CH<>(none)]

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP Code [WB,D<>{none}]

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP Code [CH,D<>H]

Prerequisite: WA/COM1.

ENGL2410 - Literary Genres

Credits: 3

Max Credit (Max. 6)

0998

Studies specific genres of literature. Emphasis will vary (poetry, fiction, drama, etc.) from semester to semester, depending on curricular needs.

USP Code [CH,WB<>H]

Prerequisite: WA/COM1.

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP Code [CH<>(none)]

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP Code [CH<>(none)]

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP Code [CH<>(none)]

Prerequisite: WA/COM1.

ENGL2490 - Studies in (TOPIC)

Credits: 1-6

Presents a variety of topics in literature.

Prerequisite: WA/COM1.

ENGL3000 - Literary Theory

Credits: 3

An introduction to critical theory as a methodology within literary studies. The course covers major schools of theory and major figures within those schools. Students will read, discuss, and write about literary texts and cultural artefacts by placing them in dialogue with important works of both theory and literary criticism.

Prerequisite: ENGL 2025 and junior standing.

ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing

Credits: 3

Introduces common methods, concepts, and theories emphasized in these interrelated intellectual traditions. It asks students to examine how research traditions have developed alongside each other over time, and prepares students to design a multimodal research project.

Prerequisite: ENGL 2025 and junior standing.

ENGL3020 - Culture, Communication, Work

Credits: 3

Examines individual identity and group cultures, and how they influence communication in the workplace. Helps students develop strategies for working across cultural differences and for effective negotiation and conflict resolution skills.

USP Code [(none)<>COM3]

Prerequisite: Completion of COM2.

ENGL3100 - Tribal Literatures of the Great Plains

Credits: 3

Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed NAIS 3100.

USP Code [WC,D<>(none)]

Prerequisite: 6 hours of NAIS or ENGL.

ENGL3150 - World Literature

Credits: 3

Max Credit (Max. 6)

Encompasses reading and analysis of major works representative of significant periods or literary forms in the history of literature.

USP Code [CH,G<>(none)]

Prerequisite: WA and WB/COM1 and COM2.

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation

1000

component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues addressed through global performance.

Prerequisite: COM1.

ENGL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and 3 hours of a 2000-level literature course.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1 and 6 hours of 2000-level literature courses in ENGL.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1 and 6 hours of 2000-level literature courses in ENGL.

ENGL3610 - Non-Western Women Writers

Credits: 3

Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.

USP Code [CH<>COM2]

Prerequisite: GWST 1080 or ENGL 1010.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP Code [WC<>COM3]

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4020 - Editing for Publication

Credits: 3

Theory and practice of editing in the contexts of book, magazine, newspaper, and web-based publications. Standard editing practices for using grammar, proofreading marks, and computer editing tools.

Prerequisite: WA/COM1, WB/COM2 (ENGL 2035 and ENGL 3000 recommended).

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4040 - Rhetoric, Media, and Culture

Credits: 3

This class will guide us through the ways in which popular culture shapes the way that we view ourselves and other, and gives us a vocabulary to describe this phenomenon, critique it, and even push back against it.

USP Code [(none)<>COM3]

Prerequisite: COM1 and COM2.

ENGL4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 4061.

Dual Listed ENGL 5061.

Prerequisite: COMM 1040 and COJO 3040 or ENGL 2035.

ENGL4070 - Film Directors:

1003

Credits: 3

Max Credit (Max. 6)

Offers an intensive examination of representative films by selected film makers.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP Code [WC<>COM3]

Prerequisite: WB/COM2.

ENGL4080 - Film Genre Studies (TOPIC)

Credits: 3

Max Credit (Max. 6)

Offers structural, film historical, and political analyses of selected major film genres.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4090 - Film and Religion

Credits: 3

Movies use religion to convey messages; they debate religious issues and use religion to debate non-religious issues. This course analyzes how film makers use religion and religious themes to transform religions into advocates for social issues and to shape religion's role in society. Popular films drawn from many genres.

Prerequisite: 6 hours of 2000-level or higher literature courses or religion courses.

ENGL4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed CLAS 4230/THEA 4230.

When Offered (Offered in spring in alternate years)

Prerequisite: WB or COM2.

ENGL4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed CLAS 4270.

Prerequisite: WB or COM2.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP Code [D<>(none)]

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP Code [D<>(none)]

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP Code [WC<>(none)]

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP Code [CH,D<>H]

Prerequisite: LTST 1100 and WA/COM1.

ENGL4480 - Regional Literature of the US: The West

Credits: 3

Encompasses major themes and writers in western American literature.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4600 - Studies in (TOPIC)

Credits: 1-6

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in American, English, or other literatures.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4610 - Special Studies Abroad in (TOPIC)

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4620 - Independent Reading in (TOPIC)

Credits: 1-3

Involves independent study and research experience in given topic, person, movement in literature.

Prerequisite: 6 hours of 2000-level literature courses, consent of instructor, and permission of department chair.

ENGL4630 - English Honors Thesis

Credits: 1-3

Max Credit (Max. 3)

Directed study under the supervision of an English honors thesis chairperson. Results in production of an English honors thesis. Maximum of three credits of ENGL 4630 can be applied to the degree.

Prerequisite: consent of the Director of the English Honors Program, instructor and department chair.

ENGL4635 - English Department Honors

1006

Credits: 0

Satisfactory completion of this course indicates that English Departmental Honors have been conferred on the student.

Prerequisite: successful completion and defense of English Honors thesis.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

Prerequisite: six hours of 2000 level literature courses.

ENGL4780 - History of the English Language

Credits: 3

Considers major sources of change in the English language historically, as well as some of the internal and external catalysts for the process. Identical to ANTH 4780.

Prerequisite: ENGL 4750.

ENGL4785 - Linguistics, Language Teaching and Social Context

Credits: 3

Introduces prospective teachers of English as second language to the basic components of language and to the social aspects of human language use. Explores a variety of concepts about language: how it is used and perceived, how languages change, how diverse cultures respond to such changes.

Cross Listed LANG 4785.

Prerequisite: WB/COM2.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.

Dual Listed ENGL 5830.

USP Code [CA<>(none)]

Prerequisite: ART 2020, GWST 1080/ENGL 1080.

ENGL4970 - Writing Internship

Credits: 3

Students work 6-8 hours per week as "writing interns" for a private business or public agency, performing specific writing/editing tasks for that client. Students are supported and enabled through a series of classroom sessions and individual meetings with the course instructor. Formal progress reports and a comprehensive final report are required.

Prerequisite: successful completion of ENGL 4010, ENGL 4020, or 4050.

ENGL4990 - Senior Seminar in English Studies

Credits: 3

Considers methods, theories, and history of the study of literature and writing. In readings, discussion, as well as oral and written presentations, students seek a broad perspective on knowledge and skills gained throughout study in the English major.

USP Code [WC<>COM3]

Prerequisite: advanced (senior) standing in English.

ENGL4999 - Senior Seminar

Credits: 3

This course is the capstone course in the English major. Subject matter varies by section. In all sections students will exercise skills acquired in the major (close-reading, historical analysis, application of theory) to explore significant texts and to reflect on the nature of English study today.

USP Code [(none)<>COM3]

Prerequisite: COM1, COM2, and either ENGL 3000 or ENGL 3010; Senior standing.

ENGL5000 - Studies In:

Credits: 1-8

Max Credit (Max. 8)

Provides an opportunity for specialized seminar approaches to subjects in literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4

Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5020 - Public-Facing English Studies

Credits: 1-4
Max Credit (Max. 8)

Introduction to the history and theory of public intellectualism and English studies. Students develop theoretical and practical knowledge and explore alternative applications for academic research for publics beyond the classroom.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5050 - Writing in Public Genres

Credits: 1-4
Max Credit (Max. 8)

Intensive introduction to public-facing writing in English subject areas, including articles, book reviews, think pieces, TED talks, podcasts, and other genres of commentary associated with public intellectual work in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5061 - Rhetorical Theory and Criticism

Credits: 1-4
Max Credit (Max. 8)

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 5061.

Dual Listed ENGL 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5070 - Qualitative Methods in English

Credits: 1-4
Max Credit (Max. 8)

Advanced introduction to qualitative research methods in English and Rhetoric. Students will survey different types of qualitative methods and will learn to evaluate qualitative projects. Includes an emphasis on working with human participants and on ethics.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5075 - Non-Profit Writing and Grants

Credits: 1-4
Max Credit (Max. 8)

Non-profit writing from a rhetorical perspective. Students analyze different kinds of non-profit communication, including fundraising, mission development, social media. Participate in grant proposal development or other organizational communication activity.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5080 - Graduate Apprenticeship

Credits: 1

The graduate apprenticeship furthers a graduate student's professional development by allowing him/her to teach in a course other than Freshman Composition and to engage in a close working relationship with a faculty member. Apprentices will engage in a full range of teaching activities, such as grading, constructing assignments and exams, lecturing, leading discussion, and so on. Does not apply to hour requirement for the degree.

Prerequisite: graduate standing and permission of the English department chair.

ENGL5220 - Studies in Medieval Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar course in selected genres, figures, and themes in Medieval English literature.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5230 - Studies in English Renaissance Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of the sixteenth and early seventeenth centuries.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5250 - Studies in Shakespeare

Credits: 1-4

Max Credit (Max. 8)

To provide advanced students with the opportunity to study problems of text, sources, staging, theatrical history, and/or critical theory with reference to the works of William Shakespeare.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5270 - Studies in 18c English Literature

1010

Credits: 1-4

Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of restoration and eighteenth century English literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5280 - Studies in 19c English Literature

Credits: 1-4

Max Credit (Max. 4)

A seminar in selected genres, figures, and themes of the romantic and Victorian periods.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5290 - Studies in 20c English Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar in significant writers of poetry, drama, fiction, and biography from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5310 - Early American Literature

Credits: 4

Seminar designed to acquaint graduate students with selected texts from the colonial period to 1800, relevant secondary works, and scholarly methods.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5320 - Studies in 19c American Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar designed to acquaint graduate students with selected principal works of American literature, relevant secondary works, and scholarly method.

Prerequisite: graduate status of 12 hours or 4000-level work.

ENGL5330 - Studies in 20c American Literature

1011

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected significant writers of poetry, drama, and prose from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5340 - Intellectual Currents in Modern American Literature

Credits: 1-4
Max Credit (Max. 4)

Devoted to the study of writers such as Marx and Freud and more recent American writers.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5350 - Global Literatures in English

Credits: 1-4
Max Credit (Max. 8)

Examines significant texts, authors, cultural and historical contexts, and literary and theoretical movements in postcolonial or global literatures. May involve comparative study or may be focused on a single country context.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5360 - Literatures of Diversity

Credits: 1-4
Max Credit (Max. 8)

A study of literature and culture of selected minority or marginalized communities.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5455 - Slavery and Freedom

Credits: 1-4
Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 5455.

Dual Listed ENGL 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5520 - History of Literacy Criticism: Enlightenment and 19th Century

Credits: 4

Historical survey of the mainstream of European literary criticism, including the critics of antiquity and the Renaissance.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5530 - Modern Critical Theory and Practice

Credits: 1-4

Max Credit (Max. 4)

Major trends in modern poetics and practical criticism.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed GWST 5830.

Dual Listed ENGL 4830.

Prerequisite: ART 2020, GWST 1080, ENGL 1080.

ENGL5880 - Studies in Modern Fiction

Credits: 4

A study of modern fiction, examining theory and practice, and covering works of English, European, and American origin.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5890 - Consumption, Markets, Cultures

Credits: 1-4

Max Credit (Max. 8)

An interdisciplinary investigation of the ways in which cultural venues curate and market stories, history, and texts. Analyzes and applies theories and methodologies from literary and cultural tourism studies, as well as marketing and consumer culture, to museums, performances, tourist sites and theme parks. This class will include hands-on field research.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5900 - Practicum in College Teaching

1013

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5915 - Tutorial

Credits: 1
Graduate standing or consent of instructor. One credit hour for fee purposes.

ENGL5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENGL5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENGL5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: enrollment in a graduate degree program.

ENGL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENGL5965 - Thesis Research II

Credits: 1-3

Max Credit (Max. 3)

Designed for students who have reached an advanced stage in the writing of the thesis. Also to inform students of professional genres and practices as well as academic and non-academic careers following the MA degree.

Prerequisite: ENGL 5960 and enrollment in a graduate degree program.

ENGL5975 - Independent Studies

Credits: 1-4

Max Credit (Max. 6)

Independent study and research experience in a given topic, person, or movement in literature at an advanced level.

Prerequisite: permission of chair; graduate standing.

ENGL5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

English as a Second Language

ESL1110 - Introduction to Academic Writing Skills

Credits: 3

Designed to introduce non-native speakers of English, who do not demonstrate the required competency in writing to enter ESL 1210, to academic writing skills. Includes instruction in grammar and sentence structure, paragraph and essay writing.

Former Course Number [AS 1110]

Prerequisite: TOEFL of 18 or lower; IELTS of 5 or lower.

ESL1210 - English Composition for International Students

Credits: 3

The objective is to equip international students with procedural knowledge

USP Code [WA <>COM1]

Former Course Number [AS 1210; ENGL 1210]

Prerequisite: TOEFL Writing sub-score of 18 or higher, IELTS Writing sub-score of 5 or higher, or instructor's consent.

ESL1310 - Academic Listening for International Students

Credits: 3

This course equips non-native speakers with focused listening strategies and note-taking skills that can be applied across a variety of academic content areas and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Listening subscore of 18 or lower IELTS subscore 5.0 or lower; or instructor's consent.

ESL1410 - Academic Reading for International Students

Credits: 3

This course equips non-native speakers with focused academic reading strategies across a variety of academic content areas, introduces the Academic Core Vocabulary lists, and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Reading subscore of 18 or lower, IELTS Reading subscore of 5.0 or lower, or instructor's consent.

ESL2110 - English Oral Skills

Credits: 3

Instruction for Novice to advanced Low speakers in refining English pronunciation, stress and intonation, listening comprehension, oral grammar practice and building vocabulary.

Former Course Number [AS 2110; ENGL 2110]

Prerequisite: consent of instructor.

ESL3050 - Advanced Academic Writing for International Students

Credits: 3

Through ESL learner targeted instruction, practices, and feedback, the course will emphasize and progressively develop transferrable skills for students' academic work and future professions. It will continue to build on writing skills and emphasize foundational oral and digital communication skills.

USP Code [WB<>COM2]

Prerequisite: WA/COM1.

ESL4010 - Technical Writing for International Students

Credits: 3

Prepares students from a culturally diverse background for the communication demands of the 21st century. Students conduct rhetorical analysis of various audiences and purposes in order to design, develop, revise and edit disciplinary and interdisciplinary technical communications, such as reports, proposals, job applications, research related documents and oral presentations.

USP Code [WC<>COM3]

Prerequisite: WA/COM1, WA/COM2, and junior standing.

ESL5910 - International TA Preparation

Credits: 4

Prepares international teaching assistants for the challenges language, culture, and instruction in the American classroom impose on them: training includes pronunciation/intonation, presentation skills, basics of methodology, understanding of cultural differences, and mock-lessons. One Oral Skills Lab hour per week is included.

Prerequisite: graduate standing.

Entomology

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP Code [SB<>PN]

ENTO1001 - Insect Biology

Credits: 3

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP Code [SB<>PN]

ENTO1150 - Pesticide Safety and Application

Credits: 1

Introduces various types and safe methods of pesticides application. Subsequent to completion, students may take the certification test administered by the Wyoming Department of Agriculture.

Cross Listed CROP 1150.

When Offered (Normally offered the week prior to spring semester)

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

ENTO4686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO4687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders, diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 5687.

Prerequisite: ENTO 4684 required; ENTO 4670, ENTO 4682 recommended.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

ENTO5080 - Statistical Methods for the Agricultural and Natural Resource Sciences

Credits: 3

Brief review of statistical principles. Use of SAS programming. Numerous analysis of variance techniques along with commonly used experimental designs. Multiple mean comparisons, linear contrasts, power of F test, simple linear regression, polynomial regression, analysis of covariance, and some categorical data techniques for student in the agriculture and natural resources sciences. Credit cannot be earned in more than one of the following courses: STAT 2100, STAT 3050, STAT 5050, 5060, STAT 5070, STAT 5080.

Cross Listed STAT 5080.

Prerequisite: STAT 2050 or equivalent.

ENTO5300 - Applied Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Dual Listed ENTO 4300.

Prerequisite: ENTO 1000 or 9 hours of biology or ecology related coursework.

ENTO5601 - Insects for Teachers: Collection and Identification of Insects

Credits: 1

Designed for school teachers K-12. Basic concepts such as insect classification, insect habitats, insect metamorphosis, and destructive and beneficial insects are discussed with emphasis on the presentation of these concepts in the school classroom. Half of the class is devoted to field trips, laboratories, workshop activities, and films. Each student will make an insect collection, and learn how to preserve, mount, and identify specimens to order level. Course may be taken independently of ENTO 5602. Identical to NASC 4790.

Prerequisite: junior standing. Offered summer term only.

ENTO5602 - Insects in the Classroom: Insects and Their Ways

Credits: 1

Designed for school teachers K-12. Basic concepts of insect structure and function (insect morphology, insect physiology, insect ecology, and insect behavior) are discussed with emphasis on the presentation of these concepts using living insects in the

classroom. Half of the class is devoted to field trips, laboratories, workshop activities, and films. Each student will design, conduct, and write-up an experiment with insects. Course may be taken independently of ENTO 5601. Identical to NASC 4790.

Prerequisite: junior standing. Offered summer term.

ENTO5678 - Aquatic Entomology

Credits: 3

Biology, ecology, distribution and taxonomy of aquatic insects will be emphasized. Additional material covered will include aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 4678.

Prerequisite: 1 year of basic biology.

ENTO5682 - Insect Physiology

Credits: 5

Structure and function of the insect body, with particular emphasis on the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 4682.

Prerequisite: ENTO 1000.

ENTO5684 - Classification of Insects

Credits: 4

A study of insect orders, families and taxonomic treatises. Collection of adult insects representing 100 families, or equivalent museum project, is required for completion of course requirements.

Dual Listed ENTO 4684.

Prerequisite: ENTO 1000; ENTO 4670 is recommended.

ENTO5686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Dual Listed ENTO 4686.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO5687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders,

diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 4687.

Prerequisite: ENTO 4684/ENTO 5684 required. Recommended: ENTO 4670/5670, ENTO 4682/ENTO 5682.

ENTO5689 - Topics in Entomology

Credits: 1-4

Max Credit (Max. 6)

Current topics in entomology taught by entomology faculty, adjunct faculty or visiting faculty. Please check class schedule for current title.

ENTO5850 - Research in Entomology

Credits: 1-3

Max Credit (Max. 8)

Individual investigations of particular problems.

Prerequisite: graduate standing

ENTO5852 - Senior/Graduate Seminar

Credits: 1

Max Credit (Max. 6)

Discussion of important contributions to entomology.

Prerequisite: graduate standing.

ENTO5884 - Insect Behavior

Credits: 3

Fundamentals of insect behavior and an analysis of behavioral patterns.

Dual Listed ENTO 4884.

Prerequisite: one year of basic biology or equivalent; ENTO 5682 is recommended.

ENTO5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENTO5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENTO5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENTO5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENTO5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Entrepreneurship

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3020 - Comparison of Entrepreneurial Ecosystems

Credits: 3

The goal of this course is to expose students to different entrepreneurial ecosystems and let them think about how the environment, legal, technical, cultural, and economic, could impact their entrepreneurial endeavors. The class will accomplish this by visiting a developed country and a developing country to learn about the ecosystems and talk with entrepreneurs to see how the forces impacted their startups.

Cross Listed ES 3020.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

ENTR4700 - Business Model Creation and Launch

Credits: 3

Students build on previous learning to develop a complete business model including sales and marketing strategies, operations, financial forecasts, and partners. Deliverables include a pitch to start-up investors as part of a real-world entrepreneurship experience (for example, an entrepreneurship competition). Students learn primarily through hands-on application of concepts.

Prerequisite: ENTR 3700.

ENTR4750 - Theories of Entrepreneurship

Credits: 3

A broad examination of historical, literary, and business perspectives on entrepreneurship. Students explore the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of opportunities. Emphasis is on the evolution of entrepreneurship theories over time, and current trends related to the application of these theories.

Prerequisite: ENTR 3700.

Environment and Natural Resources

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current,

non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP Code [O<>PN]

ENR1100 - Environment and Natural Resource Problems and Policies

Credits: 2

Survey of environmental and natural resources issues and policies at local/regional, national, and global scales. Students are challenged to think critically as they dissect the causes, complexities, and solutions of contemporary, interdisciplinary environmental and natural resource challenges.

USP Code [L,L<>(none)]

ENR1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses cases studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/ labs required.

USP Code [SB<>PN]

ENR1400 - Biodiversity: Science and Society

Credits: 3

Biodiversity lays the foundation for nature's ability to properly function. In turn humans depend on a healthy-functioning natural system. Adequate biodiversity provides us with many things including new genetic material for agriculture, medical discoveries, recreational opportunities and good mental health. This course will examine key themes in our understanding of biodiversity. Students enrolled in this course will have a better understanding of issues, challenges and potential solutions to our current biodiversity crisis. Course meetings will largely consist of group discussions of assigned readings. Discussions will focus on critically evaluating and analyzing information, hypotheses and knowledge that arise from the readings. Writing assignments will emphasize succinct but thorough interpretation of information, policy, conservation and societal impacts of biodiversity.

USP Code [L,L<>(none)]

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores

surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP Code [SE<>PN]

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP Code [G<>COM2]

ENR2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed HIST 2030.

USP Code [(none)<>H]

ENR2100 - Forest Management

Credits: 3

Principles of forest management. Topics include the laws affecting forest management, methods of harvesting wood from forests, fire and insect management, the effects of disturbances on stream flow and nutrient cycling, and the challenges of developing management plans for forests.

Cross Listed RNEW 2100.

Former Course Number [BOT 2100]

Prerequisite: LIFE 1101 or LIFE 1010.

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP Code [(none)<>H]

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP Code [CH< >(none)]

ENR2345 - Natural Resource Ethics

Credits: 3

Introduces students to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed PHIL 2345/RNEW 2345.

USP Code [CH,D< > (none)]

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP Code [{none}<>COM2]

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP Code [CS,WB<>H]

Former Course Number [4000]

Prerequisite: ENR 2000.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

ENR3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed REWM 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP Code [(none)<>COM2]

Prerequisite: WA/ COM1 course.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450.

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit (Max. 3)

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP Code [CS<>(none)]

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

ENR4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 4240.

Dual Listed ENR 5240.

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070.

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP Code [(none) <> H]

Prerequisite: 9 hours of HIST or ENR.

ENR4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP Code [QB<>(none)]

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

ENR4560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: ENR 3000 or consent of instructor.

Dual Listed ENR 5560.

Prerequisite: ENR 3000 or consent of instructor.

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Cross Listed MKT 4600

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

ENR4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed COJO 4700.

Dual Listed ENR 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 4800.

Dual Listed ENR 5800.

Prerequisite: ARE 3020 or AMST 5400.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4900 - ENR Policy in Practice

Credits: 3

Encompasses student resolution in multidisciplinary teams of environmental and natural resource problems and issues; practice in formulating policy alternatives; case studies; planning, performing and coordinating multidisciplinary research.

Dual Listed ENR 5900.

USP Code [WC<>COM3]

Prerequisite: ENR 3000.

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ENR4975 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

Offers students the opportunity to independently complete special academic studies under direction of a faculty member. Readings, papers, and projects are completed as directed.

Dual Listed ENR 5975.

Prerequisite: 6 credits in ENR.

ENR5001 - Orientation to ENRS

Credits: 2

ENR 5001 aims to develop program culture and introduce resources and norms, provide common frames for understanding ENRS challenges, develop leadership and teamwork skills, and identify and explore some of the ENRS challenges in Wyoming.

ENR5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 5030.

Dual Listed ENR 4030.

Prerequisite: graduate status.

ENR5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages

(e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ECOL 5050/GEOG 5050 .

Prerequisite: graduate standing.

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR5150 - Environmental Science: Perspectives and Methods

Credits: 3

This course will use complex, real-world environmental challenges to explore fundamental scientific principles. Students will learn how scientists tackle environmental issues by formulating objectives, collecting and analyzing scientific data, as well as to critically evaluate information sources and limitations to scientific approaches due to constraints associated with each study.

Prerequisite: graduate standing.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

ENR5270 - Writing and Reviewing Science

Credits: 4

This course will help students prepare a scientific manuscript for submission to a peer-reviewed journal; in so doing, students will become more effective, efficient, and confident writers. Students will learn principles of effective writing, how to prepare a manuscript for publication, navigate the peer-review process, and write a constructive review.

Cross Listed ZOO 5270.

Prerequisite: Students must have graduate standing and an analyzed dataset on which the manuscript will be based. Students must have approval from their advisors and key collaborators before embarking on this journey. Students are also encouraged to maintain this approval throughout the semester.

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

ENR5310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 5310.

Dual Listed ENR 4310.

Prerequisite: ANTH 1200.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGECE 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

ENR5500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 4500.

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation,

statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Cross Listed MKT 5600

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR5700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed COJO 5700.

Dual Listed ENR 4700.

Prerequisite: graduate standing.

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR5800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 5800.

Dual Listed ENR 4800.

Prerequisite: ARE 3020 or AMST 5400.

ENR5870 - Graduate Seminar

Credits: 1

Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Prerequisite: graduate standing.

ENR5890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 4890.

Prerequisite: ENR 5100 or consent of instructor.

ENR5900 - ENR Policy in Practice

Credits: 3

Encompasses student resolution in multidisciplinary teams of environmental and natural resource problems and issues; practice in formulating policy alternatives; case studies; planning, performing and coordinating multidisciplinary research.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

ENR5920 - Collaborative Practice Methods

Credits: 3

This course introduces students to the principles, concepts, and methods of collaborative decision making as it is practiced in a variety of settings. Students acquire collaborative skills and competencies in collaborative processes such as working in teams and facilitating groups, negotiating and managing conflict, conducting situation assessments and issue analyses, and developing methods and standards for integrating technical information in collaborative decision making. The course will involve extensive use of cases, role-plays, and related participative activities.

Prerequisite: Admission by consent of instructor.

ENR5921 - Collaborative Practicum

Credits: 1-3

Max Credit (Max. 3)

Under the guidance and instruction of ENR faculty, students will have the opportunity to apply the skills and information gained in ENR 5920 to real-world situations. Students will gain practical experience in collaboration, facilitative leadership, and conflict resolution and to develop and refine skills in one or more of the learning objectives and expected competencies.

Prerequisite: ENR 5920.

ENR5940 - Continuing Registration: Off Campus

Credits: 1-2

Prerequisite: Advanced degree candidacy.

ENR5950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 5950.

Dual Listed ENR 4950.

Prerequisite: ENR 3700 and consent of instructor.

ENR5960 - Thesis Research

Credits: 1-12

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

ENR5961 - Plan B Projects

Credits: 2

Max Credit (Max. 6)

Limited to students enrolled in a Plan B graduate program. Students will be involved in non-course scholarly activities in support of the Plan B project.

Restricted Restricted to ENR graduate students.

ENR5975 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

Offers students the opportunity to independently complete special academic studies under direction of a faculty member. Readings, papers, and projects are completed as directed.

Dual Listed ENR 4975.

Prerequisite: 6 credits in ENR.

Environmental Engineering

ENVE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems.

Cross Listed CE 5410/CHE 5410.

Prerequisite: consent of instructor.

ENVE5430 - Environmental Engineering Chemistry

Credits: 3

Focus includes inorganic, organic, physical, equilibrium, biochemistry, colloidal and nuclear chemistry with an emphasis on the problems/solutions encountered by environmental and civil engineers.

Prerequisite: CHEM 1020.

ENVE5445 - Hazardous Waste Site Remediation

Credits: 3

The contamination of soil, air, and groundwater by improper disposal of hazardous wastes is covered. Control and cleanup of contaminated groundwater plumes, treatment of polluted soils and soil gases is emphasized. Case studies are extensively used.

Cross Listed CE 5445.

Prerequisite: CE 3400.

ENVE5450 - Advanced Physical Chemical Treatment

Credits: 3

A study of physical and chemical processes for treatment of water, and waste water.

Cross Listed CE 5450.

Prerequisite: CE 4400.

ENVE5885 - Problems

Credits: 1-3

Max Credit (Max. 6)

Special course designed to make possible individual investigation of problems of environmental engineering selected to fit student's educational research needs.

Prerequisite: consent of instructor.

ENVE5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Environmental System Sciences

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and

lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP Code [L,L<>PN]

ESS2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed GEOL 2000.

When Offered (Normally offered fall semester)

USP Code [SE<> (none)]

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP Code [G,WB<>(none)]

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

ESS4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed BOT 4780.

Dual Listed ESS 5780.

Prerequisite: Consent of instructor.

ESS4950 - Exploring the Earth System

Credits: 3

Conduct critical and interdisciplinary assessments on complex topics addressing physical, biological, and human components of the Earth System. Through multiple written, oral, and digital communication products, students will work independently and collaboratively to critically review existing literature, define knowledge gaps, analyze evidence, and synthesize results for multiple audiences.

USP Code [WC<>COM3]

Prerequisite: ESS 1000 and either ESS 3480 or ENR 3450.

ESS4970 - Internship in Earth System Science

Credits: 1-6

Max Credit (Max. 6)

Offers students an individualized opportunity to connect their academic training, professional experiences, and future goals. Students must first consult with their Haub School advisor and have completed and appropriate internship, professional and/ or applied experience that provides exposure to complex environmental systems, scientific practices, and relevant interactions in the professional world.

Prerequisite: ESS 1000.

ESS5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed BOT 5780.

Dual Listed ESS 4780.

Prerequisite: Consent of instructor.

Family and Consumer Science

FCSC1009 - Introduction to Family and Consumer Sciences

Credits: 1-3

Introduction to Family and Consumer Sciences is an introductory course for high school students directed by faculty and extension educators. Topics include human nutrition and food; human development and family sciences; and textiles, design, merchandising and textiles.

FCSC1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP Code [CA<>H]

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs

Credits: 2

Designed to enrich students' understanding of practices which support children's health development. Issues to be explored

include record keeping related to child care health and safety, use of health consultants, accident and injury prevention, immunizations, nutrition and food safety in child care settings.

When Offered (Offered alternate summers.)

FCSC2101 - Special Topics In:

Credits: 1-3

Max Credit (Max. 6)

Provides freshman and sophomore level undergraduate students opportunities to pursue a class of special interest or of a timely subject in a selected family and consumer sciences area and for faculty to pilot lower division courses.

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP Code [CS<>(none)]

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2122 - Child Development Lab

Credits: 1

Laboratory observation course designed for students with a background in child development theory. Students learn child observation techniques, how to write laboratory reports, and how to apply them to evaluating a child's development in all domains.

Prerequisite: PSYC 2300.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2135 - Women and Aging

Credits: 3

Focuses on women and the aging process with emphasis given to both the problems and promises of aging. Topics to be explored within a multicultural, sociological framework include the definition of self, relationships, community, health and health care, work and service, retirement, economic realities and new perspectives on aging.

Cross Listed WMST/SOC/NURS 2135.

Prerequisite: ENGL 1080/SOC/GWST 1080 or SOC 1000 or FCSC/NURS/SOC 2120.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP Code [(none)<>H]

Former Course Number [1165]

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP Code [(none)<>COM2]

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and

execution.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3129 - Social Development in Young Children

Credits: 3

Designed to provide professional child development and early childhood education majors with an opportunity to learn more about how to encourage healthy social development in young children. In addition, topics of self-esteem, emotional regulation, and secure attachment will be discussed in depth with regards to how they affect overall development.

Prerequisite: FCSC 2121 or PSYC 2300.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP Code [(none)< >PN]

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 3174.

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC3184 - Foundations of Merchandising I

Credits: 3

Planning, developing, and presenting product line(s) for identified target market(s) in relation to pricing, assortments, styling and timing. Concepts of supply chain business systems.

When Offered (Offered alternate fall semesters)

Prerequisite: ECON 1010.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC3188 - Interior Design Studio II

Credits: 3

Building upon skills developed in ID Studio 1, students will gain advanced knowledge of lighting, building codes and systems, specifications, materials, and space planning through more complex residential design problems. Design thinking and human centered design are emphasized. Explores design development and communication through CAD based and hand rendering techniques.

Prerequisite: FCSC 2188.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP Code [CS,D<>H]

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2188 or FCSC 2180.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4104 - Field Studies in Family and Consumer Sciences

Credits: 1-3

Concentrated on-site study of family and consumer sciences-related businesses, agencies and organizations to better understand challenges and potentials of various career opportunities in family and consumer sciences.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing.

FCSC4105 - Family and Consumer Sciences Internship

Credits: 6-8

Max Credit (Max. 8)

Gives students experience in workplace related to selected family and consumer sciences options (i. e. , retail store, social service agency and preschool or day care).

Prerequisite: junior standing in family and consumer sciences and consent of instructor.

FCSC4106 - Special Problems in Family and Consumer Sciences

Credits: 1-3

Provides advanced undergraduate students opportunities to pursue a topic of special interest in a selected family and consumer

sciences area, under guidance of a department faculty member.

Prerequisite: junior or senior standing and advanced consultation with department head and an instructor in subject matter area.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP Code [CS<>(none)]

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP Code [WC<>(none)]

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

FCSC4131 - Administration Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4132 - Internship in Human Development and Family Sciences

Credits: 6-8

Max Credit (Max. 8)

Acquire skills and gain familiarity in direct services, policy development, or program planning in a human services agency/organization. Opportunities to apply theories and knowledge gained in classroom settings to professional practice will be provided.

When Offered (Offered spring and summer semesters only)

Prerequisite: FCSC 4125; consent of instructor; senior standing.

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

FCSC4160 - Merchandising Strategies and Technology

Credits: 3

Students will be exposed to advanced merchandising strategies for retail buying and planning. Technologies used for gathering pertinent retail data, such as foot traffic and inventory management software, will be introduced. Course will expand on concepts introduced in prerequisite coursework.

Prerequisite: FCSC 3160.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4174 - Foundations of Merchandising II

1057

Credits: 3

A review of the fashion industry including types of fashion retail and the use of technology in retail sales. Exploration of merchandising/retailing principles, and the formulas and calculations essential to these principles.

Prerequisite: MATH 1400.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B. C. through the 20th century.

Dual Listed FCSC 5176.

When Offered (Offered alternate spring semesters)

Prerequisite: FCSC 1165.

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP Code [G<> (none)]

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP Code [WC<>COM3]

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4185 - Product Development and Technology

Credits: 3

This course introduces students to various technologies used to bring products to market. 3-D body scanning, computer apparel pattern digitizing, grading, marker making and repeats for digitally-printed, knit and woven fabrics will be discussed. Students will complete product technical packages based on product specifications.

Prerequisite: FCSC 3185, FCSC 4171, and FCSC 4172.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 5210.

Prerequisite: ZOO 3115, MOLB 3610, and FCSC 4145 or concurrent enrollment.

FCSC4220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 5220.

Prerequisite: MOLB 4100.

FCSC4230 - Therapeutic Nutrition Counseling

Credits: 2

Course is designed to help students develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client.

Dual Listed FCSC 5230

Note: Dietetics students only.

Prerequisite: FCSC 4220 or concurrent enrollment.

FCSC4288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 5288.

Prerequisite: FCSC 3180 or FCSC 4188.

FCSC4346 - Clinical Practicum in Dietetics

Credits: 1

Concentrated clinical practicum designed to provide dietetic majors with experience in the institutional, practitioner and clinical settings.

Note: Enrollment is limited to dietetics students only.

Prerequisite: FCSC 4220 and permission of instructor.

FCSC4960 - International Study Tour FCS

Credits: 1-3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

FCSC4970 - Design and Merchandising Internship

1060

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

FCSC4985 - Seminar: Development in Community Leadership

Credits: 2-3

Emphasizes basic core components of individual leadership: assessment of leadership skill and style; community-based experiences for understanding of community and resources; group community development projects for students; engagement with others and the community. Upon completion, students understand various leadership styles and philosophies and articulate their personal leadership philosophy.

Dual Listed FCSC 5985.

Prerequisite: senior or post-graduate equivalent status and consent of instructor.

FCSC5044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 4044.

Prerequisite: graduate standing.

FCSC5101 - Special Topics in Family and Consumer Sciences

Credits: 1-3

Max Credit (Max. 6)

Intended to accommodate a seminar series and a course offering by visiting faculty whose subject matter is not included in other course offerings.

FCSC5102 - Special Problems

Credits: 1-12

Max Credit (Max. 18)

Study in a selected problem area for broader perspective or greater specialization in the student program.

Prerequisite: advanced or graduate standing and consultation with department head and instructor in subject matter area.

FCSC5103 - Graduate Seminar in Family and Consumer Sciences I

Credits: 1

Integrative Seminar in Family and Consumer Sciences. Students are exposed to faculty research, discuss common readings and present their own research.

Prerequisite: graduate student standing.

FCSC5104 - Graduate Seminar in Family and Consumer Sciences II

Credits: 1

Integrative seminar in Family and Consumer sciences. Students are exposed to faculty research, will discuss common readings, and will present their own research. Graduate Seminar II can only be taken for a letter grade.

Prerequisite: FCSC 5103.

FCSC5107 - Family and Consumer Sciences Extension Practicum

Credits: 8

To provide experience in county extension programs.

Prerequisite: AGRI 4010, advanced standing and consent of instructor.

FCSC5112 - Family Decision and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/ contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection. Designed to meet family studies requirement for license in marriage and family therapy at graduate level. Companion website used.

Dual Listed FCSC 4112.

Prerequisite: graduate standing.

FCSC5117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 4117.

Prerequisite: graduate standing.

FCSC5118 - Family Policy

Credits: 3

Explores the relationships between family functioning and public/ private policies. The roles of family professionals in advocacy and education regarding policies are discussed. Attention is paid to the policy process at the state level.

Dual Listed FCSC 4118.

Prerequisite: graduate standing.

FCSC5120 - Infancy and Toddlerhood

Credits: 3

Examines development and behavior, focusing on a broad range of topics which includes: physical development, prenatal influences, sensory processes, biological factors, cognitive development, language development, social interaction and relationship. A broad family and consumer sciences perspective (the family in its environment) are applied.

Prerequisite: FCSC 2121 or equivalent course in child development.

FCSC5121 - Ethics in Research and Professional Practice

Credits: 3

Includes ethical theories, responsible conduct of research and professional practice defined by government, professional organizations, journals, and employers. Concepts include plagiarism, fabrication, falsification, conflict of interest, and conflict of commitment, and institutional review boards protecting human subjects. Concepts will be applied to research and professional practice in different settings.

Prerequisite: acceptance into a graduate program.

FCSC5122 - Developmental Contexts Across the Lifespan

Credits: 3

A variety of contexts in which children, adults, and families live and develop. Attention is given to the constant interactions that occur between humans and their environments, as well as how different environments may foster or hinder development. Includes discussions of the practical, professional and political implications of contextual research.

Prerequisite: graduate standing.

FCSC5123 - Positive Youth Development

Credits: 3

This course explores positive youth development (PYD), or the understanding and promotion of the well-being and health of youth. In this course, we will examine PYD theory and frameworks, research regarding how to best assess and foster PYD, and interventions designed to promote PYD and associated outcomes.

Prerequisite: graduate standing.

FCSC5135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 4135.

Prerequisite: Graduate standing.

FCSC5138 - Family Stress/Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative and nonnormative stressors and crises in the lives of families. Attention is paid to professional practice applications.

Dual Listed FCSC 4138.

Prerequisite: graduate standing.

FCSC5140 - Nutritional Aspects of Proteins and Amino Acids

Credits: 3

Advanced study of protein and amino acid metabolism in various physiological conditions.

Prerequisite: MOLB 3610 or equivalent; FCSC 4145 or equivalent.

FCSC5141 - Carbohydrate and Ethanol Metabolism

Credits: 3

Advanced study of carbohydrate and ethanol metabolism in various physiological conditions.

Prerequisite: MOLB 3610 or equivalent and FCSC 4145 or equivalent.

FCSC5145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 4145.

Prerequisite: graduate standing.

FCSC5147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological determinants of weight control emphasizing pathology, psychodynamics, assessment, and treatment of obesity.

Dual Listed FCSC 4147.

Prerequisite: graduate standing.

FCSC5151 - Sensory Analysis

Credits: 1

Examines the principles and techniques applied to the subjective evaluation of food.

Prerequisite: graduate standing; STAT 5080.

FCSC5171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 4171.

Prerequisite: graduate standing.

FCSC5172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 4172.

Prerequisite: graduate standing.

FCSC5173 - Textile Science Seminar

Credits: 3

Advanced study of textile science, physical and chemical modification of fibers, developments in dyeing and finishing technology. Environmental aspects of textile technology. Extensive use of current literature is utilized.

FCSC5176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Course content includes information from approximately 3000 BC through the 20th century.

Dual Listed FCSC 4176.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5178 - Fiber Arts

Credits: 3

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 4178.

Prerequisite: graduate standing.

FCSC5179 - Historic Textiles

Credits: 3

History of all major textile industries is explored. Processes and technical terms are explained. The role and impact of textiles in western economies and societies are examined.

When Offered (Offered alternate fall semesters)

Prerequisite: graduate standing.

FCSC5181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 4181.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 4182.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 4188.

Prerequisite: graduate standing.

FCSC5210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 4210.

Prerequisite: graduate standing and permission of instructor.

FCSC5220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 4220.

Prerequisite: graduate standing.

FCSC5230 - Therapeutic Nutrition Counseling

Credits: 4

Students will develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client. Dietetics students only.

Dual Listed FCSC 4230.

Prerequisite: graduate standing or permission of instructor.

FCSC5288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 4288.

Prerequisite: graduate standing.

FCSC5890 - Seminar in Food Science and Nutrition

Credits: 1

A seminar course on topics in food science and human nutrition.

Cross Listed FDSC 5890.

Prerequisite: graduate standing.

FCSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FCSC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FCSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FCSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

FCSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FCSC5985 - Development of Community Leadership

Credits: 2-3

Max Credit (Max 98)

Emphasizes basic core components of individual leadership: assessment of leadership skill and style; community based experiences for understanding of community and resources; group community development projects for student engagement with others and the community. Upon completion of course, students will understand various leadership styles and philosophies and articulate their personal leadership philosophy.

Dual Listed FCSC 4985.

Prerequisite: senior or post graduate equivalent status and consent of instructor.

Finance

FIN2010 - Personal Finance and Investments

Credits: 3

A general course treating the fundamentals and organization of the securities markets, types of orders, elementary market computations, basic investment management and etc. For students university-wide who have an interest in investments.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [3010]

FIN3100 - Real Estate Development

Credits: 3

This course presents the basic principles involved in real estate development. Topics include: land acquisition and appraisal, site improvements, market feasibility analysis, development financing, real estate government approval and regulations, real estate engineering and construction issues, real estate marketing and property operations and performances.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ACCT 2010.

FIN3250 - Corporate Finance

Credits: 3

Deals with management of capital in a business firm. It treats policies and actions relating to asset structure, risk, income and cash flows. Operating and financial analysis is introduced.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070 and sophomore class standing.

FIN3310 - Investment Management

Credits: 3

Fundamental principles of investments and practical implications of financial theory. Students acquire a framework for understanding returns on financial assets, risk and return, fundamentals of portfolio theory, efficient market hypothesis, and asset pricing models. Other topics include financial statement analysis, behavioral finance, and introduction to options and futures.

Former Course Number [4310]

Prerequisite: FIN 3250 and advanced business standing.

FIN3520 - Financial Markets

Credits: 3

Portfolio and capital market theory and the analysis of risk are introduced. Integrates theory into practical aspects of financial markets.

Former Course Number [4520]

Prerequisite: FIN 3250, STAT 2010 or STAT 2050/STAT 2070, and advanced business standing.

FIN4250 - Advanced Corporate Finance

Credits: 3

Give students a better appreciation of the techniques and theories of corporate finance and investments that may have been introduced in introductory finance courses.

Prerequisite: FIN 3250.

FIN4340 - Portfolio Management I

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4350 - Portfolio Management II

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4360 - Options and Futures

Credits: 3

Provides an introduction to financial futures such as currency futures and interest rate futures. Explores the markets on which they are traded. Also analyzes pricing of options and other derivative securities. Includes the leverage and risk aspects of options.

Prerequisite: FIN 3250, FIN 3310.

FIN4400 - Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 5400.

Prerequisite: FIN 3250, FIN 3310, IMGT 1400, advanced business standing.

FIN4410 - Behavioral Finance

Credits: 3

Discusses popular and accepted theories of human behavior from the field of psychology to investigate features of irrational behavior in the financial markets. Topics covered include fundamental behavioral biases, behavioral asset pricing, investor behavior, and consequences of irrationality to financial markets at the aggregate level.

Prerequisite: FIN 3250, FIN 3310.

FIN4420 - Capital Allocation

Credits: 3

A course designed to give students exposure to extensive analysis of problems in management of capital structure and capital expenditures.

Prerequisite: FIN 3250, FIN 3310, STAT 2010 or equivalent and advanced business standing.

FIN4460 - Multinational Finance

Credits: 3

Deals with quantitative techniques used by financial managers and investors in global financial markets. Topics covered include exchange rate determination, management of foreign exchange exposure, international portfolio investment, and current topics in international finance.

Prerequisite: FIN 3250.

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 3250 and advanced business standing.

FIN4530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 5530.

Prerequisite: FIN 3250, advanced business standing.

FIN4540 - Banking Policy

Credits: 3

Intended to be taken either with or after FIN 4510, Bank Management, and will cover similar topics but in greater depth and breadth. Integrated application of these topics will take place in a selection of case studies, some of which will be analyzed in teams.

Prerequisite: FIN 4510 or concurrent enrollment in FIN 4510.

FIN4600 - Ethics in Finance

Credits: 3

This course familiarizes students with the CFA Institute Standards on Professional Conduct and reinforces ethical behavior in the global investment management industry. Perspectives acquired in this course will be useful for students in their chosen finance professions as the content of the course provides a framework for ethical conduct in the investment profession by focusing on the CFA Institute Code of Ethics and Standards of Professional Conduct.

Dual Listed FIN 5600.

Prerequisite: FIN 3310, and FIN 3520 (or equivalent) with grades of C or better or graduate standing.

FIN4710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 5710.

Prerequisite: FIN 3250, IMGT 1400 and advanced business standing.

FIN4800 - Real Estate Finance

Credits: 3

Exposes students to the fundamentals of real estate finance such as mortgage financing, commercial leases, pro-forma analysis, financial modeling, tax implications, leveraged real estate and valuation of income producing properties. While the theory of each topic will be presented, the focus is on the applications of the material.

Prerequisite: FIN 3250 and advanced business standing.

FIN4810 - Real Estate Investment

Credits: 3

Covers advance real estate investment topics such as investments risk and valuation sensitivity analysis, futures and real options, liquid real estate investments, analysis of development projects, and commercial mortgage backed securities. While the theory the topics will be presented, the course focus is on the application of the material.

Prerequisite: FIN 4800 and advanced business standing.

FIN4900 - Problems in Finance

Credits: 1-4

Students register on an individual basis to study any phase of finance not included in organized courses. Written report required.

Prerequisite: FIN 3250, IMGT 1400, advanced business standing, senior standing and written consent of instructor.

FIN4910 - Selected Topics in Finance

Credits: 3

Max Credit (Max.6 seniors and M.S.; Max. 9 Ph.D.).

The material covered involves extensive in-depth investigations into topics which are specialty areas of the instructor in charge in any given term.

Prerequisite: 9 hours in finance including FIN 3250, IMGT 1400 and advanced business standing.

FIN5070 - Tax Planning for Financial Planners

Credits: 3

Focuses on principles, current law, and practice of income taxation and its impact on financial planning for individuals, couples, and families in their role as investors, employees, and business owners.

Dual Listed FIN 4070 .

Prerequisite: graduate standing.

FIN5310 - Advanced Investment Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Prerequisite: Graduate standing.

FIN5320 - Corporate Finance and Governance

Credits: 3

Designed to provide a framework to analyze issues in corporate finance and governance. The firm is viewed as a nexus of contracts designed to reduce the costs of trade-and corporate finance is regarded as an investigation of the incomplete contracts that involve the providers of capital.

Prerequisite: FIN 3250 (or equivalent); admission to the Master of Finance, Master of Accounting or a Graduate Program in Economics.

FIN5400 - Advanced Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Cross Listed MBAM 5403.

Dual Listed FIN 4400.

Prerequisite: graduate standing.

FIN5502 - Energy Finance: Project Evaluation

Credits: 3

This course introduces students to the key methods used to evaluate investments in energy industry projects from the perspective of the developer as well as the lender and other stakeholders. Topics include project finance modeling, techno-economic considerations, business structures, regulatory and legal issues, risk analysis, and deal terms.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director.

FIN5510 - Financial Management

Credits: 3

Studies of environmental influences on corporate financial decision making and measurement devices useful in corporate financial management.

Prerequisite: MATH 2220, STAT 2020, ACCT 2020, COSC 1200 or equivalent; accepted in a graduate program.

FIN5530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed

income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 4530.

Prerequisite: graduate standing.

FIN5600 - Ethics in Finance

This course is designed to familiarize you with the CFP Board's Code of Ethics and Standards of Conduct and reinforce ethical behavior in the global wealth management industry. Ethical practices instill a public trust in the fairness of financial markets and transactions, allowing them to function efficiently. Ethical practices by finance and investment professionals benefit all market participants and stakeholders and lead to increased investor confidence in global capital markets. The perspectives acquired in this subject should be useful to students in their chosen finance profession as this subject presents a framework for ethical conduct in the investment profession by focusing on the CFP Board Code of Ethics and Standards of Conduct.

Dual Listed FIN 4600.

Prerequisite: admission to the graduate program; admission to the certificate program.

FIN5710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 4710.

Prerequisite: graduate standing.

FIN5720 - Insurance and Retirement Planning

Credits: 3

This class is designed to help graduate students understand various topics in retirement and insurance planning for individuals and families.

Prerequisite: graduate standing.

FIN5750 - Fundamentals of Financial Planning

Credits: 3

This is a survey course for financial planning and wealth management. The topics include insurance planning, tax planning, investment planning, retirement planning, estate planning, and professional conduct. The course will focus on acquiring a framework for understanding the major components of financial planning and developing a coordinated financial plan.

Prerequisite: FIN 3250; admission to the graduate program.

FIN5780 - Estate Planning

Credits: 3

This course will cover general reliability modeling and evaluation; probability and stochastic processes; system modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis, decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Prerequisite: graduate standing.

FIN5800 - CFP Capstone

Credits: 3

This course will be organized around the four major areas of financial planning, as outlined by the College of Financial Planning curriculum. These four key areas are as follow: retirement planning; income tax planning; investment planning; and estate tax planning.

Prerequisite: Admission to the MS program or permission of the Department Head.

FIN5890 - Advanced Problems in Finance

Credits: 1-9

Max Credit (Max. 9)

An arrangement whereby a student is permitted to develop an advanced phase of finance not offered in the formally structured courses or to investigate a finance problem, a written report is required.

Prerequisite: 9 hours in finance and consent of instructor.

FIN5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FIN5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FIN5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

FIN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Food Science

FDSC1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

FDSC1410 - Food and Our Well Being

Credits: 3
Introductory course dealing with current questions and concerns about foods. Considers food composition, effects of food processing, food labeling, diet, degenerate diseases and general health. Students become familiar with foods and food industry.

When Offered (Normally offered fall semester)

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3
Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3
Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

FDSC3061 - Livestock Slaughter Practicum

Credits: 1
Students learn and practice proper techniques of livestock slaughter.

When Offered (Normally offered fall semester)

Prerequisite: 4 credits of biological sciences.

FDSC3062 - Carcass Fabrication

Credits: 2

Principles of carcass fabrication; Institutional Meat Purchase Specifications and North American

When Offered (Normally offered spring semester)

Prerequisite: 4 credits of biological sciences.

FDSC3063 - Meat Processing

Credits: 2

Principles of applicable meat protein chemistry, heat transfer and other processing parameters applicable to production of sausage, cured meat, and other processed products. A variety of processed meat products will be manufactured in lab.

When Offered (Normally offered spring semester)

Prerequisite: FDSC 3060 or concurrent registration.

FDSC3545 - Introduction to Meat Judging

Credits: 3

USDA grading standards, value pricing, yield and quality attributes of meat are used to evaluate products. Improve communication skills and terminology through oral and written reasons. Requires field trips.

When Offered (Normally offered fall semester)

Prerequisite: FDSC 2040.

FDSC3550 - Advanced Meat Judging

Credits: 1-2

Students representing the university in national and regional contests are selected from this course. Requires field trips.

Former Course Number [2100]

Prerequisite: FDSC 3545.

FDSC3720 - Applied Food Chemistry

Credits: 3

Study of chemistry and composition of nutrients in raw and processed foods.

When Offered (Normally offered spring semester)

Former Course Number [4720]

Prerequisite: CHEM 2300 or ANSC 2010.

FDSC4090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Cross Listed MICR 4090.

Dual Listed FDSC 5090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2210.

FDSC4100 - Laboratory Techniques in Food Microbiology

Credits: 1

Lab techniques used in food microbiology.

Cross Listed MICR 4100.

Dual Listed FDSC 5100.

When Offered (Normally offered spring semester)

Former Course Number [610]

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

FDSC4800 - Problems in Food Science

Credits: 1-3

Examines special problems related to quality control, formulation and processing of meat, poultry and dairy foods. Offers research techniques and instrumentation in foods.

Prerequisite: 6 hours in FDSC, 6 hours in chemistry and consent of instructor.

FDSC4900 - Food Safety

Credits: 3

Issue-oriented lecture/ discussion course. Includes topics such as what is safe food, what makes food unsafe and how safety of a food is determined. Presents laws and regulations on food safety. In addition to a text, area experts are invited to discuss important issues.

When Offered (Offered fall semester of odd-numbered years)

Prerequisite: 6 hours of biological science.

FDSC4990 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Participation of undergraduates in the teaching of FDSC courses under the supervision of faculty/staff.

Prerequisite: junior standing or consent of instructor.

FDSC5090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Dual Listed FDSC 4090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2210.

FDSC5100 - Food Microbiology Laboratory

Credits: 1

Laboratory techniques used in food microbiology.

Dual Listed FDSC 4100.

When Offered (Normally offered spring semester)

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

FDSC5880 - Advanced Problems and Topics

Credits: 1-3

Max Credit (Max 6)

Designed to allow graduate students to pursue advanced research problems and advanced topics and to obtain experience in the teaching process.

Prerequisite: graduate standing and consent of instructor.

FDSC5890 - Seminar in Food Science and Nutrition

Credits: 1

A seminar course on topics in food science and human nutrition.

Dual Listed FDSC 4890.

Prerequisite: graduate standing.

FDSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FDSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FDSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may NOT be included in a graduate program of study for degree purposes.

FDSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FDSC5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate degree program.

FDSC5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

French

FREN1010 - First Year French I

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

FREN1020 - First Year French II

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

Prerequisite: FREN 1010 or two years of high school French.

FREN2030 - Second Year French I

Credits: 4

Emphasizes the development of communication skills (listening, speaking, reading and writing) so as to help students function effectively in real-life contexts. Provides a systematic review of grammatical structures necessary for successfully communicating in French.

USP Code [(none)<>H]

Prerequisite: FREN 1020 or three years of high school French.

FREN2040 - Second Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP Code [(none)<>H]

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2130 - Contemporary French Culture

Credits: 3

Designed as an introduction to contemporary French culture. It gives students an in-depth insight into contemporary French life. It also deals with issues affecting the French-speaking world in general: Quebec, Africa, New Caledonia, Switzerland, Monaco, etc.

USP Code [(none)<>H]

Prerequisite: FREN 1020 or equivalent.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP Code [CH,G<> (none)]

Prerequisite: FREN 2030.

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP Code [WB<>COM2]

Prerequisite: FREN 2040.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

FREN3990 - Independent Study

Credits: 1-4

Books or periodicals of special interest to the student, selected in consultation with a member of the staff; independent reading and reports.

Prerequisite: FREN 2030.

FREN4080 - Studies in the French Language

Credits: 3

Max Credit (Max. 9)

The topics explored under this general heading include: translation, history of the French language, French of the media and conversation.

Dual Listed FREN 5080.

Prerequisite: FREN 3060.

FREN4100 - A Survey of French Literature I

Credits: 3

A study of French Literature and civilization from the Middle Ages through the 18th century.

Prerequisite: FREN 2140 or equivalent.

FREN4110 - A Survey of French Literature II

Credits: 3

A study of French Literature and civilization from the 19th century to the present.

Prerequisite: FREN 2140 or equivalent.

FREN4120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: epic, courtly poetry, Arthurian romance, theatre and the poetry of Villon.

Dual Listed FREN 5120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 5140.

USP Code [WC<>(none)]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4200 - Introduction to Research

Credits: 3

Senior seminar on a topic varying from year to year.

USP Code [(none) <>COM3]

Prerequisite: COM2 (FREN 3050), Survey I and II courses (FREN 4100 and FREN 4110).

FREN4250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism focuses on novels of Flaubert and Zola, while the symbolist school of poetry is represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 5250.

Former Course Number [4150]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into four parts: pre-World War I, between the wars, post-World War II and the New Wave. These periods are represented by authors including Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 5260.

Former Course Number [4160]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature), to be selected according to interest and currency).

Dual Listed FREN 5350.

Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN4990 - Advanced Independent Study

Credits: 1-3

Special projects designed to meet the needs of individual students, designed in consultation with instructor.

Prerequisite: FREN 3050 and consent of instructor.

FREN5080 - Studies in French Language

Credits: 3

Topics explored include: French translation, history of the French language, French of the media, and conversation.

Prerequisite: FREN 3060.

FREN5120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: Epic, courtly poetry, Arthurian romance, theatre, and the poetry of Villon.

Dual Listed FREN 4120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 4140.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5160 - Graduate Readings

Credits: 1-5

Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

FREN5170 - Special Problems

Credits: 1-2

Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

FREN5250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism will focus on novels each of Flaubert and Zola while the Symbolist School of poetry will be represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 4250.

Prerequisite: FREN 2050; FREN 4100 and FREN 4110 strongly recommended.

FREN5260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into 4 parts: Pre- World War I, between the wars, post-World War II and the New Wave. These periods are represented by such authors as Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 4260.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature, to be selected according to interest and currency).

Dual Listed FREN 4350.

Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FREN5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FREN5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FREN5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

FREN5960 - Thesis Research

1087

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FREN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Gender and Women's Studies

GWST1030 - Social Justice in the 21st Century

Credits: 3
Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed LTST 1030/AAST 1030/AMST 1030/NAIS 1030.
USP Code [I,D<>(none)]
Note: Enrollment preference will be given to We The People FIG students.

GWST1080 - Introduction to Women's Studies

Credits: 3
Introduction to key issues in women's studies. Topical examination of women's participation in, and relationship to, institutions of society, such as family and school, as well as processes and activities, such as work, art, literature and politics in historical and cross-cultural analysis.

Cross Listed ENGL 1080.
USP Code [CH,D<>H]

GWST1900 - Women and Leadership

Credits: 3
Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP Code [O,L<>(none)]

Former Course Number [4510]

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 2

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP Code [C,D<>H]

GWST2060 - Topics in Women's Studies

Credits: 1-4

Popular and current topics in women's studies.

GWST2070 - Gender and Religion

Credits: 3

Aims to help students understand how religion constructs and reinforces gender roles in religion and society. Looks at traditional gender roles in Christianity and the transformation they have undergone in the past century or so.

Cross Listed RELI 2070.

GWST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed HIST 2389.

USP Code [D<>(none)]

GWST2500 - Gender and Society

Credits: 3

Examines the social construction of gender using interdisciplinary methods of analysis. The readings and assignments emphasize the importance of denaturalizing the gender stereotypes and norms that impact women's and men's lives. Intersections between gender, race, class, age, and sexual orientation are examined within their cultural contexts. This course will prepare students for advanced work in Gender and Women's Studies.

USP Code [WB<>COM2]

Former Course Number [3500]

Prerequisite: GWST 1080 or cross listed equivalent.

GWST2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and subjectivity, and the politics of health, sexuality, and care.

Cross Listed WIND 2700.

USP Code [D<>H]

GWST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/AMST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

GWST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/ Chicana studies.

Cross Listed LTST 3200.

USP Code [D<>(none)]

Prerequisite: LTST 1100.

GWST3300 - Psychology of Gender

Credits: 3

In this course, we will examine a variety of psychological theories and research on the experiences and behaviors of men and women. We will study attitudes about gender, theories of gender development, and research about similarities and differences between men and women.

Cross Listed PSYC 3300.

Prerequisite: A grade of C or better in PSYC 1000.

GWST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both

oppression and liberation.

Cross Listed AMST 3400.
USP Code [CH,D<>(none)]
Prerequisite: WA.

GWST3710 - Gender and Humanities

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/ART 3710.
When Offered (Offered once a year)
USP Code [CH<> COM2]
Prerequisite: GWST 1080 or ENGL 1010.

GWST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST/ LTST 3800.
USP Code [CS,D<>(none)]
Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

GWST4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGECE 4200.
Dual Listed GWST 5200.
USP Code [D<>(none)]
Prerequisite: AGECE 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST4210 - Feminist Research Methods

Credits: 3

Introduces students to feminist methods of research problem formulation, data acquisition, analysis, and presentation of research findings regarding topics related to sex, gender and sexuality. Requires students to participate in research projects.

Dual Listed GWST 5210.

Prerequisite: Nine hours of WMST or permission of the instructor.

GWST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed Cross-listed with AAST 4233 and COJO 4233;

Dual Listed dual-listed with GWST 5233.

USP Code [WC,D<>COM3]

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST4300 - The Politics of Sexuality

Credits: 3

Addresses issue of how sexuality has become gendered with different meanings for both males and females as to reproductive behavior, especially how women's bodies are defined in sexual terms.

When Offered (Offered every other year)

Prerequisite: GWST 1080, 3500 or GWST 3710.

GWST4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and RELI 4335.

Dual Listed GWST 5335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

GWST4360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed NAIS 4360/SOC 4360.

Prerequisite: 6 hours of 2000-level NAIS classes.

GWST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 4430.

Dual Listed GWST 5430.

USP Code [(none)< >H]

Prerequisite: Consent of instructor.

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

GWST4500 - Special Topics in Women's Studies

Credits: 1-4

Presents current research issues by visiting and regular faculty.

Prerequisite: GWST 1080, 3500, GWST 3710 or consent of instructor.

GWST4540 - Gender and Crime

Credits: 3

Addresses status of women as offenders and as victims in society and in the criminal justice system. Considers special role of women as professionals in the criminal justice system.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400.

GWST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/LTST 4650/INST 4650.

Dual Listed GWST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/LTST 4675.

USP Code [D<>(none)]

Prerequisite: junior standing and/or a combination of

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP Code [WC<>COM3]

Prerequisite: 12 hours of women's studies.

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ART 4830/ENGL 4830.

Dual Listed GWST 5830.

When Offered (Offered every other year)

USP Code [CA<>(none)]

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

GWST4960 - Women's Bodies, Women's Minds

Credits: 3

Explores women's physiologic and psychologic development and the influences of patriarchal society upon the interpretation of what constitutes normalcy across the female life cycle. Historical, cultural and contemporary attitudes of the health care system and women's perspectives on menstruation, childbearing, breastfeeding and menopause will be analyzed.

When Offered (Offered every other year)

USP Code [CS<>(none)]

Prerequisite: upper division status.

GWST4965 - Senior Honors Project

Credits: 3

The student consults with the director/faculty supervisor to identify a topic and (a) produces a 30-40 page research paper or (b) a shorter 15-20 page paper plus a creative or service learning component, showing originality, firm knowledge of the discipline(s), and solid research skills, with a thesis defense as culmination.

Former Course Number [4980]

Prerequisite: GWST 4700, or concurrent enrollment with instructor consent, and a 3.500 GPA.

GWST4970 - Internship

Credits: 3

Max Credit (Max. 12)

Students gain practical experience in the application of principles learned in women's studies courses. Students will work with the director of women's studies internships to select a site; will intern approximately ten hours per week in the host organization; and will complete written assignments which reflect the student's work.

Former Course Number [4000]

Prerequisite: 12 semester hours of WMST coursework,

GWST4975 - Independent Studies

Credits: 1-4

Max Credit (Max. 9)

Offers the advanced student the opportunity to pursue a topic of interest with the assistance and direction of an instructor in women's studies.

Former Course Number [4970]

Prerequisite: 6 hours in women's studies or consent of instructor.

GWST5000 - Special Topics

Credits: 1-4

Max Credit (Max. 8)

Presents findings from current research and new areas of inquiry into women's studies at the graduate level, by present and

visiting faculty.

Prerequisite: 18 hours of undergraduate women's studies.

GWST5200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGEC 5200.

Dual Listed GWST 4200.

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST5210 - Feminist Research Methods

Credits: 3

Introduces students to feminist methods of research problem formulation, data acquisition, analysis, and presentation of research findings regarding topics related to sex, gender and sexuality. Requires students to participate in research projects.

Dual Listed GWST 4210.

Prerequisite: Nine hours of WMST or permission of the instructor.

GWST5233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with AAST 5233 and COJO 5233; dual-listed with GWST 4233.

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST5335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Dual Listed GWST 4335.

Prerequisite: graduate standing.

GWST5360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed SOC 5360.

Dual Listed GWST 4360.

Prerequisite: 6 hours of NAIS 2000-level classes.

GWST5430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 5430.

Dual Listed GWST 4430.

Prerequisite: Consent of instructor.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

GWST5540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540/5540

Dual Listed GWST 4540

Prerequisite: ENGL/GWST 1080, GWST 2500, CRMJ/SOC 2400, or SOC 3500

GWST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 5650/LTST 5650/INST 5650.

Dual Listed GWST 4650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST5710 - Feminist Theoretical Perspectives

Credits: 3

Intensive introduction to the epistemology and application of a wide range of trans-historical, trans-cultural, and trans-national feminist theories. Students will be asked to apply self-selected feminist theories to their own thesis work and graduate fields, as well as to current examples of sex, gender, gender performance, and gendered coding in American media.

Prerequisite: graduate standing.

GWST5780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Dual Listed GWST 4780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 5830.

Dual Listed GWST 4830.

Prerequisite: ART 2020 or ENGL 1080/GWST 1080.

GWST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

GWST5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

GWST5970 - Independent Studies

Credits: 1-4

Max Credit (Max. 8)

Allows the graduate student to pursue studies in gender issues with the supervision of an instructor from the Women's Studies faculty.

Prerequisite: graduate standing.

GWST5990 - Internship

Credits: 1-12

Max Credit (Max. 12)

Prerequisite: graduate standing.

Geography

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP Code [CS,G<>H]

Former Course Number [G&R 1000]

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP Code [SE<>PN]

Former Course Number [G&R 1010]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP Code [CS,G<>H]

Former Course Number [G&R 1020]

GEOG1101 - Surviving the Apocalypse: The Geography of Natural Disasters (FYS)

Credits: 3

Students examine the natural and human dimensions of disasters by focusing on environmental settings, risk assessment, recovery, and reducing impacts of environmental hazards and disasters globally. Course considers human vulnerability, mitigation, protection, and adaptation to different hazards in both more developed and less developed nations.

USP Code [(none)<>FYS]

GEOG2370 - Chicano History: Origins to GEOG 1900

Credits: 3

General survey that traces the geographic distribution and historical processes that have shaped the life experiences, socio-economic development and cultural contributions of peoples of Mexican descent in the United States from their indigenous and Hispanic origins to the end of the 19th century.

Cross Listed LTST 2370/HIST 2370.

USP Code [CS,D<>H]

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

GEOG3030 - Geography and Development

Credits: 3

Examines distribution of wealth and poverty in the world; theories of development, from traditional modernization theories through Marxist critiques and sustainable development; and case studies from around the world of development successes and failures, chosen to illustrate and illuminate theories of development.

USP Code [CS,G<>(none)]

Former Course Number [G&R 3030]

Prerequisite: GEOG 1000 or GEOG 1020 or 9 credit hours of social science with global focus.

GEOG3050 - Economic Geography

Credits: 3

Economic Geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP Code [CS,D<>(none)]

Prerequisite: one course in American Indian culture.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP Code [WB,G<>(none)]

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG3550 - Natural Hazards and Society

1101

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP Code [CS<>(none)]

Former Course Number [G&R 3550]

GEOG4000 - Terrain Analysis

Credits: 3

Studies techniques for acquiring and analyzing spatial data from maps, remotely sensed imagery and field surveys for landscape assessment. Emphasizes deriving maps that describe physical suitability of landscapes for specific human activities. Field trip required.

Former Course Number [G&R 4000]

Prerequisite: Completion of USP PN requirement or consent of instructor.

GEOG4013 - Political Geography

Credits: 3

Geographic space is subdivided into political units to aid human interaction and to facilitate political processes. Examines the spatial organization of political space and its effects upon political processes at varying geographic scales ranging from the local to international.

Cross Listed POLS 4013.

Dual Listed GEOG 5013.

Prerequisite: Completion of USP H requirement.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP Code [CS<>(none)]

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOG4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/1405 or MATH 1450.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

GEOG4450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment

transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 5450.

Former Course Number [G&R 4450]

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or consent of instructor.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

GEOG4470 - Fire Ecology

Credits: 3

Natural and human-caused fires are an important phenomenon affecting ecosystems and human communities throughout the world. Explores the geography, ecology, and management of fires.

Cross Listed GEOL 4470

Dual Listed GEOG 5470.

Former Course Number [G&R 4470]

Prerequisite: GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG4500 - The American Landscape

Credits: 3

Provides a basis for interpreting the nature and content of the contemporary landscapes of the United States by viewing those landscapes in the process of creation and change and investigates the relationship between landscape and American environmental attitudes. Students are introduced to research techniques and methodologies in historical geography.

Former Course Number [G&R 4500]

Prerequisite: Completion of USP H requirement or consent of instructor.

GEOG4502 - Images of Wyoming and the West

Credits: 3

The West is nothing more than a barren, desolate landscape to some while to others it offers great spiritual and cultural significance. Examines how individuals and groups perceive Wyoming and the West, how such perceptions have been constructed over time, and how these differing views create images of the region both real and imagined.

Dual Listed GEOG 5502.

Prerequisite: GEOG 1000 or GEOG 1020 and junior standing.

GEOG4550 - Geography of Wine

Credits: 3

Examine the regional influence of climate, terrain and cultural characteristics on the production of grape varieties and demonstrate the implications of this influence on the location and distribution of wines produced. Discussion will focus on the world-wide production and consumption of wine and impacts of multi-national corporations.

Prerequisite: junior standing and at least 21 years of age.

GEOG4560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed INST 4560.

Dual Listed GEOG 5560.

Prerequisite: 9 hours of international studies or geography.

GEOG4570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 5570.

Prerequisite: GEOG 1000 or GEOG 1020 and junior standing.

GEOG4580 - Sense of Place

Credits: 3

Examines how individuals and groups perceive specific geographic locations, how such perceptions are constructed, and how these differing views and feelings play out in our everyday.

Dual Listed GEOG 5580.

Former Course Number [4572]

Prerequisite: Completion of USP H requirement or consent of instructor.

GEOG4590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 5590.

Former Course Number [4574]

Prerequisite: Completion of USP H requirement or consent of instructor.

GEOG4875 - Independent Studies

Credits: 1-6

Max Credit (Max. 6)

Considers current research topics in consultation with faculty member.

Dual Listed GEOG 5875 .

Former Course Number [G&R 4875, 4950]

Prerequisite: 9 hours in subject area of topic of current research.

GEOG4880 - Current Topics

Credits: 1-6

Max Credit (Max. 6)

Special course on a topic of current interest.

Dual Listed GEOG 5880 .

Former Course Number [G&R 4880, 4850]

Prerequisite: junior standing.

GEOG4885 - Seminar: (TOPICS)

Credits: 1-3

Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Former Course Number [G&R 4885, 4900]

Prerequisite: GEOG 4750.

GEOG4960 - Field Studies

Credits: 1-6

Max Credit (Max. 6)

Intensive introduction to field methods used in geographic research in one or more of the subdivisions of geography.

Former Course Number [4860, G&R 4860]

GEOG4965 - Directed Studies/ Research Problems

Credits: 1-6
Max Credit (Max 6)

Intensive introduction to methods used in geographic research.

Former Course Number [4865, G&R 4865]

Prerequisite: consent of instructor and at least 12 hours in geography.

GEOG4990 - Internship/ Practicum

Credits: 1-6
Max Credit (Max. 12)

Experience in applying student skills and training in an agency, organization, or business.

Dual Listed GEOG 5990.

Former Course Number [4870, G&R 4990]

Prerequisite: for majors only, minimum of 12 hours in the major, junior standing and consent of the instructor.

GEOG5013 - Political Geography

Credits: 3

Geographic space is subdivided into political units to aid human interaction and to facilitate political processes. Examines the spatial organization of political space and its effects upon political processes at varying geographic scales ranging from the local to international.

Cross Listed POLS 5013.

Dual Listed GEOG 4013.

Prerequisite: graduate standing.

GEOG5060 - Landscape Ecology

Credits: 3

A study of structure, function, and change in the biosphere on the scale of kilometers. Includes a consideration of the effects of human land uses, natural disturbances, and other processes on landscapes.

Prerequisite: GEOG 4460 or LIFE 3400 or BOT 4700.

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .

Prerequisite: Graduate standing.

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

GEOG5470 - Fire Ecology

Credits: 3

Natural and human-caused fires are an important phenomenon affecting ecosystems and human communities throughout the world. Explores the geography, ecology, and management of fires.

Dual Listed GEOG 4470.

Prerequisite: GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG5502 - Images of Wyoming and the West

Credits: 3

The West is nothing more than a barren, desolate landscape to some while to others it offers great spiritual and cultural significance. Examines how individuals and groups perceive Wyoming and the West, how such perceptions have been constructed over time, and how these differing views create images of the region both real and imagined.

Dual Listed GEOG 4502.

Prerequisite: GEOG 1000 or GEOG 1020 or equivalent and graduate standing.

GEOG5560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed INST 5560.

Dual Listed GEOG 4560.

Prerequisite: 9 hours of international studies or geography.

GEOG5570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 4570.

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5580 - Sense of Place

Credits: 3

Examines how individuals and groups perceive specific geographic locations, how such perceptions are constructed, and how these differing views and feelings play out in our everyday.

Dual Listed GEOG 4580.

Former Course Number [5572]

Prerequisite: GEOG 1000 or GEOG 1020.

GEOG5590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 4590.

Former Course Number [5574]

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOG5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOG5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GEOG5990 - Internship/Practicum

Credits: 1-12

Max Credit (Max. 12)

Experience in applying student skills and training in an agency, organization, or business.

Dual Listed GEOG 4990.

Prerequisite: graduate standing.

Geology and Geophysics

GEOL1001 - Earth Science and Society

Credits: 1

Introduces students to the study of Earth Science and its role in society through examination and discussion of current events, and through projects researching geologic topics of societal interest.

USP Code [I,L<>(none)]

Prerequisite: GEOL 1100 or concurrent enrollment.

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP Code [S<>(none)]

GEOL1050 - Gold and the American West

Credits: 3

The gold rushes in the western United States offer a window into geologic principles and processes resulting to the accumulation of gold, and the consequences of resource extraction on the prospective geologic record of the Anthropocene. This course provides an interdisciplinary approach to natural resources.

USP Code [(none)<>PN]

GEOL1060 - Geology of the National Parks

Credits: 3

This course provides an overview of the geologic settings and processes that form the landscapes and features in the US National

Parks and Monuments. We will use the National Parks to explore fundamental geologic concepts, Earth materials, natural hazards, and the dynamic tectonic forces that have affected the planet throughout geologic history.

USP Code [(none)<>PN]

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP Code [SE<>(none)]

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP Code [SE<>PN]

GEOL1101 - The Anthropocene: Human's Control of Nature

Credits: 3

This course introduces students to the essential realities of living on a dynamic Earth. Students examine how geological events and processes (earthquakes, floods, landslides, volcanic eruptions, and long-term and short-term climate changes) affect our survival, evolution, and adaptation. The course also critically examines 'geoengineering', which has created many solutions to problems that would have otherwise impeded civilization's progress, but has also resulted in many unintended consequences. Most importantly, this course will encourage students to examine their potential to transform our civilization to one that is aligned to the essential symbiotic relationship we have with our dynamic Earth. Finally, as a First Year Seminar the course introduces incoming freshman and transfer students to fundamental academic essentials important to a successful University of Wyoming experience.

USP Code [(none)<>FYS]

GEOL1110 - Physical Geology for Engineers

Credits: 4

Introduction to geologic principles for engineers with emphasis on near surface processes and material properties. The first half will teach planetary basics, mineral/ rock and geologic structure, surface processes, geologic material strength and deformation, and geohazards. The final half covers methods and analysis with the collection of geophysical data on-campus to assess near-surface properties with a full lab report.

USP Code [(none)<>PN]

Prerequisite: MATH 1400 and MATH 1405 or MPE score of 5 or higher or SAT Math score of 600 or higher or ACT Math score of 27 or higher.

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP Code [(none)< >PN]

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP Code [G,S< >(none)]

GEOL1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed ERS 1650.

USP Code [(none)< >PN]

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP Code [SE< >(none)]

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and

identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2050 - Principles of Paleontology

Credits: 3

Examines scientific principles, biological and geological, that underlie general study of ancient life on Earth. Includes interactions of evolutionary, stratigraphic, taphonomic and paleogeographic concepts within various approaches to paleobiology and systematic paleontology. Optional field trip.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 1100 or LIFE 1000 or LIFE 1010.

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP Code [SE<>(none)]

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

GEOL2150 - Geomorphology

Credits: 4

Discusses general principles of landform description and analysis.

Prerequisite: GEOL 1100 or equivalent.

GEOL2220 - Communicating Earth Science

Credits: 3

This course will focus on communicating science to non-scientists. Students will deliver earth science information through written, digital and oral presentations to be informative and interesting to the public.

USP Code [(none)<>COM2]

Prerequisite: grade of C or higher in GEOL 2010, COM1.

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL3040 - Introduction to Groundwater

Credits: 3

This class will introduce the basic principles of Groundwater Hydrology such as hydrological cycle, mass balance, fluid properties, mechanics of flow through porous media, Darcy's law, aquifer and aquitards, groundwater wells, groundwater geology, and surface water/ groundwater interaction.

Prerequisite: A grade of B or higher in MATH 1405 or MATH 1450.

GEOL3110 - Invertebrate Paleontology

Credits: 4

Encompasses taxonomy and morphology of major groups of invertebrate fossils. Includes examples of their use in correlation, environmental reconstruction and interpretation of evolution.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 1200.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP Code [I<>(none)]

Prerequisite: One USP designated science course with lab.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP Code [SE<>(none)]

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resource are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP Code [SE,G<>PN]

Prerequisite: completion of USP QA and L.

GEOL4000 - Paleomagnetism in Geology/Geophysics

Credits: 3

Studies paleomagnetic solutions in geoscience topics. Includes plate reconstructions; sea-floor formation; structural geology; dating of structural/tectonic events; western North American tectonics; global geomagnetic polarity reversals and time scale; magnetostratigraphic correlation; stratigraphic dating; dating diagenetic events; characteristics of core and mantle; extraterrestrial impacts and geologic phenomena; environmental and climate change applications. Field trip and laboratory project required.

Dual Listed GEOL 5000.

Prerequisite: GEOL 1000 or GEOL 1100; GEOL 1200 desirable.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4010 - Exploration Geoscience

Credits: 3

Provides students with information and skills necessary to understand the energy exploration modeling process. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, and reservoir characterization.

Cross Listed ERS 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

GEOL4025 - Igneous and Metamorphic Petrology

Credits: 4

An advanced study of igneous and metamorphic rocks in hand sample and thin section. Covers optical techniques for identifying minerals, the use of phase diagrams and geochemistry to understand the evolution of igneous rocks and the formation conditions of metamorphic rocks. A field trip is required.

Prerequisite: GEOL 2020.

GEOL4030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 5030.

Prerequisite: MATH 2205 and GEOL 4444/GEOL 5444.

GEOL4050 - Geology of Wyoming

Credits: 3

Survey of the geologic history of Wyoming beginning in the Precambrian and extending to the present. Stratigraphic and sedimentation history, igneous activity, metamorphism, and orogenic activity are emphasized in the lectures. Occasional field trips are required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 1100 or an equivalent course.

GEOL4060 - Rocky Mountain Field Trip

Credits: 1

Max Credit (Max. 3)

A six-day geological field trip to various classic localities in the Rocky Mountains.

Prerequisite: senior standing and GEOL 2010 and GEOL 4610 or GEOL 4050.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and

other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4125 - Igneous Petrology

Credits: 2

Studies igneous rocks in thin section. Lectures cover mineralogy, geochemistry, phase equilibria and occurrence of igneous rocks. Labs study suites of igneous rocks in thin section.

When Offered (Offered fall semester of odd numbered years)

Prerequisite: GEOL 2010.

GEOL4130 - Metamorphic Petrology

Credits: 2

Studies metamorphic rocks in thin section. Lectures cover mineralogy, phase equilibria and occurrence of metamorphic rocks. Labs study suites of metamorphic rocks in thin section.

When Offered (Offered spring semester of odd-numbered years)

Prerequisite: GEOL 2010.

GEOL4150 - Paleontology of Lower Vertebrates

Credits: 4

Explores evolutionary histories of lower vertebrates including fishes, amphibians, reptiles and birds. Optional field trip.

When Offered (Normally offered every third year)

Prerequisite: acceptable previous training in geology or zoology, 12 hours of biology and/or geology or ZOO 4000.

GEOL4160 - Regional Tectonics

Credits: 2

A field-based introduction to the Mesozoic to early Cenozoic tectonic evolution of the U. S. Cordillera.

Dual Listed GEOL 5160.

Prerequisite: GEOL majors and junior or senior level standing.

GEOL4170 - Paleontology of Cenozoic Placental Mammals

Credits: 4

Explores evolutionary histories of placental mammals' characteristic of Cenozoic era as documented through fossil record study. Optional field trip.

When Offered (Normally offered every third year)

Prerequisite: 12 hours of biology and/or geology or ZOO 4000.

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

GEOL4191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Dual Listed GEOL 5191.

Prerequisite: GEOL 4190.

GEOL4200 - Topics in Geology

Credits: 1-3

Max Credit (Max. 9)

Studies particular geology topics in-depth at undergraduate level.

Former Course Number [GEOL 4010]

Prerequisite: senior standing and 20 hours in geology.

GEOL4210 - Topics in Geophysics

Credits: 1-3

Max Credit (Max. 9)

Studies particular geophysics topics in-depth at undergraduate level.

Former Course Number [GEOL 4020]

Prerequisite: senior standing and 20 hours in geology.

GEOL4214 - Topics in Economic Geology

Credits: 1-2
Max Credit (Max. 2)

Seminar in economic geology: topics will be influenced by the interest of students who register. For undergraduates looking to enroll in GEOL 4214, it is highly suggested that you have taken GEOL 4270 Ore Deposits before taking this class.

Dual Listed GEOL 5214.

Prerequisite: C or better in GEOL 2020.

GEOL4250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 5250

Prerequisite: MATH 1400 and 1405 or consent of instructor.

GEOL4270 - Hydrogeophysics

Credits: 3

Estimating groundwater parameters, contaminant transport, porosity and other hydrologic properties using geophysics. Integrates literature review, discussion, exercises and writing to introduce students to hydrogeophysics research. Students will acquire skills at reading technical publications, writing, and gain knowledge about current trends in the field. Emphasis on critical thinking and analysis of writing.

Prerequisite: 20 hours of geology or engineering courses.

GEOL4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 4280.

Dual Listed GEOL 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

GEOL4310 - Advanced Stratigraphy

Credits: 3

Deals with characterizing and predicting the vertical and lateral distribution of sedimentary rocks. Includes correlation methods; use of facies models; facies delineation; impact of tectonics and changes in relative sea level on sedimentary record; transgressions and regressions; concept and construction of stratigraphic framework; and sequence stratigraphy.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2100.

GEOL4320 - Cenozoic Stratigraphy

Credits: 4

Studies areal distribution, depositional environment, paleohydraulics, provenance, and correlation of global Cenozoic deposits. Required field trip.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 2100.

GEOL4420 - Sedimentary Rocks

Credits: 4

Encompasses origin, classification and interpretation of sedimentary rocks including sandstones, mudrocks and carbonates. Topics also include depositional environments and basin analysis. Field trip required.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 2010 and GEOL 2100.

GEOL4440 - High-Performance Computing for Scientists and Engineers

Credits: 3

Gives students an integrated introduction to the design, analysis and implementation of parallel codes on modern HPC systems. This course is interdisciplinary in nature, involving case studies in biology, physics, mathematics and geosciences. HPC systems at ARCC will be used for hands-on exercises.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4460 - Planetary Geology

Credits: 3

Examines basic principles of planetary geology and their application to specific planetary examples. Core topics include solar system formation, impact cratering, and comparative planetology. Provides an opportunity to test terrestrial theories under extreme conditions, and provides insight into both early earth history and ongoing geological processes.

Prerequisite: GEOL 2010 and GEOL 2100 and (MATH 1400/MATH 1405 or MATH 1450).

GEOL4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG 4470/5470

Dual Listed GEOL 5470

Prerequisite: GEOG 4460, BOT 4700, or LIFE 3400; junior or senior standing.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4666 - Plate Tectonics

Credits: 3

Studies theory of plate tectonics including quantitative assessment of observations which lead to its acceptance. Includes geometry of plate tectonics, plate boundaries and plate motions at present and in the past, evolution of plates including sea floor spreading and subduction processes, as well as driving mechanisms. Two lectures, one laboratory/discussion per week.

Dual Listed GEOL 5666.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 4610, geology/geophysics math requirements.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)

Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 5720

When Offered (Normally offered fall semester)

Former Course Number [GEOL 4700]

Prerequisite: a grade of C or better in GEOL 2020.

GEOL4760 - Rates and Timescales of Surface Processes

Credits: 3

Explores methods for quantifying rates and timescales of weathering, erosion, soil formation, nutrient cycling and other surface processes. Focus includes cosmogenic nuclides, tracer thermochronometry, U-series disequilibrium, fallout radionuclides, and optically stimulated luminescence. Course features a mix of instructor-driven lectures on fundamentals and student-driven discussion of cutting-edge research from recent literature.

Dual Listed GEOL 5760.

Prerequisite: GEOL 2150 or GEOG 3010 or GEOL 4880 and MATH 2205 and CHEM 1020 and PHYS 1100.

GEOL4777 - Geochemistry of Natural Waters

Credits: 3

Studies physical chemistry applied to natural waters, and chemistry of rock weathering, sources and controls on major, minor and trace elements, plus problems related to introduced pollutants.

Dual Listed GEOL 5777.

Prerequisite: GEOL 2010, MATH 2205, and CHEM 1030.

GEOL4800 - Independent Study

Credits: 1-3

Encompasses field, laboratory or library research for senior students in department.

Prerequisite: senior standing and not fewer than 20 hours in geology.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP Code [WC<>COM3]

Prerequisite: junior standing and 26 hours in the department.

GEOL4835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. It covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetics methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources, and environmental issues.

Dual Listed GEOL 5835.

Former Course Number [GEOL 4970]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210 and MATH 2200.

GEOL4850 - Principles of Digital Filtering and Time Series Analysis

Credits: 3

Studies principles and applications of data processing techniques as used in seismic exploration, oceanography, gravity and magnetic prospecting, remote sensing and other areas of earth science. Includes discrete versus continuous time series; fourier and Z-transforms; layer matrix analysis; reflectivity function; deconvolution and predictive deconvolution; digital filter design; array analysis; velocity filters; and migration.

When Offered (Normally offered fall semester)

Prerequisite: mathematics through calculus.

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

GEOL4888 - Glaciology

Credits: 3

Dynamics of frozen water. Covers behavior of ice masses, in the form of glaciers or ice-sheets, and geomorphic aspects of glacial erosion and deposition. Includes forcing and feedbacks between cryosphere and global climate.

When Offered (Offered every second year spring semester)

Prerequisite: MATH 2205, PHYS 1210 (PHYS 1310).

GEOL5020 - Fundamentals of Research

Credits: 2

Lectures, discussion and projects centered on three fundamental aspects of research: development of research tools, understanding the scientific method, learning how to write a grant, read the literature and present a talk. Class is designed for all incoming graduate students in the department.

Prerequisite: graduate standing.

GEOL5030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 4030.

Prerequisite: MATH 2205, GEOL 5444.

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotopic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

GEOL5113 - Geological Remote Sensing

Credits: 4

Acquaint students with aircraft and spacecraft remote sensing of the environment, emphasizing geological application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. The laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Dual Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 OR MATH 1450.

GEOL5120 - Tectonic Evolution of the North American Cordillera

Credits: 4

Phanerozoic tectonic evolution of western North America viewed through the paradigm of plate tectonics. Course involves intensive literature review, guest speakers, a possible field trip, and an in depth regional tectonic analysis to be done by each student.

Prerequisite: GEOL 2020, GEOL 2100, and GEOL 4610.

GEOL5150 - Metamorphic Petrology

Credits: 4

Lectures on field occurrence, macroscopic and microscopic characteristics of igneous rocks, followed by lectures on application of physical chemistry to genetic study of igneous rocks. Laboratory devoted to the study of suites of igneous rocks from classical areas.

Prerequisite: GEOL 2020 and GEOL 4490; graduate standing.

GEOL5160 - Regional Tectonics

Credits: 2

A field-based introduction to the Mesozoic to early Cenozoic tectonic evolution of the U. S. Cordillera.

Dual Listed GEOL 4160.

Prerequisite: graduate standing.

GEOL5180 - Reflection Seismology

Credits: 3

Lectures treating seismic methods applied to the study of earth structures ranging from exploration to crustal structure. Topics covered include wave propagation recording techniques, processing, modeling, resolution and interpretation. Laboratory exercises give practical experience on lecture topics and emphasize use of instruments and data analysis. Computer processing introduced.

Prerequisite: GEOL 1200, one year of calculus and one year of physics.

GEOL5190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 4190.

Prerequisite: GEOL 2100, GEOL 4610.

GEOL5191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Prerequisite: GEOL 5190.

GEOL5200 - Topics in Geology

Credits: 1-3

Max Credit (Max. 9)

Provides a detailed study at a graduate level of a particular topic in geology.

Prerequisite: graduate standing in geology and geophysics and permission of the instructor.

GEOL5210 - Topics in Geophysics

Credits: 1-3

Max Credit (Max. 9)

Provides a detailed study at a graduate level of a particular topic in geophysics.

Prerequisite: graduate standing in geology and geophysics and permission of instructor.

GEOL5211 - Seminar in Structural Geology and Tectonics

Credits: 1

Max Credit (Max. 6)

Selected topics in structural geology and tectonics. On-going research among undergraduate and graduate students is emphasized.

Prerequisite: GEOL 4610 or equivalent course.

GEOL5212 - Sedimentary Seminar

Credits: 1

Max Credit (Max. 3)

Seminar in selected topics in sedimentary geology. Designed to bring, and keep, graduate students up to date with the current literature and new, unpublished ideas. Visiting lecturers and presentations of student and faculty research.

Prerequisite: graduate standing.

GEOL5213 - Seminar in Tectonics

Credits: 2

Graduate topical seminar focused on tectonic. The class is a mixture of lectures, readings, and original research involving the compilation/ generation, analysis, and interpretation of data to understand geodynamic processes and events.

Prerequisite: graduate standing.

GEOL5214 - Topics in Economic Geology

Credits: 1-2

Max Credit (Max. 2)

Seminar in economic geology: topics will be influenced by the interest of students who register. For undergraduates looking to enroll in GEOL 4214, it is highly suggested that you have taken GEOL 4270 Ore Deposits before taking this class.

Dual Listed GEOL 4214.

GEOL5215 - Inverse Theory

Credits: 3

Inverse theory is about learning the techniques to invert data for an acceptable model. The simplest example is least-squares fitting of a line. Covers inversion of both over and under-determined inverse problems, regularization techniques, bayesian theory, along with probabilistic viewpoints.

Prerequisite: graduate standing in geology and geophysics; linear algebra, MATLAB programming.

GEOL5216 - Global Seismology

Credits: 3

Introductory class in theoretical seismology with emphasis on wave propagation. Topics include elastic wave theory for body and surface waves, normal modes, anisotropic wave propagation, source processes, and derivation of the wave equation, the ray theoretical approximation, representation theorems, stress/strain constitutive relations, normal modes, surface waves, and attenuation operators.

Prerequisite: graduate standing in geology or geophysics and permission of the instructor.

GEOL5217 - Geodynamics

Credits: 3

Examines the fundamental physical processes necessary for the understanding of plate tectonics and a variety of other geological phenomena. Provides a solid grounding for future study and research covering plate tectonics, stress & strain, elasticity, isostasy & the flexural strength of the lithosphere, gravity, and thermal processes.

Prerequisite: GEOL 1100, one year of college level Physics and MATH 2210.

GEOL5220 - Vertebrate Morphology and Evolution

Credits: 2

Course for paleontology majors and vertebrate anatomists involving advanced concepts, recent literature, and research training in the areas of morphology and evolution of fossil vertebrates.

Cross Listed ZOO 5220.

Prerequisite: GEOL 4150/ZOO 4150 or GEOL 4160/ZOO 4160, or GEOL 4170/ZOO 4170 or ZOO 4000.

GEOL5230 - Vertebrate Paleobiogeography

Credits: 2

Lectures and discussions devoted to use of data from the fossil record of vertebrates in interpreting ancient distributions of landmasses and seaways, recognizing paleoclimatic changes, and documenting the evolution of zoogeographic provinces.

Prerequisite: GEOL 4150/ZOO 4150, or GEOL 4160/ZOO 4160 or GEOL 4170/ZOO 4170.

GEOL5250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 4250

GEOL5270 - Hydrogeophysics

Credits: 3

Estimating groundwater parameters, contaminant transport, porosity and other hydrologic properties using geophysics. Integrates literature review, discussion, exercises and writing to introduce students to hydrogeophysics research. Students will acquire skills at reading technical publications, writing, and gain knowledge about current trends in the field. Emphasis on critical thinking and analysis of writing.

Prerequisite: 20 hours of geology or engineering courses.

GEOL5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 5280.

Dual Listed GEOL 4280.

Prerequisite: graduate standing.

GEOL5300 - Sedimentary Basins

Credits: 4

Sedimentary basin evolution are examined from the view point of plate tectonics, thermal histories, and lithospheric processes. Quantitative basin modeling techniques are applied to understanding subsidence histories, sea level changes, and the primary controls on the formation of stratigraphic sequences.

Prerequisite: 1 year of calculus.

GEOL5321 - Engineering and Environment Geophysics

Credits: 3

Theoretical background for electrical, electromagnetic, georadar, and other near-surface geophysical measurements. Practical exercises focused on modeling, inversion, data analysis and experimental design. Discussion of applications to engineering and environmental problems. Basic knowledge of MATLAB programming language is helpful, but not required.

Cross Listed CE 5321.

Prerequisite: MATH 2250 or MATH 2200.

GEOL5330 - Mechanics of Sediment Transport, Erosion and Deposition

Credits: 4

Erosion, transport, and deposition of sediments are examined from a first-principles basis. Physical processes are derived from fluid dynamics, statistical mechanics, and mass conservation. These topics are then used to explore landscape and seascape evolution, morphodynamics, and stratigraphic construction.

Prerequisite: GEOL 2100 or equivalent.

GEOL5340 - Advanced Tectonics and Sedimentation

Credits: 3

Lectures, seminars, and field observations on the relations between tectonism and the sedimentary record. Topics include a review of plate tectonic theory, characteristics of major types of sedimentary basins, techniques for evaluating tectonic activity from evidence in the sedimentary record and large-scale tectonosedimentary elements.

Prerequisite: graduate standing, GEOL 2100, and GEOL 4610.

GEOL5410 - Geochemical Analytical Methods

Credits: 3

Applied course in common geochemical analytical methods. Consists of lectures and laboratories with individual hands-on

training. Includes sample handling, method development, and data interpretation for several analytical instruments including but not limited to inductively coupled argon plasma emission and ion chromatography. Other analytical methods are also treated.

Prerequisite: GEOL 4490.

GEOL5420 - Surfaces and Interfaces

Credits: 3

Examines the role of surfaces and solid-solution interfaces in regulating the chemistry of the Earth's surface. Subjects to be covered includes surface tension, capillarity, and the thermodynamics of surfaces; the equilibrium and kinetic chemistry of absorption-desorption; dissolution-precipitation kinetics and controlling factors; surface catalysis; and surface oxidation-reduction reactions. Presented in the context of geochemically and environmentally important processes such as chemical weathering, partitioning of solutes between water and surfaces, and the transport and degradation of pollutants.

Prerequisite: One of the following: GEOL 4490, GEOL 4777, GEOL 5777, CHEM 3020, CHEM 4507.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5446 - Introduction to Geostatistics

Credits: 3

The development of the basic principles of geostatistics and its practical applications in the geosciences will be presented. Main topics include: spatial analysis, kriging, cokriging, geostatistical simulations (unconditional, conditional). If time permits additional topics include: simple kriging, indicator kriging and block kriging.

Prerequisite: MATH 2200, MATH 2205, MATH 2250 and STAT 2000.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG 4470/5470.

Dual Listed GEOL 4470

Prerequisite: GEOG 4460, BOT 4700, or LIFE 3400; or graduate standing.

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5560 - Numerical Methods in Ground Water Geology II

Credits: 3

Time dependent digital simulation models designed to forecast impacts of ground water developments.

Prerequisite: GEOL 5550.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

GEOL5600 - Theoretical Petrology

Credits: 3

Graphic and analytical techniques used to evaluate the genesis of igneous and metamorphic rocks. Principles of thermodynamics,

activity-composition relations, and G-X diagrams will be reviewed. Igneous topics include: use of phase diagrams, heat and mass transfer, magma generation. Fluid rock equilibria and Schreinemakers' analysis will be used to evaluate the origin of metamorphic rocks.

Prerequisite: GEOL 4490.

GEOL5610 - Geological Thermodynamics I

Credits: 4

Laws of thermodynamics, conditions which constitute chemical equilibrium, and multiple component systems as applied in geologic problems.

Prerequisite: MATH 2200, MATH 2205, CHEM 1030, consent of instructor.

GEOL5630 - Electronic Microprobe

Credits: 3

Lectures cover the theory of X-ray emission analysis, microprobe instrumentation, and data reduction procedures. Labs cover various uses of microprobe in solving geological problems.

Prerequisite: consent of instructor.

GEOL5640 - Advanced Igneous Petrology Seminar

Credits: 1-3

Max Credit (Max. 9)

Advanced training in igneous petrology emphasizing applications of chemical principles to the study of igneous rocks. Each year a different aspect of igneous petrology are covered in detail.

Prerequisite: GEOL 4490, GEOL 5050.

GEOL5650 - Advanced Metamorphic Petrology

Credits: 3

Review of the literature and study of the advanced concepts in metamorphic petrology.

Prerequisite: GEOL 5150.

GEOL5660 - Microstructural Analysis of Deformed Rocks

Credits: 4

The use of microscope in the interpretation of natural strain in rocks is emphasized. Lectures and extensive laboratory exercises are the principle components of the course. Microfabric analysis using the universal stage is introduced.

Prerequisite: GEOL 4610 required, GEOL 5150 recommended.

GEOL5666 - Plate Tectonics

Credits: 3

The theory of plate tectonics including a quantitative assessment of the observations which lead to its acceptance and limitations. Topics include: geometry of plate tectonics, plate boundaries and plate motions at present and in the past, evolution of plates including sea floor spreading and subduction processes, and driving mechanisms. Two lectures, one laboratory/discussion per week.

Dual Listed GEOL 4666.

Prerequisite: GEOL 4610, geology/geophysics math requirements.

GEOL5700 - Seminar in Structure and Development of the Earth's Crust

Credits: 3

Seminar in structure and development of the Earth's crust. Topics include structure and geochemistry of the Precambrian plate tectonics in the Precambrian early history of the Earth, seismic refraction crustal models, seismic reflection crustal models, and crustal genesis.

Prerequisite: admission is by consent of instructor, GEOL 4610 and one semester of geophysics.

GEOL5720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 4720.

Prerequisite: GEOL 2010.

GEOL5730 - Seismic Data Processing

Credits: 3

Fundamentals of seismic reflection data processing: processing of field tapes, cross-correlation, velocity analysis, stacking, and deconvolution. Statistics correct, migration, coherency filtering.

Prerequisite: GEOL 5180, MATH 4430, MATH 4440.

GEOL5760 - Rates and Timescales of Surface Processes

Credits: 3

Explores methods for quantifying rates and timescales of weathering, erosion, soil formation, nutrient cycling and other surface processes. Focus includes cosmogenic nuclides, tracer thermochronometry, U-series disequilibrium, fallout radionuclides, and optically stimulated luminescence. Course features a mix of instructor-driven lectures on fundamentals and student-driven

discussion of cutting-edge research from recent literature.

Dual Listed GEOL 4760.

Prerequisite: GEOL 2150 or GEOG 3010 or GEOL 4880 and MATH 2205 and CHEM 1020 and PHYS 1100.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Dual Listed GEOL 4777.

Prerequisite: GEOL 2010, MATH 2205, and CHEM 1030.

GEOL5820 - Advanced Geomorphology

Credits: 1-3

Max Credit (Max. 6)

Graduate reading and discussion seminar on current topics in surficial processes. An indepth analysis of the literature and work, with the subject matter determined by student interest. May include lectures.

Prerequisite: senior or graduate standing in geology.

GEOL5835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. Covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetism methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources and environmental issues.

Dual Listed GEOL 4835.

Prerequisite: graduate standing in geology.

GEOL5850 - Economic Geology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5851 - Environmental Geology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5852 - Geochemistry

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5853 - Geomorphology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5854 - Geophysics

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5855 - Ground Water Hydrology

Credits: 1-6

Max Credit (Max. 7)

Prerequisite: graduate standing in geology.

GEOL5856 - Mathematical and Statistical Geology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5857 - Mineralogy and Crystallography

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5858 - Paleontology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5859 - Petrology

1136

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5860 - Sedimentology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5861 - Stratigraphy

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5862 - Structural Geology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

GEOL5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOL5940 - Continuing Registration: Off Campus1

Credits: 2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

GEOL5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

GEOL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GEOL5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

GEOL5990 - Internship

Credits: 1-12
Max Credit (Max. 14)

Prerequisite: graduate standing.

Geospatial Information Science Technology

GIST1001 - GIST Orientation and Portfolio

Credits: 1
Introduces students to the GIST degree, the resources necessary to be successful in the program, and the broader geospatial field and its impact on society. Topics include a survey of domain applications, the ethical, legal and social implications of using geospatial data, and geospatial certifications and credentialing.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP Code PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP Code Q

Former Course Number GIST 3111

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and AECL 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST4410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 5410.

GIST4420 - UAS Mission Planning

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 5420.

GIST4430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 5430.

GIST4440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 5440.

GIST4450 - UAS Photogrammetry and Image Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 5450.

Prerequisite: Junior/Senior standing or approval from the instructor.

GIST4790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 5790.

GIST4870 - Internship in Geospatial Information Science and Technology

Credits: 1-12
Max Credit (Max. 12)

Provide undergraduates with the opportunity to receive credit for practical experience in geospatial information science and technology. Internship opportunities must be approved by faculty and work supervisors.

GIST4950 - Undergraduate Research in Geospatial Information Science and Technology

Credits: 1-6
Max Credit (Max. 6)

Undergraduate research in Geospatial Information Science and Technology (GIST) under the mentorship of UW faculty. Students are encouraged to present their research at professional meetings and to publish their work. GIST is multidisciplinary, so research problems span a wide range of topics.

GIST5002 - Geospatial Forum

Credits: 1
Students attend a geospatial sciences speaker series and contribute by presenting their proposed or completed research to faculty and other students in a professional manner analogous to presenting scientific research at professional meetings.

GIST5050 - Database Design and Management

Credits: 3
Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e.g., Relational databases, Program R and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050]

GIST5100 - Foundations of Geospatial Information Science and Technology

Credits: 3
This online and on-campus graduate-level course provides an introduction to key concepts in geospatial information science and technology (GIST) including spatial data structures, coordinate systems, cartographic principles, spatial analysis, modeling, spatial cognition, and applications of GIS in a multidisciplinary context. Lecture and project-based (poster).

GIST5111 - Introduction to Remote Sensing

Credits: 3
Combined online lecture and laboratory course introduces students to fundamental principles and techniques of remote sensing

and the application of digital satellite and aerial imagery to the study of the earth's surface. Includes hands-on application of digital imaging processing techniques discussed in lecture.

Former Course Number [BOT 5111; GEOG 5111]

GIST5120 - Integration of RS and GIS Data

Credits: 3

Many geospatial analyses involve combining remotely sensed (RS) data and products with other geospatial data stored in GIS. This 3-credit online course will overview the topics pertaining to the integration of RS data in raster format with GIS data stored in vector format.

Prerequisite: graduate standing.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5200 - Geographic Visualization

Credits: 3

This online lecture and lab course emphasizes advanced theory and hands-on practice for creating applying interactive, dynamic, and multidimensional graphical representations of geographic data. Students will be introduced to web programming to allow them to develop mobile and online visualization tools.

GIST5211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 4211.

Former Course Number [BOT 5211; GEOG 5211]

Prerequisite: GIST 5111 or GIST 5130.

GIST5220 - Spatial Modeling & Data Analysis

Credits: 3

Using raster modeling, hybrid vector/raster approaches, and geo-computational techniques, this course will explore a variety of modeling concepts and related issues. This course will examine a variety of both practical and theoretical issues, with special emphasis on understanding spatial questions that are not readily addressed by basic GIS. We will also consider issues related to error, resolution, scale, and a variety of other factors.

Former Course Number GEOG 5220

GIST5280 - Navigating GIST Professions

Credits: 1

An introduction to work in the geospatial profession for online GIST master's program students. Focus is on workplace, management and occupation-specific competencies across and within specific domain application areas. Topics include evaluation and appropriate use of technology and data, developing career pathway options, the role of professional certification, and the value of continuing education and professional network connections.

GIST5300 - Web Mapping and Internet GIS

Credits: 3

With a combination of lecture-based information and hands-on lab exercises, students learn to design, develop, and implement web- and internet-based GIS and mapping applications. Commonly used web and internet GIS tools are used, and students learn to assess the quality, utility, and legal aspects of web GIS products.

GIST5350 - Enterprise GIS

Credits: 3

This course provides a comprehensive overview of the design, development, and management of enterprise GIS platforms. In addition to learning about enterprise architecture, students set up cloud services for managing, sharing, and processing spatial data using proprietary and open source tools.

GIST5410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 4410.

GIST5420 - UAS Mission Planning

Credits: 1

This 1-credit online course provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 4420.

GIST5430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 4430.

GIST5440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 4440.

GIST5450 - UAS Photogrammetry and Imagery Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery data acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 4450.

Prerequisite: graduate standing or approval from the instructor.

GIST5790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 4790.

German

GERM1010 - First Year German I

1145

Credits: 4

Explores fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

GERM1020 - First Year German II

Credits: 4

Examines fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

Prerequisite: GERM 1010 or two years of high school German.

GERM1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

GERM2030 - Second Year German I

Credits: 4

Includes reading simple novels, short stories, and dramas; grammar review; and conversation. Eight required laboratory exercises.

USP Code [(none)<>H]

Prerequisite: GERM 1020 or three years of high school German.

GERM2040 - Second Year German II

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP Code [(none)<>H]

Prerequisite: GERM 2030 or three years of high school German.

GERM3006 - 20th Century German Culture and Civilization

Credits: 3

Major political, ideological and cultural developments in Germany between 1871 and the present. An interdisciplinary approach (history, art history, film and literature) allows students to explore and assess a nation's culture and civilization as well as far-reaching events (WWI, WWII and the Holocaust) from various perspectives.

USP Code [WC,CH<>(none)]

Prerequisite: junior standing.

GERM3050 - Third Year German I

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP Code [WB<>COM2]

Prerequisite: GERM 2040.

GERM3060 - Introduction to German Literature

Credits: 3

Introduces literature of Germany. Analyzes major literary types and elements of criticism. Emphasizes compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Prerequisite: GERM 3050.

GERM3150 - German History and Culture

Credits: 3

Taught in English, this class engages students both theoretically and practically with German history and culture throughout the ages from the Middle Ages to today. Reading content is complemented with outings to culturally and historically significant sites in Germany as part of a summer study abroad program.

USP Code [CH,G<>(none)]

Prerequisite: WA or equivalent.

GERM3990 - Independent Study

Credits: 1-4

Focuses on books or periodicals of special interest to the student selected in consultation with a staff member; independent reading and reports.

Prerequisite: GERM 2030.

GERM4070 - Fourth Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Dual Listed GERM 5070.

When Offered (Offered every other year)

Prerequisite: GERM 3060.

GERM4080 - German-English and English- German Translation

Credits: 3

Encompasses written translation exercises based on contemporary and relevant texts in both English and German. Addresses specific translation problems arising in both English and German, when translating into the other language.

When Offered (Offered fall semester)

USP Code [WB<> (none)]

Prerequisite: GERM 3050 and/or GERM 3060.

GERM4100 - A Survey of German Literature I

Credits: 3

Studies German literature and civilization from the Middle Ages to the 17th century.

Dual Listed GERM 5100.

Prerequisite: GERM 2140 or equivalent.

GERM4110 - A Survey of German Literature II

Credits: 3

Studies German literature and civilization from the 18th century to the end of the 20th century.

Dual Listed GERM 5110.

Prerequisite: GERM 2140 or equivalent.

GERM4145 - Weimar Classicism

Credits: 3

Introduces student to Weimar Classicism, one of the crucial periods in German literature and culture. Explores the foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works during this period. Primary language for instruction for this course is German.

Dual Listed GERM 5145.

Prerequisite: GERM 2140 or equivalent.

GERM4180 - German Poetry

Credits: 3

Surveys poetry from the Middle Ages to the present. Emphasizes poetry after 1600. Treats formal elements and genre categories.

Dual Listed GERM 5180.

Prerequisite: GERM 2140.

GERM4200 - Introduction to Research

Credits: 3

Max Credit 9

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

Prerequisite: 12 hours of 4000-5000-level courses.

GERM4240 - German Literature of the Romantic Period

Credits: 3

Introduces the philosophical bases of German Romanticism and analyzes representative works of prose and poetry.

Dual Listed GERM 5240.

Prerequisite: GERM 2140 or equivalent.

GERM4255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of significant German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 5255.

Prerequisite: GERM 2140 or equivalent.

GERM4275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural production by artists identified with immigrant communities or communities of color. Topics examined include intersections of gender, race, nation, culture, and class; experiences of different minorities; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Course is taught in German.

Dual Listed GERM 5275.

Prerequisite: GERM 2140 or equivalent.

GERM4285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary Germany.

Dual Listed GERM 5285.

Prerequisite: WB.

GERM4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects designed to meet needs of individual students, designed in consultation with instructor.

Prerequisite: GERM 2140 and consent of instructor.

GERM5070 - 4th Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts, and group discussions on prepared topics.

Dual Listed GERM 4070.

Prerequisite: GERM 3060.

GERM5100 - A Survey of German Literature I

Credits: 3

A study of German literature and civilization from the Middle Ages to the seventeenth century.

Dual Listed GERM 4100.

Prerequisite: GERM 2140 or equivalent.

GERM5110 - A Survey of German Literature II

Credits: 3

A study of German literature and civilization from the eighteenth century to the end of the twentieth century.

Dual Listed GERM 4110.

Prerequisite: GERM 2140 or equivalent.

GERM5145 - Weimar Classicism

Credits: 3

Introduces students to Weimar Classicism, one of the crucial period in German literature and culture. Explores the foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works written by Goethe and Schiller during this period. Taught in German. Students are expected to read, write and discuss in German.

Dual Listed GERM 4145.

Prerequisite: graduate standing.

GERM5160 - Graduate Readings

Credits: 1-5

Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

GERM5180 - German Poetry

Credits: 3

A survey of poetry from the Middle Ages to the present. Emphasis on poetry after 1600. Treatment of formal elements and genre categories.

Dual Listed GERM 4180.

Prerequisite: GERM 2140.

GERM5240 - German Literature of the Romantic Period

Credits: 3

An introduction to the philosophical bases of German Romanticism and analysis of representative works of prose and poetry.

Dual Listed GERM 4240.

Prerequisite: GERM 2140 or equivalent.

GERM5255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 4255.

Prerequisite: GERM 2140 or equivalent.

GERM5275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural productions by artists identified with immigrant communities or communities of color. Topics examined include: the intersections of gender, race, culture, and class; experiences of different minorities in unified Germany; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Taught in German. Students are expected to read, write and discuss in German.

Dual Listed GERM 4275.

Prerequisite: GERM 2140 or equivalent.

GERM5285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary German. Taught in English.

Dual Listed GERM 4285.

Prerequisite: graduate standing.

GERM5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GERM5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GERM5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Greek

GRK1010 - First Year Greek I

Credits: 4
Studies fundamentals of grammar, composition and reading in Classical Greek.

When Offered (Offered based on sufficient demand and resources)

GRK1020 - First Year Greek II

Credits: 4
Studies grammar, composition and reading in Classical Greek.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1010.

GRK2030 - Second Year Greek

Credits: 4
Explores reading simple texts, stories and dramas, as well as grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1020 or equivalent.

GRK2040 - Second Year Greek II

Credits: 4

Further studies in grammar and reading simple texts, stories, and dramas.

When Offered (Offered based on sufficient demand and resources.)

Prerequisite: GRK 2030 or the equivalent.

GRK3990 - Independent Study

Credits: 1-4

Encompasses independent reading, selected in consultation with instructor.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1020 or equivalent.

Higher Education

HIED5000 - Community College Leadership

Credits: 3

This course will introduce students to the challenges associated with instructional leadership at the community college. The course will identify and distinguish the macro (organizational) level of change but also the micro (individual) level of change in community college settings.

Prerequisite: Admission into MA program.

HIED5020 - Higher Education Systems

Credits: 3

The purpose of this course is to provide students with an overview of higher education as an industry, as a cultural institution, and social stability while also promoting social mobility. Special focus is given to the stratification and diversity of American higher education.

Prerequisite: Admission into MA program.

HIED5030 - Continuing and Professional Education

Credits: 3

This course will introduce graduate students to the main issues, trends, and problems that have defined the field of continuing and professional education. The course will also provide students with the foundational knowledge and skills needed to administer continuing and professional education programs.

Prerequisite: Admission into MA program.

HIED5040 - Higher Education Staffing

Credits: 3

This course provides students with a theoretical and practical overview of the research and best practices associated with the development of instructional staff at higher education institutions. Special attention is given to the use of mentoring higher education instructional staff.

Prerequisite: Admission into MA program.

HIED5050 - Workforce Training

Credits: 3

In this course, students study the process of preparing objectives, retaining instructional staff, defining content, selecting learning activities, and evaluating student learning in workforce education programs delivered by higher education institutions.

Prerequisite: Admission into MA program.

HIED5060 - Program Budgets and Instructions

Credits: 3

The purpose of this course is to familiarize managers with the core tasks needed for effective financial planning. Students are also introduced to the budgeting process in various public higher education institutions.

Prerequisite: Admission into MA program.

HIED5090 - Masters Capstone

Credits: 3

Provides exposure to situations students will likely encounter professionally. It establishes a forum where students apply and refine theories, principles, and skills learned during their programs. Students examine and critique current scholarship and document general degree specific competencies.

Cross Listed ITEC 5090.

Prerequisite: Check with advisor and complete required sequence of courses for Educational Administration (Adult and Postsecondary Education) or Instructional Technology masters degree programs prior to enrollment.

HIED5240 - Teaching Adults

Credits: 3

Developed upon the premise that individuals teach as they would expect to be taught. Focuses on methods for teaching adults in formal as well as informal settings. The learning styles literature is reviewed and implications for instructional settings are analyzed. Participants also critique their teaching performance through videotaped sessions.

Prerequisite: graduate standing.

HIED5260 - Educational Issues Race, Class, and Gender

Credits: 3

Designed to help participants examine the current issues and debates in the literature of race, class, and gender from theoretical and practical perspectives. Related areas of ethnicity, national origin, sexual orientation, language, physical appearance, body size, and other constructs of difference will also be addressed.

Prerequisite: graduate standing.

HIED5600 - Higher Education Finance

Credits: 3

Provides an overview of the economics and finance of higher education in the United States with an emphasis on the analysis of financial policies and current issues at the institutional, state, and national levels.

Prerequisite: Admission to the program.

HIED5610 - Planning and Evaluation of Instructional Systems

Credits: 3

Participants investigate the concepts, issues, methods, and attitudes involved in the planning and evaluation of instructional systems. Topics covered include planning processes, theory and technique, promotion, evaluation, setting objectives, and trend analysis.

Prerequisite: graduate standing.

HIED5630 - Advanced Organizational Leadership

Credits: 3

Examines central issues in advanced organizational leadership to prepare practitioners for leadership roles in educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and an organizational case study.

Prerequisite: Admission to the program.

HIED5640 - Leadership Development

Credits: 3

Examines central issues in the internal dimension of leadership to prepare leaders in postsecondary educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and a biographical case study of a postsecondary educational leader.

Prerequisite: Admission to the program.

HIED5650 - Law of Higher Education

Credits: 3

Examine specific legal issues encountered by instructional leaders in higher education settings. Critically examines the basic rights and duties of institutional employees and students. It also explains when and how instructional leaders should refer matters to legal counsel.

Prerequisite: Admission to the program.

HIED5660 - Community College

Credits: 3

Concerns the philosophy, organization, program, and administration of the community college.

Prerequisite: graduate standing and consent of instructor.

HIED5670 - Community College Issues and Leadership

Credits: 3

Examine, analyze, the primary responsibility of instructional leaders at the community college, management of the curriculum. In particular, focus on the remedial/ developmental education programs, general education, the liberal arts transfer curriculum, technical education, and noncredit and contract training programs.

Prerequisite: Admission to the program.

HIED5680 - Issues in Higher Education

Credits: 3

Through examination of historical foundations and current trends, ADED 5680 delves into pressing issues in the academy, including but not limited to topics of tenure, governance, professional colleges, access and equity, curriculum and international needs.

Prerequisite: graduate standing.

History

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art: and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP Code [(none)< >FYS]

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP Code [CH<>H]

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP Code [V<>V]

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP Code [V<>V]

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP Code [V<>V]

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP Code [CS,G<>H]

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP Code [CS,G<>(none)]

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.

USP Code [(none)<>H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP Code [CS,G<>(none)]

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3

Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP Code [CH< >(none)]

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.
USP Code [CH,D<>H]

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed RELI 2252.
USP Code [CH,D<>H]

HIST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed INST 2280.
USP Code [(none)<>COM2]

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.
USP Code [CH,D<>(none)]

HIST2315 - History of Non-Western Religions

Credits: 3

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed RELI 2315.
USP Code [CH,G<>(none)]

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and

actions of its members.

USP Code [CH,G<>COM2]

HIST2360 - African-American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed AAST 2360.

USP Code [CH,D<>COM2]

HIST2370 - Chicano History: Origins to 1900

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2370/GEOG 2370.

USP Code [CS,D<>H]

HIST2380 - Latin American History 1500 to 2000

Credits: 3

Provides introduction to Latin American history, from colonial contacts to the present. Explores important themes and connections across the colonial and modern periods, such as race, national identity, foreign involvement, indigenous peoples' role in nation-states, religion, social movements, economic systems, and globalization.

USP Code [G<>H]

HIST2385 - Chicano History : 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2385.

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.

USP Code [D<>(none)]

HIST2390 - US West Between the World Wars

Credits: 3

Examines two pivotal decades (1918-1942) in the US West that encompasses prosperity, Depression, and reform, through the use of historical documents, art, film, literature, and music.

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

HIST2470 - Civilization of India

Credits: 3-4

Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

HIST2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed ECON 2500.

HIST2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed ANTH 2600.

USP Code [(none)<>H]

HIST2700 - Introduction to Museology

Credits: 3

Explores the historical, cultural, and contemporary roles of museums and preservation institutions in society. Introduces students to the museum professions, collection and exhibition installation strategies, and ethical problems of governance and collection. Field trips to regional collections are included.

Cross Listed ART 2700/AMST 2700/ANTH 2700.

USP Code [CH<>(none)]

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.

USP Code [D<>(none)]

Prerequisite: 6 hours of HIST or NAIS.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP Code [WB,L<> (none)]

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/POLS 3050.

Prerequisite: WB or COM2.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/PHIL 3160.

Prerequisite: WB or COM2.

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP Code [G<>(none)]

Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000 or RELI 2225/HIST 2225.

HIST3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500 - 1500 CE, concentrating on the Latin West. It examines the growth of Christian institutions and practices, the Church's role as sole governing entity, along with conflicts with secular governments as they developed in later centuries.

Cross Listed RELI 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

HIST3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: RELI 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

HIST3275 - World Christianities

Credits: 3

Examines the development of Christianity primarily in Africa, Asia and South America.

Cross Listed RELI 3275

USP Code [CH,G <> (none)]

Prerequisite: WB and CH

HIST3300 - Secret History of Science

Credits: 3

Explores developments in science from prehistory to the present. It focuses on the lesser-known men and women who contributed to science, as well as on seemingly superstitious beliefs that were nonetheless important to advances in knowledge.

Restricted Restricted to junior standing or higher.

Prerequisite: 6 hours in HIST or 6 hours of PN coursework, or a combination of both.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

HIST3500 - Colonial America

Credits: 3

This course covers the history of European colonization from roughly 1492 to 1763. Our geographic focus will be on the (future) United States, but will also learn how transatlantic forces influenced its people.

Prerequisite: 12 hours of HIST courses or permission of instructor.

HIST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia, and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed AAST 3670.

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/HIST 2360.

HIST3880 - Comparative History

Credits: 3

Explores comparative history from a variety of topics, such as colonialism, memory, nationalisms, frontiers, or cultural history. This course will introduce students to at least one of these themes from at least two regions, time periods, or groups of people to understand patterns and change in human societies through time.

Prerequisite: 6 hours of HIST.

HIST3900 - Historical Archaeology

Credits: 3

This course introduces students to the field of historical archaeology, the archaeological and archival study of literate societies. Students will be introduced to the history of the discipline, a survey of contemporary historical archaeological practice.

Cross Listed ANTH 3900

Former Course Number [none < > none]

Prerequisite: ANTH 1300

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000

Dual Listed HIST 5000

USP Code [D<>(none)]

Prerequisite: 9 hours of HIST or NAIS.

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP Code [CH,D< >(none)]

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP Code [WC< >COM3]

Prerequisite: advanced standing as a History major and HIST 3020.

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

HIST4060 - Independent Study

Credits: 1-3

Max Credit 6

Credit not to exceed 6 hours maximum, to be arranged in either European or American history. Primarily for juniors and seniors who can profit from independent work with minimal supervision.

Prerequisite: 12 semester hours in history; written permission of instructor required.

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

HIST4100 - Early Medieval Europe

Credits: 3

Studies development of European civilization from decline of Rome to 12th century.

Dual Listed HIST 5100.

Prerequisite: 9 hours of HIST.

HIST4110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 5110.

Prerequisite: 9 hours of HIST.

HIST4112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000 Europe began its rise to world prominence and cities contributed to that rise. Examines development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 5112.

Prerequisite: 9 hours of HIST.

HIST4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what some would call heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 5113.

Prerequisite: 9 hours of HIST or RELI.

HIST4120 - Europe During the Renaissance

Credits: 3

Intensely studies European history in 14th and 15th centuries.

Prerequisite: 9 hours of HIST.

HIST4130 - Europe During the Reformation

Credits: 3

Intensely studies European history in the 16th century.

Prerequisite: 9 hours of HIST.

HIST4140 - Europe During the Age of the Baroque

Credits: 3

Intensely studies European history in 17th century.

Prerequisite: 9 hours of HIST.

HIST4150 - Europe During the Age of the Enlightenment

Credits: 3

Intensely studies European history in 18th century.

Prerequisite: 9 hours of HIST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed RELI 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

HIST4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed RELI 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 5305.

USP Code [G<>(none)]

Prerequisite: 9 hours of HIST, INST, or POLS.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP Code [(none)<>H]

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 4380.

Dual Listed HIST 5380.

Prerequisite: 9 hours of HIST or INST.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

HIST4405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African and Asian people from pre-contact through the mid-19th century.

Dual Listed HIST 5405.

USP Code [D<>H]

Prerequisite: 9 hours of HIST.

HIST4406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 5406

USP Code [D<>H]

Prerequisite: 9 hours of HIST.

HIST4410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 5410.

USP Code [CS,G<>H]

Prerequisite: 9 hours of HIST.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or ENR.

HIST4415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 5415.

USP Code [CS, G<>H]

Prerequisite: 9 hours of HIST.

HIST4425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 5425.

Prerequisite: 9 hours of HIST.

HIST4450 - The Civil War and Reconstruction

Credits: 3

Studies crisis of the Union, 1861-1877. Examines experiences of both the North and South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 5450.

Prerequisite: 9 hours of HIST.

HIST4460 - Post-Civil War America: The Gilded Age

Credits: 3

Intensively covers economic, cultural and political developments which marked the U.S. in post-Civil War era, such as rise of industry, emergence of distinctive national culture and party struggles shaping America's Gilded Age.

Dual Listed HIST 5460.

Prerequisite: 9 hours of HIST.

HIST4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed NAIS 4462.

Dual Listed HIST 5462.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or NAIS.

HIST4463 - American Indian History 1783 to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied moving west.

Cross Listed NAIS 4463.

Dual Listed HIST 5463.

Prerequisite: 9 hours of HIST or NAIS.

HIST4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 4464.

Dual Listed HIST 5464.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or NAIS.

HIST4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed NAIS 4466.

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

HIST4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed NAIS 4468.

Prerequisite: 9 hours of HIST or NAIS.

HIST4470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U. S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between depression of the 1890s and that of the 1930s.

Dual Listed HIST 5470.

Prerequisite: 9 hours of HIST.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

HIST4480 - Growth of Modern America, 1929 to 1960

Credits: 3

Studies political and diplomatic developments in the U.S. in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasizes economic crisis, growth of government, reform traditions, anti-communism and civil rights.

Dual Listed HIST 5480.

Prerequisite: 9 hours of HIST.

HIST4485 - U.S. Latino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U.S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives' responses are stressed.

Cross Listed LTST 4485/INST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Cross Listed LTST 4492.

Dual Listed HIST 5492.

USP Code [CS,G<>(none)]

Prerequisite: 9 hours of HIST or INST.

HIST4494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 5494.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or INST.

HIST4495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 5495.

Former Course Number [4720]

Prerequisite: 9 hours of HIST or INST.

HIST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U.S., incorporation of

Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed LTST 4496.

Dual Listed HIST 5496.

Former Course Number [4800]

Prerequisite: 9 hours of HIST or INST.

HIST4505 - The Old South, 1820 to 1861

Credits: 3

Studies history of the South from emergence of southern identity to the Civil War. Emphasizes southern society and culture.

Dual Listed HIST 5505.

Former Course Number [4500]

Prerequisite: 9 hours of HIST.

HIST4510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 5510.

Former Course Number [4950]

Prerequisite: 9 hours of HIST.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

HIST4530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 5530.

Former Course Number [4630]

Prerequisite: 9 hours of HIST.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

HIST4540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 5540.

Former Course Number [4640]

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

HIST4560 - American Social History in the 20th Century

Credits: 3

Explores history of social mobility and conflict in 20th century. Emphasizes impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting and architecture.

Dual Listed HIST 5560.

Prerequisite: 9 hours of HIST.

HIST4582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed INST 4582.

Dual Listed HIST 5582.

Prerequisite: 9 hours of HIST or INST.

HIST4610 - Seminar Topics in the History of Wyoming I

Credits: 3

An intensive research and writing course dealing with topics in the period before statehood in 1890.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4620 - Seminar Topics in the History of Wyoming II

Credits: 3

Allows students to do intensive research and writing dealing with topics in Wyoming history from 1890 to present.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4965 - Senior Thesis

Credits: 3

Working closely with a faculty advisor, a history major will develop a research proposal that, after approval by the History department faculty, will lead to in-depth research and writing, producing a minimum 50-page thesis that demonstrates an excellent grasp of historical methods and a high degree of writing skill.

Prerequisite: 12 hours of HIST; senior class standing; HIST major.

HIST4990 - Topics in _____

Credits: 1-6

Max Credit (Max. 12)

Affords students opportunity to study in-depth various topics in history not offered in regular courses or independent study.

Former Course Number [4080]

Prerequisite: 9 hours of HIST.

HIST5000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Dual Listed HIST 4000.

Prerequisite: 6 hours of HIST or NAIS; graduate standing.

HIST5055 - Archival Research Methods

Credits: 3

Students master advanced research strategies with interdisciplinary applications. Focuses on primary document research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Prerequisite: graduate standing.

HIST5077 - Book History: Topics

Credits: 3

An in-depth, hands on study of books within their historical contexts. The topic varies each time, and focuses on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Prerequisite: graduate standing.

HIST5100 - Early Medieval Europe

Credits: 3

The study of the development of European civilization from the decline of Rome to the twelfth century.

Dual Listed HIST 4100.

Prerequisite: graduate standing.

HIST5110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 4100.

Prerequisite: graduate standing.

HIST5112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000, Europe began its rise to world prominence, and the birth of the cities contributed to that rise. This course examines the development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 4112.

Prerequisite: graduate standing.

HIST5113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what we would call heresy, but also encompasses such marginal groups as Jews and witches. This course examines development of orthodoxy and the persecution of religious diversity between the 11th and 16th centuries. It also studies the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 4113.

Prerequisite: graduate standing.

HIST5170 - Europe in the 19th Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 4170

Prerequisite: graduate standing.

HIST5180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 4180.

Prerequisite: graduate standing.

HIST5270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 4270

Prerequisite: graduate standing.

HIST5290 - History of the Soviet Union

Credits: 3

Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social, and cultural manifestations.

Dual Listed HIST 4290.

Prerequisite: graduate standing.

HIST5305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 4305.

Prerequisite: graduate standing.

HIST5310 - World War II in Europe

Credits: 3

Covers the origins, course, and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as we know it today.

Dual Listed HIST 4310.

Prerequisite: graduate standing.

HIST5315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 5315.

Dual Listed HIST 4315.

Prerequisite: graduate standing.

HIST5320 - Memory and National Identity in 20th Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining national identity in modern-day Europe.

Dual Listed HIST 4320

Prerequisite: graduate standing.

HIST5340 - The Social History of American Women

Credits: 3

Explores the everyday life experiences of American women from the seventeenth century to the present with a focus on the complex influence of gender, race, and class in shaping those experiences. The course then turns to an analysis of the ways in which woman's dissatisfaction with the position in society formed American feminism and lead to the formation or an organized women's movement.

Dual Listed HIST 4340.

Prerequisite: graduate standing.

HIST5380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 5380.

Dual Listed HIST 4380.

Prerequisite: 9 hours of HIST or INST.

HIST5381 - Seminar in Recent United States History

Credits: 3

Max Credit (Max. 12)

Prerequisite: graduate standing.

HIST5400 - Graduate Topics in History

Credits: 1-6

Max Credit (Max. 12)

Opportunity to study in-depth various topics in history not offered in regular graduate seminars or graduate reading courses.

Prerequisite: graduate standing.

HIST5405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from pre-contact to the mid-19th century.

Dual Listed HIST 4405

Prerequisite: graduate standing.

HIST5406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 4406.

Prerequisite: graduate standing.

HIST5410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 4410.

Prerequisite: graduate standing.

HIST5412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Dual Listed HIST 4412

USP Code [(none)<>H]

Prerequisite: graduate standing.

HIST5415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 4415.

Prerequisite: graduate standing.

HIST5425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 4425.

Prerequisite: graduate standing.

HIST5450 - The Civil War and Reconstruction

Credits: 3

A study of the crisis of the Union, 1861-1877. Examination of the experiences of both the North and the South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 4450.

Prerequisite: graduate standing.

HIST5460 - Post-Civil War America: The Gilded Age

Credits: 3

An intensive study in the economic, cultural, and political developments which marked the U. S. in post-Civil War era, the rise of industry, the emergence of a distinctive national culture and the party struggles that shaped America's Gilded Age.

Dual Listed HIST 4460.

Prerequisite: graduate standing.

HIST5462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American revolution meant to the continent's Native peoples.

Cross Listed NAIS 5462.

Dual Listed HIST 4462.

Prerequisite: graduate standing.

HIST5463 - American Indian History to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied Indians moving west.

Cross Listed NAIS 5463.

Dual Listed HIST 4463.

Prerequisite: graduate standing.

HIST5464 - American Indians in the 20th Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 5464.

Dual Listed HIST 4464.

Prerequisite: graduate standing.

HIST5470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U.S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between the depression of the 1890s and that of the 1930s.

Dual Listed HIST 4470.

Prerequisite: graduate standing.

HIST5475 - American Environmental History

Credits: 3

History of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 4475.

Prerequisite: graduate standing.

HIST5480 - Growth of Modern America, 1929 to 1960

Credits: 3

A political and diplomatic overview of the United States in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasis on economic crisis, growth of government, reform traditions, anti-communism, and civil rights.

Dual Listed HIST 4480.

Prerequisite: graduate standing.

HIST5490 - Modern America, 1960 to Present

Credits: 3

A political and diplomatic overview of the United States since 1960 with emphasis on impact of Cold War social and political tensions at home, civil rights, and government policies.

Dual Listed HIST 4490.

Prerequisite: graduate standing

HIST5492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Dual Listed HIST 4492.

Prerequisite: graduate standing.

HIST5494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 4494.

Prerequisite: graduate standing.

HIST5495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 4495.

Prerequisite: graduate standing.

HIST5496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself, into a modern nation state. Includes diplomatic relations with the U.S., incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Dual Listed HIST 4496.

Prerequisite: graduate standing.

HIST5500 - Readings in Women's Studies

Credits: 3

An interdisciplinary course at the graduate level focusing on feminist criticism and theory, which draws on current debates in feminist analysis from the general areas of history, literature, and social science, to inform students of reformulations of research and unresolved issues.

Dual Listed GWST 5500 .

Prerequisite: graduate standing.

HIST5505 - The Old South, 1820 to 1861

Credits: 3

The history of the South from the emergence of southern identity to the Civil War, with emphasis on southern society and culture.

Dual Listed HIST 4505.

Prerequisite: graduate standing.

HIST5510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 4510.

Prerequisite: graduate standing.

HIST5515 - American Legal History

Credits: 3

An intensive study in the history of American law, the judicial system, the legal profession, and legal administration from colonial times to the present.

Dual Listed HIST 4515.

Prerequisite: graduate standing.

HIST5530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 4530.

Prerequisite: graduate standing.

HIST5535 - History of Oil

Credits: 3

An intensive study in the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history will be an important component of the course.

Dual Listed HIST 4535.

Prerequisite: graduate standing.

HIST5540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 4540.

Prerequisite: graduate standing.

HIST5555 - American Encounters

Credits: 3

Examines the centrality of cross-cultural interchange in American history by focusing on a series of critical encounters between American, European, African, and Asian people from the 16th century to the present.

Prerequisite: graduate standing.

HIST5560 - American Social History in the 20th Century

Credits: 3

History of social mobility and conflict in the 20th century. Special emphasis on impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting, and architecture.

Dual Listed HIST 4560.

Prerequisite: graduate standing.

HIST5582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic racial and gender issues.

Cross Listed INST 5582.

Dual Listed HIST 4582.

Prerequisite: graduate standing.

HIST5585 - Conference on U.S. History

Credits: 1-3

Max Credit (Max. 6)

A reading and writing course designed to allow advanced students to investigate shifting ideas about important topics in 20th century American history. Primary focus varies from semester to semester, but will be designated in the class schedule.

Prerequisite: graduate standing.

HIST5600 - Graduate Readings

Credits: 1-6

Max Credit (Max. 12)

Fulfills two purposes in our graduate program in history. It allows students to do independent directed reading in preparation for their graduate examination in history and provides students with a flexible alternative to their programs to meet and complete requirements.

Prerequisite: graduate standing.

HIST5605 - Conference on Wyoming and the West

Credits: 1-4

Max Credit (Max. 9)

Prerequisite: graduate standing.

HIST5620 - Conference on Middle-Period and United States History

Credits: 1-4

Max Credit (Max. 9)

Prerequisite: graduate standing.

HIST5630 - Seminar on Western American History

Credits: 3

Prerequisite: graduate standing.

HIST5645 - Seminar on American Indian History

Credits: 3

Research seminar on American Indian history. The focus of the seminar may vary, but emphasis will usually be given to American Indians of the western United States in the nineteenth and twentieth centuries.

Prerequisite: graduate standing.

HIST5660 - Conference on Early Modern Europe

Credits: 1-4

Max Credit (Max. 9)

The student, in consultation with the instructor, chooses a topic on which they read extensively. The instructor provides bibliographical guidance. Normally the student discusses the reading at length with the instructor once a week. Written analysis of the reading may also be required. The course may be offered to a group of students who need extensive reading to go with the research experience they are receiving in seminars.

Prerequisite: graduate standing.

HIST5670 - Seminar on Early American History

Credits: 3

Prerequisite: graduate standing.

HIST5675 - Seminar on Middle-Period U.S. History

Credits: 3

Prerequisite: graduate standing.

HIST5685 - Conference on European 19th and 20th Century History

Credits: 1-4

Available for a maximum of 9 hours.

Prerequisite: graduate standing.

HIST5810 - Seminar on Latin American History

Credits: 1-4

Max Credit (Max. 12)

Students will select a topic of interest within the general field of Latin America and read the published works which deal with the subject. Instructor will direct this reading through the preparation of bibliography. Students then prepare an in-depth research paper based on primary source documents. Research paper will treat an aspect of the subject under investigation that has not been dealt with in published materials.

Prerequisite: graduate standing.

HIST5880 - History Theory

Credits: 3

Intensive reading and writing course, designed to introduce graduate students to influential recent historical works, and to the faculty of the department and their research areas. Students will explore historical theories and the historiography of particular topics.

Prerequisite: graduate standing.

HIST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

HIST5910 - Seminar in History Profession

Credits: 3

This seminar introduces graduate students to the profession of history through targeted readings, projects, guest speakers, and workshops. Topics covered include: archival research and source analysis, schools of thought and methodologies used by professional historians, career options in history, college teaching and course design, grant applications, and professional networking.

Prerequisite: graduate standing in history.

HIST5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

HIST5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

HIST5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

HIST5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

HIST5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Health Education

HLED1006 - Personal Health

Credits: 3
Introduces multiple concepts of personal health (e. g. , physical activity, diet, stress, social pressure, public health, human behavior, disease prevention, healthcare access, and health-oriented citizenship) in relation to improving individual health and understanding the health of a society and cultural differences in human health and health behavior.

USP Code [(none)<>H]

HLED1221 - Standard First Aid and Personal Safety

Credits: 1-2

Studies accident prevention, examination procedures and first aid care for victims of accidents or sudden illness before medical assistance is available. Presents new Red Cross content and CPR. CPR is incorporated in the sections offered for 2 credit hours.

HLED2006 - Health for Elementary Educators

Credits: 1

Acquaints students to the Wyoming Health Standards and Benchmarks, techniques/instruments for assessing they Wyoming Health Standards and Benchmarks, sample health curriculum models/approaches for elementary school K-6, lesson plans in health education for elementary learners, and health integration in language arts curricula.

Prerequisite: Declared major in KHP, PHET, or Elementary Education.

HLED3020 - Community and Public Health

Credits: 3

Public health aim to create the conditions where people can be healthy. This course introduces goals and applications of community and public health work in the US, illustrated with case studies from the most urgent health issues facing our nation.

Former Course Number [4050]

Prerequisite: HLED 1006, completion of a COM2 course, and minimum 2.750 GPA.

HLED4005 - Global Health in Modern Society

Credits: 3

Evidence-based approach to understand the interconnectivity of global health in modern society. Examination of health disparities, worldwide, to understand the impact of politics, culture, and economics on population health. Rural aspects of public health both domestically and internationally included. Students will discuss challenges and approaches to improving global public health.

Prerequisite: sophomore standing and minimum 2.750 GPA.

HLED4015 - Internship Experience in Health

Credits: 1-12

Max Credit (Max. 12)

Variable-credit (1-12) and S/U course required of Kinesiology and Health undergraduate majors to provide experiential learning in kinesiology and health in a real world setting. Intended to integrate theory and technique with practical application to expose students to areas of professional/career interest and assist with building professional careers. Must have CPR/AED/1st Aid Certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed KIN 4015.

Prerequisite: Grade of C or better in KIN 3010; 2.750 GPA; completion of a minimum of 18 credits in KIN/HLED upper division coursework.

HLED4016 - Research Experience in Kinesiology and Health

Credits: 3-6

Max Credit (Max. 6)

Offered to students who wish to gain a research experience in Kinesiology and Health. Meant for students who are interested in pursuing an advanced degree. Students may choose to complete KIN 4016/HLED 4016 instead of KIN 4015/HLED 4015. Must have CPR/AED/1st Aid certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed KIN 4016.

Prerequisite: minimum sophomore standing; declared KHP major; permission of instructor; and minimum 2.750 GPA.

HLED4020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 5020.

Prerequisite: Completed COM 2 course and minimum 2.750 cumulative UW GPA.

HLED4021 - Creating Conditions for Community Health

Credits: 3

In this course we will analyze and discuss how local, national and international environments impact individual and community health and how to improve health through changes in policy, economic, social, cultural and physical environments. The focus is primarily in the U. S. , though students can choose to focus assignments in other contexts.

Dual Listed HLED 5021.

Prerequisite: COM2 and a UW GPA of 2.750 or better.

HLED4025 - Teaching Sensitive Issues In Human Sexuality

Credits: 3

Prepares educators and other helping professionals whose work involves promoting healthy sexuality in children, young people, and adults. It also provides detailed investigation into important aspects of teaching sensitive issues related to human sexuality. Students practice, critique, develop, and evaluate sexuality education processes and resources.

Dual Listed HLED 5025.

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

HLED4030 - Teaching About Alcohol and Substance Abuse

Credits: 3

Introduces students to the issues of societal and personal attitudes towards alcohol and substance use, misuse and abuse. Prepares an educator to teach about alcohol and substance abuse in the classroom and out of the school setting.

Prerequisite: Sophomore standing; minimum 2.750 GPA; or permission of instructor.

HLED4074 - Field Studies in (TOPIC)

Credits: 1-6

Offered only through distance education. Flexible course to accommodate students completing discipline specific and/or interdisciplinary program field studies experiences, e. g. , athletic performance, health/fitness application, minor in Outdoor Leadership, National Outdoor Leadership School programs.

Cross Listed KIN 4074.

HLED4097 - Individual Problems

Credits: 1-3

Max Credit (Max 6)

Provides flexible credit for students who wish to undertake intensive study and/or experiential activities in health education.

Prerequisite: Declared major in KHP or permission of instructor.

HLED4110 - Teaching Health in Schools K-12

Credits: 3

Presented appropriate knowledge and skills to become health literate. Explore ways to teach health skills and knowledge and use assessment strategies for health education.

When Offered (Offered fall semester)

Prerequisite: Grade C or better in KIN 3015 or certified K-12 teacher.

HLED4120 - Assessment in Health

Credits: 3

Provide students with an understanding of components of a balanced assessment system in school health education. Students review the basics of standards-based health education and explore innovations in assessment that provide teachers and students with a more complete and authentic picture of student learning.

Prerequisite: Minimum 2.500 GPA; concurrent enrollment in KIN 4099 or certified K-12 teacher.

HLED4130 - Management of Coordinated School Health Programs

Credits: 3

Reviews the coordinated school health program (CSHP) model and identifies research that supports the eight components of the model. Prepares students to advocate for CSHP and to develop the school infrastructure necessary to carry out such a program. Also prepares individuals to work with school from job settings outside the school.

Dual Listed HLED 5130.

When Offered (Offered fall semester)

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

HLED4900 - Topics in:

Credits: 1-3

Max Credit (Max. 9)

Integrates kinesiology and/or health concepts necessary for graduates in multiple professions. Provides experiential learning and training for success in allied healthcare fields. Students may develop and present projects that relate their education and training to a hypothetical work-place environment.

Prerequisite: KIN 3021.

HLED5016 - Analysis and Supervision of Teaching Physical Education

Credits: 3

Students are introduced to various evaluative and supervisory techniques which are designed to improve teaching effectiveness and student learning. Emphasis is placed on utilizing various strategies of evaluation in instructional settings.

Prerequisite: graduate standing in KIN or permission of instructor.

HLED5020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 4020.

Prerequisite: graduate standing or permission of the instructor.

HLED5021 - Creating Conditions for Community Health

Credits: 3

In this course we will analyze and discuss how local, national and international environments impact individual and community health and how to improve health through changes in policy, economic, social, cultural and physical environments. The focus is primarily in the U. S. , though students can choose to focus assignments in other contexts.

Dual Listed HLED 4021.

Prerequisite: graduate standing.

HLED5022 - Unlocking the Potential of Public Health

Credits: 3

Introduces core concepts in community and public health. Using practical exercises and problem based learning, students will investigate how social structures shape our health and how to alter them to improve community.

Prerequisite: Graduate standing or permission of the instructor.

HLED5023 - Using Epidemiology to Build Health

Credits: 3

Focusing on epidemiological questions generated by the student, this course introduces concepts essential to understanding epidemiology, the foundational science of public health. It is focused on using existing epidemiologic data to inform your work.

Prerequisite: Graduate standing or permission from the instructor.

HLED5025 - Teaching Sensitive Issues in Human Sexuality

Credits: 3

Prepares educators and helping professionals whose work involves promoting healthy sexuality in children, young people and adults. Also provides detailed investigation into important aspects of teaching sensitive issues related to human sexuality. Students practice, critique, develop, and evaluate sexuality education processes and resources.

Dual Listed HLED 4025.

Prerequisite: graduate standing or permission of instructor.

HLED5050 - Community and Public Health Promotion

Credits: 3

Identifying, understanding, and working with unique needs and assets of communities is emphasized, including ethnic, religious, and social structures. Planning and implementation of community health programs is stressed. Open but not limited to students interested in the following areas: healthcare, health promotion, public health, the schools.

Prerequisite: graduate standing or permission of instructor.

HLED5085 - Research Methods in Health Education

Credits: 3

Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Cross Listed KIN 5085.

Prerequisite: graduate standing in KIN or permission of instructor.

HLED5097 - Individual Problems

Credits: 1-3
Max Credit (Max. 6)

Provides flexible credit for students who wish to undertake intensive study of a special problem identified in a regular class.

Cross Listed KIN 5097.

Prerequisite: graduate standing in KIN or permission of instructor.

HLED5130 - Management of Coordinated School Health Programs

Credits: 3

Reviews the coordinated program (CSHP) model and identifies research that supports the eight components of the model. Prepares students to advocate for CSHP and to develop the school infrastructure necessary to carry out such a program. Also prepares individuals to work with school from job settings outside the school.

Dual Listed HLED 4130.

Prerequisite: graduate standing or permission of instructor.

HLED5586 - Seminar in Health Education

Credits: 1-6
Max Credit (Max. 8)

Graduate students in kinesiology and health work intensively on current issues and problems, and may pursue specific areas of emphasis. Although a total of 8 hours is permitted under this number, only 6 hours are allowed by the Division of Kinesiology and Health toward a student's graduate program.

Cross Listed KIN 5586.

Prerequisite: graduate standing in KIN or permission of instructor.

HLED5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing in KIN or permission of instructor.

HLED5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

HLED5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: graduate standing in KIN or permission of instructor.

Health Sciences

HLSC1090 - SPARX: Topics in Interdisciplinary Health Care

Credits: 1
Max Credit (Max. 3)

Each semester a different topic or disease state is highlighted. Using film, lectures, and selected readings, students are introduced to interdisciplinary collaboration between health care and mental health professionals. Benefits to patient care and barriers in making interdisciplinary connections are addressed.

HLSC1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

HLSC4100 - Global Public Health

Credits: 3
Introduces students to the global context of public health, to principles underlying global health, and to dimensions of public health particular to international settings. It examines major themes and policies in global health and analyzes health problems and varying responses to them in different parts of the world.

Cross Listed INST 4100.
Dual Listed HLSC 5100.
USP Code [G<>(none)]
Prerequisite: upper division student status.

HLSC4985 - Health Sciences Internship

Credits: 1-6
Max Credit (Max. 6)

Gives students an opportunity to gain practical experience in a health care field of their choice. The intense relationship with a mentor allows the student to become socialized into a health care field, gain practice skills, and relate to other health care professionals in an interdisciplinary way.

When Offered (Offered fall, spring and summer)

Prerequisite: completion of all other degree requirements.

HLSC4990 - Current Topics in the Health Sciences

Credits: 1-6

Max Credit (Max. 12)

Provides upper division/graduate students with the opportunity for critical analysis and in-depth examination of various current topics in health science fields.

Dual Listed HLSC 5990.

Prerequisite: Upper-division undergraduate status, or permission from instructor.

HLSC5990 - Topics In Health Sciences

Credits: 1-6

Max Credit (Max. 12)

Provides upper division/graduate students with the opportunity for critical analysis and in-depth examination of various current topics in health sciences fields.

Prerequisite: graduate standing,

Honors College

HP1000 - Intellectual Communities

Credits: 1

Queries the nature, functions, and benefits of intellectual communities from the ancient world to present.

USP Code [I<>(none)]

Prerequisite: Concurrent enrollment in HP 1020, HP 1151 or HP 1161.

HP1020 - Honors Colloquium I

Credits: 3

Composition course. Provides innovative writing instruction to honors students while introducing works and history of Western culture. Particularly emphasizes analytical reading and writing.

When Offered (Offered fall semester)

USP Code [WA,L<>COM1]

Prerequisite: participation in UW Honors College.

HP1101 - First-Year Seminar

1201

Credits: 3

USP Code [(none)<>FYS]

HP1151 - Freshman Honors Colloquium I

Credits: 3

Studies significant works in the history of Western civilization to the Renaissance, both in their historical context and in relation to one another. For entering freshmen who have already fulfilled the WA or COM1 requirement.

When Offered (Offered fall semester)

USP Code [CH,L<>H]

Former Course Number [1150]

Prerequisite: participation in the UW Honors College.

HP1200 - People and Policy

Credits: 3

This course focuses on reading American and Wyoming political documents in an historical and interdisciplinary context, and extends the discussion into the present day, situating what we know about America as a political nation, Wyoming as a political state, and ourselves as people and citizens within both our founding political documents and the history of interpretations and extensions of those documents.

USP Code [V<>V]

Prerequisite: participation in UW Honors College.

HP2020 - Honors Colloquium II

Credits: 3

Continues study of significant works in Western and Eastern literary, scientific and philosophical traditions begun in Colloquium I. Assignments focus on using critical discourse, historical research, and textual analysis to produce effective written compositions and oral presentations.

USP Code [WB,O<>COM2]

Prerequisite: WA. COM I

HP2151 - Honors Non-Western Perspectives

Credits: 3

Max Credit (Max. 6)

Explores issues central to human experience from perspectives of non-western peoples. Topics vary from year to year. Required of UW Honors College students.

Former Course Number [2150]

Prerequisite: sophomore standing and participation in UW Honors College.

HP2152 - Honors Non-Western Perspectives

1202

Credits: 3

Max Credit (Max. 6)

Explores issues central to human experience from perspectives of non-western peoples. Topics vary from year to year. Required of UW Honors College students.

Former Course Number [2150]

Prerequisite: sophomore standing and participation in UW Honors College.

HP2153 - Honors Non-Western Perspectives

Credits: 3

Max Credit (Max. 6)

Explores issues central to human experience from perspectives of non-western peoples. Topics vary from year to year. Required of UW Honors College students.

Former Course Number [2150]

Prerequisite: sophomore standing and participation in UW Honors College.

HP3151 - Modes of Understanding

Credits: 3

Max Credit (Max. 6)

Introduces study of nature and grounds of knowledge, its limits and validity. Examines epistemological basis of selected areas of academic thought. Topics vary from year to year. Required of UW Honors Program students.

Former Course Number [3150]

Prerequisite: junior standing and participation in UW Honors College.

HP3152 - Modes of Understanding

Credits: 3

Max Credit (Max. 6)

Introduces study of nature and grounds of knowledge, its limits and validity. Examines epistemological basis of selected areas of academic thought. Topics vary from year to year. Required of UW Honors Program students.

Former Course Number [3150]

Prerequisite: junior standing and participation in UW Honors College.

HP3153 - Modes of Understanding

Credits: 3

Max Credit (Max. 6)

Introduces study of nature and grounds of knowledge, its limits and validity. Examines epistemological basis of selected areas of

academic thought. Topics vary from year to year. Required of UW Honors Program students.

Former Course Number [3150]

Prerequisite: junior standing and participation in UW Honors College.

HP4151 - Senior Honor Seminar

Credits: 3

Max Credit (Max. 6)

Asks students to confront a complex social issue, examine it from several perspectives and take a stance on some aspect of the issue. Topics vary from year to year. Required of UW Honors students.

Former Course Number [4150]

Prerequisite: senior standing and participation in UW Honors College.

HP4152 - Senior Honor Seminar

Credits: 3

Max Credit (Max. 6)

Asks students to confront a complex social issue, examine it from several perspectives and take a stance on some aspect of the issue. Topics vary from year to year. Required of UW Honors students.

Former Course Number [4150]

Prerequisite: senior standing and participation in UW Honors College.

HP4153 - Senior Honor Seminar

Credits: 3

Max Credit (Max. 6)

Asks students to confront a complex social issue, examine it from several perspectives and take a stance on some aspect of the issue. Topics vary from year to year. Required of UW Honors students.

Former Course Number [4150]

Prerequisite: senior standing and participation in UW Honors College.

HP4154 - Senior Honors Seminar

Credits: 3

Asks students to confront a complex social issue, examine it from several perspectives and take a stance on some aspect of the issue. Topics vary from year to year. Required of UW Honors Program students.

Prerequisite: senior standing and participation in the UW Honors Program.

HP4975 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Supervised study and investigation in topics related to students' research.

USP Code [WC<>(none)]

HP4976 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Supervised study and investigation in topics related to student's research.

HP4990 - Topics: __

Credits: 1-3

Max Credit (Max. 6)

Accommodates a senior seminar series or a course offering by visiting faculty whose subject matter is not included in other course offerings.

When Offered (Offered based on sufficient demand and resources)

Hospitality

HOSP2000 - Foundations of Customer Service & Hospitality

Credits: 3

This course examines critical elements of excellent customer service in the hospitality industry.

HOSP3000 - Managing Profitability in Hospitality

Credits: 3

This course examines the complexities of profitability in the hospitality industry, driven by issues of pricing and cost management. Areas explored can include restaurants, hotels, and other hospitality ventures.

Prerequisite: ACCT 2010.

HOSP4800 - Hospitality Operations Management

Credits: 3

This course provides a broad-reaching, applications-based understanding of hospitality operations and management. It provides a

managerial perspective on the operations of each component of hospitality management and operations, including the financial aspect.

HOSP4900 - Problems in Hospitality

This course provides students the opportunity to study, on an individual basis, any aspect of hospitality operations not included in other structured hospitality courses.

Prerequisite: Junior class standing, consent of instructor.

HOSP4910 - Special Topics in Hospitality

This course provides students the opportunity to study a contemporary problem or topic in a hospitality-related area.

Prerequisite: Junior class standing.

Human Medicine

HM6506 - Clinical Preceptorship

Credits: 1

Students spend one morning or afternoon per week for approximately 10 weeks in a clinical setting. Students observe the practice of the physician and engage in one on one feedback sessions with the physician. The goal of the experience is to become comfortable in the clinical setting, observe clinical techniques, observe the patient-doctor interactions, and observe the healthcare team. Students should have an opportunity to discuss professional and personal aspects of a particular specialty practice including the business side of the practice.

Prerequisite: enrollment in or completion of HM 6513, HM 6522, or HM 6535.

HM6510 - Microscopic Anatomy: Histology

Credits: 4

Lecture/laboratory in microscopic anatomy designed to provide principles/concepts of histology, define morphological characteristics of cells, tissues, organs of human body and relate this information to functional processes studied in concurrent and subsequent courses.

Prerequisite: admission to the WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6511 - Anatomy and Embryology

Credits: 6

Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of cadaver and examination of normal living body. Concentrates on exploration of the body cavities and viscera they contain.

Prerequisite: admission to the WWAMI program or consent of instructor and approval of WWAMI coordinator or the dean of the College of Health Sciences.

HM6512 - Mechanisms in Cell Physiology

Credits: 4

Physiology of cell membrane, ionic and electrical gradients; active transport, excitability, action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics/contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions.

Prerequisite: admission to the WWAMI program or consent of instructor and approval of WWAMI coordinator or the dean of the College of Health Sciences.

HM6513 - Introduction to Clinical Medicine

Credits: 1

Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communication with patients. The patient profile is obtained. Attention to developing comfort in the physician role.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6514 - Biochemistry 1A

Credits: 3

First portion of a coordinated course covering classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual are stressed and related to disturbances in disease states.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or the dean of the College of Health Sciences.

HM6516 - Systems of Human Behavior

Credits: 3

Sensitizes students to the impact of such factors as emotional and physical development, cultural backgrounds, social roles, families, sexual identities and belief systems upon their effectiveness as physicians. Teaches skills in analyzing behavior, defining behavioral objectives and designing precise treatment strategies to attain these objectives.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or the dean of the College of Health Sciences.

HM6521 - Microbiology and Infectious Disease 1A

Credits: 4

Pathogenesis and immunity of infectious diseases, natural barriers. Microbiology, epidemiology, clinical manifestations and control of representative bacterial, fungal, parasitic and viral infectious diseases. Chemotherapeutics and principles of chemotherapy. Sterilization, principles of asepsis, nosocomial and iatrogenic infections and their prevention.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or the dean of the College of Health Sciences.

HM6522 - Introduction to Clinical Medicine

Credits: 2

Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6523 - Introduction to Immunology

Credits: 2

Basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte functioning, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex; and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6524 - Biochemistry 1B

Credits: 2

Second portion of a coordinated course covering classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual are stressed and related to disturbances in disease states.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6531 - Anatomy of Head and Neck

Credits: 4

Gross anatomy (including skull, pharynx and larynx), audition and balance, physiology and clinical evaluation, maxillofacial disorders, diseases of nasal passages, nasopharynx and oropharynx, accessory sinuses. Physical examination.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6532 - Nervous System

Credits: 5

Integrated approach to normal structure and function of the nervous system, including the eye. Neuropathological examples, as well as clinical manifestations of neurological disease are presented.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6534 - Microbiology and Infectious Disease 1B

Credits: 2

Pathogenesis and immunity of infectious diseases, natural barriers. Microbiology, epidemiology, clinical manifestations and control of representative bacterial, fungal, parasitic and viral infectious diseases. Chemotherapeutics and principles of chemotherapy. Sterilization, principles of sepsis, nosocomial and iatrogenic infections and their prevention.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6535 - Introduction to Clinical Medicine

Credits: 3

Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small group tutorial, where students in supervised setting practice the physical examination on one another. Further practice in the performance and recording of the patient profile and medical history.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6553 - Musculoskeletal System

Credits: 5

Gross, surface, applied and X-Ray anatomy of system including entire spine but excluding head and neck. Histology of bone, cartilage, tendonmyotendinal junction and joints. Musculoskeletal trauma and healing. Pathology and clinical manifestations of other degenerative, inflammatory, metabolic, nutritional and congenital disorders. Physical examinations.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or Dean of the College of Health Sciences.

HM6590 - Medical Information for Decision Making

Credits: 1

Evidence Based Medicine (EBM) is now the predominant model by which medicine is practiced. The goal is to forge critical thinking skills and to teach analysis of the medical literature as a tool.

Prerequisite: admission to WWAMI program or consent of instructor and approval of WWAMI coordinator or dean of the College of Health Sciences.

HM6602 - Introductory Primary and Continuity Care Clerkship

Credits: 2

Introduces medical students to continuity of care by working with practicing physicians. The course demonstrates how to work with an individual to help them achieve optimal health, and includes topics in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health and pain management.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6603 - Clinical Studies

Credits: 2

Instruction in communication skills, interviewing techniques, physical examination, documentation and clinical reasoning. The course will include hospital based patient encounters and developing comfort and introduction to the physical role.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6610 - Molecular and Cellular Basis of Disease

Credits: 8

Introduces cell physiology and cell biology, function, genetics, and genetic diseases, genes. Topics include membrane physiology; sensory receptors; muscle energetics and contractibility; autonomic nervous system; tissue response to disease; pharmacodynamics and pharmacokinetics; genetic disorders; pharmacogenetics. Incorporates relevant fundamental principles in anatomy, pathology, and pharmacology.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6615 - Ecology of Health and Medicine Foundations I

Credits: 1

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

HM6620 - Invaders and Defenders

Credits: 7

Systems addressed include the immune system, microbial biology, infectious diseases, inflammation and repair, and skin and connective tissue. Topics discussed include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, the basis of immunologic diagnostics. Additionally, this course will include relevant fundamental scientific principles in anatomy, pathology, and pharmacology.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6625 - Ecology of Health and Medicine Foundations II

Credits: 1

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6630 - Circulatory System

Credits: 11

Provides an interdisciplinary approach to cardiovascular, respiratory, and renal-urinary medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Topics include cardiac electrophysiology and cardiac muscle mechanics, myocardial infarction and cardiac repair, thoracic and pulmonary anatomy, ventilatory mechanics, gas exchange, obstructive, restrictive, and pulmonary-vascular diseases, renal function, and common kidney diseases.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6635 - Ecology of Health and Medicine Foundations III

Credits: 1

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6640 - Blood and Cancer

Credits: 3

Introduces students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems, with an emphasis on pathophysiology. Additionally, this course will include relevant fundamental scientific principles in anatomy, pathology, and pharmacology.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6645 - Ecology of Health and Medicine Foundations IV

Credits: 1

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

Restricted Restricted to WWAMI medical students only.

HM6650 - Energetic and Homeostasis

Credits: 7

Integrates discussions of metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology and endocrinology, including physiology and pathology of digestion and hepatic function, principles and practice of clinical nutrition, endocrine metabolism, and clinically important endocrine pathophysiology. Relevant anatomy, pathology and pharmacology of the endocrine and gastrointestinal systems will be covered.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6700 - Research Methods

Credits: 2

The course will describe various types of medical studies along with the advantages and limitations of each. Students will explore statistical tools related to diagnostic testing, and treatment efficacy.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6800 - Mind, Brain, Behavior

Credits: 9

Explains the foundational principles of the organization and function of the head, neck, and central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Covers current therapeutic approaches to disease including pharmacological, behavioral, surgical, and other therapies.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6900 - Life Cycles and Reproduction

Credits: 5

Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

Information Literacy

LBRY3010 - Research from a Distance

Credits: 1

Students locate, evaluate, and synthesize free and fee-based information resources used in academic and work environments, with a special focus on accessing information remotely. Course assignments are customized to student's academic major and career goals. Students discuss ethical and legal issues surrounding information use.

USP Code [L<>(none)]

Prerequisite: ENGL 1010 or equivalent, junior standing.

LBRY3020 - Research as Social Capital

Credits: 3

Prepares students to be critical thinkers and interdisciplinary researchers. Skills and habits of mind taught will enable students to locate, interact with, and present information in a service-learning framework and around the class theme of social capital, preparing them for university-level research and life after graduation.

USP Code [L<>COM2]

Prerequisite: Successful completion of a COM1 course or equivalent.

LBRY5600 - Research Data Management

Credits: 3

A general approach to research data management for graduate students and researchers. Topics include: the case for data management, data management planning, meeting grant requirements, formatting and organizing, storing and transferring, legal and ethical issues, strategies for research teams, sharing data, and publishing, citing, and rights to research data.

Cross Listed ES 5600/GRAD 5600.

Prerequisite: graduate standing.

Information Management

IMGT1400 - Introduction to Business Analytics

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

IMGT3400 - Database Management Systems

Credits: 3

Concerned with the fundamentals of modern database information systems. Specific topics include database systems design, entity-relationship models, relational, hierarchical, and network database models, query languages, and data warehousing.

Prerequisite: IMGT 1400.

IMGT4020 - Information Security

Credits: 3

Investigation, prevention and control surrounding the protection of business related data, information and technology resources. Includes the use of industry supported frameworks aimed at the evaluation of threats; design of information security architectures; implementation processes; reporting and monitoring, along with ongoing maintenance, intrusion detection, security log analysis, and contingency planning.

Cross Listed ACCT 4020 .

Prerequisite: IMGT 3400 or ACCT 3610.

IMGT4050 - Business Analytics

Credits: 3

This class prepares students to understand, manage, and visualize data. Students will learn how to apply the appropriate analytic tools, and communicate their findings and their relevance. Topics covered include data wrangling, descriptive analytics, predictive analytics, and prescriptive analytics.

Prerequisite: IMGT 1400 , STAT 2050 or equivalent.

IMGT4455 - Systems Analysis and Design

Credits: 3

Concerned with the analysis, management, and conceptual design of information systems. Specific topics include systems planning, requirements analysis, business process modeling and redesign, flexibility analysis, alternative analysis, and architectural selection and design focused on supporting an organization's business requirements through various system design methodologies.

Cross Listed MGT 4455.

Former Course Number [3450]

Prerequisite: IMGT 1400 and Advanced Business Standing.

IMGT4500 - Business Analytics

Credits: 3

This class prepares students to understand, manage, and visualize data. Students will learn how to apply the appropriate analytic tools and communicate the findings and their relevance. Topics covered include data wrangling, descriptive analytics, predictive analytics, and prescriptive analytics.

Prerequisite: IMGT 1400, STAT 2050 or equivalent.

IMGT4990 - Contemporary Topics in Information Management

Credits: 1-3

Max Credit (Max. 6)

Concerned with contemporary topics in information management and serves as elective credits for a minor in information management. A variety of subjects may be considered for this course including corporate information systems, object oriented technology, management of information technology, decision support systems, and data communication and network.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: IMGT 3400 or concurrent enrollment.

International Business

INBU1040 - Introduction to International Business

Credits: 3

A broad survey of the field of international business which introduces basic concepts of international business activity and theory and reviews major foreign environmental forces--financial, economic and socioeconomic, physical, sociocultural, political, legal, labor, competitive and distributive-

Cross Listed INST 1040.

Former Course Number [BUSN 2000]

INBU3110 - Global Business Ethics

Credits: 3

This course will provide students with fundamental grounding in business ethics and corporate social responsibility, including recent developments related to universal principles for ethical business practice. Students will gain tools for ethical decision making in the global context to maintain sustainable businesses for the 21st century.

Prerequisite: sophomore class standing.

INBU4570 - Global Business Issues

Credits: 1-6

Max Credit (Max. 6)

Designed to give students a broad overview of current issues in international business. Includes classroom instruction and may include travel to a foreign country and visits to major foreign firms. A written assignment is required.

Dual Listed INBU 5570.

Former Course Number [BUSN 4540]

Prerequisite: consent of instructor.

INBU4900 - Problems in International Business

Credits: 1-4

Max Credit (Max. 4)

Individual projects of a research nature, under direct supervision of a professor. Written report required.

Former Course Number [BUSN 4900]

Prerequisite: consent of instructor.

INBU4910 - Selected Topics in International Business

Credits: 3

For advanced students; consists of an in-depth study of a selected area of international business. Specific area(s) to be considered in any given semester are printed in the class schedule. Topics may include globalization and business, international accounting, international management and negotiation, or topics related to doing business in a particular country or region.

Former Course Number [BUSN 4910]

Prerequisite: junior class standing and other courses, as appropriate, for specific area/topic being covered.

INBU4920 - International Business: Study Abroad

Credits: 1-6

Max Credit (Max. 6)

Credit for course work related to international business undertaken at foreign institutions. Students are responsible for submitting course materials for evaluation for credit by College of Business faculty prior to enrolling. Students arrange for the foreign institutions to send performance evaluations to the Peter M & Paula Green Johnson Student Success Center.

Former Course Number [BUSN 4920]

Prerequisite: consent of department head.

INBU5570 - Global Business Issues

Credits: 1-6

Max Credit (Max. 6)

Designed to give students a broad overview of current issues in international business. Includes classroom instruction and may include travel to a foreign country and visits to major foreign firms. A written assignment is required.

Dual Listed INBU 4570.

Former Course Number [BADM 4540; BUSN 5540]

Prerequisite: consent of instructor.

International Studies

INST1040 - Introduction to International Business

Credits: 3

A broad study of the field of international business activity and theory and review major foreign environmental forces

Cross Listed INBU 1040.

Former Course Number [INST 2000]

Prerequisite: ECON 1010.

INST1060 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed Cross listed with: GEOG 1000.

USP Code [CS,G<>H]

INST1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

INST1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed POLS 1200.

USP Code [CS,G<>(none)]

INST1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed POLS 1250.

INST1330 - World History since 1750

Credits: 3

A history of the world's peoples and societies from 1750 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP Code [CS,G<>(none)]

INST2200 - Study Abroad Preparation

Credits: 1

Prepares students for long-term study in a foreign country, by helping them to adapt to and understand the host country's culture, history, geography, political, and economic context. The course provides the practical information necessary for a foreign experience by exploring the principles of culture shock, ethnocentrism, cultural relativism, and the fundamentals of cross-cultural communication.

INST2230 - Introduction to Asian Studies

Credits: 3

Asia, the world's largest continent, is home to virtually half of humanity and a broad spectrum of peoples, languages, religions, and cultures. This course introduces the cultural, political, economic, and environmental landscapes of this diverse region.

USP Code [G<>COM2]

INST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed AAST 2240.

USP Code [WB<>COM2]

INST2250 - Introduction to Latin American Studies

Credits: 3

An introduction to the culture, history and politics of Latin America, from the US/Mexico border to the Antarctic ice fields of Patagonia. We will consider historical events and encounters from pre-Conquest times to contemporary crises. Our toolkit includes geography, anthropology, history, political economy, literature and cultural studies.

USP Code [(none)<>COM2]

INST2260 - Foreign Locale

Credits: 3-6

Max Credit (Max. 9)

A UW course taught primarily or entirely in a foreign locale.

INST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed HIST 2280.

USP Code [(none)<>COM2]

INST2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed POLS 2310.

INST2350 - Introduction to Global Studies

Credits: 3

Taking an interdisciplinary approach to the study of globalization, the course explores the links between trade, consumption, civil society, social justice, and ecological integrity.

USP Code [CS,G<>(none)]

INST2990 - Topics in International Studies

Credits: 1-6

Max Credit (Max. 15)

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in international studies not covered by other courses.

INST3000 - Social Change

Credits: 3

Studies causes, processes and consequences of structural transformations in historical and comparative perspective. Reviews and assesses forces that account for sociological changes. Explores social change globally as well as in the U. S.

Cross Listed SOC 3000.

Former Course Number [2100]

Prerequisite: SOC 1000.

INST3050 - Economic Geography

Credits: 3

Economic geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Cross Listed GEOG 3050.

When Offered (Normally offered fall semester every other year)

Prerequisite: 6 hours of Social Sciences or International Studies.

INST3100 - Chinese Society

Credits: 3

Reviews origins and consequences of Chinese revolution in comparative and cultural perspectives. Discusses influence of historical traditions and social structure on individual lives and behavioral patterns.

Cross Listed SOC 3100.

USP Code [G<> (none)]

Prerequisite: SOC 1000.

INST3200 - Comparative Political Cultures

Credits: 3

Histories and experiences of various societies have shaped their values, norms, beliefs, expectations, and attitudes. This class explores how the beliefs, values, and lifestyles of various societies shape peoples' views of their place in the politics of the state and of the state's place in their daily lives.

Cross Listed POLS 3200.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/INST 1250 or permission of instructor.

INST3400 - Politics and Society of Turkey

Credits: 3

Examines the history of Turkey with an emphasis on its relationship with the Western world. Major topics include the Ottoman Empire; Ataturk and the founding of the Republic of Turkey; Turkey's role in the Cold War, Kurdish and other minority populations; the changing Turkish political landscape, the evolution of Islamist politics; and recent relations with the United States and European Union.

USP Code [G<>(none)]

Prerequisite: INST 1200/POLS 1200 or POLS 1250 and INST 2310/POLS 2310 or permission of instructor.

INST3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed ANTH 3420.

Prerequisite: ANTH 1200.

INST3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed AGEC 3860.

When Offered (Normally offered spring semester)

USP Code [G<>H]

Prerequisite: AGECE 1010/ECON 1010 or ECON 1020.

INST3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed SOC 3910.

When Offered (Offered once a year).

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

INST3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed AAST 3933/PHIL 3933.

USP Code [(none)<>H]

Restricted Restricted to junior or senior class standing.

Prerequisite: A prior course in AAST, INST or PHIL.

INST4050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed AAST 4050.

Dual Listed INST 5050.

Prerequisite: junior standing and instructor consultation.

INST4060 - NGOs, Development, and Culture

Credits: 3

Non-governmental organizations (NGOs) have grown exponentially in number and are often viewed as the new and best vehicle for international development. By focusing on international non-governmental organizations (INGOs), in the contexts of Western aid to post-colonial societies and the role they play in the international aid system, the course explores INGOs from historical, global, and cultural perspectives.

Dual Listed INST 5060.

Prerequisite: junior standing and instructor permission.

INST4100 - Global Public Health

Credits: 3

Introduces students to the global context of public health, to principles underlying global health, and to dimensions of public health particular to international settings. It examines major themes and policies in global health and analyzes health problems and varying responses to them in different parts of the world.

Cross Listed HLSC 4100.

Dual Listed INST 5100.

USP Code [G<>(none)]

Prerequisite: upper division student status.

INST4175 - Gender, Women, and Health

Credits: 3

Focuses on issues of gender, women and health, including the effects of gender bias in medical research and health care practices and policies. Health care issues of specific concern to women, both nationally and internationally will be examined.

Cross Listed GWST 4175 .

When Offered (Offered every other year)

USP Code [CS,G<>(none)]

Prerequisite: upper-division standing, lower division social or psychological science course.

INST4200 - China and Globalization

Credits: 3

The economic reforms in China have been political, cultural, and above all, global processes. Understanding these processes of economic reform tells us much about the role of government, culture, and globalization in the transition from socialism to capitalism, as well as about China's future role in the world.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/INST 1250 or HIST 2041 or SOC 3100.

INST4215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed POLS 4215.

Dual Listed INST 5215.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

INST4240 - Global Sex Work and Trafficking

Credits: 3

Drawing upon case studies from Africa, Asia, the Americas and Europe, this course explores the gendered intersections of power and privilege through the lens of sex work, broadly defined as the exchange of intimacy for something of value, and trafficking, defined as coerced forms of sex work.

Cross Listed GWST 4240 .

Dual Listed INST 5240.

USP Code [G<>(none)]

Prerequisite: 3-6 hours of WMST or INST.

INST4250 - East Asia Society and Economy

Credits: 3

Designed to explore key issues to the historical development of Asian countries from both comparative and international political economy perspectives. Distinctive political, social, and economic characteristics of these nations will be analyzed.

Dual Listed INST 5250.

USP Code [G<>(none)]

INST4255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed POLS 4255.

Dual Listed INST 5255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200 or POLS 1250 or POLS 2310, or permission of instructor.

INST4260 - Democratization and Regime Change

Credits: 3

Examines the theoretical/empirical research on causes of democratic transition and consolidation, including new waves of democratization and prospects for democratization in other contexts. Focus is given to a variety of theoretical/methodological perspectives such as the structural, strategic, social/cultural, institutional, and economic approaches.

Cross Listed POLS 4260.

Dual Listed INST 5260.

Prerequisite: 9 hours of political science or international studies, including POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

INST4290 - Inter-American Relations

Credits: 3

Surveys inter-American system and idea of hemispheric unity. Analyzes major issues confronting inter- American community.

Cross Listed POLS 4290.

Prerequisite: 9 hours of political science, including POLS 1200/INST 1200, or POLS 1250/INST 1250, or POLS 2310/INST 2310, or permission of instructor.

INST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed HIST 4315.

Dual Listed INST 5315.

Prerequisite: 9 hours of HIST or INST.

INST4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed POLS 4330.

When Offered (Normally offered once a year)

Prerequisite: 9 hours of political science or international studies including POLS 2310.

INST4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed POLS 4340.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

INST4350 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology. Identical to ANTH 4340.

Prerequisite: ANTH 1200.

INST4360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed POLS 4360.

Dual Listed INST 5360.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

INST4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed SOC 4370.

USP Code [G<>(none)]

Prerequisite: SOC 1000 and junior standing or SOC 2100.

INST4375 - Transitional Justice

Credits: 3

Mechanisms provide accountability for gross human rights violations and acts of mass atrocity within nations. Case studies are used to examine types of transitional justice interventions; tensions between demands of justice at local, national, and international levels; and transitional justice's role in post-conflict peace-building and reconciliation.

Cross Listed POLS 4375.

Dual Listed INST 5375.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed HIST 4380.

Dual Listed INST 5380.

Prerequisite: 9 hours of HIST or INST.

INST4385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed POLS 4385.

Dual Listed INST 5385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

INST4445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed POLS 4445

GEOG 4445

LTST 4445

Dual Listed INST 5445

POLS 5445

GEOG 5445

LTST 5445

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

INST4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 4455.

Dual Listed INST 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

INST4475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed POLS 4475.

GEOG 4475.

Dual Listed INST 5475.

POLS 5475.

GEOG 5475.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

INST4485 - USLatino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U. S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives responses are stressed.

Cross Listed HIST 4485/LTST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

INST4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed MKT 4540.

Prerequisite: MKT 3210 and junior standing.

INST4555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST/POLS 4555/5555 & GEOG 4555

Dual Listed INST/POLS 4555/5555 & GEOG 4555

Prerequisite: 9 hours of international studies or social science coursework.

INST4560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed GEOG 4560.

Dual Listed Dual listed with INST 5560.

USP Code [H]

Prerequisite: 9 hours of international studies or geography.

INST4580 - Gender, Global Change, and Development

Credits: 3

Examines the global intersections of gender and public policy through its analysis of five central themes: [1] international

development discourse in practice; [2] feminized labor and migration; [3] women's unequal access to resources (including land ownership and education); [4] agricultural production and sustainability; [5] health, reproduction and mothering.

Cross Listed GWST 4580 .

Dual Listed INST 5580.

Prerequisite: 3-6 hours of WMST or INST courses.

INST4582 - 20th Century US Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed HIST 4582.

Dual Listed INST 5582.

Prerequisite: 9 hours of HIST or INST.

INST4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the 'lens' of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed MKT 4590.

Dual Listed INST 5590.

Prerequisite: advanced business standing.

INST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/LTST 4650/GWST 4650.

Dual Listed INST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

INST4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed CRMJ 4705 and SOC 4705 and POLS 4705

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

INST4710 - Why Economies Succeed and Fail

Credits: 3

The study of the successes and failures of alternative economic systems; origins, similarities, and differences across capitalist, socialist, and communist systems, including the UW, Chinese, European, Russian, Latin American, and African economies. What does history teach us? Are there different tools to grow economy?

Cross Listed ECON 4710.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010; QA.

INST4881 - International Social Welfare and Social Development

Credits: 3

Examines the basic framework of social welfare analysis and social development programming in the international arena, employing a multinational comparative analysis approach to explore the wide array of responses to social need across the globe. Students employ multinational comparative analyses to an area of social concern.

Cross Listed SOWK 4881.

Dual Listed INST 5881.

Prerequisite: POLS 1000; ECON 1010 recommended.

INST4950 - Capstone in International Studies

Credits: 3

Integrative course taught by an international studies faculty member. Students analyze a topic in depth from one of a variety of international studies approaches, organizing their research in concert with others in the class. Emphasis is on the quality of research and presentation.

USP Code [WC<>COM3]

Prerequisite: senior standing in international studies.

INST4970 - Internship in International Studies

Credits: 1-6

Max Credit (Max. 15)

Integrates practical international experience with academic knowledge. Students are expected to participate in specifically assigned tasks and observe broader activities of sponsoring organization, and reflect on experience in written assignments.

Dual Listed INST 5970.

Prerequisite: 9 hours of international studies courses and consent of instructor.

INST4975 - Readings in International Studies

Credits: 1-3
Max Credit (Max. 9)

Outlines special programs of readings in international studies to meet the needs of individual students.

Prerequisite: 9 hours of international studies courses.

INST4990 - Topics:

Credits: 1-6
Max Credit (Max. 15)

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in international studies not covered by other courses.

Dual Listed INST 5990.

Prerequisite: junior standing and consent of instructor.

INST5050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed AAST 5050.

Dual Listed INST 4050.

Prerequisite: junior standing and instructor consultation.

INST5060 - NGOs, Development, and Culture

Credits: 3

Non-governmental organizations (NGOs) have grown exponentially in number and are often viewed as the new and best vehicle for international development. By focusing on international non-governmental organizations (INGOs), in the contexts of Western aid to post-colonial societies and the role they play in the international aid system, the course explores INGOs from historical, global, and cultural perspectives.

Cross Listed AAST 5060.

Dual Listed INST 4060.

Prerequisite: junior standing and instructor permission.

INST5100 - Global Public Health

Credits: 4

Introduces students to the global context of public health, to principles underlying global health, and to dimensions of public health particular to international settings. It examines major themes and policies in global health and analyzes health problems and varying responses to them in different parts of the world.

Cross Listed HLSC 5100.

Dual Listed INST 4100.

Prerequisite: upper division or graduate standing.

INST5200 - Graduate Proseminar in International Studies

Credits: 3-6

Max Credit (Max. 6)

Introduces students to different interdisciplinary approaches - perspectives, theories, and paradigms - within International Studies in order to explain the economic, historical, social, cultural, and political dimensions of international processes and issues. Students explore emerging trends in the global system and the most pressing challenges facing states, societies, and peoples.

Prerequisite: graduate student status.

INST5210 - Seminar in Human Security

Credits: 3-6

Max Credit (Max. 6)

A broad interdisciplinary approach to the study of human security within the field of international studies and global politics in order to explore the theories and processes that explain past and emerging patterns of behavior in the international system, as well as key aspects of local to global policymaking.

Dual Listed POLS 5210.

INST5215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed POLS 5215.

Dual Listed INST 4215.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

INST5220 - Graduate Seminar in Development

Credits: 3

This seminar will explore political challenges facing developing nations in the twenty-first century. The objective is to equip students from a broad range of backgrounds with a firm grounding in current development approaches and debates.

Prerequisite: INST graduate standing.

INST5240 - Global Sex Work and Trafficking

Credits: 3

Drawing upon case studies from Africa, Asia, the Americas and Europe, this course explores the gendered intersections of power and privilege through the lens of sex work, broadly defined as the exchange of intimacy for something of value, and trafficking, defined as coerced forms of sex work.

Cross Listed GWST 5240 .

Dual Listed INST 4240.

Prerequisite: 3-6 hours of WMST or INST.

INST5250 - East Asia Society and Economy

Credits: 3

Designed to explore key issues to the historical development of Asian countries from both comparative and international political economy perspectives. Distinctive political, social, and economic characteristics of these nations will be analyzed.

Dual Listed INST 4250.

INST5255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed POLS 5255.

Dual Listed INST 4255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

INST5260 - Democratization and Regime Change

Credits: 3

Examines the theoretical/empirical research on causes of democratic transition and consolidation, including new waves of democratization and prospects for democratization in other contexts. Focus is given to a variety of theoretical/methodological perspectives such as the structural, strategic, social/cultural, institutional, and economic approaches.

Cross Listed POLS 5260.

Dual Listed INST 4260.

Prerequisite: 9 hours of political science or international studies, including POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

INST5310 - Seminar in Human Rights

Credits: 3

This seminar will examine rights from interdisciplinary perspectives, with an emphasis on a social science approach.

Prerequisite: graduate standing.

INST5315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed HIST 5315.

Dual Listed INST 4315.

Prerequisite: graduate standing.

INST5330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors along with analysis of policy options.

Cross Listed POLS 5330.

Dual Listed INST 4330.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST5360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed POLS 5360.

Dual Listed INST 4360.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST5375 - Transitional Justice

Credits: 3

Mechanisms provide accountability for gross human rights violations and acts of mass atrocity within nations. Case studies are used to examine types of transitional justice interventions; tensions between demands of justice at local, national, and international levels; and transitional justice's role in post-conflict peace-building and reconciliation.

Cross Listed POLS 5375.

Dual Listed INST 4375.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST5380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions;

and the resulting international responses.

Cross Listed HIST 5380.

Dual Listed INST 4380.

Prerequisite: 9 hours of HIST or INST.

INST5385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed POLS 5385.

Dual Listed INST 4385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

INST5400 - International Social Science Research Methods

Credits: 3

Introduces students to a wide variety of interdisciplinary social science methodologies that have proven especially conducive to international research.

Prerequisite: graduate standing.

INST5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed POLS 5445.

Dual Listed INST 4445.

Prerequisite: graduate standing.

INST5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 5455.

Dual Listed INST 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

INST5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed POLS 4475 /POLS 5475
INST 4475 /5475

GEOG 4475

Dual Listed POLS 4475/5475

INST 4475/5475

GEOG 4475

Prerequisite: graduate standing.

INST5555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST/POLS/GEOG 4555 & POLS 5555

Dual Listed INST/POLS/GEOG 4555 & POLS 5555

Prerequisite: 9 hours of international studies or social science coursework.

INST5560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed GEOG 5560.

Dual Listed INST 4560.

Prerequisite: 9 hours of international studies or geography.

INST5580 - Gender, Global Change, and Development

Credits: 3

Examines the global intersections of gender and public policy through its analysis of five central themes: [1] international development discourse in practice; [2] feminized labor and migration; [3] women's unequal access to resources (including land ownership and education); [4] agricultural production and sustainability; [5] health, reproduction and mothering.

Cross Listed GWST 5580 .

Dual Listed INST 4580.

Prerequisite: 3-6 hours of WMST or INST courses.

INST5582 - 20th Century US Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic racial and gender issues.

Cross Listed HIST 4582/HIST 5582.

Dual Listed 4582

Prerequisite: graduate standing.

INST5590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the 'lens' of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed MKT 5590.

Dual Listed INST 4590.

Prerequisite: advanced business standing.

INST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

INST5881 - International Social Welfare and Social Development

Credits: 3

Examines the basic framework of social welfare analysis and social development programming in the international arena, employing a multinational comparative analysis approach to explore the wide array of responses to social need across the globe. Students employ multinational comparative analyses to an area of social concern.

Cross Listed SOWK 5881.

Dual Listed INST 4881.

Prerequisite: POLS 1000; ECON 1010 recommended.

INST5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

INST5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

INST5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

INST5970 - Internship

Credits: 1-12
Max Credit (Max. 24)

Integrates practical international experience with academic knowledge. Students are expected to participate in specifically assigned tasks and observe broader activities of sponsoring organization, and reflect on experience in written assignments.

Dual Listed INST 4970.

Prerequisite: 9 hours of INST core courses and consent of instructor.

INST5975 - Graduate Readings in International Studies

Credits: 1-3
Max Credit (Max. 12)

Outlines special programs of readings in international studies to meet the needs of individual students.

Prerequisite: graduate standing.

INST5990 - Topics:

Credits: 1-6
Max Credit (Max. 15)

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in international studies not covered by other courses.

Dual Listed INST 4990.

Prerequisite: junior standing and consent of instructor.

Leadership

LEAD2110 - Foundations for Leadership

Credits: 3

As the gateway course for the university's leadership program, this course introduces students to leadership theory and helps them to identify their leadership potential. Students learn to define and understand the multifaceted concept of leadership through an interdisciplinary study and develop leadership competencies through experiential coursework.

LEAD4110 - Leadership in Practice

Credits: 3

The culminating leadership experience of the university's leadership program. Students draw upon their prior learning to lead an experiential project, benefiting a UW stakeholder. Students continue to learn about effective leadership through the lens of practitioner-oriented literature and apply their learning in advanced casework. The instructor acts as a leadership coach who helps students refine their leadership competencies and enhance leadership potential.

Prerequisite: LEAD 2110, MGT 3110

Learning, Design, and Technology

ITEC1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ITEC2360 - Teaching with Technology

Credits: 1-3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

Prerequisite: minimum 2.500 cumulative UW GPA.

ITEC4010 - Instructional Technology

Credits: 3

An introductory survey course in instructional technology. Covers psychological principles in communication theory, message design and instructional theory with emphasis on the application of technology toward achieving communications objectives.

Includes hands-on experience with current presentation tools and techniques for a variety of instructional deliveries.

Dual Listed ITEC 5010.

Former Course Number [4120]

Prerequisite: junior standing.

ITEC4030 - Introduction to Online Teaching

Credits: 3

Includes basic theory, techniques, strategies of teaching and managing the online environment. Covers foundations and domains of online teaching. Emphasizes online learning issues, topics, and practices. Builds a knowledge base in topics such as the selection and integration of distance learning technologies in teaching and providing learner support.

Dual Listed ITEC 5030.

Prerequisite: senior standing or 12 hours of education.

ITEC4220 - Materials Production I

Credits: 2

The first in a series of laboratory experiences aimed at providing teachers, administrators and production specialists with skills in the design and production of instructional materials. Focuses on the basic processes (i. e. mounting, lettering, coloring, illustration, converting and duplicating). A materials fee will be assessed. May be used toward the practical and applied arts requirement.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ITEC 4120.

ITEC4340 - Technology Integration in Teaching

Credits: 3

This course is an intermediate practice in theory and application of integrating instructional technology into all types of classroom settings. Issues and topics include teaching and learning with technology, designing materials and activities for use with various technologies, and the role that technology plays in the delivery of instruction.

Former Course Number [4400]

Prerequisite: ITEC 2360 or equivalent.

ITEC4740 - Field Studies In (TOPIC)

Credits: 1-5

This course is offered only through extension services. It is broad and flexible and can be utilized in numerous situations to meet local needs. Credit in this course is not applicable toward advanced degrees.

Note: (Please note that any course offered by the College of Education with the number 4740 is not applicable toward advanced degrees)

Prerequisite: junior standing.

ITEC5000 - Intro to the Field of Instructional Technology

Credits: 3

This course details faculty expectations and students' responsibilities in instructional technology graduate degree programs. It builds a knowledge base about program milestones, library research, APA writing guidelines, academic journals, and professional opportunities. ePortfolios are introduced and initiated to assess student progress over time.

Prerequisite: graduate standing in Instructional Technology.

ITEC5010 - Instructional Technology

Credits: 3

An introductory survey course in instructional technology. Covers psychological principles in communication theory, message design and instructional theory with emphasis on the application of technology toward achieving communications objectives. Includes hands-on experience with current presentation tools and techniques for a variety of instructional deliveries.

Dual Listed ITEC 4010.

Prerequisite: junior standing.

ITEC5020 - Technology and Distance Education

Credits: 3

A survey of the uses of telecommunication systems and other technologies in distance education. Covers instructional strategies, management concerns, and special issues associated with distance learning programs.

Prerequisite: graduate standing and consent of instructor.

ITEC5030 - Introduction to Online Teaching

Credits: 3

Includes basic theory, techniques, strategies of teaching and managing the online environment. Covers foundations and domains of online teaching. Emphasizes online learning issues, topics, and practices. Builds a knowledge base in topics such as the selection and integration of distance learning technologies in teaching and providing learner support.

Dual Listed ITEC 4030.

Prerequisite: senior standing or 12 hours of education.

ITEC5070 - Trends In Instructional Technology

Credits: 1-3

Max Credit (Max. 6)

Provides reading, discussion, research and the opportunity to critically appraise potential methods, software, and hardware in the field of educational communications and technology.

Prerequisite: 12 hours of education, graduate standing, and consent of instructor.

ITEC5090 - Masters Capstone

Credits: 3

Provides exposure to situations students will likely encounter professionally. It establishes a forum where students apply and refine theories, principles, and skills learned during their programs. Students examine and critique current scholarship and document general degree specific competencies.

Cross Listed ADED 5090.

Prerequisite: Check with advisor and complete required sequence of courses for Educational Administration (Adult and Postsecondary Education) or Instructional Technology masters degree programs prior to enrollment.

ITEC5120 - Media Workshop

Credits: 1-6

Max Credit (Max. 6)

Specialized experience in selected areas such as computer technology, multi-image, slide/tape, audio and instructional design. Emphasizes experimental use of materials and development of learning software. The workshop is provided on demand and is flexibly organized and scheduled to meet prevailing needs.

Prerequisite: ITEC 4220.

ITEC5160 - Introduction to Instructional Design

Credits: 3

An introduction to theory and practice of instructional design. Intensive study of the instructional design process and application of the process to solve an instructional problem.

Prerequisite: graduate standing.

ITEC5320 - Message Design

Credits: 3

Introduces theoretical framework and skills necessary to evaluate and create visual representations of information. Topics of application include visual literacy, learning theories, instructional design, instructional technology, and information presentation.

Prerequisite: graduate standing.

ITEC5350 - Multimedia Development

Credits: 3

An introduction to techniques, software, and applications used in the design, manipulation, and development of multimedia artifacts for instructional purposes. This course includes accelerated, hands-on activities to practice and apply message design principles in multimedia settings.

Prerequisite: graduate standing.

ITEC5470 - Instructional Video

Credits: 3

An introductory course for teachers, media specialists, administrators, and others interested in planning, producing, and using instructional video.

Prerequisite: graduate standing and consent of instructor.

ITEC5480 - Short Course

Credits: 3

Used to provide offerings in special topics in instructional technology on the basis of need.

Prerequisite: graduate standing and consent of instructor.

ITEC5510 - Communication in Distance Education

Credits: 3

An introduction to the theory and practice of using communication tools for distance education purposes. Instructional issues related to the design, development, use, and evaluation of communication tools in public school, business, and other distance delivery settings are emphasized.

Prerequisite: graduate standing.

ITEC5550 - Theory of Change

Credits: 3

Explores the literature and research base within the theories, models, and processes of change, the diffusion of innovations, and the human side of educational reform. Learners explore practical applications of theoretical and research findings to behavioral change, diffusion of innovations, and principles and practices of planned change.

Prerequisite: graduate standing.

ITEC5560 - Design and Development of Instructional Systems

Credits: 3

Advanced study in instructional systems theory and design. Study and application of instructional design models used in education and training.

Prerequisite: ITEC 5160, graduate standing, and consent of instructor. Previous course work in educational psychology/learning theory is desirable.

ITEC5660 - Interactive Learning Systems

Credits: 1-3

Max Credit (Max. 6)

Covers all of the necessary elements to design and evaluate effective and efficient interactive learning systems.

Prerequisite: ITEC 5160 or equivalent, graduate standing, and consent of instructor. Previous course work in educational psychology/learning theory is desirable.

ITEC5760 - Instructional Design Applications

Credits: 3

Students engage in the application of principles of instructional design in a real-world setting. Students will be involved in classroom and field experience.

Prerequisite: ITEC 5160 or ITEC 5560.

ITEC5870 - Seminar

Credits: 1-3

Max Credit (Max. 6)

Advanced students in education work together, intensively, on current issues and problems relevant to instructional technology, and participate in systematic, critical interpersonal evaluations.

Prerequisite: graduate standing and consent of instructor.

ITEC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

ITEC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ITEC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ITEC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

ITEC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ITEC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for student whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate degree program.

ITEC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Japanese

JAPN1010 - First Year Japanese I

Credits: 4
Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered fall semester)
USP Code [(none)< >H]

JAPN1020 - First Year Japanese II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered spring semester)

USP Code [(none)< >H]

Prerequisite: JAPN 1010 or equivalent.

JAPN2030 - Second Year Japanese I

Credits: 4

Encompasses reading, speaking and writing in original Japanese syllabaries, including elementary kanji characters for daily practical application.

When Offered (Offered fall semester)

Prerequisite: JAPN 1020 or equivalent.

JAPN2040 - Second Year Japanese II

Credits: 4

Encompasses reading, speaking and writing in original Japanese syllabaries, including elementary kanji characters for daily practical application.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 1020 and JAPN 2030 or equivalent.

JAPN2070 - Conversational Japanese Abroad

Credits: 4

Japanese language and cultural study in Japan led by UW faculty.

Prerequisite: JAPN 1020.

JAPN3050 - Third Year Japanese I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 2040 or equivalent.

JAPN3060 - Third Year Japanese II

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 2040 and JAPN 3050 or equivalent.

JAPN3990 - Independent Study

Credits: 1-4

Projects in language or literature designed to meet specific student needs or interests, selected in consultation with faculty; independent reading and reports.

Prerequisite: JAPN 2030.

JAPN4070 - Fourth Year Japanese I

Credits: 3

Incorporates intensive grammar review and combination skill development. Also emphasizes specialized lexicons, written and oral translations, conversational fluency and additional kanji characters.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 3060.

JAPN4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects pertaining to Japanese language or literature to meet needs of individual students designed in consultation with instructor.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 3050 and consent of instructor.

Kinesiology

KIN1006 - Introduction to Kinesiology and Health

Credits: 1

A survey of the disciplines of kinesiology and health and exposure to foundational literature in the field.

Prerequisite: Declared Kinesiology & Health Promotion major or permission of instructor.

KIN1040 - Contemporary Topics in North American Sport

Credits: 3

An introductory course that focuses on sport as an institution in North American society. A range of topics is explored from diverse perspectives (historical, sociological, psychological, political, and gender theories), so learners can critically examine what it means to be a part of "sport" in contemporary North American society.

USP Code [CH,D< >(none)]

KIN1101 - First-Year Seminar

Credits: 3

USP Code [(none)< >FYS]

KIN2000 - Movement Core I: Striking/Fielding and Invasion Games

Credits: 2

Exposes students to skill and tactical themes comprising striking/fielding and invasion games. Course aims for students' ability to understand, demonstrate and analyze the different offensive and defensive tactics that facilitate game play success in invasion (soccer, tag rugby, basketball) and striking/fielding (softball, cricket) games.

Former Course Number [PEPR 2000]

Prerequisite: sophomore standing.

KIN2001 - Movement Core II: Net and Target Games

Credits: 2

Exposes students to skill and tactical themes comprising net and target games. Course aims for students' ability to understand, demonstrate and analyze different offensive and defensive tactics facilitating game play success in net (volleyball, tennis, badminton) and target (archery) games.

Former Course Number [KIN 1025, PEPR 1025]

Prerequisite: sophomore standing.

KIN2003 - Movement Core IV: Educational Games and Gymnastics

Credits: 2

To provide pre-service teachers (PTs) with the skills and knowledge necessary to teach educational games and gymnastics to public school students.

Former Course Number [KIN 1000, PEPR 1000]

Prerequisite: sophomore standing.

KIN2004 - Movement Core V: Fundamental Motor Skills, Creative Movement, and Dance

Credits: 3

Designed for prospective physical education teachers K-12. Fundamental motor skills, dance, and creative movement and the associated teaching behaviors needed to teach this content to K-12 learners is the focus of this course.

USP Code [CA< >(none)]

Former Course Number [KIN 3025, PEPR 3025]

Prerequisite: Sophomore standing.

KIN2005 - Movement Core VI: Physical Fitness and Physical Activity

Credits: 2

Designed for prospective school-based physical and health education teachers K-12. Focuses on five primary content areas: what is fitness education and why do we need it; development of content-based fitness curriculum; teaching cognitive aspects of fitness education; teaching physical aspects of fitness education; and promoting fitness education.

Former Course Number [KIN 2025, PEPR 2025]

Prerequisite: sophomore standing.

KIN2010 - Field Experience for Prospective Elementary and Secondary Teachers

Credits: 1-4

Provides initial experience in the public school setting. Full-time assignment of one to four weeks in a public school under supervision of a certified teacher. Students serve as teacher aides.

Former Course Number [PEPR 2010]

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP Code [SB<>(none)]

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP Code [SB<>(none)]

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

KIN2050 - Socio-Cultural Aspects of Physical Activity, Exercise and Sport

Credits: 3

This course examines the role of physical activity, exercise and sport in the promotion of individual and collective physical health and wellness. Students will understand the historical, individual, socio-cultural, environmental and political factors that have shaped the role of these behaviors in contemporary U. S. society.

USP Code [(none)<>H]

Prerequisite: Completion of an FYS course, COM1.

KIN2900 - Topics In:

Credits: 1-3

Max Credit (Max. 3)

Course Topics could include Peer Health Education, Current Issues in Health, etc.

Prerequisite: sophomore standing.

KIN3010 - Fundamentals of Health and Fitness Assessment

Credits: 3

Fundamental concepts of health appraisal, assessment of health-related fitness levels, individual and group exercise programming and leadership, and methods of behavioral change. Theory and practical application of fitness presented with an emphasis on adults. Has lecture and lab components. Completion of KIN 3021 highly recommended.

Former Course Number [PEPR 3010]

Prerequisite: completed or concurrent enrollment in KIN 3021; 2.700 GPA.

KIN3011 - Teaching Methods in Physical Education K-12

Credits: 3

Develops knowledge, skills and understandings appropriate to successful participation in a class setting when functioning in the teaching role.

Former Course Number [PEPR 3011]

Prerequisite: grade of C or better in KIN 3012; concurrent enrollment in KIN 3015 and KIN 4080.

KIN3012 - Teaching Laboratory I

Credits: 3

Provides the opportunity to develop skills and acquire knowledge needed to teach physical education. Allows the opportunity for students to evaluate the motor status and progress of a preschool aged child, as well as plan and implement a developmentally appropriate motor program.

When Offered (Offered fall semester)

USP Code [(none)<>COM2]

Former Course Number [PEPR 3012]

Prerequisite: Admitted to PHET program.

KIN3015 - Teaching Laboratory II

Credits: 3

Provides pre-service physical education teacher with skills, knowledge and principles of teaching through application of peer

teaching and small group elementary school teaching. Emphasizes and practices program development, lesson planning and development of a physical education teaching unit.

When Offered (Offered spring semester)

USP Code [WC< >(none)]

Former Course Number [PEPR 3015]

Prerequisite: grade of C or better in KIN 3012; concurrent enrollment in KIN 3011, KIN 4080.

KIN3020 - Observational Experience in Movement Science

Credits: 1-2

Max Credit (Max. 6)

Provides students with off-campus opportunity to observe professionals in the work place. Emphasis is placed on physical or occupational therapy. Conducted under supervision and arranged by coordinator of undergraduate programs.

Former Course Number [PEPR 3020]

Prerequisite: sophomore standing, declared KIN or PHET major, consent of coordinator of undergraduate programs.

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular circulatory, and respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

KIN3022 - Lab Exp in Exercise Physiology

Credits: 1

An in-depth examination of the measurement of physiological principles and mechanisms related to human movement. Lab exercises emphasize skills necessary for basic morphological through advanced exercise performance testing variables. Laboratory writing exercises focus on improving students' ability to read and comprehend scientific articles and produce scientific writing based on their own experiments and data.

Prerequisite: KIN 3021 or concurrent enrollment.

KIN3034 - Lifespan Motor Development

Credits: 3

Studies lifespan motor development. Emphasizes developmental periods of infancy through adolescence. Gives attention to observation and analysis of motor behavior and movement performance of individuals across lifespan.

Former Course Number [PEPR 3034]

Prerequisite: grade of C or better in PSYC 1000; junior standing; 2.750 GPA.

KIN3037 - Sport Psychology

Credits: 3

Studies psychological theories and techniques applied to sport to enhance the performance and personal growth of athletes and coaches. Emphasizes the influence of personality, anxiety, motivation, social factors, and psychological skills training.

Former Course Number [PEPR 3037]

Prerequisite: Admitted to the last two years of one of the programs in DK&H.

KIN3038 - Exercise Psychology

Credits: 3

Studies psychological theories for understanding and predicting health-oriented exercise behavior, including psychological intentions for increasing exercise participation and adherence. Emphasizes psychological and psychobiological responses to exercise.

Prerequisite: grade of C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; 2.750 GPA.

KIN3040 - Teaching Human Anatomy

Credits: 3

Students develop communication and teaching skills while expanding their knowledge in anatomy. Under faculty instruction, each student develops lecture and laboratory lessons for all human anatomy systems. Under direct faculty supervision, each student demonstrates their teaching skills through preparation of videotape segments and actual laboratory teaching experience in the lower-division human anatomy course.

Former Course Number [PEPR 3040]

Prerequisite: 2.750 GPA and grade of B or better in KIN 2040 and consent of instructor.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

KIN3044 - Concepts in Physical Therapy

Credits: 2

Introduce and expand student knowledge of physical therapy. Designed for students interested in applying to Physical Therapy (PT) school. Content includes history of PT, therapist role in healthcare, trends in PT education, and effective communication

(written and verbal) to support and prepare for the PT application process.

Prerequisite: concurrent enrollment in or completion of KIN 3021 or permission of instructor.

KIN3050 - Prevention and Care of Athletic Injuries

Credits: 2

Encompasses theory and practical work in the field of athletic training. Strongly emphasizes prevention and care of athletic injuries, including wrapping and taping techniques.

Former Course Number [PEPR 3050]

Prerequisite: junior standing; C or better in KIN 2040; minimum 2.750 GPA.

KIN3052 - Rehabilitation of Athletic Injuries

Credits: 3

Provides a foundation of appropriate rehabilitation principles and techniques based on current research/rationale. The scope is inclusive of approaches applicable to common sports medicine problems.

Former Course Number [PEPR 3052]

Prerequisite: junior standing; C or better in KIN 2040; and minimum 2.750 GPA.

KIN3058 - Therapeutic Modalities for the Athletic Trainer

Credits: 3

Provides the prospective athletic trainer with the knowledge and skill necessary to use therapeutic modalities for the health care of the physically active.

Former Course Number [PEPR 3058]

Prerequisite: junior standing; C or better in KIN 2040; and minimum 2.750 GPA.

KIN3060 - Understanding Skill Acquisition for Teaching

Credits: 3

Addresses practical questions specific to teaching physical activity

Prerequisite: C or better in PSYC 1000; junior standing; declared major in KHP or PHET; 2.750 GPA; or permission of instructor.

KIN3068 - Athletic Training Clinical III

Credits: 2

Provides clinical and field experience for the athletic training student. Skill and knowledge learned in KIN 2057 and 2058 are applied in the clinical and field settings.

Prerequisite: KIN 2058 and 2078; concurrent enrollment in KIN 3052; minimum GPA of 2.500.

KIN4001 - Short Course in Physical Education for Undergraduates

Credits: 1-6

Former Course Number [PEPR 4001]

Prerequisite: junior status; declared major in KHP or PHET; consent of undergraduate program coordinator.

KIN4010 - Pediatric Exercise Physiology

Credits: 3

This course will examine the physiological effects of acute and chronic exercise on the pregnant woman, fetus, child, and adolescent. This course is also suitable as a supplemental course for master's students in physical education teaching.

Prerequisite: KIN 3021.

KIN4012 - Curriculum Development in Physical Education

Credits: 3

Focuses on the design of K-12 school physical education programs. It provides opportunities to study alternative curriculum models, engage in the process of curriculum design, and examine policy and theoretical issues of concern to curriculum designers.

When Offered (Offered fall semester)

Former Course Number [PEPR 4012]

Prerequisite: grade of C or better in KIN 3011, KIN 3015 and KIN 4080.

KIN4013 - School Administration for the Health Sciences

Credits: 2

Provides teaching majors with information about staff-administrator relationships in school settings. Topics include principles of leadership, school organization and culture, legal issues, financial issues, building and facilities management.

Prerequisite: grade of C or better in KIN 3011, KIN 3015, KIN 4080.

KIN4015 - Internship Experience in Kinesiology

Credits: 1-12

Variable-credit (1-12) and S/U course required of Kinesiology and Health undergraduate majors to provide experiential learning in kinesiology and health in a real world setting. Intended to integrate theory and technique with practical application to expose students to areas of professional/career interest and assist with building professional careers. Must have CPR/ AED/1st Aid Certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed HLED 4015.

Former Course Number [PEPR 4015]

Prerequisite: Grade of C or better in KIN 3010;

KIN4016 - Research Experience in Kinesiology and Health

Credits: 1-6

Max Credit (Max. 6)

Offered to students who wish to gain a research experience in Kinesiology and Health. Meant for students who are interested in pursuing an advanced degree. Students may choose to complete KIN/ HLED 4016 instead of KIN/HLED 4015. Must have CPR/AED/1st Aid certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed HLED 4016.

Prerequisite: minimum sophomore standing; declared KHP major; permission of instructor; 2.750 GPA.

KIN4017 - Teaching Laboratory III

Credits: 3

Focuses on the application of teaching skills and the effective utilization of sport-based curricular and instructional models in the secondary public school setting.

When Offered (Offered fall semester)

Former Course Number [PEPR 4017]

Prerequisite: grade of C or better in KIN 3011, KIN 3015, and KIN 4080; 2.750 minimum cumulative GPA; concurrent enrollment in KIN 4012.

KIN4020 - Motor Behavior

Credits: 3

Provides undergraduate majors in kinesiology and health the foundation of motor learning and control theories to be applied to decisions related to the enhancement of human performance.

Prerequisite: C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; and 2.750 GPA.

KIN4024 - Physical Activity Epidemiology

Credits: 3

This course will examine physical activity from a public health perspective. Topics include study design, critical appraisal of research, assessment of physical activity, relationships between physical activity and health outcomes, and current issues in physical activity epidemiology.

Dual Listed KIN 5024.

Prerequisite: completion of KIN 3021 and minimum 2.750 GPA.

KIN4025 - Functional Movement Analysis

Credits: 3

Synthesize foundational kinesiology knowledge to analyze functional movement patterns and increase theoretical and practical knowledge necessary to obtain Functional Movement Screen certification. Integration of core kinesiology and biomechanics concepts to a human movement model. Opportunities and emphasis on basic fundamental movements and applying acquired

skills in practical experiences.

Prerequisite: Completion of KIN 3021 and minimum 2.750 GPA.

KIN4029 - Methods of Training and Conditioning

Credits: 3

Gives students knowledge and experience needed to develop and lead exercise training programs. Of interest to teachers, coaches and fitness leaders.

Former Course Number [PEPR 4029]

Prerequisite: Completion of KIN 3021 and minimum 2.750 GPA.

KIN4042 - Advanced Biomechanics

Credits: 3

Provides understanding of biomechanical theories and the application of biomechanical measurements to human movement in sports, training, and rehabilitation. Emphasis on using equipment to collect biomechanical data to answer research and clinical questions. Lecture and data collection topics include electromyography, force, balance, kinematics, and kinetics.

Prerequisite: C or better in KIN 3042, minimum 2.750 GPA.

KIN4055 - Adapted Physical Education

Credits: 2

Presents skills necessary to plan, implement and evaluate individualized physical education programs in the least restrictive environment. Acquaints students with current laws, characteristics, assessment instruments and nationally validated programs in physical education for the disabled child.

When Offered (Offered spring semester)

Former Course Number [PEPR 4055]

Prerequisite: KIN 3012.

KIN4056 - Advanced Exercise Testing and Prescription

Credits: 4

Teaches foundational electrocardiography to perform graded exercise stress tests (GXT), performance of GXT's to healthy and diseased populations based on a health appraisal assessment. Knowledge used to develop comprehensive exercise prescriptions, make metabolic calculations. Emphasis on how physical activity, nutrition/ weight management, and behavioral factors interact with exercise programming. Student must have CPR certification prior to first day of class.

Dual Listed KIN 5056.

Former Course Number [PEPR 4056]

Prerequisite: C or better in KIN 3021 and KIN 3010; and minimum 2.750 GPA.

KIN4062 - Applied Concepts in Human Aging

1255

Credits: 3

Designed to integrate and apply concepts acquired in core KIN and HLED courses (e. g. human physiology, exercise physiology, health promotion, etc.) to older/aging adults. Age-related pathologies will be presented and discussed.

Prerequisite: Completion of KIN 3010 and minimum 2.750 GPA.

KIN4065 - Resources in Adapted Physical Education

Credits: 2-3

Max Credit (Max. 3)

Offers flexible credit for students interested in pursuing intensive study of resources for adapted physical education. Required for state endorsement in Adapted Physical Education.

Former Course Number [PEPR 4065]

Prerequisite: grade of C or better in KIN 4055.

KIN4068 - Athletic Training Clinical V

Credits: 3

Provides clinical and field experience for the athletic training student. Skill and knowledge learned in KIN 3052 and KIN 3058 are applied in the clinical and field settings.

Prerequisite: KIN 3058 and 3078; concurrent enrollment in KIN 4052; minimum GPA of 2.500.

KIN4074 - Field Studies in (TOPIC)

Credits: 1-6

Offered only through distance education. Flexible course to accommodate students completing discipline specific and/or interdisciplinary program field studies experiences, e. g. , athletic performance, health/fitness application, minor in Outdoor Leadership, National Outdoor Leadership School programs.

Cross Listed HLED 4074.

Former Course Number [PEPR 4074]

KIN4075 - Assessment in Adapted Physical Education

Credits: 3

Designed to provide an overview of the assessment process in adapted physical education. Developmentally and disability appropriate psychomotor assessments and procedures for administering them are examined.

Prerequisite: grade of C or better in KIN 4055 and KIN 4080.

KIN4080 - Assessment in Physical Education

Credits: 3

Provides prospective teachers with a thorough knowledge of learner assessment as applied to physical education K-12.

When Offered (Offered spring semester)

USP Code [WC<>COM3]

Former Course Number [PEPR 4080]

Prerequisite: grade of C or better in KIN 3012.

KIN4086 - Honors Seminar

Credits: 2

Independent study. Consists of in-depth application of experimental techniques and materials to appropriate academic areas which directly support students' majors.

Former Course Number [PEPR 4086]

Prerequisite: Junior standing; ; 3.000 cumulative GPA; declared KHP or PHET major; and participation in UW Honors Program.

KIN4090 - Foundations of Coaching

Credits: 3

Coaches must be effective teachers, trainers, fund-raisers, recruiters, motivators, administrators, and counselors. The major purpose of this course is to provide future coaches with current information about the eight domains of essential coaching skills identified in the NSSC. These domains include philosophy and ethics, safety and injury prevention, physical conditioning, growth and development, teaching and communication, sport skills and tactics, organization and administration, and evaluation.

Dual Listed KIN 5090.

Former Course Number [PEPR 4090]

Prerequisite: sophomore status and 2.500 cumulative GPA.

KIN4097 - Individual Problems

Credits: 1-3

Provides flexible credit for juniors and seniors who wish to undertake intensive study of a special problem in physical education or kinesiology & health.

Former Course Number [PEPR 4097]

Prerequisite: Declared KHP or PHET major; junior standing; and 2.750 GPA.

KIN4099 - Student Teaching in Physical Education

Credits: 1-16

Student teaching is the culminating experience required of all students in teacher education for graduation and recommendation for certification. Consists of full-time assignment of 16 weeks in an approved school station in Wyoming under supervision of an experienced, approved supervising teacher.

Former Course Number [PEPR 4099]

Prerequisite: grade of C or better in KIN 4017.

KIN4900 - Topics in:

Credits: 1-3

Max Credit (Max. 9)

The study of current topics not included in more formal course offerings in kinesiology and health.

Prerequisite: KIN 3021.

KIN5011 - Understanding Variation of Human Movement

Credits: 3

Reconceptualize the variability of human movement using dynamical system theory as a new theoretical interpretations to the role of variability in motor behavior. Demonstrates how an understanding of variability can enhance the practice of educators, teachers, coaches, physiotherapists, and developmental specialists.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5013 - Spectrum of Teaching Styles

Credits: 3

Explores the range of teaching styles and the appropriateness of their uses.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5014 - Teaching Tactics in Sport-Based Physical Education

Credits: 3

Introduces students to the instructional strategy of the Tactical Games Approach (Mitchell, Oslin, & Griffin, 2006) of teaching sport-based activities in physical education. Emphasis is on planning, implementing, assessing and evaluating the tactical approach within the K-12 physical education context.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5015 - Instructional Models for Physical Education

Credits: 3

This course will introduce students to model-based instruction for physical education (Metzler, 2011). Emphasis will be placed on analyzing, planning, and implementing various instructional models within a K-12 physical education context.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5016 - Analysis and Supervision of Teaching in Physical and Health Education

Credits: 3

Introduces various evaluative and supervisory techniques which are designed to improve teaching effectiveness and student learning. Emphasis will be placed on utilizing various strategies of evaluation in instructional settings.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5018 - Psychology of Teaching Physical Education

Credits: 3

Weaves together theory, research, and practical information related to the psychological aspects of teaching physical education. It shows how you can use psychological principles and strategies to manage behavior, motivate students, achieve program goals, and establish a positive learning environment.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5024 - Physical Activity Epidemiology

Credits: 3

This course will examine physical activity from a public health perspective. Topics include study design, critical appraisal of research, assessment of physical activity, relationships between physical activity and health outcomes, and current issues in physical activity epidemiology.

Dual Listed KIN 4024.

Prerequisite: KIN 3021, graduate standing in KIN or permission of instructor.

KIN5033 - Understanding of Variability in Humans

Credits: 3

This course is designed to re-conceptualize the variability of human movement. Using dynamical system theory, a new theoretical interpretation to the role of variability in motor behavior will be discussed to offer insights into the nature and role of variability observed at different levels of movement analysis.

Prerequisite: graduate standing with experience of taking undergraduate courses in Motor Behavior, Cognitive Psychology, Sport Psychology, or Coaching.

KIN5034 - Lifespan Growth and Psychomotor Development

Credits: 3

Takes a scholarly approach to the subject of psychomotor development, with particular emphasis on the theoretical and scientific examination of motor behavior as it changes over time. Emphasis is placed on observing movement and analyzing changes in it.

Prerequisite: graduate standing in KIN and C or better in KIN 3034 or permission of instructor.

KIN5035 - Sociology of Sport

Credits: 3

Study of the social aspects of sport and play. Includes concepts, research studies, and theories related to such topics as politics, economics, crowd behavior, religion, sexual identity and gender, and ethical and moral values related to sport.

Prerequisite: graduate standing in KIN and a general sociology course.

KIN5038 - Advances in Research on Sport Expertise

Credits: 3

Examines the science behind the skill acquisition in sport and explores the application of science to optimal training for achieving and retaining elite performance. Different theories will be compared to reveal how "perfection" is made by "practice."

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5039 - Perception and Action in Motor Skills

Credits: 3

For graduate students who have general interest in understanding how the human perceptual system is coping with the human action system in performing skilled motor tasks. An overview of the existing theories and studies in the field will be provided with sufficient breadth and depth.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5041 - Advanced Exercise Physiology

Credits: 3

This class will study exercise physiology with emphasis on current research. The goal is to provide deeper physiological knowledge through in-class lectures, out-of-class readings and projects. Following class, individuals should be more comfortable with understanding and applying concepts to their own line of research.

Prerequisite: Graduate standing with experience in undergraduate courses in biology, exercise physiology, biochemistry, and/or sport nutrition.

KIN5046 - Applied Biomechanics and Programming

Credits: 3

Understand advanced biomechanical theories and utilize MATLAB programming to perform signal process and calculate 3-dimensional ground reaction force, center of pressure, electromyography, and 2-dimensional and 3-dimensional kinematics and kinetics. Emphasize on computational biomechanics and code writing in MATLAB.

Prerequisite: C or better in KIN 3042; graduate standing in KIN or permission of instructor.

KIN5047 - Biomechanics in Sports

Credits: 3

Understand the biomechanics of selected sports and the procedures to perform biomechanical analysis of sports techniques.

Understand the characteristics of different loadings and their effects on human bodies and the biomechanical mechanisms of sports injuries.

Prerequisite: C or better in KIN 3042; graduate standing in KIN or permission of instructor.

KIN5056 - Advanced Exercise Testing and Prescription

Credits: 4

Teaches foundational electrocardiography to perform graded exercise stress tests (GXT), performance of GXT's to healthy and diseased populations based on a health appraisal assessment. Knowledge used to develop comprehensive exercise prescriptions, make metabolic calculations. Emphasis on how physical activity, nutrition/weight management, and behavioral factors interact with exercise programming. Student must have CPR/AED/1st Aid certification prior to first day of class.

Dual Listed KIN 5056.

Prerequisite: C or better in KIN 3021 and KIN 3010; graduate standing in KIN; or permission of instructor.

KIN5062 - Applied Concepts in Human Aging

Credits: 3

Designed to integrate and apply concepts acquired in core KIN and HLED courses (e. g. human physiology, health promotion, etc.) to older/aging adults. Age-related pathologies are presented and discussed.

Dual Listed KIN 4062.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5080 - Investigations in Kinesiology and Health

Credits: 1-3

Max Credit (Max. 3)

Designed to develop Master of Science level graduate students into critical consumers of research. An additional purpose is to develop research skills to the level necessary to complete a master of science Plan B paper.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5085 - Research Methods

Credits: 3

Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5086 - Qualitative Research Methods

Credits: 3

This course presents students with an introduction to qualitative research methods, designs, and analysis. This involves: creation of purpose statement and research questions, development of designs, hands-on data collection, data analysis, and writing up qualitative studies. Issues related to trustworthiness, ethics, credibility, and transferability of qualitative research will be addressed.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5090 - Foundations of Coaching

Credits: 3

Coaches must be effective teachers, trainers, fund-raisers, recruiters, motivators, administrators, and counselors. The major purpose of this course is to provide future coaches with current information about the eight domains of essential coaching skills identified in the NSSC. These domains include philosophy and ethics, safety and injury prevention, physical conditioning, growth and development, teaching and communication, sport skills and tactics, organization and administration, and evaluation.

Dual Listed KIN 4090.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5097 - Individual Problems

Credits: 1-3

Max Credit (Max. 6)

Provides flexible credit for students who wish to undertake intensive study of a special problem identified in a regular class.

Cross Listed HLED 5097.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5536 - Sport Psychology

Credits: 3

Examines theoretical, research, and professional issues in contemporary sports psychology. Basic research design, including quasi-experimental design are covered, particularly to discuss the outcome studies or proposed applications such as imagery and hypnosis. Development of applied sport psychology and proposed interventions with sport behavior are viewed in relation to the development of these approaches, related training issues and outcome research. Identical to PSYC 5536.

Prerequisite: B or better in KIN 3037; graduate standing in KIN, or permission of instructor.

KIN5537 - Exercise Psychology

Credits: 3

Focuses on key conceptual issues and research in exercise psychology and the application of research findings in a variety of physical activity settings. Specific content areas include psychological benefits of physical activity, exercise adherence, public health and exercise issues, theory, and determinants of physical activity, interventions for adoption and maintenance, and professional ethics.

Prerequisite: graduate standing in KIN and B or better in KIN 3038 or permission of instructor.

KIN5586 - Seminar

Credits: 1-6

Max Credit (Max. 8)

Graduate students in kinesiology and health work intensively on current issues and problems, and may pursue specific areas of emphasis. Although a total of 8 hours is permitted under this number, only 6 hours are allowed by the Division of Kinesiology and Health toward a student's graduate program.

Cross Listed HLED 5586.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5587 - Special Problems

Credits: 1-6

Max Credit (Max. 9)

Provides a broad perspective through selected reading material and wherever possible the student collects and uses original information in practical school situations. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of the project.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy in KIN.

KIN5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy in KIN.

KIN5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

KIN5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing in KIN or permission of instructor.

Land Surveying

LS2010 - Engineering Surveying Lecture

Credits: 2
Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Basic principles of surveying and map making.

Former Course Number [CE 2072]

Prerequisite: a working knowledge of algebra and trigonometry.

LS2015 - Engineering Surveying Laboratory

Credits: 1

Field surveying activities consisting of traversing, differential leveling, construction staking and gathering topographic data.

Former Course Number [CE 2073]

Prerequisite: LS 2010 or concurrent.

LS2020 - GPS for Land Surveyors

Credits: 4

From fundamental theory to practical application and advanced technologies, this class covers all aspects of GPS needed to understand and use GPS as a land surveyor including the basics of GPS technology, common hardware, surveying methods, survey design, planning and observing, real-time kinematics and DGPS.

Former Course Number [CE 2090]

Prerequisite: LS 2400.

LS2100 - Records Research for Surveyors

Credits: 3

Introduced to the public, quasi-public, and private depositories of recorded and non-recorded documents that establish land ownership boundaries, easement boundaries, and land use rights and restrictions in both the Public Land Survey System and the Colonial States. Assignments will require work to be conducted during depositories' normal business hours.

Former Course Number [CE 2076]

LS2110 - Real Property Law

Credits: 3

Covers all major areas of real property law, including the nature of real property, types of ownership, real estate contracts, title and insurance, financing, landlord and tenant, land use, environmental law and regulation. An understanding of real property law is fundamental to understanding boundary law.

Former Course Number [CE 2050]

LS2400 - Basic Geodesy for Today's Land Surveyor

Credits: 2

The history of geodesy including measurement techniques, coordinate systems, ellipsoids, and datums is reviewed. The modern geodetic and Cartesian coordinates systems, as well as the differences between grid and ground coordinates systems, and the current geodetic and Cartesian coordinate systems available today are discussed.

Former Course Number [CE 2089]

Prerequisite: CE 2070 or LS 2010.

LS2410 - GIS in Surveying

Credits: 3

Covers the basic concepts of geographic information systems, the methods and software used to implement them, and their applications to surveying and analysis of other surveying problems.

Former Course Number [CE 2083]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS2499 - Sophomore Land Surveying Topics

Credits: 1-6

Max Credit (Max. 6)

A study of current sophomore land surveying problems that are applicable to land surveying for small group classes.

Prerequisite: Approval of the Land Surveying Program director.

LS3100 - Real Property Descriptions

Credits: 2

Historical and current issues for land description writing and usage for the practicing surveyor. Relationship between written descriptions and field survey data, interpreting old descriptions and the structure principles of description.

Former Course Number [CE 2088]

Prerequisite: CE 2070 or LS 2010, and LS 2100 and LS 2110.

LS3110 - Boundary Evidence

Credits: 2

A practical and working guide to understanding survey evidence and the laws of boundary location for efficient, accurate boundary determination. This material aids in the elimination of errors in location of land boundaries. The surveyor's liability and statutes of limitations are explored in depth. Also included are discussions of the surveyor's role in court. Normally offered only through the Outreach School.

Former Course Number [CE 3750]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3120 - Boundary Principles

Credits: 2

This course in boundary law addresses the fundamental principles of real property as applied to land surveying and related professions. Discussion and applications center on practical situations and concepts commonly encountered while conducting boundary surveys and the determination of the extent of ownership rights. Students explore the scope of the surveyors' judiciary role in real property ownership. Primarily offered through the Outreach School.

Former Course Number [CE 3740]

Prerequisite: CE 2070 or LS 2010, and LS 3100 and LS 2110.

LS3130 - Public Land Surveys

Credits: 3

Basic fundamentals of the Public Land Survey System (PLSS), dependent and independent resurveys, survey plats, "bona fide rights", riparian boundaries, non-rectangular entities, corner evidence and the role of the modern day surveyor.

Former Course Number [CE 2085]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3200 - Route Surveying

Credits: 3

Laying out of super elevation and circular, parabolic, and spiral curves; the difference between highway and railway horizontal curve geometry; offsets to spiral curves as boundaries; area and volumes of earthwork.

Former Course Number [CE 3710, CE 4710]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3210 - Advanced Surveying

Credits: 4

Advanced topics in surveying computations and procedures, including traverse error analysis, topographic surveying, mapping, astronomical observations, coordinate geometry applications, and state plane coordinates.

Former Course Number [CE 3720, CE 4720]

Prerequisite: CE 2070 or LS 2010.

LS3230 - Applied Least Squares Adjustments

Credits: 4

The use of applied statistics in land surveying, error propagation in polygon and link traverses, discussion of positional tolerances and an introduction to least squares adjustments using StarNet and VectorNT software.

Former Course Number [CE 3760]

Prerequisite: CE 3720 or LS 3210.

LS3300 - Ethics for the Professional Surveyor

Credits: 1

Introduction to the common ethical and moral issues facing professional surveyors in modern practice.

Former Course Number [CE 2074]

Prerequisite: One of LS 3110 or LS 3120 or LS 3130.

LS3400 - Remote Sensing/Photogrammetry for Surveyors

Credits: 3

Procedures and methods used for deriving metric information from photographs, analog processes for using aerial photographs in production of topographic maps, flight planning, and cost estimation in aerial mapping work. Introduction to photocoordinate measurement devices and their calibration. Mathematics of modern photogrammetry.

Former Course Number [CE 4750]

Prerequisite: CE 2070 or LS 2010.

LS3500 - Junior Surveying Topics

Credits: 1-6

Max Credit (Max. 6)

A study of current junior landsurveying problems that are applicable to land surveying for small group classes.

Prerequisite: Approval of the Land Surveying Program director.

LS4110 - Coastal Water Boundaries

Credits: 3

The physical and legal issues involved with property rights of lands abutting tidal waters, a review of the Public Land Survey System, the Submerged Lands Act and the Swamp and Overflowed Lands Act. Includes case law research.

Former Course Number [CE 4700]

Prerequisite: LS 3110, LS 3120.

LS4120 - Inland Water Boundaries

Credits: 3

Introduces the physical and legal issues involved in locating property rights associated with lands that abut non-tidal, navigable and non-navigable rivers and lakes. The property rights which attach to, as well as the limitations placed on these riparian parcels will be examined and discussed with respect to statutory, administrative and case law.

Prerequisite: LS 4110.

LS4130 - Advanced Public Land Surveys

Credits: 4

Advanced topics in situations and problems in the Public Land Survey system, with discussion of major court cases involving everyday applications to surveyors. 1975 BLM casebook and other sources of survey reference.

Former Course Number [CE 2086, CE 4740]

Prerequisite: LS 3120 and LS 3130.

LS4500 - Senior Land Surveying Topics

Credits: 1-6

Max Credit (Max. 6)

A study of current senior land surveying problems that are applicable to land surveying for small group classes.

Prerequisite: Approval of the Land Surveying Program director.

Language

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

LANG1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

LANG2030 - Third Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010, LANG 1020.

LANG2040 - Fourth Semester in: (TOPIC)

Credits: 3

Max Credit (Max. 12)

Encompasses formal grammar introduction and review; periodic composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP Code [(none)<>H]

Prerequisite: Satisfactory completion of corresponding study in LANG 2030.

LANG2150 - Manga: History and Culture

Credits: 3

Manga is one of the most important art forms to emerge from Japan. Its importance as a medium of visual culture and storytelling cannot be denied. Through reading and examination of texts, students will understand the relevance of comics in Japanese society.

USP Code [(none)<>COM2]

Prerequisite: COM1.

LANG3105 - Major Themes in Chinese and Japanese Literature

Credits: 3

Explores mindsets of two rich and ancient civilizations, China and Japan. Considers distinctive characters of each civilization, while illuminating basic elements that we share with these peoples.

Prerequisite: ENGL 1010.

LANG3140 - Anime: History and Culture

Credits: 3

An introduction to the history, development, and cultural significance of Japanese animation. Through the examination of a variety of anime genres, students will gain insight into contemporary Japan as well as important historical periods. We will read analyses of particular anime, emphasizing the unique characteristics of the art and the mystery of its popularity in the US.

USP Code [G,WB<>(none)]

Prerequisite: completion of WA.

LANG4485 - Latin Diaspora: Comparative History of US

Credits: 3

History of U. S. Latino peoples including Mexican Americans, Puerto Ricans, Cubans, Dominicans, Central Americans, South Americans and Spaniards. Historical context, origins, development of Latin American national, cultural identities, regional characteristics, immigration; nativist responses; assimilation, cultural continuity and change. Similarities, general patterns and differences, Hispanic and Pan Latino identities and probable future trends.

Prerequisite: HIST 2370 or HIST 2380 or LTST 1100.

LANG4785 - Linguistics, Language Teaching and Social Context

Credits: 3

Introduces prospective teachers of English as second language to the basic components of language and to the social aspects of human language use. Explores a variety of concepts about language: how it is used and perceived, how languages change, how diverse cultures respond to such changes.

Cross Listed ENGL 4785.

Prerequisite: WB.

LANG4800 - Advanced Instruction In: (TOPIC)

Credits: 1-3
Max Credit (Max. 12)

Advanced study and projects designed to meet special needs and interests of students, to be selected in consultation with a suitable member of the faculty.

Prerequisite: consent of instructor.

LANG4975 - Independent Study In: (TOPIC)

Credits: 1-3
Max Credit (Max. 12)

Further work in a less commonly taught language, for students who have at least four semesters of study or comparable proficiency.

Prerequisite: LANG 2040 or equivalent.

LANG5300 - Advanced Linguistics

Credits: 3
Data is offered to provide the opportunity to analyze phonological, morphological, and syntactic materials from languages throughout the world. Attention is given to the limits within which these aspects of human language appear to vary.

Prerequisite: ANTH/ENGL/ LANG 4750.

LANG5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

LANG5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

Latin

LATN1010 - First Year Latin I

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered fall semester)

USP Code [(none)<>H]

LATN1020 - First Year Latin II

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered spring semester)

USP Code [(none)<>H]

Prerequisite: LATN 1010 or equivalent.

LATN2030 - Second Year Latin

Credits: 4

Reading simple texts, short stories and dramas, as well as grammar review and conversation.

When Offered (Offered fall semester)

Prerequisite: LATN 1020 or equivalent.

LATN3110 - Vergil, The Aeneid I

Credits: 3

Reading portions of the Aeneid and consideration of its literary interpretation.

Former Course Number [2110]

Prerequisite: LATN 2030 or equivalent.

LATN3120 - Vergil, The Aeneid II

Credits: 3

Reading further portions of the Aeneid and consideration of its literary interpretation.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [2120]

Prerequisite: LATN 3110.

LATN3140 - Caesar

1272

Credits: 2

Acquaints students with war-memoir genre of Latin literature.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3150 - Livy

Credits: 3

Reading portions of Livy's historical works, and consideration of the history he covers and how the Romans viewed their past.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3160 - Ovid

Credits: 2

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3990 - Independent Study

Credits: 1-4

Books or texts of special interest to the student, selected in conjunction with the instructor; independent reading and reports.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4110 - Horace

Credits: 3

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4115 - Latin Philosophers

Credits: 3

An introduction to Latin philosophical traditions. Readings will be selected either from one author, such as Lucretius (ca. 99-55 BCE) or Seneca the Younger (ca. 4 BCE-65 CE), or from different authors about a given theme.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4120 - Catullus and the Elegiac Poets

Credits: 3

Discusses Latin lyric poetry of late Republic and early Empire, excluding works of Horace and Ovid, and elegiac tradition in

1273

Latin.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4130 - Cicero

Credits: 3

Introduction to the prose of the statesman Marcus Tullius Cicero (106-43 BCE). Readings will be selected from his political speeches, correspondences, or treatises on philosophical, rhetorical, and religious topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

Latina/o Studies

LTST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed GWST 1030/NAIS 1030/AAST 1030/AMST 1030.

USP Code [I,D<>(none)]

Former Course Number [CHST 1030]

Note: Enrollment preference will be given to We The People FIG students.

LTST1100 - Introduction to Chicano Studies

Credits: 3

Provides a basic understanding of the historical, social, and cultural context of the Mexican American Chicano people. Examines the major theoretical and conceptual frameworks which explain the Mexican American Chicano experience. Examines the comparative relations with other groups and major social and policy issues. Provides an introduction to the conduct of research in field.

USP Code [CS,D<>(none)]

Former Course Number [CHST 1100]

LTST1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

Former Course Number [CHST 1101]

LTST1300 - Introduction to Latina/o Studies

Credits: 3

The U. S. Latina/o immigrant experience is a particular focus of this course, including its role in the incorporation of Latinos into U. S. society. Through readings, presentations, class discussion, videos, and other activities, students examine historical and contemporary issues affecting Latinos including but not limited to immigration, language, identity, national origin, education, politics, employment, and economic mobility.

USP Code [(none)< >H]

Former Course Number [CHST 1300]

LTST2060 - Special Topics in:

Credits: 3

Former Course Number [CHST 2060]

LTST2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanismo. Studies literature of the Hispanic Southwest, Mexican American folklore and the Chicano and post-Chicano movement.

Cross Listed ENGL 2360.

USP Code [CH,D< >H]

Former Course Number [CHST 2360]

Prerequisite: WA.

LTST2370 - Chicano History : Origins to 1900

Credits: 3

General survey that traces the geographic distribution and historical processes that have shaped the life experiences, socio-economic development and cultural contributions of peoples of Mexican descent in the United States from their indigenous and Hispanic origins to the end of the 19th century. Cross list with GEOG 2370/HIST 2370.

USP Code [CS,D< >H]

Former Course Number [CHST 2370]

LTST2385 - Chicano History: 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed HIST 2385.

USP Code [(none)< >H]

Former Course Number [CHST 2385]

LTST3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed SPAN 3080.

USP Code [(none)<>H]

Former Course Number [CHST 3080]

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

LTST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/Chicana studies.

Cross Listed GWST 3200.

USP Code [D<>H]

Former Course Number [CHST 3200]

Prerequisite: LTST 1100 or junior standing.

LTST3560 - Chicano Community Organizations

Credits: 3

Introduction to the origins, development and contemporary status of community organizations and service agencies in the Mexican American community in general and in the Wyoming and Rocky Mountain regions.

Former Course Number [CHST 3560]

Prerequisite: LTST 1100.

LTST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST 3800/GWST 3800.

USP Code [CS,D<>(none)]

Former Course Number [CHST 3800]

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

LTST4100 - U.S. Latina/o Theater

Credits: 3

Designed to provide an overview of United States Latina/o Theater. Through a variety of delivery methods, students are instructed on the various categories that directly impact U. S. Latina/o Theater such as political theatre, gay/lesbian theatre, border issues, race, class, gender, and sexuality.

Cross Listed WMST 4100.

Dual Listed LTST 5100.

USP Code [CA,D<>(none)]

Former Course Number [CHST 4100]

Prerequisite: 6 hours of LTST or WMST.

LTST4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed ENGL 4470.

USP Code [CH,D<>H]

Former Course Number [CHST 4470]

Prerequisite: LTST 1100 and WA.

LTST4485 - USLatino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U. S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives responses are stressed.

Cross Listed HIST 4485/INST 4485.

Former Course Number [CHST 4485]

Prerequisite: 9 hours of LTST, HIST, and/ or INST related coursework.

LTST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century, especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U. S. , incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed HIST 4496.

When Offered (Normally offered fall semester)

Former Course Number [CHST 4496]

Prerequisite: 9 hours of HIST or INST.

LTST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/INST 4650/GWST 4650.

Dual Listed LTST 5650.

Former Course Number [CHST 4650]

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

LTST4675 - U.S. Women of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/GWST 4675.

USP Code [D<>(none)]

Former Course Number [CHST 4675]

Prerequisite: junior standing and/ or a combination of 3-6 hours of any level of LTST, WMST, or AAST coursework.

LTST4975 - Independent Studies

Credits: 1-3

Max Credit (Max 6)

Independent study in Chicano studies research.

Former Course Number [CHST 4975]

Prerequisite: junior standing.

LTST4990 - Topics in Chicano Studies

Credits: 1-3

Max Credit (Max 6)

A special topics course through which regular and visiting faculty can explore regarding specialized or new research topics regarding Chicano studies.

Former Course Number [CHST 4990]

Prerequisite: junior standing.

LTST5100 - U.S. Latina/o Theater

Credits: 3

Designed to provide an overview of United States Latina/o Theater. Through a variety of delivery methods, students are

instructed on the various categories that directly impact U. S. Latina/o Theater such as political theatre, gay/lesbian theatre, border issues, race, class, gender, and sexuality.

Cross Listed WMST 5100.

Dual Listed LTST 4100.

USP Code [CA,D< >(none)]

Former Course Number [CHST 5100]

Prerequisite: 6 hours of LTST or WMST.

LTST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 5650/INST 5650/GWST 5650.

Dual Listed LTST 4650.

Former Course Number [CHST 5650]

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

Law

LAW6110 - Contract I

Credits: 3

Max Credit (Max. 3)

A study of the elements of simple contracts, including offer and acceptance, consideration, conditions, defenses, and damages. The impact of the Uniform Commercial Code on contracts is considered.

LAW6120 - Property I

Credits: 3

Max Credit (Max. 4)

Covers two general areas. The first area is the rights that define property ownership, in relation to neighbors, the world, and others with interests in the property. Subjects include rights to use the land and its products, estates, concurrent ownership, and landlord-tenant law. The second area is private limitations on those rights, in the form of covenants and easements.

LAW6130 - Torts I

Credits: 4

Max Credit (Max. 4)

Study of the methods and policies for allocating risks of harm; intentionally inflicted harms; negligence in its general aspects and

its application to products liability, landowners, and automobile traffic; emotional harms; defamation; and fraud. Principal areas of coverage typically include wrongful death, defenses, vicarious liability, strict liability, nuisance, products liability and defamation. If time permits we will also cover privacy, misrepresentation and other topics.

LAW6140 - Criminal Law

Credits: 3

Max Credit (Max. 3)

The sources of criminal law and the purposes of criminal punishment, the constituent parts of criminal conduct, including act (or omission), culpable mental state, result, and causation. These general principles are brought to bear on homicide and sexual assault. Also considers common defenses to criminal charges, including self-defense, necessity, duress, insanity, and intoxication. Students are required to consider the constitutional limits of the criminal law and the relationship of substantive principles to practice.

LAW6150 - Judicial Remedies

Credits: 3

Max Credit (Max. 3)

LAW6160 - Legal Writing I

Credits: 3

Max Credit (Max. 3)

In this course students are introduced to the fundamentals of legal reasoning and analysis and the basics of legal writing.

LAW6165 - Legal Research

Credits: 1

Max Credit (Max. 1)

Introduction to paper and electronic resources that cover primary & secondary legal materials, including case law, statutes, agency regulations for federal and state jurisdictions, & treatises, journals, restatements, and other secondary sources. Discusses research plans and develops brief research strategies for hypothetical situations.

LAW6166 - Interview, Counseling and Negotiation

Credits: 3

Introduction to the basic lawyering skills of interviewing, fact investigation, counseling, and negotiation. Employs simulation exercises, self-critiques, and feedback from the faculty member as well as other students. In addition to the exercises, exposure to the theoretical underpinnings of the skills and examine some of the ethical issues involved in creating and maintaining professional relationships with clients and opposing parties and counsel.

LAW6210 - Contracts II

Credits: 2

Max Credit (Max. 2)

A study of the elements of simple contracts, including offer and acceptance, consideration, conditions, defenses, and damages. The impact of the Uniform Commercial Code on contracts is considered.

LAW6220 - Property II

Credits: 2

Max Credit (Max. 2)

First covers some private and public limitations on owners' property rights, primarily easements and zoning. The rest of the semester deals with acquiring ownership rights, possession and transfers, including the law relating to deeds and titles.

LAW6240 - Civil Procedure I

Credits: 3

Max Credit (Max. 3)

A study of modern practice in civil cases under Rules of Civil Procedure and other sources of procedural law. Civil Procedure I and its continuation, Civil Procedure II, cover all aspects of jurisdiction and other issues bearing on what court(s) may hear a case; choice of state or federal law; pleading; joinder of claims and parties; class actions; discovery and other pre-trial procedures; summary judgment; non-jury and jury trials; appeals; and claim and issue preclusion.

LAW6250 - Constitutional Law I

Credits: 3

Max Credit (Max. 3)

Constitutional Law I is divided into two parts. Part I focuses on governmental structures. Part II begins our coverage of individual rights and liberties. Part I's coverage includes the power of judicial review, separation of powers, federalism, and congressional powers. Part II focuses on equal protection.

LAW6260 - Legal Writing II

Credits: 2

Max Credit (Max. 2)

This course builds on the first semester Legal Writing course by introducing students to: (1) more sophisticated aspects of legal reasoning, analysis and legal research; (2) the basics of persuasive legal writing; (3) the basics of appellate procedure and an appellate brief; and (4) the basics of oral advocacy.

LAW6310 - Business Organizations

Credits: 3

Max Credit (Max. 3)

Studies the law of agency relationships and business associations including partnerships, limited liability companies and corporations. Also considers the protection afforded investors by federal securities law. Listing of the above items is not intended to be all inclusive. Students are invited to consult with the instructor regarding specific information.

LAW6320 - Income Taxation

Credits: 3

Max Credit (Max. 3)

Focuses on the federal taxation of individuals. It includes taxation of compensation, installment sales as well as taxation of gains on property transfers.

LAW6330 - Trusts and Estates

Credits: 3

Max Credit (Max. 3)

A survey course that also serves as an introduction to Estate Planning. Covers the law of wills, trusts, and intestate succession. It also includes execution and revocation of wills; creation, modification, and termination of trusts; problems of construction; restrictions on testate transfers, transfers in trust and future interests. Covers some aspects of fiduciary administration, but not taxation. A prerequisite for Estate Planning.

LAW6340 - Civil Procedure II

Credits: 2

Max Credit (Max. 2)

A study of modern practice in civil cases under Rules of Civil Procedure and other sources of procedural law. Civil Procedure I and its continuation, Civil Procedure II, cover all aspects of jurisdiction and other issues bearing on what court(s) may hear a case; choice of state or federal law; pleading; joinder of claims and parties; class actions; discovery and other pre-trial procedures; summary judgment; non-jury and jury trials; appeals; and claim and issue preclusion.

LAW6350 - Constitutional Law II

Credits: 2

Max Credit (Max. 2)

Focus on constitutionally protected individual rights and liberties. Specifically, the following topics will be covered: substantive due process, including the right of privacy; procedural due process; freedom of expression; and religious freedom.

LAW6410 - Evidence

Credits: 3

Max Credit (Max. 3)

A study of the means by which any alleged fact is established or disproved, including competency of witnesses; direct examination; cross-examination and impeachment; privileges; basic and special issues of relevancy; the hearsay rule and its exceptions; real, demonstrative, and documentary evidence; opinion and scientific evidence; judicial notice; and the responsibility of proof.

LAW6420 - Professional Responsibility

Credits: 3

Max Credit (Max. 3)

A study of the duties of attorneys to their clients and the public under the Model Rules of Professional Conduct and case law.

LAW6510 - Administrative Law

Credits: 3

Max Credit (Max. 3)

A review of administrative law practice and procedure, primarily at the federal level. The course begins with materials on the nature and function of administrative agencies. Agency rulemaking power, emphasizing federal and state Administrative Procedure Act (APA) requirements. Considers the adjudicative powers of administrative agencies, including an agency's obligation to afford persons due process of law. Finally, the course examines judicial review of administrative agency decisions.

LAW6530 - American Legal History

Credits: 3

Max Credit (Max. 3)

A study of the life of John Marshall, Chief Justice of the United States from 1801 until 1835.

LAW6540 - Antitrust

Credits: 3

Max Credit (Max. 3)

The study of the federal laws regulating monopolies and restraints of trade. The substantive provisions of the antitrust laws are relatively brief

LAW6550 - Bankruptcy

Credits: 2

Max Credit (Max. 2)

A survey of the Federal Bankruptcy Act. Includes consideration of liquidation, reorganization, family farmers, debts of individuals, and the relationship of bankruptcy law and proceedings to Article 9 of the Uniform Commercial Code and the law of mortgages.

LAW6555 - Bioethics

Credits: 3

Analyzes the relationship between law and ethics in healthcare. Covers a wide range of contemporary issues such as euthanasia, assisted reproductions, and employee wellness programs. In addition to teaching substantive law, emphasizes critical thinking and provides students an opportunity to practice researching, writing, presenting, and delivering persuasive oral arguments.

LAW6560 - Business Planning

Credits: 3

Max Credit (Max. 3)

Focus is primarily on a problem involving several persons who are organizing a business entity. Consideration will be given to the characteristics of several kinds of business organizations and to making a judgment as to which organization should be used to house the business being set up. Considers tax and non-tax aspects with respect to business organizations.

LAW6565 - Civil Pretrial Practice

Credits: 3

Max Credit (Max. 3)

Includes the civil litigation process from the filing of a complaint and decisions related to the complaint, to discovery including written discovery and depositions, to pre-trial motions such as motions to change venue, to exclude evidence, and for summary judgment, to preparation for pre-trial conferences and trial. Sample cases provide the basis for the drafting of various discovery documents and motions. There will be no exam.

LAW6570 - Payment Systems

Credits: 3

Max Credit (Max. 3)

Focus on the use of negotiable instruments (such as checks, drafts, promissory notes, and certificates of deposit) to document debts and to make payments. Provides an overview of the banking system, the check collection process, and the use of various commercial instruments. Topics include liability for stolen checks, forged signatures, alterations, payment to impostors, insufficient funds, stop payment orders, post-dated checks, and restrictive endorsements. In addition, the rights of good faith purchasers are examined and the use of third parties (such as guarantors, sureties, and accommodation parties) to secure obligations are discussed.

LAW6600 - Consumer Protection

Credits: 3

Max Credit (Max. 3)

Covers three main topics: (1) the law of advertising and marketing; (2) consumer credit regulation; and (3) consumer warranty law.

LAW6615 - Taxation of Business Entities

Credits: 3

Max Credit (Max. 3)

Surveys the federal income tax consequences of major events in the existence of business entities and their owners including formations, contributions, operations, distributions, redemptions, and liquidations. Compares taxation of Subchapter C corporations, Subchapter S corporations, and partnerships. Students spend significant time on statutory interpretation and along the way consider policy issues that affect how the taxation of businesses is structured and enforced under the Internal Revenue Code.

LAW6620 - Bankruptcy Law

Credits: 3

Max Credit (Max. 3)

After briefly surveying state collection laws, considers the impact of federal bankruptcy law on secured and unsecured creditors. The primary focus of the course is on consumer bankruptcy under Chapter 7 (liquidations) and Chapter 13 (reorganizations). Concludes with an introduction to Chapter 11 (business reorganizations).

LAW6630 - Criminal Procedure

Credits: 3

Max Credit (Max. 3)

Examines the constitutional rights of criminal suspects and defendants under the 4th, 5th and 6th Amendments of the United States Constitution. Much of the focus is on law enforcement practices and the constitutional principles that constrain the police.

LAW6635 - Domestic Violence Law

Credits: 3

Max Credit (Max. 3)

Helps prepare students to take part in the Legal Services Program, which has been expanded to include a Domestic Violence Legal Assistance Project.

LAW6640 - Family Law

Credits: 3

Max Credit (Max. 3)

From marriage to divorce, property distribution, child custody and the termination of parental rights, explores the many areas and facets of family law with an eye toward providing students with a firm doctrinal grounding, while preparing them for what they will face as they enter into practice. In the context of this exploration we look closely at many of the cultural issues noted above, and the effects those issues are having not just on the family and the law related to the family, but on society as a whole.

LAW6645 - Children and the Law

Credits: 3

Max Credit (Max. 3)

Covers a range of children's issues, including: dependency; termination of parental rights; adoption, child custody and support; parental rights; and the juvenile justice system. It is suitable for students considering a career in child advocacy, or who have any interest in the subject of juvenile law.

Prerequisite: completion of first year of law school.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6665 - Education Law

Credits: 2

Study of law as it applies to public and private education in America, including federal and state regulation of education, constitutional rights of students and teachers, school financing, desegregation and affirmative action, and equal opportunity in education. Introduction to the most important legal issues relating to primary and secondary (K-12) education, and to a lesser extent issues concerning higher education.

LAW6670 - Estate Planning

Credits: 2

Max Credit (Max. 2)

Applies estate and gift tax principles in a survey of estate planning principles and techniques. Traditional estate planning tools including wills, trusts, and durable powers of attorney are discussed as well as post-mortem planning, administration issues, and planning for special situations, such as owners of closely held businesses, entrepreneurs, and the disabled.

LAW6675 - Gift and Estate Taxation

Credits: 2

Max Credit (Max. 2)

Focuses on the federal estate and gift tax consequences of wealth transfers. Students learn to analyze the federal estate and gift tax section of the Internal Revenue Code.

Prerequisite: income taxations, trusts and estates.

LAW6680 - Federal Courts

Credits: 3

Max Credit (Max. 3)

Examines the themes of separation of powers and federalism by scrutinizing the jurisdiction of the federal courts. Covers justiciability doctrines (standing, ripeness, and mootness), congressional power to control federal court jurisdiction, constitutional and statutory parameters of federal question jurisdiction, federal common law, basic contours of litigation under 42 U. S. C. 1983, state sovereign immunity and the Eleventh Amendment, and the various abstention doctrines.

LAW6685 - Health Law

Credits: 3

Introduces students to a wide variety of law governing health care. Study professional licensing and liability, institutional regulation and liability, EMTALA, ERISA, the Affordable Care Act, Medicare, Medicaid, and fraud and abuse laws. Provides a critical first step for students interested in specializing in health law and an overview for any general practitioner.

LAW6700 - Indian Law

Credits: 3

Max Credit (Max. 3)

Surveys the law that applies to Native Americans and tribal governments. Deals primarily with federal law because of the unique relationship between the federal government and tribes, which are sovereign entities, and because federal law controls most Native American activities. The main issues are jurisdictional; that is, they concern the allocation of legislative (or regulatory) and judicial (both civil and criminal) jurisdiction among federal, tribal, and state governments.

LAW6710 - Insurance Law

Credits: 2

Discussion of all types of insurance from the point of view of an attorney advising clients and of a consumer. It is relevant and important for those going into any aspect of the law as insurance is involved in most law from business to litigation to domestic to estate planning. Covers standard insurance policy language, as well as case law and practical ideas for dealing with insurance.

LAW6715 - Immigration Law

Credits: 3

Max Credit (Max. 3)

Practical approach to topics such as the standards for admission of immigrants; nonimmigrant visas for students, workers and tourists; regulation and exclusion of undocumented aliens; legal procedures for admission, exclusion and deportation; refugee law; and citizenship law. Additionally, legislative history and policy behind applicable legislation and case law is discussed.

Prerequisite: completion of the first year of law school.

LAW6720 - International Law

Credits: 3

Max Credit (Max. 3)

Covers international law in its classic sense--public international law, or "the law of nations" as it's referred to in the Constitution. Looks at topics such as the sources and evidence of international law, sovereignty, the relationship of international law to national law, the bases of national jurisdiction, the international use of force, human rights, etc. However, modern public international law also includes areas of more immediate interest to practicing lawyers, such as conflicts between nations over which one has the right to assert jurisdiction over certain activities, international extradition, and immunities from jurisdiction.

LAW6725 - Intellectual Property

Credits: 3

Max Credit (Max. 3)

Introductory overview of principles of intellectual property protection particularly trademark, copyright and patent law. USA law will be integrated into a comparative analysis of International intellectual property law.

LAW6730 - Jurisprudence

Credits: 3

Max Credit (Max. 3)

Examines American legal thought from the nation's inception through today. Discusses issues related to the nature of law, the nature of judicial decision making, the relationship between law and society, and the like.

LAW6735 - Native American Natural Resources Law

Credits: 3

Max Credit (Max. 3)

Examines federal and tribal law, (chiefly statutes, regulations, cases and treaties), governing environmental regulation and management of tribal land water minerals, fish and wildlife, and cultural resources. Explores the federal trust doctrine, aboriginal title, reserved rights, allotment, and the tribes-as-states-doctrine.

LAW6740 - Labor Law

Credits: 3

Max Credit (Max. 3)

Deals with labor law in the private sector. Surveys the establishment of a collective bargaining relationship between employers and unions, the subsequent negotiation of a collective bargaining agreement resulting from that relationship, the administration of that agreement through its grievance-arbitration provisions, and the economic weapons used by parties to various kinds of labor

conflicts.

LAW6745 - Employment Law

Credits: 3

Max Credit (Max. 3)

Examines a variety of laws, regulations and legal theories governing the workplace and the employment relationship. In particular we look at the at-will doctrine and its exceptions, rules affecting the establishment of the employment relationship and rules affecting the termination of the employment relationship.

LAW6750 - Law and Economics2

Credits: 2

Max Credit (Max. 2)

The use of microeconomic theory to assess the economic efficiency and equity consequences of alternate legal structures.

LAW6755 - Legislation

Credits: 3

Max Credit (Max. 3)

Examines how statutes are made and applied. Priorities are 1) legislative process in Congress and the state legislatures (especially Wyoming), and; 2) statutory interpretation tools and techniques.

LAW6760 - Local Government Law

Credits: 3

Max Credit (Max. 3)

Examines the organization, powers, responsibilities, liabilities and financing of units of local government, including counties, cities, school districts and other special districts. Interrelationships among local governments, the states and the federal government are studied. Leading judicial decisions as well as state and federal constitutional and statutory provisions will be assigned. Particular emphasis is placed on the law of Wyoming and other western states.

LAW6765 - International Business Transactions

Credits: 3

Max Credit (Max. 3)

Overview of international business transactions involving private entities engaged in global commerce. Examines legal framework associated with planning, implementation, and enforcement of international agreements concerning sale of goods, trade of services, and transfer of technology. Impact of relevant international organizations and emerging substantive international commercial law with social obligations of multinational enterprises.

Prerequisite: completion of first year of law school.

LAW6775 - International Human Rights

Credits: 3

Max Credit (Max. 3)

An examination of norms, institutions and problems relating to international human rights law. Addresses civil and political rights questions (including the expanded use of international criminal law as a means of enforcing universal values), social and economic rights (including access to medicines) and select group rights issues.

Prerequisite: completion of the first year law school curriculum.

LAW6790 - Oil and Gas

Credits: 3

Max Credit (Max. 3)

A study of the law regarding private property interests in oil and gas. Subjects include the acquisition, transfer, lease, and assignment of oil and gas interests; rules and contracts governing the relationships among surface owners, oil and gas lessors, oil and gas lessees, and neighboring owners; and government regulation.

LAW6800 - Public Lands

Credits: 3

Max Credit (Max. 3)

Examines the law governing management of the federal public lands/national parks, national forests, wildlife refuges, BLM lands, etc. Among other laws, we study NEPA, General Mining Law of 1872, Mineral Leasing Act of 1920, National Forest Management Act of 1976, Taylor Grazing Act, Federal Land Policy and Management Act, Endangered Species Act, and Wilderness Act. In addition to examining Congress' prescriptions for public land management and the constraints it has imposed on land managers, the course also explores how the public and politics influence public land policy and decision making.

LAW6810 - Real Estate Finance

Credits: 3

Max Credit (Max. 3)

Begins with some study of the law and practice relating to real estate transactions, deeds, and titles. The rest of the semester covers the law and practice relating to mortgages, foreclosure, and other financing issues in residential and commercial real estate transactions.

LAW6830 - Secured Transactions

Credits: 3

Max Credit (Max. 3)

Financial institutions and other businesses often take an interest in a debtor's personal property (such as goods, equipment, inventory and accounts) to secure payment of a debt or performance of an obligation. Deals with the law governing security interests in personal property which is embodied primarily in Article 9 of the Uniform Commercial Code.

LAW6840 - Securities Regulation

Credits: 3

Max Credit (Max. 3)

Considers the responsibilities and liabilities of a company and various persons involved in the public offering of securities, including the filing of a registration statement, and other disclosure matters. Deals with the definition of the term "security" and possible exemptions for securities offerings. Covers securities fraud under SEC Rule 10b-5 including, inter alia, insider trading. Corporate disclosure requirements in connection with matters such as proxy rules and in other contexts are also considered. Some attention is given to disclosure requirements in connection with mergers and acquisitions, takeovers, and tender offers.

LAW6850 - Trial Practice

Credits: 3

Max Credit (Max. 3)

Trial Practice is a rigorous learn-by-doing course designed to build courtroom skills. Through a combination of exercises, lectures, demonstrations, drills and complete trials, students are prepared to advocate before judges and juries. The first half of the course focuses on basic examination and exhibit skills, including direct, cross, redirect, making and responding to objections, and the introduction and use of real and demonstrative evidence. In the sixth week, students conduct bench trials. The second half of the course builds on the basic skills and covers advanced ones, including examination of expert witnesses, opening statement, closing argument and voir dire. Jury trials are conducted in the final two weeks.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

LAW6865 - Natural Resources Law

Credits: 3

Max Credit (Max. 3)

Comprehensive view of the general law governing natural and environmental resources. Students will learn to understand how our legal system has organized the various problems of allocation, use rights, duties and limitations, and governance, in the context of establishing rules governing human use of the earth's natural endowment.

Prerequisite: completion of first year of law school.

LAW6875 - Hazardous Waste and Water Pollution Law

Credits: 3

Max Credit (Max. 3)

Examines the Clean Water Act, Resource Conservation and Recovery Act, and the Comprehensive Environmental Response, Compensation, and Liability Act. These highly complex federal statutes, applicable nationwide either directly or via state-implemented programs, regulate pollution of water; govern industrial generation, handling, and cleanup of hazardous substances; and establish liability and enforcement standards.

LAW6880 - Criminal Adjudication

Credits: 3

Max Credit (Max. 3)

A study of the post-investigative phase of the criminal process: from charging decisions through sentencing and appeals. Topics covered include: the decision to prosecute; bail and pretrial release; grand jury and preliminary hearing practice; jury-related issues, such as pretrial publicity, Batson, and deliberative secrecy; criminal discovery; the role and responsibilities of defense counsel and of the prosecutor; defendants' rights to presence, confrontation, and to present a defense case; verdicts; sentencing and appeals.

LAW6885 - Law Office Management

Credits: 1

Max Credit (Max. 1)

This is a "how-to" course which introduces students to the law office as an operating business. This course covers various aspects of establishing and operating a law office, including: attorney timekeeping and client billing; establishing fees rates and fee agreements; revenue projections, record and file management and conflict management systems.

Prerequisite: completion of the first year law school curriculum.

LAW6890 - Land Use Law

Credits: 3

Max Credit (Max. 3)

Deals primarily with public methods of making decisions concerning the use and development of land. Land use decisions range from the issuance of building permits or variances to zoning to long-range planning. Examines tensions between private and public interests (private landowners, community residents, developers, business persons, and city/county officials) over the use of private property, the legal principles that inform the possible resolutions of these tensions and define governmental authority, and the implications of land use regulation for the exercise of other rights, such as free speech.

LAW6910 - Seminar

Credits: 1-2

LAW6915 - Topics in Law

Credits: 1-3

Specific subject matter varies each year and between each section because the course is normally taught by a visiting faculty or by a law faculty member or interdisciplinary team who wish to present a special topic not able to be offered on a regular basis. Students should check class schedules for current offerings each semester.

Prerequisite: completion of first year of law school; consent of instructor required for non-law students.

LAW6920 - Legal Skills and Problems

Credits: 1-2

LAW6925 - Advanced Persuasive Writing

Credits: 3

Max Credit (Max. 3)

Art and science of written legal persuasion. Specifically, course explores the nature of legal persuasion from the standpoints of numerous disciplines, including classical rhetoric, psychology, literary theory, and morality theory, and based on these principles, covers specific strategies lawyers can use to make their writing more persuasive.

Prerequisite: LAW 6160 and LAW 6260, and completion of first year of law school.

LAW6930 - Legal Clinic

Credits: 2-3

Max Credit (Max. 6)

Supervised clinical training in law office and court procedures. Clinical programs available are the Defender Aid Program, Legal Services Program, and the Prosecution Assistance Program.

Prerequisite: Students must have completed first year of law school.

LAW6931 - Clinic: Civil Legal Services

Credits: 3

Max Credit (Max. 12)

The Civil Legal Services Clinic has provided legal assistance to Wyoming citizens for over 20 years. Students represent low-income and marginalized individuals across the state who could not otherwise afford legal representation. The CLSC's mission is to provide legal services in a broad range of general civil legal matters.

LAW6932 - Clinic: Defender Aid

Credits: 3

Max Credit (Max. 12)

Provides representation to indigent persons in Wyoming state and federal courts. We represent clients pending trial, on direct appeal from their convictions, and handle post-conviction matters in state and federal court.

LAW6933 - Clinic: Energy, Environment and Natural Resources

Credits: 3

Max Credit (Max. 12)

Fall: Classroom component of the Clinic will provide a practitioner's view of key aspects of federal court litigation practice in cases involving natural resources issues. Spring: Clinic will provide an overview of the Wyoming Administrative Procedure Act and the Wyoming statutes that govern the regulation of energy production, environmental protection, and natural resources management in Wyoming.

LAW6934 - Clinic: Family and Child Advocacy

Credits: 3

Max Credit (Max. 12)

Handle a wide array of cases including divorce, child custody, domestic violence protection orders, stalking orders, guardian ad litem appointments in juvenile and domestic relations cases, and other family law matters. In addition, law students represent children or their parents in child abuse and neglect cases, termination of parental rights, children in need of supervision and delinquency actions.

LAW6935 - Contract Drafting

Credits: 3

Max Credit (Max. 3)

Covers fact investigation and the role of the lawyer in a transaction proposed by the client, including possible negotiations with other parties; drafting a contract in Plain English; and the ethical obligations of a transactional lawyer, through simulations and problem-solving exercises.

Prerequisite: LAW 6110.

LAW6936 - Clinic: Prosecution Assistance

Credits: 3

Max Credit (Max. 12)

The program is heavily involved with the Wyoming Attorney General's office, usually in representing the state in criminal appeals before the Wyoming Supreme Court. In handling these appeals, students are responsible for the entire preparation of appellate briefs and the presentation of oral argument to the Supreme Court.

LAW6937 - Estate Planning Practicum

Credits: 3

Max Credit (Max. 12)

Provides students the opportunity to work with low-income clients around the State of Wyoming in a transactional law setting. Prepare wills, powers of attorney, advance health care directives, deeds, affidavits of distribution and other probate documents for small estates and will learn how to plan an estate for beneficiaries who are minors or who have special needs.

LAW6940 - Independent Study

Credits: 1-2

Max Credit (Max. 4)

Research and writing in specialized or advanced areas of the law. Students are to contact a professor that has a background or interest in the students' topic area to determine if the professor will supervise the Independent Study. Students receive one credit hour for 50 hours of work or 2 credit hours for 100 hours of work.

LAW6941 - Independent Study: Clinic

Credits: 1-4

Max Credit (Max. 4)

Course is meant to allow students to receive credit for continuing work completed in conjunction with a clinic or live practicum. To qualify for credits a student must have completed at least one semester in a clinic or live practicum.

LAW6945 - Workers Compensation Law

Credits: 3

Max Credit (Max. 3)

Addresses essential aspects of workers' compensation laws including extent of coverage, the various levels and varieties of benefits provided, and how claims are established and enforced. The course will also consider the interaction of state workers' compensation laws with other laws.

LAW6950 - Law Review

Credits: 1-3

Max Credit (Max. 6)

Intensive research, writing, and editing of case note or comment and cite-checking of articles for the Wyoming Law Review. Law Review membership is required. Credit may be received in the third year only. Maximum six hours in academic career.

LAW6960 - Legal Externships

Credits: 1-3

Max Credit (Max. 6)

The externship program provides second and third year students with an opportunity to learn through practice by working directly with attorneys or judges for academic credit. Externship placements are limited to judges, government agencies and nonprofit organizations, and must be pre-approved by the College of Law faculty.

LAW6970 - Legal Competitions

Credits: 1-3
Max Credit (Max. 3)

LAW6990 - Advanced Topics

Credits: 3
Max Credit (Max. 9)

LAW6991 - Advanced Water Law and Policy

Credits: 3
Research projects within the fields of domestic, international, or comparative water law and policy. Focuses on the elaborate body of laws governing allocation and management of water in and around the Colorado River Basin - i. e. , the "Law of the River. " Explore the Law of the River's historical evolution and current composition as well as cutting-edge policy issues currently facing it. Writing-intensive format satisfies the College of Law's Advanced Writing Requirement.

Prerequisite: C or better in LAW 6860.

LAW6992 - Advanced Oil and Gas Law

Credits: 3
Simulate the work of an oil and gas attorney. Explore oil and gas financing arrangements including the farmout, JOA, and productions sharing agreements, drilling and service agreements, downstream marketing and purchase agreements, conveyances of oil and gas real property interests, the purchase and sale of petroleum properties, oil and gas development on federal lands, and title examination.

Prerequisite: C or better in LAW 6790.

LAW6993 - Advanced Trust and Estates

Credits: 3
Focuses on topics related to the law of trusts, including fiduciary administration, modification, termination, and alienation of trusts; charitable trusts; and issues of trust interpretation and construction. Other topics may be covered as time permits.

Prerequisite: C or better in LAW 6330.

Library Sciences

LIBS2000 - Libraries and Librarianship

Credits: 2

A study of the historical development of the library and its role as a social institution. Types of libraries and services, standards, current trends, professional training, and status and responsibility of the librarian are covered. It is beneficial to all who plan to do library work or who are working toward certification in library-media.

When Offered (Offered based on sufficient demand and resources)

LIBS4360 - Reference and Bibliography

Credits: 3

An introduction to the basic materials used in reference and information services. The philosophy of reference services is presented with particular attention to the needs of schools, community colleges and public libraries.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 20 hours of general education (liberal arts).

LIBS4380 - Cataloging and Classification

Credits: 3

Introduction to the theories and practices of cataloging and classification. Emphasis is on the Dewey Decimal system; subject cataloging from the Sears headings; descriptive cataloging of monographs, serials, and non-print materials; filing rules. Practice in cataloging and classification of materials.

Dual Listed LIBS 5380.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 20 hours of general education (liberal arts).

LIBS4520 - Library Practice

Credits: 2-8

Max Credit (Max. 8)

Provides an overview of library organization, administration and service by capitalizing upon the utilization of practical experiences in dealing with everyday problems of the library. Application of principles learned in the various library courses will be stressed. Students must contact department the semester prior to enrollment for authorization to enroll in the course. This course serves as student teaching experience for students wishing to be endorsed in library science.

Prerequisite: LIBS 4340.

LIBS5320 - Selection of Instructional Materials

Credits: 3

A study of basic principles and practices in the selection of print and non-print materials for utilization in school and public libraries. Emphasis is given to the evaluation of materials in light of community needs and principles of intellectual freedom.

Dual Listed LIBS 4320.

Prerequisite: 20 hours of general education (liberal arts).

LIBS5380 - Cataloging and Classification

Credits: 3

Introduction to the theories and practices of cataloging and classification. Emphasis is on the Dewey Decimal system; subject cataloging from the Sears headings; descriptive cataloging of monographs, serials, and nonprint materials; filing rules. Practice in cataloging and classification of materials.

Dual Listed LIBS 4380.

Prerequisite: 20 hours of general education (liberal arts).

LIBS5440 - Information Technology

Credits: 3

Provides information to help learners efficiently access information electronically. Philosophical, ethical, and management issues as well as technical information on the various mechanisms for electronic access now and in the near future are presented. The analysis of needs combined with knowledge of electronic tools for the purpose of efficiently meeting the information needs of clientele is stressed, as well as knowledge of the appropriate use of electronic products for more specific problems/projects.

Cross Listed ADED 5440.

Prerequisite: graduate standing and/or consent of instructor.

LIBS5520 - Teaching the Use of the Library

Credits: 2

Methods for teaching students basic techniques for effective use of library media center resources. Integration of library media center instruction with the total instructional program is emphasized. Relationship between stages of cognitive and other development and appropriate learning activities.

Prerequisite: LIBS 4320/LIBS 5320 and LIBS 4380/LIBS 5380.

LIBS5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

LIBS5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

LIBS5940 - Continuing Registration: Off Campus

1298

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: Advanced degree candidacy.

LIBS5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: graduate standing.

LIBS5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

LIBS5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: Graduate standing.

Life Sciences

LIFE1002 - Discovering Science

Credits: 3

Integrates Biology, Chemistry, Physics, and Earth Science and is intended for non-science majors. Fundamental concepts from each discipline are discussed through lectures and in-class activities, and students learn how to understand science and its importance in larger societal issues. There is no laboratory component of this course. Meets the S requirement in USP 2003 and the PN requirement in USP 2015.

When Offered (Normally offered fall semester)

USP Code [S<>PN]

Former Course Number [BIOL 1002]

LIFE1003 - Current Issues in Biology

Credits: 4

Emphasizes central themes of biology - cell biology, genetics, evolution, ecology - and scientific methodology by focusing on current issues in biology. Fundamental concepts are addressed through classroom and laboratory activities and discussions. This course is intended for non-science majors. Students cannot receive duplicate credit for LIFE 1010 or LIFE 1020.

When Offered (Normally offered spring semester)

USP Code [SB<>PN]

Former Course Number [BIOL 1003]

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP Code [SB<>PN]

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE1020 - Life Science

Credits: 4

An integrated lab and lecture emphasizing fundamental principles of biology including cell structure and function, genetics, ecology, evolution and organismal biology. Considers applications of these principles to societal issues such as the conservation of biodiversity, overpopulation and global environmental changes, biotechnology, and human wellness and disease. If you take LIFE 1020, you cannot get duplicate credit for LIFE 1000, 1003, or 1010.

USP Code [SB<>PN]

Former Course Number [BIOL 1020]

Prerequisite: elementary education majors only; concurrent enrollment in EDEL 1430.

LIFE1101 - Introduction to Ecological Research

Credits: 3

Learn science by doing science! This course-based undergraduate research experience (CURE) will focus on beaver pond ecosystems in Medicine Bow National Forest. Students will engage in outdoor fieldwork in addition to classroom learning. They will carry out hands-on projects and gain experience in ecological sampling, lab work, data analysis, and scientific writing. Students who complete the course are encouraged to continue research and are eligible for summer internships.

USP Code [(none)<>FYS]

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four

themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2200 - Research in Action

Credits: 3

In this course, students will collect data while learning/practicing how to write and communicate in the sciences. Upon completion of the class, students will have experienced the process of scientific inquiry, learned key concepts of experimental design, and how to write in the sciences.

LIFE2300 - Scientific Communication

Credits: 3

The course is primarily designed for undergraduate students in STEM (science, technology, engineering, and math) disciplines who are conducting, or intend to conduct, independent research projects. Sharing research findings with the public is an essential, though often overlooked, part of the job of those in STEM fields. We will hone these techniques through a variety of written assignments, practice talks, group discussions and feedback, visits from guest speakers, and a semester-long research project. The overarching goal is for you to be able to deliver an engaging research talk.

USP Code [(none)<>COM2]

Former Course Number [AS 2100]

Prerequisite: C or better in COM1.

LIFE3050 - Genetics

1301

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE4975 - Practicum in Laboratory Teaching

Credits: 1-3

Max Credit (Max. 3)

Intended to give undergraduate students experience teaching in a laboratory setting. Working closely with an instructor and a graduate teaching assistant, students will assist in the teaching of biology laboratories during the semester and participate in weekly sessions centered on teaching, learning and assessment.

Former Course Number [BIOL 4975]

Prerequisite: completion of a 1000-level LIFE course and consent of instructor.

LIFE4976 - Practicum in Laboratory Teaching II

Credits: 1-3

Max Credit (Max 3)

Intended to build on the foundations of LIFE 4975. Students work under the dual supervision of the course instructor and the graduate teaching assistant to gain further first hand experience with teaching in life sciences laboratories during this semester.

Former Course Number [BIOL 4976]

Literacy Education

LTED5800 - Theoretical Perspectives on Literary Processes and Practices

Credits: 3

A doctoral seminar aimed at providing students with a broad introduction to theoretical perspectives on literacy processes and practices as well as the functions of theory in literacy research. Features reading and discussion of key works from cognitive, sociocultural, and critical research in literacy.

Prerequisite: graduate student status.

LTED5830 - Review, Critique, and Synthesis of Literacy Research

Credits: 3

A doctoral seminar focused on a survey and analysis of historical and contemporary research in literacy.

Prerequisite: Graduate standing.

LTED5860 - History of Literacies

Credits: 3

Explores the nature of history and historical inquiry, the history of literacies from several perspectives, the history of global literacies across time, and the literacy histories of a diverse range of cultural groups. Also examines the history of literacy instruction in the United States.

Prerequisite: Graduate standing.

LTED5870 - Special Topics in Literacy Education

Credits: 1-3

Max Credit (Max 12)

Advance students in literacy education work intensively on current issues and problems and participate in systematic, critical exploration of an identified issue or problem. Topics may include the following: New Literacy Studies, Adolescent, Adult, and Workplace Literacies; Disciplinary Literacy Research. May be repeated with different topics, up to 12 credit hours.

Prerequisite: Permission of instructor and graduate standing.

Management

MGT1040 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2600 - Internship in Business

Credits: 1-4

Provides students with practical business knowledge and a perceptual basis for later coursework. Students work as interns in operating organizations.

Prerequisite: Approved internship application through the Peter M. & Paula Green Johnson Student Success Center and a minimum GPA of 2.5.

MGT3110 - Business Ethics

Credits: 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational judgments in morally questionable situations. Through analysis students understand what factors give rise to and influence ethical issues and how organization values precipitate ethical behavior among employees.

Prerequisite: sophomore class standing.

MGT3210 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: sophomore class standing and completion of COM1.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 3210 and advanced business standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 3210 and advanced business, standing junior class standing.

MGT3460 - International Management

Credits: 3

This course examines the environmental, cultural, political, legal, and operational challenges facing managers in doing business across international borders.

Prerequisite: INBU 1040 and junior class standing.

MGT4220 - Talent Acquisition

Credits: 3

In Human Resource Management one core function is recruiting and selecting the best talent to drive organizational success. Students will learn how to analyze jobs and develop recruitment plans to find qualified individuals, how to conduct professional and valid interviews, and how to successfully onboard employees into the organization.

Prerequisite: MGT 3410 and junior class standing.

MGT4240 - Performance and Compensation

Credits: 3

In Human Resource Management the management of employee performance and compensation are key functions that drive organizational success. This course helps students become familiar with total compensation systems, including intrinsic and extrinsic rewards, base and variable pay, and benefits, and their relationship with employee performance and satisfaction.

Prerequisite: MGT 3410 and junior class standing.

MGT4260 - Training and Development

Credits: 3

In Human Resource Management training employees in the latest technical and managerial skills and helping them gain developmental experiences helps drive organizational success. Students will learn how to recognize training and developmental needs, how to develop employee training systems, and how to implement these training systems. Additionally, students will learn about career and leader development.

Prerequisite: MGT 3410 and junior class standing.

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 1040 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 1040 or equivalent and junior class standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 1040 and junior class standing.

MGT4370 - Employment Law

Credits: 3

Provides a comprehensive foundation for understanding the law as it relates to the employer-employee relationship. This course will provide students the legal background necessary to make better decisions both as a worker as well as a manager of other.

Prerequisite: MGT 1040 or equivalent, junior class standing.

MGT4430 - Organization Design and Change

Credits: 3

Examines organizations, what they are, how they operate and are structured and how they can be changed. Focus is on macro managerial issues in the design and change of work organizations.

Prerequisite: MGT 3210, MGT 3410, MGT 3420; advanced business standing, junior class standing.

MGT4455 - Systems Analysis and Design

Credits: 3

Concerned with the analysis, management, and conceptual design of information systems. Specific topics include systems planning, requirements analysis, business process modeling and redesign, flexibility analysis, alternative analysis, and architectural selection and design focused on supporting an organization's business requirements through various system design methodologies.

Cross Listed IMGT 4455.

Prerequisite: IMGT 1400, Advanced Business Standing and junior class standing.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP Code [(none)< >]

Prerequisite: MGT 3210, MGT 3410, MGT 3420; advanced business standing, junior class standing.

MGT4550 - Family Business and Corporate Venturing

Credits: 3

Investigates the organizational life cycle using a dual focus of family business and new ventures within established organizations. Topics include start-up considerations, organizational form, cash flow and financing, family dynamics, and identifying appropriate ventures for enhanced organizational growth. Ownership succession and exit strategies are also discussed.

Prerequisite: advanced business standing and junior class standing.

MGT4560 - Entrepreneurial Accounting and Finance

Credits: 3

Expand business knowledge by focusing attention on accounting and finance concerns that are vital to new ventures. Focuses on issues that must be addressed to assist these businesses in meeting their objectives of growth, preparation for a public offering, and exit strategies.

Prerequisite: ACCT 2010, FIN 3250, MGT 3210.

MGT4600 - Advanced Internship in Business

Credits: 1-4

Provides students with practical business knowledge, policy, procedure, and decision making. Students work as interns in operating organizations.

Prerequisite: MKT 3210, MGT 3210, FIN 3250, ACCT 2010; Advanced Business standing, approved internship through the Peter M. & Paula Green Johnson Student Success Center.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP Code [(none)<>COM3]

Prerequisite: ACCT 2010, ACCT 2020, MGT 1040, DSCI 3210, FIN 3250, MGT 3210, MKT 3210, STAT 2010 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

MGT4900 - Problems in Management

Credits: 1-4

Max Credit (Max. 4)

Studies, on an individual basis, any phase of management not included in the organized course. Written report required.

Prerequisite: senior class standing, advanced business standing, and written consent of instructor.

MGT4910 - Selected Topics in Management

Credits: 3

Max Credit (Max. 6 seniors; M.S. and Ph.D. 9)

A course for advanced students treating contemporary problems in management and administration. Specific area(s) to be considered in a given semester will be printed in the class schedule.

Prerequisite: junior class standing and other courses, as appropriate, for specific area/topic being covered. Obtain permission and specific listing of prerequisites for enrollment from the GJSSC before registering.

MGT5504 - Energy Industry Value Chain

Credits: 3

Examines the overall energy industry with detailed exploration of the major energy subsectors and supply chains. Students will develop knowledge of the energy industry value chain including coverage of market dynamics, prevalent strategies, finance, operations, externalities and network effects, environmental and ethical considerations, and associated policy issues.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director

MGT5600 - Graduate Internship in Business

Credits: 1-4

Max Credit (Max. 6)

Provides student with practical business knowledge, policy, procedure and decision making. Student works as intern in operating organization.

Prerequisite: 12 hours of graduate preparatory courses; accepted in a graduate program and consent of instructor.

MGT5890 - Advanced Problems in Management

Credits: 1-8

Max Credit (Max. 8)

An arrangement whereby a student is permitted to develop some advanced phase of management not offered in the formally structured courses, or to investigate a management problem. A written report is required.

Prerequisite: 9 hours in management including one 5000-level course, accepted in a graduate program and consent of instructor.

Marketing

MKT1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

MKT3110 - Marketing Ethics

Credits: 3

This course examines ethics and social responsibility in marketing. With some grounding in moral reasoning, students explore application of ethical frameworks to various aspects of marketing, including marketing research, target market selection, and marketing mix decisions. Integrative models for incorporating ethics into marketing decision making are applied.

Former Course Number [4610]

Prerequisite: MKT 3210, sophomore class standing.

MKT3210 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MKT3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field of study.

Cross Listed SELL 3310.

USP Code [(none)<>COM2]

Former Course Number [4210]

Prerequisite: COM1 and sophomore class standing.

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 3210, advanced business standing.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 3210, junior class standing.

MKT4250 - Digital Marketing

Credits: 3

This is an investigation of the digital marketing discipline with an emphasis on e-commerce models, online advertising, digital consumer behavior, privacy considerations, website structure, search engine optimization and social media marketing.

Prerequisite: MKT 3210 and junior class standing.

MKT4310 - Advanced Selling

Credits: 3

This course provides students in-depth study of advanced sales concepts including relationship management, problem solving, negotiation, and proposal writing. It also explores the use of data-based decision making and the use of selling technologies. Students will learn how to use data to sell to both resellers and manufacturers.

Cross Listed SELL 4310.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

MKT4320 - Sales Force Strategies

Credits: 3

This class will examine the linkages among management of the sales function, personal selling activities, and the marketing area. Students will gain an understanding of the role of the sales force in achieving of the firm's marketing, customer relationship, and revenue objectives.

Cross Listed SELL 4320.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

MKT4330 - Sales Seminar

Credits: 3

This course provides students in-depth study of advanced, and cutting edge sales and sales management concepts presenting by top talent in industry. While topic can vary, this seminar teams students with industry experts to explore state-of-the-art thinking in technical sales, sales management, sales training, compensation, and team selling.

Cross Listed SELL 4330.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

MKT4430 - Marketing Management

Credits: 3

Analysis of policy-making and operating decisions of the marketing manager and the tools available to aid in solving marketing problems.

Prerequisite: MKT 3210, MGT 3210, STAT 2010 or equivalent.

MKT4440 - Services Marketing

Credits: 3

This course is designed for students who may be interested in working in service industries and will address the distinct needs and problems of service firms in the area of marketing.

Prerequisite: HOSP 2000 or MKT 3210 .

MKT4450 - Advanced Marketing Management

Credits: 3

Capstone course for marketing majors and minors designed to integrate prior marketing courses. Primary focus is on utilizing marketing concepts and tools in a strategic marketing decision-making context.

USP Code [(none)<>]

Prerequisite: MKT 3210 , MKT 4520, junior class standing.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 3210, junior class standing.

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 3210 and junior class standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the 'lens' of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

MKT4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. Interdisciplinary and appropriate for students of all disciplines.

Cross Listed ENR 4600.

Dual Listed MKT 5600.

Prerequisite: advanced business standing for COB majors, junior standing for non-COB majors.

MKT4900 - Problems in Marketing

Credits: 1-4

Studies, on an individual basis, any phase of marketing not included in the organized courses. A written report is required.

Prerequisite: advanced marketing courses as appropriate, advanced business standing; requires written consent of instructor.

MKT4910 - Selected Topics in Marketing

Credits: 3

Max Credit (Max. 6)

A course for advanced students treating contemporary problems in marketing related areas. Specific area(s) to be considered in a given semester will be printed in class schedule.

Prerequisite: junior class standing and other courses, as appropriate, for specific area/topic being covered. Obtain permission and specific listing of prerequisites for enrollment from the Academic Advising unit of the Peter M. & Paula Green Johnson Student Success Center before registering.

MKT5250 - Behavioral Theory I

Credits: 3

Expose doctoral students to prospective outcomes on consumer behavior that draw from a variety of disciplines, including marketing, psychology, decision theory, sociology, and cultural anthropology. Students also learn about the different methods researchers employ to study consumers.

MKT5280 - Behavioral Theory II

Credits: 3

This seminar provides a sampling of consumer research rooted in psychological theories and frameworks. The historical development of consumer behavior in marketing cognitive and related contributions to marketing though development will be explored.

MKT5350 - Marketing Models

Credits: 3

Familiarizes students with quantitative modeling approaches to address a variety of marketing problems. The focus is on the nature, relevance, and properties of mathematical models and analytical methods that are employed to address various types of marketing decisions. Students must be accepted into the graduate program.

MKT5450 - Marketing Theory I

Credits: 3

The purpose of this class is to provide students with an in-depth understanding of the role and development of theory in marketing and related disciplines. Students must be accepted into the graduate program.

MKT5590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 5590.

Dual Listed MKT 4590.

Prerequisite: advanced business standing.

MKT5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. Interdisciplinary and appropriate for students of all disciplines.

Cross Listed ENR 5600.

Dual Listed MKT 4600.

Prerequisite: advanced business standing for COB majors, junior class standing for non-COB majors.

MKT5890 - Advanced Problems in Marketing

Credits: 1-8

Max Credit (Max. 8)

An arrangement whereby a student is permitted to develop some advanced phase of marketing not offered in formally structured courses, or to investigate a marketing problem. A written report is required.

Prerequisite: 9 hours in marketing including one 5000-level course, written consent of instructor, accepted in a graduate program.

MKT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 12)

MKT5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 42)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate degree program.

Master of Business Administration

MBAM5101 - MBA Foundations

Credits: 1

The purpose of this course is to prepare students for the academic rigors of the MBA program.

Restricted Enrollment in MBAM or MBAF degree program.

Prerequisite: Admission to full-time MBA program.

MBAM5102 - Operations Management

Credits: 3

Production and operations management. Topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, and scheduling.

Prerequisite: Admission to the MBAM program.

MBAM5103 - Business Research Methods

Credits: 3

An overview of the scientific research process applied in the context of business. Topics include problem definition, selection of a methodological approach, design and implementation of field work (qualitative and survey methods), analysis techniques (thematic analysis for qualitative research and statistical analysis for survey research, and communicating results.

Prerequisite: Admission to the MBAM program.

MBAM5104 - Organization Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Prerequisite: Admission to the MBAM program.

MBAM5106 - Professional Development I

Credits: 0

First course is a sequence of courses focused on professional development. This course will provide "a real world" format where students must express their ideas in every class through verbal presentations, as well as developing written products such as handouts, PowerPoint presentations, white papers and email correspondence.

Prerequisite: Admission to the MBAM program.

MBAM5107 - Decision Making I

Credits: 1

This course develops a systematic process for making decisions in complex business situations, by integrating six dimensions of

business risk: competitive, financial, organizational, legal, social, and ethical. The process combines analytical and ethical reasoning methods that compensate for the flawed decision making common in business organizations.

Prerequisite: Admission to the MBAM program.

MBAM5108 - Financial Accounting

Credits: 3

This course provides students with tools to use financial information from the accounting system. The course addresses how financial statement information is used to make business decisions and allows students to learn about how generally accepted accounting principles are applied to and account for and report on business transaction results. #304.

Prerequisite: Admission to the MBAM program.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5203 - Entrepreneurial Management

Credits: 3

This course explores and evaluates various intrapreneurial and entrepreneurial opportunities and focuses on lean startup methodologies, use of open innovation techniques, and team productivity. Dynamic business environments characterized by technological diversity and global enterprise will also be considered as students strategically analyze a business opportunity using practical theory application.

Restricted Admission to the MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamentals principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBAM program.

MBAM5206 - Professional Development II

Credits: 0

Second part of a sequence of courses designed to help students advance their professional skills (written, oral, and interpersonal) and achieve success in career planning, career preparation, and career development.

Prerequisite: Admission to the MBAM program.

MBAM5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions.

Prerequisite: Admission to the MBAM program.

MBAM5209 - Decision Making II

Credits: 1

An experiential learning course that builds on MBAM 5107. Students apply systematic business decision making process to real-world business situations. Student teams work directly with owners and managers of Wyoming companies to address their strategic, competitive, operational, financial, and/or administrative challenges in real time.

Prerequisite: MBAM 5107.

MBAM5301 - MBA Summer Project

Credits: 3

Serves as an externship for individual MBA students or MBA teams to work with a client on a business issue under the supervision of a qualified faculty member in the College of Business.

Prerequisite: Completion of the first-year (Fall & Spring semester) on campus MBA courses.

MBAM5303 - International Business

Credits: 3

Focus on the topics of culture, effects of the macroenvironment on business, and regional economic integration, with predominant themes of leadership and sustainability in business.

Prerequisite: Admission to the MBAM program.

MBAM5304 - Business Law

Credits: 3

Broad perspective of the various legal issues associated with managing a business enterprise.

Prerequisite: Admission to the MBAM program.

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

MBAM5309 - Managerial Economics

Credits: 3

Discuss a variety of tools and concepts intended to give you the background in economics and decision-making you will need to be an effective manager in a world where economic circumstances are uncertain and changing constantly.

Prerequisite: Admission to the MBAM program.

MBAM5311 - MBA Managerial Economics II

Credits: 1

Continue discussion of a variety of tools and concepts intended to give you the background in economics and decision-making you will need to be an effective manager in a world where economic circumstances are uncertain and changing constantly.

Prerequisite: Admission to the MBAM program, completion of MBAM 5309.

MBAM5330 - Global Business Environment

Credits: 3

Max Credit 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted Admission to the MBA, MBAE, or MBAF program.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director.

MBAM5401 - Investment Management and Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Prerequisite: Admission to the MBA Program or permission of the MBA Program Director or the MBA Program Coordinator.

MBAM5402 - Corporate Finance and Governance

Credits: 3

Designed to provide a framework to analyze issues in corporate finance and governance. The firm is viewed as a nexus of contracts designed to reduce the costs of trade - and corporate finance is regarded as an investigation of the incomplete contracts that involve the providers of capital.

Prerequisite: Admission to the MBA Program or permission of the MBA Program Director or the MBA Program Coordinator.

MBAM5403 - Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 5400.

Prerequisite: Admission to the MBA Program or permission of the MBA Program Director or the MBA Program Coordinator.

MBAM5404 - Seminar on Management Fraud

Credits: 3

An in-depth study and analysis of the causes, methods, and consequences of financial statements fraud committed by top management in the organization. The course covers psychological and criminological theories of management fraud, as well as detailed analysis of high-profile managements frauds. Seminar format.

Cross Listed ACCT 5066.

Prerequisite: Permission of the MBA Program Director of the MBA Program Coordinator.

MBAM5501 - Energy Economics and Policy

Credits: 3

Applies the tools of economic analysis to attain and understanding of energy markets and energy policy analysis. Sec. 1 Overviews the major energy and environmental policy issues facing the United States and the world. Sec 2 Determinants of energy demand. Sec. 3 Technologies and costs to produce and deliver energy. Sec. 4 Determinants of energy price.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduces students to basic financial accounting and reporting issues related to energy producing activities. Specifically, the course will investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. The course will also cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Cross Listed ACCT 5503.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5506 - Energy Finance: Securities, Hedging, and Trading

Credits: 3

Overview of security analysis applied to energy firms, hedging strategies, and trading activities in energy markets. Trading activities covered include the use of forward and futures contracts, swaps, options, and related derivatives.

Prerequisite: Permission of MBA Program Director.

MBAM5507 - Energy Business Strategy (Capstone)

Credits: 3

Improving an organization's competitiveness in changing global energy environments. Includes an overview of the geopolitics of global energy, and the risks involved. Emphasizes skill-development for formulating and implementing business-level, corporate, and global strategies in dynamic environments.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5508 - Marketing and Sustainable Consumption

Credits: 3

Focuses on understanding household and business energy consumption. Emphasizes the environmental, economic, social and psychological influences on consumer decision making and sustainable consumption. Course deals with developing customer value propositions, and for marketing strategy development in branding, product-line offerings, pricing, retailing and distribution, and public policy.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5800 - MBA Topics

Credits: 1-3

A course for MBA students treating contemporary problems in business related areas. Specific area(s) to be considered in a given semester will be printed in class schedule.

Prerequisite: Admission to the MBAM program.

Mathematics

MATH1000 - Problem Solving

Credits: 3

For students not planning to enroll in MATH 1400, MATH 1450 or a calculus course. Examines modern topics chosen for their applicability and accessibility. Provides students with mathematical and logical skills needed to formulate, analyze and interpret quantitative arguments in a variety of settings. Introduces statistics and stresses the use of a calculator.

USP Code [QA<>Q]

Note: Note: MATH 1000 is neither a prerequisite nor suitable preparation for MATH 1400 (College Algebra).

Prerequisite: grade of C or better in Math 0921 or Level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600 or concurrent enrollment in MATH 1080.

MATH1080 - Bridge Program Math

Credits: 3

This class is to assist students in refreshing their skills in Mathematics, from the fundamentals of arithmetic through college level algebra and trigonometry. If time and preparation allow, basic calculus concepts will be discussed. This class is largely self-paced, but with intrusive faculty support.

MATH1100 - Number and Operations for Elementary School Teachers

Credits: 3

For prospective elementary school teachers; purpose is to prepare students to be competent in teaching the major concepts and skills related to the real number system and four arithmetic operations. Includes asking and answering critical questions about subsets of the real number system, including natural, integer, and rational numbers.

USP Code [QA<>(none)]

Prerequisite: grade of C or better in MATH 0921 or Level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600.

MATH1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

MATH1105 - Data, Probability, and Algebra for Elementary School Teachers

Credits: 3

Continuation of MATH 1100 for prospective elementary teachers; emphasis is on asking and answering critical questions about our world through algebra, probability, and data analysis to prepare students to be competent in teaching these major concepts. Explorations focus on representing, analyzing, and generalizing patterns and the chances of future events.

USP Code [QB<>Q]

Prerequisite: grade of C or better in MATH 1100.

MATH1123 - Math, Music and Acoustics

Credits: 3

For music majors and minors not planning to enroll in MATH 1400, MATH 1450 or a calculus course. Serves as an introduction to the mathematics and physics underlying music and develops quantitative reasoning in a musical context. Topics include the wave nature of sound, intervals, scales, temperament, acoustics and psychoacoustics.

USP Code [(none)<>Q]

Note: Note: MATH 1123 is neither a prerequisite nor suitable preparation for MATH 1400.

Prerequisite: grade of C or better in MATH 0921 or Level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600 and grade of C or better in MUSC 1030.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP Code [QA<>Q]

Note: Students receiving credit for MATH 1450 may not receive credit for this course.

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP Code [QA<>Q]

Note: Students receiving credit for MATH 1450 may not receive credit for this course.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP Code [QA< >Q]

Note: Students with both MATH 1400 and MATH 1405 credit may not receive credit for this course.

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2120 - Geometry and Measurement for Elementary School Teachers

Credits: 3

Continuation of MATH 1105 for prospective elementary teachers; emphasis is on asking and answering critical questions about spatial reasoning as evident in the real world. Includes investigations of two- and three-dimensional shapes and their properties, measurements, constructions, and transformations to prepare students to be competent in teaching these concepts.

Prerequisite: grade of C or better in MATH 1105.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP Code [QB< >Q]

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP Code [(none)< >Q]

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed COSC 2300.

Prerequisite: grade of C or better in COSC 1030 and in either MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP Code [QB<>Q]

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

MATH2355 - Mathematical Applications for Business

Credits: 4

Primarily for students in the College of Business. Includes the mathematics of finance; systems of linear equations and matrices; linear programming; sets, counting, and probability. Students will learn to use Excel spreadsheets to solve business application problems in a computer lab that meets one day per week.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

MATH2800 - Mathematics Major Seminar

Credits: 2

An introduction to modern mathematical reasoning and discourse, emphasizing the distinctive ways in which logic and language are used and the motivations behind them. Develops methods of precise definition and rigorous proof. Several topics are explored, illustrating mathematics as a living, dynamic subject with its own culture and conventions.

MATH2850 - Putnam Team Seminar

Credits: 2

Max Credit (Max. 8)

Preparation for the William Lowell Putnam Mathematical Competition. Problem solving strategies and mathematical content appropriate for the Putnam Exam are emphasized with problem sets taken from previous Putnam or other international math contests.

When Offered (Offered fall semester)

Former Course Number [3800]

Prerequisite: MATH 2200, MATH 2205.

MATH3205 - Analysis I: Elementary Real Analysis

Credits: 3

An introduction to rigorous analysis in one real variable. Includes a rigorous reconsideration of the elements of calculus: the real number system, numerical sequences and series, limits, continuity, differentiability, and Riemann integrability for functions of one variable. Proof and mathematical writing are emphasized.

Prerequisite: Grade of C or better in MATH 2205 and MATH 2800.

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

MATH3341 - Introduction to Scientific Computing Lab

Credits: 1

The objective of this lab is to expose students to the basic syntax and tools in MATLAB so that they succeed in writing correct computer code for the solution of scientific computing problems. Topics include: MATLAB syntax, variable types, code structure, function types, algorithm structure and design.

Prerequisite: Concurrent or previous enrollment in MATH 3340.

MATH3500 - Algebra I: Introduction to Rings and Proofs

Credits: 3

Begins with common features of integers, rational numbers, and polynomials, leading to study of rings in general. Topics include divisibility, factorization, and modular arithmetic for integers and polynomials, and homomorphisms and ideals for rings. Proof techniques include direct proof, proof by contrapostive, mathematical induction, and proof by contradiction.

Prerequisite: MATH 2800 and grade C or better in MATH 2250 or concurrent registration in MATH 2250.

MATH3700 - Combinatorics

Credits: 3

Provides an introduction to combinatorics and combinatorial algorithms, with applications to areas such as computer science and probability. Topics include general counting methods, recurrence relations, generating functions, inclusion-exclusion, partial orders, and graph theory.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2250.

MATH4000 - History of Mathematics

Credits: 3

Explores the roots of mathematics and the people who made significant contributions to it. Mathematical subjects typically include algebra, calculus and number theory; both chronological and topical approaches are employed.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2205.

MATH4100 - Mathematics in the Elementary School

Credits: 1-6

Acquaints prospective or experienced teachers of mathematics with newer developments in mathematics curriculum and materials. Emphasizes mathematical basis for courses in an elementary mathematics curriculum; organization and design of mathematics programs for grades K-7; and design and construction of curriculum and/or materials to meet specific needs of the teacher or school district.

Prerequisite: grade of C or better in MATH 1105 and consent of instructor.

MATH4150 - Secondary School on Campus

Credits: 1-4

Provides prospective teachers opportunity to study mathematics as it relates to the secondary school. Topics may vary from semester to semester. Emphasizes current trends and concerns of secondary school mathematics education.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2205 and concurrent with EDSE 4271.

MATH4200 - Analysis 2: Advanced Analysis

Credits: 3

A second course in analysis. Includes metric space topology, sequences and series of functions, and analysis in \mathbb{R}^n .

When Offered (Offered fall semester)

USP Code [(none)<>COM3]

Prerequisite: grade of C or better in MATH 2210, MATH 2250 and MATH 3205.

MATH4205 - Analysis 3: Undergraduate Topics in Analysis

Credits: 3

Special topics in analysis. Content varies. May be repeated for credit.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 4200.

MATH4230 - Introduction to Complex Analysis

Credits: 3

Develops the theory of functions of one complex variable. Topics include the algebra and geometry of complex numbers, functions of one complex variable, elementary functions, limits, continuity and differentiation. Differentiability leads to the Cauchy theorem, integral theorems, power series, residue theory and applications to integration theory and boundary value problems.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2210.

MATH4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed STAT 4255.

Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

MATH4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributionsIntroduces theory of estimation and hypothesis testing

Cross Listed STAT 4265.

Former Course Number [4260, 4010]

Prerequisite: MATH 4255.

MATH4300 - Introduction to Mathematical Modeling

Credits: 3

A model of a real world problem captures the essential features of the problem, while scaling it down to a manageable size. In this course, symbolic tools and mathematical techniques are used to construct, analyze and interpret various mathematical models which arise from problems in the physical, biological and social sciences.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250 or MATH 2310.

MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed COSC 4340.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

MATH4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 4420/PHIL 4420.

Dual Listed MATH 5420.

Prerequisite: PHIL 3420 or equivalent.

MATH4440 - Introduction to Partial Differential Equations I

Credits: 3

Survey of analytic methods for solving partial differential equations. Topics include: method of characteristics for solving first-order linear and quasi-linear equations; classification of second-order equations and canonical forms; background to separation of variables with applications; transform methods and Green functions; elliptic equations; heat and wave equations in one dimension.

Prerequisite: grade of C or better in MATH 2210 and MATH 2310.

MATH4500 - Matrix Theory

Credits: 3

Continuation from MATH 2250 of the study of matrices, an important tool in statistics, physics, engineering and applied mathematics in general. Concentrates on the structure of matrices, including diagonalizability; symmetric, hermitian and unitary matrices; and canonical forms such as Jordan form.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250.

MATH4510 - Algebra II: Introduction to Group Theory

Credits: 3

An introduction to the fundamental properties of groups including: binary operations, groups, permutation groups, subgroups, homomorphisms, and quotient groups.

When Offered (Offered spring semester)

USP Code [(none)<>COM3]

Prerequisite: grade of C or better in MATH 3500.

MATH4520 - Algebra III: Topics in Abstract Algebra

Credits: 3

Further examples and structure of rings and fields. Finite fields and number fields. Special topics.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 4510.

MATH4550 - Theory of Numbers

Credits: 3

Studies topics in mathematics which are motivated by questions about integers. Topics include divisibility, congruences, diophantine equations, quadratic residues, primitive roots, primes, and representations of positive integers.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 3500.

MATH4600 - Foundations of Geometry

Credits: 3

Broadens the student's understanding of the many faces of geometry and provides a context for the specific case of Euclidean geometry. Various approaches will be presented, including axiomatic, synthetic, coordinate, and transformational methods.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 3205 or MATH 3500.

MATH4800 - Seminar in Mathematics

Credits: 1-3

Exposes students to problems and thinking in mathematics which would otherwise be unavailable.

Prerequisite: consent of instructor.

MATH4970 - Professional Development in Teaching

Credits: 1-6

Max Credit (Max. 6)

Undergraduate student will assist in classroom and discussion section teaching under the guidance of an instructor in Mathematics. Does not count towards Mathematics degree requirements.

Prerequisite: Consent of instructor.

MATH5090 - Topics in the Foundations of Mathematics

Credits: 1-6

Max Credit (Max. 9)

Prerequisite: MATH 3000 and consent of instructor.

MATH5140 - Numbers, Operations, and Patterns for the Middle-level Learner

Credits: 3

Provides working middle-level mathematics teachers opportunities to understand and discuss numbers, their representations, and operations on them from an abstract perspective that includes elegant proof. Also emphasized is the role of language and purpose in composing definitions.

Cross Listed NASC 5140.

Prerequisite: admission to a university graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics Program.

MATH5150 - Seminar in Secondary School Mathematics

Credits: 1-4

Max Credit (Max. 18)

Seminar in Secondary School Mathematics.

Prerequisite: 6 hours of MATH 4150.

MATH5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner

Credits: 3

Empowers teachers of middle-level mathematics to design more engaging experiences. Emphasizes the historical context for the development of mathematics, especially its symbols, tools, personalities, and classic problems.

Cross Listed NASC 5160.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics Program.

MATH5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner

Credits: 3

Showcases two aspects of 2D and 3D geometry: measurement and transformation. Emphasis reflects current state and national standards for middle-level mathematics classroom and teacher preparation, especially appropriate uses of technology, geometric tools, mathematical language, and problem-solving strategies.

Cross Listed NASC 5170.

Prerequisite: admission to a university graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics Program.

MATH5190 - Mathematics of Change and the Middle-Level Learner

Credits: 3

Students gain a solid understanding of data and functions in the service of calculus. Course is hands-on, project-driven and focuses on the essential concepts of functions and calculus and their role in middle-level mathematics. Emphasis is on writing and technology (calculators and probeware).

Cross Listed NASC 5190.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics Program.

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5205 - Real Variables II

Credits: 3

A continuation of MATH 5200.

Prerequisite: MATH 5200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

MATH5235 - Complex Variables II

Credits: 3

A continuation of MATH 5230.

Prerequisite: MATH 5230.

MATH5255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence, and conditional probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed STAT 5255.

Dual Listed MATH 4255,

Prerequisite: grade of C or better in MATH 2210 or MATH 2355.

MATH5265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed STAT 5265.

Dual Listed MATH 4265,

Prerequisite: STAT 4250/5250, MATH 4250.

MATH5270 - Functional Analysis I

Credits: 3

Topics include the geometry of Hilbert spaces, linear functions and operators on Hilbert spaces, spectral theory of compact

normal operators, Banach space theory, the open mapping theorem, Hahn-Banach theorem, Banach-Steinhaus theorem, duality and linear operators on Banach spaces, and different topologies on Banach spaces and their duals.

Prerequisite: MATH 5200.

MATH5275 - Functional Analysis II

Credits: 3

Topics may include discussion of topological vector spaces, locally convex spaces, F-spaces, spectral theory of non-compact operators on Hilbert spaces, semigroups or evolution operators, distribution theory, and applications to differential equations and Sobolev spaces.

Prerequisite: MATH 5270.

MATH5290 - Topics in Analysis

Credits: 1-6

Max Credit (Max. 18)

Topics in analysis.

Prerequisite: consent of the instructor.

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: MATH 3310, COSC 1010.

MATH5340 - Computational Methods II

Credits: 3

Second semester of a three-semester computational methods series with emphasis on numerical solution of differential equations. Topics include explicit and implicit methods, methods for stiff ODE problems, finite difference, finite volume, and finite element methods for time-independence PDEs semi/fully discrete methods for time-dependent PDEs.

Prerequisite: MATH 5310.

MATH5345 - Computational Methods III

Credits: 3

Third semester of a three-semester computational methods series with emphasis on numerical solution of problems displaying

sharp fronts and interfaces (nonlinear conservation laws, Hamilton-Jacobi equations).

Cross Listed COSC 5345.

Prerequisite: MATH 5340.

MATH5390 - Topics in Numerical Analysis

Credits: 1-6

Max Credit (Max 18)

Topics in numerical analysis.

Prerequisite: consent of the instructor.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

MATH5405 - Methods of Applied Mathematics II

Credits: 3

A continuation of MATH 5400.

Prerequisite: MATH 5400.

MATH5420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 5420/PHIL 5420.

Dual Listed MATH 4420.

Prerequisite: PHIL 3420 or equivalent; graduate standing.

MATH5430 - Ordinary Differential Equations II

Credits: 3

Differential equations constitute the mathematical language for problems of continuous change. ODEs deal with evolutionary

processes involving one independent variable. This course revisits solution techniques but emphasizes the theoretical framework. Topics include: existence and uniqueness, linear and nonlinear differential systems, asymptotics and perturbations, and stability.

Prerequisite: MATH 4200, 4430.

MATH5440 - Partial Differential Equations II

Credits: 3

The theory of PDEs is important for abstract mathematics, applied science, and mathematical modeling. This course covers solution techniques but emphasizes the theoretical framework. Topics include: first order systems; characteristics; hyperbolic, elliptic and parabolic equations; separations of variables; series and transforms; integral relations; Green's functions, maximum principles; variational methods.

Prerequisite: MATH 4200 and MATH 4440.

MATH5490 - Topics in Applied Mathematics

Credits: 1-6

Max Credit (Max. 18)

Prerequisite: consent of instructor.

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5510 - Combinatorial Theory

Credits: 3

An introduction to combinatorics covering both classical and contemporary topics. Includes some of the following: generating functions, recursion formulas, partially ordered sets, inclusion-exclusion, partitions, graph theory, Ramsey theory, combinatorial optimization, Latin squares, finite geometries, and design theory.

Prerequisite: consent of the instructor.

MATH5530 - The Theory of Groups

Credits: 3

An in-depth study of various aspects of group theory, building on MATH 5550. Topics include some of the following: classical theory of finite groups (both Abelian and non-Abelian), infinite Abelian groups, free groups, permutation groups, group representations, endomorphism, extensions, and cohomology.

Prerequisite: MATH 5550.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

MATH5555 - Abstract Algebra II

Credits: 3

A continuation of MATH 5550, examining in depth selected topics from the theory of rings, fields, and algebras, including Galois theory.

Prerequisite: MATH 5550.

MATH5570 - Matrix Theory and Combinatorics

Credits: 3

An overview of matrix theory and its applications to combinatorics. Topics include Smith normal form, the Perron-Frobenius theory of non-negative matrices, location and perturbation of eigenvalues, and interlacing of eigenvalues. Applications include structure theorems for $(0,1)$ -matrices, network flows, spectra of graphs, and the permanent.

Prerequisite: MATH 5500.

MATH5590 - Topics in Algebra

Credits: 1-6

Max Credit (Max. 18)

Topics in algebra.

Prerequisite: consent of the instructor.

MATH5600 - Point-Set Topology

Credits: 3

Topics considered are metric spaces, open spheres, open sets, closed sets, continuous functions, limit points, topological spaces, homeomorphisms, compactness, connectedness, and separability. The familiar notion of distance on the real number line is generalized to the notion of a metric for an arbitrary set, which is in turn generalized to the concept of a set topology for a set. Certain applications to analysis and geometry are indicated.

Prerequisite: MATH 3205.

MATH5605 - Algebraic Topology

Credits: 3

Topics in algebraic topology, including simplicial homology groups and their topological invariance, the Eilenberg-Steenrod axioms, singular homology theory, and cohomology.

Prerequisite: MATH 3500.

MATH5640 - Differential Geometry

Credits: 3

Curve theory, theory of surfaces, and geometrics on a surface.

Prerequisite: MATH 4200.

MATH5690 - Topics in Topology

Credits: 1-6

Max Credit (Max. 9)

Prerequisite: consent of instructor.

MATH5700 - Topics in Combinatorics

Credits: 1-6

Max Credit (Max. 18)

Selected topics in combinatorial analysis.

MATH5800 - Seminar in Mathematics

Credits: 1-3

Max Credit (Max. 8)

Prerequisite: consent of instructor.

MATH5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

MATH5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

MATH5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

MATH5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate Program of Study for degree purposes.

MATH5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

MATH5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

MATH5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Mathematics Education

EMAT5100 - Theory and Research for Mathematical Learning

Credits: 3

Max Credit (Max. 6)

Advanced study of theory and research related to learning of mathematics, with attention to significant human mental development factors. Critically examines the scholarly basis for mathematical learning, including reviews of epistemological foundations, research-based factors, core issues, and advocacies for educational practices.

Prerequisite: enrollment in Mathematics Education Ph. D. specialization or permission of the instructor.

EMAT5200 - Advanced Study of Mathematics Curriculum, Assessment, and Evaluation

Credits: 3

Max Credit (Max. 6)

Advanced study of theory, research and practices related to curriculum, assessment and evaluation in mathematics education. Critically examines the historical and contemporary influences on these, including mathematical, philosophical, psychological, pedagogical, social and political forces and factors.

Prerequisite: enrollment in Mathematics Education Ph. D. program or permission of the instructor.

EMAT5300 - Theory and Practice for Mathematics Teaching and Teacher Education

Credits: 3

Advanced study of theory and research of mathematics teaching teacher education. Examines the scholarly basis for current rationales and practices, including a critical review of evidential effectiveness, core issues, and advocacies for reform. A major emphasis will include analysis and critique of significant theoretical and research literature.

Prerequisite: enrollment in Mathematics Education Ph. D. program or permission of the instructor.

EMAT5400 - Analysis and Critique of Research in Mathematics Education

Credits: 3

Both theoretical and empirical research and scholarship in the field of mathematics education are critically analyzed. Students develop a deep understanding of pivotal historical and contemporary literature that helped shape the field of mathematics education and begin a formative development of their research interests.

Prerequisite: at least two from EMAT 5100, EMAT 5200, or EMAT 5300.

EMAT5500 - Colloquium in Mathematics Education

Credits: 1-3

Max Credit (Max. 12)

Provides for a broad perspective on mathematics education through selected reading materials. Students present and discuss ideas and summaries of the assigned reading and, wherever possible, the student collects and uses original information from practical situations. Students participate with the selected materials (journal articles, research, manuscripts, conference presentations) for class discussion.

Prerequisite: Graduate student status.

EMAT5600 - Quantitative Reasoning & Modeling in Mathematics and Science Education

Credits: 3

Advanced study of theories, issues, research and practices for teaching and learning mathematics and science focused on quantitative reasoning and mathematical modeling (QRaMM). Analysis of fundamental constructs relevant to QRaMM in education. Activities engage the scholarship of critical analysis, and interdisciplinary applications aimed at student knowledge and expertise in QRaMM.

Prerequisite: Graduate student status.

EMAT5700 - Principles and Methods for Integrated Teaching & Learning Mathematics & Science

Credits: 3

Advanced study of theory, research, and practice for teaching and learning mathematics and science using integrated approaches in curriculum, pedagogy, learning, and assessment. The course will be production oriented, with activities and developments aimed at stimulating and supporting manuscripts to be published in STEM-appropriate venues.

Prerequisite: Graduate student status.

EMAT5980 - Dissertation Research

Credits: 1-12

Max Credit (Max 12)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Mechanical Engineering

ME3005 - Engineering Experimentation

Credits: 3

A combined lecture/laboratory course introducing students to experimental methods in the context of dynamics. Written technical communication, intermediate structured programming, experimental design, fundamental statistics, and uncertainty methods (numerical and analytical) are emphasized. Collaborative writing and teamwork is introduced.

Cross Listed ESE 3005

Former Course Number [2010; 2020]

Prerequisite: Completion of the ME Success Curriculum, ES 1060, ES 2120.

ME3010 - Intermediate Mechanics of Materials

Credits: 3

Expansion of the principles of solid mechanics: stress, strain, principal stresses, elastic and plastic behavior, failure theories and the use of energy methods. Analysis and design of thick-walled pressure vessels, noncircular cross sections under torsion, nonsymmetric beams under bending and curved beams.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ESE 3020

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ME3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ESE 3040

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3060 - Numerical Methods for Engineers

Credits: 3

Numerical solutions of problems commonly encountered in mechanical engineering including differentiation, integration, differential equations, system of linear and nonlinear equations, and optimization. The structured programming approach will be emphasized and applications from solid mechanics, thermal fluid sciences, materials science, and dynamic systems will be covered.

Cross Listed ESE 3060

Prerequisite: Completion of the ME Success Curriculum, ES 1060, and MATH 2310 or concurrent enrollment.

ME3160 - Thermal/Fluid Science Lab

Credits: 3

A laboratory course to introduce students to experimental methods for temperature measure and pressure/flow characteristics of fluids. Continuation of experience with communication (written, oral, and digital), intermediate programming, experimental

design, data analysis, and teamwork skills is emphasized.

Cross Listed ESE 3160

Former Course Number [2140; 2160]

Prerequisite: Completion of the ME Success Curriculum, ES 2330; ME 3005/ESE 3005.

ME3170 - Machine Design

Credits: 3

Application of engineering mechanics and materials science to the analysis and design of mechanical components such as bolted connections, springs, gears, bearings and shafts. Design for dynamic loading conditions. Principles of hydrodynamic lubrication. Introduction to computer-aided design. Case studies with appropriate topics.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ARE 3360/ESE 3360

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310, and ES 2330.

ME3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/ equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ARE 3400

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ME3450 - Properties of Materials

Credits: 3

Mechanical, electrical, thermal and chemical properties of materials. Theoretical treatment of structure of solids and design for specified properties.

When Offered (Normally offered spring semester)

Former Course Number [ES 3450]

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3975 - Internship

Credits: 3

Students may apply for credit for extended work experience (>10 weeks; full-time) engaging in mechanical engineering work and supervised by an engineer in mechanical engineering (or closely related field). Students should apply through their adviser prior to the work experience.

Restricted Enrollment is by departmental approval only.

Prerequisite: consent of the department head.

ME4010 - Mechanical Vibrations

Credits: 3

The theory of single and multi-degree-of-freedom systems with an introduction to continuous systems. Determination of equations of motion, including natural frequency for free vibration and amplitude of forced vibration. Design of discrete and continuous systems for transient and harmonic excitations.

When Offered (Normally offered fall semester)

Prerequisite: Completion of the ME Success Curriculum, ES 2120, ES 2410, and MATH 2310.

ME4020 - Design of Mechanical/Electronic Systems

Credits: 3

Theoretical and experimental study of sensors and actuators, interfacing sensors and actuators to a microcomputer, discrete and continuous controller design, analog and digital electronics, and real-time programming for control.

Prerequisite: Completion of the ME Success Curriculum, ME 3020.

ME4040 - Introduction to Finite Elements

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. The course includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 5040.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310 and (CE 4200/ARE 4200 or MATH 2250 or ME 3010 or ME 3060).

ME4060 - Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience. Student multidisciplinary teams prepare a project proposal or SOQ, generate a morphological study of their project and prepare project plans and specifications. Project management methods are also presented.

Former Course Number [3070]

Prerequisite: Completion of the ME Success Curriculum, ME 3010 (or concurrent enrollment), ME 3170, and ME 3360/ESE 3360/ARE 3360.

ME4070 - Systems Design II

Credits: 3

Continuation of a two-course design sequence. The design teams refine their designs, fabricate the project, test the project for compliance with the design specifications, write a comprehensive engineering design report including socioeconomic factors, and prepare and deliver a presentation of the project in a public forum.

USP Code [WC<>(none)]

Prerequisite: Completion of the ME Success Curriculum, ME 4060/ESE 4060 and WB.

ME4100 - Manufacturing Processes

Credits: 3

Details of manufacturing processes used in production of metal, plastic and ceramic components with an emphasis on science and mechanics of processes.

Prerequisite: Completion of the ME Success Curriculum, ME 3010 and ME 3450.

ME4150 - Mechanical Behavior of Materials

Credits: 3

Commonly encountered phenomenological and mechanistic behaviors that lead to mechanical failure are examined. Understanding the origin of mechanical failure of components allows for robust design of mechanical systems. Metallic, polymeric, and ceramic materials are covered.

Prerequisite: Completion of the ME Success Curriculum, ME 3450.

ME4200 - Thermo/Kinetics of Materials

Credits: 3

Introduction to the foundations of thermodynamics and kinetics of materials, including Gibbs free energy, ideal solutions, alloy ordering, phase diagrams, atomistic mechanisms of diffusion, interfaces and microstructure, grain growth, solidification, and diffusional and diffusionless transformation in solids.

Dual Listed ME 5200.

Prerequisite: ME 3450

ME4210 - Introduction to Composite Materials

Credits: 3

Applications, mechanical properties and fabrication of fiber reinforced composite materials; stress analysis of laminated, anisotropic composite structures; study of special problems unique to composites.

Prerequisite: Completion of the ME Success Curriculum, ME 3010.

ME4215 - Composite Materials Design and Manufacturing

Credits: 3

Introduction to composite material manufacturing processes. Aspects of constituent material production, as well as design, fabrication, and testing of composite materials. Laboratory exercises, such as laminating, filament winding, pultrusion and compression molding.

Prerequisite: Completion of the ME Success Curriculum, ME 4210.

ME4240 - Gas Dynamics I

Credits: 3

Thermodynamics of a compressible fluid; one-dimensional isentropic flow, normal and oblique shocks, expansion wave, flows with friction and heat transfer.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

ME4330 - Internal Combustion Engines

Credits: 3

Thermodynamic analysis and design of Otto and Diesel cycles for vehicle applications and stationary power generation. A substantial laboratory component will examine design and manufacturing issues, as well as engine performance in a variety of scenarios.

Cross Listed ESE 4330

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME4340 - Gas Turbine Engines

Credits: 3

Thermodynamic analysis and design of ground-based and aero-propulsion gas turbine engines.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

ME4350 - Airplane Aerodynamics and Flight

Credits: 3

Introduces students to the fundamentals of airfoil and wing design, airplane aerodynamics, and airplane stability. Links these fundamental ideas to the design and performance of real aircraft.

Prerequisite: Completion of the ME Success Curriculum, ES 2330.

ME4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ARE 4430

Prerequisite: ARE 3400/ME 3400 and ARE 3360/ME 3360 or concurrent.

ME4450 - Principles of Materials Selection

Credits: 3

A review of the economic and engineering aspects of materials selection. A detailed study of the properties, applications and limitations of engineering materials systems. Emphasis is on metal alloy systems, but non-metallics are included. Forming and joining processes are outlined.

Former Course Number [3110]

Prerequisite: Completion of the ME Success Curriculum, ME 3450

ME4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Cross Listed ESE 4455

Dual Listed ME 5455

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solarpowered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ESE 4460

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ME4474 - Topics in Mechanical Engineering I

Credits: 1-3
Max Credit (Max. 6)

Directed research in mechanical engineering.

Prerequisite: Completion of the ME Success Curriculum, junior standing in engineering.

ME4480 - Building Air and Hydronic Systems

Credits: 3

Design and analysis of building air and hydronic systems with focus on the application, design and analysis of thermal energy distribution systems (air and hydronic systems) for building space air conditioning. Requires enrollment in associated laboratory session.

Prerequisite: Completion of the ME Success Curriculum, ARE 4430/ME 4430 with a grade of C or above.

ME4490 - Modeling and Optimization of Energy Systems

Credits: 3

Application of principles of thermodynamics, fluids, and heat and mass transfer in the component and system-level design of energy/thermal systems, including modeling, simulation and optimization techniques. Examples are drawn from building environmental control, energy conversion and thermal industrial processes. Students work on projects for integration of these components in the design of energy/thermal systems. Requires enrollment in associated laboratory session.

Cross Listed ARE 4490

Prerequisite: Completion of the ME Success Curriculum, ARE 3360/ME 3360 and ARE 3400/ME 3400.

ME5040 - Introduction to Finite Element Analysis

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. Includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 4040

Prerequisite: MATH 2310 and (CE 4200 or ARE 4200 or ME 3010)

ME5045 - Advanced Finite Element Analysis

Credits: 3

Advanced topics in finite element analysis with emphasis on mathematical foundations of the method, numerical algorithms for software implementation, and analysis of problems with material and geometric nonlinear behavior.

Cross Listed CE 5045

Prerequisite: ME 4040 or ME 5040 or CE 5040.

ME5200 - Thermo/Kinetics of Materials

Credits: 3

Introduction to the foundations of thermodynamics and kinetics of materials, including Gibbs free energy, ideal solutions, alloy ordering, phase diagrams, atomistic mechanisms of diffusion, interfaces and microstructure, grain growth, solidification, and diffusional and diffusionless transformation in solids.

Dual Listed ME 4200

Prerequisite: ME 3450

ME5422 - Advanced Vibrations

Credits: 3

Advanced principles of dynamics: Hamilton's principle, Lagrange's equations, modal analysis of discrete systems. Analysis of continuous systems; natural modes, approximate methods, forced vibration. Introduction to random vibration.

Prerequisite: ME 4010

ME5431 - Analysis of Composite Materials

Credits: 3

An introduction to the methods of analysis applied to heterogeneous material systems. Emphasis of this course is on stress based formulations and failure analysis of fiber reinforced materials including laminates.

Prerequisite: graduate standing.

ME5432 - Advanced Materials Science

Credits: 3

An analysis of the relationships between the structures of materials and their mechanical and physical properties, leading to the application of these relationships to the design of materials for advanced engineering systems. Topics include crystallography, lattice defects, transport phenomena, phase transformations, fracture, environmental effects, and control of microstructure by processing.

Prerequisite: ME 3450

ME5434 - Computational Materials Science

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: graduate standing.

ME5435 - Failure of Engineering Materials

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: ME 3450 or equivalent.

ME5438 - Plasticity and Viscoelasticity

Credits: 3

Analysis of stress and deformation of idealized plastic and viscoelastic solids. Limit theorems in plasticity. Time-dependent behavior of viscoelastic materials.

Prerequisite: ME 5472 or equivalent.

ME5440 - Fluid Mechanics

Credits: 3

Lagrangian and Eulerian descriptions, conservation laws, stress and rate-of-stress tensors, Navier-Stokes equations, energy equations, vorticity and circulation inviscid and potential flows, laminar flows, turbulent flows, boundary-layer theory.

Cross Listed CHE 5440.

ME5442 - Advanced Fluid Mechanics

Credits: 3

Introduction to inviscid and viscous hydrodynamic stability; closure in turbulent flows; vorticity and vortex dynamics, theoretical aerodynamics, numerical simulations of viscous flows, experimental methods in fluid flows.

Prerequisite: ME 5440.

ME5444 - Optical Diagnostics in the Thermal and Fluid Sciences

Credits: 3

An introduction to optical measurement schemes used in gas and liquid flows. Topics include a review of relevant optical principles and lasers, and in-depth coverage of laser velocimetry, droplet and particle sizing, and temperature measurement.

Prerequisite: graduate standing.

ME5446 - Turbulence

Credits: 3

Basic notions, properties and scales in turbulent flows. Transport equations; Reynold's stresses, mixing and phenomenological theories. Turbulence dynamics; mean and fluctuating kinetic energy balances, vorticity and temperature fluctuations. Statistical description of turbulence; correlations and spectra, transport, isotropy and homogeneity. Shear flows; plane jets, wakes and boundary layers (including planetary). Turbulent diffusion.

Cross Listed CHE 5446.

Prerequisite: ME 5440.

ME5448 - Experimental Fluid Dynamics.

Credits: 3

Provides an introduction to the design of fluid dynamics experiments. Specific instrumentation will be discussed and methods of analyzing and assessing data will be presented.

Prerequisite: graduate standing.

ME5452 - Convection Heat Transfer

Credits: 3

Convection, including heat and momentum transfer. Boundary layer theory. Laminar and turbulent flows, steady and unsteady formulations including differential and integral descriptions. High velocity, compressible systems.

Cross Listed CHE 5452.

Prerequisite: ES 3360 or consent of instructor.

ME5455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Dual Listed ME 4455 ESE 4455

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME5461 - Computational Fluid Dynamics I

Credits: 3

An introduction to the fundamental techniques and theory of computational fluid dynamics. Topics include discretization methods (finite difference, finite volume, and finite element methods), numerical stability, consistency and convergence, and solution techniques such as explicit, implicit and multigrid methods. The emphasis will be on modern techniques for compressible flows.

Prerequisite: MATH 5310 or equivalent.

ME5462 - Computational Fluid Dynamics II

Credits: 3

A study of advanced techniques in modern-day scientific computing as applied to Computational Fluid Dynamics. These include unstructured mesh generation using Delaunay triangulation, searching and sorting techniques, and efficient data structures. Other topics cover efficient hardware implementation including cache-effects and parallel computing and sensitivity analysis for design

optimization.

Prerequisite: ME 5461

ME5472 - Continuum Mechanics

Credits: 3

The basic laws of the physical behavior of continuous media. Stress and deformation at a point; fundamental equations of balance of mass, momentum, and energy; second law of thermodynamics; curvilinear coordinate analysis. Applications to linear elasticity and fluid mechanics.

Prerequisite: graduate standing.

ME5474 - Energy Methods

Credits: 3

Introduction to variational calculus with applications in solid mechanics. The basic theorems of virtual work, minimum potential energy, and complementary energy are developed. Direct methods such as Castigliano's theorem as well as the approximate methods of Ritz and Galerkin are developed and used to obtain solutions for a variety of problems in solid mechanics.

Prerequisite: ME 3010

ME5475 - Topics in Mechanical Engineering II

Credits: 1-6

Max Credit (Max. 6)

Directed research in mechanical engineering.

Prerequisite: senior or graduate standing in engineering.

ME5478 - Seminar in Mechanical Engineer

Credits: 2

Prerequisite: graduate standing in engineering.

ME5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ME5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

advanced degree candidacy.

ME5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

ME5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ME5961 - Graduate Projects

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project. Prerequisites: enrollment in Plan B program and have departmental approval.

ME5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

MW4455 - Combustion Engineering

Credits: 3
The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Dual Listed ESE 4455

Prerequisite/Corequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

Medical Laboratory Science

MLSK4840 - Laboratory Education Methodology

Credits: 1

This course provides an overview of education methodology and issues related to roles as educators in the clinical laboratory profession. Course topics and assignments include pedagogy, curriculum design, assessment and accreditation. Major educational responsibilities for clinical laboratory professionals relating to continuing education, competency assurance, certification and licensure will be addressed.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4850 - Clinical Research Design

Credits: 2

A course in research design methods commonly used in clinical research. Emphasis is on research design, process, measurement, regulatory issues, and ethics, as used by investigators. The focus is to equip students with knowledge and skills necessary to critically examine professional literature, methodology and ethical considerations that influence research design.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4860 - Laboratory Management

Credits: 3

This course introduces students to laboratory management systems, testing, reimbursement, accrediting/regulatory issues, finances, information systems, QA/ QC improvement and supervisory roles in the clinical laboratory. Emphasis is on management and communication skills needed to work successfully as entry-level professionals in a health care setting.

USP Code [(none)<>COM3]

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4870 - Advanced Clinical Chemistry

Credits: 4

This course is designed to introduce students to advanced topics in clinical chemistry in relation to instrumentation, diagnostic testing and its correlation to disease states, and method correlation and validation. Students will demonstrate the ability to describe principles and applications required for the entry level laboratory scientist.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

MLSK4880 - Advanced Hematology: Erythrocytes

Credits: 2

Advanced hematology principles and techniques prepare students for practice in the clinical laboratory. This course will focus on advanced topics of hematology, focusing on normal and abnormal erythrocytes in relation to assessment, and disease correlation.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

MLSK4890 - Professional Career Paths and Review

Credits: 2

This Medical Laboratory Sciences program prepares students for a variety of graduate degrees and careers in laboratory medicine. This course is designed to help students investigate career and education opportunities after becoming a certified Medical Laboratory Scientist and also provides students with a cumulative review to ensure mastery of content.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

MLSK4981 - Advanced Clinical Practicum

Credits: 3

Advanced hematology principles and techniques prepare students for practice in the clinical laboratory. Topics include leukopoiesis, leukemias, lymphomas, hemostasis, coagulopathies, urinalysis and body fluids. Laboratory will focus on abnormal smears, normal and leukemic bone marrow evaluations, and coagulation mixing studies, factor assays and body fluids related to clinical disease states.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4982 - Advanced Clinical Practicum

Credits: 3

Principles of molecular technology used in clinical laboratories. Laboratory experiences include cytogenetics, nucleic acid extraction, hybridization, detection, amplification, sequencing, microarrays, and in-situ hybridization. Emphasis is on the areas of the clinical laboratory that use molecular techniques related to genetics, oncology, infectious disease, and identity testing for forensic and transplant purposes.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4983 - Advanced Clinical Practicum

Credits: 3

Principles of immunology theory, blood group systems, genetics, and immunohematology techniques. Procedures including evaluation of blood samples, pretransfusion compatibility testing, and transfusion reactions are studied. Serologic testing and problem-solving in antibody identification and complex procedures are stressed. Laboratory emphasizes modern practices, resolution of compatibility problems and advanced antibody identification methods.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4984 - Advanced Clinical Practicum- Microbiology

Credits: 3

Focus is on underlying mechanisms of microbial pathogenesis, host responses to infectious disease and clinical diagnosis procedures. Emphasis is on detailed mechanisms of infection, pathogenesis, and major discoveries and technologies in medical microbiology. Current issues in public and global health, epidemiology, bioterrorism, biotechnology and vaccination programs will be studied.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

Microbiology

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

MICR2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed PATB 2220.

Prerequisite: MOLB 2021 or MICR 2021.

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of

prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

MICR4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed PATB 4001.

Dual Listed MICR 5001.

Prerequisite: STAT 2050.

MICR4090 - Food Microbiology

Credits: 3

Discusses micro-organisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Cross Listed FDSC 4090.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4100 - Food Microbiology Lab

Credits: 1

Lab techniques used in food microbiology.

Cross Listed FDSC 4100.

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

MICR4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed PATB 4130.

Dual Listed MICR 5130.

Prerequisite: C or better in LIFE 2022.

MICR4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed SOIL 4140.

Dual Listed MICR 5140.

Prerequisite: SOIL 2010.

MICR4200 - Diagnostic Bacteriology

Credits: 1

Practical training with emphasis on diagnostic procedures used in a clinical microbiology laboratory. Students identify bacterial pathogens of animals and humans. Taught in a clinical setting utilizing selected clinical material. Techniques employed in the processing and identification of clinically significant bacteria are used and discussed. Safe laboratory practices for working with biohazards are presented.

Cross Listed PATB 4200.

Prerequisite: junior standing and a MICR course which included a laboratory.

MICR4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed PATB 4220

Dual Listed MICR 5220.

Prerequisite: PATB 2220 or MICR 2220, and statistics (or epidemiology).

MICR4321 - Microbiology Capstone

Credits: 4

Using a problem-based student learning model, students conceptualize, propose, perform and present a microbiology research study to address a real community problem. Students maintain a lab notebook, write an NSF-style research proposal, formulate hypotheses, engage in hands-on laboratory hypothesis testing and design and present a scientific poster.

USP Code [(none) <>COM3]

Prerequisite: MICR majors with junior or senior standing.

MICR4360 - Medical Entomology and Parasitology

Credits: 4

Emphasis on medically important arthropods, protozoa, and worms; clinical effects of infection epidemiology avoidance/control and identification/diagnosis.

Prerequisite: 8 hours of biological science

MICR4440 - Microbial Genetics

Credits: 3

Discusses microbial genetic approaches to study cell function and provides a molecular foundation for understanding how genes work to elicit phenotypes.

Cross Listed MOLB 4440.

Dual Listed MOLB 5440

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 or MICR 2240, and LIFE 3050

MICR4460 - Microbial Physiology

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MOLB 4460.

Dual Listed MOLB 5460

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MICR4500 - Veterinary Entomology and Parasitology

Credits: 3

Biology, importance and control of arthropod, helminth and protozoan parasites of food and companion animals. Diagnosis and identification of live and preserved specimens.

Cross Listed PATB 4500.

Prerequisite: 8 hours of biological science.

MICR4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540 and SOIL 4540.

Dual Listed MOLB 5540 and SOIL 5540 and ECOL 5540.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed PATB 4710.

Prerequisite: MICR 2220 or PATB 2220 or MOLB 2240 or MICR 2240.

MICR5001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed PATB 5001.

Dual Listed MICR 4001.

Prerequisite: STAT 2050.

MICR5130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed PATB 5130.

Dual Listed MICR 4130.

Prerequisite: C or better in LIFE 2022.

MICR5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed SOIL 5140.

Dual Listed MICR 4140.

Prerequisite: SOIL 2010.

MICR5220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/discussion of scholarly manuscripts,

historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed PATB 5220.

Dual Listed MICR 4220 and PATB 4220

Prerequisite: PATB 2220 or MICR 2220 and statistics (or epidemiology).

Molecular Biology

MOLB1101 - First-Year Seminar: Genetic Engineering and Synthetic Biology

Credits: 3

Fundamental concepts in molecular biology are applied towards critical evaluation of scientific evidence, claims, and varying viewpoints on current issues in genetic engineering and synthetic biology. Exciting but controversial recent advancements include reconstructing ancient genomes, redesigning genetic circuits, engineering novel genetic codes, and creating synthetic life.

When Offered Fall

USP Code [(none<>FYS)]

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021.

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular

processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

MOLB3320 - Molecular Biological Methods

Credits: 4

Integrated discussion and hands-on experience with modern bioinformatic and wet lab-based molecular, genetic and biochemical methods. Completion of the course should provide students with enhanced theoretical understanding and practical knowledge of many crucial modern computational and molecular biological techniques.

When Offered Spring

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4050 - Student Seminar

Credits: 1

Max Credit 4

Exposes students to current topics in molecular biosciences and examines primary journal literature with oral presentations and class discussions.

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4051 - Departmental Seminar

Credits: 1

Max Credit 15

Attend a series of weekly seminars on a diverse set of research topics presented by visiting faculty or research scientists and will participate in a discussion following the seminar.

Dual Listed MOLB 5051.

Former Course Number [4050]

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

MOLB4052 - Summer Seminar

Credits: 1

Max Credit 5

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material presented is taken from the research program of the speaker.

Dual Listed MOLB 5052.

Former Course Number [4050]

MOLB4053 - Communications in Molecular Biology

Credits: 3

Current topics in molecular biosciences and their applications in biotechnology and medicine will be explored. The course will develop student's abilities to read and discuss scientific literatures and present the topics in different oral/written formats, including oral presentations and scientific articles for public, research proposals and research-based business plans.

When Offered Spring

USP Code COM 3

Prerequisite: MOLB 4600 and LIFE 3050 or MOLB 3000 .

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3

Discusses microbial genetic approaches to study cell function and provides a molecular foundation for understanding how genes work to elicit phenotypes.

Cross Listed MICR 4440.

Dual Listed MOLB 5440.

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 or MICR 2240, and LIFE 3050.

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 and MOLB 3000 or MOLB 4600

MOLB4850 - Undergraduate Teaching Internship

Credits: 1

Max Credit 4

Undergraduate student will assist in classroom or laboratory teaching under the guidance of an instructor in Molecular Biology.

Lab/Lecture Hours Offered Satisfactory/Unsatisfactory only.

Prerequisite: Junior standing and consent of instructor.

MOLB4990 - Topics In:___

Credits: 1-3

Max Credit 6

Lectures, literature reviews and discussion of selected current topics in different areas of molecular biology. Please check class schedule for current offerings each semester.

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

MOLB5010 - Advanced Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 18

Students in PhD, MS and MA programs in Molecular Biology, and doctoral students in the Molecular and Cellular Life Sciences (MCLS) graduate program, work in laboratory or computational research projects under the guidance of a Molecular Biology faculty member.

Prerequisite: graduate standing and consent of instructor.

MOLB5050 - Advanced Student Seminar

Credits: 2

Max Credit 8

Introduction of reading, analyzing, and discussing primary sources in scientific literature. Read primary research papers, give presentations with full participation in critical discussions of data and interpretations of all journal articles analyzed. Papers chosen for review are typically related to research of Molecular Biology Departmental Seminar Series speakers.

Prerequisite: MOLB 3000 and MOLB 3610 or MOLB 4600.

MOLB5051 - Department Seminar

Credits: 1

Max Credit 15

Required attendance at a series of weekly seminars presented by visiting faculty on a diverse set of research topics. Undergraduates are able to use one credit hour to partially fulfill the seminar requirement.

Dual Listed MOLB 4051

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

MOLB5052 - Summer Seminar

Credits: 1

Max Credit (Max. 5)

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material presented is taken from the research program of the speaker.

Dual Listed MOLB 4052

MOLB5055 - Molecular Monday

Credits: 1

Max Credit 12

Students will present and hear formal presentations of research being conducted at the University of Wyoming in the molecular biosciences. Participation in question and answer periods following presentations is required, as is the completion of an evaluation form for each presentation.

Prerequisite: Graduate standing

MOLB5056 - Current Topics in Cell Biology

Credits: 2

Max Credit 18

Students present their ongoing laboratory research and receive feedback from lab group members. Principles of research design will be explored by critical reading and discussion of current topical literature.

Prerequisite: Graduate standing

MOLB5057 - Microbial and Synthetic Biology

Credits: 2

Max Credit 18

Students will present current research in the fields of Molecular Microbiology and Synthetic Biology, which will be followed by a critical discussion moderated by the course instructors. Students will explore the principles of research design by critical reading and discussion of scientific literature.

Prerequisite: Graduate standing

MOLB5058 - Experimental Molecular Genetics

Credits: 2

Max Credit 18

Students will formally present their research on molecular biology projects and will actively participate in discussion of other student's presentations. Students will also select current topical research articles and present critical evaluations of those articles to the class.

Prerequisite: Graduate standing

MOLB5260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 4260

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120

MOLB5400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400

Dual Listed MOLB 4400

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610

MOLB5440 - Microbial Genetics

Credits: 3

Discusses microbial genetic approaches to study cell function and provides a molecular foundation for understanding how genes

work to elicit phenotypes.

Dual Listed MOLB 4440

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 or MICR 2240, and LIFE 3050

MOLB5450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 4450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050.

MOLB5460 - Microbial Physiology and Metabolism I

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Dual Listed MOLB 4460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021/MICR 2021 or MOLB 2240, and MOLB 3610 or MOLB 4600 or CHEM 4400.

MOLB5520 - Molecular and Cellular Life Sciences Laboratory Rotations

Credits: 3

Max Credit 6

Laboratory research rotations for first year Molecular and Cellular Life Sciences (MCLS) students in the doctoral program.

Prerequisite: Enrollment in the Molecular and Cellular Life Sciences (MCLS) program.

MOLB5521 - Molecular and Cellular Life Sciences Cornerstone

Credits: 1

Introduction for students in the Molecular and Cellular Life Sciences program to graduate school and research. Exposes students to diverse faculty research programs and elements fundamental to successful graduate and scientific careers, including scientific publishing, grants, careers, intellectual property, and ethical expectations.

When Offered Fall

Prerequisite: Enrollment in the Molecular and Cellular Life Sciences doctoral program.

MOLB5540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540 or MICR 4540 or SOIL 4540

Dual Listed SOIL 5540 or ECOL 5540

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB5600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 4600

When Offered Fall

Prerequisite: Consent of instructor.

MOLB5610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 4610

Prerequisite: Consent of instructor.

MOLB5630 - Advanced Topics in Molecular Biology

Credits: 1-3

Max Credit 6

Lectures, literature reviews and discussion of selected current topics in molecular biology. Check class schedule for current offerings each semester.

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600

MOLB5670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human

diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 4670

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB5680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanism affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 4680

When Offered Spring

Prerequisite: MOLB 2021 and MOLB 3000 or MOLB 4600

MOLB5700 - Principles of Biomedical Research

Credits: 3

This series of complementary workshops will provide opportunities to develop knowledge and skills in scientific methodology, data analysis, statistical interpretation and representation, scientific communication, research codes and ethics, entrepreneurship, and interpersonal conduct. Students will also learn about career options and develop individual goals and trajectories based on strengths and interests.

When Offered Spring

Prerequisite: Graduate student status (biomedical fields preferred).

MOLB5900 - Practicum in College Teaching

Credits: 1-3

Max Credit 3

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: Graduate standing and consent of instructor.

MOLB5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit 16

Prerequisite: Advanced degree candidacy.

MOLB5940 - Continuing Registration: Off Campus

1370

Credits: 1-2
Max Credit 16

Prerequisite: Advanced degree candidacy.

MOLB5959 - Enrichment Studies

Credits: 1-3
Max Credit 99

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

MOLB5960 - Thesis Research

Credits: 1-12
Max Credit 24

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

MOLB5980 - Dissertation Research

Credits: 1-12
Max Credit 48

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: Enrollment in a graduate degree program.

MOLB5990 - Internship

Credits: 1-12
Max Credit 24

Prerequisite: Graduate standing.

Music

MUSCA4370 - Live Sound Reinforcement

Credits: 1-3
Topics include history of live sound reinforcement, analog audio, digital consoles, system checks, troubleshooting, and client

relations. Students will build upon MUSC 4360 with focus on live sound reinforcement.

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

MUSC1000 - Introduction to Music

Credits: 3

Introduces music appreciation to students who have little or no musical training. Requires attendance at a specified number of public concerts.

USP Code [CA<>H]

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC1007 - Hip-Hop/Pop Music Appreciation

Credits: 3

From Kool Herc, Notorious B. I. G, Van Halen, and Queen, all the way up to today's artists, students will learn to understand, discern, and truly appreciate hip-hop and popular music.

MUSC1010 - Music Fundamentals

Credits: 3

To establish/ review the foundation of the materials and structures of music theory fundamentals.

MUSC1025 - Introduction to Music Education

Credits: 2

Introduces music teacher education. Includes overview of vocal and instrumental music education and teaching processes in grade levels K-12. Requires on-site visits and observations of music programs.

When Offered (Offered spring semester)

Former Course Number [1020]

Prerequisite: music majors only.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC1080 - Baritone Horn I

Credits: 1-2

Max Credit (Max. 8)

Applied Lessons

MUSC1090 - Bassoon I

Credits: 1-2

Max Credit (Max. 8)

MUSC1100 - Cello I

Credits: 1-2

Max Credit (Max. 8)

MUSC1110 - Clarinet I

1373

Credits: 1-2
Max Credit (Max. 8)

MUSC1120 - Double Bass I

Credits: 1-2
Max Credit (Max. 8)

MUSC1130 - Flute I

Credits: 1-2
Max Credit (Max. 8)

MUSC1140 - French Horn I

Credits: 1-2
Max Credit (Max. 8)

MUSC1150 - Guitar I

Credits: 1-2
Max Credit (Max. 8)

MUSC1160 - Harp I

Credits: 1-2
Max Credit (Max. 8)

MUSC1170 - Oboe I

Credits: 1-2
Max Credit (Max. 8)

MUSC1180 - Organ I

Credits: 1-2
Max Credit (Max. 8)

MUSC1190 - Percussion I

Credits: 1-2
Max Credit (Max. 8)

MUSC1200 - Piano I

Credits: 1-2
Max Credit (Max. 8)

MUSC1210 - Saxophone I

Credits: 1-2
Max Credit (Max. 8)

MUSC1220 - Trombone I

Credits: 1-2
Max Credit (Max. 8)

MUSC1230 - Trumpet I

Credits: 1-2
Max Credit (Max. 8)

MUSC1240 - Tuba I

Credits: 1-2
Max Credit (Max. 8)

MUSC1250 - Violin I

Credits: 1-2
Max Credit (Max. 8)

MUSC1260 - Viola I

Credits: 1-2
Max Credit (Max. 8)

MUSC1270 - Voice I

Credits: 1-2
Max Credit (Max. 8)

MUSC1280 - Collaborative Piano I

Credits: 1-2
Max Credit (Max. 8)

Encompasses supervised practice in the art of collaborative piano playing. Discusses traditional usages as applicable to various schools and periods of vocal and instrumental duo literature.

Prerequisite: audition required.

MUSC1290 - Class Piano I

Credits: 1
Encompasses group instruction for the beginner at the keyboard. First semester of four-semester sequence. Enrollment limited to music or music education majors whose principal performance area is not piano.

When Offered (Offered fall semester)

MUSC1295 - Class Piano II

Credits: 1

Continues skills begun in MUSC 1290 including all major scales, beginning minor scales, prescribed chord progressions, harmonization, transposition, sight reading and repertoire.

When Offered (Offered spring semester)

Prerequisite: MUSC 1290 or successful completion of final exam requirements for MUSC 1290.

MUSC1312 - Public School Tech: Brass

Credits: 2

This course is designed to teach the fundamentals of brass pedagogy and performance for music education majors. The course consists of two components applied study on brass instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1322 - Public School Tech: Percussion

Credits: 2

This course is designed to teach the fundamentals of percussion pedagogy and performance for music education majors. The course consists of two components applied study on percussion instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1332 - Public School Tech: Strings

Credits: 2

This course is designed to teach the fundamentals of string pedagogy and performance for music education majors. The course consists of two components applied study on string instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1340 - Public School Methods: Voice I

Credits: 1

Max Credit (Max. 2)

Encompasses group instruction in vocal methods for music education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1352 - Public School Tech: Woodwinds

Credits: 2

This course is designed to teach the fundamentals of woodwind pedagogy and performance for music education majors. The course consists of two components applied study on woodwind instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1360 - Public School Methods: Guitar

Credits: 1

Max Credit (Max. 2)

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1370 - Marching Band

Credits: 1

Max Credit (Max. 8)

Fall semester: marching band. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1375 - Symphonic Band

Credits: 1

Max Credit (Max. 8)

Ensembles. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

Prerequisite: players are selected by audition. Auditions will take place the first week of classes.

MUSC1380 - Wind Ensemble

Credits: 1

Max Credit (Max. 8)

(MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

USP Code [CA<>(none)]

Prerequisite: players are selected by audition from the university band.

MUSC1390 - Jazz Ensemble

Credits: 1

Max Credit (Max. 8)

Preparation and performance in a select jazz ensemble of the finest in standard jazz ensemble repertory and contemporary compositions by living jazz artists.

USP Code [(none)<>H]

Restricted Restricted to freshmen and sophomores.

Prerequisite: audition required. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1400 - Collegiate Chorale I

Credits: 1

Max Credit (Max. 12)

Will provide the committed singer with outstanding performing experiences ranging from major choral masterworks to masterpieces of the a cappella tradition, both sacred and secular. The choir is a professional training ensemble, and each student will explore a variety of vocal techniques for development. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

USP Code [CA<>H]

Prerequisite: Audition required.

MUSC1405 - The UW Singing Statesmen I

Credits: 1

Max Credit (Max. 12)

Will provide all levels of singer with the rich tradition of male ensemble singing. Students will solidify basic musicianship skills and vocal technique while experiencing camaraderie and service to the region. This ensemble is open to both music majors and non-music majors without audition.

USP Code [(none)<>H]

MUSC1407 - Happy Jacks I

Credits: 1

Max Credit (Max. 12)

Student-led male a cappella ensemble that sings contemporary, jazz, and traditional repertoire. The ensemble travels regularly to promote male singing through concerts and school workshops.

Prerequisite: Audition required.

Corequisite: enrollment in The UW Singing Statesmen.

MUSC1411 - Vocal Jazz I

Credits: 1

Max Credit (Max. 12)

Sings standard repertoire from various jazz traditions, often with rhythm section. Focus on building musical skill and literacy in the jazz idiom.

Prerequisite: Audition required.

MUSC1415 - Bel Canto Women's Chorus

Credits: 1

Max Credit (Max. 12)

Builds community through score study and the development of fundamental musicianship skills, including sight singing, ear training, and vocal technique. This ensemble is open to both music majors and non-music majors without audition.

USP Code [(none)<>H]

MUSC1417 - Laramie Civic Chorus I

Credits: 1

Max Credit (Max. 12)

Welcomes students, faculty, and community members. Repertoire includes musical works from a multiplicity of style periods and genres in both Western and non-Western traditions and includes regular collaboration with the UW Symphony Orchestra for major choral works.

USP Code [(none)<>H]

Prerequisite: Audition required.

MUSC1420 - Opera Theatre

Credits: 1

Max Credit (Max. 8)

(MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1430 - Symphony Orchestra I

Credits: 1

Max Credit (Max. 8)

The premier orchestral ensemble in the Department of Music. Participation in this ensemble prepares students to perform some of the great symphonic literature from a wide variety of musical periods. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

USP Code [CA<>H]

Prerequisite: audition only, freshmen and sophomores.

MUSC1440 - Chamber Orchestra I

Credits: 1

Max Credit (Max. 8)

Devoted to the rehearsal and performance of masterpieces from the chamber orchestra repertoire. Students in the 1440 level of Chamber Orchestra will be expected to have a competent level of proficiency on their parts. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1450 - Percussion Ensemble

Credits: 1

Max Credit (Max. 8)

Present concerts that represent the literature and techniques of this growing genre in music. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1460 - Brass Ensemble

Credits: 1

Max Credit (Max. 8)

The University of Wyoming Brass Ensemble is a course devoted to the rehearsal and performance of masterpieces from the brass chamber repertoire. Students in the 1460 level of Brass Ensemble will be expected to have a competent level of proficiency on their parts. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC1470 - Woodwind Ensemble

Credits: 1

Max Credit (Max. 8)

Preparation and performance in a select woodwind chamber ensemble of the finest standard and contemporary wind ensemble literature. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

Restricted Enrollment is restricted freshmen and sophomores.

Prerequisite: audition required.

MUSC1480 - Chamber Music I

Credits: 1

Max Credit (Max. 8)

Designed to provide students with training in the ideal medium of chamber music (small ensembles, such as trio, string quartet, etc.), where they can apply and integrate all elements of their musical knowledge. These include but are not limited to rhythm, intonation, tone-production, blend, musical interpretation, concept of style, etc. (MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

Prerequisite: audition required.

MUSC1490 - Ensemble

Credits: 1

(MUSC 1370, MUSC 1375, MUSC 1380, MUSC 1390, MUSC 1400, MUSC 1420, MUSC 1430, MUSC 1440, MUSC 1450, MUSC 1460, MUSC 1470, MUSC 1480, MUSC 1490. Ensembles. Maximum of 14 semester hours may be used toward the bachelor's degree from any combination of these courses. Music majors must play in one ensemble each semester in residence. Scholarship recipients must play in two ensembles each semester in residence.)

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC2045 - Aural Theory IV

Credits: 1

Second semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 2035.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives II

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC2080 - Baritone Horn II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2090 - Bassoon II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2100 - Cello II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2110 - Clarinet II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2120 - Double Bass II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2130 - Flute II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2140 - French Horn II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2150 - Guitar II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2160 - Harp II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2170 - Oboe II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2180 - Organ II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2190 - Percussion II

1384

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2200 - Piano II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2210 - Saxophone II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2220 - Trombone II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2230 - Trumpet II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2240 - Tuba II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2250 - Violin II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2260 - Viola II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2270 - Voice II

Credits: 1-2
Applied Lessons

Prerequisite: previous training proven with an audition or 2-4 semester hours of MUSC 1080 through MUSC 1270 on the same instrument.

MUSC2290 - Class Piano III

Credits: 1
Third semester of four-semester sequence developing further piano skills for non-pianists. Involves prescribed scales, arpeggios, harmonizations, chord progressions, transpositions, sight-reading and repertoire.

When Offered (Normally offered fall semester)

Prerequisite: MUSC 1295 or successful completion of final exam for MUSC 1295.

MUSC2295 - Class Piano IV

Credits: 1
Final semester of four-semester sequence of piano skills for non-pianists in which the final exam is the departmental piano proficiency exam.

When Offered (Normally offered spring semester)

Prerequisite: MUSC 2290 or successful completion of the final exams for preceding courses.

MUSC2320 - Diction for Singers I

Credits: 2
Studies phonetic sounds of English and Italian.

When Offered (Offered fall semester)

MUSC2325 - Diction for Singers II

Credits: 2

Studies phonetic sounds of French and German. (Usually offered spring semester)

MUSC2395 - Piano Proficiency

Credits: 0

Piano proficiency test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2395 a maximum of 2 times. Consult the Music Department Handbook for specific requirements.

MUSC3015 - Introduction to the Music of the World's Peoples

Credits: 3

Students develop three primary interconnected literacies for the study and understanding of musics of other cultures: analytical music listening, understanding the concept of music culture, and interpretation of musical events. Student writing is a primary tool for developing these literacies. Texts from the Oxford University Press Global Music Series to study musics of Africa, Indonesia, India, and Eastern Europe are used.

Cross Listed ANTH 3015.

USP Code [WB,G<>(none)]

Former Course Number [2015]

Prerequisite: MUSC 1000 or permission of instructor and WA.

MUSC3025 - Fundamentals of Jazz Improvisation

Credits: 2

Continuation of Jazz Aural Theory IV, MUSC 1045. More advanced topics will be covered and more challenging repertoire will be explored. A strong emphasis will be placed on common practice techniques in mainstream jazz.

Prerequisite: MUSC 2045.

MUSC3080 - Baritone Horn III

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3090 - Bassoon III

1387

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3100 - Cello III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3110 - Clarinet III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3120 - Double Bass III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3130 - Flute III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3140 - French Horn III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3150 - Guitar III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3160 - Harp III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3170 - Oboe III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3180 - Organ III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3190 - Percussion III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3200 - Piano III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3210 - Saxophone III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3220 - Trombone III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3230 - Trumpet III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3240 - Tuba III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3250 - Violin III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

MUSC3260 - Viola III

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3265 - Music Education Proficiency Review

Credits: 0

This course is required for entrance into upper-division Music Education coursework. The review will assess competency in oral and written communication skills, preliminary teacher performance, sight singing, and error detection. Completion is in the sophomore year or in the first semester for transfer students.

Prerequisite: sophomore standing.

MUSC3270 - Voice III

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC3280 - Collaborative Piano II

Credits: 1-2

Max Credit (Max. 8)

Encompasses supervised practice in the art of collaborative piano playing. Discusses traditional usages as applicable to various schools and periods of vocal and instrumental duo literature.

Prerequisite: audition required.

MUSC3315 - Teaching Violin to Children I

Credits: 2

This course covers knowledge and skills needed to guide a young violinist's progress through the beginning stages, including preparing students and parents for the first lesson, establishing foundational instrumental skills; developing pulse, pitch and rhythm reading; exploration of Suzuki philosophy and the pedagogy of Rolland; supplemental repertoire and more.

Prerequisite: Current enrollment as a Music Education or Music Performance major with violin or viola as the main instrument. Open to freshmen and sophomores with permission of instructor.

MUSC3325 - Teaching Violin to Children II

Credits: 2

TVC 2 goes into more depth about the educational process of the young violinist or violist. Particularly important is the introduction of shifting and vibrato. Opportunities to observe lessons and groups with professional teachers and gain hands on experience by giving 'helper lessons' will be included.

Prerequisite: MUSC 3315, current enrollment as a Music Education or Music Performance major with violin or viola as the main instrument. Open to freshmen and sophomores with permission of the instructor.

MUSC3380 - Wind Ensemble II

Credits: 1
Max Credit (Max. 8)

Preparation and performance in a select concert band of the finest in contemporary and classic wind and percussion repertory.

Prerequisite: audition required, MUSC 1380 or equivalent and junior standing.

MUSC3385 - World Music Ensemble

Credits: 1
Max Credit (Max. 6)

Participate fully in music making in Sikuris de Wyoming, the Wyoming Gamelan Candra Wyoga, or the Laramie Irish tune session. These group music-making opportunities are distinctly different from other leader-focused ensembles offered in the Department of Music.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC3390 - Jazz Ensemble II

Credits: 1
Max Credit (Max. 8)

Preparation and performance in a select jazz ensemble of the finest in jazz repertory.

USP Code [(none)<>H]

Prerequisite: audition required, MUSC 1390 or equivalent and junior standing.

MUSC3400 - Collegiate Chorale II

Credits: 1
Max Credit (Max. 12)

Provide the advanced and committed singer with outstanding performing experiences ranging from major choral masterworks to masterpieces of the a cappella tradition, both sacred and secular. The choir is a professional training ensemble and students may be asked to take on leadership roles. Commitment of time to advance the excellence and public awareness of the ensemble will be required.

USP Code [(none)<>H]

Prerequisite: audition required, and junior standing or above.

MUSC3405 - UW Singing Statesmen II

Credits: 1
Max Credit (Max. 12)

Provides all levels of singer with the rich tradition of male ensemble singing. Solidify basic musicianship skills and vocal technique while experiencing camaraderie and service to the region. May be asked to take on leadership roles to advance public awareness. Open to music majors and non-music majors without audition.

USP Code [(none)<>H]

Prerequisite: Junior standing or above.

MUSC3407 - Happy Jacks II

Credits: 1

Max Credit (Max. 12)

Student-led male a cappella ensemble that sings contemporary, jazz, and traditional repertoire. Upperclass students may be asked to take on leadership roles. Ensemble travels regularly to promote male singing through concerts and school workshops.

Prerequisite: Audition only.

Corequisite: enrollment in The UW Singing Statesmen.

MUSC3411 - Vocal Jazz II

Credits: 1

Max Credit (Max. 12)

Sings standard repertoire from various jazz traditions, often with rhythm section. Focus on building musical skill and literacy in the jazz idiom. Students may be asked to take on leadership roles.

Prerequisite: Audition required. Junior standing or above.

MUSC3415 - Bel Canto Women's Chorus II

Credits: 1

Max Credit (Max. 12)

Builds community through score study and the development of fundamental musicianship skills, including sight singing, ear training, and vocal technique. May be asked to take on leadership roles. This ensemble is open to music majors and non-music majors without audition.

USP Code [(none)<>H]

Prerequisite: Junior standing or above.

MUSC3417 - Laramie Civic Chorus II

Credits: 1

Max Credit (Max. 12)

Welcomes students, faculty, and community members. Repertoire includes musical works from a multiplicity of style periods and

genres in both Western and non-Western traditions and includes regular collaboration with the UW Symphony Orchestra for major choral works. Students may be asked to take on leadership roles.

USP Code [(none)<>H]

Prerequisite: Junior standing or above; audition required.

MUSC3430 - Symphony Orchestra II

Credits: 1

Max Credit (Max. 8)

Preparation and performance in a select symphony orchestra of the finest in orchestral repertoire.

USP Code [(none)<>H]

Prerequisite: audition required, MUSC 1430 or equivalent and junior standing.

MUSC3440 - Chamber Orchestra II

Credits: 1

Max Credit (Max. 8)

Devoted to the rehearsal and performance of masterpieces from the chamber orchestra repertoire. Students in the 3440 level of Chamber Orchestra will be expected to have a competent level of proficiency on their parts.

MUSC3450 - Percussion Ensemble II

Credits: 1

Max Credit (Max. 8)

A chamber music ensemble, performing repertoire which encompasses classical percussion literature, ethnic drumming styles, and steel drum ensemble. Designed for the advanced undergraduate who has normally attained a higher level of technical ability in percussion by their junior/senior year.

Prerequisite: four semesters of MUSC 1450 or equivalent and junior standing.

MUSC3460 - Brass Ensemble II

Credits: 1

The University of Wyoming Brass Ensemble is a course devoted to the rehearsal and performance of masterpieces from the brass chamber repertoire. Students in the 3460 level of Brass Ensemble will be expected to have a competent level of proficiency on their parts and assume leadership roles in the ensemble.

MUSC3470 - Woodwind Ensemble II

Credits: 1

Max Credit (Max. 8)

Preparation and performance in a select woodwind chamber ensemble of the finest standard and contemporary wind ensemble literature.

Restricted Enrollment is restricted to juniors and seniors.

Prerequisite: audition required; MUSC 1470, and junior standing.

MUSC3480 - Chamber Music II

Credits: 1

Designed to provide students with training in the ideal medium of chamber music (small ensembles, such as trio, string quartet, etc.), where they can apply and integrate all elements of their musical knowledge. These include but not limited to rhythm, intonation, tone-production, blend, musical interpretation, concept of style, etc.

USP Code [CA<>(none)]

Prerequisite: consent of instructor; MUSC 1480 and junior standing.

MUSC3490 - Piano Ensemble II

Credits: 1

Max Credit (Max. 8)

Training in the medium of piano duo and piano duet repertoire, apply and integrate all elements of musical knowledge. These include but are not limited to rhythm, tone-production, musical interpretation, concept of style, etc.

Prerequisite: consent of instructor; Audition required. Juniors or Seniors.

MUSC3500 - Junior Recital

Credits: 0

Students will perform a 30 minute (minimum) recital of appropriate repertoire. Consult your studio teacher for individual studio requirements.

Prerequisite: 4 semesters of private instruction, consent of instructor.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4001 - Music Entrepreneurship Seminar

Credits: 2

Further crystalizes successful business enterprise development introduced in ENTR 2700. Student will hone entrepreneurial skills in idea creation, business incubation, development, research, and commercialization.

MUSC4005 - Internship in Music Business

Credits: 1

Offers an evaluated and professional work experience in public or private organizations on assignments relating to student's career goals, allowing students to explore the relationship between theory and practice in their major.

MUSC4020 - Advanced Jazz Improvisation

Credits: 2

Continuation of Fundamentals of Jazz and Improvisation , MUSC 3025. Students will learn the harmonic and melodic language of bebop and hard bop through performance and composition of tunes in these idioms.

Prerequisite: MUSC 3025.

MUSC4025 - Jazz Composition and Arranging

Credits: 2

Continuation of Advanced Jazz Improvisation , MUSC 4020. Students explore developments in jazz improvisation and composition since 1960. Advanced theoretical concepts are covered in lectures and workshop sessions.

Prerequisite: MUSC 4020.

MUSC4040 - Composition

Credits: 2

Max Credit (Max. 12)

Prerequisite: MUSC 4010.

MUSC4050 - Advanced Studies in World Music

Credits: 3

Focuses on music-making and cultures of three musical traditions from around the world.

Prerequisite: MUSC 3015.

MUSC4060 - Applied Composition Lessons

Credits: 1-2

Max Credit (Max. 12)

Students meet on a weekly basis with the instructor and work on individual composition projects and exercises. Students will be

required to take a juried portfolio examination at the end of the semester to determine, in part, the final grade.

Prerequisite: Previous training proven with a portfolio/ audition or MUSC 4040.

MUSC4070 - Conducting

Credits: 3

Examines basic techniques of baton, score reading, familiarization with standard works, practical experience in directing choral and instrumental groups. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030, MUSC 2035, MUSC 2040, and MUSC 2045.

MUSC4080 - Baritone Horn IV

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4090 - Bassoon IV

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4100 - Cello IV

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4110 - Clarinet IV

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4120 - Double Bass IV

Credits: 1-2

Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4130 - Flute IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4140 - French Horn IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4150 - Guitar IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4155 - Senior Music Education Recital

Credits: 0
Music Education students perform a recital which may be a part of a Convocation or a separate performance. Consult your studio teacher for individual studio requirements.

Prerequisite: senior standing and studio teacher consent.

MUSC4160 - Harp IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4170 - Oboe IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4180 - Organ IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4190 - Percussion IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4200 - Piano IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4210 - Saxophone IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4220 - Trombone IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4230 - Trumpet IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4240 - Tuba IV

1399

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4250 - Violin IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4255 - Elementary and Secondary Methods: Practicum

Credits: 2
Part of Phase IIIa of the music teacher education program. Practicum experience is integral to MUSC 4265 and must be taken concurrently.

When Offered (Offered fall semester)

Prerequisite: 2.750 cumulative GPA, successful completion of all music and professional education courses and concurrent enrollment in MUSC 4265.

MUSC4260 - Viola IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4265 - Elementary and Secondary Music Teaching Methods

Credits: 8
Comprised of content and pedagogy in Music. Must be taken in the same semester as the 2 semester hour course, MUSC 4255.

When Offered (Offered fall semester).

USP Code [(none)<>COM3]

Prerequisite: 2.750 minimum cumulative GPA, 2.750 GPA in major, successful completion of all music and professional education courses and concurrent enrollment in MUSC 4255.

MUSC4270 - Voice IV

Credits: 1-2
Applied Lessons

Prerequisite: 2-4 semester hours of MUSC 2080 through MUSC 2270 on the same instrument.

MUSC4310 - Choral Arranging

Credits: 2

Teaches working techniques of arranging for the voice in varied combinations of choral ensembles. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030 and MUSC 2035.

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP Code [CA,D<>(none)]

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP Code [(none)<>COM3]

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4345 - Contemporary Period

Credits: 3

Surveys styles and composers of contemporary period. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP Code [(none)<>H]

Prerequisite: consent of instructor.

MUSC4360 - Fundamentals of Audio for Music Production

1401

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

MUSC4365 - Recording Art and Technology

Credits: 3

Topics include history of music production, multi-track recording, digital audio workstations, digital editing, session management and production, mixing, mastering, and distribution.

MUSC4380 - Jazz Techniques

Credits: 2

Max Credit (Max. 2)

Surveys jazz structure, styles, techniques and materials with respect to public school music programs. Intended for music education major.

When Offered (Offered spring semester)

Prerequisite: MUSC 2035.

MUSC4400 - Vocal Literature

Credits: 0.5-2

Max Credit (Max. 6)

Studies solo materials from Renaissance to present, emphasizing style and interpretation.

Prerequisite: 4 semester hours of voice.

MUSC4455 - Elem General Music Methods

Credits: 3

This course is designed to prepare students for a career in K-6 music teaching while emphasizing the need for music teachers to recognize diverse student needs, including those unique qualities brought into the classroom by marginalized populations.

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent enrollment in MUSC 4705.

MUSC4460 - Choral Music Methods

Credits: 3

This course is designed to help pre-professional music educators gain tools for teaching secondary choral music. Topics to be explored include choral literature, methodology involving strengthening musicianship, rehearsal techniques, and issues pertaining to the development of a choral ensemble program.

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent Enrollment in MUSC 4715 for choral emphasis students.

MUSC4465 - Instrumental Music Methods

Credits: 3

Based on a comprehensive instrumental music education model, this course acquaints students with curriculum development, instructional planning, and materials and techniques designed for teaching musical concepts and skills in instrumental ensemble and class lesson settings.

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent enrollment in MUSC 4715 for instrumental emphasis students.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP Code [(none)<>H]

MUSC4500 - Directed Independent Study-Undergraduate

Credits: 1-2

Max Credit (Max. 4)

Prerequisite: consent of department head.

MUSC4510 - Applied Music Methods and Materials: Brass Instruments

Credits: 1

Max Credit (Max. 2)

Courses taken in the form of private lessons and subject to similar fees.

Note: (\$85 Fee)

Prerequisite: at least 16 semester hours in one performance field and/or consent of instructor.

MUSC4520 - Applied Music Methods and Materials: Organ

Credits: 1

Max Credit (Max. 2)

Courses taken in the form of private lessons and subject to similar fees.

Note: (\$85 Fee)

Prerequisite: at least 16 semester hours in one performance field and/or consent of instructor.

MUSC4530 - Applied Music Methods and Materials: Piano

Credits: 1

Max Credit (Max. 2)

Courses taken in the form of private lessons and subject to similar fees.

Note: (\$85 Fee)

Prerequisite: at least 16 semester hours in one performance field and/or consent of instructor.

MUSC4560 - Applied Music Methods and Materials: Voice

Credits: 1

Max Credit (Max. 2)

Courses taken in the form of private lessons and subject to similar fees.

Note: (\$100 Fee)

Prerequisite: at least 16 semester hours in one performance field and/or consent of instructor.

MUSC4590 - Senior Recital

Credits: 2

Max Credit (Max. 4)

Prerequisite: at least 14 semester hours in one performance field and senior standing.

MUSC4615 - Instrumental Pedagogy

Credits: 0.5-2

Max Credit (Max. 3)

Surveys teaching materials in solo and chamber literature, techniques, practices, and methods for applicable instrument.

Prerequisite: 8 credit hours of individual study in a specific instrument.

MUSC4620 - Practicum in Music Education

Credits: 1

Provides opportunity to gain experience in music classroom in area public schools. Includes work on meeting educational standards of Wyoming necessary to begin student teaching and continued work on developing a teaching portfolio.

Prerequisite: MUSC 1050 and junior status.

MUSC4625 - Piano Pedagogy

Credits: 2

Max Credit (Max. 2)

This specialized course addresses the teaching of piano to children with special emphasis on the development of correct technique, studio teaching techniques, student learning styles, repertoire assignment, and all aspects of establishing a private studio. The last quarter of the class includes an in-class, supervised teaching unit.

Dual Listed MUSC 5625.

Former Course Number [4600]

Prerequisite: 8 credit hours of piano study.

MUSC4635 - Vocal Pedagogy

Credits: 2

This specialized course addresses anatomy and physiology of the vocal instrument and the scientific principles surrounding it, studio teaching techniques, student learning styles, repertoire assignment, and all aspects of establishing a private voice studio. The last quarter of the class includes an in-class, supervised teaching unit. Students enrolled in the graduate level (5635) will undertake an extensive research paper/project and additional teaching.

Dual Listed MUSC 5635.

When Offered (Offered alternate spring semesters)

Former Course Number [4610]

Prerequisite: 8 credits of voice or permission of instructor.

MUSC4650 - Keyboard Literature

Credits: 3

An overview of solo ensemble keyboard literature from the 1600s to the present, focusing on major composers and common compositional forms. Includes listening assignments and examinations as well as individual research papers and class presentations.

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4651 - String Solo Literature

Credits: 3

Provide a survey of the masterpieces of string solo literature (violin, viola, cello and bass literature) in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: 8 hours of lessons in string instruments.

MUSC4652 - Chamber Music Literature

Credits: 3

Provide a survey of the masterpieces of chamber literature in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: MUSC 2050 and MUSC 2055 or permission of instructor.

MUSC4700 - Elementary Student Teaching in Music

Credits: 8

The final professional academic semester of the teacher education program. A full-time residency with an elementary mentor teacher.

Prerequisite: 2.750 cumulative GPA, 3.000 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

MUSC4705 - Elementary Music Ed Practicum

Credits: 1

Practicum experience is integral to development as a music teacher. As part of the Music Teaching Methods Sequence, pre-service music teachers will be immersed into authentic elementary and secondary music settings.

Restricted Restricted to Music Education majors.

Prerequisite: Concurrent enrollment with MUSC 4455 for instrumental emphasis students.

MUSC4710 - Secondary Student Teaching in Music

Credits: 8

The final professional academic semester of the teacher education program. A full-time residency with a secondary mentor teacher.

Prerequisite: 2.750 cumulative GPA, 3.000 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

MUSC4715 - Secondary Music Ed Practicum

Credits: 1

Practicum experience is integral to development as a music teacher. As part of the Music Teaching Methods Sequence, pre-service music teachers will be immersed into authentic elementary and secondary music settings.

Restricted Restricted to Music Education majors.

Prerequisite: Concurrent enrollment with MUSC 4460 or MUSC 4465.

MUSC4750 - Marching Band Techniques

Credits: 1

Applies specific various drill design techniques including corps style, military, show band and computer applications.

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

MUSC4790 - Choral Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to choral group rehearsals concerning such problems as intonation, good vocal production, phrasing, diction, dynamics, balance, etc. Overviews appropriate choral literature.

Prerequisite: MUSC 4070 and passed piano proficiency requirement.

MUSC4990 - Topics in:

Credits: 1-12

Max Credit (Max. 12)

Encompasses various topics in music. Specific subjects vary from year to year as course is often taught by distinguished visiting artists and lecturers or music faculty. Presents topics of special interest to music majors, graduate students and music educators. Please check class schedule for course titles each semester.

Prerequisite: consent of instructor.

MUSC5010 - Mentoring the Pre-Service Music Educator

Credits: 1

Max Credit (Max. 4)

Designed for K-12 supervisors of pre-service music teachers, the goal of the course is to provide guidance and theoretical grounding through readings, discussion, journaling, and research projects. Participants will participate in two on-site workshops, weekly tele-conferences and complete a written research project.

Prerequisite: consent of instructor.

MUSC5030 - Advanced Theory I

Credits: 3

First semester of a one-year course. Analysis of, and practice in, the more recent harmonic idioms with advanced aural and keyboard harmony.

Prerequisite: MUSC 2030, MUSC 2035.

MUSC5080 - Baritone Horn V

Credits: 1-2

Max Credit (Max. 8)

Prerequisite: 2-4 semester hours of MUSC 4080 on the same instrument or graduate standing.

MUSC5090 - Bassoon V

Credits: 1-2

Max Credit (Max. 8)

MUSC5100 - Cello V

Credits: 1-2

Max Credit (Max. 8)

MUSC5110 - Clarinet V

Credits: 1-2

Max Credit (Max. 8)

MUSC5120 - Double Bass V

Credits: 1-2

Max Credit (Max. 8)

MUSC5130 - Flute V

Credits: 1-2

Max Credit (Max. 8)

MUSC5140 - French Horn V

Credits: 1-2

Max Credit (Max. 8)

MUSC5150 - Guitar V

Credits: 1-2

Max Credit (Max. 8)

MUSC5160 - Harp V

Credits: 1-2
Max Credit (Max. 8)

MUSC5170 - Oboe V

Credits: 1-2
Max Credit (Max. 8)

MUSC5180 - Organ V

Credits: 1-2
Max Credit (Max. 8)

MUSC5190 - Percussion V

Credits: 1-2
Max Credit (Max. 8)

MUSC5200 - Piano V

Credits: 1-2
Max Credit (Max. 8)

MUSC5210 - Saxophone V

Credits: 1-2
Max Credit (Max. 8)

MUSC5220 - Trombone V

Credits: 1-2
Max Credit (Max. 8)

MUSC5230 - Trumpet V

Credits: 1-2
Max Credit (Max. 8)

MUSC5240 - Tuba V

Credits: 1-2
Max Credit (Max. 8)

MUSC5250 - Violin V

Credits: 1-2
Max Credit (Max. 8)

MUSC5260 - Viola V

Credits: 1-2
Max Credit (Max. 8)

MUSC5270 - Voice V

Credits: 1-2
Max Credit (Max. 8)

MUSC5310 - Music Research Methods

Credits: 2

Prepares students to be knowledgeable consumers of music and interdisciplinary information. Topics include the musicology research process, information ethics, and critical analyses and integration of information sources into writing. Information literacy principles and research techniques equip students for both graduate-level music research and the post-graduate, professional world.

Prerequisite: graduate standing in music.

MUSC5315 - Advanced Instruction in String Teaching I

Credits: 2

This course, designed for graduate students, covers the knowledge and skills needed to guide a young violinist's progress through the beginning stages. Establishing foundational instrumental skills; developing pulse, pitch and rhythm reading; exploration of Suzuki philosophy and the pedagogy of Rolland will be included. Graduate students will be expected to do an in depth exploration of supplemental repertoire, organize a class exploration of string pedagogy and complete a project based on an assigned parenting resource.

Prerequisite: Current enrollment as a Music Education or Music Performance major with violin or viola as the main instrument.

MUSC5320 - Advanced Seminar

Credits: 2-6
Max Credit (Max. 6)

Such topics as The Music of J. S. Bach, The Chamber Music of Mozart, and Contemporary Music will be pursued and will terminate in oral reports and a research paper.

Prerequisite: MUSC 5310.

MUSC5325 - Advanced Instruction in String Teaching II

Credits: 2

Designed for graduate students, this semester of NAIS goes into more depth about the educational process of the young violinist or violist. Particularly important is the introduction of shifting and vibrato. Opportunities to observe lessons and groups with professional teachers and gain hand on experience by giving 'helper lessons' will be included. Graduate students will team teach vibrato and give a presentation on parent/ child relationships and interactions based on assigned readings.

Prerequisite: MUSC 5315, current enrollment as a Music Education or Music Performance major with violin or viola as the main instrument.

MUSC5340 - Advanced Composition

Credits: 1-4

Max Credit (Max. 6)

A project course to be conducted by individual appointment with the instructor. The result should be the production of a major work suitable for performance by one of the campus organizations. Evaluation is made by a faculty committee on completion and performance of the composition.

Prerequisite: 4 hours of MUSC 4040.

MUSC5350 - Advanced Analysis

Credits: 3

Consideration of the analytical techniques of Harder, Piston, and Schillinger for traditional music, of Hanson and Hindemith for modern tonal music, and of Schoenberg and Reti for serial music.

Prerequisite: graduate standing in music.

MUSC5360 - Pedagogy of Theory

Credits: 2

Consideration of the subject matter of all undergraduate theory courses, procedures for presenting the material, and analysis and evaluation of texts and methods.

Prerequisite: graduate standing in music.

MUSC5370 - Advanced Choral Conducting

Credits: 1-2

Max Credit (Max. 3)

The interpretation of well-known oratorios and cantatas; experience in the direction of campus choral groups.

Prerequisite: MUSC 4070, MUSC 4790.

MUSC5380 - Advanced Instrumental Conducting

Credits: 1-2

Max Credit (Max. 3)

Interpretive analysis of instrumental works in large form; experience in the direction of campus performing groups.

Prerequisite: MUSC 4070, MUSC 4780.

MUSC5390 - Performance Practice and Interpretation

Credits: 2

A study of the inherited traditions of correct interpretation and performance as related to the various style periods in music.

Prerequisite: graduate standing in music.

MUSC5400 - Independent Study and Research

Credits: 1-2

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

MUSC5410 - History of Musical Instruments

Credits: 2

An investigation of the mechanical evaluation of musical instruments as related to the music written for these instruments.

Prerequisite: graduate standing in music.

MUSC5480 - Baritone Horn VI

Credits: 1-2

Max Credit (Max. 8)

MUSC5490 - Bassoon VI

Credits: 1-2

Max Credit (Max. 8)

MUSC5500 - Cello VI

Credits: 1-2

Max Credit (Max. 8)

MUSC5510 - Clarinet VI

Credits: 1-2

Max Credit (Max. 8)

MUSC5520 - Double Bass VI

1412

Credits: 1-2
Max Credit (Max. 8)

Covers appropriate technical and repertory materials in graduate-level double bass. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5530 - Flute VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level flute. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5540 - Guitar VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level guitar. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5550 - Harp VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level harp. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5560 - French Horn VI

Credits: 1-2
Max Credit (Max. 8)

Prerequisite: 4 semester hours of MUSC 4560 or graduate standing.

MUSC5570 - Oboe VI

Credits: 1-2
Max Credit (Max. 8)

Prerequisite: 4 semester hours of MUSC 4570 or graduate standing.

MUSC5580 - Organ VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate- level organ. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5590 - Percussion VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level percussion. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5600 - Piano VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level piano. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5610 - Saxophone VI

Credits: 1-2
Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level sax. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5615 - Capstone

Credits: 3

Designed to provide a forum to present research in music that fulfills requirements of the Plan B process. Instruction is individualized, but involves cooperative learning opportunities with other students. The student presents the finished product to the class members.

Restricted Course is restricted to students doing Plan B paper only.

Prerequisite: Plan B proposal approved by the music department graduate committee.

MUSC5620 - Trombone VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level trombone. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5625 - Piano Pedagogy

Credits: 2

Max Credit (Max. 2)

This specialized course addresses the teaching of piano to children with special emphasis on the development of correct technique, studio teaching techniques, student learning styles, repertoire assignment, and all aspects of establishing a private studio. The last quarter of the class includes an in-class, supervised teaching unit.

Dual Listed MUSC 4625.

Prerequisite: 8 credit hours of piano study.

MUSC5630 - Trumpet VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level trumpet. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5635 - Vocal Pedagogy

Credits: 2

This specialized course addresses anatomy and physiology of the vocal instrument and the scientific principles surrounding it, studio teaching techniques, student learning styles, repertoire assignment, and all aspects of establishing a private voice studio. The last quarter of the class includes an in-class, supervised teaching unit. Students enrolled in the graduate level (5635) will undertake an extensive research paper/project and additional teaching.

Dual Listed MUSC 4635.

When Offered (Offered alternate spring semesters)

Prerequisite: 8 credits of voice or permission of instructor.

MUSC5640 - Tuba VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level tuba. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5650 - Violin VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level violin. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5660 - Viola VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level viola. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5670 - Voice VI

Credits: 1-2

Max Credit (Max. 8)

Designed to cover appropriate technical and repertory materials in graduate-level voice. A faculty jury will review each semester's work.

Prerequisite: graduate standing in music.

MUSC5680 - Graduate Recital

Credits: 2

A recital, vocal or instrumental and consisting of selections of advanced difficulty in matters of technique and interpretation, is presented under the direction of a staff member. Quality and content of recital must be approved by a faculty committee one month before the recital date, and the faculty committee will determine the final grade.

Prerequisite: graduate standing in music and consent of instructor.

MUSC5690 - Advanced Teaching Methods

Credits: 1

Designed to present new and improved methods of teaching the various band and orchestral instruments in the public schools.

MUSC5700 - Advanced Teaching Methods

Credits: 1

Designed to present new and improved methods of teaching the various band and orchestral instruments in the public schools.

MUSC5710 - Advanced Teaching Methods

Credits: 1

Designed to present new and improved methods of teaching the various band and orchestral instruments in the public schools.

MUSC5720 - Musical Supervision: Choral

Credits: 2

Examination of the administrative responsibilities of the music teacher, the music department chairman, and the district music supervisor in the public schools, as well as the responsibilities of a music festival chairman and officers of the state music educators association.

Prerequisite: graduate standing in music.

MUSC5730 - Musical Supervision: Instruments

Credits: 2

Examination of the administrative responsibilities of the music teacher, the music department chairman, and the district music supervisor in the public schools, as well as the responsibilities of a music festival chairman and officers of the state music educators association.

Prerequisite: graduate standing in music.

MUSC5760 - Music Education Seminar

Credits: 2

A study and discussion of trends, objectives, and curricula of the various phases of music education.

MUSC5770 - Marching Band

Credits: 0.5

Max Credit (Max. 2)

MUSC5780 - Wind Ensemble III

Credits: 0.5

Max Credit (Max. 2)

One of the elite ensembles in the Department of Music, Wind Ensemble offers participants the opportunity to prepare and perform some of the finest, most technically challenging, contemporary and classic wind and percussion repertory.

Prerequisite: graduate or Performer's Certificate students, audition required.

MUSC5790 - Jazz Ensemble III

Credits: 0.5

Max Credit (Max. 2)

Preparation and performance in a select jazz ensemble of the finest in standard jazz ensemble repertory and contemporary compositions by living jazz artists.

Restricted Enrollment is restricted to graduate and Performer's Certificate students only.

Prerequisite: audition required.

MUSC5800 - Collegiate Chorale III

Credits: 0.5

Max Credit (Max. 12)

Provide the advanced and committed singer with outstanding performing experiences ranging from major choral masterworks to masterpieces of the a cappella tradition, both sacred and secular. The choir is a professional training ensemble and students may be asked to take on active musical leadership roles. Commitment of time to advance the excellence and public awareness of the ensemble will be required.

Prerequisite: audition required, and graduate standing.

MUSC5805 - The UW Singing Statesmen III

Credits: 0.5

Max Credit (Max. 12)

The UW Singing Statesmen provides all levels of singers with the rich tradition of male ensemble singing. Students will solidify basic musicianship skills and vocal technique while experiencing camaraderie and service to the region. Students may be asked to take on music leadership roles and advance the excellence and public awareness of the ensemble. Open to music majors and non-music majors without audition.

Prerequisite: Graduate standing.

MUSC5807 - Happy Jacks III

Credits: 0.5

Max Credit (Max. 12)

Student-led male a cappella ensemble that sings contemporary, jazz, and traditional repertoire. The ensemble travels regularly to promote male singing through concerts and school workshops. Students may act as musical director. Audition only.

Prerequisite: Audition required. Graduate standing.

Corequisite: enrollment in The UW Singing Statesmen.

MUSC5811 - Vocal Jazz III

Credits: 0.5

Max Credit (Max. 12)

Sings standard repertory from various jazz traditions, often with rhythm section. Focus on building musical skill and literacy in the jazz idiom. Students may be asked to take on leadership roles. Audition only.

Prerequisite: Audition required. Graduate standing.

MUSC5815 - Bel Canto Women's Chorus III

Credits: 0.5

Max Credit (Max. 12)

Builds community through score study and the development of fundamental musicianship skills, including sight singing, ear training, and vocal technique. Students may be asked to take on leadership roles. This ensemble is open to both music majors and non-music majors without audition.

Prerequisite: Graduate standing.

MUSC5817 - Laramie Civic Chorus III

Credits: 0.5

Max Credit (Max. 12)

Welcomes students, faculty, and community members. Repertoire includes musical works from a multiplicity of style periods and genres in both Western and non-Western traditions and includes regular collaboration with the UW Symphony Orchestra for major choral works. Students may be asked to take on leadership roles.

Prerequisite: Graduate standing; audition required.

MUSC5820 - Opera Theatre

Credits: 0.5

Max Credit (Max. 2)

MUSC5830 - Symphony Orchestra III

Credits: 0.5

Max Credit (Max. 2)

The premier orchestral ensemble in the Department of Music. Participation in this ensemble prepares students to perform some of the great symphonic literature from a wide variety of musical periods.

Prerequisite: graduate or Performer's Certificate students; audition required.

MUSC5840 - Chamber Orchestra

Credits: 0.5-1

Max Credit (Max. 2)

Devoted to the rehearsal and performance of masterpieces from the chamber orchestra repertoire. Students in the 5840 level of Chamber Orchestra will be expected to assume leadership roles within the ensemble, help with bowings, lead sectionals and be highly proficient on their individual parts.

MUSC5850 - Percussion Ensemble

Credits: 0.5

Max Credit (Max. 2)

MUSC5860 - Brass Ensemble III

Credits: 0.5

Max Credit (Max. 2)

The University of Wyoming Brass Ensemble is a course devoted to the rehearsal and performance of masterpieces from the brass chamber repertoire. Students in the 5860 level of Brass Ensemble will be expected to have a high level of proficiency on their parts and assume leadership roles within the ensemble.

MUSC5870 - Woodwind Ensemble III

Credits: 0.5

Max Credit (Max. 2)

Preparation and performance in a select woodwind chamber ensemble of the finest standard and contemporary wind ensemble literature.

Prerequisite: graduate or Performer's Certificate students; audition required.

MUSC5880 - Chamber Music III

Credits: 0.5

Max Credit (Max. 2)

Designed to provide students with training in the ideal medium of chamber music (small ensembles, such as trio, string quartet, etc.), where they can apply and integrate all elements of their musical knowledge. These include but are not limited to rhythm, intonation, tone-production, blend, musical interpretation, concept of style, etc.

Prerequisite: graduate or Performer's Certificate students; audition required.

MUSC5885 - Collaborative Piano III

Credits: 1-2

Max Credit (Max. 8)

Encompasses supervised practice in the art of collaborative piano playing. Discusses traditional usages as applicable to various schools and periods of vocal and instrumental duo literature.

Prerequisite: Audition required; MUSC 3280 or equivalent and graduate standing.

MUSC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

MUSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

MUSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

MUSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

MUSC5961 - Plan B Paper/Plan B Lecture- Recital

Credits: 0

Plan B Paper/Plan B Lecture- Recital. Required capstone for the MM degree. Required capstone for the MM degree. Satisfactory/Unsatisfactory only.

MUSC5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Native American and Indigenous Studies

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP Code [CS,D<>(none)]

NAIS1010 - Beginning Indigenous Language

Credits: 4

Fundamentals of grammar, conversation, composition, and reading.

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP Code [I,D<>(none)]

Note: Enrollment preference will be given to "We The People" FIG students.

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.

USP Code [CS,D<>(none)]

NAIS2010 - Intermediate Indigenous Language

Credits: 4

Second level fundamentals of grammar, conversation, composition, and reading.

Prerequisite: NAIS 1010.

NAIS2060 - Topics

Credits: 1-4

Max Credit (Max. 6)

Popular and current topics in American Indian studies.

NAIS2210 - North American Indians

Credits: 3

Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed ANTH 2210.

USP Code [CS, D<> (none)]

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP Code [CH,D<>(none)]

NAIS2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed ENGL 2340.
USP Code [CH,D<>(none)]
Prerequisite: WA course.

NAIS2345 - American Indians in Hollywood Film

Credits: 3

Examines the ways Hollywood films have constructed various forms of racial identity for American Indians.

Cross Listed ENGL 2345.
USP Code [CH,D<>(none)]
Prerequisite: WA.

NAIS3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the Plains region of the U. S. from prehistory to the present.

Cross Listed HIST 3000.
USP Code [D<>(none)]
Prerequisite: 6 hours of HIST or NAIS.

NAIS3010 - Proficient Indigenous Language

Credits: 4

Emphasizes the development of listening, speaking, reading, and writing so as to help students function effectively in the tribal cultural context of which the language is a part.

Prerequisite: NAIS 2010.

NAIS3100 - Tribal Literatures of the Great Plains

Credits: 3

Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed ENGL 3100.
USP Code [WC,D<>(none)]
Prerequisite: 6 hours of NAIS or ENGL.

NAIS3200 - Indigenous Peoples and the Environment

Credits: 3

Understand the historical, political, and socio-economic forces that have shaped the relationships of Indigenous peoples to their environments, and be able to discern the similarities and dissimilarities of Indigenous issues across international borders. The course may include a study abroad component.

Prerequisite: 6 hours NAIS credit.

NAIS3300 - Federal Indian Law

Credits: 3

Survey of law that applies to individual Indians and tribal governments. In particular, explores the legal relationships among, and relative jurisdictions of federal, tribal, and state governments. Specific topics include civil and criminal jurisdiction, taxation, family law, hunting and fishing, and gaming regulations.

Prerequisite: NAIS 1001 or NAIS 1350.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP Code [CS,D<>(none)]

Prerequisite: one course in American Indian culture.

NAIS4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro- Americans through the periods after contact.

Cross Listed HIST 4000.

USP Code [D<>(none)]

Prerequisite: 9 hours of HIST or NAIS.

NAIS4010 - Advanced Indigenous Language

Credits: 4

Stresses the usage of language through composition, conversation, oral presentation, and grammar review.

Prerequisite: NAIS 3010.

NAIS4020 - Internship

Credits: 1-12

Max Credit (Max. 12)

Requires active participation and service to an Indigenous community or organization in US or elsewhere. A written agreement among the student, the NAIS director or NAIS faculty mentor, and an on-site supervisor is required. NAIS Majors must take at least four credit hours.

Prerequisite: 9 hours of NAIS courses.

NAIS4100 - Tribal Government

Credits: 3

Examines traditional systems of tribal governance; the establishment of contemporary tribal governments; stakeholders and their goals; factors influencing tribal government operations, including the federal trust relationship, plenary power, tribal federal and tribal-state relations; powers of tribal governments; and the future of tribal governments.

Prerequisite: 6 hours of NAIS courses, including NAIS 1001, and/or NAIS 1350.

NAIS4110 - Educational Foundations in American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political, and societal factors before, during, and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed EDCI 4110.

Dual Listed NAIS 5110.

USP Code [D<>(none)]

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

NAIS4200 - Indigenous Communities Abroad: International Travel

Credits: 4

Devoted to study/ travel related to Indigenous peoples abroad. The specific topic will be determined each time the class is offered. Two weeks of international travel will follow sixteen hours of on-campus instruction.

Prerequisite: 6 credits in NAIS.

NAIS4340 - Natural Resource Management on Western Reservations

Credits: 3

Examines natural resource management techniques on western reservations. Focus is on the management and planning of water, grazing, extractive industries, and forestry. Fieldwork on the Wind River Indian Reservation is included.

Cross Listed GEOG 4340 .

Prerequisite: 6 hours of 2000-level NAIS courses.

NAIS4360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. Complexity and diversity of Indian women's experiences throughout history are emphasized. Concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed GWST 4360/SOC 4360.

Dual Listed NAIS 5360.

Prerequisite: 6 hours of 2000-level NAIS courses.

NAIS4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed ENGL 4460.

USP Code [WC<>(none)]

Prerequisite: 6 hours of 2000-level literature courses.

NAIS4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed HIST 4462.

Dual Listed NAIS 5462.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or NAIS.

NAIS4463 - American Indian History 1783- 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied Indians moving west.

Cross Listed HIST 4463.

USP Code [(none)<>H]

Prerequisite: 9 hours of HIST or NAIS.

NAIS4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the 20th century. Examines the development of new cultural, social, and political forms that help create an American Indian identity.

Cross Listed HIST 4464.

Dual Listed NAIS 5464.

Prerequisite: 9 hours of HIST or NAIS.

NAIS4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed HIST 4466.

Dual Listed NAIS 5466.

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

NAIS4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed HIST 4468.

Prerequisite: 9 hours of HIST or NAIS.

NAIS4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed ANTH 4740.

Prerequisite: ANTH 2000 or consent of instructor.

NAIS4975 - Independent Study

Credits: 1-4

Max Credit (Max. 8)

Directed, independent study in American Indian issues with American Indian Studies affiliated faculty. Students must initiate a project with an appropriate faculty member and have it approved by the program director.

Prerequisite: consent of instructor and 6 hours of NAIS.

NAIS4990 - Special Topics

Credits: 1-4
Max Credit (Max. 9)

Current research topics presented by regular and visiting faculty.

Prerequisite: 3 hours of NAIS courses.

NAIS5000 - Independent Study

Credits: 1-4
Max Credit (Max. 4)

Conference course to permit students opportunity for directed and independent study in American Indian issues.

Prerequisite: graduate standing and consent of instructor.

NAIS5110 - Foundations of American Indian Education

Credits: 3
Examines cultural, geographical, linguistic, spiritual, political, and societal factors before, during, and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed EDCI 5110.

Dual Listed NAIS 4110.

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

NAIS5121 - History and Philosophy of American Indian Education

Credits: 3
Addresses the history of Indian education in the U. S. and Canada and examines missionary initiatives, government programs, and tribal efforts. Review of documentary accounts of Native education, review autobiographical accounts of Native teachers and children. Develop insight necessary for development of appropriate teaching methods and materials.

Cross Listed EDCI 5121.

Prerequisite: post-Baccalaureate status.

NAIS5130 - Cultural Foundations of American Indian Education

Credits: 3
In-depth study and analysis of the educational experiences of American Indians, focusing on contemporary educational issues and experiences, examining the impacts of cultural orientations, stereotypes, bias, and other issues on the educational attainment of American Indian students. Critique instructional practices and programs developed addressing the needs of American Indian students.

Cross Listed EDCI 5130.

Prerequisite: post-Baccalaureate status.

NAIS5141 - Instructional Methods of American Indian Education

Credits: 3

Addresses culturally responsive methodologies for teaching American Indian students, reviews documentary accounts of Native education and autobiographical accounts of Native teachers and children, develops appreciation of the complexity and difficulties of Native education. Insight necessary for development of appropriate teaching methods and materials.

Cross Listed EDCI 5141.

Prerequisite: post-Baccalaureate status.

NAIS5360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed GWST 5360/SOC 5360.

Dual Listed NAIS 4360.

Prerequisite: 6 hours of 2000-level NAIS courses.

NAIS5462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed HIST 5462.

Dual Listed NAIS 4462.

Prerequisite: graduate standing.

NAIS5464 - American Indian History in the 20th Century

Credits: 3

Surveys the history of American Indians during the 20th century. Examines the development of new cultural, social, and political forms that help create an American Indian identity.

Cross Listed HIST 5464.

Dual Listed NAIS 4464.

Prerequisite: graduate standing.

NAIS5466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Dual Listed NAIS 4466.

Prerequisite: graduate standing.

Natural Science

NASC4790 - Topics in Natural Science

Credits: 1-6

Presents selected science topics to acquaint teachers or prospective teachers with new concepts, materials or techniques, as introduced in various new school curricula. Topics may include earth science for the middle school, computer learning and/or elementary school environmental science. Includes laboratory.

Prerequisite: junior standing.

NASC4800 - Field Studies in Natural Science

Credits: 1-6

Explores topics best studied in the field, on location, or otherwise outside the traditional classroom. Topics may include grassland ecosystem, geology field trips for elementary children and/or schoolyard study areas. Includes laboratory.

Prerequisite: junior standing.

NASC5110 - Physical Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Examines the global dynamics of energy, hydrocarbon combustion, and the physics and chemistry of water. Investigates relationships between energy transformations and pollutants. Considers environmental limitations of fresh water availability and the buffering effect of sea and fresh water.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in Elementary, middle school or general science education.

NASC5120 - Earth Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Emphasizes the lithosphere and atmosphere and their interactions with the hydrosphere and biosphere. Examines the interplay between tectonic processes, earth's radiation balance, ocean processes, ozone depletion and the greenhouse effect. Includes evaluation of methods of measuring and monitoring these phenomena.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teach certification in elementary, middle school or general science education.

NASC5130 - Life Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Investigates ecosystem composition and processes, and biological responses to changes in ecosystem parameters. Examines terrestrial and aquatic communities, photosynthesis, energy flow, biogeochemical cycles, global climate change, climate warning, deforestation, population ecology, DNA/ RNA structure, function, genetic engineering and forensic applications.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science education.

NASC5140 - Numbers, Operations, and Patterns for the Middle-Level Learner, MMA

Credits: 3

Provides working middle-level mathematics teachers opportunities to understand and discuss numbers, their representations, and operations on them, from an abstract perspective that includes elegant proof. Also emphasized is the role of language and purpose in composing definitions.

Cross Listed MATH 5140.

Prerequisite: admission to a UW graduate program, either degree or non-degree seeking status, and acceptance into the Middle-level mathematics program.

NASC5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner, MMA

Credits: 3

Empowers teachers of middle-level mathematics to design engaging experiences. Emphasizes the historical context for the development of mathematics, especially its symbols, tools, personalities, and classic problems.

Cross Listed MATH 5160.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner, MMA

Credits: 3

Showcases two aspects of 2D and 3D geometry: measurement and transformation. Emphasis reflects current State and National standards for middle-level mathematics classroom and teacher preparation, especially appropriate uses of technology, geometric tools, mathematical language, and problem-solving strategies.

Cross Listed MATH 5170.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, acceptance into the Middle-level mathematics program.

NASC5185 - Analysis of Data in the Media for the Middle-Level Learner, MMA

Credits: 3

Focuses on data collection, analysis, interpretation, and communication, using contexts relevant to everyday situations. Topics chosen integrate well with the concerns of middle-level teachers and connect with such curriculum areas as health, science, and social studies. This is not a research methods course.

Cross Listed STAT 5185

Prerequisite: Admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5190 - Mathematics of Change and the Middle-Level Learner, MMA

Credits: 3

Students gain a solid understanding of data and functions in the service of calculus. Hands-on, project-driven, and focuses on the essential concepts of functions and calculus and their role in middle-level mathematics. Emphasis is on writing and technology (calculators and probeware).

Cross Listed MATH 5190.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5205 - Methods of Teaching Middle-Level Mathematics, MMA

Credits: 3

Research-based pedagogy and pedagogical content knowledge for teaching middle-level mathematics. Designed for practicing teachers of middle-grades mathematics.

Cross Listed EDCI 5205.

Prerequisite: admission to the SMTC Program.

NASC5215 - Using Technology for Middle-Level Mathematics

Credits: 3

Covers the use of technology appropriate to middle-level mathematics teaching, such as microworlds, geographic information systems, spreadsheets, and other content appropriate technologies. Cross Listed with EDCI 5215. Prerequisite: admission to the SMTC Program.

Cross Listed EDCI 5215

Prerequisite: Admission to the SMTC Program.

NASC5225 - Assessment for Middle-Level Mathematics, MMA

Credits: 3

Middle-level Mathematics Initiative teacher participants examine, analyze, and implement a variety of assessments that are aligned with standards and instruction appropriate to the middle level math learner.

Cross Listed EDCI 5225.

Prerequisite: admission to the SMTC Program.

NASC5300 - Classroom Assessment in Middle-level Science, MSC

Credits: 2

Deals with the design, construction, and testing of curriculum materials to bring the spirit of scientific inquiry to elementary school pupils. Research to be conducted in the Science and Mathematics Teaching Center.

NASC5400 - Spatial Data Instructional Technology

Credits: 1

Teaching strategies appropriate for elementary/middle school students' conceptual level of development. Positive attitudes toward teaching children about the Earth, its physical environment and human/environment relationships will be promoted. The course content will be supported by the use of geospatial technologies, such as GPS and GIS.

Prerequisite: graduate standing.

NASC5510 - Integrated Instructional Strategies, MSC

Credits: 2

Appropriate instructional strategies are discussed and modeled for aligning standards, expectations, and experiences in an integrated science environment. Attention is given to unique characteristics of each strategy, including a review of research on the effectiveness of each strategy on student achievement and attitudes.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

NASC5600 - Mathematics and Statistics in Science Teaching, MSC

Credits: 2

Provides science teachers with the knowledge and experience necessary to help students use statistics in the scientific process. Activities emphasize a hands-on inductive approach closely related to the school science curriculum. Important statistical ideas and methods are studied as they arise naturally in the biological, physical, and earth sciences.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

NASC5610 - Field Studies in Environmental Education, NED

Credits: 4

Expands student's knowledge of ecological and physiological animal and plant adaptations to environmental conditions, the use of teaching methods and tools of naturalists, the range of resources available for designing and evaluating curriculum, and promotes an appreciation and understanding of the diversity of environments. Contains 4 modules.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5620 - Advanced Elements of Field Ecology Course Design, NED

Credits: 5

Max Credit (Max. 6)

Addresses designing field ecology courses that include research, outdoor leadership, and natural history components. Opportunities are provided to gain deeper understanding of key natural history and ecology concepts of the bioregion; practical strategies for teaching these concepts in field programs; and to formally present student work.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5625 - Place-Based Education-Teton Science School

Credits: 3

Introduces graduate students at Teton Science Schools to the theory and practice of place-based education. The design of the course exposes students to the historical, political, and eco-social underpinnings of place-based education while supporting students in developing thoughtful place-based pedagogies.

Prerequisite: graduate student status.

NASC5630 - Teaching Practicum-Teton Science School

Credits: 2-4

Max Credit (Max. 6)

To improve teaching methods and techniques and expand professional skills. Integrates the foundation of Teton Science Schools, applies coursework content understanding and develops leadership. The course is intended to challenge previously held instructional beliefs and nurture an evolving set of skills and instructional identity. Not equivalent to EDSE 4500 or EDCI 5990 or EDEL 4500.

Prerequisite: current enrollment at Teton Science School.

NASC5640 - Introduction to Field Science Teaching

Credits: 3

Designed to introduce graduate students at Teton Science Schools' to the field of environmental education and instructional concepts for teaching environmental science in the outdoors. Learn field science content, principals of connecting to place, teaching techniques, and learning theories related to environmental education and field science teaching.

Prerequisite: current enrollment at Teton Science School.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

NASC5660 - Standards, Pedagogy and Research

Credits: 2

This course is designed to provide Master of Science in Natural Science students with background in three areas: current science standards, pedagogical practices, and the understanding of various types of educational research as well as some of the practices related to conducting their own research projects.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

NASC5670 - Research Methodology

Credits: 4

This course provides foundational information on asking appropriate questions, researching (including IRB), writing, formatting, and defending a Plan B project. At the end of the semester students will have a committee, a preliminary draft, and present their research. Spring semester will be used to complete projects with committee members.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

NASC5700 - Seminar in Science for Secondary School Teachers

Credits: 1-6

Max Credit (Max. 6)

A course to give graduate students in education, or in-service teachers, an in-depth view of the new materials for teaching science in secondary schools.

Prerequisite: consent of instructor.

NASC5770 - Investigation in Natural Science for Secondary Teachers

Credits: 1-5

Max Credit (Max. 10)

Deals with the design, construction, and testing of curricula materials to bring the spirit of scientific inquiry to secondary school students. Research to be conducted in the Science and Mathematics Teaching Center.

Prerequisite: consent of instructor.

NASC5810 - ML Science & Math Practicum

Credits: 3

Practica for graduate students in the MS-Natural Science MSC and MMA programs in Middle and Junior High schools. Mathematics and science classrooms will serve as sites for assignments. Students complete assignments for the content area of certification as well as appropriate discussions.

Prerequisite: Graduate students in department who have passed at least four departmental courses or consent of the instructor.

NASC5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction.

Prerequisite: consent of instructor and graduate standing.

NASC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

NASC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NASC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NASC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: graduate standing.

NASC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

NASC5961 - Plan B Project

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: must be enrolled in Plan B program and have program approval.

NASC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Neuroscience

NEUR4295 - Neurodevelopment

Credits: 3
Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed ZOO 4295.

Dual Listed NEUR 5295.

Prerequisite: ZOO 4280.

NEUR4720 - Neuroscience Speaker Seminar

Credits: 2

Max Credit (Max. 6)

The purpose of this course is to use the Neuroscience/sensory biology visiting speaker series to build student knowledge in neuroscience, as well as skills in critical evaluation of the research literature, and oral/ written communication. This will maximize student learning from the speaker series. The course maybe taken up to three times.

Dual Listed NEUR 5720.

Prerequisite: Graduate level standing in neuroscience, biomedical sciences, zoology/physiology, or other life science programs. Undergraduates: concurrent or prior ZOO 4280.

NEUR5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed ZOO 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

NEUR5280 - Introduction to Neuroscience

Credits: 3

Examines the basic properties of neurons and from there identifies determinants of brain development and how neuronal circuits are formed. How neuronal circuits underlie processing sensory information, coordinated movement, complex functions (e. g. sleep, learning) and homeostasis are discussed.

Cross Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

NEUR5295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed ZOO 5295.

Dual Listed NEUR 4295.

NEUR5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms will be covered in addition to the basic neurophysiology of nerve cells.

Cross Listed ZOO 5685.

Prerequisite: one course in physiology, chemistry, physics.

NEUR5715 - Seminar in Neuroscience

Credits: 1-2

Max Credit (Max. 20)

A continuing seminar. All students in the graduate neuroscience program are expected to register for this seminar each semester. The interdisciplinary approach to the nervous system is used employing work from physiology, neuroanatomy and neurochemistry, psychology, pharmacology and biochemistry.

Cross Listed ZOO 5715.

Prerequisite: admission to the graduate neuroscience program or graduate standing.

NEUR5720 - Neuroscience Speaker Seminar

Credits: 2

Max Credit (Max. 6)

The purpose of this course is to use the Neuroscience/sensory biology visiting speaker series to build student knowledge in neuroscience, as well as skills in critical evaluation of the research literature, and oral/ written communication. This will maximize student learning from the speaker series. The course maybe taken up to three times.

Dual Listed NEUR 4720.

Prerequisite: Graduate level standing in neuroscience, biomedical sciences, zoology/physiology, or other life science programs. Undergraduates: concurrent or prior ZOO 4280.

NEUR5800 - Research in Neuroscience

Credits: 1-16

Max Credit (Max. 16)

The research must be conducted under the supervision of one of the neuroscience program faculty. Laboratory opportunities for research include neuroendocrinology, behavioral neuroscience, sensory neurophysiology, neuroanatomy, neuropharmacology, neurotoxicology, neural cell biology, and neurochemistry.

Prerequisite: admission to the graduate neuroscience program or graduate standing.

NEUR5887 - Molecular Neuropharmacology

Credits: 3

Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

NEUR5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NEUR5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NEUR5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: advanced degree candidacy.

NEUR5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

First-Year Seminar.

Prerequisite: advanced degree candidacy.

Nursing

NURS1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

NURS2240 - Medical Terminology

Credits: 3
Introduces medical terminology. Includes word structure of medical-surgical terms, body parts and organs, body systems and commonly used medical abbreviations.

NURS2340 - Developmental Influences on Health

Credits: 3

Explores interaction between development and health. Discusses human development of physiological, psychological, cognitive, sociocultural, and spiritual systems across the lifespan. Identifies selected theories associated with development over the lifespan and implications for healthcare.

Prerequisite: Completion or concurrent enrollment in NURS 3445 or NURS 3745, NURS 3665 or NURS 3730 and NURS 3790, and PHCY 3450.

NURS3005 - ReNEW Distance Foundations

Credits: 1

Prepares learners for ReNEW BSN Completion in a distance delivery format. The course includes concept-based delivery in the UW learning system, APA formatting, writing scholarly papers, and library resources and skills.

Prerequisite: Enrolled in or graduate of Wyoming ReNEW Nursing Program.

NURS3250 - Health Psychology

Credits: 3

Provides overview of growing partnership between psychology and health care, including history of psychology in health care; theoretical foundations of health and illness; intervention and research techniques; stress and high risk behaviors (e. g. , substance abuse, eating behaviors, AIDS); psychology's contribution to improving outcomes and quality of life in chronic and life-threatening behaviors.

Cross Listed PSYC 3250.

Prerequisite: PSYC 1000 or consent of instructor.

NURS3425 - Bridging Nursing Paradigms

Credits: 3

This course prepares incoming ADN- or Diploma-educated Registered Nurses for completion of the Fay W. Whitney School of Nursing (FWWSON) BSN degree. Nursing knowledge, skills, and abilities in selected content areas will be evaluated and augmented in preparation for BSN Completion coursework.

Prerequisite: Current RN license.

NURS3445 - Fundamentals and Health Assessment in Professional Nursing Practice

Credits: 4

This course introduces the concepts of nursing care, safety, and assessment. Students learn to assess and document normal variations and potential alterations of physiological, psychological, sociocultural, spiritual, and developmental dimensions of individuals across the lifespan.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3665, and PHCY 3450.

NURS3490 - Health Promotion in Professional Nursing Practice

Credits: 4

Students will learn and apply concepts of health promotion across the lifespan. Emphasis is on cultural diversity, health risks, behavior change and healthy practices for individuals, families, and populations. Students will incorporate evidence in designing interventions to promote health and prevent illness for self and clients.

Note: Course changes effective Fall 2022 - Credits: 3 credits; Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3690, NURS 3695, and NURS 4125.

Prerequisite: Progression or admission to the clinical component of the program and completion or concurrent enrollment with NURS 2340, NURS 3435, and PHCY 3450 or PHCY 4450.

NURS3635 - Health Assessment and Clinical Judgement

Credits: 3

Students learn to assess the physiological, psychological, sociocultural, spiritual, and developmental dimensions of individuals across the lifespan. Normal variations and potential alterations of health are identified. Clinical judgment and documentation skills are developed.

Note: Course changes effective Spring 2022 - Discontinuing course.

Prerequisite: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3665, NURS 3690, and NURS 3695.

NURS3665 - Foundations of Professional Nursing Roles

Credits: 3

This course introduces the student to professionalism, leadership, safety, and patient-centeredness. The concepts emphasized provide the foundation for professional nursing practice.

Prerequisite: Fall 2021: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3690, and NURS 3695. **Effective Spring 2022:** Completion or concurrent enrollment in NURS 2340, NURS 3445, and PHCY 3450.

NURS3690 - Professional Nursing Acute/Chronic Illness

Credits: 3

Students will examine concepts of nursing practice in the care of adults with acute and chronic illness. Emphasis is on utilizing the nursing process to develop clinical judgement.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3490, NURS 3695, and NURS 4125.

Prerequisite: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3665, and NURS 3695.

NURS3695 - Professional Nursing Acute/Chronic Illness Practicum

Credits: 4

Students provide nursing care using the nursing process in a clinical setting with adult clients experiencing acute and chronic illness. Emphasis is on demonstration of clinical judgement.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3490, NURS 3690, and NURS 4125.

Prerequisite: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3665, and NURS 3690.

NURS3730 - Introduction to Professional Nursing

Credits: 2

Introduces students to the core concepts of professional nursing practice. Nursing process, domains of nursing practice, health policy, evidence-based practice, legal and professional standards will be introduced.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3745, NURS 3790, and PHCY 3450.

NURS3745 - Nursing Fundamentals and Health Assessment

Credits: 4

Includes concepts of basic care/comfort, technical skills, medical equipment, asepsis, medication administration, nurse/client safety, and client rights. Students learn to assess and document normal variations and potential alterations of physiological, sociocultural, spiritual, and developmental dimensions of individuals across the lifespan.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3730, NURS 3790, and PHCY 3450.

NURS3770 - Nursing Care in Acute and Chronic Illness

Credits: 8

Discern critical elements of professional nursing medical-surgical concepts for adults experiencing acute/chronic health alterations progressing to complex health alterations. Focuses on patient safety principles; quality initiatives; evidence-based nursing; information technology; interprofessional collaboration, communication; health promotion strategies; and critical thinking in the planning of client centered nursing care for the adult.

Note: Course changes effective Fall 2022 - Name: Nursing Care in Acute, Chronic, and Complex Illness; Credits: 6 credits; Prerequisite: NURS 3745 and completion or concurrent enrollment in NURS 3771, NURS 3780, and NURS 4765.

Prerequisite: NURS 3710 , NURS 3750 , NURS 3730, NURS 3780.

NURS3771 - Nursing Care in Acute and Chronic Illness Practicum

Credits: 6

Application of critical elements of professional nursing practice with adults experiencing acute and chronic health alterations. Focus is on incorporation of patient safety principles; quality initiatives; evidence-based nursing practice; information technology; interprofessional collaboration and communication; health promotion strategies; and critical thinking and clinical reasoning in the provision of nursing care.

Note: Course changes effective Fall 2022 - Name: Nursing Care in Acute, Chronic, and Complex Illness Practicum; Credits: 4

credits; Prerequisite: NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3780, and NURS 4765.

Prerequisite: NURS 3710 , NURS 3750 , NURS 3730, NURS 3780.

NURS3780 - Evidence-Based Practice in Nursing

Credits: 4

Prepares nursing students to engage in evidence-based practice in nursing, specifically how to search the literature and databases, ask meaningful clinical questions, find relevant evidence, critically appraise evidence, integrate best evidence with clinical expertise and patient/community values.

Note: Course changes effective Fall 2022 - Credits: 3 credits; Prerequisite: STAT 2050 or STAT 2070 or equivalent; NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3771, and NURS 4765.

Prerequisite: admission to the BRAND program, concurrent enrollment in NURS 3770.

NURS3790 - Health Promotion of Individuals, Families, and Populations

Credits: 3

Components of the nursing process and evidence-based nursing practice are used to protect the health of clients through health promotion, risk reduction, and disease prevention.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3730, NURS 3745, and PHCY 3450.

NURS3890 - Professional Nursing Care in Complex Illness

Credits: 3

Students will examine concepts of nursing practice in the care of adults with complex illness. Emphasis is on utilizing the nursing process to develop clinical judgment.

Note: Course changes effective Spring 2023 - Prerequisite: NURS 3695 and completion or concurrent enrollment in NURS 3891, NURS 3892, and NURS 3895.

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3891, 3892, 3895, 4125.

NURS3891 - Professional Nursing Care of Older Adults

Credits: 3

Students will examine concepts of nursing practice in the care of older adults. Emphasis is on utilizing the nursing process to develop clinical judgment.

Note: Course changes effective Spring 2023 - Prerequisite: NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3892, and NURS 3895.

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3892, NURS 3895, NURS 4125.

NURS3892 - Professional Nursing Care in Mental Health and Illness

1445

Credits: 3

This course explores mental health and illness concepts. Emphasis is on the role of the professional nurse in caring for clients with alterations in mental health.

Note: Course changes effective Spring 2023 - Prerequisite: *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3891, and NURS 3895.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3891, NURS 3895, NURS 4125.

NURS3895 - Professional Nursing Care in Complex Illness Practicum

Credits: 4

Students provide patient-centered care using the nursing process in clinical setting with adult and older adult clients experiencing complex illness and alterations in mental health. Emphasis is on demonstration of clinical judgment.

Note: Course changes effective Spring 2023 - Prerequisite: *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3891, and NURS 3892.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3892, NURS 3891, NURS 3892, NURS 4125.

NURS3970 - Nursing Externship

Credits: 3

Allows students to obtain college credit for nursing experience gained in an approved setting. Increases application of nursing theory, knowledge of a health care agency, interpersonal working relationships, technical skills and organization of time in providing nursing care.

When Offered (Offered once a year in summer)

Prerequisite: NURS 3840, 3842, 3844, and 3875.

NURS4055 - Application of Evidence in Nursing Practice

Credits: 3

Prepares RN students to engage in evidence-based nursing, specifically how to ask meaningful clinical questions, find relevant evidence, critically appraise evidence, and integrate best evidence with clinical expertise and patient/community values.

USP Code [L<>COM3]

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; STAT 2050 or STAT 2070 or equivalent; COM1 and COM2.

NURS4125 - Evidence-Based Nursing

Credits: 3

Prepares students to engage in evidence-based nursing, specifically how to ask meaningful clinical questions, find relevant evidence, critically appraise evidence, and integrate best evidence with clinical expertise and patient/community values.

USP Code [L,WC<>COM3]

Prerequisite: WA and WB or COM1 and COM2; STAT 2050 or STAT 2070 or equivalent; admission into the nursing major component of the program.

NURS4630 - Public/Community Health

Credits: 2

Learners examine public/community health nursing roles and apply the nursing process to community as client. Focuses on improving community health, levels of prevention, and addresses multiple determinants of health. Core functions, essential services, community assessment and planning, emergency preparedness, and analysis of the public healthcare system will be studied.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4635 - Community as Client

Credits: 2

Learners will understand relationships among health, disease, and the environment, with emphasis on the role of community health agencies and programs for communities in need of health care support, regionally, nationally, and globally. In this course, an assessment and planning framework guides students in assessing the health of a community.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4640 - Health Equity

Credits: 2

Learners will examine population-focused concepts to assess vulnerable and oppressed populations. The magnitude of health disparities both in the United States and globally will be discussed. Focuses on a multi-level and multi-cultural view of population health challenges, alleviating health disparities, and a commitment to health equity.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4645 - Population Health

Credits: 2

Focuses on analysis of local, regional, national, and international data that are indicators of population health. Disease outbreaks are analyzed. Learners study development of innovative, collaborative, multi-disciplinary interventions and policies to improve public health. This course provides opportunities for learners to improve population health through application of theory and evidence.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4660 - Healthcare Informatics

Credits: 3

Students will develop knowledge and skills to utilize and evaluate information technologies to improve patient outcomes across diverse populations. Includes the use of Clinical Information Systems to plan and document the nursing process. Ethical and legal

considerations of data management and interdisciplinary use of healthcare informatics are presented.

Prerequisite: ReNEW Progression or Current RN license.

NURS4665 - Healthcare Informatics in Professional Nursing Practice

Credits: 3

Utilizing a conceptual framework, students will examine nursing informatics within healthcare systems. Emphasis is placed on examining the role of clinical information systems in improving patient outcomes across practice, education, administrative, research, and interdisciplinary applications. Ethical and legal considerations of data management are examined.

Note: Course changes effective Fall 2023 - Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4690, NURS 4691, and NURS 4695.

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4690, 4691, 4695.

NURS4690 - Professional Nursing Care of Populations

Credits: 4

Introduces the student to population-focused nursing and applies the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, planning, and implementation; analysis of the healthcare system; emergency preparedness; and ethical/ legal aspects of public health.

Note: Course changes effective Fall 2023 - Description: *Introduces the student to population-focused nursing and applies the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, and analysis of the healthcare system. Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4691, and NURS 4695.*

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4691, NURS 4695.

NURS4691 - Professional Nursing Care of Children and Families

Credits: 3

This course encompasses the care of women, children, and their families across physiological, psychological, spiritual, developmental, and socio-cultural dimensions. The focus of this class is on women's health, obstetrical, and pediatric nursing care including health promotion and wellness specific to maternal and pediatric health.

Note: Course changes effective Fall 2022 - Credits: 4 credits; Course changes effective Fall 2023 - Description: *This course encompasses the care of women, children, and their families across physiological, psychological, spiritual, developmental, and sociocultural dimensions. The focus is on women's health, obstetrical, and pediatric nursing care including health promotion and wellness specific to maternal and pediatric health. Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4690, and NURS 4695.*

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4690, NURS 4695.

NURS4695 - Professional Nursing Care of Populations Practicum

Credits: 4

Students will apply the nursing process to childbearing families, children, and communities. The focus is on physiological, psychological, spiritual, developmental, and socio-cultural dimensions of individuals, families, and populations. Students will incorporate professional nursing roles into population-based care.

Note: Course changes effective Fall 2023 - Description: *The focus is on the application of professional nursing roles to the physiological, psychological, spiritual, developmental, and sociocultural dimensions of individuals, families, communities, and populations. Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4690, and NURS 4691.*

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4690, NURS 4691.

NURS4710 - Population Health

Credits: 4

Introduces the student to population-focused nursing and applied the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, planning and implementation; analysis of the health care system; emergency preparedness; and legal aspects of public health.

Note: Course changes effective Spring 2023 - Name: *Nursing Care for Population Health; Description:* *Introduces the student to population-focused and public health nursing through the application of the nursing process with the community as client. Focuses on vulnerable populations; epidemiology; community assessment, and analysis of the healthcare system. Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4735, NURS 4740, and NURS 4771.*

Prerequisite: NURS 3770, NURS 3771; concurrent enrollment in NURS 4740, NURS 4741, NURS 4735, NURS 4736.

NURS4735 - Vulnerable Populations and Mental Health

Credits: 3

This course introduces students to nursing principles and concepts of mental health psychopathology, physiology, psychology, and spirituality, along with developmental and socio-cultural considerations while incorporating treatment modalities related to the nursing of the middle-aged and aging adult.

Note: Course changes effective Spring 2023 - Prerequisite: *NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4740, and NURS 4771.*

Prerequisite: NURS 3770 and NURS 3780; concurrent enrollment in NURS 4736.

NURS4736 - Nursing Care of Vulnerable Populations Practicum

Credits: 2

Applies past learning and cultivates evidence-based nursing practice for vulnerable populations in acute/ community settings. Focuses on the vulnerability associated with mental health, psychiatric illnesses. Core public health functions of community assessment, essential health services, disaster preparedness, health policy development/ global health care are also emphasized to implement population-based nursing interventions.

Note: Course changes effective Spring 2023 - Discontinuing course.

Prerequisite: Successful completion of NURS 3770 and NURS 3771; concurrent enrollment in NURS 4710 and NURS 4735.

NURS4740 - Nursing Care of the Young Family

Credits: 6

Utilizes nursing process to assess, promote, and protect the health of young families as client. Focus is human sexuality and reproduction, family planning, pregnancy stages, neonatal, pediatrics. Growth and development, health promotion, disease prevention, family dynamics are included. Evidence-based nursing guides practice to promote a healthy family and family system.

Note: Course changes effective Spring 2023 - Description: *Utilizes nursing process to assess, promote, and protect the health of young families as client. Focus is human sexuality and reproduction, family planning, pregnancy stages, and pediatrics to promote a healthy family and family system.* **Credits:** 4 credits; **Prerequisite:** NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4735, and NURS 4771.

Prerequisite: NURS 3770; NURS 3771, and concurrent enrollment in NURS 4741.

NURS4741 - Nursing Care of the Young Family Practicum

Credits: 3

Applies and synthesizes nursing process to assess, promote, and protect the health of young families as clients. Focus is human sexuality and reproduction, family planning, pregnancy stages, neonatal, pediatrics. Growth and development, health promotion, disease prevention, family dynamics are included. Evidence-based nursing guides practice to promote a health family/family system.

Note: Course changes effective Spring 2023 - Discontinuing course.

Prerequisite: NURS 3770 and NURS 3780; and concurrent enrollment in NURS 4740.

NURS4750 - Independent Study in Nursing

Credits: 1-4

Provides students with opportunity to investigate a problem in nursing care not considered in required nursing courses or to explore in more depth an area considered in one of required nursing courses. Area of study and requirements for earning credit are determined in consultation with nursing faculty member.

When Offered (Normally offered fall, spring and summer)

Prerequisite: senior standing in nursing or consent of instructor.

NURS4765 - Healthcare Informatics in Nursing

Credits: 3

Students will describe information and technology utilized to communicate, manage knowledge, support clinical decision-making, and effectively optimize patient outcomes while adhering to ethical and legal considerations of data management.

Prerequisite: NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3771, and NURS 3780.

NURS4771 - Nursing Care of Young Families and Vulnerable Populations Practicum

Credits: 4

Applies and synthesizes clinical judgment related to nursing care of clients with a focus on the young family and vulnerable populations across the lifespan. Concepts address human sexuality, reproduction, mental health, and core functions of public health.

Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4735, and NURS 4740.

NURS4775 - Nursing Senior Capstone

Credits: 10

Provides opportunities to utilize and synthesize core concepts of professional nursing. Intensive clinical experience allowing students to become socialized into health care delivery system; gain in autonomy/confidence in performing skills; practice critical thinking and clinical reasoning in making ethical clinical decisions; develop leadership in providing and coordinating evidence-based nursing care.

Note: Course changes effective Summer 2023 - Description: *Provides opportunities to synthesize core concepts of professional nursing through intensive clinical experiences. Focuses on students' socialization into the healthcare system through application of clinical judgment in making safe and ethical decisions while coordinating evidence-based nursing care.* Prerequisite: NURS 4771 and completion or concurrent enrollment in NURS 4785.

Prerequisite: NURS 4710; NURS 4735; NURS 4736; and concurrent enrollment in NURS 4785.

NURS4785 - Nursing Integration

Credits: 2

Focuses on the continuing integration of previously learned concepts. The student further develops the role of consumer of research and incorporates leadership and management skills as a member of the profession.

Note: Course changes effective Summer 2023 - Name: *Integration of Leadership in Nursing;* Description: *Focuses on the continuing integration of previously learned concepts of leadership, management, and professional development. The student further develops their role as a consumer of research and as a leader of an interprofessional healthcare team.* Prerequisite: NURS 4771 and completion or concurrent enrollment in NURS 4775.

Prerequisite: NURS 4735; NURS 4736; NURS 4710; and concurrent enrollment in NURS 4775.

NURS4790 - Special Topics in Nursing

Credits: 1-3

Max Credit (Max. 8)

Provides offerings in selected nursing topics on concepts, theories or practices as related to specified areas in nursing.

Prerequisite: junior standing in nursing and consent of instructor.

NURS4792 - Cultural and International Health Care Immersion

Credits: 3

An in-depth examination of cultural influences on health care systems, which will include both classroom and in-field immersion experiences.

Prerequisite: senior or graduate standing in student's major and instructor permission.

NURS4830 - Leadership in Healthcare Today

Credits: 2

Focuses on the role of nurse leader and manager through integration of leadership, management, and organizational concepts, models, and theories. Emphasis in on leadership, followership, management, advocacy, professional development and activism, and managing resources.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4835 - Leading Nursing Practice

Credits: 2

Focuses on nurse leaders making a difference using evidence-based nursing practice. Learners utilize and synthesize basic concepts of professional nursing practice. This course creates the opportunity for learners to lead nursing practice in a variety of settings.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4840 - Healthcare Systems and Policy

Credits: 2

Learners examine healthcare quality and the regulation of professional nursing practice in various settings. The focus is on ethical and legal issues and policy development for healthcare delivery.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4845 - Innovation in Nursing Practice

Credits: 2

Focus in on use and synthesis of concepts in professional nursing practice. This course provides an opportunity to employ critical thinking, to apply ethical decision-making, to use evidence, and to demonstrate the ability to lead planned change.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4855 - Contemporary Nursing Practice

Credits: 2

Focus in on practice as critically effective members and leaders of the healthcare team. Learners analyze a variety of societal, economic, political, and professional issues that influence contemporary nursing. This course provides an opportunity to be creative in examining trends in nursing and healthcare.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4865 - Professional Nursing Leadership

Credits: 3

The role of the nurse leader in nursing practice is developed through integration of leadership, management, and organizational theories. Emphasis is on interprofessional care management, planned change, advocacy, activism, and professional development.

Note: Course changes effective Spring 2024 - Description: *The role of the nurse leader is developed through integration of leadership, management, and organizational theories. Emphasis is on interprofessional care, planned change, advocacy, activism, and professional development.*

Prerequisite: NURS 4695 and completion or concurrent enrollment in NURS 4895.

Prerequisite: NURS 4695 and completion or concurrent enrollment with NURS 4895.

NURS4895 - Professional Nursing Capstone Practicum

Credits: 9-12

Students utilize and synthesize basic concepts of professional nursing practice. The course socializes students into a healthcare system. Learning experiences allow students to gain confidence in managing patient care, practicing critical thinking, developing leadership and advocacy skills, and exploring ethical decision-making in clinical situations.

Note: Course changes effective Spring 2024 - Description: *Students synthesize concepts of professional nursing practice. The course socializes students into a healthcare system. Learning experiences allow students to manage patient care, apply critical judgment, develop leadership and explore ethical decision-making in healthcare settings. Prerequisite: NURS 4695 and completion or concurrent enrollment in NURS 4865 .*

Prerequisite: NURS 4695 and completion or concurrent enrollment with NURS 4865.

NURS5140 - Pharmacotherapy for Primary Care

Credits: 4

Prepares primary care practitioners in drug therapy management for a variety of client populations with an emphasis on rural practice.

Prerequisite: NURS 5601, NURS 5602, NURS 5603, NURS 5604, NURS 5605, and NURS 5830.

NURS5165 - Advanced Pathophysiology for Primary Care Practitioners I

Credits: 2

A system-based approach is used to explore selected pathophysiological states encountered across the lifespan in primary care. The developmental physiology, etiology, pathogenesis, clinical manifestations, and physiological responses to illness and treatment regimens are examined, providing a basis for the foundation of clinical decisions.

Prerequisite: Admission in the Doctor of Nursing Practice program.

NURS5420 - Leadership Within Health Care Systems

Credits: 3

Emphasis on strategic use of systems and outcomes as a foundation for professional leadership development.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5405 ; NURS 5410 .

NURS5435 - Educational Leadership

Credits: 3

Emphasis on learning frameworks of leadership development.

Prerequisite: NURS 5425 ; NURS 5430 .

NURS5440 - Science of Quality Improvement and Safety

Credits: 3

Emphasis on theoretical and scientific foundations for quality improvements and safety in health education.

Note: Course changes effective Fall 2022 - *Discontinuing course.*

Prerequisite: Admission to the UW's NS Nursing Program, NURS 5405 , NURS 5410 OR NURS 5140.

NURS5451 - Advanced Leadership Strategies

Credits: 3

Emphasis on optimization of leadership.

Note: Course changes effective Fall 2022 - *Discontinuing course.*

Prerequisite: Admission to UW's MS Nursing Program; NURS 5405 ; NURS 5410 ; NURS 5420.

NURS5452 - Curriculum Development

Credits: 3

Emphasis on the process of developing curricula in nursing educational or healthcare setting to include evaluation of program outcomes.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5405 ; NURS 5410 ; Co-requisite of NURS 5462.

NURS5461 - Business of Healthcare

Credits: 3

Emphasis on leading and managing entrepreneurial healthcare opportunities.

Prerequisite: Admission to MS; NURS 5405 ; NURS 5410 .

NURS5462 - Teaching Methodologies and Evaluation

Credits: 3

Emphasis on evidence-based teaching methodologies, development of course materials, and evaluation of students learning outcomes.

Prerequisite: Admission to MS; NURS 5405 ; NURS 5410 .

NURS5472 - Integrated Advanced Pathophysiology, Pharmacology, and Assessment

Credits: 3

Emphasis on integration of advanced pathophysiology, and assessment in relation to chronic conditions.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5405 ; NURS 5410 .

NURS5473 - Advancing Healthcare Transformation through Academic-Practice Partnerships

Credits: 3

Emphasis on academic/practice partnerships as avenues for addressing population health and related workforce development.

Prerequisite: Admission to the NURS MS program, NURS 5405 , NURS 5410 .

NURS5483 - Practicum: Rural Healthcare Leadership

Credits: 3

Emphasis on the integration of learning through a practicum experience in educational or healthcare leadership.

Prerequisite: Completion of all required MS courses, corequisite NURS 5473.

NURS5601 - Theoretical Foundations Advanced Practice Nursing

Credits: 3

An introduction to the discipline of nursing for graduate nursing students

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5602 - Advanced Nursing Leadership

Credits: 3

Focus on developing advanced nursing leadership skills and attributes for interprofessional collaboration to create viability of the profession and health-related practice environments

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5603 - Evidence-Based Practice for Advanced Nursing

Credits: 3

Focuses on the use of EBP to solve clinical, educational, and administrative problems in advanced nursing practice.

Prerequisite: Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5604 - Population and Health Policies

Credits: 3

Emphasis on population health, epidemiology, and health policy related to rural and global health issues.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice

Credits: 3

Emphasis on theoretical and scientific foundations for quality improvement, safety, and informatics in health care.

NURS5750 - Independent Advanced Study

Credits: 1-4

Max Credit (Max. 8)

Provides students the opportunity to analyze a problem in nursing; apply theory to clients in a clinical setting; or pursue an area

of interest under the guidance of a faculty member. Requirements and evaluation are mutually established between the student and faculty member.

NURS5790 - Advanced Issues in Health

Credits: 1-3
Max Credit (Max. 12)

Designed to provide graduate students the opportunity of pursuing advanced issues in health.

Prerequisite: graduate status.

NURS5820 - Health Behavior Change I: Primary Prevention and Wellness

Credits: 3

This course will cover the application of theories and techniques of health behavior change and principles of epidemiology to health issues from the individual to the community level.

Prerequisite: Admission to the DNP program.

NURS5824 - Advanced Health Assessment and Clinical Decision-Making for Nurse Practitioners

Credits: 2

Builds upon basic nursing assessment skills; includes a human cadaver lab experience to enhance learners' understanding of anatomy, physiology, and pathophysiology, progressing to didactic, hands-on practice, and check-offs of student ability to perform client interviewing and advanced physical assessment techniques. Prepares learners for the clinical decision-making required of nurse practitioners.

Note: Course changes effective Fall 2022 - Credits: 3 credits; Description: *Advanced health assessment and diagnostic decision-making for nurse practitioners. Builds on previous nursing assessment skills. Emphasizes person-centered communication skills and a systematic diagnostic-reasoning approach that leads to accurate clinical decision-making. Clinical correlation amongst anatomy, physiology, pathophysiology, and physical examination. Prerequisite: NURS 5140 and NURS 5165.*

Prerequisite: NURS 5165, NURS 5800, NURS 5805, NURS 5810, and NURS 5865

NURS5825 - Advanced Health Assessment and Clinical Decision-Making for Family Nurse Practitioners

Credits: 4

Advanced health assessment and diagnostic decision-making for family nurse practitioners. Builds on previous assessment skills and covers specialty exams used in primary care. Emphasizes a systematic diagnostic reasoning approach that leads to accurate clinical decision-making. Additionally, course focuses on sociocultural influences, growth and development, and gender concepts.

Note: Course changes effective Fall 2022 - Name: *Advanced Health Assessment for Family NPs*; Credits: *2 credits*; Description: *Advanced primary care assessment skills for family nurse practitioners. Focusing on specialty examination techniques for all body system.* Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5166 , NURS 5815 , NURS 5820, and NURS 5824.

NURS5826 - Advanced Health Assessment for Psych NPs

Credits: 2

Advanced assessment skills for psychiatric mental health nurse practitioners. Focusing on specialty examination techniques in the mental health setting.

Prerequisite: NURS 5165 and NURS 5140.

NURS5827 - Skills for Family NP

Credits: 3

Advanced assessment skills for psychiatric mental health nurse practitioners. Focusing on specialty examination techniques in the mental health setting.

Prerequisite: NURS 5824, NURS 5825, NURS 5871, and NURS 5875.

NURS5828 - Skills for Psych NP

Credits: 2

Developing skills for advanced practice nursing and practice management for the psychiatric mental health nurse practitioner.

Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

NURS5830 - Health Behavior Change II: Behavioral Skills for Secondary and Tertiary Prevention

Credits: 3

This course will cover the application of health behavior change skills in advanced nursing practice, including theories/models and techniques, with a focus on chronic illness.

Prerequisite: NURS 5820 and NURS 5865.

NURS5840 - Leadership in Advanced Practice Nursing

Credits: 3

Organizational and systems leadership for improvement of health. Focuses on interrelationship among systems, ethics, policy, and change. Identifies qualities and behaviors associated with exemplary nursing leadership. Special emphasis is given to rural health care systems.

Note: Course changes effective Fall 2022 - *Discontinuing course.*

Prerequisite: NURS 5440, NURS 5830 AND NURS 5880, NURS 5881 OR NURS 5871, NURS 5872.

NURS5845 - Health Communication/Informatics

Credits: 3

Emphasizes understanding, managing and using of information systems/technology to provide healthcare in rural health settings. Discussion includes the evaluation and project management of the human/technology interface with specific attention to business, ethical and legal issues encountered in interdisciplinary, collaborative settings.

Note: Course changes effective Fall 2022 - *Discontinuing course.*

Prerequisite: NURS 5440, NURS 5830 AND NURS 5880, NURS 5881 OR NURS 5871, NURS 5872.

NURS5850 - Innovative Practice Models

Credits: 4

Examination of innovative health care models and their incorporation into primary care. Emphasizes the evaluation models in care delivery, quality management, and business improvement strategies.

Note: Course changes effective Fall 2023 - *Discontinuing course.*

Prerequisite: NURS 5840, NURS 5845 AND NURS 5873, NURS 5874 OR NURS 5861, NURS 5882.

NURS5861 - Practicum: Therapeutic Interventions Across the Lifespan

Credits: 3

Clinical practicum focused on beginning level therapeutic competencies in the advanced practice role of the PMHNP.

Note: Course changes effective Spring 2023 - *Discontinuing course.*

Prerequisite: NURS 5440, NURS 5830, NURS 5880 and NURS 5881.

NURS5862 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP I

Credits: 5

Clinical practicum that allows students to continue to practice and refine competencies in the PMHNP role with multiple and complex psychiatric populations.

Note: Course changes effective Summer 2023 - Prerequisite: NURS 5828, NURS 5882, and NURS 5883.

Prerequisite: NURS 5850.

NURS5863 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP II

Credits: 5

Clinical practicum that allows students to continue to practice and refine competencies in the PMHNP role with multiple and complex psychiatric populations.

Note: Course changes effective Fall 2023 - Prerequisite: NURS 5862 and NURS 5891.

Prerequisite: NURS 5862, NURS 5883 and NURS 5891.

NURS5864 - Final PSH Practicum

Credits: 6

This final clinical experience provides learners with the opportunity to integrate previous learning from the PMHNP program in the provision of evidence-based health care.

Prerequisite: NURS 5863, NURS 5866, NURS 5892, and NURS 5893.

NURS5865 - DNP Seminar

Credits: 1

Max Credit (Max. 6)

Instructor and student-led discussions designed to facilitate role transition of the doctorally-prepared nurse practitioner. Seminars include topics related to integration and application of nursing and other health-related theories and models in rural nurse practitioner-delivered care.

Prerequisite: Admission to the DNP program.

NURS5866 - DNP Seminar II

Credits: 1

Instructor and students lead discussions designed to facilitate role transition of the doctorally prepared nurse practitioner. Seminars include topics related to transitioning from nurse practitioner students into practicing nurse practitioners.

Note: Course changes effective Fall 2023 - Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891, NURS 5862 and NURS 5883 OR NURS 5891, NURS 5875 and NURS 5876.

NURS5871 - Wellness for Adults in Primary Care

Credits: 3

Provision of wellness primary care for adults across the lifespan, including primary and secondary prevention.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 5165 and NURS 5140.

Prerequisite: NURS 5140 and NURS 5825.

NURS5872 - Practicum for Wellness in Primary Care

Credits: 3

Clinical practicum for NURS 5871, Wellness for Adults in Primary Care.

Note: Course changes effective Summer 2023 - Name: Practicum: Diagnosis and Management of the Primary Care Client for the FNP I; Credits: 5 credits; Description: Clinical practicum focused on beginning level diagnostic and clinical management competencies for the FNP. Prerequisite: NURS 5873, NURS 5877, and NURS 5827.

Prerequisite: NURS 5140 and NURS 5825.

NURS5873 - Primary Care for Children, Adolescents, and Families

Credits: 3

Provision of primary care for children, adolescents, and families across the lifespan, including primary and secondary prevention.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 5871, NURS 5875, NURS 5824, and NURS 5825.

Prerequisite: NURS 5440, NURS 5830, NURS 5871 and NURS 5872.

NURS5874 - Practicum for Primary Care for Children, Adolescents, and Families

Credits: 3

Clinical practicum for NURS 5873, Primary Care for Children, Adolescents, and Families.

Note: Course changes effective Fall 2023 - Name: Diagnosis and Management of the Primary Care Client for the FNP II; Credits: 5 credits; Description: Clinical practicum that allows students to continue to practice and refine competencies in the FNP role. Prerequisite: NURS 5872 and NURS 5891.

Prerequisite: NURS 5440, NURS 5830, NURS 5871 and NURS 5872.

NURS5875 - Primary Care for Acute & Chronically Ill Adults

Credits: 3

Diagnosis and management of select acute and chronic illnesses experienced by adults across the lifespan. Primary focus is on those physical and behavioral illnesses with high prevalence in rural primary care.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 5165 and NURS 5140.

Prerequisite: NURS 5850.

NURS5876 - Practicum for Primary Care for Acute & Chronically Ill Adults

Credits: 3

Clinical practicum for NURS 5875, Primary Care for Acute & Chronically Ill Adults I.

Note: Course changes effective Fall 2023 - Name: Final FNP Practicum; Credits: 6 credits; Description: This final clinical experience provides learners with the opportunity to integrate previous learning from the FNP program in the provision of evidence-based health care. Prerequisite: NURS 5866, NURS 5874, NURS 5892, and NURS 5893.

Prerequisite: NURS 5850.

NURS5877 - Primary Care for Acute & Chronically Ill Adults II

Credits: 3

Continuation of NURS 5875. Diagnosis and management of select acute and chronic illnesses experienced by adults across the lifespan. Primary focus is on those physical and behavioral illnesses with high prevalence in rural primary care.

Note: Course changes effective Spring 2023 - Prerequisite: NURS 5871, NURS 5875, NURS 5824, and NURS 5825.

Prerequisite: NURS 5875, NURS 5876 and NURS 5891.

NURS5878 - Practicum for Primary Care for Acute & Chronically Ill Adults II

Credits: 3

Clinical practicum for NURS 5877, Primary Care for Acute & Chronically Ill Adults II.

Prerequisite: NURS 5875, NURS 5876 and NURS 5891.

NURS5880 - Neurobiology & Psychopharm

Credits: 3

The advanced study of neurobiology and psychopharmacology in the treatment of psychiatric disorders across the lifespan. In depth exploration of how the advanced practice psychiatric nurse can utilize pharmacodynamics and pharmacogenetics to inform the clinical decision making in the treatment complex mental illnesses and addiction.

Note: Course changes effective Fall 2022 - Name: Neurobiology and Psychopharmacology; Credits: 4 credits; Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5140.

NURS5881 - Psychotherapy Models and Theories for Advanced Practice Mental Health Nursing

Credits: 3

Utilization of psychotherapy frameworks in the care of individuals, families, and groups. Emphasizing the counseling role and skill development of the advanced practice mental health nurses in the assessment, intervention and evaluation of diverse populations across the lifespan. Issues of ethics, rural practice, and diversity are addressed throughout the course.

Note: Course changes effective Fall 2022 - Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5140.

NURS5882 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Adult, Older Adult, and Vulnerable Populations

Credits: 4

Advanced knowledge of evidence based assessment, diagnosis, treatment, management, and health promotion of adults and aging adults with mental illness. Explore culturally sensitive care among vulnerable populations. Examine the professional, ethical, policy, and practice issues influencing the role of the advanced practice psychiatric nurse.

Note: Course changes effective Spring 2023 - Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

Prerequisite: NURS 5440, NURS 5830, NURS 5880 and NURS 5881.

NURS5883 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Child and Adolescent

Credits: 4

Evidenced based assessment, diagnosis, treatment and management of mental health disorders in children and adolescence at the individual, family and community level. Theories of family development including behavioral patterns will be assessed using a culturally sensitive lens. Review of psychotherapy, psychopharmacology, psychoeducation, and health promotion as is developmentally appropriate.

Note: Course changes effective Spring 2023 - Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

Prerequisite: NURS 5850.

NURS5891 - DNP Project I

Credits: 3

In collaboration with a facility, learners will examine clinically relevant data to target a practice and/or patient outcome for improvement. Learners will collect and critically appraise related evidence and develop an intervention, including an outcome evaluation plan.

Note: Course changes effective Summer 2023 - Credits: 1 credit; Description: In collaboration with a health-related organization, learners will identify a problem, concern, or question that can be addressed through a rapid cycle quality improvement project for a Doctor of Nursing Practice project. Prerequisite: NURS 5873, NURS 5877 and NURS 5827 or NURS 5882, NURS 5883 and NURS 5828.

Prerequisite: NURS 5850.

NURS5892 - DNP Project II

Credits: 3

Continuation of NURS 5891, DNP Project I. In collaboration with facility, learners will implement the proposed clinical intervention, evaluate the outcome, and professionally disseminate the results.

Note: Course changes effective Fall 2023 - Description: Continuation of NURS 5891, DNP Project I. In collaboration with a health-related organization, learners will plan and begin to implement a quality improvement project. Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891 AND NURS 5875, NURS 5876 OR NURS 5862, NURS 5883.

NURS5893 - DNP Project III

Credits: 1

Continuation of NURS 5892, DNP Project II. In collaboration with a health-related organization, learners will continue to implement their scholarly quality improvement project.

Prerequisite: NURS 5874, NURS 5892 and NURS 5866 or NURS 5863, NURS 5892, NURS 5866.

NURS5894 - DNP Project IV

Credits: 2

Continuation of NURS 5893, DNP Project III. In collaboration with a health-related organization, learners will finalize their scholarly quality improvement project and disseminate the findings.

Prerequisite: NURS 5893.

NURS5895 - Final DNP Practicum

Credits: 5-6

Max Credit (Max. 6)

This final clinical experience provides learners with the opportunity to integrate previous learning from the DNP program in the provision of evidence-based health care.

Note: Course changes effective Fall 2023 - *Discontinuing course.*

Prerequisite: Admission to DNP program.

NURS5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

NURS5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NURS5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

Online Master of Business Administration

MBAX5103 - Business Research Methods

Credits: 3
An overview of the scientific research process applied in the context of business. Topics include problem definition, selection of a methodological approach, design and implementation of field work (qualitative and survey methods), analysis techniques (thematic analysis for qualitative research and statistical analysis for survey research, and communicating results.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5104 - Organizational Behavior & Human Resource Management

Credits: 3
Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5108 - Financial Accounting

Credits: 3
This course provides students with tools to use financial information from the accounting system. This course addresses how financial statement information is used to make business decisions and allows students to learn about how generally accepted accounting principles are applied to and account for and report on business transaction results. #304.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5202 - Data and Decision Modeling

Credits: 3
This course will prepare students to use computer-based models for solving problems in the areas of operation, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analysis including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5203 - New Ventures

Credits: 3

This course explores and evaluates various intrapreneurial and entrepreneurial opportunities and focuses on lean startup methodologies, use of open innovation techniques, and team productivity. Dynamic business environments characterized by technological diversity and global enterprise will also be considered as student strategically analyze a business opportunity using practical theory application.

Restricted Admitted to MBAX program.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamental principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director. #304.

MBAX5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions. #304.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations. #304.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5330 - The Global Business Environment

Credits: 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Prerequisite: Admission to the MBA online program, or permission from the MBA Program Director.

MBAX5502 - Energy Finance: Project Evaluation

Credits: 3

Introduction to traditional engineering cost methods to evaluate investments in energy and mineral projects, and to modern techniques to make these decisions under uncertainty given the technical and economic risks facing minerals industries.

Prerequisite: Admission to the MBA program, or permission of the MBA Program Director or the MBA Program Coordinator. #304.

MBAX5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduction to basic financial accounting and reporting issues related to energy producing activities. Investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. Cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Prerequisite: Admission to the MBA program, or permission of the MBA Program Director or the MBA Program Coordinator. #304.

MBAX5504 - Supply Chain Management in the Energy Industry

Credits: 3

Examines the field of supply chain management in an energy context. Study procurement and distribution strategies, concepts, tools and techniques that support energy operations. Course activities and case studies will address effective execution of these strategies and the appropriate supporting activities.

Prerequisite: Admission to the MBA program, or permission of the MBA Program Director or the MBA Program Coordinator. #304.

Outdoor Recreation and Tourism Management

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic,

political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP Code [(none)<>COM2]

Prerequisite: ORTM 1000.

ORTM2800 - Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. There is a significant focus on self-awareness, judgment, and decision-making. The specific skills and theories students learn in the class provide a foundation for other leadership endeavors.

Cross Listed ENR 2800

Prerequisite: COM 1

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

ORTM4050 - Global Tourism

Credits: 3

This course focuses on global destinations and the people who inhabit and visit them. Students will examine tourism from different human angles including that of the tourist, the tourism service providers, the government agencies that promote and regulate it, researchers, and the local populations whose lives are impacted.

Prerequisite: COM2 and ORTM 1000; junior or senior standing.

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of

both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP Code [(none)<>COM3]

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4970 - Internship

Credits: 1-6

Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

ORTM4975 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

Supervised study and investigation in topics related to students' research.

Prerequisite: junior standing.

Pathobiology

PATB1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

PATB2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed MICR 2220

When Offered (Offered spring semester)

Prerequisite: MICR 2210

PATB2400 - Host Defenses Against Infection

Credits: 3

Course content will address history of immunology in the context of infectious diseases, different pathogens and their interaction with higher-order life forms and an introduction of the immune system relevant to protect against invasive microorganisms.

Note: Course is appropriate for students majoring in Veterinary Sciences, Microbiology, or other Life Sciences fields.

Prerequisite: MICR 2021/MOLB 2021 or MICR 2240/MOLB 2240

PATB4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed MICR 4001

Dual Listed PATB 5001

Prerequisite: STAT 2050 or STAT 2070

PATB4050 - Problems in Animal Disease

Credits: 1-4

Max Credit (Max. 6)

Offers opportunity for supervised investigation of animal disease problems involving techniques of bacteriology, mycology, virology, gross pathology, histopathology and/ or toxicology.

Prerequisite: 12 semester hours of biological science and consent of instructor; MOLB 2021 is recommended for most students.

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

PATB4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed ANSC 4111

Dual Listed PATB 5111

Prerequisite: ANSC 1030

PATB4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed MICR 4130

Dual Listed PATB 5130

When Offered (Normally offered spring semester)

USP Code [(none)< >COM3]

Prerequisite: C or better in LIFE 2022.

PATB4140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action and their effects on various organisms including man and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 5140

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: 9 hours of biological science (e.g., physiology), 4 hours chemistry, 3 hours biochemistry.

PATB4150 - Seminar

Credits: 1

Max Credit (Max. 4)

Preparation and oral presentation of papers on veterinary sciences topics.

Prerequisite: 8 hours of biology and consent of instructor.

PATB4170 - Diseases of Wildlife

Credits: 3

Introduction to wildlife diseases of the Rocky Mountain region and North America. Emphasis on infectious, parasitic, traumatic, toxic, and other disease agents with coverage of mechanisms of disease, epidemiology, and disease impacts on wildlife populations and species. Significant discussion of zoonotic diseases and diseases at the wildlife/domestic animal interface.

Dual Listed PATB 5170

When Offered (Offered spring semester of even numbered years)

Former Course Number [4120]

Note: 12 hours of biological or zoological sciences.

PATB4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scope objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/ discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed MICR 4220

Dual Listed PATB 5220

Prerequisite: PATB 2220/MICR 2220 and statistics (or epidemiology).

PATB4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 4240

Dual Listed PATB 5240

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070

PATB4300 - Microscopic Anatomy

Credits: 3

Covers mammalian tissue anatomy and function at a microscopic level. Emphasizes the relationship of tissue structure and function to health and the development of disease. Intended for students pursuing careers or continuing education in medical/veterinary medical, research, and related fields. Cross Listed with PATB 5300.

PATB4320 - Problems in Parasitology

Credits: 1-3

Max Credit (Max. 5)

Individual laboratory, library or field study of parasites and their host relations.

Prerequisite: 8 semester hours of biological sciences or 3 semester hours of parasitology and consent of instructor.

PATB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed MOLB 4400

Dual Listed PATB 5400

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

PATB4500 - Veterinary Parasitology

Credits: 4

Biology, importance, diagnosis and control of helminth and protozoan parasites of wild and domestic animals. Arthropod vectors and/or intermediate hosts of helminth & protozoan parasites are included. Diagnostic procedures and identification familiarity with agents are emphasized in lab.

When Offered (Offered fall semester of even-numbered years)

Prerequisite: 8 hours of biological science.

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

PATB5001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed MICR 5001

Dual Listed PATB 4001

Prerequisite: STAT 2050

PATB5110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 4110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

PATB5111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed ANSC 5111

Dual Listed PATB 4111

Prerequisite: ANSC 1030

PATB5120 - Topics in Pathobiology

Credits: 1-4

Max Credit (Max. 8)

This course will have a focus on conservation genomics. Lectures in current pathobiology topics derived from the expertise of the lecturer.

Prerequisite: 12 hours of biological sciences and consent of instructor.

PATB5130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Dual Listed PATB 4130

Prerequisite: C or better in LIFE 2022

PATB5140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action, and their effects on various organisms including man and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 4140

Prerequisite: 9 hrs. biological science (eg. physiology), 4 hrs. chemistry, 3 hrs. biochemistry.

PATB5170 - Diseases of Wildlife

Credits: 3

Introduction to wildlife diseases of the Rocky Mountain region and North America. Emphasis on infectious, parasitic, traumatic, toxic, and other disease agents with coverage of mechanisms of disease, epidemiology, and disease impacts on wildlife populations and species. Significant discussion of zoonotic diseases and diseases at the wildlife/domestic animal interface.

Dual Listed PATB 4170

Prerequisite: 12 hours of biological or zoological sciences.

PATB5220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/ discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed MICR 5220

Dual Listed PATB 4220

Prerequisite: PATB 2220/MICR 2220 and statistics (or epidemiology).

PATB5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 5240

Dual Listed PATB 4240

PATB5400 - Immunology

Credits: 4

Biology of the immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques. Students are required to complete a term paper and make a presentation.

Cross Listed MOLB 5400

Dual Listed PATB 4400

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

PATB5500 - Veterinary Parasitology

Credits: 4

Biology, importance, diagnosis and control of helminth and protozoan parasites of wild and domestic animals. Arthropod vectors and/or intermediate hosts of helminth & protozoan parasites are included. Diagnostic procedures and identificational familiarity with agents are emphasized in lab.

Prerequisite: 8 hours of Biological Science.

PATB5505 - Investigations in Pathobiology

Credits: 1-4

Max Credit (Max. 8)

Research involvement in pathobiology to learn laboratory methods, scientific literature, research design and data analysis and presentation.

Prerequisite: graduate standing and/or consent of instructor and 16 hours of biological sciences.

PATB5510 - Introductory Virology

Credits: 3

Prokaryotic and eukaryotic viruses as infectious agents and models for modern molecular biology. Examines concepts and principles of pathogenesis, host response and the regulation of virus-host interactions. Genome organization, structure and replication will be examined within the context of the co-evolution of virus and host.

Cross Listed MOLB 5510

Prerequisite: MOLB 3610 or MOLB 4600 plus MOLB 4610.

PATB5515 - Advanced Seminar in Pathobiology

Credits: 1

Max Credit (Max. 4)

Preparation and presentation of research topics in pathobiology with participation in discussions.

Prerequisite: graduate standing and/or consent of instructor and 16 hours of biological sciences.

PATB5710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Dual Listed PATB 4710

PATB5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

PATB5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PATB5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PATB5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

PATB5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PATB5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is

complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Petroleum Engineering

PETE1060 - Introduction to Petroleum Engineering Problem Solving

Credits: 1

Covers elements of Petroleum Engineering calculations associated with typical computations in Drilling, Production, and Reservoir Engineering, Rock and Fluids properties, to simultaneously train the student on basic computing skills as well as basic language of Petroleum Engineering. The preferred computing tool is Matlab, which will be introduced through simple calculations on the computer. Notions of the petroleum engineering curriculum will also be provided through examples of the different subjects.

Prerequisite: Math placement 5 or concurrent enrollment in MATH 2200.

PETE2050 - Fundamentals of Petroleum Engineering

Credits: 3

General introduction to petroleum engineering, including petroleum geology, exploration, reservoir rocks, and fluid flow through porous media, drilling fundamentals, completion technology, well logging and testing, methods of production, stimulation methods, enhanced oil recovery, reserves and economics.

Prerequisite: grade of C or better in both MATH 2205 and PETE 1060.

PETE2060 - Introduction to Petroleum Engineering Computing

Credits: 3

Introduces Petroleum Engineering problems and principles, develops computational skills needed to solve them, and reinforces a computational tool that will be useful for other Petroleum Engineering classes.

Prerequisite: C or better in PETE 1060, and either a D or better in MATH 2310 or concurrent enrollment in MATH 2310.

PETE3015 - Multicomponent Thermodynamics

Credits: 3

Introduces mixture properties, such as chemical potentials, excess properties, partial molar properties, heats of mixing, fugacities, and practical tools for estimating them from solution theories and equations of state. These tools and concepts are applied to phase and chemical equilibria.

Prerequisite: C or better in ES 2310 and concurrent enrollment in PETE 2060. Student must be a Petroleum Engineering major.

PETE3025 - Heat and Mass Transfer

Credits: 3

Introduces energy and mass transfer concepts and the development of mathematical models of physical phenomena, including convection, conduction, radiation, and mass diffusion and convection.

Prerequisite: C or better in ES 2330 and MATH 2310. Student must be a Petroleum Engineering major.

PETE3100 - Rock and Fluids Lab

Credits: 2

Provides understanding of principles of rock and fluid properties and their measurement as part of conventional and special core analysis, as well as PVT characteristics of reservoir fluids. Students are expected to understand how to measure important rock and fluid properties using laboratory equipment, as part of reservoir characterization routines, formation damage evaluations and well log calibration protocols. Students are also expected to learn how to write succinct and organized reports.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3200 - Reservoir Engineering

Credits: 3

Covers rock and fluid properties, reserve estimation using volumetric and material balance methods, discussion of different reservoir drive mechanisms, aquifer models, Darcy's law and single-phase flow through porous media, introduction to well testing, solution of radial diffusivity equation, immiscible displacement, decline rate analysis, and reservoir simulation.

Prerequisite: PETE 3025, C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3255 - Basic Drilling Engineering

Credits: 3

Principles and practices of oil and gas well rotary drilling, including rock mechanics, drilling hydraulics, drilling fluids, and hole deviation. Drilling equipment analysis, casing design, and drilling fluid properties. Application of modern computer-based analysis and design methods.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3265 - Drilling Fluids Laboratory

Credits: 3

Measurement of physical and chemical properties of drilling fluids, including experiments on mud density control, viscosity control, rheological properties, mud hydraulics, filtration properties, mud contaminants and their treatments. Includes design of experiments, data processing, interpretation and writing technical reports.

Prerequisite: PETE 3255, C or better in both ES 2310 and ES 2330. Student must be a Petroleum Engineering major.

PETE3715 - Production Engineering

Credits: 3

Provides elements for calculating the production rate of oil or gas wells, including reservoir inflow performance, which is determined by the reservoir rock and fluids properties and calculated based on Darcy's law, and tubing performance, which is determined by tubing parameters and calculated based on Newtonian dynamics. Basic design of artificial lift systems, reservoir stimulations and optimization of production systems are also included.

Prerequisite: C or better in ES 2310, ES 2330 and PETE 2050. Student must be a Petroleum Engineering major.

PETE3725 - Well Completions

Credits: 3

Covers many facets of completion and intervention in oil and gas wells, including design and procedures to meet deliverability, safety, and integrity, starting with completion, stimulation, workover, and intervention, ending with plug and abandonment requirements.

Prerequisite: C or better in both PETE 2050 and ES 2410. Student must be a Petroleum Engineering major.

PETE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/ CHE 3890/COSC 3890/EE 3890/ES 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

PETE3900 - Undergraduate Research in Petroleum Engineering

Credits: 1-6

Max Credit (Max. 6)

Students carry out research appropriate to undergraduates, under faculty supervision. May be taken more than once. Requires a written research proposal to be approved by instructor prior to course start.

Prerequisite: junior standing as a petroleum engineering major and consent of instructor.

PETE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Studies social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed CHE 4000.

Prerequisite: junior standing and completion of two lab sciences.

PETE4030 - Rock and Fluid Properties

Credits: 3

Reservoir rocks

Former Course Number [3010]

Prerequisite: PETE 2050.

PETE4060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of Fundamental Flow Equation. Constant Rate Solutions. Constant Pressure Solutions. The Principles of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, isochronal test analysis.

Dual Listed PETE 5060.

Prerequisite: PETE 3200.

PETE4200 - Natural Gas Engineering

Credits: 3

Studies development of natural gas reservoirs for normal production and as storage fields. Includes back pressure tests, hydrates, pipeline problems, cycling and use of the material balance equation. Also processing of natural gas, including compression, expansion, refrigeration, separation, sour gas treating, sulfur recovery, LNG production and carbon dioxide separation.

Prerequisite: PETE 2050.

PETE4215 - Rock Mechanics

Credits: 3

Covers rock mechanical properties, stress and strain in rock and rock masses, rock failure mechanisms, thermal-hydraulic-mechanical-chemical (THMC) coupling, and their applications to ground surface subsidence/uplift, borehole instability, and hydraulic fracturing.

Dual Listed PETE 5215.

Prerequisite: ES 2330 and 2410.

PETE4220 - Geostatistics and Subsurface Characterization

Credits: 3

An advanced skills course about subsurface modeling using diverse data (e. g. well data, seismic info, etc.), including model development, techniques, and practical applications. Students must have basic knowledge of mathematical and statistical modeling.

Dual Listed PETE 5220.

Prerequisite: Junior standing and PETE 3200 or consent of instructor.

PETE4225 - Well Test Analysis

Credits: 3

Covers knowledge of well test interpretation techniques. Theory for well testing include drawdown and buildup tests, single-rate and multi-rate testing, derivative analysis, wellbore storage, type curve matching, fall off and injectivity, fractured wells, fractured reservoirs, interference and pulse testing, and horizontal well analysis.

Prerequisite: PETE 3200. Student must be a Petroleum Engineering major.

PETE4300 - Reservoir Simulation

Credits: 3

Simulation of petroleum reservoirs, formulation of equations, finite difference methods of solution, data preparation and input, history matching case studies.

Dual Listed PETE 5300.

Prerequisite: PETE 3200, MATH 2210, MATH 4440.

PETE4310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 5310.

Prerequisite: PETE 3200.

PETE4320 - Well Log Interpretation

Credits: 3

Studies use of various types of open hole logs for quantitative evaluation of formations.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE4340 - Petroleum Economics

Credits: 3

Applies principles of economics to petroleum properties. Studies taxation, present worth, rate of return, payout and decisions under uncertainty.

Prerequisite: PETE 3200. Student must be a Petroleum Engineering major.

PETE4400 - Tight Gas Sand/Coalbed Methane

Credits: 3

This course provides information needed to understand geoscience and engineering considerations concerning the development

of Fractured, Tight Gas Sands and Coalbed Methane reservoirs. Subjects include the origin and accumulation of hydrocarbons within these reservoirs, and the tools, methods and workflows used for locating, characterizing, and developing these reservoir types.

Dual Listed PETE 5400.

Prerequisite: PETE 3200; Student must be a Petroleum Engineering major.

PETE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580.

Prerequisite: junior or senior standing.

PETE4736 - Petroleum Engineering Design

Credits: 4

Design and development of petroleum reservoirs using principles and skills learned in the Petroleum Engineering program. Application of software for design and analysis of the drilling, reservoir and production of petroleum.

USP Code [(none) < COM3]

Prerequisite: PETE 3200, PETE 3255, PETE 3715, PETE 3725, and C or better in COM2. Student must be a Petroleum Engineering major.

PETE4800 - Shale Reservoir Development

Credits: 3

Provides an overview of the geoscience and engineering aspects involved in the exploration and development of shale reservoirs. Topics covered include organic geochemistry, geomechanics, petrophysics, geophysics, reservoir and completion engineering, and drilling. The primary phases involved in obtaining hydrocarbon production from shale reservoirs are detailed.

Dual Listed PETE 5800.

Former Course Number [4850]

Prerequisite: C or better in both PETE 2050 and PETE 3200.

PETE4810 - Unconventional Gas Production

Credits: 3

Study of resource base, drilling, completion and production technology, and reservoir characteristics for tight gas sands. Devonian shales, coalbed methane, geopressured aquifers, and hydrates. Case histories and economics are presented in each of these.

Dual Listed PETE 5810.

Prerequisite: consent of instructor.

PETE4830 - Thermal Recovery

Credits: 3

Objective of this course is to examine and explore in depth the theoretical and applied aspects of thermal recovery process of producing hydrocarbons including state-of-the-art review.

Dual Listed PETE 5830.

Prerequisite: Senior standing in petroleum or chemical engineering.

PETE4860 - Energy, Environment, and Materials

Credits: 3

Understanding the connection between materials, energy and environment, including the history of climate and different types of energy in use for a greener planet. Provides broad knowledge in the areas of energy, material science, chemical, petroleum, and environmental engineering.

Dual Listed PETE 5860.

Prerequisite: Junior standing and PETE 2050 or consent of instructor.

PETE4970 - Internship in Petroleum Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students in appropriate engineering activities while serving as interns in an industrial, government, or other setting. Requires a written project proposal to be approved by instructor prior to course start.

Prerequisite: Must be involved in a petroleum engineering co-op/internship experience; consent of instructor.

PETE4990 - Topics in Petroleum Engineering

Credits: 1-6

Features topics not included in regularly offered classes.

PETE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed .

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5070 - Multiphase Flow

Credits: 3

A thorough background in the methods of analysis and current developments in gas-liquid, gas-solid, liquid-solid, and gas-liquid-solid flows. Introduction to multiphase flow instrumentation.

Prerequisite: graduate standing or consent of instructor.

PETE5080 - Interfacial Phenomena

Credits: 3

Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5090 - Research Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, career options with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific method, developing hypotheses, grant proposals, paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

PETE5100 - Independent Study

1486

Credits: 1-3
Max Credit (Max. 12)

Selected topics in petroleum engineering.

Prerequisite: graduate standing and consent of instructor.

PETE5150 - Topics in Petroleum Engineering

Credits: 1-3
Max Credit (Max. 12)

Selected topics in petroleum engineering.

Prerequisite: consent of instructor.

PETE5200 - Problems in Petroleum Engineering

Credits: 1-3
Max Credit (Max. 6)

Selected topics in petroleum engineering.

Prerequisite: doctoral student and consent of instructor.

PETE5215 - Rock Mechanics

Credits: 3
Covers rock mechanical properties, stress and strain in rock and rock masses, rock failure mechanisms, thermal-hydraulic-mechanical-chemical (THMC) coupling, and their applications to ground surface subsidence/uplift, borehole instability, and hydraulic fracturing.

Dual Listed PETE 4215.

Prerequisite: graduate standing.

PETE5220 - Geostatistical/Subsurface Characterization

Credits: 3
Providing practical way for building realistic subsurface models. Students must have basic knowledge of mathematical and statistical modeling. Both fundamental and practical aspects are covered. Students will be able to take real data derived from subsurface modeling and build geostatistical models, which will be performed deterministically and stochastically.

Dual Listed PETE 4220

Prerequisite: graduate standing.

PETE5255 - Advanced Drilling Engineering

Credits: 3

Principles and practices of advanced topics in oil and gas drilling engineering including advances in directional and horizontal drilling, drilling fluid hydraulics and cuttings transport. Non-Newtonian Fluid Flow Analysis, pore pressures and fracture resistance estimation methods. Application of modern computer-based analysis and design methods.

Prerequisite: graduate standing.

PETE5300 - Reservoir Simulation

Credits: 3

Simulation of petroleum reservoirs, formulation of equations, finite difference methods of solution, data preparation and input, history matching case studies.

Dual Listed PETE 4300.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

PETE5340 - Reservoir Engineering.

Credits: 3

Covers rock and fluid properties, reserve estimation using volumetric and material balance methods, discussion of different reservoir drive mechanisms, aquifer models, Darcy's law and single-phase flow through porous media, introduction to well testing, solution of radial diffusivity equation, immiscible displacement, decline rate analysis, and reservoir simulation.

Prerequisite: Graduate standing.

PETE5350 - Advanced Reservoir Engineering

Credits: 3

Covers high-level understanding of modern reservoir engineering. Provides knowledge of scientific principles to formulate fluid flow, heat and mass transport in permeable media. Use analytical and computational tools to resolve research-oriented problems. Develop competence in interpreting results of modeling.

Prerequisite: graduate standing.

PETE5355 - Mathematical Methods

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Cross Listed CHE 5355.

Prerequisite: graduate standing.

PETE5400 - Tight Gas Sand/Coalbed Methane

Credits: 3

This course provides information needed to understand geoscience and engineering considerations concerning the development of Fractured, Tight Gas Sands and Coalbed Methane reservoirs. Subjects include the origin and accumulation of hydrocarbons within these reservoirs, and the tools, methods and workflows used for locating, characterizing, and developing these reservoir types.

Dual Listed PETE 4400.

Prerequisite: graduate standing.

PETE5715 - Production Engineering

Credits: 3

Provides elements for calculating production rate of oil/ gas wells, including reservoir inflow performance, determined by reservoir rock and fluids properties using Darcy's law, and tubing performance, determined by tubing parameters and using Newtonian dynamics. Basic design of artificial life systems, reservoir stimulations and optimization of production systems are included.

Prerequisite: graduate standing.

PETE5800 - Shale Reservoir Development

Credits: 3

Provides an overview of the geoscience and engineering aspects involved in the exploration and development of shale reservoirs. Topics covered include organic geochemistry, geomechanics, petrophysics, geophysics, reservoir and completion engineering, and drilling. The primary phases involved in obtaining hydrocarbon production from shale reservoirs are detailed.

Dual Listed PETE 4850.

Prerequisite: graduate standing.

PETE5810 - Unconventional Gas Production

Credits: 3

Study of resource base, drilling, completion and production technology, and reservoir characteristics for tight gas sands. Devonian shales, coalbed methane, geopressured aquifers, and hydrates. Case histories and economics are presented in each of these.

Dual Listed PETE 4810.

Prerequisite: graduate standing or consent of instructor.

PETE5830 - Thermal Recovery

Credits: 3

Objective of this course is to examine and explore in depth the theoretical and applied aspects of thermal recovery process of producing hydrocarbons including state-of-the-art review.

Dual Listed PETE 4830.

Prerequisite: graduate standing or consent of instructor.

PETE5840 - Miscible Processes

Credits: 3

Objective is to examine and explore in depth the theoretical and applied aspects of miscible processes of producing hydrocarbons including state-of-the-art review.

Prerequisite: PETE 5310 and graduate standing or consent of instructor.

PETE5850 - Chemical Enhanced Oil Recovery Processes

Credits: 3

Objective is to examine and explore in depth the theoretical and applied aspects of the classification of enhanced oil recovery processes called chemical processes.

Prerequisite: graduate standing.

PETE5860 - Energy, Environment, and Materials

Credits: 3

Understanding the connection between materials, energy and environment, including the history of climate and different types of energy in use for a greener planet. Provides broad knowledge in the areas of energy, material science, chemical, petroleum, and environmental engineering.

Dual Listed PETE 4860.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1

Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

PETE5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

PETE5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PETE5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PETE5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

PETE5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PETE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is

complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

PETE5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Pharmacy

PHCY1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

PHCY3450 - Foundational Pathophysiology

Credits: 4
Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)
Former Course Number [4450]
Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY4160 - Problems in Pharmacy

Credits: 1-4
Original investigation on a library or laboratory problem concerned with a definite phase of work in pharmacy.

Prerequisite: consent of instructor.

PHCY4170 - Pharmacy Seminar

Credits: 1-4
Students present oral reports on selected topics of pharmaceutical interest for discussion by the group.

Prerequisite: consent of instructor.

PHCY4210 - Regulating Dangerous Drug Use

Credits: 2

Regulatory theory and practice is used to study the authority/responsibilities of three federal agencies that are entrusted to ensure the safe, effective, and efficient medication use in the United States. The practices and procedures of the FDA, DEA, and CMS are reviewed, describing why healthcare providers should comply with regulatory principles.

Dual Listed PHCY 5210.

Prerequisite: Upper division undergraduate status or department permission.

PHCY4240 - Pharmaceutical Homicide

Credits: 2

Legal pharmaceutical products are sometimes used by healthcare professional criminals to kill people. This course focuses on identifying the zone of risk for people who could be harmed by pharmaceuticals, and the development of best practices to protect patients and other from the harm.

Dual Listed PHCY 5240.

Prerequisite: Upper division undergraduate status or department permission.

PHCY4470 - Fundamentals of Pharmacology

Credits: 4

Studies pharmaceutical agents used for treatment, diagnosis or prevention of disease with particular emphasis on mechanisms of action, therapeutic and adverse effects.

When Offered (Normally offered fall semester)

Former Course Number [3510]

Prerequisite: PHCY 3450.

PHCY4670 - Medication Malpractice

Credits: 2

Using a case-study approach, potential legal liability issues are studied, within a health care context that primarily focuses on legal liability related to the use of medications. Strategies for reduction of legal liability are explored. The implementation and oversight of legal risk management programs is addressed.

Dual Listed Dual listed with: PHCY 5670.

Prerequisite: Upper division undergraduate status or department permission.

PHCY5040 - The Evolution of American Health

Credits: 2

This course explores the evolution of the healthcare system in response to various needs and crises over the years. The professionalization of health care; the development of the modern hospital; the implications of computerized health information; and the empowerment of patients will be covered.

Prerequisite: Admission into the Health Services Administration MS program.

PHCY5041 - Health Services Administration Research Methods

Credits: 2

This course will cover the basic research designs used in health services research. Focus will be given on framing the research questions, selecting the appropriate study design and threats to the internal validity of the study designs.

Prerequisite: Must be enrolled in the HSA program.

PHCY5042 - Statistics for Health Services

Credits: 3

This course will introduce students to correlation analysis, regression, analysis of variance and selected non-parametric tests, focusing on appropriate use of each and how to interpret the output of a statistical test to answer a research question.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5043 - Empirical Analysis for Health Services Administration

Credits: 3

This course will equip students with an understanding of research and policy debates related to economic, political, and administrative aspects of health services by providing an overview of how research can be used by health service researchers to draw conclusions about health services and their administration.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5044 - Preventing Fraud/Waste/Abuse

Credits: 2

Describes potential violations of legal requirements for health institutions and health professionals that can be considered fraud, waste and abuse. Compliance strategies to avoid legal consequences will be discussed.

Prerequisite: enrollment in graduate or professional program or department permission.

PHCY5045 - Health Services Administration Applied Research

Credits: 1-4

This course provides the opportunity for students to apply knowledge and skills obtained in the HSA program while gaining practical experience with real-world projects.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5046 - Health Services Administration Seminar1

Credits: 1

Max Credit (Max. 2)

An in-depth investigation of a timely issue in health services, including the regulatory, economic, patient-safety, marketing, leadership, and ethical aspects of that issue. Students will participate in separate group analysis of a presented problem, and in their presentations of their group's assessment of the problem.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5141 - Introduction to Health Economics and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5142 - Health Economic Decision Analysis

Credits: 2

This class is designed to provide the student with the methods of comparative effectiveness research with special focus on how various decision makers use comparative effectiveness data to assist in decision-making.

Prerequisite: PHCY 5141.

PHCY5143 - Comparative Effectiveness Research

Credits: 2

This class is designed to provide the student with the methods of comparative effectiveness research with special focus on how various decision makers use comparative effectiveness data to assist in decision-making.

Prerequisite: PHCY 5141.

PHCY5144 - Patient Reported Outcomes

Credits: 2

This course is designed to provide an overview of methods pertaining to the development and evaluation of patient-reported outcome measures (PROs) and the role they play in regulatory, reimbursement, and market access decisions.

Prerequisite: Admission in the MS in Health Services Administration program.

PHCY5145 - PBM Decisions

Credits: 2

An overview of managed care pharmacy, with a focus on the relationship between cost controls and the access to pharmaceutical products and quality clinical services, and the relationships between, and relative responsibilities of, health plan sponsors, PBMs and providers.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5146 - HEOR Data Analytics

Credits: 3

An introduction to analyzing medical and pharmacy data using SAS and SQL exploring the complexities of health data, focusing on phases of the data life cycle in health economics and outcomes research, including data validation and manipulation, merging data and creating data sets.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5147 - HEOR Data Analytics

Credits: 3

This is an introduction to intermediate and advanced methods of analyzing healthcare data focusing on clinical risk adjustment models in SAS. This course will further explore the features and complexities of health data and build upon the Introduction to HEOR Data Analytics Using SAS I.

Prerequisite: PHCY 5146 and must be enrolled in the HSA program, or by permission.

PHCY5148 - Health Economics and Policy

Credits: 2

This course explores the financing and structure of the U. S. healthcare system with the purpose of understanding how these systems impact patient care, health policy, and economics. Topics include organization of healthcare systems, insurance programs, legislation, healthcare labor markets and drug costs.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5160 - Graduate Problems Course

Credits: 1-6

Max Credit (Max. 12)

This course allows in-depth exploration of topics in pharmaceutical sciences, at the graduate level, that are mutually agreed upon by the student and faculty.

Prerequisite: consent of instructor.

PHCY5210 - Regulating Dangerous Drug Use

Credits: 2

Regulatory theory and practice is used to study the authority/responsibilities of three federal agencies that are entrusted to ensure the safe, effective, and efficient medication use in the United States. The practices and procedures of the FDA, DEA, and CMS are reviewed, describing why healthcare providers should comply with regulatory principles.

Dual Listed PHCY 4210.

Prerequisite: Enrollment in graduate or professional program or department permission.

PHCY5240 - Pharmaceutical Homicide

Credits: 2

Legal pharmaceutical products are sometimes used by healthcare professional criminals to kill people. This course focuses on identifying the zone of risk for people who could be harmed by pharmaceuticals, and the development of best practices to protect patients and other from the harm.

Dual Listed PHCY 4240.

Prerequisite: Enrollment in graduate or professional program or department permission.

PHCY5241 - Introduction to Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5242 - The Food and Drug Administration

Credits: 2

This course examines the regulatory climate for FDA-regulated drug and biological products. Regulatory standards are reviewed (including discovery of new therapeutic modalities, their approval, manufacturing, promotion, and distribution), and the enforcement authority of the FDA is examined (focusing on methods that promote safe and effective drug use).

Prerequisite: PHCY 5241.

PHCY5243 - The Drug Enforcement Administration

Credits: 2

This course examines the balance of health professionals and institutions working with regulators to develop programs that reflect both the best interests of individual patients and of society. Focusing on challenges of treating chronic pain, prescription drug abuse, and actions that have led to conflict between regulators and health practitioners.

Prerequisite: PHCY 5241.

PHCY5244 - State Regulations of Health Professions

Credits: 2

This course examines how state regulatory agencies assure the initial competence of practitioners, as well as their continuing competence in the years following the completion of academic training. The course also examines the factors that are applied to the regulation of health care settings, using the structure-process-outcomes typology of Donabedian.

Prerequisite: PHCY 5241.

PHCY5245 - Medicare and Medicaid

Credits: 2

This course examines the structure, coverage, and operation of federal health programs, with a focus on health policy as reflected in the programs funded by federal resources. The primary focus of the course is on Medicare and Medicaid, and also reviewing other federal programs.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5341 - Introduction to Healthcare Quality

Credits: 3

Max Credit (Max. 3)

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5342 - Healthcare Risk and Quality

Credits: 3

This course surveys the importance and processes of quality and risk in health care institutions. Students will be assigned to lead topics. Current events/topics will be utilized to inform the class.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5343 - Advanced Topics in Healthcare Quality

Credits: 4

Max Credit (Max. 4)

This is an advanced-level course on patient safety and quality improvement strategies in healthcare. The course will utilize many learning resources of the Institute for Healthcare Improvement (IHI) Open School so that students may earn an IHI Certificate.

Prerequisite: PHCY 5341.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5442 - Healthcare Financial Planning

Credits: 2

This course explores financial principles incorporating the unique environment of the health institution. The mix of services (inpatient, outpatient, nursing facilities, urgent/emergency care and components) will be studied through extensive use of case studies and models to develop the health institution leader's financial skills.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5443 - Healthcare Human Capital Plan

Credits: 2

This course will provide skills for developing and managing human capital by the health institution leader through exploration of best practices for human capital selection and development to optimize the performance of the workforce while complying with legal, regulatory, and contractual requirements through extensive use of case studies and models.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5444 - Healthcare Strategic Innovation

Credits: 2

This course develops strategic skills by the health institution leader through exploration of principles incorporating the unique environment of the health institution. The strategic skills will be applied to the concept of innovation through extensive use of case studies and models.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5541 - Introduction to Biopharmaceutical Marketing and Production

Credits: 3

This course will review empirical evidence in various topic areas within the fields of biopharmaceutical marketing, sales promotion, communication, and selling effectiveness focusing on the history and structure of the biopharmaceutical product representative function and theoretical domains associated with the associated activities.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5550 - Advanced Cardiovascular Physiology and Pharmacology

Credits: 3

An advanced study in the integration of modern cardiovascular physiology, pharmacology, biochemistry and cell biology concepts.

Dual Listed PHCY 6550.

Prerequisite: PHCY 6230 (or equivalent).

PHCY5660 - Health Care Law

Credits: 3

A survey of health care law for students in health care programs, law students, and other matriculated students. Subject matter includes, but is not limited to, the following: malpractice, licensing, informed consent, reform, reproduction and advanced directives.

Dual Listed PHCY 4660.

Prerequisite: consent of instructor.

PHCY5670 - Medication Malpractice

Credits: 2

Using a case-study approach, potential legal liability issues are studied, within a health care context that primarily focuses on legal liability related to the use of medications. Strategies for reduction of legal liability are explored. The implementation and oversight of legal risk management programs is addressed.

Dual Listed Dual listed with: PHCY 4670.

Prerequisite: Enrollment in graduate or professional program or department permission.

PHCY5887 - Molecular Neuropharmacology

Credits: 3

Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

PHCY5920 - Agents for Diagnostic Imaging

Credits: 2

Diagnostic Agents is currently designed as a one semester elective course with 2 credit hours. It is an introduction and survey of all diagnostic drugs used in the diagnosis and imaging of disease as approved by the US FDA for use in the United States.

Prerequisite: PHCY 6211, PHCY 6210, PHCY 6110, CHEM 2440, MOLB 3610.

PHCY6040 - Post-Graduate Career Planning

Credits: 1

This course helps student pharmacists make informed career choices. It is designed to allow students to prepare a CV and enhance a job search, interview and develop cover letter writing skills. Specific discussion topics will be largely focused on students' interest areas.

Prerequisite: PHCY 6480 or PHCY 6482, enrollment in professional PharmD program.

PHCY6051 - Topics in Illicit Drugs

Credits: 1

The course will address the basic pharmacology, physical signs of addiction, population demographics, abuse patterns and history of common illicit drugs. The course is designed to raise student awareness of illicit drug addiction.

Prerequisite: PHCY 6251, enrollment in professional Pharm D program.

PHCY6052 - Geriatric Pharmacotherapy

Credits: 1

Designed to develop the student's knowledge and understanding of geriatric pharmacotherapy through discussion of medical literature, case discussion, and providing patient care under supervision of the faculty member. Emphasis of the course is on class discussion and case-based learning.

Prerequisite: enrollment in professional PharmD program, P3 status.

PHCY6053 - Biotechnology

Credits: 2

Designed to introduce the student to the most rapidly growing area of biological drug pharmacotherapy which involves recombinant DNA technology and isolation from natural sources. A combined lecture, discussion of current literature and seminar topics approach is used.

PHCY6100 - Dose Form Design

Credits: 4

Extensively introduces various types of dosage forms, discusses advantages and disadvantages of each. Pharmaceutical calculations are a major component of the course, as well as physicochemical principles involved in dose form stability.

Prerequisite: CHEM 2420 and CHEM 2440.

PHCY6102 - Biopharmaceutics and Pharmacokinetics

Credits: 4

Discusses biopharmaceutic and pharmacokinetic aspects of dosage form design. Basic pharmacokinetics and biopharmaceutics are interrelated to clinical applications. Also covers classical kinetics and dissolution.

USP Code [(none)<>]

Prerequisite: MATH 2200 and PHCY 6100.

PHCY6106 - Pharmaceutical Calculations

1501

Credits: 2

Application of basic mathematics and quantitative reasoning to pharmaceutical calculations, emphasizing calculations of doses, dosage requirements, compounding of formulations and parenterals.

Former Course Number [6105]

Prerequisite: MATH 1000 or MATH 1400.

PHCY6110 - Medicinal and Natural Products Chemistry I

Credits: 3

Three-semester series that studies the physicochemical, biochemical and pharmacological properties of substances of natural and synthetic origin that are used as medicinal agents.

Prerequisite: CHEM 2440 and MOLB 3610.

PHCY6111 - Medicinal and Natural Products Chemistry II

Credits: 3

Continuation of Medicinal and Natural Products Chemistry I.

Former Course Number [6210]

Prerequisite: Ph1 status in PharmD program or consent of instructor.

PHCY6120 - Advanced Pathophysiology

Credits: 3

Advanced course covering the molecular, cellular, genetic and clinical principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for Doctor of Pharmacy students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 3450 for interprofessional education revolving around student-led case study presentations.

Former Course Number [6220]

Prerequisite: LIFE 1010, LIFE 1020, CHEM 1020, CHEM 1030, CHEM 2420, CHEM 2440, MOLB 2240, MOLB 3610, ZOO 3115, ZOO 4125.

PHCY6140 - Introduction to Social Administrative Pharmacy

Credits: 2

Provides an introduction to socio-cultural, behavioral and administrative principles of pharmacy with a focus on pharmacist roles and their historical evolution, health disparities, health behavior theory and practice philosophy, and a survey of the U. S. health care system.

Prerequisite: Enrollment in the professional program or consent of instructor.

PHCY6151 - Pharmacy Practice

1502

Credits: 2

Provides didactic content that enables students to accurately prepare and dispense prescription medications.

Former Course Number [6354]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6152 - Therapeutics I

Credits: 3

Emphasizes the role of the pharmacist in pharmaceutical self care, appropriate triage and referral involving prescription, non-prescription pharmaceuticals, complimentary, alternative therapies and devices in community dwelling patients with both acute and chronic self-care conditions.

Former Course Number [6352]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6160 - Pharmacist Skills I

Credits: 1

Preparation and evaluation of dosage forms is main thrust of course. Laboratory emphasizes manipulative and mathematical skills, prescription formats, packaging and storage as they apply to pharmaceuticals.

Former Course Number [6101]

Prerequisite: concurrent enrollment in PHCY 6100; MATH 2100.

PHCY6161 - Pharmacist Skills II

Credits: 1

Provides laboratory and other related experiences that enable students to accurately prepare and dispense prescription medications.

Prerequisite: P1 status in PharmD program or consent of instructor.

PHCY6170 - Introductory Pharmacy Practice Experience-IPPE1

Credits: 1

Provides an early curricular exposure to the roles and functions of pharmacists in their work environment through a shadow experience.

Prerequisite: satisfactory completion of PHCY 6185.

PHCY6215 - Medicinal and Natural Products Chemistry III

Credits: 3

Continuation of Medicinal and Natural Products Chemistry II.

Former Course Number [6211]

Prerequisite: PHCY 6111.

PHCY6230 - Pharmacology I

Credits: 4

First semester of a one-year series. Studies action of chemical agents on living systems to include pharmacodynamics, toxicology, and clinical therapeutics. Concepts are emphasized through case presentations and discussion.

Prerequisite: PHCY 4450.

PHCY6231 - Pharmacology II

Credits: 4

Second semester of a one-year series. Continuation of PHCY 6230. Lecture with separately scheduled discussion section.

Prerequisite: PHCY 6230.

PHCY6240 - Research and Evaluation Methods in Pharmacy

Credits: 3

The course focuses on research design and statistical analyses, as well as pharmacoeconomic, pharmacoepidemiology and public health concepts and methods for evidence-based practice applications and health care policy development.

Prerequisite: MATH 2200 and PharmD program P2 status.

PHCY6241 - Organizational and Societal Issues Within the Health Care System

Credits: 3

Surveys U. S. health care system. Discusses organization, insurance programs, legislation and health care professionals. Also discusses sociological issues pertinent to the patient and illness, the role of the pharmacist, and drugs and drug use.

USP Code [(none)<>]

Prerequisite: enrollment in the professional program, School of Pharmacy or consent of instructor.

PHCY6245 - Patient/Professional Interactions

Credits: 3

Focuses on psychosocial and communication concepts pertaining to human interactions, with application to professional practice environments and clinical counseling situations.

USP Code [(none)<>COM3]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6246 - Pharmacy Management, Marketing and Finance

Credits: 3

Examines management functions and leadership in various types of contemporary pharmacy practice including pharmacy services, drug distribution, technology, human resources, marketing, finance and accounting.

Prerequisite: P2 status.

PHCY6250 - Drug Literature Evaluation

Credits: 3

Provides a knowledge base, techniques and skills for information retrieval, evaluation of medical and pharmaceutical practice literature, and application to specific patient problems.

USP Code [WC,L<>]

Prerequisite: STAT 2050 or equivalent; WB designated course.

PHCY6251 - Therapeutics II

Credits: 3

Introduces pharmacotherapeutic principles employed in the patient care process for managing select disease states and specific patient populations. The course emphasizes the role of evidence-based medicine in developing pharmaceutical care plans (e. g. recommending therapy, evaluating and monitoring the efficacy and safety of medications).

Prerequisite: PHCY 6120, PHCY 6230.

PHCY6260 - Pharmacist Skills III

Credits: 1

This course is the third in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in the different subdisciplines represented in the SOP curriculum.

Prerequisite: P2 status in PharmD program or consent of instructor.

PHCY6261 - Pharmacist Skills IV

Credits: 2

This course is the fourth in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P2 status in PharmD program or consent of instructor.

PHCY6270 - Intermediate Pharmacy Practice Experience-IPPE2

Credits: 1

An advanced exposure to the practice of pharmacy in health care environments.

USP Code [(none)<>]

Prerequisite: satisfactory completion of PHCY 6170.

PHCY6280 - Seminar: Pharmacy Ethics

Credits: 1

Focuses on ethical issues confronting pharmacists in practice, pharmacy as a profession, the health care delivery system and society.

Former Course Number [6385]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6281 - Pharmacy Research Ethics

Credits: 1

Understanding of the ethical issues that may arise while conducting health science research and potential strategies for properly addressing these ethical issues.

Prerequisite: concurrent or previous enrollment in PHCY 6280.

PHCY6300 - Sterile Products

Credits: 2

An introduction to the preparation and clinical application of sterile dosage forms in accordance with USP 797 and other related standards. Emphasizes basic principles related to preparation, dispensing and administration of parenteral medications in health care settings.

Former Course Number [6103]

Prerequisite: PHCY 6100, PHCY 6160, PHCY 6106, and concurrent enrollment in PHCY 6301.

PHCY6301 - Sterile Products Laboratory

Credits: 1

A hands-on training in techniques used to prepare, dispense and administer parenteral admixtures, parenteral nutrition, chemotherapy and ophthalmics forms in accordance with USP 797 and other related standards.

Former Course Number [6104]

Prerequisite: PHCY 6100, PHCY 6160, PHCY 6106 and concurrent enrollment in PHCY 6300.

PHCY6312 - Clinical Toxicology

Credits: 3

Focuses on biological and pharmacological effects of environmental, chemicals, OTC and prescription drug poisoning cases. Emphasis will be placed on the use of historical, laboratory and clinical data to diagnose and develop clinical management approaches for both acute and chronic poisoning cases.

Prerequisite: PHCY 6230, MOLB 3610.

PHCY6340 - Health Care Policy and Advocacy

Credits: 2

Prepares the future pharmacist leader to analyze and engage in professional advocacy and the healthcare policy process at the local, state and national level. Content will include details of the U. S. healthcare system, health policy, the policy-making process, key stakeholders' roles, sociocultural influences and current issues.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6341 - Pharmacy Practice Law

Credits: 3

Coverage of state, federal and local laws and regulations which relate directly to the practice of pharmacy. The Wyoming Pharmacy Act serves as a model for analogous laws in other states. Case law at the federal and state levels affecting pharmacy practice is analyzed and discussed.

Prerequisite: PH3 or consent of instructor.

PHCY6342 - Pharmacy Administration

Credits: 3

Examines management of pharmaceutical services, analysis of drug distribution systems in the U. S. , contemporary pharmacy practice and problems common or peculiar to all types of pharmacy services.

Prerequisite: PH3 status.

PHCY6343 - Methods for Population Health

Credits: 2

Students will be introduced to Pharmacoeconomic, Pharmacoepidemiology and Public Health concepts and methods for the purpose of applying the knowledge to provision of pharmacist-provided patient care as well as to development of health policy.

Prerequisite: MATH 2200; PHCY 6250.

PHCY6344 - Pharmacy Ethics

Credits: 1

Focuses on ethical issues confronting pharmacists in practice, pharmacy as a profession, the health care delivery system and society.

Former Course Number [6280, 6385]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6350 - Therapeutics III

Credits: 4

Provides an overview of the treatment of selected disease states. Students will develop skills in providing patient-centered care as a medication expert, interpreting evidence, and formulating, monitoring, and adjusting care plans. Course will build upon skills learned in PHCY 6251.

Prerequisite: grade of C or higher in PHCY 6251.

PHCY6351 - Therapeutics IV

Credits: 4

Provides the student with an overview of the treatment of complex disease states. Students will build on their patient-centered skills from PHCY 6350 by interpreting evidence, prioritizing patient needs, and formulating and monitoring evidence-based care plans. These skills will be essential as students begin advanced pharmacy practice experiences.

Prerequisite: grade of C or higher in PHCY 6350.

PHCY6353 - Drug Literature Application

Credits: 2

This course is designed to provide students with the fundamental knowledge and skills to practice evidence-based pharmacotherapy. Topics include: evaluation of drug information requests, informatics, understanding drug information resources, development and execution of search strategies, primary literature and research design analysis, and writing and presentation skills.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6356 - Physical Assessment in the Evaluation of Drug Therapy

Credits: 1

Physical examination techniques and the interpretation of physical examination data. Emphasis is on a systemic approach to the physical examination, evaluation of patient data, maintaining patient charts, monitoring of patient outcomes and development of treatment plans.

Prerequisite: P3 status or consent of instructor.

PHCY6357 - Clinical Pharmacokinetics

Credits: 2

Course will provide the student with an overview of the clinical application of pharmacokinetic concepts as used in providing quality patient care. Principles of pharmacokinetics may be applied to the therapeutic use of all medications, including those inherently discussed during this course.

Prerequisite: PHCY 6102.

PHCY6360 - Pharmacist Skills V

Credits: 1

This course is the fifth in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6361 - Pharmacist Skills VI

Credits: 2

This course is the sixth and final course in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6370 - Advanced Pharmacy Practice Experience-IPPE3

Credits: 2

Designed to prepare the student for 4th year advanced pharmacy practice experience (APPE) activities by discussion of logistics, professionalism, regulatory issues, portfolio requirements and assessment tools. In addition, students will continue building their clinical skills through a patient care practice experience.

USP Code [(none)<>COM3]

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6465 - Elective Rotation In:

Credits: 4

Max Credit (Max. 16)

Elective advanced pharmacy practice experience that is available in a variety of practice environments (e. g. direct patient care settings, management, research, and other pharmacy-related locations). Rotation requires active participation and application of knowledge, skills, values, and attitudes.

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6470 - Internal Medicine I

Credits: 4

An advanced practice experience to develop skills as a medication expert within an inpatient internal medicine or family medicine experiential setting. Students will coordinate, collaborate, and communicate among themselves, their preceptor, and other members of the interprofessional healthcare team to provide patient-centered care.

USP Code [COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6471 - Internal Medicine II

Credits: 4

Course is a continuation of PHCY 6470 in which students take on increasing responsibility and/or more complex patient cases to develop skills as a medication expert in the acute care setting. Students will continue providing patient-centered care by collaborating with their preceptor and other members of the interprofessional healthcare team.

USP Code [(none)< >COM3]

Prerequisite: PHCY 6470.

PHCY6473 - Ambulatory Pharmaceutical Care

Credits: 4

An experiential course focusing on the pharmacist as the drug expert in a multidisciplinary health care team. Students will provide direct patient care to patients in an outpatient setting.

USP Code [(none)< >COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6474 - Ambulatory Pharmacy Care II

Credits: 4

Course is a continuation of PHCY 6473 in which students will take on increasing responsibilities, develop an expanded understanding for systems management, and further advance their clinical skills as medication experts in the outpatient setting.

USP Code [COM3]

Prerequisite: PHCY 6473.

PHCY6480 - Introduction to Community Pharmacy Practice

Credits: 4

Four-week rotation in community pharmacy practice completed under the guidance of a licensed pharmacist. Patient care activities will include, but not be limited to, basic patient and drug therapy assessment, performing medication histories and prospective drug utilization reviews, basic patient counseling and active participation in the medication distribution process.

Prerequisite: grade of C or higher in PHCY 6352 and 6354 and satisfactory completion of all courses within the P1 curriculum (i. e. P2 standing).

PHCY6481 - Advanced Community Pharmacy

Credits: 4

An advanced practice experience in community pharmacy designed to build upon introductory experiences and promote active participation in caring for patients in this practice setting. Students will spend 25-30 of their time in non-dispensing activities (e. g. screenings, in-depth counseling, MTM, immunizations, self-care treatment, community presentations, etc.).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6482 - Introduction to Hospital Pharmacy Practice

Credits: 4

Four-week rotation in hospital pharmacy practice completed under the guidance of a licensed pharmacist. Patient-care activities will include basic drug therapy and patient assessment, prospective drug utilization reviews, participating in the hospital's medication distribution process, performing calculations, compounding preparations and understanding pharmacy's role within the health-system through interdisciplinary interactions.

Prerequisite: grade of C or higher in PHCY 6352 and 6354 and satisfactory completion of all courses within the P1 curriculum (i. e. P2 standing).

PHCY6483 - Advanced Institutional Pharmacy

Credits: 4

An advanced practice experience in institutional/hospital pharmacy designed to build upon introductory experiences and promote active participation within the health-system through interdisciplinary interactions, projects, presentations, and patient care activities. Students will devote at least 50 of their time to nondispensing activities (e. g. monitoring meds, consults, discharge counseling, medication reconciliation, inservices).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6485 - Reflective Learning in Pharmacy

Credits: 1

Max Credit (Max. 4)

Designed to help prepare P4 pharmacy students to be knowledgeable and well-rounded practitioners. Provides an opportunity to reflect on rotation experiences, give professional level presentations, and exposure to content not covered elsewhere in curriculum. Course includes guest speakers, Pharm. D. seminars, assessment activities, job/ residency fairs, P4 portfolio, and reflective writing.

USP Code [COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6550 - Advanced Cardiovascular Physiology and Pharmacology

Credits: 3

An advanced study in the integration of modern cardiovascular physiology, pharmacology, biochemistry and cell biology concepts.

Dual Listed PHCY 5550.

Prerequisite: PHCY 6230 (or equivalent).

Philosophy

PHIL1000 - Introduction to Philosophy

1511

Credits: 3

Introduces critical thinking through a study of elementary logic, scientific method and philosophical problems of ethics, religion, epistemology and metaphysics.

USP Code [CH< >H]

PHIL1101 - First-Year Seminar

Credits: 3

USP Code [(none)< >FYS]

PHIL2100 - The Greek Mind

Credits: 3

Part one of the history of philosophy sequence. The first great age of philosophy was in ancient Greece. Students read from ancient Greek poets, historians and medical writers, as well as philosophers. The course attempts to understand the Greek mind: what Greeks thought of persons, society and the universe.

USP Code [CH< >(none)]

Prerequisite: 3 hours of philosophy.

PHIL2300 - Ethics in Practice

Credits: 1-3

Alerts preprofessional students and other interested individuals to various ethical issues they will encounter and relevant professional work on those issues. Emphasis of the course concentrates one time on biomedical ethics, another on technology and engineering ethics, another on ethics in the professions.

PHIL2310 - Philosophy of Religion

Credits: 3

Systematically examines philosophical questions, arguments and theories arising from study of religion. Topics may include: reason and religion; the existence and nature of God; the character of religious language; and attempts to determine the authenticity of religious experience.

USP Code [CH< >(none)]

Prerequisite: 3 hours of philosophy.

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.
USP Code [CH< >(none)]

PHIL2345 - Natural Resource Ethics

Credits: 3

Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR 2345/RNEW 2345.
USP Code [CH,D< >H]

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP Code [CH< >(none)]
Former Course Number [1100]

PHIL3000 - Special Topics

Credits: 3

Max Credit (Max. 9)

Provides undergraduates with the opportunity for in-depth discussion of seminal works in the history of philosophy or a problem in contemporary philosophy not offered in regular courses or independent study. Open to interested undergraduates from all majors.

Prerequisite: 3 hours of philosophy.

PHIL3100 - History of Modern Philosophy: The Rationalists

Credits: 3

The second great age of philosophy absorbed the influence of the new science during the 17th and 18th centuries. People to be studied include: Descartes, Spinoza and Leibniz.

Prerequisite: 3 hours of philosophy.

PHIL3110 - History of Modern Philosophy: The Empiricists

Credits: 3

People to be studied include: Locke, Berkeley, Hume and Kant. These philosophers are included in the second great age of philosophy.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3120 - Ancient Greek Philosophy

Credits: 3

Surveying some of ancient Greek philosophy. Begins with the works of the earliest extant philosophical thinkers, the pre-Socratics. Remainder of focus on Plato and Aristotle.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws and theories.

Prerequisite: 6 hours of physical, biological or social science, or consent of instructor.

PHIL3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/HIST 3160.

Prerequisite: WB or COM2.

PHIL3220 - Existentialism and Phenomenology

Credits: 3

Examines fundamental perspectives of existentialist thought, beginning with its roots in Kierkegaard and Nietzsche. Looks at a large variety of existentialist perspectives presented by Sartre, Heidegger, Buber, Jaspers and Camus. Considers the relation of Husserl's phenomenological method to existentialism.

Prerequisite: 3 hours of philosophy.

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP Code [G<>(none)]

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL

Former Course Number [2340]

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

Prerequisite: 3 hours of philosophy.

PHIL3420 - Symbolic Logic

Credits: 3

Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3440 - Philosophy of Mind

Credits: 3

Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3500 - History of Science

Credits: 3

Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of laboratory science and 3 hours of philosophy, or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3560 - Introduction to Metaphysics

Credits: 3

A systematic introduction to metaphysics, the branch of philosophy concerned with providing a comprehensive account of the most general features of reality as a whole. Of central importance is the study of ontology, which seeks to address the question of what general sorts of things exist: particulars, universals, propositions, numbers, minds.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed AAST 3933/INST 3933.

USP Code [(none)< >H]

Restricted Restricted to junior or senior class standing.

Prerequisite: a prior course in either African American and Diaspora Studies, Global and Area Studies, or Philosophy, or consent of instructor.

PHIL4000 - Philosophical Issues

Credits: 1-3

Dual Listed PHIL 5000.

Prerequisite: consent of instructor.

PHIL4020 - Plato

Credits: 3

Detailed examination of selected dialogues of Plato.

Dual Listed PHIL 5020.

Prerequisite: PHIL 3120.

PHIL4030 - Aristotle

Credits: 3

Detailed examination of selected works of Aristotle.

Dual Listed PHIL 5030.

Prerequisite: PHIL 3120.

PHIL4040 - Kant

Credits: 3

An examination of one or more aspects of the work of Immanuel Kant, conducted either from the perspective of the history of philosophy, or predominantly as a critical study.

Prerequisite: 12 hours of philosophy including PHIL 3100 or PHIL 3110.

PHIL4110 - Figures in Contemporary Philosophy

Credits: 3-6

Max Credit (Max. 6)

An advanced study of the work of one, or several related, contemporary philosophers.

Prerequisite: 12 hours of philosophy including PHIL 3100 or PHIL 3110.

PHIL4120 - Philosophy and the 20th Century

Credits: 3

Part three of the history of philosophy sequence. Covers the third great age of philosophy. Studies the main ways in which philosophy has been done since 1900. Topics normally include logic and philosophy, Wittgenstein, logical positivism and current trends.

Dual Listed PHIL 5120.

Former Course Number [4100]

Prerequisite: 12 hours of philosophy including either PHIL 3100, PHIL 3110, or PHIL 3120.

PHIL4130 - Figures in Modern and 19th Century Philosophy

Credits: 3

A detailed examination of one or more of the figures in modern or 19th century philosophy.

Dual Listed PHIL 5130.

Prerequisite: 9 hours of philosophy including PHIL 3100 or PHIL 3110.

PHIL4140 - Topics in Philosophy of Science

Credits: 3

Max Credit (Max. 6)

Encompasses selected topics in philosophy of science.

Dual Listed PHIL 5140.

Prerequisite: 9 hours of philosophy including PHIL 3140.

PHIL4190 - Philosophy of Language

Credits: 3-6

Max Credit (Max. 6)

An advanced study of the work of one, or several related, contemporary philosophers.

Dual Listed PHIL 5190.

Prerequisite: 12 hours of philosophy including PHIL 4510 or PHIL 4560.

PHIL4300 - Topics in Ethics

Credits: 3-6

Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 5300.

Prerequisite: 12 hours of philosophy including PHIL 3250 PHIL 3300 or PHIL 3350.

PHIL4340 - Issues in Environmental Ethics

Credits: 3

Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.

Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

PHIL4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 4420/MATH 4420.

Dual Listed PHIL 5420.

Prerequisite: PHIL 3420 or equivalent.

PHIL4440 - Topics in Philosophy of the Mind

Credits: 3-6

Max Credit (Max. 6)

An advanced study of problems in the philosophy of mind such as the concept of human action; intention, choice, reasons and causes in the explanation of human action, mental states and brain states, and artificial intelligence.

Dual Listed PHIL 5440.

Prerequisite: 12 hours of philosophy including PHIL 3440.

PHIL4510 - Theory of Knowledge

Credits: 3

Studies such problems as knowledge and belief, skepticism, perception and knowledge, memory, truth and justification of induction.

Dual Listed PHIL 5510.

Prerequisite: 12 hours of philosophy including PHIL 3510.

PHIL4560 - Metaphysics

Credits: 3

Examines approaches to metaphysics. Discusses problems such as causality, individuation and the distinction between particulars and universals.

Dual Listed PHIL 5560.

Prerequisite: 12 hours of philosophy including PHIL 3560.

PHIL5000 - Philosophical Issues

1519

Credits: 1-3
Max Credit (Max. 6)

Dual Listed PHIL 4000.

Prerequisite: graduate status and consent of instructor.

PHIL5020 - Plato

Credits: 3
Detailed examination of selected dialogues of Plato.

Dual Listed PHIL 4020.

Prerequisite: graduate standing.

PHIL5030 - Aristotle

Credits: 3
Detailed examination of selected works of Aristotle.

Dual Listed PHIL 4030.

Prerequisite: graduate standing.

PHIL5040 - Kant

Credits: 3
An examination of one or more aspects of the work of Immanuel Kant, conducted either from the perspective of the history of philosophy, or predominantly as a critical study.

Dual Listed PHIL 4040.

Prerequisite: graduate standing.

PHIL5120 - Philosophy and the Twentieth Century

Credits: 3
Part three of the history of philosophy sequence. Covers the third great age of philosophy. Studies the main ways in which philosophy has been done since 1900. Topics normally include logic and philosophy, Wittgenstein, logical positivism and current trends.

Dual Listed PHIL 4120.

Prerequisite: graduate standing.

PHIL5130 - Figures in Modern and 19th Century Philosophy

Credits: 3
A detailed examination of one or more of the figures in modern or 19th century philosophy.

Dual Listed PHIL 4130.

Former Course Number [5100]

Prerequisite: graduate standing or consent of instructor.

PHIL5140 - Topics in Philosophy of Science

Credits: 3-6

Max Credit (Max. 6)

Encompasses selected topics in philosophy of science.

Dual Listed PHIL 4140.

Prerequisite: graduate standing.

PHIL5190 - Philosophy of Language

Credits: 3-6

Max Credit (Max. 6)

An advanced study of the work of one, or several related, contemporary philosophers.

Dual Listed PHIL 4190.

Prerequisite: graduate standing.

PHIL5300 - Topics in Ethics

Credits: 3-6

Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 4300.

Prerequisite: graduate standing.

PHIL5340 - Issues in Environmental Ethics

Credits: 3

Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 4340.

Prerequisite: graduate standing.

PHIL5420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of

syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 5420/MATH 5420.

Dual Listed PHIL 4420.

Prerequisite: graduate standing.

PHIL5440 - Topics in the Philosophy Of Mind

Credits: 3-6

Max Credit (Max. 6)

An advanced study of problems in the philosophy of mind such as the concept of human action; intention; choice; reasons and causes in the explanation of human action; mental states and brain states; and artificial intelligence.

Dual Listed PHIL 4440.

Prerequisite: graduate standing.

PHIL5510 - Theory of Knowledge

Credits: 3

Studies such problems as knowledge and belief, skepticism, perception and knowledge, memory, truth and justification of induction.

Dual Listed PHIL 4510.

Prerequisite: graduate standing.

PHIL5550 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

A study of a topic selected in consultation with the instructor.

Prerequisite: graduate standing.

PHIL5560 - Metaphysics

Credits: 3

Examines approaches to metaphysics. Discusses problems such as causality, individuation and distinction between particulars and universals.

Dual Listed PHIL 4560.

Prerequisite: graduate standing.

PHIL5900 - Practicum in College Teaching

1522

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

PHIL5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PHIL5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: advanced degree candidacy.

PHIL5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

PHIL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PHIL5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Physical Education Activity

PEAC1001 - Physical Activity and Your Health

Credits: 1

Designed to help students gain an understanding of the impact physical activity or inactivity has on their health. Students gain the knowledge, skills, and experience that enable them to make informed decisions about their own health as it relates to their quality of life and longevity.

USP Code [P<>(none)]

Note: NOTE: All students must enroll in a PEAC 1001 activity as part of the PEAC 1001 experience.

PEAC2000 - Wellness: Physical, Nutrition, and Lifestyle Concepts

Credits: 1-3

Max Credit (Max. 9)

Designed to present information on topics including (but not limited to): nutrition, mobility and injury prevention, sleep and stress management, sport psychology, ethics in sport and human performance, and methods of fitness. Also includes a physical activity component.

Physics

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP Code [SP<>PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level

PHYS1090 - The Fundamentals of the Physical Universe

Credits: 4

Applies fundamental principles of chemistry and physics to real life situations. Primarily for elementary education majors.

USP Code [SP<>PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level

PHYS1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP Code [SP<>PN]

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP Code [SP<>PN]

Prerequisite: P HYS 1110.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP Code [SP<>PN]

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP Code [SP<>PN]

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP Code [SP<>(none)]

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP Code [SP<>(none)]

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2250 - Thermodynamic Systems in Energy Science

Credits: 4

Introduces the principles of thermodynamics and their application to energy science. Intended for students majoring in Energy Resource Science.

Prerequisite: PHYS 1210, grade of C or higher in MATH 2205.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2870 - Special Topics in:

Credits: 1-4

Max Credit (Max. 4)

Presents various subjects not available in regularly scheduled courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

PHYS3000 - Methods of Physics

Credits: 4

Provides introduction to mathematical methods and modern scientific computational tools used in physics/ astronomy. Topics include introduction to Python or linux operating system and use LabView software to run laboratory apparatus. Course examples will draw upon material in PHYS 1210/PHYS 1220 to help build fluency in the first year physics material.

Prerequisite: PHYS 1220.

PHYS3640 - Modern Electronics and Experimental Techniques

Credits: 4

Introduced to analog and digital circuits/devices and computer interfacing with laboratory equipment and experiments. Includes computer programming, the analysis of experimental data, and report writing. Apply the skills developed in this class to interface with and control representative instrumentation used in experimental physics laboratories.

Prerequisite: PHYS 2320.

PHYS3650 - Advanced Lab in Modern Physics and Electronics

Credits: 4

Presents fundamentals of modern optics, modern and quantum physics, E&M/electronics, and thermodynamics in a project oriented interactive undergraduate laboratory with a focus on professional grade lab report writing that qualifies as WB USP. Students learn professional data handling, error theory, and data analysis.

USP Code [(none)<>COM3]

Prerequisite: WA and PHYS 2310 or PHYS 2320.

PHYS4000 - Applied Laser Science

Credits: 3

Covers basic operational principles of lasers and their many applications in science and industry.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: PHYS 2310 or equivalent; PHYS 4310.

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4220 - Classical Mechanics II

Credits: 4

Follows PHYS 4210. Presents classical mechanics at an intermediate to advanced level. Includes detailed treatment of Lagrangian and Hamiltonian Mechanics, rigid-body motion, small oscillations and introduction to relativity.

Dual Listed PHYS 5220.

Prerequisite: PHYS 4210.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 4210.

PHYS4340 - Semiconductor Materials and Devices

Credits: 3

Physical properties of semiconductor materials and devices, including crystal lattices and energy bands, carrier generation, transport, and recombination. PN, metal-semiconductor, and heterojunction operation. Field Effect Transistors, including Metal Oxide Semiconductor (MOSFET), Junction (JFET), MEtal Semiconductor (MESFET), and High Electron Mobility (HEMT) transistors. Bipolar Junction (BJT) and Heterojunction (HBT) Transistor operation.

Cross Listed EE 4340.

Prerequisite: PHYS 1220 or PHYS 1320.

PHYS4350 - Advanced Quantum Mechanics

Credits: 3

Covers advanced topics in quantum mechanics, including angular momentum, quantum states in three dimension, hydrogen atomic structure, electron spin, Pauli matrices, time-dependent and independent perturbation methods, Born approximation, formal scattering theory, etc. .

When Offered (Normally offered spring semester)

Prerequisite: PHYS 4210, PHYS 4310, PHYS 4420 and MATH 4440.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4420 - Electricity and Magnetism II

Credits: 3

Follows PHYS 4410 and continues intermediate discussion of electricity and magnetism. Covers magnetostatics, magnetoquasistatics, alternating currents, electromagnetic waves, transmission lines and antennae.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 4410.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

PHYS4710 - Solid-State Physics

Credits: 3

Surveys theory and application of solid state physics using quantum theory. Emphasizes relation between theory and experiment. Discusses areas of present research activity.

Prerequisite: PHYS 4310 and PHYS 4510.

PHYS4720 - Solid State Electronic Devices

Credits: 3

This course aims to develop basic semiconductor physics concepts, so students can better understand current and future solid state electronic devices and technology.

Prerequisite: PHYS 4210, PHYS 4310, PHYS 4420 and MATH 4440.

PHYS4830 - Mathematical and Computational Physics I

Credits: 3

First semester of a two-semester sequence. Provides a comprehensive overview of mathematical physics and numerous analytical mathematical techniques applied to physics problems. Topics include: numerical computations and visualizations, differential and integral vector analysis, linear algebra, infinite series, complex variables, partial differential equations, ordinary differential equations, integral transforms and equations, and calculus of variations.

Prerequisite: PHYS 2310 or PHYS 2320 and MATH 2210, MATH 2250, MATH 2310.

PHYS4840 - Mathematical and Computational Physics II

Credits: 4

Second semester of a two-semester course. Provides a comprehensive overview of computational physics and provides numerous numerical techniques applied to physics problems. Topics include: numerical computations and visualizations, numerical solutions of ordinary differential equations, linear systems, curve fitting, discrete Fourier transforms, partial differential equations, integration, and Monte Carlo simulations of general stochastic systems. A weekly lab session will be held.

Prerequisite: MATH 2210, PHYS 2320 and PHYS 3000.

PHYS4860 - Independent Study in:

Credits: 1-6

Encompasses independent study to advanced problems which may involve either library and/or laboratory research.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: PHYS 2310.

PHYS4870 - Special Topics in:

Credits: 1-6

Presents various subjects not available in regularly scheduled courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: PHYS 2310 and consent of instructor.

PHYS4970 - Senior Research/Internship

Credits: 1-3

Max Credit (Max. 4)

Requires a practical research experience or internship from the student up to 4 credits under the advisement of a faculty member. This requirement for graduation should lead to a professional publication or document written by the student. The credit requirements may be spread over several semesters.

PHYS5110 - Methods of Theoretical Physics I

Credits: 4

First semester of a two-semester sequence which introduces mathematical techniques used in graduate physics courses. The content may be adjusted to meet the needs of the students. This course is required for M. S. and Ph. D. students.

Prerequisite: PHYS 4310, PHYS 4410, MATH 4440 or equivalent.

PHYS5120 - Methods of Theoretical Physics II

Credits: 4

Designed to follow PHYS 5110 and will introduce further mathematical techniques used in graduate physics courses. Required for M. S. and Ph. D. students.

Prerequisite: PHYS 5110.

PHYS5130 - Ultrafast Science and Spectroscopy

Credits: 4

This graduate course introduces major themes, topics, and techniques in modern ultrafast science.

Prerequisite: PHYS 4350 (or equivalent) and PHYS 4420 (or equivalent).

PHYS5210 - Classical Mechanics

Credits: 4

Advanced classical dynamics beginning with classical Lagrangian and Hamiltonian formalism, covering relativistic Lagrangian formulation, canonical transformations, Hamilton-Jacobi theory, and small oscillations. A required course for Ph. D. students.

Prerequisite: PHYS 4220, MATH 4440 or equivalent, and concurrent registration in PHYS 5110.

PHYS5220 - Classical Mechanics II

Credits: 4

Presents classical mechanics at an intermediate to advanced level and is designed to follow PHYS 4210. Includes a detailed treatment of Lagrangian and Hamiltonian mechanics. Rigid-body motion, small oscillations, and an introduction to relativity.

Dual Listed PHYS 4220.

Prerequisite: PHYS 4210.

PHYS5230 - Advanced Classical Mechanics

Credits: 4

The developments of the 1970s and 1980s, including a major expansion in our understanding of chaotic motion in many areas of science, will be brought together in a coherent framework. A strong computational component will be associated with many of the problems studied.

Prerequisite: PHYS 4210 and PHYS 5220 or equivalent.

PHYS5310 - Quantum Theory I

Credits: 4

First semester of a two-semester sequence which presents quantum mechanics on a professional level. Includes topics such as infinite dimensional vector spaces, postulates of quantum mechanics, exactly soluble bound systems, and angular momentum. Required for M. S. and Ph. D. students.

Prerequisite: PHYS 4220, PHYS 4310, MATH 4440 or equivalent, concurrent registration in PHYS 5110.

PHYS5320 - Quantum Theory II

Credits: 4

Designed to follow PHYS 5310 and will present topics such as scattering by a potential, addition of angular momentum, stationary and time dependent perturbation, identical particles. It is required for M. S. and Ph. D. students.

Prerequisite: PHYS 5310 and concurrent registration in PHYS 5120.

PHYS5410 - Electromagnetic Theory I

Credits: 4

The first semester of a two-semester sequence which presents electromagnetic theory on a professional level. The classical analytic solutions of the equations of motion are discussed and expressed as quadratures over the Green functions with attention to effect of boundary conditions. It presents topics such as algebra and calculus of vectors in configuration space, electrostatics, potential theory, and steady currents. Required for M. S. and Ph. D. students.

Prerequisite: PHYS 4420, PHYS 5110, MATH 4440 or equivalent.

PHYS5420 - Electromagnetic Theory II

Credits: 4

Designed to follow PHYS 5410 and will present topics such as magnetostatics, magnetoquasistatics, time dependent electromagnetic theory, physical optics with a vector field, and radiation from antennae. Required for Ph. D. students.

Prerequisite: PHYS 5410.

PHYS5510 - Statistical Mechanics

Credits: 4

An introduction to statistical mechanics and the many-body problem, including quantum statistics. Required for Ph. D. students.

Prerequisite: PHYS 5210, PHYS 5320, PHYS 5410.

PHYS5610 - Atomic and Molecular Spectroscopy

Credits: 3

A quantum mechanical treatment of atomic and molecular structure, transition probabilities, selection rules, and the Zeeman and Stark effects.

Prerequisite: PHYS 5320.

PHYS5620 - Atomic Physics

Credits: 4

This course will cover atomic phenomena with a focus on atomic transitions and an introduction to particle physics.

Prerequisite: PHYS 4310 or equivalent, PHYS 5410 or equivalent.

PHYS5720 - Advanced Solid State Physics

Credits: 3

A course in modern topics and theoretical technique relevant to condensed matter.

Prerequisite: PHYS 4710 or equivalent, PHYS 5510.

PHYS5730 - Condensed Matter Magnetism

Credits: 4

Designed to give graduate students instruction in the fundamental principles of magnetism, the important properties of magnetic materials and their applications. Required for the physics track of the PhD program.

Prerequisite: PHYS 4310, PHYS 4410, PHYS 4510 or equivalent.

PHYS5740 - Transport Properties of Solids

Credits: 4

Instruction in the basic quantum theories of electron and phonon transport, interactions among the carriers and with impurities, and important transport phenomena in various systems. Required for the physics track students in the PhD program.

Prerequisite: PHYS 4310, PHYS 4410, PHYS 4510 or equivalent.

PHYS5750 - Optical Properties of Solids

Credits: 4

Covers advanced topics of optical properties of solids, including free carrier contribution to their optical properties, interband transitions, absorption of light in solids, luminescence and photoconductivity, electron spectroscopy and surface science, light emitting diodes, etc.

Prerequisite: PHYS 4310, PHYS 4410, PHYS 4510 or equivalent.

PHYS5770 - Nanotechnology: Nanophysics and Nanosystems

Credits: 4

Introduction to nanoscale fabrication techniques including lithography, pattern transfer, thin film deposition etc. Electronic transport in mesoscopic systems. Electrical properties of nanoscale devices including self-assembled monolayers, carbon nanotubes, and semiconductor nanowires. Noise properties of nanostructures.

Prerequisite: PHYS 4310 or equivalent.

PHYS5810 - Nuclear and Elementary Particle Physics

Credits: 3

An advanced course in nuclear and elementary particle interactions, with emphasis on current development.

Prerequisite: PHYS 5350.

PHYS5820 - Plasma Physics

Credits: 4

Introduction to plasma physics is exhibited through the analysis of numerous ionized environments (fusion systems, stellar surfaces, and the ionosphere). Fluid approximations (MHD), as well as a kinetic theory formulation (including the Vlasov equation) of plasma physics will be employed. Damping, instabilities, and nonlinear plasmas will be explored.

Prerequisite: PHYS 4210 and PHYS 4420.

PHYS5830 - Physics of Solar Cells

Credits: 4

Covers problems of energy economy, photon physics, physics of semiconductors, conversion of chemical energy into electrical energy, basic structure of solar cells, quantum-dot-semiconductor solar cells, limitations of energy conversions in solar cells, and strategies for higher efficiency.

Prerequisite: PHYS 5720.

PHYS5840 - Experimental Methods and Low Temperature

Credits: 4

Introduction to experimental methods in condensed matter physics and phenomena at low temperatures. The fields of solid properties at low temperatures, the generation and measurement of low temperatures, the generation of high magnetic fields in laboratory magnets, and basic vacuum technology are covered.

Prerequisite: graduate standing.

PHYS5860 - Independent Study

Credits: 1-4
Max Credit (Max. 24)

Designed to provide opportunities for self-study and special projects under supervision of individual professors.

Restricted Restricted to graduate students.
Prerequisite: PHYS 4860 or equivalent.

PHYS5870 - Special Topics In Physics

Credits: 1-4
Max Credit (Max. 20)

Intended to accommodate various subjects not offered as regular courses.

Prerequisite: graduate standing.

PHYS5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

PHYS5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PHYS5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PHYS5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

PHYS5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PHYS5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

PHYS5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Plant Sciences

PLNT1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

PLNT1150 - Pesticide Safety and Application

Credits: 1
Introduces various types and safe methods of pesticides application. Subsequent to completion, students may take the certification test administered by the Wyoming Department of Agriculture.

Cross Listed ENTO 1150.
Former Course Number [CROP 1150]

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

USP Code [SB<>PN]

Prerequisite: AECL 1000 or LIFE 1010.

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP Code [SB<>(none)]

Prerequisite: AECL 1000 or LIFE 1010.

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered Normally offered spring semester of even-numbered years.

Prerequisite: AECL 1000 or concurrent enrollment.

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3036 - Grape Production

Credits: 3

Introduces students to the science of viticulture. Topics include grapevine origin and distribution, taxonomy, morphology and physiology, soil and climatic requirements, vineyard establishment, grapevine nutrition, cultural practices, harvesting and post-harvest management. Successful completion will enhance students' knowledge and understanding on grape production and management.

Former Course Number [AECL 3036]

Prerequisite: PLNT 2025.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: AECL 1000 or LIFE 1010.

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025.

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000.

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220.

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020.

Prerequisite: 8 hours of Life Sciences.

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050.

Prerequisite: LIFE 2023 or equivalent.

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070.

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: AECL 1000, LIFE 1010.

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Cross Listed AECL 4120.

Dual Listed PLNT 5120.

Prerequisite: 8 hours of LIFE and/or CHEM.

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300.

PLNT4190 - Herbs, Spices and Medicinal Plants

Credits: 3

Includes the history and importance of herbs, spices, and medicinals; collection of these plants in the wild; botany; chemistry; greenhouse and field production; organic production; harvesting; drying; postharvest operations; legal aspects; and products.

Dual Listed PLNT 5190.

Prerequisite: 8 hrs. LIFE and/or CHEM.

PLNT4200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 5200.

Prerequisite: PLNT 2025 and a USP QA/Q course.

PLNT4220 - Crop Yield Physiology

Credits: 3

Physiological processes underlying crop growth and development. The effect of crop management practices on physiology and yield will also be discussed.

Prerequisite: AECL 1000; CHEM 1000.

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470.

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology.

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000.

PLNT4700 - Forage Crop Science

Credits: 3

The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 5700.

Former Course Number [CROP 2200, 3200; PLNT 3200]

PLNT4790 - Topics:

Credits: 1-4

Max Credit (Max. 10)

Independent study.

Dual Listed PLNT 5790.

Former Course Number [CROP 4700, 4790]

Prerequisite: senior standing.

PLNT4900 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Supervised participation of undergraduates in the teaching of laboratory sections offered by the Department of Plant Sciences. Provides opportunity for students to gain teaching experience in agroecology, horticulture, or life science.

Prerequisite: AECL 1000 and junior or senior standing.

PLNT4975 - Problems in Plant Science

Credits: 1-2

Max Credit (Max. 4)

Provides an opportunity for students to conduct supervised research on specific topics of interest and importance in crop breeding, genetics, physiology, pathology, ecology and pest management.

Prerequisite: junior/senior standing with at least 10 hours of agroecology core requirements.

PLNT5000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 4000.

Prerequisite: PLNT 3220.

PLNT5020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 4020.

Prerequisite: 8 hours of Life Sciences.

PLNT5050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 4050.

Prerequisite: LIFE 2023 or equivalent.

PLNT5070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 4070.

Prerequisite: AECL 1000, LIFE 1010.

PLNT5120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 4120.

PLNT5180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 4180.

Prerequisite: PLNT 3300.

PLNT5190 - Herbs, Spices and Medicinal Plants

Credits: 3

Includes the history and importance of herbs, spices, and medicinals; collection of these plants in the wild; botany; chemistry; greenhouse and field production; organic production; harvesting; drying; postharvest operations; legal aspects; and products.

Dual Listed PLNT 4190.

Prerequisite: 8 hrs. LIFE and/or CHEM.

PLNT5200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 4200.

PLNT5410 - Advanced Crop Physiology and Management

Credits: 3

Review and interpretation of current crop management and physiology literature.

Prerequisite: 6 hours of biochemistry or plant physiology.

PLNT5470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 4470.

Prerequisite: 8 hours of plant biology.

PLNT5500 - Clinical Plant Pathology

Credits: 2

Designed to give students practical experience in disease diagnosis. Students are exposed to a variety of current techniques used in the diagnosis and control of plant problems caused by abiotic and biotic factors. Primary emphasis is on the identification of biotic agents, including fungi, bacteria, nematodes and viruses. Students will gain experience and insight in the practical aspects of plant pathology.

Prerequisite: PLNT 4000.

PLNT5600 - Research in Crops

1543

Credits: 1-4
Max Credit (Max. 10)

Investigation of research problems to include a written and oral presentation of results.

Prerequisite: basic training in the field of problem selected.

PLNT5700 - Forage Crop Science

Credits: 3
The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 4700.

PLNT5720 - Plant Disease Problems

Credits: 1-3
Max Credit (Max. 10)

Biology, epidemiology, and control of specific crop, field and forage diseases.

Prerequisite: PLNT 3220.

PLNT5790 - Topics:

Credits: 1-4
Max Credit (Max. 10)

Independent study.

Dual Listed PLNT 4790.

Prerequisite: graduate standing.

PLNT5820 - Graduate Seminar

Credits: 1
Max Credit (Max. 6)

Discussion in production, physiology, breeding and weed science.

Prerequisite: basic training in plant sciences.

PLNT5900 - Practicum in College Teaching

1544

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

PLNT5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PLNT5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PLNT5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PLNT5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Political Science

POLS1000 - American and Wyoming Government

Credits: 3
Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP Code [V<>V]

POLS1100 - Wyoming Government

Credits: 1

Introduction to the Constitution and governmental process of Wyoming. Intended for students who have earned credit for American Government at an out-of-state college or by Advance Placement but have not fulfilled the Wyoming Constitution requirement of University Studies. Cannot be taken if the student has already taken POLS 1000.

USP Code [(none)<>V]

POLS1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

POLS1111 - Issues in Political Science

Credits: 1-3

Max Credit (Max. 3)

Introduces students to Political Science through a study of a contemporary issue or problem from the perspectives of the various subfields.

USP Code [I,L<> (none)]

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP Code [CS,G<>(none)]

POLS1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed INST 1250.

POLS2000 - Current Issues in American Government

Credits: 3

Examines current political topics in the U. S. Focuses on key public policy problems, policy-making process and the final policy choice. Students must keep abreast of political events on daily basis and apply basic concepts in American government to current affairs.

USP Code [CS<>(none)]

Prerequisite: POLS 1000.

POLS2070 - Politics of State and Local Government

Credits: 3

Studies politics, organizations, structures and processes of American state and local governments.

Prerequisite: POLS 1000.

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP Code [(none)<>COM2]

Prerequisite: POLS 1200 o r POLS 1250 o r permission of the instructor.

POLS2290 - Governments and Politics of Latin America

Credits: 3

Studies chief cultural and historical factors influencing Latin American political process. Surveys major institutions and political patterns of the region.

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP Code [G<>(none)]

POLS2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy.

Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

POLS2410 - Introduction to Public Administration

Credits: 3

Deals with executive branches of governments in the U. S. : national, state and local. Considers organizational, political and policy-making aspects of each. Discusses administration in other forms of government, such as interstate compacts and regional agreements.

Prerequisite: POLS 1000.

POLS2420 - Women and Politics

Credits: 3

Describes and compares status and political activity of women in America with those of women and men in other societies in order to explore causes, methods and results of political involvement by women.

Cross Listed GWST 2420 .

Prerequisite: POLS 1000.

POLS2430 - Parties, Interest Groups and Elections

Credits: 3

Studies nature and functions of political organizations in American democracy. Discusses origins and evolution of American parties, causes of interest group development, political socialization, political participation and voting behavior, as well as activities of interest groups within American society and political system. Emphasizes current trends regarding role of parties versus interest groups.

USP Code [CS<>(none)]

Prerequisite: POLS 1000.

POLS2450 - Politics and Media

Credits: 3

Examines the media's coverage of current events, governmental institutions and electoral campaigns. Discusses effect of media on individuals' opinions and behavior.

Prerequisite: POLS 1000.

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

POLS2490 - Topics In:

Credits: 1-3

Max Credit (Max. 6)

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000.

POLS3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/HIST 3050.

Prerequisite: WB or COM2.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

POLS3200 - Comparative Political Cultures

Credits: 3

Histories and experiences of various societies have shaped their values, norms, beliefs, expectations, and attitudes. This class explores how the beliefs, values, and lifestyles of various societies shape peoples' views of their place in the politics of the state and of the state's place in their daily lives.

Cross Listed POLS 3200.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/ INST 1250 or permission of instructor.

POLS3220 - Government and Politics of Russia and FSU

Credits: 3

Examines the political, economic and identity transitions of Russia and other states of the former Soviet Union during the post-communist era. Explores how current challenges relate to past Soviet practices.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post- World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3300 - Model United Nations

Credits: 1-3

Max Credit (Max. 6)

Focuses on the United Nations (UN) system and multilateral diplomacy to prepare students to participate in a Model UN simulation. Students learn to evaluate the UN system, learn strategies to address international problems, and develop skills to effectively represent a country in a role-playing exercise.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3520 - Voting and Participation in America

Credits: 3

Examines the ways citizens participate in government, including campaigning, donating money, and voting. Topics include mobilization by parties and campaigns, social and demographic differences in participation, explanations of voting behavior, civic responsibility, and the role of participation in a democracy.

Prerequisite: POLS 1000.

POLS3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed COJO 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

POLS3600 - American Political Thought

1550

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP Code [WB<> COM2]

Prerequisite: POLS 1000 or permission of instructor.

POLS3610 - Classics in Environmental Thought

Credits: 3

Surveys classic texts in environmental thought from the nineteenth century through the present.

Prerequisite: POLS 1000.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3680 - Introduction to Empirical Political Analysis

Credits: 3

Introduces students to concepts, approaches and methodologies for empirical analysis of political problems. Students gain practical experience in communicating and presenting statistical analysis of of political data generated through surveys and other research techniques.

USP Code [(none)<>COM2]

Former Course Number [2020]

Prerequisite: POLS 1000 and STAT 2050 or STAT 2070, or permission of instructor.

POLS4013 - Political Geography

Credits: 3

Geographic space is subdivided into political units to aid human interaction and to facilitate political processes. Examines the spatial organization of political space and its effects upon political processes at varying geographic scales ranging from the local to international.

Cross Listed GEOG 4013.

Dual Listed POLS 5013.

Prerequisite: Completion of USP H requirement.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS4090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 5090.

Prerequisite: 9 hours of political science or philosophy, including POLS 1000.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

POLS4160 - Legal Philosophy

Credits: 3

This course examines the philosophies that undergird the law, considering both ancient and modern legal thought. Throughout the course, both historical and contemporary examples will be used to illustrate the salient differences between philosophical approaches, to better articulate our understanding of the law.

Dual Listed POLS 5160.

Prerequisite: POLS 1000.

POLS4215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed INST 4215.

Dual Listed POLS 5215.

Former Course Number [4220]

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4230 - Governments and Politics of Asia

Credits: 3

Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 5230.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed INST 4255.

Dual Listed POLS 5255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

POLS4260 - Democratization and Regime Change

Credits: 3

Examines the theoretical/empirical research on causes of democratic transition and consolidation, including new waves of

democratization and prospects for democratization in other contexts. Focus is given to a variety of theoretical/methodological perspectives such as the structural, strategic, social/cultural, institutional, and economic approaches.

Cross Listed INST 4260.

Dual Listed POLS 5260.

Prerequisite: 9 hours of political science or international studies, including POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS4290 - Inter-American Relations

Credits: 3

Surveys inter-American system and idea of hemispheric unity. Analyzes major issues confronting inter- American community.

Cross Listed INST 4290.

Dual Listed POLS 5290.

Prerequisite: 9 hours of political science, including POLS 1200/ INST 1200, or POLS 1250/INST 1250, or POLS 2310/ INST 2310, or permission of instructor.

POLS4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed INST 4330.

Dual Listed POLS 5330.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4350 - Sustainable Development and Global Policy

Credits: 3

Considers in-depth meaning of "sustainable development" and trade-offs necessary to achieve it. Considers this issue from global perspective through application of theories in economics, political science, international relations, technology studies and ethics.

Dual Listed POLS 5350.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed INST 4360.

Dual Listed POLS 5360.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4375 - Transitional Justice

Credits: 3

Mechanisms provide accountability for gross human rights violations and acts of mass atrocity within nations. Case studies are used to examine types of transitional justice interventions; tensions between demands of justice at local, national, and international levels; and transitional justice's role in post-conflict peace-building and reconciliation.

Cross Listed INST 4375.

Dual Listed POLS 5375.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed INST 4385.

Dual Listed POLS 5385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

POLS4420 - Seminar in Public Administration

Credits: 3

Max Credit (Max. 6)

Includes reading and research in selected public administration topics.

Dual Listed POLS 5420.

Prerequisite: POLS 1000 and consent of instructor.

POLS4430 - United States Presidency

Credits: 3

Analyzes office of president, its roles, development, relationships with other governmental agencies and problems in the

contemporary world.

Dual Listed POLS 5430.
Prerequisite: POLS 1000.

POLS4435 - Presidential Elections

Credits: 3

Examines the process of electing the U. S. president. Topics include the roles of presidential primaries, caucuses, and conventions; campaign strategies; media coverage; citizen participation; the electoral college; and reforms.

Dual Listed POLS 5435.
Prerequisite: POLS 1000.

POLS4445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 4445.
Dual Listed POLS 5445.
Prerequisite: 9 hours of international studies or social science coursework and junior standing.

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.
Dual Listed POLS 5455.
Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4465 - Survey of the Nonprofit Sector

Credits: 3

This foundational course is designed to give students of diverse backgrounds a common framework for understanding the nonprofit sector in the United States and globally. Students in this course will identify and interpret key theories, issues, and challenges in the nonprofit world and will consider the implications for practice.

Dual Listed POLS 5465.
Prerequisite: COM2.

POLS4475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 4475.

Dual Listed POLS 5475.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

POLS4520 - Public Opinion

Credits: 3

Deals with natures of a public in democracy and means of forming and manipulating public opinion. Emphasizes role of public opinion as essential ingredient of the policy-making process in popular government.

Dual Listed POLS 5520.

Prerequisite: POLS 1000.

POLS4530 - U.S. Congress

Credits: 3

Analyzes aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Dual Listed POLS 5530.

Prerequisite: POLS 1000.

POLS4550 - Internship in Government

Credits: 1-6

Integrates practical political experience with academic knowledge. Students are expected to participate in specifically assigned duties and observe broader activities of the sponsoring organization; then, reflect upon this participation and observation in the form of written assignments. Internship credit can be earned for work in political campaigns, Wyoming Legislature or government services.

Prerequisite: 9 hours of political science.

POLS4555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST/GEOG 4555 & POLS 5555

Dual Listed INST/GEOG 4555 & POLS 5555

Prerequisite: 9 hours of international studies or social science coursework.

POLS4560 - Washington Semester Program

Credits: 15

Provides students with paid internships in Washington, D. C. , in either congressional offices or federal agencies. Selection into the program is very competitive and is made the semester prior to service.

Prerequisite: POLS 1000 and 6 additional hours of political science courses.

POLS4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed CRMJ 4600.

Dual Listed POLS 5600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS4640 - Political Philosophy: Ancient and Medieval

Credits: 3

Surveys political philosophy from Classical Greek period to Machiavelli.

Dual Listed POLS 5640.

Prerequisite: POLS 2460, or POLS 3600, or consent of the instructor.

POLS4650 - Political Philosophy: Modern

Credits: 3

Surveys political philosophy from Machiavelli through the 19th century.

Dual Listed POLS 5650.

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS4660 - Political Philosophy: Contemporary

Credits: 3

Examines central developments in political philosophy that guide action in today's world.

Dual Listed POLS 5660.

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS4685 - Program Evaluation and Policy Analysis

Credits: 3

Explores techniques for analyzing and evaluating public policy choices and impacts.

Dual Listed POLS 5685.

Prerequisite: STAT 2050, STAT 2070 or equivalent and an introductory research methods course in a social science or related discipline.

POLS4700 - Readings in Political Science

Credits: 1-3

Outlines special programs of readings in government and politics to meet needs of individual students.

Prerequisite: 9 hours of political science.

POLS4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed CRMJ 4705, INST 4705, and SOC 4705.

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

POLS4710 - Topics in

Credits: 1-3

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000 and 3 additional hours of political science.

POLS4720 - Workshop in Practical Politics

Credits: 1-3

Familiarizes or strengthens participants in techniques of political effectiveness. Includes political organization, campaigning and persuasion. Guest speakers include public officials and experts in the field of practical politics.

Prerequisite: 9 hours of political science.

POLS4810 - Seminar in Political Philosophy

Credits: 3

Max Credit (Max. 6)

Seminar in Political Philosophy; Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 5810.

USP Code [(none)<>COM3]

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP Code [(none)<>COM3]

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

POLS4850 - Seminar in American Politics and Institutions

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected U. S. government and politics problems.

Dual Listed POLS 5850.

USP Code [(none)<>COM3]

Prerequisite: 9 hours of political science including POLS 1000 and consent of instructor.

POLS4870 - Seminar in International Relations

Credits: 3

Max Credit (Max. 6)

Encompasses reading and research in international law and politics.

Dual Listed POLS 5870.

USP Code [(none)<>COM3]

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4890 - Seminar in Comparative Government and Politics

Credits: 3

Max Credit (Max. 6)

Researches selected topics in comparative government and politics.

Dual Listed POLS 5890.

USP Code [WC,G<>C3]

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5000 - Survey of Public Administration

Credits: 3

Designed to introduce the beginning graduate student to the study and practice of public administration at all levels of government. Attention is also directed to specific functions and processes such as intergovernmental relations, budgeting, personnel, and regulation.

Prerequisite: graduate status and consent of instructor.

POLS5013 - Political Geography

Credits: 3

Geographic space is subdivided into political units to aid human interaction and to facilitate political processes. Examines the spatial organization of political space and its effects upon political processes at varying geographic scales ranging from the local to international.

Cross Listed GEOG 5013.

Dual Listed Dual list with POLS 4013.

Prerequisite: graduate standing

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

POLS5060 - American Intergovernmental Relations

Credits: 3

Theory and practice of American federalism.

Prerequisite: POLS 5000.

POLS5080 - Organizational Development

Credits: 3

Exposed to psychological concepts as they apply to organizations. Topics include organizational culture, motivations affecting a person's behavior in the workplace, personal interactions within organizations, and resolution of personal conflicts within the workplace.

Prerequisite: POLS 5000.

POLS5090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 4090.

Prerequisite: POLS 1000.

POLS5100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 4100.

Prerequisite: POLS 1000.

POLS5110 - Constitutional Law: Civil Liberties and Civil Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Dual Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

POLS5160 - Legal Philosophy

Credits: 3

This course examines the philosophies that undergird the law, considering both ancient and modern legal thought. Throughout the course, both historical and contemporary examples will be used to illustrate the salient differences between philosophical approaches, to better articulate our understanding of the law.

Dual Listed POLS 4160.

Prerequisite: graduate standing.

POLS5210 - Seminar in Human Security

Credits: 3-6

Max Credit (Max. 6)

A broad interdisciplinary approach to the study of human security within the field of international studies and global politics in order to explore the theories and processes that explain past and emerging patterns of behavior in the international system, as well as key aspects of local to global policymaking.

Dual Listed INST 5210.

POLS5215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed INST 5215.

Dual Listed POLS 4215.

Former Course Number [5220]

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5230 - Governments and Politics Of Asia

Credits: 3

Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 4230.

Prerequisite: POLS 1000. POLS 3100 recommended.

POLS5255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed INST 5255.

Dual Listed POLS 4255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

POLS5260 - Democratization and Regime Change

Credits: 3

Examines the theoretical/empirical research on causes of democratic transition and consolidation, including new waves of democratization and prospects for democratization in other contexts. Focus is given to a variety of theoretical/methodological perspectives such as the structural, strategic, social/cultural, institutional, and economic approaches.

Cross Listed INST 5260.

Dual Listed POLS 4260.

Prerequisite: 9 hours of political science or international studies, including POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS5290 - Inter-American Relations

Credits: 3

Surveys inter-American system and idea of hemispheric unity. Analyzes major issues confronting inter- American community.

Dual Listed POLS 4290.

Prerequisite: 9 hours of political science, including POLS 1200 /INST 1200, or POLS 1250/INST 1250, or POLS 2310/INST 2310, or permission of instructor.

POLS5330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors along with analysis of policy options.

Cross Listed INST 5330.

Dual Listed POLS 4330.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5340 - International Organizations

Credits: 3

Encompasses development of world organizations such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Dual Listed POLS 4340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5350 - Sustainable Development and Global Policy

Credits: 3

Considers in-depth meaning of "sustainable development" and trade-offs necessary to achieve it. Considers this issue from global perspective through application of theories in economics, political science, international relations, technology studies and ethics.

Dual Listed POLS 4350.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed INST 5360.

Dual Listed POLS 4360.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5375 - Transitional Justice

Credits: 3

Mechanisms provide accountability for gross human rights violations and acts of mass atrocity within nations. Case studies are used to examine types of transitional justice interventions; tensions between demands of justice at local, national, and international levels; and transitional justice's role in post-conflict peace-building and reconciliation.

Cross Listed INST 5375.

Dual Listed POLS 4375.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed INST 5385.

Dual Listed POLS 4385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

POLS5400 - Public Personnel Management

Credits: 3

Designed to integrate information about the political environment of personnel administration with problem solving exercises in such specific areas as job analysis, affirmative action, and flextime. A number of topics including the evolution of the civil service, the rights and responsibilities of governmental employees, the functions of public personnel management, and collective bargaining processes are also covered.

Prerequisite: POLS 5000.

POLS5410 - Administrative Behavior and Theory of Organization

Credits: 3

An advanced course in the theory of organization and the workings of public agencies.

Prerequisite: POLS 5000.

POLS5420 - Seminar In Public Administration

1565

Credits: 3

Max Credit (Max. 6)

A reading and research course in selected topics in public administration.

Dual Listed POLS 4420.

Prerequisite: POLS 1000 and consent of instructor.

POLS5430 - United States Presidency

Credits: 3

Analyzes the office of the president, its roles, development, relationships with other governmental agencies, and problems in the contemporary world.

Dual Listed POLS 4430.

Prerequisite: POLS 1000.

POLS5435 - Presidential Elections

Credits: 3

Examines the process of electing the U. S. president. Topics include the roles of presidential primaries, caucuses, and conventions; campaign strategies; media coverage; citizen participation; the electoral college; and reforms.

Dual Listed POLS 4435.

Prerequisite: POLS 1000.

POLS5440 - Principles and Processes of Government Budgeting

Credits: 3

Analyzes the principles, processes and politics of the budgetary process in the U. S. It examines the various theories of budgetary decision-making, the politics of budgeting and budgetary reforms.

Prerequisite: POLS 5000 and graduate standing.

POLS5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 5445.

Dual Listed POLS 4445.

Prerequisite: graduate standing.

POLS5450 - Administrative Regulation

Credits: 3

Significant points of contact between government and business are stressed. Government activities designed to regulate and aid such economic interests as business, labor, agriculture, and consumers are dealt with at length.

Prerequisite: POLS 5000.

POLS5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 5455.

Dual Listed POLS 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS5460 - Public Administration and Law

Credits: 3

Focuses on various facets of the relationship between American public administration and law. Emphasis is placed on the emerging body of administrative law as a context for jurisprudential reasoning in administrative decision making.

Prerequisite: POLS 5000.

POLS5465 - Survey of the Nonprofit Sector

Credits: 3

This foundational course is designed to give students of diverse backgrounds a common framework for understanding the nonprofit sector in the United States and globally. Students in this course will identify and interpret key theories, issues, and challenges in the nonprofit world and will consider the implications for practice.

Dual Listed POLS 4465.

Prerequisite: graduate standing.

POLS5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 5475.

Dual Listed POLS 4475.

Prerequisite: graduate standing.

POLS5480 - Ethics In Government

Credits: 3

The student is introduced to the ethical nature and dilemmas of public administration in American constitutional government. Such topics are addressed as source of ethical obligation, role of loyalty, application of moral philosophy, constitutional theory and ethical obligation, relation of theory and practice, and methods of ethical reflection.

Prerequisite: POLS 5000.

POLS5500 - Internship in Public Administration

Credits: 1-6

Max Credit (Max. 6)

Educationally-oriented assignments for work in selected public agencies, with tutorial types of supervision.

Prerequisite: consent of instructor.

POLS5510 - Public Policy and Program Management

Credits: 3

An overview of governmental policy making processes in the U. S and the uses of applied policy analysis.

Prerequisite: POLS 5000.

POLS5520 - Public Opinion

Credits: 3

Deals with natures of a public in a democracy and means of forming and manipulating public opinion. Emphasizes the role of public opinion as an essential ingredient of the policy-making process in popular government.

Dual Listed POLS 4520.

Prerequisite: POLS 1000.

POLS5530 - USCongress

Credits: 3

Analyze aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Prerequisite: POLS 1000.

POLS5540 - Public Policy Perspectives

Credits: 3

Acquaints students with the underlying structure and dynamics of public policy formulation, implementation, and evaluation at the state, local, and federal levels. Drawing on a number of analytic approaches, the course seeks to understand this complex political phenomenon in the context of the institutions that drive it.

Prerequisite: graduate standing.

POLS5555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST 5555 & INST/POLS/GEOG 4555

Prerequisite: 9 hours of international studies or social science coursework.

POLS5560 - Public Administration in Literature and Film

Credits: 3

Examines the ways novelists and directors have viewed public administration, the accuracy of portrayals, how views have changed, how novelists and directors have helped create and disparage the rise of the administrative state, and types of administrative arrangements favored.

Prerequisite: POLS 5000.

POLS5570 - Graduate Readings

Credits: 1-3

Max Credit (Max. 9)

Special programs of readings of government and politics will be outlined to meet needs of individual students.

Prerequisite: graduate standing or consent of instructor.

POLS5600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Dual Listed POLS 4600.

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS5640 - Political Philosophy: Ancient and Medieval

Credits: 3

Surveys political philosophy from Classical Greek period to Machiavelli.

Dual Listed POLS 4640.

Prerequisite: POLS 2460, or POLS 3600, or consent of the instructor.

POLS5650 - Political Philosophy: Modern

Credits: 3

Surveys political philosophy from Machiavelli through the 19th century.

Dual Listed POLS 4650.

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS5660 - Political Philosophy: Contemporary

Credits: 3

Examines central developments in political philosophy that guide action in today's world.

Dual Listed POLS 4660.

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS5680 - Research Methods for Political Science

Credits: 3

Introduction to methodology of empirical analysis appropriate for political science and public policy, including introduction to the philosophy of science, research designs, hypothesis formation, measurement, and data collection.

Prerequisite: STAT 2050, STAT 2070, STAT 5070 or equivalent.

POLS5681 - Methods of Political Analysis

Credits: 3

Introduction to methods of analysis focusing on understanding the strengths and weaknesses of each method and practical issues arising during the analysis stage of research. Covers quantitative analysis through multiple regression, case study analysis, and archival/ historical analysis.

Prerequisite: STAT 2050, STAT 2070, STAT 5070 or equivalent.

POLS5684 - Empirical Analysis for Public Administration

Credits: 3

Designed for students in public administration to train them to make decisions based on empirical evidence in policy and management. Course draws concepts from system analysis, management science, operations research, and social science methodology to provide an understanding of various policy analysis and program management techniques across many applications.

Prerequisite: POLS 5000.

POLS5685 - Program Evaluation and Policy Analysis

Credits: 3

Explores techniques for analyzing and evaluating public policy choices and impacts.

Dual Listed POLS 4685.

Prerequisite: STAT 5070 or equivalent and an introductory research methods course in social science or related discipline.

POLS5690 - Capstone in Public Management

Credits: 3

Integrates theories and concepts introduced in core and option-core courses, and emphasizes students' application of them to various administrative settings.

Prerequisite: completion of all other core and option core requirements in the MPA Program.

POLS5710 - Topics In Political Science

Credits: 1-3

Max Credit (Max. 9)

Intended to accommodate various specialized subjects not offered as regular courses.

Prerequisite: graduate standing.

POLS5810 - Seminar in Political Philosophy

Credits: 3

Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 4810.

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS5840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 4840.

POLS5850 - Seminar in American Politics and Institutions

Credits: 3

Includes reading and research on selected U. S. government and politics problems.

Dual Listed POLS 4850.

Prerequisite: 9 hours of political science including POLS 1000 and consent of instructor.

POLS5870 - Seminar in International Relations

Credits: 3

Encompasses reading and research in international law and politics.

Dual Listed POLS 4870.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5890 - Seminar in Comparative Government and Politics

Credits: 3

Researches selected topics in comparative government and politics.

Dual Listed POLS 4890.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

POLS5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

POLS5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

POLS5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

POLS5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

POLS5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Professional Sales

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field of study.

Cross Listed MKT 3310.

USP Code [(none)<>COM2]

Prerequisite: COM1 and sophomore class standing.

SELL4310 - Advanced Selling

Credits: 3

This course provides students in-depth study of advanced sales concepts including relationship management, problem solving, negotiation, and proposal writing. It also explores the use of data-based decision making and the use of selling technologies. Students will learn how to use data to sell to both resellers and manufacturers.

Cross Listed MKT 4310.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

SELL4320 - Sales Force Strategies

Credits: 3

This class will examine the linkages among management of the sales function, personal selling activities, and the marketing area. Students will gain an understanding of the role of the sales force in achieving of the firm's marketing, customer relationship, and revenue objectives.

Cross Listed MKT 4320.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

SELL4330 - Sales Seminar

Credits: 3

This course provides students in-depth study of advanced, and cutting edge sales and sales management concepts presenting by top talent in industry. While topic can vary, this seminar teams students with industry experts to explore state-of-the-art thinking in technical sales, sales management, sales training, compensation, and team selling.

Cross Listed MKT 4330.

Prerequisite: MKT 3310/SELL 3310 and junior class standing.

Professional Studies

PRST5070 - Introduction to College Teaching

Credits: 3

This course is designed to provide students with an understanding of instructional theory and experiences in applying teaching and assessment methods relevant to the role of an educator in higher education. Linking theories, perspectives, and principles of effective teaching and learning to practice in higher education is a priority of the course. Practicing and experiencing "hands-on" activities will be prime formats of the class.

Prerequisite: graduate standing.

PRST5610 - Introduction to Doctoral Studies

Credits: 3

Introduce incoming doctoral students to the fundamentals of doctoral study for the Ph. D. degree. Includes developing an understanding of higher education, the organization and purposes of doctoral programs, and the exploration of the roles of teaching, research, and service at the university.

Prerequisite: Admission to the program.

PRST5880 - Special Problems

Credits: 1-9

Provides a broad perspective through selected reading material. Wherever possible the student collects and used original information from a practical work situation. All work is done independently under the direction of a faculty member. A minimum of three conferences are held as necessary to assure successful completion of the project.

Prerequisite: consent of instructor and school director, and graduate standing.

PRST5890 - Directed Professional Study

Credits: 1-9

Similar to PRST 5880. Provides additional opportunity for students to pursue advanced graduate work through independent research. Projects are done under the direction of a graduate faculty member.

Prerequisite: graduate standing.

PRST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 9)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

PRST5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 99)

Prerequisite: advanced degree candidacy.

PRST5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 99)

Prerequisite: advanced degree candidacy

PRST5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 99)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

PRST5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 99)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

PRST5990 - Internship

Credits: 1-12
Max Credit (Max. 99)

Prerequisite: graduate standing.

Psychology

PSYC1000 - General Psychology

Credits: 3
Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP Code [CS<>H]

PSYC1101 - First-Year Seminar

Credits: 3
Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Prerequisite: 9 hours of international studies or social science coursework.

PSYC2000 - Research Psychological Methods

Credits: 4
Introduces some of the methods of investigating psychological questions. Exposure to various research strategies ranging from observational to experimental, using representative laboratory exercises, lectures, readings, films and demonstrations. Requires written and oral reports. May be used to satisfy department's written and oral communication requirement for majors. Laboratory two hours per week.

USP Code [WB<>(none)]

Prerequisite: A grade of C or better in PSYC 1000, WA or COM1, STAT 2050 or STAT 2070.

PSYC2080 - Biological Psychology

Credits: 3

Introduces biological bases of behavior. Includes ethology and comparative behavior, psychobiological development, physiological and sensory mechanisms of behavior, and evolution and behavioral genetics. Presents basic structural and functional properties of the nervous system.

When Offered (Normally offered fall semester)

Prerequisite: A grade of C or better in PSYC 1000 and general biology.

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC2300 - Developmental Psychology

Credits: 3

Introduces psychological development, including age-related changes in thinking, emotion, and behavior. Major theories, methodologies, and empirical discoveries are surveyed in an exploration of developments beginning with conception, with emphasis on social, affective, and cognitive developments in childhood and infancy and their implications for policy and practice.

When Offered (Normally offered spring semester)

Prerequisite: A grade of C or better in PSYC 1000.

PSYC2340 - Abnormal Psychology

Credits: 3

Provides a general overview of abnormal behavior, emphasizing types, etiology and treatment methods.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: A grade of C or better in PSYC 1000.

PSYC2380 - Social Psychology

Credits: 3

Examines how peoples' thoughts, feelings, and behaviors are influenced by the presence of others. Course will cover a broad range of theories and research in social psychology.

When Offered (Normally offered fall semester)

Former Course Number [4755]

Prerequisite: A grade of C or better in PSYC 1000.

PSYC3120 - Cognitive Psychology

Credits: 3

Deals with higher mental processes that are primarily unique to human beings from theoretical and research orientations. Emphasizes interrelationships between various cognitive processes and continuity of those processes with perceptual and non-cognitive activities. Discusses how information is processed and remembered.

When Offered (Normally offered spring semester)

Former Course Number [4120]

Prerequisite: A grade of C or better in 6 hours of psychology including PSYC 1000.

PSYC3150 - Moral Development

Credits: 3

Students explore the vast psychological literature on moral development in affect, cognition and behavior from infancy to adulthood. Topics covered include major developmental theories, research methodologies, current scientific knowledge and its relationship to issues of cultural diversity, social policy and education.

Prerequisite: A grade of C or better in PSYC 1000, junior/ senior standing or consent of the instructor.

PSYC3250 - Health Psychology

Credits: 3

Provides overview of growing partnership between psychology and health care, including history of psychology in health care; theoretical foundations of health and illness; intervention and research techniques; stress and high risk behaviors (e. g. , substance abuse, eating behaviors, AIDS); psychology's contribution to improving outcomes and quality of life in chronic and life-threatening behaviors.

Cross Listed NURS 3250.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC3300 - Psychology of Gender

Credits: 3

In this course, we will examine a variety of psychological theories and research on the experiences and behaviors of men and women. We will study attitudes about gender, theories of gender development, and research about similarities and differences between men and women.

Cross Listed GWST 3300.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC3400 - Community Resources for Older Adults

Credits: 3

The purpose of this course is to raise student awareness of the needs of older adults in the community and to evaluate the continuum of long-term care resources available, service gaps, program models, and funding mechanisms. Community-based learning is required.

Prerequisite: FCSC 2110 or PSYC 1000.

PSYC4040 - Cognitive Neuroscience

Credits: 4

Examines the underlying neural bases of higher cognitive functions in humans, including attentions, language, motor control, navigation, emotions, and memory, as well as neuroanatomy fundamentals and neuroscience methods such as fMRI and ERP. Lecture and lab components.

Prerequisite: A grade of C or better in PSYC 2080 or PSYC 3120 or ZOO 4280.

PSYC4070 - Motivation

Credits: 3

Covers classic and contemporary theories and research concerning motivation and the pursuit of goals. Discusses the study of motivation from a variety of perspectives, including biological, environmental, and psychological. Considers the role of emotion in motivational processes.

Prerequisite: C or better in 6 hours in psychology.

PSYC4080 - Physiological Psychology

Credits: 4

Examines physiological mechanisms of behavior, strongly emphasizing neural and hormonal processes. Includes fundamentals of neuroanatomy and evolution of the nervous system, basic neurophysiology, sensory and motor processes, as well as the physiology of emotion, motivation, learning and memory. Lecture three hours per week. Laboratory two hours per week.

USP Code [SB<>(none)]

Prerequisite: A grade of C or better in 6 hours of psychology and LIFE 1000, LIFE 1003, or LIFE 1010 or an introductory zoology course.

PSYC4150 - Cognitive Development

Credits: 3

Examines cognitive development from infancy through adolescence. Explores, through lecture, discussion and projects, major theories and current empirical research on cognitive development, as well as implications for social and educational policies concerning children.

Prerequisite: A grade of C or better in 9 hours of psychology, including child psychology course.

PSYC4200 - Sensation and Perception

Credits: 3

Examines behavioral and physiological processes involved in sensation and perception. Discusses each of the sensory systems, emphasizing their physiology and role in perceptual processing.

Prerequisite: C or better in 6 hours in psychology.

PSYC4250 - Psychological Aspects of Chronic Illness

Credits: 3

Investigates the impact of chronic physical illnesses on diagnosed children and adults, their families, and society. Emphasizes effects of illnesses on psychological adaptation and quality of life. Should be of particular interest to helping professionals and health care workers.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 3250.

PSYC4300 - Adolescent Development

Credits: 3

Examines the developmental changes that occur during adolescence. Considers physical and physiological growth; intellectual, cognitive, academic and vocational development, changes in attitudes, interests and activities; and development of interpersonal relationships.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4310 - Developmental Psychopathology

Credits: 3

Provides basic understanding of developmental psychopathology. Examines characteristics, etiology, assessment and treatment of psychological disorders in children including autism, mental retardation, anxiety, depression, attention, learning, and conduct problems.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or FCSC 2121 or EDST 2450.

PSYC4320 - Intellectual Disability

Credits: 3

Acquaints students with all aspects of intellectual disability including assessment, diagnosis and classification, etiology, and associated health and mental health difficulties. Prevention, educational and psychological intervention, family adaptation, and community involvement are also addressed.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 4300 or FCSC 2121 or EDST 2450.

PSYC4350 - Psychology of Adulthood

Credits: 3

Examines theories and research on psychological development from early adulthood to the end of life, with special emphasis on

positive development, successful aging, and methodological issues in the study of adult development.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4370 - Criminal Psychopathology

Credits: 3

Provides an overview of current theories and empirical evidence concerning relationship between psychological disorder and criminal behavior. Examines various clinical syndromes and their role in biological, social and psychological genesis of crime, as well as the concept of criminal responsibility.

Cross Listed CRMJ 4370.

Prerequisite: C or better in 6 hours in psychology.

PSYC4380 - Death and Dying

Credits: 3

Designed to provide a comprehensive overview of the field of thanatology. Death is considered from both an individual and sociocultural perspective. Aims to provide solid ground in research, methods, and theory of end-of-life issues and to encourage contemplation of personal and professional applications of death studies.

Prerequisite: A grade of C or better in PSYC 1000 and junior/ senior standing.

PSYC4390 - Personality Science

Credits: 3

Examines the contemporary science in personality psychology, with a focus on the genetic, biological, social, cognitive, and affective variables which interact to influence individual differences and personality coherence.

Former Course Number [3390]

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 2340 or PSYC 2380.

PSYC4400 - Principles of Psychological Testing

Credits: 3

Encompasses basic concepts, principles and procedures of psychological testing, with a lecture, discussion, laboratory project approach. Emphasizes nature and uses of test reliability, validity, norms and transformations, selecting and evaluating tests, test interpretation models and professional ethics in test use. Lecture three hours per week.

Prerequisite: A grade of C or better in 6 hours of psychology and STAT 2050 or STAT 2070.

PSYC4500 - Introduction to Clinical Psychology

Credits: 3

Provides students with general introduction to clinical psychology as a subarea of psychology. Deals with the search for, and applications of, psychological principles and methods aimed at assessing and explaining unique or special problems of the

individual, group or family, assisting client(s) to function more meaningfully and effectively, and helping to prevent future problems.

Prerequisite: A grade of C or better in PSYC 2340.

PSYC4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed CRMJ 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

PSYC4740 - Advanced Social Psychology

Credits: 3

Concentrates on critical assessment of interpersonal behavior. Students are expected to become familiar with data gathering, analysis and reporting procedures commonly used in contemporary social psychology.

USP Code [WC<>(none)]

Prerequisite: A grade of C or better in PSYC 2000 and PSYC 2380.

PSYC4760 - Child Maltreatment

Credits: 3

Lecture and seminar. Examines the phenomenon of child abuse and neglect. Includes an overview of attitudes towards and legal definitions of child maltreatment. Explores parental factors, contextual influences and developmental consequences of maltreatment. Relies heavily on current research in child abuse and neglect. Emphasizes policy implications.

Cross Listed CRMJ 4760.

Prerequisite: C or better in 6 hours in psychology.

PSYC4820 - Psychology of Human Sexuality

Credits: 3

A clinical-personality orientation to psychological factors in the development and expression of human sexuality. Focuses on the individual: interactions of physiological factors with developmental influences and personality patterns that produce feelings, thoughts and behaviors associated with human sexuality.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or FCSC 2121 or EDST 2450.

PSYC4830 - Senior Thesis

Credits: 3

Senior research project under faculty guidance and supervision. Faculty sponsorship must be obtained prior to registration.

USP Code [WC< >(none)]

Prerequisite: senior standing, majors only, 24 hours in psychology, and consent of instructor.

PSYC4850 - Field Work in Psychology

Credits: 1-3

Provides opportunities to experience applied aspects of psychology in external settings through volunteering, teaching, and related activities. Type and location of experience and requirements for earning credit and for grading are determined with a sponsoring faculty person in the psychology department. An acceptable paper based on work completed may also be required. No credit is available for field work prior to registration for this course.

Prerequisite: consent of instructor required in advance.

PSYC4855 - Undergraduate Research in Psychology

Credits: 1-3

Max Credit (Max. 6)

Provides new opportunities to assist in aspects of conducting basic and applied psychological research with a sponsoring faculty person in the psychology department. Specific research activities and requirements for earning credit and for grading are determined with a sponsoring psychology faculty person. An acceptable paper based on work completed may also be required. No credit is available for research conducted prior to registration for this course.

Prerequisite: consent of instructor required in advance.

PSYC4860 - Seminar

Credits: 1-6

Course consists of extended and in-depth discussions of particular topics in psychology. Topics vary semester to semester. Class format may include lecture, group discussion, and group activities. Reading assignments will draw heavily from scientific literature and may include journal articles, textbooks, or book chapter.

Prerequisite: 9 hours in psychology.

PSYC4960 - Service-Learning in Psychology

Credits: 3

Experience applied aspects of psychology in real world settings through volunteering. Recent research and other materials preparing students for their service will be discussed in class. After the volunteering experience, the students will prepare an academic paper integrating their practical experience with research and theory learned in class.

Prerequisite: PSYC 1000 and consent of instructor required in advance.

PSYC4970 - Aging Minor Internship

Credits: 1-6

This course provides students in the Aging Studies Minor the opportunity to experience applied aspects of aging studies in a community setting. Prior to registration the student must work with the minor advisor and instructor to identify the internship setting and complete all required paperwork.

PSYC5060 - Statistical Methods In Psychology

Credits: 3

General statistical analyses and their application to psychology. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 2020, STAT 3050, STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: 1 course in statistics (all introductory courses except 2000).

PSYC5095 - Statistical Computation In Psychology

Credits: 1-3

Max Credit (Max. 12)

Supervised problem-solving practice in statistical analysis is provided with regard to topics corresponding to those covered in a concurrent statistical analysis course. Statistical analysis topics vary.

Prerequisite: graduate standing and instructor consent.

PSYC5120 - Neuropsychology of Human Behavior

Credits: 3

Brain mechanisms involved in the expression and control of human behavior will be studied. Findings from classical neuropsychological studies and more recent clinical research investigations will be used in deriving explanations for the structural and physiological basis of normal and abnormal psychological processes.

Prerequisite: 9 hours in psychology.

PSYC5140 - Personality Science

Credits: 3

Examines contemporary scientific research and theory in personality. Surveys the biological, cognitive, affective, social, and interpersonal determinants of personality function with individual differences. A theoretical framework highlights the dynamic transactions between individuals and the sociocultural environment over the life course.

Prerequisite: graduate standing in clinical or experimental psychology.

PSYC5180 - Advanced Developmental Psychology

Credits: 3

Provides a graduate-level overview of development psychology, including current theories, issues, and research in both cognitive development and social development.

Prerequisite: graduate standing.

PSYC5210 - Advanced Physiological Psychology

Credits: 3

Examines the physiological bases of behavior beginning with a treatment of basic neuroanatomy, neurophysiology, and pharmacology. Discussion then proceeds to the physiological correlates of various behavioral states including sleep arousal, sensory processes, motor control, motivational systems, emotions, learning and memory.

Prerequisite: 30 hours in psychology including PSYC 4080.

PSYC5230 - Advanced Cognitive Psychology

Credits: 3

Provides the graduate student with an understanding of theoretical and experimental approaches to the study of human cognitive processing. There is an emphasis on critical evaluation of current research in the area.

Prerequisite: 30 hours in psychology including PSYC 3120.

PSYC5240 - Cognitive Psychology Seminar

Credits: 3

Max Credit (Max. 12)

Graduate level seminar in cognitive psychology, the topic of which will vary from semester to semester. Emphasis is on providing students with an in-depth analysis of some specific areas of cognitive psychology.

Prerequisite: graduate standing.

PSYC5270 - Behaviorism

Credits: 3

Acquaints the graduate student with behaviorist philosophy, the experimental analysis of behavior, and the application of behavioral technology to experimental, educational, and clinical problems.

Prerequisite: 30 hours in psychology.

PSYC5300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include multivariate regression, canonical correlation, discriminant analysis, factor analysis and multidimension scaling. A wide range of computer assistance is

incorporated.

Cross Listed STAT 5300.

Prerequisite: STAT 5050.

PSYC5340 - Introduction To Clinical Supervision

Credits: 1-4

Max Credit (Max. 4)

Provides an introduction to the supervision of psychotherapy for advanced doctoral students by having them observe a therapy case in the Psychology Clinic with assigned first year doctoral students and then give instruction as to therapeutic techniques used by the therapist and to client dynamics.

Prerequisite: admission to the doctoral program in clinical psychology and consent of instructor.

PSYC5370 - Graduate Seminar in Forensic Psychology

Credits: 3

To provide graduate level training in forensic psychology for students pursuing careers in psychology, counseling and criminal justice.

Prerequisite: 16 hours in psychology or consent of instructor.

PSYC5375 - Psychology/Law Proseminar

Credits: 1-10

Max Credit (Max. 10)

The Psychology Law Proseminar exposes students to various areas of psycholegal research. Topics will vary each semester and students will be expected to be actively engaged in the proseminar activities. Students will be exposed to theoretical and applied research that has relevance to legal settings.

Prerequisite: graduate standing in Psychology and permission of instructor.

PSYC5380 - Theories and Techniques of Psychotherapy

Credits: 3

A course for entering clinical doctoral students. Major current psychotherapies are reviewed in terms of theoretical assumptions and related techniques. Required of first-year students in the program.

Prerequisite: admission to doctoral program in clinical psychology.

PSYC5400 - Clinical Assessment I

Credits: 3

First semester of a three semester practicum course in psychological assessment at the doctoral level. During the semesters, extensive examination is made regarding the standardization, relevant application, and significant limitations of assessment techniques. A thorough grounding is interpretation, and communication of the results of psychological evaluation both in writing and in consultation with referral sources. Normally taken during the first year of the doctoral program.

Prerequisite: restricted to doctoral students in clinical psychology.

PSYC5410 - Clinical Assessment II

Credits: 3

Second semester of a full-year practicum course in psychological assessment at the doctoral level.

Prerequisite: PSYC 5400.

PSYC5425 - Diagnostic Interviewing

Credits: 1

Students review research on diagnostic interviews, practice basic interviewing skills and learn to administer the Structured Clinical Interview for DSM-IV (SCID-I) using training tapes, class discussion and role-play exercises. As time permits, other interviews used to assess personality disorders and specific diagnostic categories will be reviewed.

Prerequisite: admission to the doctoral program in clinical psychology.

PSYC5430 - Clinical Neuropsychological Assessment

Credits: 3

Present the clinical psychologist in training with an introduction to the clinical application of neuropsychological principles and various tools. Includes the administration and interpretation of neuropsychological instruments and batteries, as well as the integration of more traditional assessment techniques with neuropsychological testing.

Prerequisite: admission to the clinical doctoral psychology program, PSYC 5400, PSYC 5410, and PSYC 5120.

PSYC5450 - Clinical Practicum

Credits: 1-4

Max Credit (Max. 8)

Beginning clinical practicum course providing doctoral students in clinical psychology with supervised experience in individual psychotherapy. Psychodynamic, client-centered, and behavioral techniques are employed. Cases and theoretical issues discussed in weekly seminar. Individual supervision of students by clinical faculty.

Prerequisite: admission to doctoral program in clinical psychology and consent of instructor.

PSYC5460 - Advanced Clinical Practicum

Credits: 1-12
Max Credit (Max. 12)

Advanced clinical practicum course for students beyond their second year in the doctoral program in clinical psychology. Provides additional supervised experience in individual, family, child, and group therapy, as well as in psychological assessment. Experiences include case conceptualization, case management, and provision of direct services.

Prerequisite: admission to doctoral program in clinical psychology, PSYC 5450, and consent of instructor.

PSYC5470 - Empirically Supported Psychotherapies

Credits: 3
Students become familiar with the efficacy and effectiveness of important state-of-the-art treatments with a focus on treatments of mood and anxiety disorders. Course goals include gaining a critical understanding of the issues involved in identifying psychological treatments that work.

Prerequisite: PSYC 5380; PSYC 5510.

PSYC5500 - Psychopathology I

Credits: 3
Students will obtain research-based knowledge in developmental psychopathology via lectures, discussions, and student presentations. This course will cover disorders that usually begin in childhood and how these disorders manifest across the lifespan. The course will also cover disorders that begin later and how these disorders manifest in children and adolescents.

PSYC5510 - Psychopathology II

Credits: 3
Students will obtain research-based knowledge of both descriptive and explanatory adult psychopathology. In addition to learning how adult mental disorders present, students will acquire a framework for understanding the multiple variables that interact over the lifespan to influence adult psychopathology.

PSYC5520 - Introduction To Research

Credits: 3
Introduction to problems and issues in research methodology. Ongoing research directed by various faculty are used as paradigms for conceptualization of research problems. Students critically evaluate projects presented and begin planning for research leading to theses and dissertations.

Prerequisite: graduate status in psychology.

PSYC5530 - Professional Issues and Ethics

Credits: 3
Max Credit (Max. 6)

This course primarily emphasizes ethical considerations and principles guiding the practice of psychology. Additionally, career development issues such as internship, postdoctoral fellowships, licensure and grant writing are addressed. This course also promotes and explores the foundational importance of informing clinical practice with empirical evidence.

Prerequisite: graduate standing in psychology.

PSYC5550 - Clinical Seminar

Credits: 1-3

Max Credit (Max. 18)

Graduate level seminar in clinical psychology, the topic of which will vary from semester to semester. Emphasis is on providing students with an in-depth analysis of some specific area of clinical psychology.

Prerequisite: admission to the doctoral program in clinical psychology.

PSYC5580 - Advanced Social Cognition

Credits: 3

Provides an overview of the cognitive processes involved in social behaviour, including perception, judgment, memory, and evaluation.

Prerequisite: graduate standing or permission of instructor.

PSYC5630 - Clinical Supervised Practicum I

Credits: 2

The first semester of a one year practicum in clinical supervision for doctoral students in clinical psychology. Students supervise at least one 2nd or 3rd year clinical doctoral student, attend supervision team meetings, and may conduct group supervision and/or see clients as determined by team leader.

Prerequisite: enrollment in doctoral program in clinical psychology.

PSYC5640 - Practicum in Clinical Supervision II

Credits: 2

The second semester of a one year practicum in clinical supervision for doctoral students in clinical psychology. Students supervise at least one 2nd or 3rd year clinical doctoral student, attend supervision team meetings, and may conduct group supervision and/or see clients as determined by team leader.

Prerequisite: enrollment in doctoral program in clinical psychology.

PSYC5650 - Social and Affective Psychology

Credits: 3

Designed to give the student a thorough understanding of the theories and methodologies of contemporary Social Psychology.

Prerequisite: 16 hours in psychology including PSYC 2380.

PSYC5720 - Advanced Social Development

Credits: 3

Provides a graduate-level introduction to theory and empirical research on social development. Topics include emotional development, attachment, socialization, moral development, aggression, and social context.

Prerequisite: graduate standing.

PSYC5740 - Internship in Clinical Psychology

Credits: 1

Max Credit (Max. 3)

Full-year, 40 hours per week assignment to a mental health or related agency having an established internship program. This placement must be approved by the Department of Psychology and include: (a) adequate supervision of the intern and (b) didactic and other educational experiences that supplement practicum work. Registration for fall, spring, and summer terms is required.

Prerequisite: Completion of preliminary examination and dissertation proposal, department approval.

PSYC5760 - Graduate Seminar

Credits: 1-10

Max Credit (Max. 18)

Topic varies from semester to semester. Emphasis is upon the preparation of reports on special topics in psychology and the presentation and discussion of these reports in the seminar situation.

Prerequisite: 6 hours in psychology and consent of instructor.

PSYC5765 - Teaching of Psychology

Credits: 1-3

Max Credit (Max. 3)

Course is designed to prepare future faculty in psychology for a career in teaching. Topics covered include developing lectures and assignments, assessing students and providing feedback, using technology, and fostering skill development in students. Course emphasizes evidence-based teaching.

Prerequisite: restricted to graduate students in psychology.

PSYC5775 - Developmental Psychology Seminar

Credits: 1-3
Max Credit (Max. 18)

Graduate level seminar in developmental psychology, the topic of which will vary from semester to semester. Emphasis is on providing student with an in-depth analysis of some specific area of developmental psychology.

Prerequisite: consent of instructor.

PSYC5780 - Advanced Cognitive Development

Credits: 3
Provides a comprehensive account of current views of cognitive development. Emphasis is given to alternative theoretical explanations for findings from empirical research.

Prerequisite: graduate standing.

PSYC5785 - Social Psychology Seminar

Credits: 1-3
Max Credit (Max. 18)

Graduate level seminar in social psychology, the topic of which will vary from semester to semester. Emphasis is on providing students with an in-depth analysis of some specific area of social psychology.

Prerequisite: permission of instructor.

PSYC5790 - Clerkship in Clinical Psychology

Credits: 1-3
Max Credit (Max. 9)

Provides practical clinical and administrative experience in institutional and community settings. Experience includes psychological assessment, group and individual therapy activities, participation in clinical and administrative staff conferences, consultation to various departments and agencies within the institutional setting and in the community, training of professionals in psychological concepts and techniques, and participation in research. Experiences are located in various community, county, and state agencies primarily in the Rocky Mountain region. Successful completion of three clerkships is a required part of the doctoral program in clinical psychology.

Prerequisite: enrollment in doctoral program in clinical psychology and assignment by department.

PSYC5800 - Research in General Psychology

Credits: 1-8
Max Credit (Max 24)

Prerequisite: consent of the instructor and graduate standing in the department.

PSYC5810 - Research in Psychology and Law

Credits: 1-8
Max Credit (Max. 24)

Prerequisite: consent of the instructor and graduate standing in the department.

PSYC5820 - Research in Social Psychology

Credits: 1-8
Max Credit (Max. 24)

Prerequisite: consent of instructor and graduate standing in the department.

PSYC5830 - Research in Clinical Psychology

Credits: 1-8
Max Credit (Max. 24)

Prerequisite: consent of the instructor and graduate standing in the department.

PSYC5840 - Research in Developmental Psychology

Credits: 1-8
Max Credit (Max. 24)

Prerequisite: consent of the instructor and graduate standing in the department.

PSYC5850 - Research Cognitive Psychology

Credits: 1-8
Max Credit (Max. 24)

Prerequisite: consent of the instructor and graduate standing in the department.

PSYC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PSYC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

PSYC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

PSYC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

PSYC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

PSYC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Rangeland Ecology and Watershed Management

REWM2000 - Principles of Rangeland Management

Credits: 3
Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Prerequisite: LIFE 2022 or LIFE 2023.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM3390 - Range Judging

Credits: 2

Judging rangelands based on soil, plant and animal resources and applying science-based information to make management decisions. Participation in a field trip and UW SRM judging teams is required including Plant Team and URME. This course is intended for members of the SRM competitive Teams.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000, REWM 2400 and REWM 3020, as well as the Team Coach permission.

REWM3500 - Rangeland Plant Ecophysiology

Credits: 3

Examines plant physiological processes that have application to ecological and land management issues. Topics include carbon assimilation, water relations, mineral nutrition as applied to plant distributions, plant and system responses to grazing, as well as plant tolerance of extreme conditions including drought, excessive temperatures and changes in climate.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 2022 or LIFE 2023.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.

Prerequisite: POLS 1000.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of public and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Students prepare public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 5103.

When Offered (Normally offered spring semester)

Former Course Number [3103]

Prerequisite: C or better in REWM 2000 and CS course.

REWM4150 - Behavior Modification for Production of Grazing Herbivores

Credits: 3

Strategies for manipulation of behavior and management of the grazing herbivore will be developed from scientific and practical information. Designed to equip the student to manage for animal and natural resource production.

Dual Listed REWM 5150.

When Offered (Normally offered spring semester)

Former Course Number [3150]

Prerequisite: C or better in REWM 2000 and REWM 3020 or ANSC 3100.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 5300.

When Offered (Normally offered spring semester)

Former Course Number [3320]

Prerequisite: REWM 2500 or LIFE 2023.

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4340 - Reclamation Techniques Field Trip

Credits: 2

Provides increased comprehension of current land reclamation problems and solutions by means of a field trip to sites in region where land reclamation is occurring.

When Offered (Normally offered fall semester)

Prerequisite: REWM 4200.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

REWM4500 - Rainfall-Runoff Modeling

Credits: 3

Introduction to hydrologic modeling that teaches the foundations of model development, calibration, and interpretation. Examines the different components of the water cycle and how they are being integrated into watershed models. Equips the students with the necessary skills to parameterize hydrologic models, understand the underlying principles, and interpret model outputs.

Dual Listed REWM 5500.

Prerequisite: REWM 4285.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

REWM4550 - Internship in:

Credits: 1

Max Credit (Max. 4)

Supervised field experience in range management or disturbed land reclamation. No more than 4 credits.

Prerequisite: basic course work in subject selected and consent of instructor.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM4750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration ecology for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 5750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM4810 - Experiments in Restoration

Credits: 2

Emphasis on the experimental design using examples from restoration science. Focus on experiments to test concepts in ecosystem science, food webs, population genetics, metapopulation biology, biodiversity and invasion, and climate change. Address topics in experimental, ecological restoration.

Dual Listed REWM 5810.

Prerequisite: STAT 2050 or equivalent.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP Code [WB<>(none)]

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP Code [WC< >COM3]

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

REWM4990 - Undergraduate Teaching Practicum

Credits: 1

Max Credit (Max. 2)

Teaching experience in classroom or laboratory assisting faculty instructor.

When Offered (Offered based on sufficient demand and resources)

REWM5000 - Range Resource Management

Credits: 3

Basic concepts and theories of rangeland resource management, trends in rangeland classification, grazing management and improvement practices.

Prerequisite: graduate classification in agriculture or related natural resource subject matter areas.

REWM5100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 4100.

REWM5103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Preparation of public range or private ranch recreation operations plan.

Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 4103.

Prerequisite: REWM 2000 and CS course.

REWM5150 - Behavior Modification for Production of Grazing Herbivores

Credits: 3

Strategies for manipulation of behavior and management of the grazing herbivore are developed from scientific and practical information. Designed to equip the student to manage for animal and natural resource production.

Dual Listed REWM 4150.

Prerequisite: REWM 2000 and ANSC/REWM 3020 or ANSC 3100.

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

REWM5300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 4300.

Prerequisite: REWM 2500 or LIFE 2023.

REWM5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for

conducting research that includes community ecology.

Cross Listed ECOL 5400.

Prerequisite: LIFE 3410 or equivalent.

REWM5440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 4440.

Prerequisite: graduate standing.

REWM5500 - Rainfall-Runoff Modeling

Credits: 3

Introduction to hydrologic modeling that teaches the foundations of model development, calibration, and interpretation. Examines the different components of the water cycle and how they are being integrated into watershed models. Equips the students with the necessary skills to parameterize hydrologic models, understand the underlying principles, and interpret model outputs.

Dual Listed REWM 4500.

Prerequisite: REWM 5285.

REWM5520 - Ecology and Management of Grasslands

Credits: 3

Ecological nature, management strategies, and management problems of North American and world grassland ecosystems.

Prerequisite: REWM 4300, REWM 5300 and BOT 4700.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

REWM5610 - Quantitative Modeling in Landscape Ecology

Credits: 3

Emphasis on quantitative, spatial analysis of landscapes and application of these quantitative tools to making sound management

decisions. Work with real data, acquire high-level quantitative skills, develop problem-solving skills, and discuss management application of model results. Analysis will encompass abiotic, biotic (plant and animal), and human use of ecological systems in a spatial context.

Cross Listed ECOL 5610.

Prerequisite: upper division stats course (e. g. , STAT 4015 or STAT 4025) and graduate standing.

REWM5640 - Investigation

Credits: 1-4

Max Credit (Max. 10)

Research on specialized problems in range management. Investigations offered in the following areas of range management, habitat management, business management, range improvements and monitoring, watershed management, extension and international development.

Prerequisite: graduate standing.

REWM5680 - Landscape Genetics

Credits: 3-4

Provides a unique opportunity for interdisciplinary training and international collaboration uniting some of the most active landscape genetics groups in North America and Europe. A key objective of landscape genetics is to study how landscape modification and habitat fragmentation affect organism dispersal and gene flow across the landscape. Meeting this and other landscape genetic objectives requires highly interdisciplinary specialized skills making intensive use of technical population genetic skills and spatial analysis tools (spatial statistics, GIS tools and remote sensing). To bring these diverse topics and skills together effectively, we are using a distributed model of teaching. Population genetics, spatial analysis/ statistics, and previous experience in Rare all extremely useful but not required.

Cross Listed ECOL 5680.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

REWM5750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 4750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM5810 - Experiments in Restoration

Credits: 2

Emphasis on the experimental design using examples from restoration science. Focus on experiments to test concepts in ecosystem science, food webs, population genetics, metapopulation biology, biodiversity and invasion, and climate change. Address topics in experimental, ecological restoration.

Dual Listed REWM 4810.

Former Course Number [5800]

Prerequisite: graduate standing.

REWM5830 - Wildlife Habitat Ecology

Credits: 2

For students in wildlife and rangeland ecology emphasizing the relationships between wildlife populations and their habitats. Concepts forming the basis of wildlife habitat ecology including habitat and niche, habitat metrics, resource selection, habitat-relationships modeling, and habitat restoration and management.

Prerequisite: Graduate-level course in statistics and graduate standing or instructor consent.

REWM5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

REWM5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

REWM5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

REWM5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

REWM5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Religious Studies

RELI1000 - Introduction to Religion

Credits: 3
Introduces world religions and shared characteristics. Draws on various academic approaches to religion study, emphasizing similarities and differences among wide variety of religions.

USP Code [CH,G<>H]

RELI1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

RELI2040 - Religions of the Middle East: Judaism, Christianity and Islam

Credits: 3
Analyzes origins and early years of three major religions that arose in the Middle East: Judaism, Christianity and Islam. Looks at historical development, political and cultural context, and structure of each religion.

USP Code [CH,G<>(none)]

RELI2050 - Religions of Asia

Credits: 3
Introduces students to the religions of Asia. Primary focus on Hinduism and Buddhism, but also addresses several smaller religions. Emphasis on beliefs, sacred texts and tales, practices, ethics and worship, as well as historical development and

1605

contemporary issues.

USP Code [CH,G<>H]

RELI2070 - Gender and Religion

Credits: 3

Aims at understanding how religion constructs and reinforces gender roles in religion and society. Looks at traditional gender roles in Christianity and the transformation they have undergone in the past century or so.

Cross Listed GWST 2070.

RELI2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed HIST 2080.

USP Code [CH<>(none)]

RELI2110 - Introduction to the Old Testament

Credits: 3

Introduces students to the books of the Old Testament and people whose way of life they describe. Pays particular attention to religion of the Israelites, their history and culture. Focuses on different historical circumstances in which the books were written.

USP Code [CH<>H]

Former Course Number [1010]

RELI2150 - New Testament Survey

Credits: 3

Introduces the academic study of the New Testament. Concentrates on the analysis of Jesus, Paul and other New Testament figures by studying the textual evidence within its historical, religious and cultural contexts. Key foci also include the composition of the New Testament's books and the theological development of early Christianity.

USP Code [(none)<>H]

RELI2175 - The Life and Teaching of Jesus

Credits: 3

Explores life and teachings of Jesus within religious, cultural and political context of first-century Palestine. Studies Jewish, Greek and Roman influences on Palestine; then, examines effect of those influences on the gospels (both canonical and non-canonical).

RELI2200 - Contemporary American Religion

Credits: 3

The U. S. is home to more world religions and to more versions of those religions than any other nation on the planet. This course examines how the U. S. has shaped these religions and the impact these religions have had in turn on U. S. society and culture.

USP Code [CH,D<>COM2]

RELI2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed HIST 2225.

RELI2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed HIST 2250.

USP Code [CH,D<>H]

RELI2252 - American Religious History II (1865- 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed HIST 2252.

USP Code [CH,D<>H]

RELI2315 - History of Non-Western Religions

Credits: 3

Max Credit 9

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed HIST 2315.

USP Code [CH,D<>H]

RELI2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

Cross Listed HIST 2320.

USP Code [CH,G<>COM2]

RELI2330 - Islam in the Modern World

Credits: 3

How does Islam interact with Modernity? This course extends beyond the news to study contemporary trends and movements among the world's Muslims. Includes a general introduction to the history and religion of Islam, and discusses contemporary Islamic topics, reflecting current issues, instructor research and student choices.

USP Code [(none)<>H]

RELI2410 - Varieties of Non-Belief in the Western World

Credits: 3

A broad, chronological survey of different types of non-belief, primarily from the Renaissance onwards. It examines critiques by philosophers, politicians, poets, and novelists aiming to understand their objections to religion and analyzing how these objections shaped the modern religious landscape and the way we understand religion itself.

USP Code [CH<>H]

RELI2450 - Traditional African Religion

Credits: 3

Surveys traditional African religions, both ancient and contemporary.

Cross Listed AAST 2450.

USP Code [CH,G<>COM2]

RELI2500 - Special Topics in Religion

Credits: 1-3

Max Credit (Max. 6)

Permits occasional investigation of different subjects in academic study of religion.

RELI3090 - Middle East and Israel in Film

Credits: 3

Focus on film representations of Israel, the Arab world, Turkey and Iran. Studies religion and society, common human aspirations, modalities of social and other conflicts through screening of feature and short films and discusses issues raised by historical, political, social, cultural and religious tensions and considerations in this region.

USP Code [(none)<>H]

Prerequisite: WA or COM1.

RELI3110 - Bible and Archaeology

Credits: 3

An archaeological survey illuminating the historical, theological, and cultural landscape of ancient Near East and the Mediterranean world. Examines how archaeology contributes to the understanding of the peoples, texts and religious movements of the Old Testament/Hebrew Bible and the New Testament.

Prerequisite: RELI 1000 or RELI 2110 or RELI 2150 or ANTH 1300 or ANTH 1450.

RELI3200 - Religion and American Culture

Credits: 3

Explores the role of religion in the history of American culture. It considers how developments in American religious history have reflected larger trends in American society, and how those developments have in turn helped shape American society and culture.

USP Code [(none)<>H]

Prerequisite: one lower-level course in religious studies, American history, or American studies.

RELI3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed HIST 3220.

USP Code [G<>(none)]

Prerequisite: 6 hours or HIST, RELI, or INST.

RELI3225 - Apocalypse: The History of the End

Credits: 3

The apocalyptic End of Time has become the subject of much speculation, especially since the beginning of the new millennium. Analyzes such speculation as a religious phenomenon in both ancient and modern religions, and attempts to understand its social, cultural and personal impacts.

Prerequisite: junior standing.

RELI3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000, RELI 2225/HIST 2225, or HIST 2113.

RELI3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500

Cross Listed HIST 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

RELI3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: HIST 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

RELI3245 - Christianity Since Darwin

Credits: 3

Christianity has faced many challenges since the mid-nineteenth century, including the thought of Darwin, Marx and Freud, to name a few. Christianity has faced those challenges in various ways and its practitioners continue to re-examine its understandings of a vastly changed and continually changing world.

USP Code [(none)<>COM2]

Prerequisite: COM1, and RELI 1000 or RELI 2225/HIST 2225 or HIST 1120 or consent of instructor.

RELI3260 - African Spirits in the New World

Credits: 3

Begins with Yoruba roots in Africa and travels with the African Diaspora focusing on spirit possession in Haitian Vodou, Cuban Santeria, Jamaican Revival Zion, Jamaican Rastafarianism, Brazilian Candomblé, and "Black Church" in the United States using ethnography and postcolonial theory of religious studies.

Cross Listed AAST 3260.

USP Code [CH,G<>H]

Prerequisite: AAST 1000 or any AAST 2000 level course or RELI 1000.

RELI3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed PHIL 3320.

Prerequisite: 3 hours of philosophy.

RELI3340 - Mysticism, Yoga, and Enlightenment in the East

Credits: 3

Explores Hindu and Buddhist concepts of enlightenment and the means for reaching them through mysticism and yoga. Study the texts and beliefs and their translation into practice.

Prerequisite: WB and CH.

RELI3350 - Religion and Globalization in India

Credits: 3

Learn about religious pluralism in India. In particular, how globalization has impacted the ways people from many different religions, caste, class, and educational backgrounds, ethnicities, and regions experience and practice their religions in 21st century India.

Prerequisite: RELI 1000 or RELI 2050.

RELI3400 - Religion in the American West

Credits: 3

Considers the religious history of the American West from Pre-Columbian times to the present, paying special attention to the ways the West affects religious belief and practice. Themes of contact and conflict will be particularly important in our study, as will the changing perceptions of the West.

USP Code [CH,D<> (none)]

Prerequisite: USP WB course.

RELI4000 - Theories of Religion

Credits: 3

Investigates different theories proposed to explain religion and methods used to investigate them. Pays primary attention to influential thinkers and theorists of the past century.

USP Code [WC<>COM3]

Prerequisite: RELI 1000, and 12 additional hours in Religious Studies, at least 6 of which must be at the 3000-level or above, junior standing.

RELI4090 - Film and Religion

Credits: 3

Movies use religion to convey messages; they debate religious issues and use religion to debate non-religious issues. This course analyzes how film makers use religion and religious themes to transform religions into advocates for social issues and to shape religion's role in society. Popular films drawn from many genres.

Cross Listed ENGL 4090.

Prerequisite: 6 hours of 2000-level or higher literature courses or religion courses.

RELI4100 - African American Religious Culture

Credits: 3

This mid-level writing-intensive seminar is a comparative study of African American religious celebration, primarily in the context of Afro-Christianity, but touching on Islam, Candomblé, "Voodoo," Santeria, and Rastafarianism.

Cross Listed AAST 4100.

USP Code [WC,D<>COM3]

Prerequisite: WB and one of the following: AAST 1000 or any AAST 2000-level course or RELI 1000.

RELI4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what might be called heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed HIST 4113.

Prerequisite: 9 hours of HIST or RELI.

RELI4160 - Moses, Jesus, and Muhammad

Credits: 3

Examines the biographies of Moses, Jesus and Muhammad found in works of history, in sacred literature, in hagiography, ritual and popular culture. Demonstrates strategies used to recover their historical personalities and how they are portrayed in multiple religious traditions, offering insights into how each have shaped our world.

USP Code [CH<>(none)]

Prerequisite: RELI 1000 or junior standing.

RELI4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old

Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed HIST 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

RELI4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed HIST 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

RELI4190 - Women and the Bible

Credits: 3

Explores depictions, roles and statuses of women found in the Bible, both Old and New Testaments. Introduces ways biblical portraits of women have been used in recent centuries to develop theologies of, by and for women.

Prerequisite: junior standing or permission of instructor.

RELI4260 - Judaism in the Modern World

Credits: 3

Studies Jews and Judaism from pre-modern period to present. Traces migration of Jews from Europe to the USA and Israel, while examining radical changes that transform the religion.

Prerequisite: junior standing.

RELI4310 - Seminar in Asian Religions

Credits: 3

Max Credit (Max. 9)

Students will be introduced to a number of indigenous and analytical frameworks and interdisciplinary theories and methods in the examination of a specialized topic in the study of Asian religions. Specific focus of the course varies by semester.

Prerequisite: RELI 2050 or junior standing.

RELI4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world.

Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and GWST 4335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

RELI4500 - Special Topics in Religious Studies

Credits: 1-3

Max Credit (Max. 12)

Presents from semester to semester a variety of important topics in the academic study of religion.

Prerequisite: RELI 1000.

RELI4635 - Religious Studies Departmental Honors

Credits: 0

Satisfactory completion of this course indicates that Religious Studies Departmental Honors have been conferred on the student.

Prerequisite: Consent of Religious Studies thesis chairperson; demonstration of competency in a foreign language equivalent to a fourth-semester college level or concurrent enrollment in a fourth-semester foreign language course.

RELI4900 - Independent Study in Religion

Credits: 1-3

Max Credit (Max. 6)

Primarily for juniors and seniors who can benefit from independent study of topics in religious studies not covered in course offerings. Guidance provided by faculty member in the appropriate field.

Prerequisite: 9 hours in religious studies and consent of instructor.

RELI4930 - Thesis

Credits: 0-6

Max Credit (Max. 9)

Directed research and writing supervision of Religious Studies thesis chairperson. Results in production of Religious Studies thesis.

Prerequisite: Successful completion of or concurrent enrollment in RELI 4000, advanced undergraduate status in good academic standing, consent of Religious Studies thesis chairperson and department chair.

RELI4960 - International Field Course

Credits: 1-6
Max Credit (Max. 12)

This course takes students away from campus to locations outside the United States to study religion on site in its geographic and cultural context. Destination and specific content varies, but the course always requires attention to the connections between world events and local experiences.

Prerequisite: Junior standing; WA or COM1; other prerequisites as determined by the instructor.

RELI4961 - Domestic Field Course

Credits: 1-6
Max Credit (Max. 12)

This course takes students away from campus to other locations in the United States to study religion on site in its geographic and cultural context. Destination and specific content varies, but the course always requires attention to the religious, racial, ethnic, and cultural diversity of religion in the United States.

Prerequisite: Junior standing, WA or COM1.

Renewable Resources

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3
Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests, watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP Code [(none)<>PN]

RNEW2100 - Forest Management

Credits: 3
Principles of forest management. Topics include the laws affecting forest management, methods of harvesting wood from forests, fire and insect management, the effects of disturbances on stream flow and nutrient cycling, and the challenges of developing management plans for forests.

Cross Listed ENR 2100.

Prerequisite: LIFE 1101 or LIFE 1010.

RNEW2345 - Natural Resource Ethics

Credits: 3
Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical

frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR/PHIL 2340, RNEW 2100 .
USP Code [CH,D<>(none)]

RNEW3000 - Tropical Ecology

Credits: 3

Examines the characteristics of tropical ecosystems, how they evolved, their value to humans, their present status, and current issues relating to biodiversity, deforestation, extinction, and conservation.

Prerequisite: LIFE 1101 or LIFE 1010.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed AECL 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

RNEW4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed AECL 4400.

Dual Listed RNEW 5400.

Prerequisite: LIFE 3400.

RNEW4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed BOT 4730.

Dual Listed RNEW 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

RNEW4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed BOT 4775.

Prerequisite: LIFE 3400.

RNEW4800 - Undergraduate Research

Credits: 1-3

Max Credit (Max. 18)

Undergraduate student research can be an important component in the intellectual and professional development of future scientists and land managers. Undergraduate students working with a faculty member in a research capacity can register for up to 3 credit hours per semester. The student and faculty member will identify an academic outcome that is associated with their research effort, such as a research paper, oral presentation, or poster session at an appropriate venue. Instructor's permission required.

RNEW4990 - Topics in:

Credits: 1-4

Max Credit (Max. 8)

Special topics pertaining to renewable natural resource management. Intended to accommodate instruction in various specialized subjects not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Dual Listed RNEW 5990.

Prerequisite: consent of the instructor to pursue study of the topic.

RNEW5200 - Spatial Analysis of Watersheds and Ecosystems

Credits: 3

Covers topics related to analysis of spatial and temporal processes at watershed and ecosystem scales using Geographic Information Systems (GIS). Topics include land classification and suitability analysis interpolation techniques, terrain analysis, model integration, and visualization. Sources of potential error and ramifications are examined.

Prerequisite: GEOG 4210 or equivalent.

RNEW5400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness as well as management strategies for invasive plant species.

Cross Listed AECL 5400.

Dual Listed RNEW 4400.

Prerequisite: LIFE 3400.

RNEW5500 - Stable Isotope Ecology

Credits: 3

Application of stable isotope measurements to organismal and systems ecology. Lectures address the theory underlying the use of stable isotopes at natural abundance levels as tracers and integrators of important physiological and ecological processes. Laboratory exercises provide hands on experience with stable isotope ratio measurements.

Prerequisite: graduate classification in a natural science or agriculture discipline.

RNEW5540 - Shrubland Ecology

Credits: 3

Ecology of shrub-dominated lands and shrub species in grasslands. Location, importance and environmental constraints of shrub distributions. Topics include herbivory, woody plant invasions, competitive interactions, monitoring and population dynamics. Emphasizes familiarity with scientific literature.

Prerequisite: RNEW 3000, BOT 4700.

RNEW5545 - Shrub Ecology Trip

Credits: 2

Field study in North American shrublands of western US ecosystems. Participants learn from researchers, managers, field activities, required readings and written assignments. Participants will be camping and a fee is required.

Prerequisite: RNEW 5540.

RNEW5730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms. Lecture with inclusive hands-on laboratory.

Cross Listed BOT 4730/BOT 5730.

Dual Listed RNEW 4730.

Prerequisite: one course in physiology and one course in ecology.

RNEW5990 - Topics In Renewable Resources

Credits: 1-4

Max Credit (Max. 8)

Special topics pertaining to renewable natural resource management. Intended to accommodate instruction in various specialized

subjects not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Dual Listed RNEW 4990.

Secondary Education

EDSE1000 - Exploring Hot Topics in Secondary Education

Credits: 2

Academic, content-based course designed for first year students. Focuses on critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry. Themes include diversity and other issues found in Secondary Education (e. g. High Stakes testing, inclusion, or school violence). Faculty member's expertise areas within secondary education will determine appropriate themes.

USP Code [L,<>(none)]

EDSE1010 - Field Experience for Prospective Elementary and Secondary Teachers

Credits: 1-4

Introductory course in teacher education. Provides an overview of the theory and practice of what is required to become and be a teacher. An initial practicum is included.

Cross Listed EDEL 1010.

Former Course Number [EDCI 1010]

Prerequisite: sophomore standing.

EDSE1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

EDSE2000 - Undergraduate Seminar in (TOPIC)

Credits: 1-2

Max Credit (Max. 8)

Designed to discuss strategies and instructional activities used in content courses the students take and to be a linkage between what the prospective teachers study and what they will teach. It provides the opportunity to discuss appropriate activities, strategies and programs in a teaching area related to the content area being studied.

Cross Listed EDEL 2000.

Former Course Number [EDCI 2000]

Prerequisite: consent of instructor.

EDSE3010 - Contemporary Philosophies in Technical Education

Credits: 1-3

Max Credit (Max. 3)

Provides industrial education students with a sound contemporary philosophy for curriculum development and instructional planning. Emphasis is placed on current programs, philosophies, history, youth group development and advisory committee activities.

When Offered (Offered through UW/CC)

Former Course Number [EDIE 3010]

Prerequisite: 8 credit hours of education course work.

EDSE3020 - Facilities and Advisery Management

Credits: 2-4

Max Credit (Max. 4)

Students engage in identifying RFP applications and apply for grants that are geared toward the CTE classroom, as well as the process of assembling and managing an advisory committee, which is a required component of all CTE programs. It prepares CTE Teachers for the non-teaching requirements associated with CTE programs.

Prerequisite: junior standing in Technical Education.

EDSE3030 - Construction Technology

Credits: 3

Introduces students to the principles and practices of the construction industry, through a combination of classroom and laboratory experiences. In addition, this course outlines the construction content area as taught in the technical education classroom and emphasizes development of curricula materials.

When Offered (Offered through UW/CC)

Prerequisite: 12 hours of technical content courses from an approved list.

EDSE3040 - Energy and Power Technology

Credits: 3

A conceptual analysis and synthesis of energy requirements and sources, with emphasis on alternate energy systems. Analysis of energy conversion and the application of mechanical, fluid, thermal and electrical power systems.

When Offered (Offered through UW/CC)

Former Course Number [EDIE 3040]

Prerequisite: PHYS 1050 or PHYS 1110.

EDSE3050 - Communications Technology

Credits: 3

Designed to give students knowledge and experience in the major concepts of graphic communications, including: communication, design, image generation and production practices of modern industry. Also covers curricular and pedagogical concerns related to teaching communications technology at the secondary school level.

When Offered (Offered through UW/CC)

Former Course Number [EDIE 3050]

Prerequisite: 12 credit hours of technical content courses from an approved list.

EDSE3270 - Subject Matter Specific Methods I: Secondary English Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in English Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4270.

EDSE3271 - Subject Matter Specific Methods I: Secondary Mathematics Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Mathematics Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4271.

EDSE3272 - Subject Matter Specific Methods I: Art Education K-12

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Art Education K-12.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4272.

EDSE3273 - Subject Matter Specific Methods I: Secondary Social Studies Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Secondary Social Studies Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4273.

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

1621

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

EDSE3276 - Subject Matter Specific Methods I: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Modern Language Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4276.

EDSE3277 - Subject Matter Specific Methods I: Secondary Technology Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Industrial Technology Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4277.

EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Agriculture Education.

USP Code [WC<>(none)]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4278.

EDSE3540 - Teaching Reading and Study Strategies in the Content Areas

Credits: 2-4

Provides students majoring in secondary education programs with a knowledge of reading factors as they relate to various disciplines. Content includes estimating students' reading ability, techniques for vocabulary development, questioning strategies, and developing reading related study skills.

Former Course Number [EDCI 3540]

Prerequisite: junior standing and minimum 12 hours in discipline area.

EDSE4070 - Educational Trends in (TOPIC)

Credits: 1-3

Max Credit (Max. 6)

Provides reading, discussion, research and appraisal of new methods, materials, equipment and experimental programs concerned with improvement of education as it pertains to areas of secondary education: agricultural, art, English, mathematics, middle school, modern language, science, and social studies education. The maximum allowable credit applies to the total offerings under this number.

Former Course Number [EDAS 4070, EDVE 4070]

Prerequisite: 6 hours of education.

EDSE4270 - Subject Matter Specific Methods II: Secondary English Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in English Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3270/EDCI 5250.

EDSE4271 - Subject Matter Specific Methods II: Secondary Mathematics Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Mathematics Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3271/EDCI 5250.

EDSE4272 - Subject Matter Specific Methods II: Art Education K-12

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Art Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3272/EDCI 5250.

EDSE4273 - Subject Matter Specific Methods II: Secondary Social Studies Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Social Studies Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3273/EDCI 5250.

EDSE4274 - Subject Matter Specific Methods II: Music Education K-12

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Music Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3274/EDCI 5250.

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

EDSE4276 - Subject Matter Specific Methods II: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Modern Language Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA;

2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3276/EDCI 5250.

EDSE4277 - Subject Matter Specific Methods II: Secondary Technology Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Industrial Technology Education.

USP Code [WC<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3277/EDCI 5250.

EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Agriculture Education.

USP Code [(none)<>COM3]

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3278/EDCI 5250.

EDSE4279 - Subject Matter Specific Methods II: Biological Science Methods for Agricultural Education Majors

Credits: 3

Provide meaningful learning in preparation for a professional career in a secondary school setting, teaching life science courses in addition to agriculture classes. Students will be engaged as active participants in discussions and hands-on science activities. The course is designed to offer experiences to enhance pedagogical content knowledge as well as skills to successfully make science education accessible for all students. Special attention will be given to creating a learning environment that fosters the development of inquiry skills and safety both in the classroom and field settings.

Prerequisite: Grade of C or better in EDST 3100, 2.750 minimum GPA in major content courses, grade C or better in specific content courses required in the Secondary Biology Endorsement.

EDSE4280 - Subject Matter Specific Methods: Computer Science

Credits: 2

Introduction of content and pedagogy in Computer Science Education. Includes pedagogy, pedagogical content knowledge, and contact curriculums for teaching computer science at secondary school levels. A variety of instructional procedures will be employed including group work, modeling, lab work, micro-teaching, and lecture/demonstration.

Prerequisite: COSC 3100 or concurrent enrollment and COSC 3020.

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

EDSE4900 - Best Practices Active Learning

Credits: 1

This course is a seminar aimed at discussing active learning in large-scale classrooms and best practices for engaging students. The target audience for this course are post-baccs, education majors, and undergraduates serving as learning assistants in large classrooms. Having some in-class teaching experience is advantageous but not necessary.

Dual Listed EDSE 5900.

Restricted Restricted to LAMP Scholar Learning Assistants and Supplemental Instructors (LeaRN Program).

EDSE4975 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction. EDEL 4975.

Cross Listed EDEL 4975.

Former Course Number [EDCI 4975]

Prerequisite: 12 hours of education courses and consent of instructor.

EDSE5900 - Best Practices Active Learning

Credits: 1

This course is a seminar aimed at discussing active learning in large-scale classrooms and best practices for engaging students. The target audience for this course are post-baccs, education majors, and undergraduates serving as learning assistants in large classrooms. Having some in-class teaching experience is advantageous but not necessary.

Dual Listed EDSE 4900.

Restricted Restricted to LAMP Scholar Learning Assistants and Supplemental Instructors (LeaRN Program).

Science Education

ESCI5100 - Science Education Research Colloquium

Credits: 1

The overarching goal of this graduate course is for Ph. D. students to be exposed to the most recent research methods, results, and implications of research on science education.

Prerequisite: Graduate standing.

ESCI5200 - Contemporary Science Education Research

Credits: 3

Develop a deep understanding of, and become conversant in, the current trends in research methodology and contemporary scholarly literature in science education research.

Prerequisite: Graduate standing.

ESCI5250 - Cognition and Learning in Science and Math Education

Credits: 3

Develop a deep understanding of, and become conversant in, the current learning sciences literature of cognition and learning focusing on how students learn science and mathematics.

Prerequisite: Graduate standing.

ESCI5300 - Research in Science Education I

Credits: 3

Students develop a deep understanding of, and become conversant in, contemporary research methods in science education. This course focuses on identifying research questions based on gaps in the literature, designing strategies to collect quantitative and/or qualitative evidence, and conducting the first phases of data collections and analysis.

Prerequisite: Graduate standing.

ESCI5350 - Research in Science Education II

Credits: 3

Part two of the Research in Science Education sequence. Building on the research started in ESCI 5300, students finalize analysis, develop findings, conclusions and implications, and create a viable journal article manuscript.

Prerequisite: Graduate standing and ESCI 5300.

ESCI5600 - History and Philosophy of Science and Mathematics Education

Credits: 3

Focuses on key individuals, theories and events of the past century which have contributed to the formation of current views, ideas, theories, and practices in mathematics and science education.

Prerequisite: Graduate student status.

ESCI5610 - Informal Science Learning Environment

Credits: 3

This course examines the literature, issues and opportunities related to informal science education environments, such as museums, planetariums, and extracurricular K-12 organizations.

Prerequisite: Graduate standing.

ESCI5630 - Science Teacher Ed & K12 Professional Development

Credits: 3

Addresses philosophies, research, theories and current issues related to pre-service science teacher education and in-service science teacher professional development. This course fulfills core requirements in the Science Education PhD program option.

Prerequisite: Graduate student status.

Social Work

SOWK1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical, and cultural aspects of leadership, grassroots women's leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed GWST 1900.

USP Code [O,L<>(none)]

Prerequisite: one course in women's studies.

SOWK2000 - Introduction to Social Work

Credits: 3

Introduces social work and social welfare through an overview of the history, philosophy, ethics, values, methods, and fields of practice to generalist social work.

Former Course Number [3000]

Prerequisite: Sophomore standing or higher and completion of USP-C2 with a grade of C or higher.

SOWK3530 - Human Behavior and the Social Environment I

Credits: 3

Covers theories and knowledge of human bio-psycho-social-spiritual development and social interactions within a systems framework. Introduces theories of individuals and families and their development. Paradigms of culture, marginalization and oppression are examined.

Prerequisite: admitted social work major status.

SOWK3540 - Human Behavior and Social Environment II

Credits: 3

Covers theories and knowledge of human bio-psycho-social-spiritual development and social interactions within a systems framework, with a focus on groups, communities, organizations and institutions.

Prerequisite: SOWK 3530 with a C or better and admitted social work major status.

SOWK3630 - Generalist Social Work Practice I, Individual and Families

Credits: 3

Introduces generalist social work practice at all systems' levels, with focus on individuals and families. It covers the nature of social work practice, theoretical perspectives, ethics and values, engagement, assessment, intervention and evaluation processes and skills.

Prerequisite: admitted social work major status.

SOWK3640 - Generalist Social Work Practice II, Groups

Credits: 3

Focuses on group work within the generalist social work perspective, covering theoretical perspectives, ethics and values, and problem-solving skills applied to task and treatment groups.

Prerequisite: SOWK 3630 and SOWK 3530 with a C or better and admitted major status.

SOWK3645 - Ethical Social Work Practice

Credits: 3

Focuses on the ethical principles that undergird the practice of social work, addresses how to practice ethically, and explores the process of ethical decision-making. Social work practice with various client systems will be considered, as well as practice in

varied settings.

SOWK3650 - Generalist Social Work Practice III; Communities and Organizations

Credits: 3

Teaches engagement, assessment, intervention and evaluation with organizations, communities and institutions within the generalist social work perspective.

Prerequisite: SOWK 3630 with a C or better; SOWK 3540 pre or concurrent; admitted social work major status.

SOWK4020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed WIND 4020.

Dual Listed SOWK 5020

USP Code [CS<>COM3]

Prerequisite: WIND 2100 or WB/COM2.

SOWK4060 - Diversity and Difference in Social Work Practice

Credits: 3

Practice class examines social works' roles and issues related to human diversity. Social work values and ethics and social and economic justice are explored throughout.

USP Code [D<>(none)]

Prerequisite: admitted social work major status.

SOWK4083 - Social Work and Health Care

Credits: 3

Identifies and addresses social work issues related to health, such as medical social work, public health, and health promotion.

Dual Listed SOWK 5083.

Prerequisite: SOWK 3630 and Admitted Major status; a WB or COM2 course and junior standing for non-social work majors.

SOWK4084 - Professional Social Work Practice: Alcohol and Other Drugs

Credits: 3

Examines alcohol and substance abuse and social work's role in varied practice settings. Issues explored include medical considerations in alcohol abuse, social and familial challenges, as well as social work values and ethics, and concern for populations-at-risk.

Dual Listed SOWK 5084.

Prerequisite: SOWK 3630 and Admitted Major status; a WB or COM2 course and junior standing for non-social work majors.

SOWK4480 - Introduction to Aging Services

Credits: 3

Surveys issues in aging and social work's role, status and function in the field of gerontology.

Prerequisite: SOWK 2000 or consent of instructor.

SOWK4550 - Child Welfare Services

Credits: 3

Examines issues of child and family welfare in the context of national, state, and local policy and practice. Social and economic justice are examined as they relate to interventions with children and families.

Dual Listed SOWK 5550.

Former Course Number [3550]

Prerequisite: SOWK 2000; SOWK 3530.

SOWK4560 - Social Work Research

Credits: 3

Introduces social work research and practice evaluation. Prepares students to use research in practice.

Prerequisite: STAT 2050 or STAT 2070 with a grade of C or better and admitted social work major status.

SOWK4570 - Research-Informed Practice

Credits: 3

Learn about and engage in methods of research applicable to their social work practice. Competence in methods such as single system design and program evaluation will be assessed in this course.

USP Code [WC<>COM3]

Prerequisite: SOWK 4560 with a C or better and admitted social work major status.

SOWK4780 - Seminar: _____

Credits: 1-9

Max Credit (Max. 15)

Consideration of special topics of current interest in social work. May be repeated for a maximum of 15 hours credit when the seminar topic is different.

Prerequisite: advanced major status; or consent of instructor and junior standing for non-social work majors.

SOWK4850 - Human Rights, Social Justice and Social Policy

Credits: 3

Examines human rights, social welfare policy, and social, political and economic justice, as well as systems that oppress and create injustice, both in the US and internationally. A focus of the course will be the analysis of social welfare policy as it affects social justice issues.

Prerequisite: SOWK 4060, ECON 1010, and admitted social work major status.

SOWK4881 - International Social Welfare and Social Development

Credits: 3

Examines the basic framework of social welfare analysis and social development programming in the international arena, employing a multinational comparative analysis approach to explore the wide array of responses to social need across the globe. Students employ multinational comparative analyses to an area of social concern.

Cross Listed INST 4881.

Dual Listed SOWK 5881

USP Code [G<>(none)]

Prerequisite: POLS 1000; ECON 1010 recommended.

SOWK4980 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Consideration of topics of current social work interest in consultation with a member of the faculty.

Prerequisite: advanced major status and consent of instructor.

SOWK4990 - Social Work Practicum

Credits: 5-10

Max Credit (Max. 10)

Represents the culmination of preparation for entry level generalist social work practice. Supervised practice in the knowledge, values and skills learned in the classroom.

Prerequisite: SOWK 3640, SOWK 3650 and application to the field program.

SOWK4991 - BSW Field Seminar I

Credits: 2

Develops and supports student integration of classroom and field practicum experiences in a final demonstration of competencies for the beginning practitioner. This course is taken in Fall, concurrent with SOWK 4990, Field Practicum.

Prerequisite: concurrent enrollment in SOWK 4990.

SOWK4992 - BSW Field Seminar II

Credits: 2

Develops and supports student integration of classroom and field practicum experiences in a final demonstration of competencies for the beginning practitioner.

Prerequisite: taken concurrently with SOWK 4990, Field Practicum.

SOWK5000 - Topics: Social Work

Credits: 1-3

Max Credit (Max. 15)

Various advanced topics in social work will be presented. May be repeated for a maximum of 15 hours when offered for different topics.

Prerequisite: bachelor's degree; 18 hours in socio/behavioral sciences preferred.

SOWK5020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed WIND 5020.

Dual Listed SOWK 4020

SOWK5081 - Assessment and the DSM

Credits: 3

Through a psychiatric social work lens students will become familiar with the process of conducting a diagnostic interview, writing psychiatric assessment including a mental status exam and formulating a diagnosis using the Diagnostic and Statistical Manual of Mental Disorders. This course assumes some knowledge of mental health and mental illness.

Prerequisite: graduate standing.

SOWK5084 - Professional Social Work Practice: Alcohol and Other Drugs

Credits: 3

Examines alcohol and substance abuse and social work's role in varied practice settings. Issues explored include medical considerations in alcohol abuse, social and familial challenges, as well as social work values and ethics, and concern for populations-at-risk.

Dual Listed SOWK 4084.

Prerequisite: SOWK 3630 and Admitted Major status; a WB or COM2 course and junior standing for non-social work majors.

SOWK5100 - Principles and Philosophy of Social Work

Credits: 3

Explores the history, traditions, ethics, purpose, philosophy, and knowledge base of the social work profession. Introduces the 10 core competencies of the MSW curriculum and the generalist social work perspective in rural settings using the problem-solving approach.

Prerequisite: admission into the MSW program.

SOWK5115 - Social Welfare Policy: Human Rights and Social Justice

Credits: 3

Examines human rights and social and economic justice from a social work perspective, as well as systems that oppress and create injustice in the US and internationally.

Prerequisite: admission to the MSW program.

SOWK5120 - MSW Foundation Field Seminar I

Credits: 1

Develops and supports student integration of classroom and field practicum experiences in a seminar-style discussion of core competencies for the foundation year MSW student.

Prerequisite: taken concurrently with SOWK 5450.

SOWK5121 - MSW Foundation Field Seminar II

Credits: 1

Develops and supports student integration of classroom and field practicum experiences in the 2nd seminar-style discussion course of core competence for the foundation year MSW student.

Prerequisite: taken concurrently with SOWK 5460.

SOWK5200 - Human Behavior and the Social Environment I

Credits: 3

A theoretical examination of human behavior and the social environment, focusing on individuals, families and small groups in the context of human life cycle development. Emphasizes issues of human diversity and social and economic justice in the context of the environment.

Prerequisite: admission into the MSW program and either completion of SOWK 5100 or concurrent enrollment.

SOWK5210 - Human Behavior and the Social Environment II

Credits: 3

A theoretical examination of human behavior in the social environment, focusing on groups, communities, organizations and institutions. Emphasizes issues of human diversity and social economic justice.

Prerequisite: SOWK 5200.

SOWK5300 - Advanced Social Justice Practice

Credits: 3

Immerses beginning students into critical social work theory and social justice practice from a strengths-based perspective, emphasizing diversity/ethics/values/knowledge relative to clients and human service setting in a frontier state, emphasizing a system's framework. Requires beginning mastery of engagement, assessment, intervention, and evaluation.

Prerequisite: Admission into the MSW program.

SOWK5310 - Generalist Social Work Practice II

Credits: 3

Applies social work skills, values and knowledge to the engagement, assessment, intervention and evaluation processes with groups, organizations and communities. Emphasis on ethics and diversity in practice.

Prerequisite: admission into the MSW program; must have completed SOWK 5300.

SOWK5400 - Social Work Generalist Research Methods

Credits: 3

Covers design, implementation and interpretation of research in social work practice settings. Presents methods of program evaluation and practice research at all system levels using both quantitative and qualitative research methodologies.

Prerequisite: admission into the MSW program.

SOWK5450 - Field Practicum I

Credits: 3

Provides the opportunity for students to learn through experience the skills of entry-level generalist social work practice. The course consists of supervised practice, in a community service agency, of social work knowledge, values and skills learned in the classroom.

Prerequisite: Students must have completed, or be concurrently enrolled in, SOWK 5100, SOWK 5200, SOWK 5300, and SOWK 5400.

SOWK5495 - Social Work Research and Analysis

Credits: 3

Designed for MSW advanced standing students to address research methods and analysis in the context of the generalist problemsolving approach.

Prerequisite: admission to the MSW advanced standing program; concurrent enrollment in SOWK 5499.

SOWK5499 - Advanced Generalist Social Justice Practice

Credits: 3

Initiates professional development from BSW practitioner to MSW intergrated advanced generalist practitioner. Course covers theory and practice from a strengths-based perspective, ethics, and values, social justice practice with emphasis on engagement, assessment, intervention, and evaluation. Focus on theory-informed, evidence-based practice models.

Prerequisite: Admission to the MSW advanced standing program.

SOWK5500 - Advanced Policy: Advocacy and Social Action

Credits: 3

Advanced generalist course builds on foundation and advanced year courses to prepare students to conduct comparative and advanced policy analysis and develop practice/ advocacy components. Emphasis is given to policy practice issues that address economic and social justice, diversity, populations at risk, and ethics and values.

Prerequisite: SOWK 5310 and SOWK 5115 or advanced standing.

SOWK5550 - Child Welfare Services

Credits: 3

Examines issues of child and family welfare in the context of national, state, and local policy and practice. Social and economic justice are examined as they relate to interventions with children and families.

Dual Listed SOWK 4550.

Prerequisite: admission to advanced standing or SOWK 5100 and SOWK 5200.

SOWK5600 - Advanced Generalist Practice

Credits: 3

Advanced applications of generalist problem-solving theories and skills in working with individuals and groups in the context of their environment. Issues of ethics, rural practice, diversity, and evaluations of practice addressed throughout the course.

Prerequisite: SOWK 5300 and SOWK 5310 or advanced standing.

SOWK5700 - Advanced Theories and Practice with Children and Families

Credits: 3

Advanced applications of generalist problem-solving theories and skills in working with children and families in the context of their environment. Issues of ethics, rural practice, diversity, and evaluations of practice addressed throughout the course.

Prerequisite: SOWK 5300 and SOWK 5310 or advanced standing.

SOWK5705 - Generalist Practice III: Group

Credits: 3

This course builds on students' generalist practice knowledge by enhancing their conceptual base and practice skills of social group work, encompassing the continuum from treatment to task oriented groups. The course content highlights the strengths oriented values of social group work and its potential for mutual aid and empowerment.

Prerequisite: SOWK 5300 and SOWK 5310 or advanced standing.

SOWK5720 - Advanced Generalist Practice: Community and Rural Practice

Credits: 3

Emphasizes advanced understanding and application of models of rural community practice for promotion of well-being of client systems. Rurality and diversity/difference will be highlighted in this course. Models taught are appropriate to the social work profession, based on ethical considerations, cultural competency, and the strengths perspective.

Prerequisite: SOWK 5310 or advanced standing.

SOWK5750 - Applied Research: Practice Evaluation

Credits: 3

This research-informed practice course focuses on the theory and use of small system design and program evaluation to evaluate one's social work practice.

Prerequisite: SOWK 5400.

SOWK5755 - Practice Evaluation

Credits: 1-12

Max Credit (Max. 12)

Complete a non-thesis Plan B practice evaluation paper of quality, working with a committee structure. Must complete a minimum of two credit hours of 5755.

Prerequisite: SOWK 5750; or advanced standing status and SOWK 5495.

SOWK5795 - Rural Health Care Seminar

Credits: 3

Examines social work and rural health and medical care for individuals, families and larger systems through policy, practice, and research. Includes a focus on the health and health care of older adults.

Prerequisite: consent of instructor, graduate standing, participation in WYO HealthCARE Inter-disciplinary rural training grant.

SOWK5800 - Advanced Seminar in Social Work

Credits: 1-3

Max Credit (Max. 15)

Consideration of special topics of current interest in social work. May be repeated for a maximum of 15 hours when the topic of the seminar is different.

Prerequisite: graduate standing and consent of instructor.

SOWK5810 - Working with Children and Families in the Schools

Credits: 3

Enhances knowledge, skills, and values of the generalist social worker serving children of diverse backgrounds and their families in the school and its environment, preparing the social worker for a leadership role in a rural school setting.

Prerequisite: graduate standing.

SOWK5820 - School Social Work

Credits: 1

Builds on the skills developed in SOWK 5810, advancing the knowledge, values and skills necessary for school social work. Students integrate observations of school social work settings with theory and practice, and personal evaluation, within this seminar. Public school law and policy are highlighted.

Prerequisite: successful completion of SOWK 5810.

SOWK5850 - Advanced Field Practicum

Credits: 2-10

Max Credit (Max. 10)

Provides advanced generalist social work practice experience in a community human service organization. Emphasizes core competencies and advanced generalist practice behaviors in social work ethics, values, theory, skills, practice and research in relation to social work with individuals, groups, families, organizations, and communities.

Prerequisite:

SOWK5855 - MSW Advanced Field Seminar I

Credits: 1

Supports the advanced year MSW student's experience in the field practicum. This course is taken concurrently with SOWK 5850.

Prerequisite: taken concurrently with SOWK 5850.

SOWK5856 - MSW Advanced Field Seminar II

Credits: 1-8

Max Credit (Max. 8)

Supports the advanced year MSW student's experience in the field practicum. To be taken concurrently with SOWK 5850, spring semester.

Prerequisite: SOWK 5855; concurrent with SOWK 5850.

SOWK5881 - International Social Welfare and Social Development

Credits: 3

Examines the basic framework of social welfare analysis and social development programming in the international arena, employing a multinational comparative analysis approach to explore the wide array of responses to social need across the globe. Students employ multinational comparative analyses to an area of social concern.

Cross Listed INST 5881.

Dual Listed SOWK 4881

Prerequisite: POLS 1000; ECON 1010 recommended.

SOWK5887 - American Indian Health

Credits: 3

Studies the impact of federal policy on development of American Indian Health programs and the current status of American Indian health.

Prerequisite: admission into graduate program.

SOWK5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SOWK5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SOWK5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Scholarly research that contributes to the social work profession and applied social science fields. Student designs and carries out original research under the supervision of a social work faculty member. Thesis research is done as an individual research project.

Prerequisite: enrollment in a graduate degree program.

SOWK5975 - Independent Study

Credits: 1-3
Max Credit (Max. 3)

In-depth exploration of a social work topic in consultation with a social work faculty member.

Prerequisite: consent of instructor.

Sociology

SOC1000 - Sociological Principles

Credits: 3
Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP Code [CS<>H]

SOC1100 - Social Problems and Issues

Credits: 3
Explores various approaches to defining and identifying social problems and applies basic sociological concepts and methods to analysis of selected social problems and issues.

USP Code [I,L<>(none)]

SOC1350 - American Indians in Contemporary Society

Credits: 3
Survey lecture course. Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture are explored.

Cross Listed NAIS 1350.
USP Code [CS,D<>(none)]

SOC2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, STAT 2070, STAT 4220, STAT 5520.

Cross Listed STAT 2070.

USP Code [QB<>Q]

Former Course Number [2000]

Prerequisite: MATH 1000, MATH 1400 or equivalent.

SOC2350 - Race and Ethnic Relations

Credits: 3

Examines social relations among majority and minority groups by devoting particular attention to race and ethnic relations in the U. S. Encompasses sociological approach to this topic, which emphasizes power structures, economic relationships and cultural traditions historically and today. Devotes attention to social psychological issues, such as prejudice, and social structural issues, such as class inequality.

USP Code [D<>(none)]

Prerequisite: SOC 1000.

SOC2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed CRMJ 2400.

Former Course Number [3300]

Prerequisite: SOC 1000.

SOC3000 - Social Change

Credits: 3

Studies causes, processes and consequences of structural transformations in historical and comparative perspective. Reviews and assesses forces that account for sociological changes. Explores social change globally as well as in the U. S.

Cross Listed INST 3000.

USP Code [G<>(none)]

Former Course Number [2100]

Prerequisite: SOC 1000 and junior standing.

SOC3100 - Chinese Society

Credits: 3

Reviews origins and consequences of Chinese revolution in comparative and cultural perspectives. Discusses influence of

historical traditions and social structure on individual lives and behavioral patterns.

Cross Listed INST 3100.

USP Code [G<> (none)]

Prerequisite: SOC 1000.

SOC3110 - Self and Society

Credits: 3

Considers social behavior at the micro level, emphasizing the influence of society on the individual's thoughts, emotions and behaviors. Topics such as the development of the self over the life course, the self in social interaction, and the role of attitudes and emotions in social interaction are discussed.

Former Course Number [2110]

Prerequisite: SOC 1000 or PSYC 1000.

SOC3140 - Sociology of the Family

Credits: 3

Two major themes of the course are change experienced by the family institution and the centrality of the family in America today. Subjects that are covered include: A brief history of the family in the U. S. , kinship, family structure, mate-selection, marriage, divorce and socialization.

Former Course Number [4100, 4140]

Prerequisite: SOC 1000.

SOC3150 - Collective Behavior and Social Movements

Credits: 3

Analyzes and explains fads, fashions, rumors, riots and mass behavior in light of theoretical frameworks. Studies social movements including blacks, women, labor, religions and students.

Prerequisite: SOC 1000.

SOC3180 - Sociological Research Methods

Credits: 3

Examine the design and conduct of social research. Students will complete a research prospectus, including formulating a sociological research question, developing hypotheses, conducting a literature review, surveying prospective data, speculating about potential findings, and discussing implications.

Former Course Number [3090, 4095]

Prerequisite: STAT 2070/SOC 2070 or STAT 2050 and SOC 1000.

SOC3200 - Sociology of Religion

1642

Credits: 3

Introduces various ways sociologists interpret religion. Explores the nature of relationships between religion and society.

Prerequisite: SOC 1000.

SOC3250 - Juvenile Delinquency

Credits: 3

Considers the nature of delinquency, including an analysis of treatment methods and the juvenile justice system.

Cross Listed CRMJ 3250.

Prerequisite: CRMJ 2400/SOC 2400.

SOC3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed CRMJ 3400.

Former Course Number [4200]

Prerequisite: SOC 1000.

SOC3500 - Sociology of Gender

Credits: 3

Explores gender through a cultural and structural approach. The cultural approach emphasizes the variability in social expectations for men and women across time and place; the structural approach analyzes the effect of social institutions such as family, government, education, and the economy of gender.

Prerequisite: SOC 1000.

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

SOC3605 - Sociology of Education

Credits: 3

An introductory overview of the principal areas of inquiry in the field. Students learn relevant theories and concepts, principal methodological approaches as well as important current issues in education. Comparative analysis may focus on historical comparisons, national/ global comparisons, U. S. regional, and/or variant educational systems at the local level.

Prerequisite: SOC 1000.

SOC3640 - Social Inequality

Credits: 3

Focuses on the structure and consequences of unequal access to political, economic and social benefits in U. S. society and the world. This course critically examines institutional arrangements that perpetuate and are supported by inequality and stratification, as well as patterns of social mobility.

Former Course Number [4000, 4050]

Prerequisite: SOC 1000.

SOC3880 - Political Sociology

Credits: 3

Study of political theory, political organization, political mobilization, the state, nation-building, national identity, post-nationalism, the relationship between the state and markets, historic formation of the nation-state, and the changing role of the state in a global context.

Prerequisite: SOC 1000.

SOC3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed INST 3910.

Former Course Number 4110

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

SOC4020 - Sociology of Work

Credits: 3

Examines social organization of work-especially in response to change in technology, demands for equal opportunity, size and goals of firms and desires for meaningful work. Historically and comparatively analyzes work-life experiences shaping of labor markets and role of collective action. Explores impact of the labor process on distribution of society's material and symbolic rewards.

Dual Listed SOC 5020.

Former Course Number [4560]

Prerequisite: SOC 1000, MGT 3210 or ECON 1010.

SOC4160 - Sociology of Aging

Credits: 3

The process of aging from the individual to the societal level is the focus of the course. Consequences of this process such as the increase in the number of elderly, retirement and health are examined from the major social institutions, the relationships between these institutions and American society as a whole.

Dual Listed SOC 5160.

Former Course Number [4150]

Prerequisite: 6 hours of sociology (including SOC 1000) and at least junior standing.

SOC4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed CRMJ 4350.

Dual Listed SOC 5350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

SOC4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed INST 4370.

USP Code [G<>(none)]

Prerequisite: SOC 1000 and junior standing or SOC 3000.

SOC4440 - Deviance and Social Control

Credits: 3

In-depth examination of theory and research on the social construction and social control of deviance.

Dual Listed SOC 5440.

Prerequisite: 9 hours of SOC courses and upper division standing.

SOC4500 - Sociology of Organizations

Credits: 3

Complex organizations have been described as the dominant feature of modern societies. Organized on the basis of bureaucratic modes of administration, they dominate contemporary societal institutions, such as the economy, the polity, education, religion, and the military. This course investigates basic structures and processes of all types of complex organizations.

Prerequisite: 6 hours of SOC including SOC 1000 and junior/senior or graduate student standing.

SOC4650 - Urban Sociology

Credits: 3

Considers growth of metropolis and its impact upon modern life.

Dual Listed SOC 5650.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: SOC 1000 and junior standing.

SOC4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed CRMJ 4705, INST 4705, and POLS 4705.

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

SOC4715 - Sociological Theory

Credits: 3

Examines the emergence and development of sociological theory in the writings of thinkers such as Marx, Durkheim, and Weber. Explores continuities and discontinuities between the classical period of sociological theory and contemporary schools such as functionalism, conflict theory, neo-Marxian theories, symbolic interactionism, phenomenology, and rational choice/exchange theory.

Dual Listed SOC 5715.

Former Course Number [3700, 3900]

Prerequisite: 9 credit hours of sociology, including SOC 1000.

SOC4750 - Sociology Internship

Credits: 1-12

Integrates practical experience with academic knowledge. Students participate in specifically assigned duties and observe broader

activities of the sponsoring organization, and reflect upon these experiences through written assignments.

Former Course Number 4970

Restricted Junior Standing

Prerequisite: 2.5 cumulative GPA, completion of at least 6 upper division hours in SOC courses and consent of instructor. Registration for more than 6 hours requires permission of the Department Head.

SOC4805 - Global Population Issues

Credits: 3

Considers population structure and demographic transition, with applications to topics such as global population growth, population aging, health, family, migration, urbanization, environment.

Dual Listed SOC 5805.

Prerequisite: SOC 1000 and SOC/STAT 2070 or equivalent.

SOC4850 - Conference

Credits: 1-6

Considers topics of current sociological interest in consultation with a faculty member.

Prerequisite: senior standing and 15 hours of sociology.

SOC4890 - Special Topics in

Credits: 1-3

Accommodates seminar series and/or course offering by visiting faculty whose subject matter is not included in other courses.

Prerequisite: junior standing and consent of department.

SOC4900 - Seminar

Credits: 3-6

Considers special topics of current sociological interest. May be repeated for maximum of 6 hours credit when topic of seminar is different.

Prerequisite: consent of instructor.

SOC5000 - Advanced Sociological Theory

Credits: 3

A consideration of the nature of theory and the major theoretical perspectives in sociology.

Prerequisite: SOC 3900 or equivalent.

SOC5020 - Sociology of Work

Credits: 3

Examines social organization of work-especially in response to change in technology, demands for equal opportunity, size and goals of firms and desires for meaningful work. Historically and comparatively analyzes work-life experiences shaping of labor markets and role of collective action. Explores impact of the labor process on distribution of society's material and symbolic rewards.

Dual Listed SOC 4020.

Prerequisite: SOC 1000, MGT 3210 or ECON 1010.

SOC5050 - Social Inequality

Credits: 3

Focuses on the structure and consequences of unequal access to political, economic and social benefits in the U. S. and the world. Critically examines institutional arrangements that perpetuate and are supported by inequality and stratification, as well as patterns of social mobility.

Former Course Number [4000]

SOC5070 - Statistical Methods for the Social Sciences

Credits: 3

General statistical analyses and their application to the social sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs are utilized. Credit cannot be earned in more than one of the following courses: STAT 2110, STAT 3050, STAT 5050, 5060, STAT 5070, STAT 5080.

Cross Listed STAT 5070.

Prerequisite: one course in statistics (all introductory courses except STAT 2000).

SOC5100 - Advanced Social Research Methods

Credits: 3

In-depth survey of research concepts and methods with emphasis on application that culminates in the designing and execution of a research project by the student.

Prerequisite: SOC 5070 or equivalent.

SOC5140 - The Family

Credits: 3

Two major themes of the course are change experienced by the family institution and the centrality of the family in America today. Subjects that are covered include: A brief history of the family in the United States, kinship, family structure, mate-selection, marriage, divorce, and socialization.

Dual Listed SOC 4140.

Prerequisite: 6 hours in sociology including SOC 1000 and at least junior standing.

SOC5160 - Sociology of Aging

Credits: 3

The process of aging from the individual to the societal level is the focus of the course. Consequences of this process such as the increase in the number of elderly, retirement and health are examined for the major social institutions, the relationships between these institutions and American society as a whole.

Dual Listed SOC 4160.

Prerequisite: 6 hours of sociology including SOC 1000 and at least junior standing.

SOC5200 - Conference

Credits: 1-8

Max Credit (Max. 8)

Consideration of topics of current sociological interest in consultation with a member of the faculty.

Prerequisite: consent of instructor.

SOC5250 - Seminar

Credits: 3

Max Credit (Max. 12)

Consideration of topics of sociological interest in the content of a graduate seminar. Cannot be dual-listed with any course below the 5000 level. May be repeated for credit when the topic of the seminar is different.

Prerequisite: consent of instructor.

SOC5350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed CRMJ 4350.

Dual Listed SOC 4350.

SOC5440 - Deviance and Social Control

Credits: 3

In-depth examination of theory and research on the social construction and social control of deviance.

Dual Listed SOC 4440.

Prerequisite: graduate standing.

SOC5540 - Stratification and Inequality

Credits: 3

In-depth survey of sociological theory and research on substantive issues such as social class structure, racial/ethnic relations, and gender stratification.

Prerequisite: graduate standing.

SOC5650 - Urban Sociology

Credits: 3

Considers growth of metropolis and its impact on modern life.

Dual Listed SOC 4650.

Prerequisite: SOC 1000 or equivalent.

SOC5715 - Sociological Theory

Credits: 3

Examines the emergence and development of sociological theory in the writings of thinkers such as Marx, Durkheim, and Weber. Explores continuities and discontinuities between the classical period of sociological theory and contemporary schools such as functionalism, conflict theory, neo-Marxian theories, symbolic interactionism, phenomenology, and rational choice/exchange theory.

Dual Listed SOC 4715.

Former Course Number [3700]

Prerequisite: 9 credit hours of sociology, including SOC 1000.

SOC5805 - Global Population Issues

Credits: 3

Considers population structure and demographic transition, with applications to topics such as global population growth, population aging, health, family, migration, urbanization, environment.

Dual Listed SOC 4805.

Prerequisite: SOC 1000 and SOC 2070/STAT 2070 or equivalent.

SOC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SOC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 12)

Prerequisite: advanced degree candidacy.

SOC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

The course is designed to provide an enrichment experience in a variety of topics.

Note: Note: Credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: graduate standing.

SOC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

SOC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Soil Science

SOIL2010 - Introduction to Soil Science

Credits: 4
Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP Code [SE<> (none)]

Prerequisite: CHEM 1000 or CHEM 1020.

SOIL3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration, and management of the water balance. Principles of chemigation, computer modeling/monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed PLNT 3000.

Prerequisite: MATH 1400, SOIL 2010.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100 .

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in

the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120 .

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

SOIL4565 - Research: Soil Science

Credits: 1-4

Max Credit (Max. 6)

Library, laboratory, and/or green-house investigations on select research topics. Graduate students will be required to give a presentation to the soil science group on their final product/ report.

Dual Listed SOIL 5565.

Prerequisite: basic training in soil science research.

SOIL4570 - Research-Informed Practice

Credits: 3

Learn about and engage in methods of research applicable to their social work practice. Competence in methods such as single system design and program evaluation will be assessed in this course.

USP Code [WC<>COM3]

Prerequisite: SOWK 4560 with a C or better and admitted social work major status.

SOIL4780 - Seminar:

Credits: 1-9

Consideration of special topics of current interest in social work. May be repeated for a maximum of 15 hours credit when the seminar topic is different.

Prerequisite: advanced major status; or consent of instructor and junior standing for non-social work majors.

SOIL4980 - Independent Study

Credits: 1-3

Consideration of topics of current social work interest in consultation with a member of the faculty.

Prerequisite: advanced major status and consent of instructor.

SOIL5105 - Soil Physics Laboratory

Credits: 2

Students learn methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution, saturated and unsaturated conductivity, soil water potential, and solute breakthrough curve.

Dual Listed SOIL 4105.

Prerequisite: SOIL 2010.

SOIL5110 - Modeling Water and Chemical Transport in Vaso Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

SOIL5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture, and forestry.

Cross Listed MICR 5140.

Dual Listed SOIL 4140.

Prerequisite: SOIL 2010

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant

growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

SOIL5160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical and biological aspects of soils which impact fertilizer fate, uptake and plant growth.

Dual Listed SOIL 4160.

Prerequisite: SOIL 2010.

SOIL5430 - Applied Geostatistics

Credits: 3

Designed to provide general geostatistical analyses and their applications for spatial random variables and functions. Topics covered include variogram, cross validation, kriging, cokriging, sampling strategies, and both non-conditional and conditional simulations. Several geostatistics packages are used to analyze real field data and students are encouraged to use their own data for practicing geostatistical applications. Examples are taken from geohydrology, soil science, crop science, mining, and various environmental studies.

Cross Listed GEOL/ STAT 5430.

Prerequisite: STAT 4020.

SOIL5450 - Field Practicum I

Credits: 3

Provides the opportunity for students to learn through experience the skills of entry-level generalist social work practice. The course consists of supervised practice, in a community service agency, of social work knowledge, values and skills learned in the classroom.

Prerequisite: Students must have completed, or be concurrently enrolled in, SOWK 5100, SOWK 5200, SOWK 5300, and SOWK 5400.

SOIL5460 - Field Practicum II

Credits: 5-10

Max Credit (Max. 10)

Provides the opportunity for students to learn through experience the skills of entry-level generalist social work practice. The course consists of supervised practice, in a community service agency, of social work knowledge, values and skills learned in the classroom.

Prerequisite: SOWK 5450.

SOIL5540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540/SOIL 4540.

Dual Listed MOLB 5540/ECOL 5540.

Prerequisite: MOLB 2210.

SOIL5565 - Research in Soil Science

Credits: 1-4

Max Credit (Max. 6)

Library, laboratory, and/or greenhouse investigations on select research topics. Graduate students will be required to give a presentation to the soil science group on their final product/ report.

Dual Listed SOIL 4465.

Prerequisite: Basic training in soil science research. SOIL 5565 reserved for graduate students.

SOIL5590 - Special Topics in Soil Science

Credits: 1-3

Max Credit (Max. 6)

Special topics in soil science. Offered as an individual or small group basis as appropriate. Intended to accommodate various specialized subjects not offered on a regular basis. Students may enroll in more than one section of this course.

Dual Listed SOIL 4590.

Prerequisite: consent of instructor.

SOIL5600 - Advanced Generalist Practice

Credits: 3

Advanced applications of generalist problem-solving theories and skills in working with individuals and groups in the context of their environment. Issues of ethics, rural practice, diversity, and evaluations of practice addressed throughout the course.

Prerequisite: SOWK 5300 and SOWK 5310 or advanced standing.

SOIL5720 - Advanced Generalist Practice: Community and Rural Practice

Credits: 3

Emphasizes advanced understanding and application of models of rural community practice for promotion of well-being of client systems. Rurality and diversity/difference will be highlighted in this course. Models taught are appropriate to the social work profession, based on ethical considerations, cultural competency, and the strengths perspective.

Prerequisite: SOWK 5310 or advanced standing.

SOIL5750 - Applied Research: Practice Evaluation

Credits: 3

This research-informed practice course focuses on the theory and use of small system design and program evaluation to evaluate one's social work practice.

Prerequisite: SOWK 5400.

SOIL5755 - Practice Evaluation

Credits: 1-12

Max Credit (Max. 12)

Complete a non-thesis Plan B practice evaluation paper of quality, working with a committee structure. Must complete a minimum of two credit hours of 5755.

Prerequisite: SOWK 5750; or advanced standing status and SOWK 5495.

SOIL5850 - Advanced Field Practicum

Credits: 5-10

Max Credit (Max. 10)

Provides advanced generalist social work practice experience in a community human service organization. Emphasizes core competencies and advanced generalist practice behaviors in social work ethics, values, theory, skills, practice and research in relation to social work with individuals, groups, families, organizations, and communities.

Prerequisite: SOWK 5460 or Advanced Standing.

SOIL5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SOIL5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SOIL5959 - Enrichment Studies

1658

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

SOIL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Scholarly research that contributes to the social work profession and applied social science fields. Student designs and carries out original research under the supervision of a social work faculty member. Thesis research is done as an individual research project.

Prerequisite: enrollment in a graduate degree program.

SOIL5975 - Independent Study

Credits: 1-3
Max Credit (Max. 3)

In-depth exploration of a social work topic in consultation with a social work faculty member.

Prerequisite: consent of instructor.

SOIL5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Spanish

SPAN1010 - First Year Spanish I

Credits: 4
Studies fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

SPAN1020 - First Year Spanish II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP Code [(none)<>H]

Prerequisite: SPAN 1010 or two years of high school Spanish.

SPAN1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

SPAN2030 - Second Year Spanish I

Credits: 4

Encompasses reading, grammar review, compositions and conversation.

USP Code [(none)<>H]

Prerequisite: SPAN 1020 or three years of high school Spanish.

SPAN2040 - Second Year Spanish II

Credits: 4

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP Code [(none)<>H]

Prerequisite: SPAN 2030 or three years of high school Spanish.

SPAN2140 - Introduction to Reading

Credits: 3

This course introduces a varied selection of readings and other cultural media in an immersive, intensive language class. Through the study of short stories, media articles, films, etc. , students learn cultural aspects of the Spanish-speaking world and are able to practice and improve their communicative abilities.

USP Code [CH,G<>(none)]

Prerequisite: SPAN 2030 or equivalent.

SPAN3030 - Spanish for Heritage Speakers

Credits: 3

Stresses academic use of the Spanish language by native or near-native speakers, through composition, cultural readings, oral presentations, and digital interactions. This class will prepare native and near-native speakers for Spanish upper division classes. It will review spelling rules, grammatical terminology, dialectal and register differences, and academic vocabulary.

USP Code [(none)<>COM2]

Prerequisite: SPAN 2040 and consent of instructor.

SPAN3040 - Spanish Conversation

Credits: 3

Emphasizes speaking and listening comprehension through structured and monitored individual, pair, small group and class work, while providing socio-cultural competence, vocabulary acquisition and grammar review. Provides enhanced language skills in a manner that otherwise could only be attained through an extended stay in a Hispanic country.

Prerequisite: SPAN 2040; limited to Spanish majors/minors with no previous experience abroad.

SPAN3050 - Third Year Spanish I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP Code [WB<>COM2]

Prerequisite: SPAN 2040.

SPAN3060 - Third Year Spanish II

Credits: 3

Intensively reviews grammar and composition-skill development. Also emphasizes specialized lexicons, written and oral translation, as well as conversational fluency.

Prerequisite: SPAN 3050.

SPAN3070 - Intensive Spanish Abroad

Credits: 3

Max Credit (Max. 9)

Spanish language and cultural study in Spanish-speaking countries led by UW faculty.

Prerequisite: SPAN 2030 or consent of instructor.

SPAN3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed LTST 3080.

USP Code [(none)< >H]

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

SPAN3100 - Survey of Spanish Literature

Credits: 3

Studies Spanish literature from the Middle Ages to the end of the 17th century.

Prerequisite: SPAN 2140 or equivalent. SPAN 3140 strongly recommended.

SPAN3110 - Survey of Contemporary Spanish Literature

Credits: 3

Studies Spanish literature from the 18th to the 21st century. SPAN 3110 is a continuation of SPAN 3100, which studies Spanish literature from the Middle Ages to the end of the 17th century. In order to take 3110, students do not need to take SPAN 3100. SPAN 3140 strongly recommended.

Prerequisite: SPAN 2140 or equivalent.

SPAN3120 - Survey of Spanish American Literature

Credits: 3

Surveys Spanish American literature from colonial period to the present.

USP Code [G< >(none)]

Prerequisite: SPAN 2140 or equivalent.

SPAN3140 - Introduction to Literature

Credits: 3

This course introduces literary analysis by focusing on different genres from the Hispanic tradition. The course is focused on developing interpretation strategies and it introduces key elements of literary criticism. Students are required to produce complex ideas about the texts, give oral presentations, and write essays on the texts read.

Prerequisite: SPAN 2140 or SPAN 3030 or SPAN 3050.

SPAN3200 - Spanish Culture and Civilization

Credits: 3

Studies the evolution of Spanish culture through its main artistic, sociological and intellectual expressions.

Prerequisite: SPAN 2040, SPAN 2140.

SPAN3220 - Spanish-American Cultures in Context

Credits: 3

Introduction to the Spanish-speaking cultures of Latin America and the United States through a historical overview and a focus on contemporary politics and culture.

Prerequisite: SPAN 2040 or SPAN 2140 or consent of instructor.

SPAN3300 - Introduction to Hispanic Linguistics

Credits: 3

Max Credit (Max. 9)

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semiotics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.).

Former Course Number [4310]

Prerequisite: SPAN 3050 or equivalent proficiency.

SPAN3990 - Independent Study

Credits: 1-4

Encompasses books or periodicals of special interest to the student, selected in consultation with a staff member. Includes independent reading and reports.

Prerequisite: SPAN 2030.

SPAN4070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 5070.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectical variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4095 - Advanced Translation

Credits: 3

Max Credit (Max. 6)

A practical approach to translating techniques and elements of oral interpretation.

Prerequisite: SPAN 3060.

SPAN4125 - Spanish-Language Literatures of the Americas

Credits: 3

Max Credit (Max. 9)

Examines Spanish American literature from a wide variety of perspectives: geographical regions (e. g. Caribbean, Andean, greater Mexico), theme (e. g. revolution, borders), period (e. g. Colonial, 19th century), or genre (e. g. poetry, theatre, film, non-fiction).

Prerequisite: SPAN 3050 or equivalent. SPAN 3120 highly recommended.

SPAN4130 - Masterpieces of Spanish Renaissance Literature

Credits: 3

Studies Spanish Renaissance, taking into consideration social, political, economic, religious, philosophical and aesthetic aspects of the culture as a context for and as reflected in the literature.

Dual Listed SPAN 5130.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN4140 - Masterpieces of Spanish Baroque Literature

Credits: 3

Studies Spanish Baroque, taking into consideration social, political, economic, religious, philosophical and aesthetic aspects of the culture as a context for and as reflected in the literature. Also covers relationship between Spanish Renaissance and Baroque.

Dual Listed SPAN 5140.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN4150 - Spanish Romanticism

Credits: 3

Comprehensively studies romantic movement in Spain. Includes close reading and commentary of texts by authors such as Espronceda, Rivas, Zorrilla, Becquer and de Castro.

Dual Listed SPAN 5150.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN4170 - Contemporary Spanish Prose

Credits: 3

Examines contemporary prose fiction of Spain. Studies authors who gained recognition before and after the 1936 Spanish Civil War.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN4180 - Advanced Cultural Studies in Hispanic Lit/Media

Credits: 3

Advanced analysis of Hispanic cultural phenomena. Focus on the Spanish-speaking cultures of Spain or the Spanish-speaking Americas or both. The Texts consulted vary according to instructor and may include the visual arts, such as film, paintings, and performance, academic theory, websites, and other fiction and non-fiction readings.

Dual Listed SPAN 5180.

Prerequisite: SPAN 2140 or equivalent and one 4000-level course.

SPAN4190 - 20th and 21st Century Spanish- American Texts

Credits: 3

Provides students the opportunity to study representative literary texts that reflect the tendencies and trends in 20th and 21st Century Spanish-language works of the Americas.

Dual Listed SPAN 5190.

Prerequisite: 6 hours of Spanish literature at 4000-level.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours

recommended for majors.

USP Code [WC<>COM3]

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

SPAN4260 - The Realist Novel in Spain

Credits: 3

Studies major novelists of 19th century Spain from 1850 until Generation of '98.

Dual Listed SPAN 5260.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN4600 - Special Topics in Spanish

Credits: 1-6

Max Credit (Max. 12)

Presents a variety of significant literature, language, or cultural topics in Latin American, Peninsular, and other Spanish-speaking communities.

Prerequisite: SPAN 3030 or SPAN 3050.

SPAN4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects to meet needs of individual students, designed in consultation with instructor.

Prerequisite: SPAN 3030 or SPAN 3050.

SPAN5070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 4070.

Prerequisite: graduate standing.

SPAN5080 - Spanish Advanced Grammar

Credits: 3

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as

preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 4080.

Prerequisite: graduate standing.

SPAN5090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectical variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 4090.

Prerequisite: graduate standing.

SPAN5100 - Hispanic Thought

Credits: 3

intensive study of a topic, author, or philosophical movement. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature at 4000-5000 level.

SPAN5110 - Peninsular Spanish Literature

Credits: 1-3

Max Credit (Max. 9)

An intensive study of a topic or an author. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature at 4000-5000 level.

SPAN5120 - Spanish American Literature

Credits: 1-3

Max Credit (Max. 9)

An intensive study of a topic or an author. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature.

SPAN5130 - Masterpieces of Spanish Renaissance Literature

Credits: 3

A study of the Spanish Renaissance, taking into consideration social, political, economic, religious philosophical, and aesthetic aspects of the culture as a context for and as reflected in the literature.

Dual Listed SPAN 4130.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5140 - Masterpieces of Spanish Baroque Literature

Credits: 3

Studies of the Spanish Baroque, taking into consideration social, political, economic, religious, philosophical, and aesthetic aspects of the culture as a context for and as reflected in the literature. Also covers the relationship between the Spanish Renaissance and the Baroque.

Dual Listed SPAN 4140.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5150 - Spanish Romanticism

Credits: 3

A comprehensive study of the romantic movement in Spain. Close reading and commentary of texts by representative authors including Espronceda, Rivas, Zorilla, Becquer and de Catstro.

Dual Listed SPAN 4150.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5160 - Graduate Readings

Credits: 1-5

Max Credit (Max. 6)

Prerequisite: graduate standing.

SPAN5170 - Special Problems

Credits: 1-2

Max Credit (Max. 6)

Prerequisite: graduate standing.

SPAN5180 - Advanced Cultural Studies in Hispanic Lit/Media

Credits: 3

Advanced analysis of Hispanic cultural phenomena. Focus on the Spanish-speaking cultures of Spain or the Spanish-speaking Americas or both. The Texts consulted vary according to instructor and may include the visual arts, such as film, paintings, and performance, academic theory, websites, and other fiction and non-fiction readings.

Dual Listed SPAN 4180.

Prerequisite: SPAN 2140 or equivalent and one 4000-level course.

SPAN5190 - 20th and 21st Century Spanish- American Texts

Credits: 3

Provides students the opportunity to study representative literary texts that reflect the tendencies and trends in 20th and 21st Century Spanish-language works of the Americas.

Dual Listed SPAN 4190.

Prerequisite: 6 hours of SPAN at the 4000-level.

SPAN5260 - The Realist Novel in Spain

Credits: 3

Studies of the major novelists of nineteenth century Spain from 1850 until the Generation of '98.

Dual Listed SPAN 4260.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5900 - Practicum in College Teaching

Credits: 3

Max Credit 3

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

SPAN5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SPAN5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SPAN5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

SPAN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Special Education

EDEX1000 - Hot Topics in Special Education

Credits: 1
Academic, content-based course designed for first-year students, focuses on the critical thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry. Serves as an introduction to the intellectual community of the university. Themes discussed focus on special education issues as they relate to ourselves, our schools, and our place in the community.

EDEX2000 - Collaboration and Professional Relationships

Credits: 3
This course is designed to help students explore a range of collaboration and consultation strategies in the field of Special Education to enable them to successfully collaborate with a range of professionals, students, and families in a school setting. Course content will prepare prospective special education teachers with conflict resolution skills, the ability to effectively facilitate meetings, and increase their inter and intra-personal skills.

Prerequisite: minimum

EDEX2350 - Prescriptive Teaching Practicum

Credits: 1-8
Encompasses live, on-going, supervised practicum experience with regular students and students with special needs. Heavily emphasizes observation and direct instructional involvement with students with a range of special needs.

Prerequisite: overall GPA

EDEX2484 - Introduction to Special Education

Credits: 3
Designed to meet the needs of education majors for a required course in special education.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of

EDEX3081 - Teaching St. w/Low Inc. Dis.

Credits: 3
Max Credit 3

EDEX4120 - Data Analysis/IEP Development

Credits: 3
Max Credit 3

EDEX4720 - Law and Students with Disabilities

Credits: 3
Provides prospective special education teachers with an overview of important case and statutory law in special education. Supports prospective special education teachers in analyzing disability laws and the ways in which these impact practice.

Prerequisite: minimum

EDEX5000 - Collaboration and Professional Interdisciplinary Relationships

Credits: 3
Represents an opportunity for students to examine and explore a range of consultant concepts in the field of Special Education.

Prerequisite: Admission to the program or consent of instructor.

EDEX5071 - Teaching Students with Mild and Moderate Disabilities

Credits: 3
Relates the theoretical, research, and practical aspects of mild-moderate disabilities to the student, teacher, classroom, parents, paraprofessionals, and other school personnel and community agencies, all in an effort to help understand and remediate student instructional and behavioral presenting problems.

Prerequisite: Admission to program or consent of instructor.

EDEX5080 - Teaching Students with Severe and Low Incidence Disabilities

Credits: 3
Designed to provide teachers with the repertoire of instructional, curricular, and behavior analytic skills needed to effectively serve students with severe and low-incidence disabilities. An emphasis on inclusive education and promoting access to the general curriculum will be stressed.

Prerequisite: Admission to program or consent of instructor.

EDEX5100 - Special Education Practicum I

Credits: 3
Designed to allow the student to practice skills and competencies reflected in the Council for Exceptional Children standards. The activities are designed to follow the Wyoming Teaching Standards for Special Education Certification.

Prerequisite: Admission to program or consent of the Instructor.

EDEX5110 - Positive Behavior Support and Management

Credits: 3

Relates the theoretical, research, and practical strategies of behavior change models to students, teachers, parents, and paraprofessionals, in order to understand and remediate student behavior presenting problems, to include the application of systematic Behavior Management plans, BIPs, FBAs, BSPs, and school wide PBIS.

Prerequisite: Admission to program or consent of instructor; EDEX 5071.

EDEX5120 - Academic Instruction in General Education for Students with Disabilities

Credits: 3

Offers teachers appropriate practices and procedures for accommodating children with disabilities in their general education classroom. The focus is on moving from academic and nonacademic assessments to appropriate teaching and learning in the general education classroom environment.

Prerequisite: Admission to program or consent of instructor.

EDEX5150 - Research Applications in the Classroom

Credits: 3

Methodology for conducting applied research projects in classroom settings will be discussed. A variety of "classroom-friendly" experimental designs will be examined. In particular, the value of single-subject research in evaluating educational programs and serving as a rigorous, experimentally sound methodology are discussed.

Prerequisite: Admission to program or consent of instructor.

EDEX5200 - Special Education Practicum II

Credits: 3

Designed to allow the student to practice skills and competencies reflected in the Council for Exceptional Children standards. The activities are designed to follow the Wyoming Teaching Standards for Special Education Certification.

Prerequisite: Admission to program or consent of instructor; EDEX 5100.

EDEX5250 - Assistive Technology and Transition

Credits: 2

Addresses assistive technology considerations for students with disabilities. Assessment, planning, selection, use, and evaluation of options will be emphasized.

Prerequisite: Admission to program or consent of instructor.

EDEX5260 - Transition Planning

Credits: 2

Examines the transition and post-high school options available for students with disabilities and in accordance with the requirements of the Individuals with Disabilities Education Act. Emphasis will be placed on assessment, planning, and evaluation of the transition components.

Prerequisite: Admission to program or consent of instructor.

EDEX5355 - Assessment

Credits: 3

Involves the history, ethics, data collection procedures, psychometric understanding, and interpretation of selected formal and informal psycho-educational tests; the relationship to a comprehensive evaluation and IDEA eligibility requirements; and the application of assessment results to the practical remediation of student instructional and behavioral presenting problems.

Prerequisite: Admission to program or consent of instructor.

EDEX5680 - Prescriptive Teaching Practicum

Credits: 1-8

Max Credit (Max. 8)

Graduate practicum/internship, the content of which involves supervised education experience in a special education classroom.

Prerequisite: graduate status and consent of instructor.

EDEX5720 - Special Education Law

Credits: 3

Provides prospective special education teachers and support personnel with overview of important case and statutory law in special education.

Prerequisite: Admission to program or consent of instructor.

EDEX5730 - Severe and Profound Handicaps

Credits: 3

Relates current research and practice to the systematic assessment, education and management of individuals who are severely and/or profoundly disabled.

Prerequisite: 3 semester hours of graduate course work in special education,

EDEX5870 - Seminar

Credits: 1-6

Max Credit (Max. 6)

Represents an opportunity for students to examine and explore advanced concepts of prescriptive teaching.

Prerequisite: consent of instructor and graduate standing.

EDEX5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

Speech-Language Pathology

SPPA1010 - Introduction to Communication Disorders

Credits: 3

Introduces information regarding basics of speech and hearing. Discusses disorders of speech and hearing by defining the problem, etiology or theories of cause, classifications and controversies, evaluation techniques and therapies to correct the disorder.

USP Code [L,L<>(none)]

SPPA1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

SPPA2110 - American Sign Language I

Credits: 4

Basic comprehension and expression of American Sign Language (ASL), the language used by the Deaf community in the United States. ASL vocabulary, grammar, and pragmatics are taught through lecture, conversation, and storytelling. The direct experience method (using ASL with no voice) is utilized to enhance the learning process.

USP Code [(none)<>H]

Former Course Number [4100]

SPPA2120 - American Sign Language II

Credits: 4

Second level of ASL comprehension and expression. ASL vocabulary, grammar, and pragmatics, along with increased fluency, are taught through lecture, conversation, and storytelling. Translation from English to ASL is addressed.

USP Code [(none)< >H]

Former Course Number [4120]

Prerequisite: SPPA 2110.

SPPA2210 - Phonetics and Phonological Development

Credits: 3

Articulatory and acoustic description of speech sound production. Introduction to the International Phonetic Alphabet and phonetic transcription.

Former Course Number [3210]

Prerequisite: SPPA 1010 or consent of instructor.

SPPA3160 - Speech and Language Development

Credits: 4

Deals with the development of speech sound production, phonology, semantics, syntax, morphology, discourse, and pragmatics for typically-developing children from infancy to adolescence. Includes prelinguistic and paralinguistic communication, the cognitive correlates of communication, and written language. Considers the effects of sociocultural context and multiple language acquisition. Application component provides weekly experience in language sample analysis.

Former Course Number [4160]

Prerequisite: SPPA 2210 or instructor permission.

SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing

Credits: 4

Introduces the student to the anatomy of the normal speech and hearing systems as well as the physiologic underpinnings of the speech (respiration, phonation, articulation), swallowing, and hearing (external, middle, and inner ear) systems. Theories of speech production and speech perception are presented.

Former Course Number [3400]

Prerequisite: KIN 2040 or consent of instructor.

SPPA4000 - Workshop in Speech Pathology/Audiology

Credits: 1-8

Varies with interests of student requests. Incorporates material relative to any area of speech and hearing.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

SPPA4070 - Deaf Studies

Credits: 3

Studies deaf culture and deaf history in the United States. Culture topics will include deaf community dynamics, humor, behavior, emotional and social interaction, besides issues involving deaf children as a linguistic minority. History will be

discussed from the 1700s to the present in the U. S.

USP Code [CS,D<>H]

Prerequisite: SPPA 2110.

SPPA4130 - Advanced ASL

Credits: 4

Third level of ASL comprehension and expression. Addresses increased fluency in ASL; register variation for different conversational participants; and specialized vocabulary, including sexuality and religion. Translation from English to ASL is addressed.

Prerequisite: SPPA 2120.

SPPA4140 - Undergraduate Teaching Assistant

Credits: 1

Max Credit (Max. 2)

Students assist instructor in major courses that they have successfully completed, including assisting with lab or practice sessions, providing individual student assistance, and participating in other student outreach activities on behalf of the Division. One semester credit hour requires 4 hours of work per week.

Prerequisite: consent of instructor/department and junior standing.

SPPA4150 - Aural Rehabilitation

Credits: 3

Examines basis for and characteristics of communication problems created by hearing loss and management procedures to facilitate communication and adjustment to hearing loss. Includes acoustic and visual properties of speech, amplification devices and hearing loss in school children.

Prerequisite: SPPA 4340 or consent of instructor.

SPPA4200 - Audiology Internship

Credits: 1-2

Max Credit (Max. 4)

Audiology internship in the UW Speech and Hearing Clinic to further the student's experience in an audiology clinic prior to their applying to an audiology graduate program.

Prerequisite: SPPA 4340 and consent of instructor.

SPPA4240 - Speech and Language Disorders Across the Lifespan

Credits: 3

The nature and causes of developmental and acquired speech and language disorders across the lifespan are examined. Principles of assessment and intervention are introduced.

Prerequisite: SPPA 3160 or consent of instructor.

SPPA4250 - Clinical Methods

Credits: 4

Introduction to clinical procedures, such as: collecting data, clinical writing and documentation, reviewing practice regulations, interviewing, and counseling. Students will obtain initial clinical experience (i. e. observation, simulation and/ or clinical assignment). Requirements (e. g. , background check, TB screen) must be met for involvement in the Speech & Hearing Clinic.

Prerequisite: SPPA 4340

SPPA4340 - Basic Audiology

Credits: 3

An introduction to audiology as a profession, with primary focus on screening and diagnostic methods for the clinical evaluation of hearing loss in children and adults.

When Offered (Normally offered spring semester)

Prerequisite: SPPA 3265 or concurrent enrollment.

SPPA4380 - Neurological Basis of Communication

Credits: 3

Studies details of human nervous system, including central and peripheral nervous systems, major motor and sensory pathways and special senses. Emphasizes neurology of various communication disorders.

Prerequisite: SPPA 3265 or consent of instructor.

SPPA4890 - Independent Study

Credits: 1-3

Max Credit (Max. 4)

An independent study will be developed by the instructor and undergraduate student. It will consist of activities such as: conducting a small research project, assisting in a research project, composing a systematic research review, participating in a clinical experience, or helping to develop a professional development or public awareness program.

Prerequisite: Consent of instructor.

SPPA5000 - Seminar in Communication Disorders

1677

Credits: 1-8

Max Credit (Max. 8)

The participation in and discussion of special problems and/or research related to speech-language, pathology and audiology.

Prerequisite: B. S. degree and consent of instructor.

SPPA5020 - Phonological Assessment and Intervention

Credits: 3

Emphasis on normal phonetic and phonologic development, diagnosis and clinical management of articulatory and phonological disorders.

Prerequisite: SPPA 3210.

SPPA5030 - Clinical Practicum

Credits: 1-4

Max Credit (Max. 14)

Supervised clinical experience with speech, language, and hearing disordered children and adults under supervision of University of Wyoming Speech and Hearing Clinic faculty.

Prerequisite: matriculating graduate students only.

SPPA5100 - Motor Speech Disorders

Credits: 2

Evaluation and treatment of motor speech disorders. Topics will include characteristics of disordered speech associated with neurological impairments/diseases; methods for evaluating communication disorders associated with dysarthria, apraxia of speech, and other neurological and acquired conditions, and treatment approaches.

Prerequisite: SPPA 4380 or a course covering neuroanatomy/physiology of normal and disordered communication.

SPPA5110 - Craniofacial Disorders

Credits: 2

Studies communication disorders related to cleft lip and palate disorders and associated craniofacial sequences and syndromes. Assessment and treatment of these communication disorders is presented in the context of interdisciplinary management. Surgical and nonsurgical treatment procedures employed to manage speech problems associated with velopharyngeal insufficiency are included.

Prerequisite: SPPA 3265, SPPA 2210.

SPPA5120 - Stuttering

Credits: 2

Theories of etiology, symptoms of the problem, diagnosis and treatment of childhood non-fluency and various approaches to therapy for the adult stutterer.

Prerequisite: graduate level standing.

SPPA5130 - Adult Neurogenic Disorders

Credits: 4

This course will cover acquired neurogenic communication disorders. Topics include language disorders (focusing on Aphasia) as well as cognitive-communication disorders (i. e. , traumatic brain injury, Right Hemisphere Dysfunction, and Neurocognitive disorder). This graduate course provides 1) a basic understanding of the neuroanatomical/ physiological basis and 2) instruction regarding evaluation and treatment methods.

Prerequisite: SPPA 4380.

SPPA5140 - EBP and Evaluation Procedures in Communication Disorders

Credits: 4

Focuses on research and evaluation procedures in speech-language pathology. Topics include evidence-based practice, evaluating research, an overview of models of disability across applied settings, assessment and evaluation processes including interviewing, understanding tool psychometrics, and using norm-based referenced tools, criterion-based measurements, and dynamic assessment.

Prerequisite: Acceptance to the University of Wyoming's graduate SLP program.

SPPA5210 - Augmentative and Alternative Communication

Credits: 2

Selection, design, and application of augmentive and alternative communication (AAC) systems to enhance communication, education, and quality of life for individuals with development and acquired disorders.

SPPA5220 - Voice Disorders

Credits: 3

Study of the etiology, assessment, and remediation of voice disorders. Includes a discussion of preventing disorders, maintaining a healthy voice, and normal changes in voice. Presentation of rehabilitation options for laryngectomized speaker.

Prerequisite: SPPA 3265.

SPPA5230 - Dysphagia

Credits: 3

Provides information regarding the anatomy and physiology of the adult and pediatric swallowing mechanisms, the diagnosis of dysphagia and feeding disorders using clinical and instrumental approaches, the medical diagnoses for which dysphagia is a common symptom, and methods that are commonly used to treat dysphagia and feeding disorders.

Prerequisite: SPPA 3265.

SPPA5270 - Educational Practicum

Credits: 1-12
Max Credit (Max. 12)

Under supervision, the student is given increased responsibility for performing speech and language assessments, hearing screenings, and treatment of children in an educational setting. Students will relate to other educational personnel and counsel teachers and families about communication disorders.

Prerequisite: completion of at least two semesters (including summer) of approved graduate coursework and clinical practicum (SPPA 5030); and approval of faculty.

SPPA5280 - Early Language Intervention

Credits: 3
Principles and techniques of language assessment and intervention for preschoolers, infants, and low-functioning individuals.

Prerequisite: SPPA 3160.

SPPA5290 - Medical Practicum

Credits: 1-12
Max Credit (Max. 12)

Under supervision, the student is given increased responsibility for performing speech and language assessments, hearing screenings and treatment of children and adults in a medical setting. Students relate to other medical and clinical personnel and counsel professionals and families about communication disorders.

Prerequisite: Completion of at least two semesters (including summer) of approved graduate coursework and clinical practicum; and approval of faculty.

SPPA5330 - School-Age Language Intervention

Credits: 3
Principles and techniques of language assessment and intervention for school-age children and adolescents with particular attention to service delivery issues in schools.

Prerequisite: SPPA 3160.

SPPA5380 - Professional Practice

Credits: 3
Max Credit (Max. 9)

Emphasizes issues related to professional practice of speech-language pathology, such as professional ethics, scope of practice, professional standards, and techniques of counseling clients. This course applies to speech-language pathologists working in either the medical or school setting. This course prepares the speech-language pathologist to collaborate with other professional in the workplace through discussion and activities of inter-professional practice and education (IPP and IPE).

Prerequisite: graduate standing in Communication Disorders and consent of instructor.

SPPA5500 - Topics in Communication Disorders

Credits: 1-8

Max Credit (Max. 9)

Provides a critical review of recent theories and developments in area of communication disorders. This is a continuing seminar course dealing with various advanced topics in communication disorders.

Prerequisite: graduate standing.

SPPA5750 - Research Methods in Speech Pathology and Audiology

Credits: 3

Emphasizes the application of scientific methodologies to areas of Speech-Language Pathology and Audiology. Topics to be covered include: introduction to writing research papers; reviewing and critiquing the literature; experimental designs; techniques in data analyses.

Prerequisite: STAT 2070 or equivalent; B. S. degree in speech pathology audiology; and acceptance into the graduate program.

SPPA5890 - Independent Study

Credits: 1-3

Max Credit (Max. 4)

Graduate-level independent study will be developed by the instructor and student. It will consist of activities such as: conducting a research project of a smaller scale than a thesis, assisting in a research project, composing a systematic research review, or developing a professional education or public awareness program.

Prerequisite: graduate standing.

SPPA5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

SPPA5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SPPA5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

SPPA5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

SPPA5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

SPPA5961 - Graduate Projects

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: must be enrolled in Plan B program and have departmental approval.

SPPA5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Statistics

STAT1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

STAT2000 - Statistics and the World

Credits: 3

Discusses statistical reasoning and methods as related to today's society. Emphasizes ideas rather than specific techniques. Focuses on real examples of the use (and misuse) of statistics. Includes sampling, experimentation, descriptive statistics, elementary probability and statistical inference.

USP Code [QB<>Q]

Prerequisite: grade of C or better in MATH 0921 or level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600 or concurrent enrollment in MATH 1080.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP Code [QB<>Q]

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP Code [QB<>Q]

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT2110 - Statistical Methods for Business and Management Science

Credits: 3

Provides majors in various departments of the College of Business with training in use of statistical analysis techniques as they

apply to business problems. Credit cannot be earned in more than one of the following: STAT 2110, STAT 3050 and STAT 5050, STAT 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2010.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 3050 or equivalent.

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: choice of STAT 3050 or equivalent.

STAT4045 - Categorical Data Analysis

Credits: 3

Applied methods for analyzing associations when some or all variables are measured in discrete categories, not continuous scales. Topics include the binomial, multinomial, and Poisson probability models, parameter estimation and hypothesis-testing about proportions, measures of association and tests for contingency tables, logistic regression, and log-linear models.

Dual Listed STAT 5045.

Former Course Number [4040]

Prerequisite: STAT 2110, STAT 3050, STAT 5050, 5060, STAT 5070 or STAT 5080.

STAT4070 - Causal Models

Credits: 3

Applications of least-squares and iterative maximum-likelihood methods for drawing cause and effect conclusions from nonexperimental data. Topics include regression-based path analysis, reciprocal causation, confirmatory factor analysis, measurement error, and structural equation models with unmeasured (latent) variables.

Cross Listed SOC 4070.

Prerequisite: one of STAT 3050, STAT 4015, STAT 5050, 5060, STAT 5070, STAT 5080 or equivalent (regression methods).

STAT4115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling. Computer analyses using MINITAB and SAS will be an important part of the course.

Cross Listed ECON 4115.

Dual Listed STAT 5115.

Former Course Number [4110]

Prerequisite: STAT 3050 or equivalent; STAT 4015/STAT 5015 recommended.

STAT4155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage sampling. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 5155.

Former Course Number [4150]

Prerequisite: choice of STAT 2010, STAT 2050, STAT 2070 or equivalent.

STAT4220 - Basic Engineering Statistics

Credits: 3

Introduces probability models, properties of distributions, statistical inference and development of statistical models for physical and engineering sciences. Credit cannot be earned in more than one of the following courses: STAT 2010, STAT 2050, STAT 2070, 4220 and 5000.

Former Course Number [4020]

Prerequisite: MATH 2205, MATH 2355 or equivalent.

STAT4240 - Data Mining

Credits: 3

An introduction to statistical learning and data mining using techniques that have proven useful in recognizing patterns and

making predictions. These techniques include both parametric and nonparametric models. Tools for computing and evaluating these techniques will also be studied.

Dual Listed STAT 5240.

Prerequisite: STAT 4015.

STAT4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed MATH 4255.

Dual Listed STAT 5255.

When Offered (Offered fall semester)

Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

STAT4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed MATH 4265.

Dual Listed STAT 5265.

Former Course Number [4260, 4010]

Prerequisite: STAT 4255/MATH 4255.

STAT4270 - Applied Bayesian Statistics

Credits: 3

This course introduces Bayesian data analysis in an applied context. We will learn about Bayesian statistics primarily in a regression model context, taken broadly. A conceptual understanding of popular Markov Chain Monte Carlo algorithms will be provided.

Dual Listed STAT 5270.

Prerequisite: STAT 3050. STAT 4015/STAT 5015 recommended.

STAT4280 - Models for Hierarchical Data

Credits: 3

Provides an introduction to the modeling and analysis of correlated/hierarchical data from exponential family member distributions (i. e. presence/absence, count data, Gaussian data). Emphasis is on applications. Aimed to build off of a first course in regression analysis.

Dual Listed STAT 5280.

Prerequisite: STAT 4015.

STAT4300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include: multivariate regression, canonical correlation, discriminant analysis, factor analysis and multidimensional scaling. A wide range of computer assistance is incorporated.

Dual Listed STAT 5300.

Prerequisite: STAT 3050 or equivalent.

STAT4350 - Survey Construction and Analysis

Credits: 3

Examines the issues surrounding the construction (item wording, test theory, and numerical scales), assessment (sampling and psychometrics), and analysis (item analysis, qualitative data analysis, and factor analysis) of survey instruments. Roughly a third of the course is devoted to each of these areas.

Dual Listed STAT 5350.

Prerequisite: STAT 3050.

STAT4360 - Spatial Statistics

Credits: 3

Emphasis is on a generalized linear model approach to the modeling of continuous data, placing model building and the various kriging methods into a single conceptual framework.

Dual Listed STAT 5360.

Prerequisite: STAT 4015.

STAT4370 - Survival Analysis

Credits: 3

Introduction to the modeling of time to event data as it arises in epidemiological and medical research. Topics include parametric and non-parametric estimation for censored data without covariates, and for data with covariates, the proportional hazards regression model, additive hazards regression model and parametric regression models.

Dual Listed STAT 5370.

Prerequisite: STAT 4015 and STAT 4025.

STAT4460 - Statistical Software

Credits: 1

An introduction to the various statistical software programs currently in use at the University of Wyoming. Topics will include the structure of each language, I/O, programming the basic statistical applications, and a comparison of the other languages.

Former Course Number [5480]

Prerequisite: 9 hours in statistics beyond introductory.

STAT4870 - Senior Thesis

Credits: 3

Encompasses senior thesis research project under faculty member guidance and supervision. Faculty sponsorship must be obtained prior to registration.

Prerequisite: 18 hours in statistics and senior standing.

STAT4880 - Problems in Statistics

Credits: 1-4

Encourages individual initiative on part of students who work on extending their knowledge through library research.

Former Course Number [4790]

Prerequisite: senior standing, 8 hours in statistics and consent of instructor.

STAT5015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 4015.

Prerequisite: STAT 3050 or equivalent.

STAT5025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs, and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 4025.

Prerequisite: STAT 3050 or equivalent.

STAT5045 - Categorical Data Analysis

Credits: 3

Applied methods for analyzing associations when some or all variables are measured in discrete categories, not continuous scales. Topics include the binomial, multinomial, and Poisson probability models, parameter estimation and hypothesis-testing about proportions, measures of association and tests for contingency tables, logistic regression, and log-linear models.

Dual Listed STAT 4045.

Prerequisite: two courses in statistics.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

STAT5055 - Statistical Methods for the Biological Sciences II

Credits: 3

The statistical toolkit (regression and ANOVA-driven) of methods applicable to the biological and behavioral sciences will be extended to include multiple logistic regression, power and sample size considerations, and computer-intensive methods such as bootstrapping and randomization tests, which will considerably expand the repertoire of methods that a person could use.

Prerequisite: STAT 5050 or equivalent.

STAT5070 - Statistical Methods for the Social Sciences

Credits: 3

General statistical analyses and their application to the social sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 2110, STAT 3050, STAT 5050, 5060, 5070.

Cross Listed SOC 5070.

Prerequisite: one course in statistics (all introductory courses except STAT 2000).

STAT5080 - Statistical Methods for the Agricultural and Natural Resource Sciences

Credits: 3

Brief review of statistical principles. Use of SAS programming. Numerous analysis of variance techniques along with commonly-used experimental designs. Multiple mean comparison, linear contrasts, power of F test, simple linear regression, polynomial regression, analysis of covariance, and some categorical data techniques for students in the agriculture and natural resources sciences. Credit cannot be earned in more than one of the following courses: STAT 2110, STAT 3050, STAT 5050, 5060, STAT 5070, 5080.

Cross Listed ENTO 5080.

Prerequisite: STAT 2050 or equivalent.

STAT5115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling. Computer analysis using MINITAB and SAS will be an important part of the course.

Cross Listed ECON 5115.

Dual Listed STAT 4115.

Prerequisite: STAT 3050 or equivalent; STAT 4015/STAT 5015 recommended.

STAT5155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage samples. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 4155.

Prerequisite: STAT 2070 or equivalent.

STAT5185 - Analysis of Data

Credits: 3

Focuses on data collection, analysis, interpretation, and communication, using contexts relevant to everyday situations. Topics chosen integrate well with the concerns of middle-level teachers and connect with such curriculum areas as health, science, and social studies. This course is not a research methods course.

Cross Listed NASC 5180.

Prerequisite: graduate standing in either degree or non-degree seeking status, and acceptance into the Middle-level mathematics program.

STAT5210 - Advanced Regression

Credits: 3

Advanced methodologies, with particular focus on concepts and methods related to regression. Topics include generalized linear models, nonlinear regression, elementary linear model theory, and Data Science topics such as resampling inference, ridge regression and the lasso, and k-fold cross-validation.

Prerequisite: MATH 4265/STAT 4265/STAT 5265 and STAT 4015/STAT 5015. STAT 4025/STAT 5025 and STAT 4045/STAT 5045 are recommended.

STAT5220 - Advanced Design

Credits: 3

Advanced study of experimental designs, observational designs, and mixed models. Topics include fixed and random effects, factorial, split-plot and repeated measures designs, and hierarchical models. Linear model methodology and Data Science

concepts will also be emphasized.

Prerequisite: MATH 5265/STAT 4265/STAT 5265, and at least one of STAT 4015/STAT 5015, STAT 4025/STAT 5025, or STAT 5210.

STAT5230 - Statistic Methods III

Credits: 4

Continuation of topics in Statistical Methods from STAT 5220; aimed at preparing students for advanced topics courses in Statistics.

Prerequisite: STAT 5220 and STAT 5520.

STAT5240 - Data Mining

Credits: 3

An introduction to statistical learning and data mining using techniques that have proven useful in recognizing patterns and making predictions. These techniques include both parametric and nonparametric models. Tools for computing and evaluating these techniques will also be studied.

Dual Listed STAT 4240.

Prerequisite: STAT 5015.

STAT5255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed MATH 5255.

Dual Listed STAT 4255.

Prerequisite: grade of C or better in MATH 2210 or MATH 2355.

STAT5265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed MATH 5265.

Dual Listed STAT 4265.

Prerequisite: STAT 4255/STAT 5255.

STAT5270 - Applied Bayesian Statistics

Credits: 3

This course introduces Bayesian data analysis in an applied context. We will learn about Bayesian statistics primarily in a regression model context, taken broadly. A conceptual understanding of popular Markov Chain Monte Carlo algorithms will be provided.

Dual Listed STAT 4270.

Prerequisite: STAT 3050, STAT 4015/STAT 5015 recommended.

STAT5280 - Models for Hierarchical Data

Credits: 3

Provides an introduction to the modeling and analysis of correlated/hierarchical data from exponential family member distributions (i. e. presence/absence, count data, Gaussian data). Emphasis is on applications. Aimed to build off of a first course in regression analysis.

Dual Listed STAT 4280.

Prerequisite: STAT 5015.

STAT5300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include: multivariate regression, canonical correlation, discriminant analysis, factor analysis and multivariate regression, canonical correlation, discriminant analysis, factor analysis and multidimensional scaling. A wide range of computer assistance is incorporated.

Dual Listed STAT 4300.

Prerequisite: STAT 5050, 5060, STAT 5070, STAT 5080.

STAT5350 - Survey Construction and Analysis

Credits: 3

Examines the issues surrounding the construction (item wording, test theory, and numerical scales), assessment (sampling and psychometrics), and analysis (item analysis, qualitative data analysis, and factor analysis) of survey instruments. Roughly a third of the course is devoted to each of these areas.

Dual Listed STAT 4350.

Prerequisite: STAT 3050.

STAT5360 - Spatial Statistics

Credits: 3

Emphasis is on a generalized linear model approach to the modeling of continuous data, placing model building and the various kriging methods into a single conceptual framework.

Dual Listed STAT 4360.

Prerequisite: STAT 4015.

STAT5370 - Survival Analysis

Credits: 3

Introduction to the modeling of time to event data as it arises in epidemiological and medical research. Topics include parametric and non-parametric estimation for censored data without covariates, and for data with covariates, the proportional hazards regression model, additive hazards regression model and parametric regression models.

Dual Listed STAT 4370.

Prerequisite: STAT 4015, STAT 4025 and STAT 4265.

STAT5380 - Bayesian Data Analysis

Credits: 3

Bayesian statistical methods for analyzing various kinds of data. Topics include basic Bayesian ideas and model formulation (priors, posteriors, likelihoods), single- and multiple-parameter models, hierarchical models, generalized linear models, multivariate models, survival models and an introduction to computation methods.

Prerequisite: at least 2 semesters of calculus and one semester of statistics at or beyond the 4000 level.

STAT5470 - Data Analysis

Credits: 3

This course is designed to develop the skill of analyzing data sets using methods of classic statistical analysis, such as analysis of variance, regression, discrete models, descriptive analysis, non-parametrics, and multivariate methods. The focus will be on understanding the various models and methods, computer assisted data analysis, and communication of results (oral and written).

Prerequisite: 12 graduate level hours in statistics (excluding STAT 5000).

STAT5490 - Statistical Consulting

Credits: 1

An introduction to the art and practice of statistical consulting. Topics include active listening, ascertaining client knowledge level and ability, determining appropriate methods of analysis given limitations, and organizing and managing a consulting session.

Prerequisite: graduate standing in statistics, 15 hours in statistics.

STAT5510 - Distribution Theory

Credits: 4

Topics covered include probability theory, conditional probability, random variables, special distribution functions, functions of random variables, expectation, random samples, and limiting distributions.

Prerequisite: MATH 2210, 3000 or MATH/STAT 4265.

STAT5520 - Inference I

Credits: 4

Topics covered include Properties of a random sample, Sufficiency principle, Likelihood principle, point estimation (mle, mom, Bayes estimators, etc. and methods for evaluating estimators), some interval estimation.

Prerequisite: STAT 5510.

STAT5530 - Inference II

Credits: 3

Topics covered include methods used in Bayesian, Likelihood, Frequentist inference; some methods for robust inference and some large sample theory as needed.

Prerequisite: STAT 5520.

STAT5540 - Large Sample Theory

Credits: 3

Treats various limiting techniques which can be used to predict the behavior of statistics computed from large data sets. The characteristic function is used in deriving the law of large numbers and various forms of the central limit theorem, including the multivariate normal case. The central and noncentral chi-square distributions are derived as the probability law for certain statistics in the limit. Other topics discussed include modes of probabilistic convergence, speed of convergence, and large sample approximation procedures.

Prerequisite: STAT 5510.

STAT5615 - Time Series Analysis II

Credits: 3

A treatment of theory and application of ARIMA modeling of times series. Frequency domain analysis is also introduced. Additional topics will be selected from intervention analysis, transfer function (ARMAX) models, outlier analysis, vector ARIMA models, ARCH, GARCH, and state-space models, according to the interests and abilities of the class.

Prerequisite: STAT 4015/STAT 5015, STAT 4115 and STAT 4265/STAT 5265.

STAT5620 - Theory of Linear Models

Credits: 3

A theoretical approach to estimation and testing in the general linear model. Topics include: special linear algebra results for statistics, para-meterizations, estimability, least squares, best linear unbiased estimation, and testing linear hypotheses.

Prerequisite: STAT 5520, STAT 5630, MATH 4500.

STAT5630 - Multivariate Analysis

Credits: 3

The subject matter includes derivation of multi-variate normal distributions, the Wishart, and related sampling distributions,

multivariate estimation, confidence regions, and hypothesis testing are covered including topics as Hotelling's T squared, profile analysis, discriminate analysis, factor analysis, and cluster analysis.

Prerequisite: STAT 4265, MATH 2250.

STAT5650 - Theory of Sampling

Credits: 3

Consists of the theory of simple random sampling, stratified sampling, multistage sampling, and regression and ratio estimation. Recent developments in sampling are presented.

Prerequisite: STAT 4265, STAT 4155/STAT 5155.

STAT5660 - Computationally Intensive Methods in Statistics

Credits: 3

Advanced statistical inference often relies on methods which are computationally intensive. The basic methods include Newton-Raphson; the EM algorithm; bootstrap and other resampling procedures; kernel density estimators; Laplace's method, importance sampling and MCMC, and saddlepoint and Edgeworth approximations.

Prerequisite: STAT 5520.

STAT5670 - Mixed Models

Credits: 3

An advanced treatment of models with fixed and random effects. Topics include: model definitions, least-squares, analysis of variance techniques, likelihood procedures, and computational applications.

Prerequisite: STAT 5620.

STAT5680 - Advanced Bayesian Statistics

Credits: 3

Philosophical principles underlying Bayesian and non-Bayesian statistics. Decision theoretic foundations of Bayesian statistics including loss functions, minimaxity, and admissibility. Construction of conjugate prior distributions and non-informative prior distributions. Bayesian point estimation, hypothesis tests and credible sets. Computational tools for Bayesian problems including Markov chain Monte Carlo (MCMC) and other methods for approximating posterior distributions with some emphasis on implementation via a programming language or statistical computing software. As time and interest permit: the normal linear model, non-normal models, hierarchical models, Bayesian model averaging, other topics.

Prerequisite: STAT 5380; 5420 and STAT 5520.

STAT5810 - Seminar

Credits: 1-2

Max Credit (Max. 4)

Research results are presented by statistics majors. (Faculty also present papers).

Prerequisite: graduate status in statistics.

STAT5820 - Teaching of Statistics1

Credits: 2

Max Credit (Max 2)

The following topics are presented and discussed: traditional and innovative teaching methods, assessment methods, the purpose of lectures and laboratories, in-class activities, projects, mathematics versus statistics, computer assistance, math anxiety, and group and one-on-one interaction guidelines.

Prerequisite: consent of instructor.

STAT5880 - Advanced Problems

Credits: 1-8

Max Credit (Max. 8)

Intended to develop the graduate student's ability to expand his theoretical knowledge by using library materials and working under close supervision of a faculty member who is an expert in the area of study.

Prerequisite: 12 hours in statistics and consent of instructor.

STAT5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

STAT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

STAT5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

STAT5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

STAT5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

STAT5990 - Internship

Credits: 1-12
Max Credit (Max 24)

Prerequisite: graduate standing.

STEP

STEP1060 - College Athletics and Society

Credits: 3
This course will examine the unique relationship between intercollegiate athletics and higher education, as well as intersections that occur with gender, politics, and race.

STEP1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

STEP1102 - Step Into College

Credits: 1
Helps students interact with UW campus resources, staff, and faculty; learn about resources for academic support and wellness;

and explore academic and co-curricular opportunities for students' professional and personal interests.

Restricted Restricted to new full-time, first-year freshmen.

Prerequisite: Freshman or sophomore class standing.

STEP1105 - Academic Success Skills

Credits: 1-2

Designed to provide students the necessary skill set to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation and more.

STEP3000 - Student Leadership in Supplemental Instruction

Credits: 2

Focuses on theoretical perspectives of group tutoring and peer leadership, best practices in supplemental instruction, and student reflection. Will strengthen leadership knowledge and skills and introduce effective methods for group facilitation and SI curriculum.

Prerequisite: closed to general enrollment.

Theatre and Dance

THEA1000 - Introduction to Theatre, TV & Film

Credits: 3

A broad examination of theatre, television and film through the ages including history, production, dramatic literature, creativity, art, entertainment and censorship.

USP Code [CA<>H]

THEA1021 - Academic and Professional Issues in Dance

Credits: 1

Introduces freshman to the discipline of dance and academic study at the University of Wyoming. Key intellectual and literacy concepts will be introduced, including, but not limited to: critical thinking and analysis, knowledge of the discipline, career options, diversity of the discipline, university and region.

USP Code [I,L<>(none)]

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the areas(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1050 - Beginning Drawing and Painting

Credits: 3

An introductory drawing and painting technique course for students to achieve a working knowledge of a variety of mediums that cross the disciplines of scenic, costume, and lighting design. Form, perspective, texture and basic color theories will be explored.

THEA1100 - Beginning Acting

Credits: 3

Explores inner resources of beginning actor and brings these resources to bear upon the art of creating a believable stage image.

USP Code [CA<>H]

THEA1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

THEA1200 - Introduction to Design

Credits: 3

Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA1300 - Musical Theatre Workshop

Credits: 1

Max Credit (Max. 8)

Workshop production of a Musical or Musical Theatre scenes.

THEA1360 - Fundamentals of Music for Theatre Majors

Credits: 3

Basics of music theory to include music notation, rhythm, pitch, scales, key signatures, triads, and basic ear training and keyboard skills, specific to the needs of Musical Theatre. Assumes little or no music theory background.

THEA1405 - Introduction to Pilates Training

Credits: 1

Max Credit (Max. 2)

An introduction to Pilates based training, including mat work and exercises on the Reformer.

Prerequisite: consent of instructor.

THEA1410 - Beginning Ballet I

Credits: 1

Introduces principles and practices of classical ballet technique.

USP Code [CA<>H]

THEA1420 - Beginning Ballet II

Credits: 1

Continues studies in classical ballet technique. Instructor permission required.

USP Code [CA<>H]

Prerequisite: THEA 1410.

THEA1430 - Beginning Modern I

Credits: 1

Introduces principles and techniques of modern dance.

USP Code [CA<>H]

THEA1440 - Beginning Modern II

Credits: 1

Continues studies in modern dance technique. Instructor permission required.

USP Code [CA<>H]

Prerequisite: THEA 1430.

THEA1450 - Beginning Tap Dance I

Credits: 1

Explores basic tap techniques and related principles of tap dance composition.

THEA1470 - Men's Technique

Credits: 1

Max Credit (Max. 2)

1700

Introduces and develops the principles and techniques of movement and dance specific to men.

THEA1480 - Beginning Jazz Dance I

Credits: 1

Introduces jazz dance.

USP Code [(none)<>H]

THEA1700 - Voice for the Actor

Credits: 2

Introduction to voice work. Emphasizes breath freedom, flexibility and support for the actor. Methodologies studied include: Fitzmaurice Voicework, Linklater and Lessac systems.

THEA2005 - Creative Drama in the Classroom

Credits: 3

Focuses on K-12 Theatre teaching methods. Students discover teaching methods for integrating improvisation, storytelling, movement/dance, and puppetry into the school curriculum. Students design and implement theatre lessons using these creative drama techniques. To engage real life practice teaching, students are given opportunities to teach creative drama lessons to the class.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3

First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3

Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2030 - Beginning Playwriting

Credits: 3

Introduces writers to the creative process of playwriting (writing for the stage) or screenwriting (writing for the movies). Strongly emphasizes character and story development, as well as practical side of the industry. Students write a play or screenplay.

Former Course Number [3500]

Prerequisite: WA and THEA 1000, THEA 1100.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2050 - Theatre Practice

Credits: 1-2

Encompasses individually supervised practical training in performance and production.

Prerequisite: consent of instructor.

THEA2060 - Introduction to Performance Studies

Credits: 3

Introduces students to the theories and practices of Performance Studies as an interdisciplinary field. Students will apply these concepts as a way of exploring issues of culture and identity, particularly in an international context.

USP Code [(none)<>COM2]

THEA2145 - Costume Construction

Credits: 3

Teaches the basic skills and terminology that are used in costume construction. Teaches hand and machine sewing focusing on techniques used to stitch historical and modern costumes as well as basic knowledge of fabric.

THEA2150 - Drafting for Design

Credits: 3

Introduces Design and Technical students to the basics of hand drafting and numerous drafting techniques and conventions. After completing this course, students will be well prepared for scenic and lighting design courses.

THEA2160 - Stage Makeup

Credits: 2

Introduction to theatrical makeup with the stage performer in mind. Focus on principles, materials, and techniques; concentrating on problems of designing and executing specific makeup designs and applications for a wide range of ages, types, and styles.

THEA2170 - Speech for the Actor

1702

Credits: 3

Studies speech techniques, including the International Phonetic Alphabet and Standard American Speech for the Stage. Builds upon the FitzmauriceVoicework technique as well as other voice methodologies.

Prerequisite: THEA 1100 and THEA 1700.

THEA2180 - Costume Crafts

Credits: 3

Focuses on the area of costume crafts which may include but not limited to dyeing, millinery, masks, fabric painting and distressing, working with a variety of materials.

Prerequisite: THEA 2145.

THEA2200 - Backgrounds of Dance

Credits: 3

Surveys ethnic and theatrical dance forms from primal society to 20th century. Examines the place of the arts as a reflection of the culture.

USP Code [CA,G<>H]

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2250 - Computer Aided Design I

Credits: 3

Building on skills and techniques learned in THEA 2150 Drafting for Design, the course intruduces and provides students with training on commonly used software, that may include CAD, 3D-modeling, and photo editing soft ware. Skills acquired will be built upon in later courses.

Prerequisite: THEA 2150 or by permission of instructor.

THEA2340 - Musical Theatre Voice Lesson

Credits: 1

Max Credit (Max. 8)

Solo instruction in singing techniques and performance styles associated with Musical Theatre. Includes demonstration, brief lecture, discussion, and active participation through singing, analyzing, movement, and performance.

THEA2400 - Vertical Dance I

Credits: 1

An introduction to vertical dance including safety issues, beginning rigging and performance.

Prerequisite: consent of instructors.

THEA2410 - Intermediate Ballet I

Credits: 1.5

Max Credit (Max. 3)

A first year, first semester ballet technique class for dance majors and minors. This course focuses on expanding the dancer's understanding and knowledge of technique, vocabulary and principles of classical ballet.

Prerequisite: Limited to dance majors and minors; admission by permission only.

THEA2415 - Pointe I

Credits: 1

Max Credit (Max. 4)

A beginning level point class based on the principles of classical ballet.

Prerequisite: Completion of or concurrent enrollment in THEA 2410, or permission of the instructor. Limited to dance majors and minors.

THEA2420 - Intermediate Ballet II

Credits: 1.5

Max Credit (Max. 3)

Second semester of the first year ballet technique class for dance majors and minors. This course focuses on expanding the dancers understanding and knowledge of technique, vocabulary and principles of classical ballet Class meets three times per week.

Prerequisite: Successful completion of THEA 2410 or equivalent required. Limited to dance majors and minors; admission by permission only.

THEA2425 - Pointe II

Credits: 1

Max Credit (Max. 4)

An intermediate level pointe class based on the principles of classical ballet.

Prerequisite: THEA 2415 or permission of the instructor. Limited to dance majors and minors.

THEA2430 - Intermediate Modern I

Credits: 1
Max Credit (Max. 3)

A first year, first semester, modern dance technique class for dance majors and minors. Knowledge of basic vocabulary and principles will be augmented with an understanding of historical techniques and their application to contemporary dance. Class meets three times per week.

Prerequisite: Limited to dance majors and minors; admission by permission only.

THEA2435 - Repertory

Credits: 1
Max Credit (Max. 4)

A beginning level repertory class based on the principles of modern dance.

Prerequisite: Status in the dance department, or permission of the instructor is required before enrolling.

THEA2440 - Intermediate Modern II

Credits: 1
Max Credit (Max. 3)

A first year, second semester, modern dance technique class for dance majors and minors. Mastering vocabulary and principles will be augmented with a deeper understanding of historical techniques and their application to contemporary dance. Class meets three times per week.

Prerequisite: THEA 2430. Limited to dance majors and minors; admission by permission only.

THEA2445 - Repertory II

Credits: 1
Max Credit (Max. 4)

A beginning level partnering class based on the principles of ballet or modern dance.

Prerequisite: Status in the dance department, or permission of the instructor is required before enrollment.

THEA2450 - Intermediate Tap II

Credits: 1
Continues studies in techniques and principles of tap dance.

Prerequisite: THEA 1450.

THEA2480 - Intermediate Jazz I

Credits: 1

Continues studies in techniques and principles of jazz dance. Instructor permission required.

USP Code [(none)<>H]

Prerequisite: THEA 1480.

THEA2720 - Intro to Stage Combat

Credits: 2

The basic techniques used in staging both unarmed stage combat and rapier and dagger fight scenes. Students will experience the process of learning, rehearsing, and performing fight scenes. Includes analysis, discussion, training exercises, and choreographed performance. General curriculum follows that set forth by the Society of American Fight Directors.

Prerequisite: THEA 1100.

THEA2790 - Stage Management

Credits: 3

Study of the essential elements of supervising theatrical productions. Stresses the art of organizing auditions, casts, crews, rehearsals, and performances while developing a unique professional relationship with directors, designers and actors. Students will work on a live production.

Prerequisite: THEA 1100, THEA 1200, THEA 2220.

THEA2800 - Stage Lighting I

Credits: 3

Examines the elemental aspects of stage lighting including equipment, facilities, color, and fundamental electricity. Requires studio work on departmental productions. Intended for majors in the program.

Former Course Number [3800]

Prerequisite: THEA 2150 and THEA 2220.

THEA2810 - Scenic Painting for the Theatre

Credits: 3

Introduces the art of scenic painting by the hands-on use and instruction of a variety of scenic paints, application on select construction materials, the use of unique tools and techniques commonly used to paint scenery for the stage. Safe use and proper handling of such material are addressed.

Prerequisite: THEA 2220.

THEA2900 - Sound Design for Theatre and Dance

Credits: 3

Examines the basic aspects of sound design for the theatre, dance, entertainment and film worlds. Topics covered include recording, sampling, live mixing, playback, and non-linear editing through several software packages.

Prerequisite: THEA 2220.

THEA2990 - Period Style for Theatre I

Credits: 3

First semester of a one-year survey. Studies antiquity to the Renaissance with an overview of the architecture, décor, clothing, arts and culture as related in their use and understanding of Western drama. The social, economic, and political histories of each period will be discussed as well. THEA 2990 and THEA 2995 should be taken in sequence.

THEA2995 - Period Style for Theatre II

Credits: 3

Second semester of a one-year survey. Studies Renaissance to Contemporary with an overview of the architecture, decor, clothing, arts and culture as related in their use and understanding of Western drama. The social, economic, and political histories of each period will be discussed as well. THEA 2990 and 2995 should be taken in sequence.

Prerequisite: THEA 2990 or permission of instructor.

THEA3000 - Special Topics in Theatre

Credits: 3

Max Credit (Max. 9)

Provides undergraduates with the opportunity for in-depth study in areas of Theatre not offered in regular courses or independent study. Course includes discussions on specific topics as well as studio work.

Prerequisite: 6 credit hours in Theater/Dance.

THEA3021 - Foundations of Dance Pedagogy

Credits: 1

Introduces students to basic theories and practices of dance pedagogy. Lecture and discussion will be balanced with peer teaching and coaching, observation of lessons and integration within a dance classroom situation with some teaching responsibilities and development of a portfolio with lessons and resources for teaching.

Prerequisite: sophomore standing in the department of Theatre and Dance; successful completion of THEA 3420 or THEA 3440.

THEA3100 - Kinesiology for Dance

Credits: 3

Encompasses seminar in current kinesiology research for dancers. Includes practicum based projects, lectures and supplementary materials.

Prerequisite: ZOO 2040.

THEA3160 - Advanced Stage Makeup

Credits: 2

Extension of Stage Makeup, focusing primarily on the development of a life mask and ultimately prosthetics using a variety of mediums.

Prerequisite: THEA 2160.

THEA3400 - Vertical Dance II

Credits: 1

A continuing course in vertical dance emphasizing the math and physics of the rigging; safety and design, choreography and research in the field.

Prerequisite: completion of THEA 2400 and consent of instructors.

THEA3410 - Classical Ballet III/I

Credits: 1.5

Max Credit (Max. 3)

A second year, first semester ballet technique class for dance majors and minors. Class meets three times per week. Emphasis is placed on improving technical skills and learning more advanced steps. Includes research into one discipline of ballet.

Prerequisite: successful completion of THEA 2440 and admission by permission only. Limited to dance majors and minors.

THEA3420 - Classical Ballet III/II

Credits: 1.5

Max Credit (Max. 3).

Second semester of the second year ballet technique class. Emphasizes broadening the dancer's movement vocabulary while refining acquired technical skills. Dancers begin work in study of Baroque dance terms. Class meets three times per week.

Prerequisite: successful completion of THEA 3410 or equivalent required. Limited to dance majors and minors; admission by permission only.

THEA3430 - Modern Dance III/I

1708

Credits: 1.5

Max Credit (Max. 3)

A second year, first semester, intermediate level modern dance technique class for dance majors and minors. Continued training in classical modern dance and continued historical survey of modern dance will be augmented by rhythmic analysis and compositional forms. Class meets three times per week.

Prerequisite: successful completion of THEA 2440 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA3440 - Modern Dance III/II

Credits: 1

5

Prerequisite: THEA 3430 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA3480 - Jazz III/I

Credits: 1

Max Credit (Max. 2)

An intermediate jazz technique class. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation and incorporate them into class compositions.

Prerequisite: THEA 2480.

THEA3490 - Jazz III/II

Credits: 1

Max Credit (Max. 2)

An advanced class in jazz technique and performance. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation as well as incorporate them into class compositions.

Prerequisite: THEA 3480.

THEA3501 - Screen Writing and Television Writing

Credits: 3

This class introduces students to the craft of writing for movies and television. Strong emphasis is placed on character and story development as well as how the Hollywood entertainment industry works.

Prerequisite: COM1 or consent of instructor.

THEA3600 - Teaching Theatre in Elementary or Secondary School

Credits: 3

Focuses on aspects of age appropriate teaching methods, strategies, and curriculum planning for either elementary or secondary education. Additional emphasis include planning a production season, arts management and budgeting, using national and state content and performance standards, assessing student growth, and developing community advocacy plans.

Prerequisite: THEA 1100.

THEA3650 - Theatre for Young Audiences: Plays and Production

Credits: 3

Highlights aspects of performance and directing for child audiences. Students will explore the work of outstanding contemporary playwrights who are writing for young audiences, and develop techniques in writing, acting, and directing for and with young people.

Prerequisite: THEA 1100.

THEA3730 - Intermediate Acting

Credits: 3

Develops the actor's voice and body for characterization and character interaction through performance of scenes. Study of character and scene analysis.

Prerequisite: THEA 1100.

THEA3740 - Acting Styles

Credits: 3

Focuses on textual analysis of plays from different periods and styles of dramatic literature. Emphasizes vocal and physical interpretation of character as represented in non-realistic styles of drama.

Prerequisite: THEA 1100 and THEA 3730.

THEA3750 - Acting for the Camera

Credits: 3

Addresses performance skills required in acting for the camera. Covers various techniques, styles, and skills necessary to be successful in the professional world of film and television as an actor. Students perform scenes for 3-camera and single camera set-ups, and become familiar with rudimentary technical skills as crewmembers for shoots. Lecture and test material cover career opportunities, union affiliations, and current trends in the film and television industry.

Prerequisite: THEA 1100 and THEA 3730. THEA 3805. Stage Lighting II.

THEA3810 - Scene Design I

Credits: 3

An in-depth study of idea development from script analysis through design conception using different types of theaters and

source material. The design process will cover research, drawing, drafting, model making, and rendering.

Prerequisite: THEA 2150 and THEA 2220 or by permission of instructor.

THEA3820 - Stage Costuming I

Credits: 3

A study of basic drawing and rendering skills, and a selective study of historical silhouettes. Objectives include the ability to trust instinct, application of the basic elements of design, applying historical reference and research to a specific character, developing a concept and finally the application of these principles to a final project.

Former Course Number [4840]

Prerequisite: THEA 1100.

THEA3840 - Historical Costumes from the Skin Out

Credits: 3

Learning how to replicate period gowns and undergarments prior to the 1920s by draping and flat-patterning techniques. Includes the research and construction of one complete set of period undergarments and gown either as an individual or in a team to be determined by the complexity of the garment and the skill level of the students.

Prerequisite: FCSC 3174 (4170) or FCSC 3175.

THEA3850 - Design and Technology Seminar

Credits: 2

Introduces designer/technician to process of preparing successful interview material, including a professionally developed portfolio. Exposes designer/technician to business aspects of the theatre world, including resumes, letters of inquiry and application, contracts, unions and professional organizations, internships, apprenticeships, URTAs and professional design/technical training programs. Culminates in junior End-of-the-Year Evaluations.

Prerequisite: junior standing in the BFA Program with Design/Technical emphasis.

THEA3890 - Lighting CADD

Credits: 3

Designed for the advanced lighting student, provides further exploration of the computer technology that has become so critical for modern lighting design. Introduces students to software programs such as VectorWorks, Lightwright, and Photoshop, as well as networking and advanced programming for modern light boards.

Prerequisite: THEA 2250 and THEA 2800.

THEA3910 - 20th Century Theatre Diversity

Credits: 3

Studies plays and production techniques, within the context of historical and sociological events, as developed in the 20th

Century that has led to the cultural diversity seen in modern theatre.

Former Course Number [591]

Prerequisite: junior standing.

THEA3950 - Dialects for the Actor

Credits: 3

Introduces the actor to five major dialects for the stage. Examines sensibility, vowel and consonant changes, pitch placement and charting.

Prerequisite: THEA 1100, THEA 1700, and THEA 2170.

THEA4001 - Historical Dance

Credits: 2

Max Credit (Max. 2)

Historical dance forms in the "Noble Style" dating from the 15th through 18th Centuries. Class work covers the relationship of musical forms to the specific step vocabulary and dances of each period, deportment, period costume as it relates to movement, social environment, period style with an emphasis on reconstruction of 17th and 18th Century dances from Feuillet notation.

Prerequisite: THEA 3440.

THEA4010 - Advanced Ballet

Credits: 1-3

Max Credit (Max. 8)

A continuing course in the principles and techniques of classical ballet. Emphasis is placed on continuing to broaden the dancer's movement vocabulary while refining acquired technical skills.

Prerequisite: THEA 3420. Limited to dance majors and minors; admission by permission only.

THEA4030 - Advanced Modern Dance

Credits: 1-3

Max Credit (Max. 8)

This class will develop a professional dancer capable of working within diverse modern dance styles and techniques through the interweaving of classical and contemporary movement modalities along with an experiential anatomy approach.

Prerequisite: THEA 3440. Limited to dance majors and minors; admission by permission only.

THEA4060 - English/Theatre Studies in

1712

Credits: 3

Identical to ENGL 4060.

THEA4200 - 20th Century Dance

Credits: 3

Intensely studies dance in 20th Century, emphasizing contemporary movement in modern, ballet, jazz and musical theatre dance. Examines social, political and aesthetic trends influencing dance theory and performance.

USP Code [CA,WC<>COM3]

Prerequisite: THEA 2200.

THEA4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed CLAS 4230/ENGL 4230.

Prerequisite: WB or COM2.

THEA4250 - Beginning Dance Composition

Credits: 2

Presents and criticizes movement studies based on various approaches to composition. Explores experimentation in choreography.

Prerequisite: THEA 2420, THEA 2440.

THEA4260 - Intermediate Dance Composition

Credits: 2-3

Prerequisite: THEA 4250 and consent of instructor.

THEA4330 - History of American Musical Theatre

Credits: 3

History of the American Musical from its inception to today. Emphasis on developments and literature.

USP Code [WC<> COM3]

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at the 3000-level.

THEA4500 - Advanced Playwriting

Credits: 3

An intensive continuation of THEA 3500. Focuses on the creation, analysis and rewriting of play script(s), culminating in a

public reading or performance of the script(s).

Prerequisite: THEA 2030.

THEA4600 - Teaching Theatre Artists: Service Learning in the Community

Credits: 3

Focus on Service Learning in the Community. Students will have the opportunity to observe various settings in the community of development of theatre program. Some areas of observation and practicum include drama/theatre-in-education, community-issue-focused-theatre, and theatre with special populations, crisis prevention, drama therapy, Preventive Medical Agencies, etc.

Prerequisite: THEA 1100.

THEA4700 - Auditioning and Careers in Dance

Credits: 1

Designed for dance majors as a culminating course in preparation for final semester auditions and applications for companies and graduate schools. Through this course, students will set career goals, create an audition portfolio, and gain exposure to the many challenges and opportunities in dance.

Prerequisite: senior standing, THEA 1021, and one semester of THEA 4010 or THEA 4030.

THEA4710 - Advanced Scene Study

Credits: 3

Max Credit (Max. 6)

Involves intensive work at an advanced level dealing with individual actor's problems through the medium of scene study.

Prerequisite: THEA 3740.

THEA4720 - Auditioning and Professional Issues

Credits: 3

Introduces actors to process of finding, preparing and executing successful audition material, including monologues, songs and dance combinations. Exposes actors to business aspects of the theatre world, including resumes, photos, contracts, unions, internships, apprenticeships, Equity Membership Candidacy programs, URTA's and professional actor training graduate programs. Culminates preparation for final semester auditions for the company/school of choice.

Prerequisite: THEA 1100, THEA 3730 and THEA 3740.

THEA4730 - Movement for Actors

Credits: 2

An exploration of the underlying physical skills of actors as well as the art of physical acting and non-verbal storytelling. We will be using a mix of Viewpoints, LeCoq, Suzuki, and other practitioners' contributions, including Mask, Mime, Clowning, Devised

1714

Theatre and more.

Prerequisite: THEA 1100 and THEA 1700.

THEA4770 - Summer Theatre

Credits: 1-3

Offers credit for participation in the Wyoming Summer Theatre program in all phases of production.

When Offered (Offered summer session)

Prerequisite: 12 hours in theatre and consent of instructor.

THEA4800 - Stage Lighting-Production

Credits: 3

Explores design and execution of lighting for theatrical production. Includes practical laboratory work with Theatre & Dance productions.

Prerequisite: THEA 2800, THEA 2900, and 3805.

THEA4810 - Scene Design II

Credits: 3

Building on previous coursework, this course will focus on further development of the individual creative and design processes, honing research and presentation skills, and refinement of artistry and craftsmanship. Strong emphasis will be on the presentation of ideas and the advancement of the portfolio.

Prerequisite: THEA 2250 and THEA 3810.

THEA4820 - Directing I

Credits: 3

Tools course. Focuses on basic pictorial and blocking skills of the director. Includes in-class exercises that cover structural and character analysis of play scripts, blocking annotation and prompt scripts, developing ground plans, creating compositions with emphasis, focus and balance, and employing movement as a dynamic tool. Requires two outside directing projects with verbal evaluations of all project work.

Prerequisite: THEA 2010, THEA 2020, THEA 3730, and THEA 3810 or instructor permission.

THEA4830 - Directing II

Credits: 3

Focuses on creative process of developing directorial concepts, establishing the world and style of the play, working with the actor, and functioning as a designer. Includes exercises that analyze different directorial approaches, as well as the audition and casting process. Culminates one-act mounted production performed before invited audience.

Prerequisite: THEA 4820 and written permission of instructor.

THEA4845 - Costume Fit and Alteration

Credits: 3

Focuses on fitting modern clothing and historical costumes to individuals. Students learn how to identify fit issues in a fitting, make the proper corrections and fit the garment again. Students use a combination of previously constructed garments and also pattern garments to fit.

Prerequisite: FCSC 3174 (4170) or FCSC 3175.

THEA4850 - Stage Costuming II

Credits: 3

Explores costume design, emphasizing various rendering techniques. Emphasis is placed on the portfolio.

Prerequisite: THEA 3820.

THEA4880 - Advanced Theatre Practice

Credits: 1-2

Prerequisite: 12 hours in theatre and consent of instructor.

THEA4930 - Theatre History I

Credits: 3

First semester of a one-year series. Surveys theatrical and dramatic practices from origins of Western European theatre to the theatre of the avant-garde. Specifically focuses on the climate of ideas and theoreticians, theatrical practitioners and audiences. Offered fall semester.

USP Code [WC<> COM3]

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at 3000-level.

THEA4940 - Theatre History II

Credits: 3

Second semester of a one-year series. Continues THEA 4930.

Prerequisite: THEA 4930.

THEA4950 - Senior Thesis

Credits: 3

Encompasses senior research project under faculty member guidance and supervision.

Prerequisite: senior standing.

THEA4960 - Senior Project

Credits: 1-3

Max Credit (Max. 3)

Exercise in the practical application of production, centered on a UW production, either main stage or studio. It may deal with design in scenery, costumes, properties, sound, makeup, playwriting, technical direction, directing, dance pedagogy, or choreography. The project is intended to be a "real" exercise in theatrical production.

THEA4975 - Theatre/Dance Internship

Credits: 1-12

Max Credit (Max. 12)

The intent of this course is designed to provide professional experiences to students outside of the academic curriculum of Theatre and Dance Department. It is designed to advance the students potential career opportunities and help advance their knowledge in the field.

Restricted Restricted to sophomores, juniors, and seniors.

Prerequisite: Must have completed 6 hours in the department of Theatre and Dance.

THEA4990 - Research in Theatre

Credits: 1-3

Prerequisite: 6 hours in area of research and consent of instructor.

University of Wyoming

UWYO1000 - IC for Undeclared Students

Credits: 2

An introduction to the intellectual community of the University of Wyoming, information literacy, and higher education in general, and is specifically intended for students who have not yet made a decision about their college major. Students will begin to develop the critical thinking skills that are necessary in higher education and to explore the primary intellectual activities of various disciplines.

Cross Listed A&S 1000.

USP Code [I,L<>(none)]

UWYO1050 - Student-Athlete Academic Success

Credits: 1

Introduces first-year student athletes to U. W. Includes an introduction to campus resources, time management and study skill

techniques, exploration of learning styles, diversity topics, and strategic goal setting to be a successful student and athlete.

UWYO1060 - College Athletics and Society

Credits: 3

UWYO1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

UWYO1105 - Academic Success Skills

Credits: 1-2

Max Credit (Max. 2)

Designed to provide students the necessary skill set to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation and more.

UWYO1205 - Student Success Services First Year Seminar

Credits: 1

First year students enrolled in the Student Success Services project will learn how to utilize campus resources and understand, her/his interests and values and develop the ability to establish and work toward short-term and long-term career goals, apply personalized study strategies and interpret university, college, and departmental rules and regulations.

USP Code [L,<>(none)]

Prerequisite: Freshman only (exclusively for students who are part of the SSS project).

UWYO1450 - Critical Reflection in Intellectual Communities

Credits: 3

Intellectual Community course for the Synergy learning community. Supports WA reading, research, and writing activities. Provides opportunities for students to read critically, conduct primary and secondary research, investigate diversity issues, develop computer literacy, and learn about the intellectual expectations of college life. Unaffiliated with a major department.

USP Code [L,<>(none)]

UWYO1600 - Veterans Transition Course

Credits: 1

Provides returning veterans skills for successful transition to college and civilian life. Reviews tools for academic success, resources available to the veteran, information on veteran related challenges, and career planning resources. Students will develop skills in written, oral, and digital communication.

When Offered (Normally offered fall semester)

USP Code [L,<>COM2]

Prerequisite: Students must be a U. S. military veteran or an active duty military member.

UWYO3000 - Student Leadership in Supplemental Instruction

Credits: 2

Focuses on theoretical perspectives of group tutoring and peer leadership, best practices in supplemental instruction, and student reflection. Will strengthen leadership knowledge and skills and introduce effective methods for group facilitation and SI curriculum.

Prerequisite: closed to general enrollment.

UWYO3010 - Student-Athlete Leadership Skills

Credits: 1

Designed for students to gain and apply leadership skills among other topics such as healthy relationships, nutrition, budgeting, and preparing for internships. This course builds on UWYO 1050 Student-Athlete Academic Success, and prepares the student for UWYO 3050 Student-Athlete Career Preparation.

Prerequisite: COM1.

UWYO3050 - Student-Athlete Career Prep

Credits: 1

Works with junior and senior student-athletes as they prepare to leave college and embark on their career search. Includes topics such as: resume writing, cover letter writing, practice interviews, professional attire, interview etiquette, and mental health after college athletics.

Prerequisite: COM2.

UWYO3600 - Veterans: Campus-To-Career

Credits: 3

Provides veterans with skills for successful transition from campus to the global workforce. Reviews tools for career success, resources available to veterans, information on veteran related challenges, and career planning resources. Students will develop skills in written, oral, and digital communication. Students will explore web based job search platforms and attend job fairs. Course intended for U. S. military veterans or an active duty military member.

USP Code [(none)<>COM3]

Prerequisite: COM2.

UWYO4101 - BGS Capstone Design

Credits: 3

The capstone course has two major focuses: encouraging you to reflect on and integrate the learning you've done on your way to this degree and offering you the chance to apply that learning towards an interesting, important problem that makes good use of your growing expertise. The course also provides you the chance to refine your career-advancement materials and to develop a

stronger understanding of the norms and values of fields that interest you.

USP Code [(none)<>COM3]

Prerequisite: COM2.

UWYO4965 - Directed Studies/Research Problems

Credits: 1-3

Max Credit (Max. 12)

Interdisciplinary international undergraduate research or short-term study abroad project under the supervision of a visiting faculty member. Topics and themes will vary based on the international research and study abroad opportunities available.

Prerequisite: Completion of COM1 and consent of instructor. Undergraduate status in good academic standing. Additional prerequisites will be determined by instructor of record.

Wyoming Institute for Disabilities

WIND2100 - Introduction to Disability Studies

Credits: 3

Provides students with an overview of the disability studies field. Students gain introductory knowledge about the disability studies perspective by examining the work of scholars from many academic backgrounds, which will facilitate students' understanding of the interdisciplinary nature of disability studies.

USP Code [CH,D<>H]

WIND2500 - Topics in

Credits: 1-3

Max Credit (Max. 6)

Provides students with the opportunity to gain introductory knowledge by examining various topics in the field of Disability Studies.

Prerequisite: Consent of instructor.

WIND2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and subjectivity, and the politics of health, sexuality, and care.

Cross Listed GWST 2700.

USP Code [D<>H]

WIND3150 - Literature and Medicine

Credits: 3

This course explores how literature and memoirs have grappled with illness, disease, and disability, paying particular attention to the perspectives of doctors, nurses, patients, families, and communities in shaping meanings of diagnoses, health, and access to care.

Prerequisite: Completion of COM1.

WIND4020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed SOWK 4020.

Dual Listed WIND 5020.

USP Code [CS<>COM3]

Prerequisite: WIND 2100 or WB or COM2.

WIND4050 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Offers the advanced student the opportunity to pursue a topic of interest with the direction of an instructor in disability studies.

Dual Listed WIND 5050.

Prerequisite: WB and consent of instructor.

WIND4100 - Global Disability Studies

Credits: 3

The course investigates global approaches to disability, including the UN Convention on the Rights of Persons with Disabilities (CRPD), and crucial disability issues such as education, employment, poverty and social integration. Students will carry out research projects and present on their work.

USP Code [{none}<>COM3]

Prerequisite: WIND 2100 or WIND 4020 or consent of instructor.

WIND4200 - Diverse Minds

Credits: 3

Through investigations of novels, memoirs, films, and media representations of intellectual disability, autism/neurodiversity, and psychiatric disability, students critically analyze figurations of "unstable," "unruly," or what we will conceptualize as "diverse" minds.

Dual Listed WIND 5200.

USP Code [none] < COM3]

Prerequisite: WIND 2100 or consent of instructor.

WIND4500 - Practicum

Credits: 3

Provides students practical experience in the field of Disability. Typically taken during a student's final semester in the Disability Studies Minor.

Prerequisite: completion of WIND 2100, and WIND elective, WIND 4020 (or concurrent enrollment).

WIND4990 - Topics in

Credits: 1-3

Max Credit (Max. 12)

Provides upper division/graduate students with the opportunity for critical analysis and in-depth examination of various topics in the field of Disability Studies.

Prerequisite: consent of instructor.

WIND5020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed SOWK 5020

Dual Listed WIND 4020.

Prerequisite: WIND 2100 or WB or COM2.

WIND5050 - Independent Study

Credits: 1-3

Max Credit (Max. 6)

Offers the advanced student the opportunity to pursue a topic of interest with the direction of an instructor in disability studies.

Dual Listed WIND 4050.

Prerequisite: WB and consent of instructor.

WIND5100 - Topics In:

Credits: 1-3

Max Credit (Max. 12)

Provides graduate students with the opportunity for critical analysis and in-depth examination of various topics in the field of Disability Studies.

Prerequisite: upper division/ graduate standing.

WIND5200 - Diverse Minds

Credits: 3

Through investigations of novels, memoirs, films, and media representations of intellectual disability, autism/neurodiversity, and psychiatric disability, students critically analyze figurations of "unstable," "unruly," or what we will conceptualize as "diverse" minds.

Dual Listed WIND 4200.

Prerequisite: consent of instructor.

Zoology and Physiology

ZOO1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP Code [(none)<>COM2]

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO3010 - Vertebrate Anatomy, Embryology, and Histology

Credits: 4

Provides a comprehensive overview of vertebrate anatomy. The structural organization, embryological derivation, and histological organization of the major organ systems will be emphasized. The evolution and functional organization of anatomical structure will also be emphasized. Includes laboratory sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: LIFE 2022 or equivalent, and a semester of chemistry.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP Code [WC,L<>COM3]

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (*Xenopus* tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and *Drosophila*).

Cross Listed NEUR 4295.

Dual Listed ZOO 5295.

Prerequisite: ZOO 4280.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Dual Listed ZOO 5650.

Prerequisite: LIFE 2022.

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO4740 - Fish Culture and Nutrition

Credits: 3

Studies methods in artificial propagation of fishes. Includes spawning, hatchery methods, water quality requirements and nutritional requirements. Includes laboratory.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022, CHEM 1020.

ZOO4900 - Problems

Credits: 1-8

For advanced students. Studies some particular problem or phase of zoology, or presents reviews and discussions of current advancement in zoological investigations. Content is arranged to suit individual needs of students.

Prerequisite: courses necessary to pursue the problem selected; prior written consent of the instructor.

ZOO4970 - Internship in Wildlife Management

Credits: 1
Max Credit (Max. 1)

Provides practical field experience in resource management for undergraduate credit.

Prerequisite: consent of instructor.

ZOO4971 - Internship in Zoology and Physiology

Credits: 1-3
Max Credit (Max. 6)

Provides practical experience in selected biological fields by working with a professional to help bridge the gap between academic and the world of work.

Prerequisite: consent of instructor.

ZOO4975 - Practicum in Laboratory Instruction

Credits: 1-3
Max Credit (Max. 6)

For advanced students. Students will assist GAs and professors in laboratory preparation and demonstration in undergraduate teaching labs.

Prerequisite: consent of instructor.

ZOO5050 - Statistical Methods for the Biological Science

Credits: 3
General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 2020, STAT 3050, STAT 5050, 5060, STAT 5070.

Cross Listed STAT 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

ZOO5060 - Fundamental Concepts in Evolution

Credits: 3
Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/BOT 5060.

Prerequisite: graduate student in good standing.

ZOO5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed NEUR 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

ZOO5190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces the discipline which has risen between the traditional fields of physiology and ecology and provides an understanding of animal distribution and survival.

Dual Listed ZOO 4190.

When Offered (Offered spring semester)

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO5235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 5235.

Dual Listed ZOO 4235.

Prerequisite: graduate standing.

ZOO5270 - Writing and Reviewing Science

Credits: 4

This course will help students prepare a scientific manuscript for submission to a peer-reviewed journal; in so doing, students will become more effective, efficient, and confident writers. Students will learn principles of effective writing, how to prepare a manuscript for publication, navigate the peer-review process, and write a constructive review.

Cross Listed ENR 5270.

Prerequisite: Students must have graduate standing and an analyzed dataset on which the manuscript will be based. Students must have approval from their advisors and key collaborators before embarking on this journey. Students are also encouraged to maintain this approval throughout the semester.

ZOO5280 - Introduction to Neuroscience

Credits: 3

Examines the basic properties of neurons and from there identifies determinants of brain development and how neuronal circuits are formed. How neuronal circuits underlie processing sensory information, coordinated movement, complex functions (e. g. sleep, learning) and homeostasis are discussed.

Cross Listed NEUR 5280.

Dual Listed ZOO 4280.

Prerequisite: ZOO 3115 or equivalent.

ZOO5295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed NEUR 5295.

Dual Listed ZOO 4295.

ZOO5300 - Wildlife Ecology and Management

Credits: 5

Concepts of vertebrate ecology integrated with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. viability analysis, monitoring, habitat assessment), and ecosystem management approaches are discussed. Lab included.

Dual Listed ZOO 4300.

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO5310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and recruitment, and the use of yield models in fisheries biology. Laboratory and field exercises included.

Dual Listed ZOO 4310.

Prerequisite: ZOO 4330.

ZOO5330 - Ichthyology

Credits: 3

Studies anatomy, physiology, and classification of fishes, emphasizing classification and identification of Wyoming fish. Includes laboratory.

Dual Listed ZOO 4330.

Prerequisite: LIFE 2022 or LIFE 2023.

ZOO5340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration, and asexual reproduction. Emphasizes mechanisms that create form and cellular differentiation.

Dual Listed ZOO 4340.

Prerequisite: one year of life science or one year of chemistry.

ZOO5350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history, and ecology of the birds of North America. Laboratory included.

Dual Listed ZOO 4350.

Prerequisite: LIFE 2022.

ZOO5370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology, and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 4370.

Prerequisite: LIFE 2022 or LIFE 2023.

ZOO5380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 4380.

Prerequisite: LIFE 2022.

ZOO5400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 4400.

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050.

ZOO5405 - Winter Ecology of the Yellowstone Ecosystem

Credits: 2

Winter Ecology emphasizes the effects of winter abiotic conditions on organisms and organismal adaptations. Energy flux, snowpack physics, organismal adaptations, avalanche awareness, and the influence of winter on wildlife management are emphasized through lectures and field laboratories. Students will develop an independent research project and present their results.

Prerequisite: graduate standing.

ZOO5415 - Behavioral Ecology

Credits: 3

Behavioral ecology applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 4415.

Prerequisite: ZOO 3600 or LIFE 3400.

ZOO5420 - Ecological Inquiry

Credits: 3

Addresses basic ecological concepts and natural resource management issues in the Greater Yellowstone Ecosystem (GYE). Emphasis will be placed on developing critical thinking skills and exploring the effects of resource management policy and actions. Course direction will involve moving from a known facts way of thinking in to realm of evaluating effects of human management of the GYE.

Prerequisite: LIFE 2022, LIFE 3400, and graduate standing.

ZOO5430 - Ecology of the Greater Yellowstone Ecosystem

Credits: 3

Covers plant and animal community ecology from both a qualitative and quantitative perspective. Topics include: community interaction of plants and animals; community dynamics, succession, and disturbance; basic data collection and statistical analysis of habitat association data; and the effect of abiotic factors on community structure.

Prerequisite: LIFE 2022, LIFE 3400, and graduate standing.

ZOO5500 - Quantitative Analyses of Field Data

Credits: 4

A practical guide to the analysis of messy field data, including data exploration, generalized linear and additive models, mixed models, autocorrelation, and model selection using Program R. Students will spend one intensive week learning methods and the rest of the semester analyzing their own data and writing a manuscript.

Cross Listed ECOL 5500.

Prerequisite: graduate standing.

ZOO5520 - Habitat Selection

Credits: 2

In this course we will cover theory and behavioral/evolutionary concepts related to the process of habitat selection, the contexts under which habitat choices are adaptive or maladaptive, and different types of anthropogenic habitat change and the consequences for animals in the wild.

Cross Listed ECOL 5520.

Prerequisite: graduate students in good standing.

ZOO5530 - R Intro for Wildlife Ecology

Credits: 1-4

Max Credit (Max 4)

An intensive introduction to program R for graduate students in the fields of wildlife and fisheries ecology. Students will gain a general knowledge of R code and an ability to identify and solve problems for their particular data management and analysis needs.

ZOO5540 - Invertebrate Zoology

Credits: 4

Studies invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 4540.

Prerequisite: LIFE 2022.

ZOO5600 - Research in Physiology

Credits: 1-16

Max Credit (Max 16)

Opportunities are available for research in physiology and in animal behavior. Maximum credit not to exceed 8 hours for master's candidates and 16 hours for PhD candidates.

ZOO5650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Cross Listed ECOL 5650.

Dual Listed ZOO 4650.

Prerequisite: graduate standing.

ZOO5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms are covered in addition to the basic neurophysiology of nerve cells. The laboratory complements the lecture sequence.

Cross Listed NEUR 5685.

Prerequisite: one course in physiology, chemistry, physics.

ZOO5690 - Advanced Animal Behavior

Credits: 3

An advanced consideration of research in, and theory of, animal behavior.

Prerequisite: senior or graduate standing in zoology or psychology.

ZOO5715 - Seminar in Neuroscience

Credits: 2

Max Credit (Max 20)

A continuing seminar. All students in the graduate neuroscience program are expected to register for this seminar each semester. The interdisciplinary approach to the nervous system is used employing work from physiology, neuroanatomy and neurochemistry, psychology, pharmacology, and biochemistry.

Cross Listed NEUR 5715.

Prerequisite: admission to the graduate neuroscience program or graduate standing.

ZOO5725 - Transmission Electron Microscopy

Credits: 3

With the emphasis on modern techniques, course prepares students via theory and technical experience to use transmission electron microscopy in biological and material science research. An individual research project is required.

Prerequisite: consent of instructor.

ZOO5735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g.

circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 4735.

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO5740 - Biological Confocal Microscopy

Credits: 2

With the advances of technology, confocal microscopy is an increasingly important tool for biological research. Teaches students the basic principles of confocal microscopy and its biological applications. This is a hands-on course and students have the chance to practice on a state-of-the-art confocal microscope.

ZOO5750 - Research: Ecology

Credits: 1-16

Max Credit (Max 16)

A wide variety of biotic communities, both terrestrial and aquatic, occur in Wyoming which afford excellent opportunities for ecological studies with responses of animals to the physical, chemical, and biotic factors of their environment. The research must be conducted under the supervision of a faculty member.

ZOO5820 - Research in Vertebrate Fauna

Credits: 1-16

Max Credit (Max 16)

Wyoming affords unusual opportunities for the study of a wide variety of vertebrate animals. The taxonomy, distribution, and certain aspects of the life histories of these animals are still inadequately known and afford excellent opportunities for research. Numerous problems concerning the management of our game animals remain to be investigated. The research must be conducted under the supervision of a zoology faculty member.

ZOO5840 - Advanced Fisheries Management

Credits: 3

Familiarizes students in wildlife management and ecology with the advanced methods and techniques in fisheries management.

Prerequisite: ZOO 4310/ZOO 5310 and consent of instructor.

ZOO5890 - Graduate Seminar

Credits: 1-4

Max Credit (Max 10)

Provides an opportunity for graduate students to critically evaluate publications on zoological research.

Prerequisite: 20 hours of biological sciences.

ZOO5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

ZOO5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

ZOO5930 - Network Analysis

Credits: 2

Addresses problems in ecology, neurobiology, sociology, geography and behavioral ecology. Networks consists of entities (nodes) such as neurons, individuals or locations, linked by interactions (e. g. , flow of information, pollen or behavior). Students will analyze topics of interest using R scripts. 2 hour lecture each week in spring semester.

Cross Listed ECOL 5930.

Prerequisite: graduate standing.

ZOO5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

ZOO5960 - Thesis Research

Credits: 1-12

Max Credit (Max 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ZOO5980 - Dissertation Research

Credits: 1-12
Max Credit (Max 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

ZOO5990 - Internship

Credits: 1-12
Max Credit (Max 12)

Prerequisite: graduate standing.

Other Courses

HYDR5980 - Hydrologic Sciences

Graduate level course designed for students who are involved in research for their dissertation project. Also used for student whose coursework is complete and are writing their dissertation.

Prerequisite: Enrolled in a graduate level degree program.

LTED5000 - Theoretical Foundations in LDTE

Credits: 3

Students investigate how human learning and cognitive organization and process relate to digital learning contexts. The content covers major learning theories and their implications for the instructional process through the educators' and learners' perspectives.

Prerequisite: graduate student status

LTED5480 - Issues in English as a Second Language and Bilingual Education

Credits: 3

A doctoral seminar that provides in-depth theoretical knowledge and analysis of major topics including common misconceptions about English learners (ELs) and bilingual/ESL programs, effective strategies, and methods for teaching ELs, and research findings in the areas of oral language and literacy development and academic achievement for bilingual learners.

Prerequisite: graduate student status

LTED5810 - Theoretical Perspectives on Writing

Credits: 3

A doctoral seminar aimed at providing students with a broad introduction to theoretical perspectives on writing processes and

practices as well as the contributions of theory to research on writing processes and practices.

Prerequisite: graduate student status

LTED5850 - Foundational Scholars in Social Science Research

Credits: 3

This doctoral course will focus specifically on important works of scholars in disciplines such as sociology, psychology, and other social science disciplines as their work pertains to language, literacy, and learning.

Prerequisite: graduate student status

LTED5880 - Public Digital Scholarship

Credits: 3

A doctoral seminar designed to support students in understanding what it means to be a public digital scholar including the challenges and benefits. Students will be expected to establish and develop an online presence as a public digital scholar.

Prerequisite: graduate student status

MATH3310 - Appl Diff Equations II

Credits: 3

Continues MATH 2310. Includes partial differential equations, Fourier series, boundary value problems, series solutions of ordinary differential equations, linear algebra, linear systems of equations and numerical methods.

Prerequisite: Prerequisites: grade of C or better in MATH 2210 and 2310.

MUSC1009 - The Roots of Country Music

Credits: 3

This online class examines the diverse musical practices that contributed to Country Music in the United States. Early styles and genres from the Anglo American and African American music traditions will be studied. Students will develop their musical vocabulary and hone basic listening and analytical skills.

SPAN4310 - Intro Hisp Ling

Credits: 3

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semiotics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.)

Corequisite: Prerequisites: SPAN 3050 or equivalent proficiency.

Advising Career Exploratory Studies (ACES)

Advising Career Exploratory Studies

222 Knight Hall

Jo Chytka, Director

Phone: (307) 766-2398 FAX: (307)766-2089

Web site: www.uwyo.edu/aces/index.html

ACES1105 - Academic Success Skills

Credits: 1-2

Designed to provide students the necessary skills to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation, and more.

Prerequisite: Students must obtain instructor approval to register.

ACES3000 - Peer Advising

Credits: 3

This course is designed to help you develop the skills, understanding, competencies, and dispositions needed to be an effective peer advisor at UW. Course content will cover student development theory, interpersonal skills, UW policies/procedures, UW academic requirements, and advising approaches.

Prerequisite: Sophomore standing, COM2, and

ACES3100 - Peer Advising Internship

Credits: 1-6

Max Credit (Max. 6)

Designed to help you apply the skills, competencies, and dispositions that were developed in ACES 3000. The course will allow you to apply and reflect upon student development theory, interpersonal skills, UW policies/procedures, UW academic requirements, and advising approaches. Each internship credit will require a minimum of 3 hours of work per week in the ACES office. Students and the peer advising supervisor will consult in establishing individual student hours.

Prerequisite: ACES 3000 and application to ACES Internship.

Credit Available to Undergraduate Students

- I. University of Wyoming Credit
- II. Transfer Credit
- III. Military Service Courses

The University of Wyoming offers credit towards an undergraduate degree through:

I. University of Wyoming Credit

Instructed Classes

Courses are offered on campus and at distance settings around the state, including recognized academic courses under faculty general supervision such as internships, clerkships, clinical experience, co-op programs, etc.

Distance courses

Unlike some institutions, UW delivers courses at a distance through its mainstream academic departments, not through a separate academic unit. Academic department heads have the authority to assign instructors to distance-delivered courses, including online courses. They also have a responsibility to ensure that those courses are comparable in rigor and effectiveness to courses delivered face to face.

For this reason, when a department offers a UW course both face to face and at a distance, any UW student may satisfy any relevant university-, college-, and department-level requirements or elective credit by taking the course in either format.

Exceptions may arise when it is necessary to reserve space in a distance-delivered course for off-campus students, who can't take the face-to-face version. In these cases, departments may reserve spaces for off-campus students. But to the extent that spaces remain available after all interested off-campus students have enrolled, these spaces must be available to interested on-campus students.

Credit by Examination

An examination of an appropriate type and content for the credit sought may be conducted to determine if the applicant's proficiency is equivalent to that which could be expected upon completion of a college-level course in the subject. An applicant found to have this level of proficiency will be awarded credit for that course and allowed to proceed either with more advanced courses or with courses in other areas.

The use of credit by examination, or credit for prior learning, in graduate programs is not allowed.

Information concerning credit by examination can be obtained by contacting the Office of the Registrar.

Departmental Exams

While there is no maximum placed on the amount of credit earned by examination, credit so earned does not count in fulfilling the residency requirement of 30 hours of upper division University of Wyoming credit.

A student may not be allowed credit by examination in a course in which the student is currently or was previously enrolled either for credit or as a visitor or auditor, except that credit by examination may be used as a means to obtain credit for courses previously taken at institutions from which credit is nontransferable. A student may not challenge equivalent courses.

A student may not earn credit by examination in a course if the student has completed a course in the subject matter area above the level of the course for which the examination is sought. However, at the discretion of the departments involved, during the add/drop period a student may challenge a lower-level course while enrolled in a higher-level course in the same subject matter area, if the course challenged is a prerequisite for the course in which the student is currently enrolled.

If an examination exists, eligible students who pay the testing fee of \$80.00 may not be denied an examination in the introductory undergraduate course in any department. "Introductory course" is interpreted as that course which is prerequisite for successive courses in the department. Additional fees for examinations offered by testing agencies other than the University of Wyoming are determined by the agency concerned.

Grades of S or U (satisfactory/unsatisfactory) are given in all examinations. Credit by examination is not included in the student's grade point average; it is, however, included in the hours earned toward graduation. The grade of S is the equivalent of a C or better. See below for specific subject requirements. Entry on the student's academic record for credit by examination is made only if a grade of S is obtained and is noted as a grade obtained by examination.

To qualify for undergraduate credit, the student must be currently registered at the University of Wyoming as a degree candidate. The student must also be able to demonstrate to the satisfaction of the chair of the department involved that background experience has prepared him or her to attempt a challenge examination if such an examination is sought. The department chair's decision will be based upon existing departmental constraints such as accreditation, graduation requirements, and program requirements.

Other Options Include:

- Subject CLEP tests
- AP tests
- International Baccalaureate (IB)
- DSST

Students showing proficiency by passing examinations such as the College Board Advanced Placement Program (AP), for example, or examinations developed by University of Wyoming departments may earn college credit through the level of demonstrated proficiency. Credit may be allowed on the basis of any testing procedure acceptable to any department, which may include tests of the AP program and both the general and subject (specific) examinations of the College Level Examinations Program (CLEP).

Advanced Placement (AP) Information

Subject	Acceptable Score	UW Course Number(s)/Title(s), Semester Credit Hours

Portfolio Evaluations

In recognition of factors in our society that produce great individual differences in backgrounds and preparation of students entering the university, the university has developed various options to assess extrainstitutional college-level learning. To qualify for undergraduate credit, the student must be currently registered at the University of Wyoming as a degree candidate.

Credit based on faculty evaluation of the kinds and extent of collegelevel learning which an applicant has acquired in prior extra-institutional settings, evidenced in a portfolio of documentation, may count toward university undergraduate graduation requirements. In such event, the student's degree program can be enriched by freeing time needed to take additional courses, or accelerated to earn the baccalaureate degree earlier and commence postgraduate studies sooner.

The number of credit hours able to be earned by means of a portfolio evaluation is normally limited to 12. Such credit, when awarded, shall be for specific University of Wyoming content-oriented courses (rather than given as X number of hours of credit in a general discipline area), following the college course model of assessment as defined by the Council for Adult and Experiential Learning. Portfolio assessment, when used, will be conducted by a committee of appropriate tenured faculty including at least one member with the academic rank of professor. *All credit assigned for experiential learning based upon portfolio evaluations is excluded from the minimum credit hour requirements as set forth in the university requirements.*

II. Transfer Credit

Transfer credit includes college courses accepted from other regionally-accredited colleges or universities. Such course work must be considered equivalent or comparable to course work required by the University of Wyoming. The university accepts only academic courses in the study of religion similar to those offered by the Religious Studies Program in the College of Arts and Sciences.

Students transferring to UW must have the registrar or records office of the previous school(s) send an official transcript to the University of Wyoming Admissions Office. Once all final transcripts have been received by the Admissions Office, the degree analysts in the Office of the Registrar will create an electronic record of all courses that transfer to UW.

Evaluations are not accomplished for students working toward a Second Bachelor's Degree or those admitted as non-degree seeking. Second Bachelor's students should consult with their adviser concerning the applicability of transfer work to their UW degree program.

The recording of credit does not automatically imply acceptance toward a degree since degree requirements vary from major to major. Questions concerning the transferability of course work from other institutions should be directed to the Office of the Registrar.

Nontraditional credits awarded by another institution will not normally be accepted by the University of Wyoming. They may be validated by departmental exam within the faculty regulations allowing for such examinations.

a. UW Policy (Academic Affairs Policy Letter, October 9, 2012)

UW maintains a system for accepting transfer credits from other institutions and prides itself on forward-looking approaches to distance education. The following clarifies policies for:

- Accepting transfer credit from Wyoming's public community colleges
 - Accepting transfer credit for students transferring to UW from other institutions
 - Accepting transfer credit for students enrolled at UW
1. **Transfer credit from Wyoming's public community colleges**

UW generally accepts credit earned at any Wyoming public community college in accordance with the Wyoming Transfer Catalog. This policy applies to students transferring to UW and to students enrolled at UW who take courses at one of these community colleges while they pursue degrees at UW. It does not apply to FYS credit earned by

students who earned concurrent enrollment FYS credit or students transferring with less than 30 semester hours. UW maintains an active regimen of institution-wide and discipline-specific articulation with Wyoming community colleges. These discussions, together with department-driven decisions about which courses to list in the statewide common course-numbering system, provide mechanisms that can ensure appropriate levels of course equivalency.

2. **Transfer credit for students transferring from other institutions**

The UW Office of the Registrar (OTR) maintains a list of course equivalencies and courses accepted for general credit from other institutions of higher learning. In maintaining this list, the OTR, in consultation with academic departments as necessary, determines which outside courses:

- are equivalent to specific UW courses
- count for general university-level credit
- are not transferable for university-level credit

For courses beyond the 1000-2000 level and in cases where questions arise, the OTR relies on academic departments to assist in the assessment.

For any student transferring to UW from another institution of higher learning, UW will adhere to the OTR's equivalencies on the date that the transcript is evaluated. If a course in question has not previously been articulated, the OTR will follow the normal protocol to make a determination. If an academic department determines that an outside course has been improperly articulated, the OTR will correct the equivalency. The corrected equivalency will apply to subsequent transfer students but not retroactively.

3. **Transfer credit for students enrolled at UW**

The university's faculty and administration expect UW students to earn credits by taking courses at UW. Exceptions may be appropriate in some instances. For example, the university encourages students to pursue opportunities to study abroad, whether through UW course offerings or through other approved programs. As another example, a student who spends a summer in another university town may also have a compelling case for taking a non-UW course and applying the credits to the UW transcript. There are many other possibilities.

For any student enrolled at UW, the university will guarantee transfer credits only for courses for which the student has received prior, course-specific approval from the Office of the Registrar. A Transfer Evaluation Form should be submitted prior to enrolling for a transfer course.

The only exceptions are transferable credits from Wyoming community colleges, as discussed above. In considering requests of this type, academic department heads may take into account the student's circumstances, department, and university-level learning outcomes such as global awareness, and the department faculty's assessment of the course's content, level, and academic rigor.

This policy has no effect on such programs as WICHE's Internet Course Exchange and other inter-institutional arrangements through which courses taught elsewhere count as credit-bearing UW courses.

b. Process

Transfer credit includes college courses accepted from other accredited colleges or universities. Such course work must be considered equivalent to course work required by the University of Wyoming. Students transferring to UW must have the registrar or records office of previous school(s) send an official transcript to the University of Wyoming Admissions Office. Once all final transcripts have been received by the Admissions Office, the degree analysts in the OTR will create an electronic record of credit transferred.

The recording of credit does not automatically imply acceptance toward a degree since degree requirements vary from major to major. Questions concerning the transferability of course work from other institutions should be directed to the Office of the Registrar.

c. Articulation: Earned Associate Degrees

1. **Wyoming Community Colleges**

Students entering UW beginning Fall 2001 who have completed an AA, AS, ADN, or AB degree from a Wyoming Community (spring 2001 or later) College receive credit toward completion of the lower division general education requirements included in the University Studies Program with the exception of the US/WY Government and Constitutions requirement. Students with an eligible associate's degree who have not completed both components of the US/WY Government and Constitutions requirement must complete it with coursework or challenge exam.

This policy applies to graduates receiving an Associate of Arts, and Associate of Sciences, Associate Degree Nursing, or an Associates of Business degree from any of the seven Wyoming Community Colleges. All graduates with an AA, AS, ADN, or AB degree complete a minimum of 64 college-level credits with a minimum of 2.000 GPA.

2. **Community College Articulation: effective spring 2012**

Graduates of regionally-accredited Colorado community colleges earning an AA/AS Spring 2012 or later are awarded the lower-division general education core in the same manner as graduates of Wyoming community colleges, with the exception of the US/WY Government and Constitutions requirement. Students must complete the Wyoming component through coursework or challenge exam. Spring 2008 (and later) graduates of Pikes Peak Community College are included due to a pre-existing articulation agreement.

Spring 2012 and later AA/AS graduates of Western Nebraska, Mid- Plains (Nebraska), and Colby (Kansas) Community Colleges will be extended the lower-division general education core in the same manner as Colorado schools above.

3. **Community College Articulation: effective spring 2015**

Graduates of regionally-accredited institutions earning an AA/ AS/AB Spring 2015 or later are awarded the lower-division general education core in the same manner as graduates of Wyoming community colleges, with the exception of the US/WY Government and Constitutions requirement. Students must complete the Wyoming component through coursework or challenge exam.

Transfer Credit from Regionally-Accredited U.S.Colleges and Universities

The Wyoming Transfer Catalog is a searchable online database of courses which the University of Wyoming has previously articulated from regionally-accredited U.S. institutions. Coursework may transfer in as equivalent, elective or NA. Elective coursework may be a general elective, academic department specific elective and/or elective with University Studies (USP) credit. Transfer courses which return values of "NA" in the UW Subject field are considered to be not transferable to UW.

UW operates on semester credit; credit is awarded credit hour for credit hour. Quarter hours are recognized as two-thirds (2/3) of a semester hour.

Academic advisors may submit an elective course to fulfill a major or curricular requirement. Elective courses may also be considered for University Studies requirements via the University Studies Petition process.

Students intending to transfer to UW are encouraged to meet with advisors and review both the Wyoming Transfer Catalog and the UW Catalog when planning their program of study to ensure courses taken elsewhere will transfer to UW as intended for their desired major. Final determination of transfer credit acceptance is made by the University Registrar and faculty. Students must submit official transcripts of all completed coursework before a final determination can be made on credit transfer.

These equivalencies are subject to change without notice.

d. Transfer Credit for Study Abroad

This institution will inquire about each veteran or veteran benefits eligible person's previous education and training, and request transcripts from **all** prior institutions, including military training, traditional college coursework and vocational training. Previous transcripts will be evaluated and credit will be granted, as appropriate. The student will be made aware of final decision.

III. Credit Evaluation Policy for VA Funded Students

The degree analysts in the Office of the Registrar determine whether the course work is transferable to UW. Evaluations for the granting of credit for military-based training are based on recommendations in the American Council of Education (ACE) guidelines. Individual colleges will determine whether such course work is applicable to their degree programs.

Registration and Enrollment in Courses

- Registration Procedures
- Academic Adviser
- Change of Registration
- Choice of College and Major
- Change of College, Major, or Adviser
- Definitions for Student Classifications
- Credit Hour Load
- Auditing a Course
- Graduate Credit for Seniors
- Class Attendance
- Academic Dishonesty

Registration Procedures

Eligible students can register, drop, add, and get a schedule of their courses through WyoRecords. To insure that students have seen an adviser, access numbers for each semester's registration are distributed through the academic advisers. Directions for registration are contained in the appropriate *Class Schedule*. *Class Schedules* are available online no later than one week prior to advising week. Students are responsible for following directions and deadlines contained in the *Class Schedules*.

The following categories of continuing students in good standing or on academic probation are eligible to register for the semesters indicated:

1. *For the fall semester:*
All students who were enrolled the previous fall, spring, or summer semester.
2. *For the spring semester:*
All students who were enrolled the previous spring, summer, or fall semester.
3. *For the summer session:*
Students who were enrolled the previous summer, fall, or spring semester.

All other applicants and students should complete admission requirements by the admission deadline. (Refer to the sections on undergraduate and graduate admissions in this catalog for deadlines.)

All information requested during admission and registration is important to the student and to the university and should be kept accurate and complete. If a student's address, telephone, major, adviser, or other vital information changes after enrollment, the Office of the Registrar should be informed without delay.

Academic Adviser

Academic advising is a decision-making process involving a partnership between the academic adviser and the student (advisee). In this partnership, issues and questions regarding personal, professional, and educational goals are examined and evaluated. This includes, but is not limited to, planning an appropriate course of study and the scheduling of classes.

The purpose of academic advising is to promote rational, informed, and independent choices by the student. To that end, the academic adviser is a significant link for the student to other resources in the university community. Students are expected to take the initiative in developing the adviser-advisee relationship and to assume an ever-increasing role in developing their own academic, career, and personal goals.

Change of Registration

Modification of a course schedule during the drop/add time period is accomplished through WyoRecords. After the end of the drop/add period, individual class withdrawals can be done by the students on WyoRecords. Changes to a student's registration or withdrawals are not official until the process is completed as prescribed.

The period of time allowed for modifying a student's schedule or withdrawing during the summer session or other special terms is established in regulations or by the registrar, subject to the approval of the vice president for academic affairs.

During the fall and/or spring semester(s):

1. *Dropping a class or changing sections:* A student may drop classes during the first eight class days of the semester (four class days for blocked courses).
2. *Adding a course or changing grading option:* A student may add classes, change sections, or change grading options or hours in variable-credit courses during the first four class days of the semester (two class days for blocked courses).
3. *Withdrawal from a course:* After the designated drop/add period, students may officially withdraw from individual regular term courses until fifteen class days after mid-semester (five days after the middle of the course for blocked courses). Withdrawing means that a non-punitive grade of "W" is assigned as the final grade for the class. Students considering withdrawing should contact the Student Financial Aid Office prior to withdrawing to fully understand how withdrawing will affect their aid and scholarships.

Students may withdraw from an individual course through their WyoRecords account. If a student has a hold on their account preventing them from withdrawing through WyoRecords, they may submit an online Class Withdrawal form available on the Office of the Registrar website. The online form is required for students who wish to withdraw from First Year Seminar classes.

Refunds for course withdrawal (when applicable) are based on the date the withdrawal is processed, not on submission of the online petition.

When a class has a status of "Indiv Course Withdrawal" on the "Add or Drop Classes" page in WyoRecords, the student has officially withdrawn. Students may also confirm that a final grade of "W" is noted on the transcript, which may be viewed through WyoRecords.

Unauthorized discontinuance of enrollment or unofficial abandonment of classes will result in a failing grade.

4. *All-School-Withdrawal (termination of enrollment):* Withdrawal from the university is the official termination of student status prior to the end of a fall or spring semester, but students may otherwise register for classes for the subsequent semester if they choose to do so. Students wishing to withdraw from all on-campus classes should initiate the procedure with the Dean of Students Office. Withdrawal from the university is not permitted during the last 15 days of a term. After clearing with the Dean of Students Office, the withdrawal form must be presented to the university cashier for initial processing. The Office of the Registrar will report withdrawals to instructors concerned. Students withdrawing from distance classes should send an email to the Office of the Registrar to initiate the process.

Choice of College and Major

The academic adviser is an excellent source of information about the adviser's professional field for students who have selected a major. Students who are undecided about the selection of a college and/or major and who seek specialized assistance in choosing educational and vocational objectives should contact the Advising, Career, and Exploratory Studies center. These units have programs designed to help the undeclared student acquire the tools to make an intelligent decision regarding an appropriate major discipline.

Change of College, Major, or Adviser

Students who wish to change their college, major, or adviser should obtain the appropriate form from either the Office of the Registrar or the office of the dean of the college of their current enrollment. Students wishing to transfer from one college to another must secure the signatures of both their present and future deans. Graduate students need the approval of the college dean and the head of the department to which the student is transferring. After all appropriate signatures have been obtained, the student should take the form to the Office of the Registrar.

Students who have completed their undergraduate work at the university and who wish to embark upon a graduate program, even through continuing their graduate work in the same field they pursued as undergraduates, will need to apply for graduate admission. (Refer to the section on graduate admission in this catalog for deadlines.)

Definitions for Student Classifications

Code	Class	Definition by earned semester hours
FR	Freshman	Under 30
SO	Sophomore	30 but less than 60
JR	Junior	60 but less than 90
SR	Senior	90 or more
GR	Graduate Student	
LW1	Law student (professional level) first year	
LW2	Law student (professional level) second year	
LW3	Law student (professional level) third year	
MD1	Medical student (professional level) first year	
PH1	Pharm.D. (professional level) first year (0-33 semester hours)	
PH2	Pharm.D. (professional level) second year (34-69 semester hours)	
PH3	Pharm.D. (professional level) third year (70-104 semester hours)	
PH4	Pharm.D. (professional level) fourth year (105+ semester hours)	

Credit Hour Load

Undergraduates: An average of 15 hours of coursework each semester is considered a normal load. Maximum credit loads are 20 hours in all colleges. Normally, not more than 12 hours of undergraduate credit may be taken during the summer session. An approved Overload Petition form must be filed to exceed these maximums. Overload Petition forms are available online or from the Office of the Registrar.

Graduate students: 14 hours of credit is the average and 16 hours the maximum amount of credit allowed per semester for full-time graduate students. A student who has been assigned an assistantship for the academic year is usually restricted to a load of 13 semester hours. Normally, not more than 8 hours of credit may be earned in course work during an eight-week summer

session. An approved Overload Petition form must be filed to exceed these maximums. Overload Petition forms are available online or from the Office of the Registrar.

Auditing a Course

The privilege of non-credit enrollment in a class is available to any university student. The auditing privilege is subject to the same fee schedule as credit courses. Auditors are expected to attend class regularly and complete such graded work as required by the instructor. It is the responsibility of the student to determine and fulfill the requirements for a satisfactory audit. Though this auditing privilege carries full rights of class participation, it definitely offers no academic credit, does not count toward full- or part-time status, and will result in a mark of satisfactory (SA/S) or unsatisfactory (UA/U). Subsequent credit for the course by special examination is not available.

Graduate Credit for Seniors

Undergraduate students taking graduate-level courses which are not in any way a part of their undergraduate degree have the option of later using such courses for purposes beyond the bachelor's degree requirements. If the student intends to pursue a graduate degree or needs the courses noted on the academic transcript as reserved for graduate credit for job classification (e.g. advancement on teacher salary schedules) the student should file a petition. The Request to Reserve Coursework for Graduate Credit should be filed by midterm of the semester which is requested. The petition form is available on the Graduate Student Forms page on the Office of the Registrar website. Courses may not be retroactively reserved once a semester has ended.

Class Attendance

Each student shall attend the lectures, recitations, and laboratories, and participate in field work deemed necessary to adequately fulfill the academic requirements of each course. Each instructor, at the beginning of every semester, shall stipulate the attendance policy necessary for satisfactory completion of the course.

The Dean of Students Office may issue authorized absences for participation in university-sponsored activities and for other unusual circumstances. If students have been hospitalized, or if they have been directed by the Student Health Service or their private physician to stay at their place of residence because of illness, the Student Health Service or their private physician may issue a statement giving the dates of the student's confinement which the student may show to the instructor without verification from the Dean of Students Office. The Student Health Service has a policy not to provide medical excuses for missed classes. Please review the policy at <http://www.uwyo.edu/shser/medical-excuses.html>.

All instructors shall permit students who have official authorized absences to make up missed course work without penalty. An authorized absence, however, merely gives the individual who missed the class an opportunity to make up the work and in no way excuses him or her from the work required.

When a class has a status of "Indiv Course Withdrawal" on the "Register for Classes" page in WyoRecords, the student has officially withdrawn. Students may also confirm that a final grade of "W" is noted on the transcript, which may be viewed through WyoRecords.

Unauthorized discontinuance of enrollment or unofficial abandonment of classes will result in a failing grade.

Academic Dishonesty

Whatever form academic dishonesty may take, the university community regards it as a serious offense. An act is academically dishonest when, and only when, it is an act attempted or performed in order to misrepresent one's involvement in an academic task in any way. Such conduct will result in imposition of sanctions pursuant to University Regulations.

It is the responsibility of both the student and person in charge of an academic task, respectively, to make reasonable efforts to learn of, or make known, the expectations and standards of conduct required in the performance of an academic task. Failure on the part of the student to observe and maintain required standards of academic honesty will require corrective action by officials.

Enrollment Management

Admissions Office

Shelley Dodd, Director of Admissions
150 Knight Hall, (307) 766-5160
Web site: www.uwyo.edu/admissions

A new undergraduate student's first official contact with the University of Wyoming is often through the Admissions Office. This unit is responsible for recruiting/admitting undergraduate students to the university. Responsibilities include the development of effective school relations, programs with high schools and community colleges, recruitment of prospective freshmen and undergraduate transfer students, and the orientation of new undergraduates. The Admissions Office determines initial scholarship eligibility for all new undergraduate students. This office also facilitates the admission process for graduate students. A detailed description of admission to the university and procedures can be found in the admission policies section of this publication.

Office of the Registrar

Kwanna King, Registrar
167 Knight Hall, (307) 766-5272
Web site: www.uwyo.edu/registrar

The Office of the Registrar is responsible for overseeing course registration, transcripts, verification of enrollment, adding/dropping/ withdrawing from courses, administering the residency policy for tuition classification purposes, and for maintaining student academic records. This involves responsibility for web registration, as well as preparation and electronic publication of the *Class Schedules* and *University Catalog*. The office is also responsible for the electronic degree audit program, graduate record processing, and for determining whether or not students have successfully met all degree requirements. Additionally, this office evaluates all transfer credit for undergraduate students to determine transferability as well as UW equivalents.

Transfer Success Center

Amanda Reeder, Director
Knight Hall, Rooms 166, 167, 168
E-mail: transfer@uwyo.edu
Web site: www.uwyo.edu/transfer/

The Transfer Success Center provides assistance, referrals and advocacy to enhance transfer students opportunities for strong academic performance and smooth transition to the University of Wyoming. The office works closely with Undergraduate Admissions, the Office of the Registrar, Wyoming Community Colleges and out of state institutions to implement effective policies to streamline the transfer process. The office facilitates articulation efforts including programmatic articulation agreements and transfer planning guides. Additionally, the office provides student support services through peer mentors, the Reverse Transfer Program and Transfer Advance.

Office of Scholarships and Financial Aid

Debra Tolar Hintz, Director
174 Knight Hall, (307) 766-2116
Web site: www.uwyo.edu/SFA

The Office of Scholarships and Financial Aid assists students in obtaining funds to attend the University of Wyoming by coordinating and administering all forms of financial assistance to students. Four broad categories of aid are available: scholarships, grants, loans, and work-study employment. Over 1,000 different scholarship programs, funded through federal, state, institutional, and private sources, are coordinated. Federal Pell, and Federal Supplemental Educational Opportunity Grants are available to undergraduate students with significant financial need, who are pursuing a first bachelor's degree. Hathaway Scholarships, Federal Perkins, Federal Direct and Federal Direct PLUS Loans are available to qualified students. Federal Work-Study employment is available to students with a qualifying level of financial need. For additional information, please refer to the Scholarships and Financial Aid section in this catalog.

Global Engagement Office

(307) 766-3677
Web site: uwyo.edu/geo

The Global Engagement Office (GEO) is the home of internationalization at the University of Wyoming. Units within the GEO include Associate Vice Provost for Global Engagement, Center for Global Studies, International Students & Scholars, Education Abroad, and English Language Center. Whether recruiting and supporting international students, providing exchange and study abroad opportunities, facilitating global partnership development, coordinating immigration for new international hires, or assisting with visiting dignitaries, we support the entire UW campus community in achieving their internationalization goals. Stop by and visit us in the Cheney International Center to learn more about the programs and services we offer to the UW campus community to promote global citizenship, inform visitors, and communicate with our partner institutions abroad.

Education Abroad

(307) 766-3677
E-mail: uwyoabd@uwyo.edu
Web site: www.uwyo.edu/uwyoabroad

The Education Abroad Office connects students from all majors and programs with international study, exchange, service and internship opportunities on six of the seven continents at hundreds of locations around the globe. Students earn UW credit towards major, minor or general education requirements on academic year, semester, summer and faculty-directed short-term programs. The Education Abroad Office is located on the first floor of the Cheney International Center. UW students with a minimum 2.750 GPA are eligible to apply to participate on a wide variety of credit-bearing programs outside of the U.S. The Education Abroad Office staff advises students individually to tailor the program to students' specific needs. Considerations are made for cost, financial aid opportunities, transfer of credit, health and safety, degree completion, country or region desired, and foreign language requirements.

UW students with a minimum 2.750 GPA are eligible to apply to participate on a wide variety of credit-bearing programs outside of the U.S. The Education Abroad Office staff advises students individually to tailor the program to students' specific needs. Considerations are made for cost, financial aid opportunities, transfer of credit, health and safety, degree completion, country or region desired, and foreign language requirements.

In addition to learning about other cultures in depth and perfecting language skills, studying abroad can be a life changing experience. Students return home with altered perspectives by developing flexibility and critical thinking skills. Students gain a greater sense of where they are from, what it is to be a citizen of the world, and what it is to be an individual. Studying abroad can help students clarify life and professional goals which leads to the development of greater direction, focus, and motivation for the remaining years of their university life and beyond.

English Language Center

Frederica Suess, Director

(307) 766-3630

Web site: www.uwyo.edu/elc

The English Language Center offers full-time academic English preparation for international students in the Intensive ESL Program. The ELC also provides short-term English Language training and study tour options for international visitors.

International Students and Scholars

Jill Johnson, Associate Director of Admissions

Cheney International Center, Suite 5, (307) 766-5193

Web site: www.uwyo.edu/ISS

International students, numbering over 825 from nearly 90 countries, are a vital part of international education at the University of Wyoming. As such, International Students and Scholars (ISS) works to promote an interchange of ideas and understanding from among all of the countries represented on campus. ISS is responsible for recruitment of international students and provides advising and counseling to all international students/scholars for their academic, social, personal, and immigration concerns. The office also promotes and implements social and cultural activities for international awareness and educational exchange through International Education Week, Friendship Families, American Conversation Club, international coffee hours, and other special programs. Many of these activities are coordinated through the ISS-sponsored International Resource Center in the Cheney International Center, Room 1.

International students and visitors are required to contact International Students and Scholars to confirm their arrival at the University of Wyoming and to consider the office their primary contact for further information and assistance. Students must be enrolled as full-time students each semester as required by the U.S. Citizenship and Immigration Services. The ISS e-mail address is uwglobal@uwyo.edu.

National Student Exchange: The University of Wyoming is a member of the National Student Exchange (NSE) consortium. Through NSE, students are provided an opportunity to attend one of more than 175 U.S. institutions in the NSE consortium. NSE offers a student the chance to live in another part of the United States and to travel and experience college life in different settings

for an academic semester or a year under his or her normal UW tuition and fees. Financial aid is often available and academic credit is guaranteed to transfer back to UW.

For more information about the National Student Exchange, please contact International Students and Scholars, Cheney International Center, Suite 5 or call (307) 766-5193. The e-mail address is uwglobal@uwyo.edu.

Undergraduate Education

Steven Barrett, Associate Vice Provost

Advising, Career, Exploratory Studies Center

Jo Chytka, Director

222 Knight Hall, (307) 766-2398

Web site: www.uwyo.edu/aces

The Advising, Career, Exploratory Studies Center (ACES) provides a variety of services to UW students, including advising Exploratory Studies and Bridge students; providing academic support to various populations of probationary, conditionally admitted, and reinstated students; assisting students campus-wide with their career exploration, planning, and job search needs; assisting in coordinating discussions, information dissemination, and event planning between the various professional advisors and advising offices on campus; and coordinating national tests and exams through the University Testing Center in Knight Hall, Room 4.

ACES is committed to providing a comprehensive and integrated service that moves a student along a continuum of receiving academic advising, exploring academic and career options, selecting a college major, and finally, implementing his/her degree in the world of work.

Exploratory Studies and students admitted with support, placed on probation, or reinstated to the university are highly encouraged to meet with a ACES career counselor. The purpose of this meeting is to analyze the student's past academic progress and future career goals to develop a strategic plan to maximize his/her academic success and future employment opportunities. ACES also works closely with other campus offices and departments to engage students in available study skill and tutorial resources.

Students interested in engaging in career exploration activities may make an appointment to meet with a career counselor to discuss their career goals and/or confirm their choice of major. Various assessment tools that provide feedback on the match between a student's interests or personality type and the world of work, are available. ACES career specialists provide information pertaining to a broad range of career fields, internship opportunities, specific employer information, general job search strategies, and federal government application processes.

Students are advised on how to use the HANDSHAKE and EPIC database on the ACES homepage to find out about and apply for summer, internship, and permanent job opportunities. Each year numerous employer representatives from business, industry, health care, education, and government visit ACES to interview students for these types of opportunities. All information pertaining to these visits is contained in the HANDSHAKE link on the ACES homepage.

The campus wide experiential learning program SOAR is coordinated in the ACES office. Students are advised how to contribute to and utilize their own personal profile to help better prepare them for career or graduate school.

ACES hosts numerous general and specialized job fairs each year for students and alumni. Upcoming job fair dates can be found on the ACES homepage.

The University Testing Center: The University Testing Center coordinates national tests and exams and is housed in the Knight Hall basement, Room 4. Students may register to take national tests and professional school entrance exams. Information is available on the University Testing Center web site www.uwyo.edu/UTC or by calling (307) 766-2188.

Learning Resource Network (LeaRN)

April Heaney, Director

105 Coe Library, (307)766-3448

Web site: www.uwyo.edu/learn

The Learning Resource Network (leaRN) offers first-year program, academic learning communities, and an umbrella of academic support initiatives for UW's entering and undergraduate students. The program's mission is to provide high-impact academic programs to increase the success and persistence of UW's undergraduates. LeaRN programs support access, academic achievement, and impactful teaching and mentoring within all programs.

First-Year Courses & Learning Communities

Summer and Fall Bridge: Bridge offers two first-year options that help entering and admitted with support students complete general education courses in a learning community structure. Bridge courses feature small class sizes, consistent support from ACES advisors, talented instructors, and connections with peer mentors. First-Year Interest Groups: Freshmen Interest Groups (FIGs) are living and learning communities through which students take 3-4 courses together in the Fall semester and live on the same residence hall floor. Faculty and FIG resident assistants work together to create enrichment opportunities, study and course review sessions, and campus/community engagement through the FIG experience.

First-Year Seminar: As a key piece of UW's general education program, First-Year Seminar courses integrate critical and creative thinking, democratic discussion, exploration of important contemporary issues, and research skills in a freshmen-level course. First-Year Experience course: The FYE course (STEP 1102) is an optional one-credit course designed to help freshmen interact with UW campus resources, staff, and faculty; to learn about tools for academic support and wellness; to explore academic and co-curricular opportunities; and to delve into major and career selection.

Academic Success and Recovery courses: Academic Success courses (STEP 1105) support first-year students with academic probation following Fall semester. The two-credit courses help students learn key skills for college success and evaluate their major, career, and life goals.

Academic Support Initiatives

The STEP Center offers in-person and online tutoring and supplemental instruction for 60+ courses at the 1000 and 2000 level. STEP also offers NetTutor, an online tutoring platform accessible all year to distance and campus students.

Early Alert: Early Alert is program that allows faculty to provide academic feedback on student performance during the 4th week of classes, before mid-term grades are assigned. Early Alert provides a glimpse of students' early-semester progress and multiple avenues for support in challenging courses.

First Gen Scholars: First Gen Scholars provides multiple resources and engagement opportunities for students whose parents have not earned a four-year degree. Participating students have access to peer and faculty mentoring, workshops and community building activities, scholarship opportunities, honors society membership-and many more support avenues.

PIE Award: The Promoting Intellectual Engagement (PIE) Award honors instructors who inspire excitement, inquiry, and autonomy in first-year courses. The award is co-sponsored by LeaRN, Ellbogen CTL, Residence Life & Dining, and Advising, Career, and Exploratory Studies.

LeaRN Faculty:

ALYSSA CANEPA, B.A., University of Wyoming 2017; M.A. 2020; Assistant Lecturer 2020.

ALLISON GERNANT, B.A. Grinnell College 1996; M.A. University of Wyoming 2005; Assistant Lecturer 2016; Fall Bridge First Year Seminar Coordinator & First Year Seminar Coordinator 2019.

SHELBY HUTSON, B.A. Colorado State University Pueblo 2016; M.A. University of Wyoming 2018; Assistant Lecturer 2018.

CATHERINE JOHNSON, B.A. Whittier College 2005; M.A. American University 2009; M.F.A. Portland State University 2017; Assistant Lecturer 2019.

ALYSSA KONESKO, B.A. Saginaw Valley State University 2008; M.Ed. Bowling Green State University 2011; Assistant Lecturer 2015.

SETH SWANNER, B.A. Birmingham-Southern College 2007; M.A. University of Alabama 2011; Ph.D. 2017 Northwestern University; Assistant Lecturer 2019.

Student Educational Opportunity (SEO)

Pilar Flores, Director

330 Knight Hall, (307) 766-6189

Web site: www.uwyo.edu/SEO

Student Educational Opportunity is composed of both on-campus and outreach projects with offices throughout Wyoming. These projects serve students who are first generation; income-eligible; students with cognitive, psychological or physical disabilities; ethnic minority students; and non-traditional students. SEO assists eligible students to plan and prepare for entry into higher education, succeed in the higher education environment, and graduate from college by providing academic success services, and instruction in basic skills, career, and personal development. All projects within SEO seek to increase the public awareness of the needs of ethnic minority, first generation, income-eligible students, and students with disabilities in an educational environment.

On-Campus Projects

McNair Scholars Program: The McNair Scholars Program prepares students to pursue doctoral level study. Services include intensive academic support including tutoring and academic counseling; activities related to successful application to graduate school and pursuit of financial aid opportunities; preparation for the GRE; and faculty mentoring. The capstone of the program is a paid summer research internship program which prepares students for admission to graduate level education. Students who are juniors and seniors, income-eligible and first generation college students, or who are from ethnic minority groups underrepresented in graduate education qualify for program services. The McNair Scholars Project is a federally funded TRIO project. Note: this is a graduate school preparation program; it is not a scholarship program.

Student Success Services: The Student Success Services (SSS) project offers academic support to students who are first generation college students, income-eligible, and/or individuals with disabilities. Student Success Services provides assistance with academics, personal/social choices, financial issues and pursuit of financial aid opportunities, and choice of college major and related career opportunities. The SSS project also provides its students with individual and group tutoring. All services are free to eligible participants and services are intended to help students be successful in college and to stay in college through graduation. SSS is a federally funded TRIO project.

Outreach Projects

Educational Opportunity Center: The Educational Opportunity Center (EOC) assists first generation and income-eligible adults throughout Wyoming to continue their education. Services include assistance with college and financial aid applications, career and college exploration, and GED preparation. Outreach offices are located in Casper, Cheyenne, Ethete, Rock Springs, Powell, Riverton, Gillette, Torrington, and Laramie. EOC is a federally funded TRIO project.

GEAR-UP Wyoming: The Wyoming Statewide GEAR-UP project provides services to 2,000 income-eligible pre-college students throughout the state each year. Student services include career exploration, advising and supporting students in taking a college preparation curriculum, college preparation, ACT preparation, college exploration, application, and planning, and assistance with financial aid processes and procedures. Student services are provided through GEAR-UP coordinators located at each of Wyoming's seven community colleges. The GEAR-UP grant also works with the Wyoming Department of Education in providing teacher training and school improvement initiatives. All GEAR-UP services are aimed at increasing student academic preparation and performance levels suited for post-secondary education, rates of high school graduation, rates of post-secondary

education participation and graduation, and GEAR-UP student and family knowledge of post-secondary education options, high school preparation needs, and means of financing.

Upward Bound Math/Science: The Upward Bound Math/Science Program (UBMS) provides services to income-eligible and first generation 9th through 12th grade high school students throughout Wyoming. UBMS is designed to generate the skills and motivation necessary to be successful in high school and to complete a college degree program in a math or science area. Assistance with high school coursework and tasks related to college enrollment are provided throughout the academic year. The UBMS program includes a six-week, residential, summer academic session on the UW campus with an intensified math and science curriculum that includes performing active research under the guidance of university staff and graduate students. UBMS is a federally funded TRIO project.

Upward Bound: The Upward Bound program works with income-eligible, first generation high school students (grades 9-12) and their families to help them gain the skills and motivation necessary to successfully complete high school and to pursue a college degree. The program includes a six-week, residential, summer academic component on the UW campus designed to help students develop academically and socially in a university setting. Tutorial and enrichment services are provided throughout the academic year and participants and their families receive individualized assistance in completing tasks related to successful college enrollment. Outreach offices are located in Albany, Fremont, Laramie, and Natrona counties. Upward Bound is a federally funded TRIO project.

Graduate Education

James C. Ahern, Vice Provost
(307) 766-4286

Web site: www.uwyo.edu/uwgrad

The Office of Graduate Education oversees and supports graduate and professional education at the university. In collaboration with Graduate Council, the Office of Graduate Education develops, reviews and implements policies and procedures regarding graduate and professional education and helps develop and review major changes to graduate and professional programs. The office also provides funding to programs and students including special initiatives, graduate assistantships, graduate fellowships and student travel. Furthermore, the Office of Graduate Education is the administrative home for interdisciplinary and transdisciplinary graduate programs.

Division of Student Affairs

- Campus Recreation
- Dean of Students Office
- Student Health Service
- University Counseling Center
- Residence Life & Dining Services
- Center for Student Involvement and Leadership (CSIL)

Kimberly Chestnut, Vice President

Ryan O'Neil, Dean of Students

408 Old Main, (307) 766-5123, Fax: (307) 766-2696

The Division of Student Affairs is the administrative unit of the university that is responsible for providing leadership and coordination of programs and services designed to support student learning and development in and outside the classroom.

In partnership with UW faculty, staff, and students, the Division of Student Affairs develops and delivers services, programs, and facilities that promote the intellectual, personal, cultural, and civic development of students; coordinates efforts to create a caring community in which individuals are respected, encouraged to pursue excellence, and achieve their potential; and fosters honoring the diversity of individuals and cultures.

The Division of Student Affairs is comprised of the Associated Students of the University of Wyoming, Campus Recreation, Cowboy Parents Council, the Dean of Students Office, the Center for Student Involvement and Leadership, Student Health Service, the University Counseling Center, Residence Life and Dining Services, UW Catering and Events, the UW Alumni Association, and the Wyoming Conservation Corp. The different areas within the Division work together to provide safe and comfortable housing; to provide wellness services for the health of students; to educate students and encourage personal accountability; to engage students in leadership opportunities; to provide educational and entertaining programs and events; and to foster opportunities for student feedback which is essential for a successful institution.

Campus Recreation

Pat Moran, Director

Half Acre Recreation and Wellness Center

Phone: (307) 766-5586

Web site: www.uwyo.edu/Rec

Our mission is to provide recreational and wellness opportunities to a diverse campus community that enhance the learning and workplace environment and promote mental and physical health via quality facilities, equipment, and programs. Our programs, which include the Wellness Center, Open Recreation, Intramural Sports, Club Sports, and the Outdoor Program, offer a broad range of coordinated activities for individuals and groups that promote health awareness, a sense of community and a lifelong appreciation for wellness and recreational activities. Supporting the value of student development, our programs strive to offer opportunities to students that develop leadership skills and promote responsibility while maintaining a balance between personal, professional, and academic pursuits.

Wellness Center

Half Acre Recreation and Wellness Center, First Floor**Phone: (307) 766-9355**

An exciting new addition to the Campus Recreation Department, the UW Wellness Center is a network of people, programs, services, and policies that work together to create and support a culture of health and wellness at UW. The UW Wellness Center works collaboratively with various campus departments to provide education, services, and programs that address health needs such as stress relief, nutrition, fitness, mental health, sexual health, safety, and alcohol and tobacco use. Some of the Wellness Center offerings include: athletic training, massage therapy, personal training, sleep assessments, blood pressure checks, and weekly educational workshops. The Wellness Center is located in the southwest portion of Half Acre, in the "free zone," which does not require gym membership to access. The Wellness Center is open to students as well as members of the University community. Most offerings are free, however there are a few services that charge a competitive rate. Visit the Wellness Center to learn more about these programs and services aimed at improving your overall wellness.

Open Recreation

Half Acre Recreation and Wellness Center, First Floor**Phone: (307) 766-5586**

The Open Recreation Program is housed primarily in the newly renovated Half Acre Recreation and Wellness Center with additional recreational opportunities in the Corbett building on the east campus. UW's Open Recreation Program, available to the entire student population, faculty, staff and spouses, provides quality equipment for individuals to participate in non-organized, informal activities such as basketball, volleyball, racquetball, or badminton. Patrons can also take advantage of swimming, weight training, aerobic training, personal training services, and group fitness and instructional classes. For more information on the Open Recreation Program, stop by the front desk in the lobby of Half Acre, pick up a Campus Recreation brochure, or visit the Campus Recreation website.

Intramural Sports

Half Acre Recreation and Wellness Center, Second Floor**Phone: (307) 766-4175**

UW's Intramural Sports Program offers organized individual and team competitive sport events in men's, women's, and co-recreational leagues. Students and employees can participate in organized recreation level sport competition in approximately 30 activities per semester such as flag football, soccer, inner-tube water polo, wrestling, badminton, basketball, volleyball, or table tennis. Information is available from the Rec Sports Office or on the Campus Recreation website. Every member of the university community is encouraged to become familiar with the many aspects of intramural sports, which are designed to encourage participation and socialization regardless of previous experiences, sport skills, or group affiliation. Come alone or with a group to sign up for a fun time.

Club Sports

Half Acre Recreation and Wellness Center, Second Floor**Phone: (307) 766-4175**

The Club Sports Program offers a higher level of athletic sport competition than Open Recreation and Intramural Sports to UW students. Some of the current UW Club Sport teams for men and women include badminton, baseball, volleyball, soccer, ice hockey, rugby, cycling, Nordic ski racing, lacrosse, softball, racquetball, fencing, cricket, water polo, tennis, triathlon and equestrian. UW faculty or staff with an interest in coaching or officiating a Club Sport should contact the Rec Sports office. Visit our website for more information on Club Sport teams and activities.

Outdoor Program

Half Acre Recreation and Wellness Center, First Floor

Phone: (307) 766-2402

UW's Outdoor Program (OP) offers a variety of outdoor experiences as well as training to use the brand new indoor climbing and bouldering wall. Participants have opportunities to develop lifetime recreational skills, gain an appreciation and concern for our natural environment, and meet new people. The OP sponsors a variety of seasonal programs and outings throughout the year. These activities range from day and weekend trips to nearby destinations to extended trips at unique destinations. The OP also runs clinics and sponsors guest speakers, presentations, and other educational programs. Activities are offered for all skill levels through such venues as back country ski outings, trail running, snowshoe outings, back country hiking and camping trips, or rock climbing. The OP provides an extensive line of rental equipment to the campus community. The Outdoor Program staff is ready to expose the university community to a whole new realm of experiences not available anywhere else on campus. Visit the office or our website for more information on OP activities and services.

Dean of Students Office

Ryan O'Neil, Dean of Students

128 Knight Hall, (307) 766-3296

Web site: www.uwyo.edu/DOS

The Dean of Students Office (DOS) provides a variety of UW student support services. The staff in DOS work to enhance the quality of life for all UW students. Assistance with situational needs and student life concerns of individual students and groups of students regarding their personal, academic, and/or social welfare are coordinated by the DOS staff.

Several offices and programs comprise the Dean of Students Office. These include the Dean of Students, STOP Violence Program, welfare check, and Student Judicial Affairs, all located in Knight Hall. The Center for Student Involvement and Leadership (CSIL) is also under the Dean of Students and is primarily located in the Wyoming Union.

Services available through the Dean of Students Office include individual advisement and consultation regarding situational student life concerns; referral coordination with other university and community services; conflict resolution and consultation regarding student conduct, rights, and responsibilities; advisement in grievance procedures, due process, and student appeals of disputed decisions; official university withdrawals; and authorized absences and emergency contacts.

The professional staff provide direct assistance to students and groups at any time in the student's career at the university. Information, individual advisement and consultation, and assistance with administrative procedures are facilitated in the Knight Hall offices.

STOP Violence Program: The mission of the STOP Violence Program is to prevent domestic/relationship violence, sexual assault, and stalking on the campus of the University of Wyoming. Awareness and prevention efforts are provided by this office through outreach and educational activities. The coordinator works closely with the University Counseling Center (UCC), Campus Police (UWPD), Residence Life, and other offices to provide programs.

Another focus of the STOP Violence Program is to provide support and resources to students affected by violence. One resource is an on-campus advocate who can help a student access services through university departments and/or community agencies. Support is also offered by providing information to these students, their friends, and families, about the effects of domestic/relationship violence, stalking, or sexual assault. Walk-in hours are 10 a.m. to 4 p.m. weekdays, (307) 766-3296. For after hours emergencies, please call (307) 745-3556 (the Albany County Safe Project).

Student Conduct, Rights and Responsibilities: The Trustees, as a governing body of the university, are charged with the statutory duty and authority to make all rules and regulations including the administrative responsibility to regulate and control whatever conduct and behavior of the members of the university community impedes, obstructs, or threatens the achievement of the educational goals and mission of the university. The university community, in order to function in an orderly and creative

manner, ascribes to a code of conduct to which the student must adhere. This information, entitled Student Code of Conduct, is distributed to each student who is granted admission to the university. This information and other university regulations are published in order to inform students of their rights and responsibilities and the minimum ethical standard of conduct expected of them as members of the university community. Additional copies of this information may be obtained at the Dean of Students Office or on the web.

Student Legal Services: Student Legal Services provides free, confidential legal assistance to the University of Wyoming student community through a full-time attorney. This office provides full legal service for any student need with the exception of in-court representation. The attorney can assist all fee-paying University of Wyoming students who seek advice in connection with personal legal issues. Information is readily available on a variety of subjects. This service is provided through student fees to ASUW, and there is no additional charge for the attorney's time. Student Legal Services also facilitates the effective and prompt handling of legal referrals, (307) 766-6347.

Disability Support Services: Disability Support Services (DSS) provides a variety of services for students with physical, sensory, cognitive, or psychological disabilities including printed materials in alternative format, note-taking assistance, classroom relocation, testing accommodations, access to adaptive computers, parking assistance, advocacy, sign language interpreters, real-time transcribing, mobility orientation for the blind, as well as other academic support services. UDSS assists UW to meet its legal and ethical obligations under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Services are coordinated with the efforts of the Division of Vocational Rehabilitation and Wyoming Services for the Visually Impaired, when appropriate. Students with disabilities who anticipate needing accommodations to fully participate in classes and programs at the University of Wyoming are strongly encouraged to register with UDSS and provide documentation of their disability.

Student Health Service

Mary Beth Bender, FNP-C, Interim Director
Student Health Building, (307) 766-2130
Web site: www.uwyo.edu/ShSer

The Student Health Service (SHS) provides personalized health care to eligible students by maintaining a high quality medical outpatient clinic. The clinic provides primary health care, health education, and preventive services to enable students to complete their course of study. The professional staff consists of two physicians, three nurse practitioners, a psychiatric nurse practitioner, one physician assistant, and registered nurses, in addition to other professional and administrative personnel.

Undergraduate and professional full-time students taking 12 or more credit hours and graduate students taking 9 or more hours are eligible for services at the SHS. Undergraduate and graduate part-time students who have purchased the Optional Student Fee Package are also eligible. Enrollment in, or waiver from, the University of Wyoming Student Medical Insurance program has no effect on eligibility to use the Student Health Service. Students enrolled during the summer pay a summer fee for use of the SHS. Students not enrolled for summer but who were enrolled spring semester and are pre-registered for fall semester may pay the same summer fee to use the SHS. Payment of the semester fee provides visits with clinicians and nurses at no cost. Affordable laboratory diagnostic procedures, medications, and office procedures are available. There are also nominal charges for supplies such as ace bandages, splints, crutches, and other medical devices.

The hours of the Student Health Service can be found on our web site. All students are urged to have adequate health insurance coverage for illnesses or emergency visits to the local hospital, urgent care clinic, or a physician's office when the Student Health Service is closed. Insurance coverage is also recommended for medical care that is not available at the Student Health Service, including treatment of major injuries, surgery, and hospitalization. The student is responsible for all charges for services provided by persons or institutions outside of the Student Health Service.

University Counseling Center

Toi Geil, Ph.D., Director
341 Knight Hall, (307) 766-2187
Web site: www.uwyo.edu/UCC

The University Counseling Center (UCC) provides comprehensive, time-effective mental health services to the university students and consultation on issues with parents, staff, and faculty. The UCC is a resource center for students to enhance personal success skills in dealing with the challenging and sometimes stressful university environment. The professional UCC staff work together with students to help them find effective ways to approach concerns and problems. Students are supported in learning to make healthy lifestyle choices that promote their personal, social, and academic goals. Group and individual counseling services, in a professional and confidential atmosphere, are provided to students with personal and interpersonal concerns. Other services include crisis intervention, walk-in consultation, and education to the UW community. Individual counseling appointments are made in person during regular office hours, 8 a.m. - 5 p.m. (summer hours: 7:30 a.m. - 4:30 p.m.) Monday through Friday. The UCC offers walk-in services, various hours a day, when students may simply walk in to be seen for a brief appointment, to determine future services they might need. Counseling services are free to UW students. For after-hour emergencies, students can talk to an on-call counselor by calling 766-8989.

Campus Consultation and Outreach: UCC staff consults with academic and student services personnel, student leaders, and university administration regarding counseling and mental health issues and ways to better the UW living/learning environment. Outreach programs can be initiated by student or staff request or by UCC staff bringing issues of concern to various campus populations. Some current issues include destigmatizing mental health, suicide prevention, respect for diversity, sexual orientation issues, and stress management. Generally, UCC asks for a minimum of two weeks notice for an outreach presentation; however, in urgent situations triggered by trauma, outreach programs will be offered on a shorter notice. The Center hosts the Lifesavers Coalition - a group of campus and community partners who have an interest in training others in the skills of suicide prevention, and also have a focus on how to be proactive with wellness.

UCC collaborates closely with the STOP Violence Program in the Dean of Students Office by providing counseling support to students who are victims of sexual violence as well as collaborative programming regarding prevention of sexual violence and membership with Campus Coalition for the Prevention of Sexual and Relationship Violence.

AWARE (Alcohol Wellness Alternatives, Research and Education): The AWARE Program is committed to a healthy campus community and a drug-free learning environment. AWARE Program staff utilize best practices in providing drug and alcohol education and prevention programming for the University of Wyoming campus and community. The AWARE Program promotes a standard of wellness in regard to healthy choices surrounding alcohol use and the prevention of illicit drug use by college students. To achieve these goals, the AWARE Program offers a broad range of services ranging from individual interventions to consultative and educational services for campus groups and the community at large. AWARE also coordinates the Cowboy UP Peer Education group. Additionally, the AWARE Program coordinates the A-Team, a campus-community coalition dedicated to reducing underage and excessive alcohol use. For more information, please visit the web site at www.uwyo.edu/aware or feel free to contact via telephone at (307) 766-2187, email (aware@uwyo.edu), or in person by visiting 341 Knight Hall.

Residence Life & Dining Services

Eric Webb, Executive Director, Residence Life, Dining Services, and the Wyoming Union
Reggie Conerly, Director, Dining Services
Washakie Center, Lower Level, (307) 766-3175
Web site: www.uwyo.edu/reslife-dining

Residence Life & Dining Services is committed to providing clean, comfortable and affordable housing and dining, with the belief that these elements are an essential component of a student's education, personal growth, and college experience.

The university operates six furnished residence halls, a variety of furnished and unfurnished apartments, as well as Washakie Center, ten on-campus dining establishments and UW Catering and Events.

Residence Halls: The residence halls provide convenient living, studying, educational programming, social activities and dining accommodations for the university community. Various living environments are available. Full-time, live-in professional staff

and graduate assistants live in the community, along with student resident assistants. The staff is available to all students to help make residence hall living an enjoyable and productive part of campus life. We have five residence halls for students:

- Downey Hall
- Honors House
- McIntyre Hall
- Orr Hall
- White Hall

The residence halls also provide several additional services to our students:

- Laundry facilities on-site in each hall
- On-site computer labs and study rooms
- Mail service
- Free tutoring in the Student Learning Center
- 24-hour emergency custodial & maintenance services
- Upgraded cable TV that includes channels like ESPN U, HBO, The Sundance Channel, and your own HBO GO account

Room assignments are made according to the date the completed contract form is received. The housing deposit is included in the enrollment confirmation deposit paid by new UW students. Students returning to UW who wish to live in the residence halls must pay the housing deposit when they complete their housing contract. Hall, roommate, and other preferences may be indicated on the contract and will be considered. Students wishing to room together should submit contracts together prior to the posted deadline of May 1.

New Student Live-in Policy: The UW Trustees have established a policy requiring all new students to live in the UW residence halls during their first academic year on campus and to take a minimum of the 12-accesses-per-week dining plan. The policy is based on extensive student development research indicating that a student's chance of academic success and satisfaction with the college experience greatly improves through the residential living experience.

For a student to be considered for an exemption to the policy, a request with appropriate documentation must be submitted. Students will be considered exempt from the policy if they can provide documentation for one of the following:

- 21 years of age or older
- Married
- Single parent with custody of child(ren)
- Reside with parent(s) or legal guardian(s) within a 60-mile radius of Laramie or in a property purchased by parent(s) or legal guardian(s)
- Completion of two semesters as a full-time student or the equivalent credit hours at UW, or another university or college
- Have documented medical or health conditions prohibiting residence hall living

Students must apply for exemption prior to 5 p.m. the day before the halls open for the semester (August 25, 2016 for the fall 2016 semester). Housing accommodations at the University Apartments may be available for students who have children or minors living with them or students of sophomore status or above.

Dining Services: A variety of dining plans, services, and payment options are offered for on and off-campus students, faculty, and staff. Dining plans are identified by the number of times a customer may access Washakie Dining Center per week. Additional Dining Dollars can be added to any dining plan, allowing for additional meals and services at dining locations across campus.

All students living in the residence halls may choose between the "Unlimited-," any 15-, or any 12- dining plans. Students living in Hill/ Crane Halls may purchase the any-7 or above dining plan. Meals are served during the contract periods for each semester. Limited services will be available over Thanksgiving and Spring Break.

Washakie Dining Center, the social and cultural hub of the residence halls, features marketplace dining with 10 serving platforms. Meals at the Washakie Dining Center can be purchased in several ways:

- UW Student ID card (WyoOne Card)
- Dining Dollars
- Cash previously deposited to the holder's WyoOne account.
- Credit cards (VISA and MasterCard)
- Cash

Dining plans are not just for students living in the residence halls. Any student, staff member, or faculty member can purchase one of the varieties of dining plans designed to fit his/her needs.

For additional information about the residence halls, dining plans, or university apartments visit www.uwyo.edu/reslife-dining; call toll free (866) 653-0212; or if in Laramie, (307) 766-3175 (residence halls) or 766-3176 (university apartments); FAX (307) 766-3613 or email reslife-dining@uwyo.edu. Information may also be obtained by writing to Residence Life & Dining Services, Dept. 3394, 1000 E. University Ave., Laramie, WY 82071.

Campus Dining Options: In addition to Washakie Dining Center, a variety of convenient and affordable dining options are located in the Wyoming Union and throughout campus to further meet the dining needs of busy students. These locations offer unique atmospheres and customizable menu selections, with several locations open into the evening and on weekends. Each dining location accepts Dining Dollars, WyoOne card funds, Cash, Mastercard and Visa. Cash is not accepted at Elements or Encore Cafe. Plus, UW Campus Dining now offers Tapingo, a mobile food ordering application (download on your smartphone via the Apple or Google Play stores) available at most of the campus dining locations.

University Apartments: The University provides one and two-bedroom furnished or unfurnished apartments for students. Located on the east side of campus, the River Village, Landmark Village and Spanish Walk apartment communities are near shopping centers, recreational areas, and the hospital. The apartments also offer children's programs and a community center.

Apartment assignments are made on a year-round basis. The date an application is received is used in determining assignment priority. Requests should be made as early as possible after acceptance to the university.

Bison Run Village offers an on-campus living community for single students sophomore class standing or above. The fully-furnished townhome style apartments are rented by the bedroom and feature shared kitchen, dining and living room spaces with single, private bedrooms and private or semi-private bathrooms. Applications for Bison Run Village open during the spring semester for the following fall semester.

Application forms and additional information about apartment rates, availability, and eligibility guidelines may be obtained by contacting Residence Life and Dining Services, (307) 766-3176, toll free at (866) 653-0212, email reslife-dining@uwyo.edu or online at www.uwyo.edu/reslife-dining.

Off-Campus Housing: The University assumes no responsibility for the students' choice of off-campus living environment. Students living off-campus are encouraged to contract for meals with Residence Life & Dining Services.

Center for Student Involvement and Leadership (CSIL)

Jeremy Davis, Director
326 Wyoming Union, (307) 766-4008
Web site: www.uwyo.edu/CSIL

The Center for Student Involvement and Leadership (CSIL), located in the Wyoming Union, seeks to provide opportunities for on campus engagement through inclusive student-centered programs, communities, services, and experiential learning opportunities to complement the academic experience. Through CSIL, students can join or create a Registered Student

Organization; volunteer for local, national, or international service projects; obtain on-campus employment; serve as a student government leader; participate in fun activities; and find community among those who are similar and different.

Associated Students of the University of Wyoming (ASUW)

020 Wyoming Union, (307) 766-5204

Web site: www.uwyo.edu/ASUW

The Associated Students of the University of Wyoming (ASUW) is comprised of three branches: the Executive, Legislative, and Judicial. All full-time, fee-paying students are members of ASUW. Officers and 32 senators are elected annually by the students, and each senator represents one of the colleges or schools. They meet weekly to consider areas of concern to students.

The ASUW student government represents student opinion to the administration, faculty, staff, and State of Wyoming legislature. ASUW participation across the university ensures that university policies are made with the concerns of students in mind. In addition, the ASUW president serves as an ex-officio (non-voting) member of the University of Wyoming Board of Trustees and conveys student opinion to the institution's highest governing body. ASUW also provides their own programs and services for students. Included in these programs are ASTEC (technical services), located in the Wyoming Union; Student Legal Services in Knight Hall; and several councils: First-Year Senate, Non-Traditional Student Council, and the United Multicultural Council.

Campus Activities Center

**Erik Kahl, Associate Director,
Center for Student Involvement and Leadership**

The Campus Activities Center (CAC) serves as the hub of student activities on campus. Professional staff in the office offer guidance and assistance for programming committees, late-night programming efforts, more than 250 recognized student organizations (RSOs), and student leadership development. Recognized student organizations at UW are established to promote a learning and social experience for individuals who share common interests. Students are encouraged to join and are free to organize associations that will provide opportunities to participate in educational, academic, cultural, and social activities. CAC staff are available to help students develop organizations, sponsor activities, and coordinate efforts with other entities on campus. A complete listing and descriptive classification of all current recognized student organizations is available from the CAC and online at www.uwyo.edu/rso. The CAC is also home to 7220 Entertainment, a student-run organization that plans and implements social, recreational, cultural, and educational programs for the campus community. 7220 Entertainment is composed of five committees.

Fraternity and Sorority Life

**Erik Kahl, Associate Director,
Center for Student Involvement and Leadership**

The fraternities and sororities at UW provide a living/learning environment designed to support the development and experience of their members. Through intentional programs, members build connections among fellow brothers/sisters and alumni, grow and develop as students and leaders, give back through services, and lead with integrity. Countless leadership opportunities can be found within each chapter, governing council, and broader FSL community.

Multicultural Affairs

**Center for Student Involvement & Leadership (CSIL)
103 Wyoming Union, uwma@uwyo.edu**

Multicultural Affairs serves to enhance the personal and academic growth of students through programs, services, policies, and procedures. Our focus is to advocate with and for marginalized students to develop a positive sense of self, create strong community connections, and thrive in all aspects of student life.

A variety of events, workshops, support groups, and trainings are offered throughout the academic year to support students. Multicultural Affairs also offers the Multicultural Resource Center and Rainbow Resource Center in the Wyoming Union.

The Multicultural Resource Center, located in room 103, is a place for students from marginalized and underrepresented backgrounds to find community and support. Programs and additional resources are offered throughout the year, as well as computers, printers and workstations. The Rainbow Resource Room, located in room 106, is a supportive space for our LGBTQIA students to find community and a network of support. Computers, printers, and workstations are also available in this center as well as programmatic offerings throughout the year. More information can be found at: <http://www.uwyo.edu/oma/>.

Student Media

Center for Student Involvement & Leadership (CSIL)

001 Wyoming Union, (307)766-6190

The Student Media Office is partially funded by student fees. It meets the informative, educational, and cultural needs of the university community through such publications as The Branding Iron (the daily student newspaper published Tuesday-Friday and weekly during the summer session), the literary magazine Owen Wister Review (published spring semester), and the feature magazine Frontiers (published fall and spring semesters) which are published under the auspices of the Board for Student Media.

The board is composed of students, faculty, staff, and selected members of the Wyoming Press Association. These publications provide an excellent opportunity for students to gain valuable experience in newspaper, magazine, advertising, sales, and production. More information can be found at: <http://www.uwyo.edu/studentmedia/index.html>.

Union Events

Center for Student Involvement & Leadership (CSIL)

210 Wyoming Union, (307)766-3161

The Wyoming Union is the community center for campus life, enhancing and complementing out-of-class educational experiences. Open daily, the Union provides facilities, services, and various activities to all of the campus community. Through the Union Events office, reservations can be made for spaces in the building including meeting rooms, ballrooms, or tables in the breezeway. The Information Desk offers campus and community information and ticket sales. For reservations and information on these services, contact the Union Events Office or make a reservation online: <https://www.uwyo.edu/union/reservations/>.

Veterans Services Center

Marty Martinez

Center for Student Involvement & Leadership (CSIL)

300 Wyoming Union, (307)766-6908

Located on the 3rd floor of the Wyoming Union, the Veterans Services Center has resources, computers, and a lounge area where veterans and their dependents, spouses, and friends can meet and support each other. Special events, programs, and student groups are coordinated out of the center. The staff works to improve access to and success in college for students who are veterans. For more information, call (307) 766-6908 or visit the web site at <http://www.uwyo.edu/vetservices/>.

Service, Leadership, and Community Engagement Office (SLCE)

Center for Student Involvement & Leadership (CSIL)

033 Wyoming Union, (307)766-3117

The Service, Leadership, and Community Engagement Office (SLCE) is located on the lower level of the Wyoming Union. SLCE is predicated on the notion that universities have a responsibility to prepare all students for active citizenship. A healthy American democracy demands ethical, engaged leadership, and SLCE seeks to cultivate these ideals among our UW students. A complete listing of all the programs and events the SLCE Office offers can be found at www.uwyo.edu/slce/. Students are invited and encouraged to visit the office in Room 033 in the Wyoming Union to explore the many opportunities available, including:

- First Year Institute
- Alternative Breaks
- Local and national days of service
- Good Mule Project
- The Big Event
- Leadership development programs
- Community engagement programs

FERPA

- General Statement
- Access
- Release of Information
- Public or Directory Information
- Letters of Appraisal/Recommendation
- Challenges to the Record
- Exception to the Policy
- Release of Personally Identifiable Information in a Deceased Student's Education Record
- Rights of Students

Family Educational Rights and Privacy Act (PL-380)

General Statement

The University of Wyoming has the responsibility for effectively supervising any access to and/or release of official data/information related to the education records of its students. Certain items of information about individual students are fundamental to the educational process and must be recorded. This recorded information concerning students must be used only for clearly-defined purposes, must be safeguarded and controlled to avoid violations of personal privacy, and must be appropriately disposed of when the justification for its collection and retention no longer exists.

In this regard, the university is committed to protecting, to the maximum extent possible, the right of privacy of all individuals about whom it holds information, records, and files. Access to, and release of, such records is restricted to the student concerned, to parents of dependent students, to others with the student's written consent, to officials within the university, to a court of competent jurisdiction, and otherwise pursuant to law.

Access

All official information collected and maintained in the university identifiable with an individual student will be made available for inspection and review at the written request of that student subject to certain exceptions.

For purposes of access to records at the University of Wyoming, students enrolled (or formerly enrolled) for academic credit or audit at the university shall have access to official records concerning themselves.

A request for general access to all official records, files, and data maintained by the university must be made in writing to the registrar or to other person(s) as designated by the university officer in charge of the unit maintaining records. A request for access to official data maintained in a particular office may be made to the administrative head of the office.

When students (or former students) appear at a given office and request access to the university record about themselves:

1. The student must provide proper identification verifying that he or she is the person whose record is being accessed.
2. The designated staff person(s) must supervise the review of the contents of the record with the student.
3. Inspection and review shall be permitted within a period not to exceed 45 days from the date of the student's request.
4. Students will be free to make notes concerning the contents, but no material will be removed from the record at the time.

Recordkeeping personnel and members of the faculty and staff with administrative assignment may have access to records and files for internal educational purposes as well as for routine necessary clerical, administrative, and statistical purposes as required

by the duties of their jobs. The name and position of the official responsible for the maintenance of each type of education record may be obtained from the registrar of the university.

Any other access allowed by law must be recorded showing the legitimate educational or other purpose and the signature of the person gaining access. The student concerned shall be entitled to review this information.

Release of Information

No personally identifiable information shall be disclosed to any individual (including parents, spouse, or other students) or organization except as follows:

1. Disclosure is authorized in writing by the student.
2. Disclosure is to university officers or employees who need to know so as to accomplish legitimate university purposes related to their functions.
3. Disclosure is to a governmental agency, educational organization, parent of a dependent student, or other entity as described by federal regulations or otherwise required by state or federal law. Custodians of records should obtain interpretations whenever third parties request personally identifiable information.
4. To authorized educational authorities at the local, state, and federal level.
5. When disclosure of any personally identifiable data/information from university records about a student is demanded pursuant to court order or lawfully issued subpoena, the staff member receiving such order shall, if possible, immediately notify the student concerned in writing prior to compliance with such order or subpoena. (NOTE: In fulfillment of its responsibilities to monitor certain state benefit and entitlement programs, the Wyoming state auditor may issue to the university from time to time an administrative subpoena for a listing of currently enrolled full-time students, the students' social security numbers, and information relating to the nature and amount of any educational financial aid being received by such students. Upon being served with such a subpoena, the university will provide the information requested without further notice.)
6. Data/information from university records about students will be released for approved research purposes only if the identity of the student involved is fully protected, or if the research is related to official university business and not publicly disseminated.
7. Information from university records may be released to appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other persons.

The university officer responsible for the records from which information is released shall maintain with the student's record a listing of disclosures of personally identifiable information, except disclosures in accordance with items 1 and 2 above for which no record need be kept. The listing shall identify the parties who requested or obtained information and the legitimate interests these parties had in making the request.

Public or Directory Information

The following items are considered public data/information and may be disclosed by the university in response to inquiries concerning individual students, whether the inquiries are in person, in writing, or over the telephone:

1. Name;
2. Affirmation of whether currently enrolled;
3. Campus location.

Unless students have officially filed a written request with the university registrar within ten working days after the first day of classes for a semester that disclosure not be made without their written permission, the following items, in addition to those above, are considered public/ directory information; may be included in appropriate university/campus directories and publications; and may be disclosed by designated staff members in response to inquiries concerning individual students, whether the inquiries are in person, in writing, or over the telephone:

1. School, college, department, major, or division;
2. Dates of enrollment;

3. Degrees received;
4. Honors received;
5. Local address and phone number;
6. Home address (permanent);
7. Email address;
8. Participation in officially recognized activities and sports;
9. Weight and height of members of athletic teams;
10. Full-time or part-time enrollment.

Letters of Appraisal/Recommendation

Candid appraisals and evaluations of performance and potential are an essential part of the educational process. Clearly, the providing of such information to prospective employers, to other educational institutions, or to other legitimately concerned outside individuals and agencies is necessary and in the interest of the particular student.

Data/information which was part of university records prior to January 1, 1975 and which was collected and maintained as confidential information will not be disclosed to students. Should a student desire access to a confidential letter of appraisal received prior to January 1, 1975, the student shall be advised to have the writer of that appraisal notify, in writing, the concerned records custodian of the decision as to whether or not the writer is willing to have the appraisal made available for the student's review. Unless a written response is received approving a change of status in the letter, the treatment of the letter as a confidential document shall continue.

Documents of appraisal relating to students and collected by the university or any department or office of the university on or after January 1, 1975, will be maintained confidentially only if a waiver of the right of access has been executed by the student. In the absence of such a waiver, all such documents will be available for the student's inspection and review.

If a student files a written waiver with the department or office concerned, letters of appraisal received pursuant to that waiver will be maintained confidentially. Forms will be available for this purpose.

Challenges to the Record

All students shall have the opportunity to challenge any item in their file which they consider to be inaccurate, misleading, or otherwise inappropriate. A student shall initiate a challenge by submitting a request in writing for the deletion or correction of the particular item. The request shall be made to the custodian of the particular record in question.

If the custodian and the student involved are unable to resolve the matter to the satisfaction of both parties, the written request for deletion or correction shall be submitted by the student to such person as designated by the president of the university who shall serve as the hearing officer. The student shall be given the opportunity for a hearing at which the student may present oral or written justification for the request for deletion or correction. The hearing officer may obtain such other information as he or she deems appropriate for use in the hearing and shall give the student a written decision on the matter within 30 days from the conclusion of the hearing. If the decision of the hearing officer is to deny the deletion or correction of an item in the student's file, the student shall be entitled to submit a written statement presenting the student's position with regard to the item to the hearing officer. Both the written decision of the hearing officer and the statement submitted by the student shall be inserted in the student's file. The decision of the hearing officer shall be final.

Grades may be challenged under this procedure only on the basis of the accuracy of their transcription or posting.

Exception to the Policy

It is the position of the university that certain data/information maintained in various offices of the university is not subject to the provisions of this policy with regard to inspection, review, challenge, correction, or deletion. Exceptions to "education records" include: alumni records, employment records, law enforcement records, medical records, sole possession records, and university disciplinary records.

1. Statements submitted by parent(s)/guardian or spouse in support of financial aid or residency determinations are considered to be confidential between those persons and the university and are not subject to the provisions of this policy except with the written consent of the persons involved. Such documents are not regarded as part of the student's official record.
2. University employment records of students are not included in this policy, except as provided under the Wyoming Public Records Act.
3. With regard to general health data, only that data/information which is used by the university in making a decision regarding the student's status is subject to review by the student under this policy. Written psychiatric or psychological case notes which form the basis for diagnoses, recommendations, or treatment plans remain privileged information not accessible to the student. Such case notes are not considered to be part of official university records. To ensure the availability of correct and helpful interpretations of any psychological test scores, notes, or other evaluative or medical materials, the contents of these files for an individual student may be reviewed by that student only in consultation with a professional staff member of the specific department involved. Records that are subject to FERPA are not subject to the HIPAA Privacy Rule.
4. Records relating to a continuing or active criminal investigation by the University of Wyoming Police Department, or records of said office not relating to the student's status with the university, are not subject to this policy.
5. No student is entitled to see information or records that pertain to another student, to parents, or to other third parties. A student is entitled to review only that portion of an official record or file that pertains to him or her.
6. The personal files, or sole possession records, of members of the faculty and staff which concern students, including private correspondence, and notes which refer to students, are not regarded as official records of the university. This includes notes intended for the personal use of the faculty and never intended to be official records of the university. In order to be sole possession records, they cannot be shared with anyone else.

Release of Personally Identifiable Information in a Deceased Student's Education Record

The Family Educational Rights and Privacy Act (FERPA)'s protection of personally identifiable information in a student's education record ends at the time of a student's death. The University of Wyoming's policy on the release of a deceased student's records is as follows:

Within the first year following the death of a student, the University will release the educational records of the decedent to the following individuals:

- If the student submitted a signed Authorization to Release Educational Records form which designated the person(s) eligible to request and/or receive educational records, the information will be released to the individual on that form.
- The decedent's next of kin. The request must be accompanied by official documentation.
- The individual designated as the personal representative of the decedent's estate. The request must be accompanied by official documentation.
- Members of the family or other persons with the written approval from the decedent's next of kin or the personal representative of the decedent's estate. Absent written approval from the family or representative of the estate, only directory information will be disclosed.
- In response to a subpoena or court order.
- To any other individual, if determined by the University to be in the best interest of the decedent or the University.

After one year has elapsed following the death of an individual student, the University may release the educational records of the decedent at the University's discretion.

Rights of Students

Students are hereby notified that controlling provisions of federal law are contained in Sec. 438, Pub. L.90-247, Title IV, as amended, 88 Stat. 571-574 (U.S.C. 1232g) and regulations set forth in the code of Federal Regulations, 34 C.F.R. sections 99.1 to 99.67 (1981). Complaints of institutional noncompliance may be made to the Department of Education as provided in the regulations.

Grading System

- Grade Points
- Semester (or Term) Grade Point Average
- Cumulative Grade Point Average
- Repeating a Course
- Incompletes (I)
- General Information on S/U Grading
- End of Semester Grade Reports
- Grade Appeal
- Academic Transcripts
- Honor Roll
- Academic Probation and Suspension

Students are evaluated according to the following grading system:

Grade	Pts.	Definition
A	4.000	Exceptional
B	3.000	Very good
C	2.000	Fair
D	1.000	Poor
F	0.000	Failure (may be assigned as a grade for failure to attend or to indicate failure to formally withdraw)
I		Incomplete (temporary mark pending coursework completion as agreed in a signed document). See section on incompletes below for details.
W		Withdrawal (from the individual course or all courses), only if the student follows the official withdrawal procedure. If a student enrolls in a course and then abandons it (stops attending) without following the official withdrawal procedure, a grade of F will be assigned.
S		Satisfactory (equivalent to a C or better [B or better in courses numbered 5000 or above]; see general information on S/U grading below)
U		Unsatisfactory (see general information on S/U grading below)
UK		Unable to compute grades (for midterm grades only)

Grade Points

Each letter-graded course carries a grade point value computed as: the total credit hours earned in the course multiplied by the point value of the letter grade earned. For example: a student earning an A (point value of 4) in a 3 credit-hour course would earn 12 grade points for the course.

Semester (or Term) Grade Point Average

The semester grade point average (GPA) is the sum of all grade points earned in a semester or term divided by all credit hours attempted for letter grade. Credit hours in courses in which marks of I, W, S, or U were assigned, as well as developmental courses, are excluded.

Cumulative Grade Point Average

The average of all grade points earned by a student below is termed the cumulative grade point average. It is used for determining activity eligibility, honors, probation, suspension, graduation, and for all comparisons or purposes requiring measurement of academic standing.

The cumulative grade point average is defined as the sum of all grade points earned in University of Wyoming residence, correspondence, or Distance Education, divided by all credit hours attempted for letter grade, with the following exceptions:

1. The credit hours shall not be counted in courses in which marks of W, S, or U were assigned, or in which marks of I (for incomplete) are still in effect.
2. For repeated courses:
 - a. First repeat: only the second credit and grade is used to determine earned hours and to calculate the cumulative grade point average.
 - b. If repeated more than once, only the last credit and grade earned is used to determine earned hours and to calculate the cumulative grade point average.
 - c. A student is limited to a maximum of three (3) attempts, including withdrawals, in any course at the University of Wyoming.
 - d. If a mark of W, S, or U is assigned in a repeated course, the previous grade assigned will stand except when an S or U is earned repeating a previous S or U.
 - e. Courses applied towards one completed degree may be repeated as part of a second degree; however, the grade and grade point average in the original degree will not be changed.
3. Transfer grades are not counted in the UW grade point average. If a course taken at UW is repeated at another institution, the credits and grade earned at UW will be deleted from computation of the UW cumulative grade point average if credit for the repeated course is transferred to UW.
4. For graduate students, courses numbered below 4000 are not added in to the semester and cumulative totals, nor computed into the GPA.

Repeating a Course

Students may repeat course work; however, credit earned in any given course (or equivalent course) is applicable toward a degree requirement only once. All grade entries remain on the student's record, but only the last grade earned will be calculated in the UW cumulative grade point average. Refer to the Cumulative Grade Point Average section of this catalog for further information. Variable-credit courses are not considered as repeats unless the department head provides written certification that the course content was, in fact, repeated. Courses repeated will remain as entries on the academic transcript. Courses applied towards one completed degree may be repeated as part of a second degree; however, the grade and grade point average in the original degree will not be changed. A student is limited to a maximum of three (3) attempts in any course at the University of Wyoming. An "attempt" includes any instance in which the student earns a grade for the course or withdraws from the course. The three-attempt limit does not apply to courses identified in the University Catalog as being appropriate for students to take multiple times. A student can petition for exceptions to this limitation through established university procedures (UW Regulation 2-204). See the University Regulations online for the most up-to-date version.

Incompletes (I)

A grade of "I" (incomplete) is a temporary grade assigned to students who, due to unforeseen circumstances, were unable to complete all work required for a course. Information regarding authorization and processing of incomplete grades may be obtained from the Office of the Registrar. An incomplete should not be assigned in lieu of a failing grade (e.g. if student never attended). Incomplete grades are not a student privilege. They can be issued only at the discretion of the assigned instructor. (UW Regulation 6-720) See the University Regulations online for the most up-to-date version.

Time allowed for completing course requirements will normally not exceed 120 calendar days beyond the end of the semester in which the I was given. The dean of a college may designate certain research courses where the 120-day limit may be extended by the instructor; however, the completion date even in these courses should not be later than the time of graduation for the student unless the student is reserving the particular course for graduate credit.

If the final grade for the course is not received in the Office of the Registrar by the date indicated on the authorization, the I will revert to an F. Should graduation occur in the interim, the I will stand permanently. The student's GPA at graduation with all associated honors will stand as computed. (UW Regulation 6-720) See the University Regulations online for the most up-to-date version.

General Information on S/U Grading

The grade of S (satisfactory) is interpreted to include grades A through C and the grade of U (unsatisfactory) to include grades C- through F on the conventional grade scale for courses numbered less than 5000 (for courses 5000 or above, the grade of S is interpreted to include grades A and B). Credit hours of S/U courses are counted as hours attempted toward graduation. However, neither the S nor U grade carries grade points and neither will be included in the calculation of the cumulative grade point average.

Students may not take a course for S/U credit to satisfy University Studies Program requirements, unless the course is offered for S/U only; (e.g., POLS 1000, or the equivalent history or economics courses, may not be taken for S/U).

If a mark of S or U is assigned in a repeated course, the previous grade assigned will stand except when an S or U is earned repeating a previous S or U.

Students must signify at the time of registration or schedule modification whether they are taking any course for S/U grades.

The faculties of the various colleges and interdisciplinary programs shall determine the number of credit hours of S that may be used to satisfy degree requirements in their programs. They may also place restrictions upon the use of S credits to satisfy college or major requirements. In addition, they may designate particular courses in their colleges as courses to be offered for S/U only.

A student who changes majors within a college or who transfers to a different college may petition for the acceptance of S credits previously earned if such credits are in conflict with faculty-established regulations for the new major or college.

Mid-Term Grades

Mid-term grades for all courses numbered below 5000 are to be submitted by instructors through WyoRecords the week following midsemester. Grades which can be assigned by faculty are:

Grade	Definition
D	Poor
F	Failure (may also be assigned as a grade for failure to attend or to indicate failure to formally withdraw)

S	Satisfactory (equivalent to a C or better) in cases where the class is offered for S/U or the student has elected the S/U option
U	Unsatisfactory (equivalent to a D or F) in cases where the class is offered for S/U or the student had elected the S/U option
UK	Unknown; unable to compute grade

The UK grade may be assigned if, due to lack of performance assessments such as exams, papers, homework, etc., a faculty member is unable to make a determination of a midterm grade.

Please note that the midsemester grade received in any particular class reflects the assessment of student performance during the first portion of the semester only.

Mid-term grades are available through WyoRecords.

End of Semester Grade Reports

Final grades are available through WyoRecords as soon as possible (usually five working days) after the close of the semester or term.

At the end of the semester, final grades are available to students through WyoRecords within one day after being submitted by faculty. Final grades are due from faculty by noon (12:00 p.m.) of the fourth business day after the end of finals week (or after the last day of the summer semester).

Definitions

1. Cumulative semester hours attempted shall be the total of all credit hours attempted through the University of Wyoming, except for credit hours attempted in repeating a course, those in which marks of W were assigned, and those accepted in transfer from other institutions.
2. The cumulative grade point average is defined as the sum of all grade points earned through the University of Wyoming divided by the sum of all credit hours attempted through the university, except for credit hours in which marks of W, S, U, or I are assigned or those of an initial course which has been repeated. When a course has been repeated, only the last grade points and credit hours assigned for repeats of the course shall be entered in the computation of the cumulative grade point average.

Grade Appeal

A recorded grade may be changed through established appeal processes within individual colleges. Contact your department for further information about appealing a grade.

Academic Transcripts

Official transcripts of individual academic records at UW are sent from the Office of the Registrar upon written authorization signed by the individual. Individuals may also authorize the release of their academic transcripts through WyoRecords. All financial obligations to the university must be cleared before a transcript may be released or viewed on WyoRecords.

Transcripts are produced on a first-come, first-served basis and one to two business days must be allowed. Usually, 10-15 days are needed at the close of a semester to record semester grades. Same-day transcript service is available for a \$10 fee (limit of 2 transcripts).

Partial transcripts are not issued. Each transcript includes the complete academic record at the University of Wyoming and the number of credits from other institutions accepted by UW.

Official transcripts of credit earned at other institutions which have been presented for admission or evaluation of credit become the property of the University of Wyoming and are not reissued or copied for distribution. This includes high school records and any other type of supporting documents. Transcripts of work completed at other institutions should be obtained directly from the issuing institution.

Applicability of transfer credit toward any degree is dependent on the curriculum pursued by the student.

In preparing transcripts for graduate students or second bachelor's degree candidates whose undergraduate work was taken elsewhere, the University of Wyoming includes on its transcripts no detailed reference to that undergraduate work, mention being limited to designation of the degree and date received and the name of the institution granting the degree.

Honor Roll

Undergraduate and law students who achieve high scholastic grades are honored by being placed on the President's Honor Roll, the academic Dean's Honor Roll, or the Provost's Honor Roll.

The requirements to be met to attain these honors are:

For President's or Dean's Honor Roll:

1. Undergraduate students must complete a minimum of 12 UW semester hours on a basis of A-F. Exception: if a student is student teaching, the student must be enrolled in a minimum of 12 UW semester hours, at least 7 of which must be graded on the basis of A-F with no semester grade of I. Courses taken for audit do not count for honor roll purposes.
2. A GPA of 4.000 for the President's Honor Roll.
3. A GPA of 3.250 or better for the academic Dean's Freshman Honor Roll.
4. A GPA of 3.400 or better for the academic Dean's Honor Roll for undergraduates above freshman standing.
5. In the College of Law, students are eligible for the academic Dean's Honor Roll when enrolled in a minimum of 13 UW semester hours of law courses. In the College of Law, a grade point average of 3.250 or better is required for first year students and a GPA of 3.400 or better is required for second and third-year students for the academic Dean's Honor Roll.
6. Students having consortium agreements with other institutions are not considered to be full-time for honor roll purposes.

For the Provost's List:

1. Undergraduate students must complete a minimum of 6 UW semester hours, but fewer than 12 UW semester hours, of which at least 6 UW semester hours must be graded on the basis of A-F with no semester grade of I. Courses taken for audit do not count for honor roll purposes.
2. A GPA of 3.500 or better.

Graduate Students

Graduate Students are not eligible for the President's Honor Roll, the academic Dean's Honor Roll, or the Provost's List.

Academic Probation and Suspension

Undergraduate Students

Academic Status

- In order to graduate, every student is expected to maintain satisfactory academic progress, which is based on scholastic performance. Current academic status will be indicated on internal documents and grade reports as:
- good standing
- academic probation
- academic suspension: normally not eligible to petition for reinstatement until one full semester, exclusive of summer term, has elapsed. The dean of the college in which a suspended person wishes to continue may waive the four-month delay if the dean is assured that the person has made suitable progress toward resolving the academic deficiencies.

Undergraduate Academic Probation

1. Academic probation shall constitute notice that a student is not progressing satisfactorily toward the bachelor's degree or Pharm.D.
2. A student enrolled at the University shall be placed on academic probation at the end of the semester or summer term when his/ her cumulative GPA at UW falls below a 2.000.
3. A student placed on academic probation will be so notified by email. This information is also available on WyoRecords.
4. A student shall be removed from academic probation at the end of the semester or summer term in which his/her cumulative GPA is 2.000 or above.
5. Students who fail to remove themselves from probation or earn a semester grade point average below 2.000 in the next semester or summer term attempted at the University of Wyoming will be placed on academic suspension for not maintaining the criteria for satisfactory academic progress. For probation purposes, completing a semester or summer term shall mean that the student has earned a grade in at least one course.

Undergraduate Academic Suspension

1. Academic suspension is the dismissal of a student from the University due to the student not making satisfactory academic progress toward the bachelor's degree.
2. A student who is suspended for unsatisfactory academic performance should not be permitted to petition for reinstatement until one full semester, exclusive of summer term, has elapsed. Students may petition once per semester for reinstatement, and, if denied by any college or the Center for Advising and Career Services, cannot petition for reinstatement until the next fall or spring semester, unless there are documented extenuating circumstances justifying immediate reinstatement.
3. A suspended student may not enroll for any University of Wyoming credit classes (including on-campus, online, and distance).
4. Credit earned at another accredited college or university while a student is suspended from the University may be accepted under the usual regulations governing the transfer of credit after the student has been reinstated.
5. A student placed on academic suspension will be so notified by letter.

Undergraduate Academic Reinstatement

1. A college may have an academic reinstatement policy that is more restrictive than the general university policy.
2. Academic reinstatement is the readmission of a suspended student to the University. The student is eligible to be considered for readmission. The reinstated student will be on academic probation during his/her first semester or summer term of reinstatement after which he/she may be removed from this probation.

3. A petition for reinstatement must be submitted no later than 15 days before the beginning of the semester or summer term in which the student wishes to register. A petition received after this deadline may not be processed until after the regular registration period.
4. The decision on a petition for reinstatement will be made by the dean (or designee) of the college in which the student wishes to enroll. Undeclared students should contact the Director of the Center for Advising and Career Services. A student who has been reinstated must remain in the college in which he/she has been reinstated for that semester.
5. Students placed on academic suspension are eligible for a maximum of three reinstatements. Any student placed on academic suspension for the fourth time is not eligible for reinstatement for a minimum of five years from the end of the last term of attendance.
6. Students who are suspended as a result of spring semester grades will have the suspension invoked at the beginning of the summer term.

Exceptions

Upon the request of a person placed on academic suspension or denied reinstatement, the vice president for academic affairs may review the circumstances and reverse the decision of the dean if the vice president for academic affairs deems it necessary to prevent a gross injustice.

Academic Renewal

An undergraduate student who returns to the University and who has not completed or withdrawn from a college course at UW during the previous five years will have the option of continuing his or her earlier UW cumulative GPA or commencing a new cumulative GPA under the Academic Renewal policy. The student must submit the Academic Renewal Application Form (which may be obtained from the Office of the Registrar) to the registrar no later than ten class days before the last day of classes of the semester in which the student returns to UW.

The entire UW transcript will remain intact. A note indicating the policy will precede the new part of the UW transcript if the student opts for academic renewal. At the discretion of the academic department in which the student is enrolled, credit hours for which the student earned the grade of C or better may be applied toward the completion of the degree requirements. The list of any departmentally-approved courses must be indicated on the Academic Renewal Application Form when initially submitted to the registrar. No further changes may be requested.

A student's GPA and completed courses that were applied to a baccalaureate degree are not eligible for academic renewal.

Graduate students are not eligible for academic renewal.

Graduate Students

A graduate student enrolled at the university will be placed on academic probation at the end of a semester or summer session when his or her graduate cumulative UW grade point average in 4000-level or higher courses is below 3.000. Students who fail to bring their graduate GPA to 3.000 and remove themselves from probation after one semester or summer session will be suspended from the university. A suspended student may petition his/her academic program for reinstatement to the same degree program. A reinstated student will be on probation and may be subject to other performance criteria as specified by the dean of the affected department.

The above GPA requirement is considered to be a minimum requirement. Individual departments or programs may require higher standards than these minimum performance standards and establish department- or program-specific criteria for satisfactory academic progress. A graduate student may be dismissed from a degree program for lack of satisfactory academic progress, as determined by the department or program offering the degree.

The above regulations governing academic probation, suspension, and reinstatement do not apply to students enrolled in the College of Law.

Graduate Student Regulations and Policies

- Admission Regulations
- Coursework Applied to Graduate Degree
- Guidelines for Satisfactory Academic Progress
- Steps Required for Degree Completion
- Examinations
- Final Steps in Completion of Degree Requirements
- Overview of Graduate Degrees Awarded
- Miscellaneous Regulations
- Armed Services
- International Students

All regulations are subject to change without notice by action of various administrative officers, the University of Wyoming Board of Trustees, and the appropriate departments and divisions. Published regulations are the minimum requirements for any advanced degree.

Admission Regulations

Please see Graduate Admissions section <http://uwyo.catalog.acalog.com/content.php?catoid=4&navoid=123#vii-graduate-admission>.

Coursework Applied to Graduate Degree

Rule of 12

The Rule of 12 regulates the number of credits a student may use as non-degree and transfer credits. With committee and college approval, a student may submit up to a total of 12 pre-admission hours that may be an accumulation of non-degree, reserved, and/or transfer hours. The maximum number of hours allowed from each category is as follows: 12 non-degree graduate, 6 reserved and 9 transfer hours. A student may elect to use a combination of the three different areas to total the 12 credits allowed (e.g. 6 non-degree hours, 3 transfer hours, and 3 reserved hours). Please review the individual sections of the catalog that cover the specific policies for non-degree hours, reserving coursework for graduate credit, and transfer credit.

Transfer Credit Available to Graduate Students

To transfer graduate hours earned at another institution to a graduate program at UW, the student must provide an official transcript from the institution where the credits were earned. This official transcript must be part of the student's permanent file. The student must also provide evidence that the course was approved for graduate credit at the institution where the course was taken.

No more than 9 semester hours that have been transferred from another accredited institution may be used for meeting the credit hour requirements of a master's student's program. Transferred hours must carry a B (3.000) or better (A=4.000) grade and will not reduce the residence requirements. Transfer hours taken for satisfactory/unsatisfactory (or pass/ fail) grades are not acceptable on a program of study.

Coursework hours approved for transfer from another college or university are considered as part of the 12-credit-hour pre-admission course limitation for master's students.

Hours transferred from other institutions for a doctoral program must carry a letter grade of B (3.000) or better (A=4.000). Ed.D. and Ph.D. candidates may transfer up to 48 credit hours of such coursework, only four of which can be thesis or dissertation research. Transfer hours for doctoral students are not considered as part of the 12-hour pre-admission course limitation.

Non-Degree Hours

A student may request that up to 12 hours of graduate-level coursework, taken during the student's graduate, non-degree status, be used toward a program of study should the student choose to pursue a graduate degree at the University of Wyoming. This would be subject to the approval of the student's graduate committee and the college dean. These hours can be affected by other pre-admission (reserved and transfer) hours.

Once a student obtains 12 non-degree hours, they must gain admission to a graduate degree program to ensure that subsequent coursework beyond the 12 non-degree hours can apply to a graduate degree.

No student can remain in graduate status beyond 18 hours of graduate course work without admission to a degree program. Students who wish to take more than 18 hours of coursework but do not wish to pursue a graduate degree should consider declaring a second bachelor's degree. If a non-degree graduate student anticipates attaining a graduate degree at any time in the future, they should declare and be accepted into a graduate program. Not more than 12 non-degree hours will be accepted toward a graduate degree. It is not in the interest of the student to take more than 12 hours as a non-degree student. Declaring a graduate program provides the student with the advising and support needed to make reasonable progress toward a degree.

Reserving Coursework for Graduate Credit

Approved graduate level courses taken prior to completing the baccalaureate degree, but not part of that degree's requirements, may be applied to the master's or doctoral program with the approval of the student's committee. Approval for reserving the coursework is rendered jointly by the adviser and college dean, and applies only to courses previously reserved for graduate credit.

If a course is dual listed at the 4000/5000-level, the course must be taken at the 5000-level to receive graduate credit. Each 4000-level or

5000-level course must be reserved for graduate credit by completing the Request to Reserve Coursework for Graduate Credit form. The form must be completed and submitted to the Office of the Registrar by midterm of the semester in which the coursework is taken.

These courses will appear on the undergraduate transcript with a notation that they have been reserved for graduate credit.

Students will only be allowed to transfer six hours of coursework that has been reserved for graduate credit into their degree program.

Correspondence Courses and Credit by Examination

Correspondence courses and credit by examination courses are not acceptable on graduate programs of study.

Second Baccalaureate Degrees

A student working toward a second baccalaureate degree is subject to all regulations concerning undergraduates and is not considered a graduate student. Students requesting to reserve coursework for graduate credit must be able to complete their undergraduate degree within 12 months of the request. Only six hours of undergraduate coursework reserved for graduate credit will be allowed for consideration in a graduate degree program.

Second Graduate Degrees

All requirements for a second degree are considered separate from the first degree. Hours from the first master's degree may not be used for completing the hours toward the second master's. Hours from the first doctoral degree may not be used for completing the hours toward the second doctorate. Hours from an earned doctorate may not be used in a subsequent master's degree. (Some credits may be shared between approved joint degree programs.)

Grade Point Average

A UW cumulative grade point average of at least 3.000 is required for graduation and good standing. Hours for which a C was earned may be balanced by a corresponding number of hours for which an A was earned. Departments and divisions have the option of indicating subject areas in which they will not accept grades of C for credit regardless of accumulated grade point average. No credit will be allowed toward an advanced degree for coursework in which a grade lower than C is earned.

A graduate student enrolled at the university shall be placed on academic probation at the end of a semester or summer session when his or her graduate cumulative UW grade point average in 4000-level or higher courses is below 3.000 **or** if they have earned Unsatisfactory (U) grades or a grade in six or more graduate credit hours. Students will be suspended if they earn less than a cumulative 2.00 average at any time, or if they are on probation and earn less than a 3.00 in the next enrollment period and are full-time students, or if they earn less than a 3.00 in the next 12 attempted credits and are part-time, or if they have earned Unsatisfactory (U) grades or grade in six or more credit hours while on probation. No student in their semester of probation will be employed as a graduate assistant on the UW campus.

The 3.000 cumulative GPA requirement is considered to be a minimum requirement. Individual departments or programs may establish criteria higher than these minimum performance standards and establish department- or program-specific criteria for satisfactory academic progress. A graduate student may be dismissed from a degree program for lack of satisfactory academic progress, as determined by the department or program offering the degree. Students dismissed for lack of progress can appeal, but will necessarily direct their appeal to the department within which the degree resides. Dismissals of graduate students from degree programs are at the discretion of the department.

Please see the Guidelines for Satisfactory Academic Progress section, below.

All courses taken at the graduate level included in the GPA as listed on the academic record if the courses are numbered 4000 or above, and are used in determining probation/suspension.

Satisfactory/Unsatisfactory Grades

All courses taken to fulfill the requirements for the degree program must be taken for letter grade (A through F) except those courses given for S/U only.

The grade of S (satisfactory) is interpreted to include grades A through C and the grade of U (unsatisfactory) to include grades C- through F on the conventional grade scale for courses numbered less than 5000 (for courses 5000 or above, the grade of S is interpreted to include grades A and B). Credit hours of S/U courses are counted as hours attempted toward graduation. However, neither the S nor U grade carries grade points nor will be included in the calculation of the cumulative grade point average.

The faculties of the various colleges shall determine the number of credit hours of S that may be used to satisfy degree requirements in their programs. They may also place restrictions upon the use of S credits to satisfy college or major requirements. In addition, they may designate particular courses in their colleges as courses to be offered for S/U only.

The grade of S in thesis and dissertation research is a judgment that the student is adequately engaged in the required research objective. It in no way implies that the final thesis or the thesis defense will be judged of sufficient quality for the award of the appropriate degree.

Incomplete Grades

The incomplete grade (I) is a temporary grade used under circumstances where awarding a grade would be unjust or not reflective of the student's actual performance in a course. The assignment of an I is intended for use in unexpected circumstances; the Incomplete cannot be assigned simply to allow additional time to complete a course in the absence of unusual or unanticipated events. Graduate students who are unable to complete a course in normal class time period, and are not dealing with unusual or unexpected circumstances, should not receive an Incomplete grade. In the event of unusual circumstances, when an Incomplete grade is a reasonable alternative, the time allowed for completing course requirements will normally not exceed 120 calendar days beyond the end of the semester in which the I was given. The dean of a college may designate certain research courses where the 120-day limit may be extended by the instructor.

The I will revert to an F if the final grade for the course is not received in the Office of the Registrar by the date indicated on the authorization. Students receiving an incomplete in any course(s) listed in their program of study must have the incomplete removed by the end of the semester in which they turn in their intent to graduate. If the incomplete is not removed, the student will not graduate that semester.

Academic Dishonesty

Academic dishonesty and scholarly misconduct will not be tolerated. Academic dishonesty is an act attempted or performed that misrepresents one's involvement in an academic task in any way, or permits another student to misrepresent the latter's involvement in an academic task by assisting in the misrepresentation (www.uwyo.edu/regs-policies/index.html).

If academic dishonesty has been established, the offending student shall receive a failing grade for the course in question. If two such acts have been recorded at different times or in different courses, the student shall be suspended from the university in accordance with UW Regulations. These actions shall not preclude the imposition of other sanctions by university officers including the loss of benefits from programs, scholarships, and other opportunities normally afforded students.

Degree Revocation

The University of Wyoming is a state higher education institution whose Trustees are legislatively empowered to confer degrees on students who have earned them, upon the recommendation of the faculty. The Board of Trustees recognizes that there may be instances where a degree is awarded to an individual who, upon review, has not properly completed all requirements for the degree. In such instances, the Board of Trustees may revoke the degree. UW Regulation 2-120 establishes the process for such revocation.

Grounds for revoking a degree include convincing evidence that the degree recipient failed to complete the requirements for the degree that were in effect at the time of the degree conferral. Included in this category is evidence that the candidate engaged in academic misconduct serious enough to negate bona fide completion of one or more substantive degree requirements. Additional information can be found at (www.uwyo.edu/regs-policies/index.html).

Course Numbering for Graduate Credit

Courses offered for graduate credit are distinguished by number as follows:

- 4000-4999 are primarily for junior and senior students, but also may be used as part of some graduate programs of study. Not more than 12 hours of 4000 level coursework will be permitted on the graduate program of study.
- 5000-5999 are primarily for graduate students

Courses numbered 5000 or above may be taken by undergraduate students having the necessary prerequisites. If a course is filled, graduate students will have preference and undergraduates may be asked to relinquish their place in the course. Graduate students may enroll in courses numbered 1000-3999 to remove undergraduate deficiencies, but only those numbered 4000 and above will be computed into the graduate GPA and are allowed for graduate credit.

Dual Listed Courses

If a course is dual listed at the 4000/5000 level, the course must be taken at the 5000 level to receive graduate credit regardless of whether the course is in the student's primary program area.

The syllabus for a dual listed course must specifically differentiate expectations, outcomes and assessment between the 4000 and 5000-level components, clearly describing the additional effort needed for graduate level credit. Students enrolled in the 5000-level course will be expected to demonstrate greater sophistication in content expertise, inquiry, creativity, communication, problem solving, analytic reasoning and/or collaborative learning compared with those enrolled in the 4000 course. Examples include (but are not limited to) intellectual skills, discipline-specific competencies and challenging learning outcomes. Students enrolled in the 5000-level course may be required to lead discussion sessions, submit a portfolio, write a paper or may be involved in a service learning component, internship or collaborative assignment designed to provide experience in applying course information in different contexts.

Courses Not Applicable Toward Advanced Degrees

Only courses at the 4000 or 5000 level may be counted for graduate credit. However, some 4000- and 5000-level courses may not be applicable toward undergraduate or graduate degrees. These courses are listed below:

- **** 5959. Enrichment Studies in ____ . (Any course numbered 5959 is not applicable toward UW degrees.)
- EDUC 4740. Field Studies in ____ . (Any course in the College of Education numbered 4740 is not applicable toward UW degrees.)
- CNSL 5740. Continuing Education in ____ .
- KIN/HLED 4074. Field Studies in ____ .
- HLED 4970. Field Experience in Health Education.
- **** 5920 Continuous Registration: On Campus
- **** 5940 Continuous Registration: Off Campus

Distance Education Courses

Distance Education to carry graduate credit, must satisfy achievement criteria acceptable to Academic Affairs and must be taken under the auspices of UW. Distance Education delivery of existing graduate on-campus graduate courses (hybrid courses) are acceptable examples.

In-Residence Coursework (Residency)

In-residence coursework includes courses and/or research work on the UW Laramie or Casper campuses (including distance/online), at an approved UW off-campus course site, and/or research work done for credit in the field under the direction of a UW faculty member.

The minimum number of semester credit hours that must be earned on a UW campus or at an approved UW setting for a particular degree program shall be determined by the individual colleges. In no case shall these minimum numbers of credit hours be less than

21 hours beyond the bachelor's degree for the master's degree, 21 hours beyond the master's degree for the doctoral degree, or 24 hours beyond the bachelor's degree for the doctoral degree.

In computing the in-residence requirements for the Plan A thesis and doctoral degrees, credit earned working on the thesis or dissertation shall apply.

Repetition of Courses

No more than two courses (total of six credit hours) available for graduate credit may be repeated by students at the graduate level. This regulation does not apply to those courses carrying variable credit (e.g., research or independent study). Variable credit courses are considered repeated only when so certified in writing by the instructor and the registrar.

Continuous Enrollment

Once admitted, all degree seeking graduate students must maintain continuous enrollment. Unless a formal leave of absence is approved, all students must maintain at least one hour of continuous enrollment, including in the semester or session they expect to receive the degree. Students should maintain enrollment for two of the three academic semesters. Readmission will be required if the student has not enrolled in classes within the previous 12 months. Readmitted students should contact their department to learn more about their status. The department will contact the Office of the Registrar to initiate reactivation. Students who have been inactive for a long span of time should also investigate the status of their committees, programs of study, and time to degree status. International students' enrollment status is monitored by the Office of International Students and Scholars and the office should be contacted for more information. Only students not supported on a Graduate Assistantship are eligible to enroll in Continuous Registration.

Time Allowance and Limitations

Master's students have six calendar years to complete their degrees from the beginning of the first course taken and listed on the program of study, including any transfer courses. Doctoral candidates have four calendar years after the successful completion of their preliminary examination to complete their degree and they must complete their degree within eight years of the first course taken and listed on their program of study, including any transfer courses.

Guidelines for Satisfactory Academic Progress

Graduate students should undergo annual reviews within their academic unit to document and verify their progress and faculty expectations for them in attaining their degree. Students that do not meet the following guidelines for Satisfactory Academic Progress may be subject to dismissal by the academic degree-granting unit, contingent upon a joint review by the Department Head and Committee Chair. Dismissal of a student for lack of satisfactory academic progress requires that the student's deficiencies are clearly documented and the potential dismissal documentation must be provided to the student for response. Once presented with the potential dismissal, the student must be allowed one academic semester to rectify inadequate progress. At the conclusion of that semester, the Committee Chair and Department Head must jointly concur that the student progress is either satisfactory for retention or that the student should be dismissed from the degree program. For the purposes of determining

satisfactory progress, the student must demonstrate successful performance of their duties and completion rates under a specific timeline (specified in the proposed dismissal document). If the student cannot meet the maximum timeframe and completion rates below, they may receive a maximum of one 1-year extension of time to completion (specified in a document of retention), and only if the student holds academic standing to continue enrollment. Final decisions for dismissal or retention require agreement of both the Committee Chair and Department Head. Retention in the program requires that the Chair and Department Head document for the student all requirements for retention that clearly defines the path to successful degree completion within a specific time period. Retention requires that the student cannot drop or withdraw from any subsequent courses or enroll in coursework that is not identified in their Program of Study.

Maximum Credits

Students must graduate before attempting more than 150% of the hours required for their degree program (e.g. 45 hours for a 30-hour Master's degree program or 108 hours for a 72-hour Doctoral program.) Repeated courses (up to 6 hours) will accrue hours only once for the purposes of this calculation. Courses dropped in the drop/add period will not be included in attempted hours or the maximum credit calculations. Hours accumulated in one graduate program will count toward the maximum timeframe should the student initiate a new graduate degree program without completing their initial graduate degree.

Degree Status

Students must have an academic standing that allows for continued enrollment (i.e. 3.000 GPA in their graduate coursework and any other specific requirements of the degree program).

Research or project outcomes

Students must demonstrate delivery of research or creative products in disciplines for which they are required to attain the graduate degree. Research activity in itself should not be confused with products and outcomes. For example, an approved research proposal, a thesis, a dissertation, peer-reviewed publications, external project reports, performances or professional presentations are outcomes whereas writing, conducting a literature review, attending meetings etc., although important, are research activity but are not outcomes.

Petitions and Appeals

The University of Wyoming, as a fully-accredited public institution of higher education, must comply with general laws, regulations, and principles of fairness, uniformity, and accountability. Exceptions to uniform application of general regulations are justified only in extraordinary circumstances. Exceptions to regulations may be petitioned by submitting the appropriate form to the Associate Vice Provost of Graduation Education. Regardless of the signer's recommendations, the Registrar may deny the exception. If the petition is denied by the Registrar, the student may elect to pursue the petition with the Provost.

The Graduate Student Appeals Board (GSAB) was established to provide an appellate body to review appeals of graduate students concerning retention in graduate programs, employment as graduate assistants, and charges of academic dishonesty or scientific misconduct. The GSAB members are faculty and graduate students from the Graduate Council and represent campus-wide disciplines. The GSAB will not hear appeals of course grades or charges of academic dishonesty associated with a course (these appeals will be handled by the procedures of the college in which the course is offered). Appeals emanating from Plan B, thesis, or dissertation research will be heard by the GSAB. The GSAB will hear appeals of course grades or charges of academic dishonesty associated with a research course (i.e. thesis, non-thesis, or dissertation research). Policies and procedures for graduate student appeals may be found on the Academic Affairs Graduate Education web site (<http://www.uwyo.edu/uwgrad/>).

Steps Required for Degree Completion

Once a student enters a graduate program, it is critical to initiate a committee to guide course selection and the graduate program. Clear guidance from the department and the graduate committee, especially the committee chair, facilitate steady progress toward a graduate degree. A student's graduate committee requires approval by the department or division chair or head, the college dean, and the Associate Vice Provost for Graduate Education. The committee functions to guide the student in coursework selection, the degree project construction, and in fulfilling the requirements to complete the degree.

It is the responsibility of the graduate student, in consultation with their major advisor (usually the Committee Chair) to form a viable committee within the first two semesters of their graduate program. The graduate committee must be on file with the Registrar before a Program of Study will be approved.

The committee will serve in an advisory capacity for development of the student's coursework and research programs and must approve the official program of study form filed with the Office of the Registrar. The committee will also determine pass or fail on the preliminary examination, approve or disapprove the project, thesis, or dissertation documents, and will conduct the final examination.

Changes in committee membership or faculty assignments can be requested at any time by the student, in consultation with the Committee members and the department/division head. Committee changes require the written acknowledgement of faculty who are either added or removed from the committee, accomplished with the Change of Committee form.

Committee Formation

Every committee must be designed to best support the student project or research, facilitate a timely and effective graduate program, and to document fulfillment of all requirements of the graduate degree sought; committees should be formed by the end of the student's second semester. Committees are formed to guide the student and the research or project to ensure a rigorous and fair process. Students must weigh the expertise of the committee membership against the number of members they select, to insure good mentorship and to facilitate meeting function and effectiveness. More detailed information on committee formation is available on the Office of Graduate Education Policies page (www.uwo.edu/uwgrad/policies/).

The graduate committee consists of at least three members for master's and Ed.D. and five members for doctoral degrees: the chair of the committee (the major professor) from the degree-granting department or division, an outside faculty member of a department or division other than the one awarding the degree, and additional required members. Committees that include a co-chair may indicate the co-chair as the third member.

Membership Roles on Graduate Committees-Required members:

All committees must include a majority of members from UW faculty. All members of a committee hold equivalent voting rights except when a tie vote occurs. In the case of tied votes the Chair, with the concurrence with the outside member will determine the outcome.

Chair- All committees will have at least one member from the degree-awarding department/division as chairperson. The chair should closely direct the student's project or research and guide the student to form their graduate committee. In most cases, annually appointed academic faculty (temporary, visiting research professor, clinical professor and professor of practice should not generally be chair graduate committees. The Chair guides timely progression of the student throughout their program and assessment of that progress.

Outside member- A critical committee member usually is a tenured faculty from outside the major department/division who serves as the Outside member. The outside member is defined as a tenured or tenure-track UW faculty member holding an appointment in a division or college other than the one from which the candidate will receive the degree. It is the role of the Outside member to assist the student, in consultation with the Chair to work to resolve any issues that may arise during the student's graduate program. Their role lies in protection of fairness. The outside member also reviews the student and their graduate program to ensure academic rigor. The Outside member provides assessment of the graduate student's learning and of the program rigor and fairness. Untenured tenure-track faculty members may serve as the Outside member if they have demonstrated experience mentoring graduate students and if the Committee Chair has no role in evaluation of the untenured faculty member.

Additional Required Members- a third faculty committee member (Masters and Ed.D.) and third and fourth required members (Ph.D.) can be selected from the student's home department, program, or division, although discipline requirements differ. If there is a committee co-chair, they may be considered the third member on a master's committee. The fifth member of doctoral committees may be an external member.

Added members- (members in addition to the required members on any committee). Additional members may be placed on a committee either from within or outside the department or program. Members of the UW faculty who are extended term with appropriate academic roles can serve. Additional faculty including annually appointed academic faculty, can be added to any committee for their expertise as desired. Students should be conservative in the total number of members on their committee.

Optional committee members:

Co-Chair- in some cases, two faculty may be closely directing the project and graduate student. In such cases, one may serve as a co-chair. A co-chair can be considered the third member on master's committees.

External member- An individual with an off-campus affiliation may serve as an external member. The external member of the committee is a faculty member at a peer institution or an individual holding professional expertise that will contribute to the committee. Such an appointment assumes that the external member participates fully in the essential components of the degree-granting process and holds full voting privileges. Often, external Adjunct faculty serve as external members. The external member cannot replace the outside member.

Other members- Faculty members leaving UW more than a semester prior to the students intended date of completion must be replaced with a UW faculty member on the graduate committee to ensure effective mentoring. The departing faculty may remain on the committee as an external member

Program of Study

Following formation of the committee, each student must submit a program of study to the Office of the Registrar for approval. The Program of Study form details the minimum coursework and credits that will apply in fulfillment of the graduate degree. The program of study form is available online at, www.uwyo.edu/registrar/students/graduate_student_forms.html.

The completed form should be returned with all required attachments to the Office of the Registrar. Degree Analysts will transcribe the program into a degree evaluation, which constitutes an agreement between the student, the student's committee, and the university wherein the minimum coursework requirements for that student's degree are listed. The program should be filed no later than the beginning of the student's third semester (or second Summer Session if enrolling only in summers). No master's student will be a candidate for a degree until his/her program is approved by the head of the appropriate department and the college dean. Master's degree candidacy coincides with the approval of the program of study.

The program of study must include the minimum number of appropriate semester hours of graduate credit required by the degree granting unit. Some degree programs require more than the minimum hours of credit required by the university. Students must consult with their advisers and all departmental guidance documents including this catalog. It is the responsibility of the student to insure that their program of study complies with degree fulfillment requirements. Changes to an approved program must be submitted to the Registrar, using the Request for Change in Graduate Program form.

Language or Other Tool Requirements for Doctoral Candidates

The prospective Ph.D. student should refer to the specific department in which he/she desires to major to ascertain what languages or research tools are required. Certification of a language or tool, if required, will be made by the appropriate agency or department of the university to the Office of the Registrar when proficiency requirements have been met to fulfill the tool requirements. Students may demonstrate proficiency on a standardized language examination prepared by the Educational

Testing Service, or by receiving at least a grade of B in a course (or courses) specified by a department on this campus or on a reading test administered by the department. It will be each student's responsibility to see that certification of proficiency for tool requirements is made. Coursework certification may be made from transcripts filed by the student with the Office of the Registrar.

Examinations

Examinations may be required of any graduate student or advanced-degree candidate at such time or of such nature as the department or the student's graduate committee may require. It is standard procedure for doctoral students (Ph.D. and Ed.D. students) to be given a preliminary examination, and for final examinations to be conducted for both masters and doctoral students. It is common for the nature of these exams to differ from one academic unit to another.

Preliminary Examination

Candidacy in the doctorate occurs upon certification of successful completion of the preliminary examination. The preliminary examination will be held at least 15 weeks prior to the final examination. The preliminary examination may not be given before: (a) the research tool requirements, if any, have been met and certification approved; (b) at least 30 hours of coursework have been completed; and (c) the doctoral program of study has been approved. The format and conduct of this examination shall be the responsibility of the student's committee, in accordance with any departmental policies (see specific departmental guidelines).

Following the completion of the departmental preliminary examination, the Report on Preliminary Examination must be submitted to the Office of the Registrar, regardless of whether the student passed or failed. The favorable vote of the majority of the student's graduate committee members, including the Chair and Outside member, will be accepted as passing. In case of failure, the student may repeat the examination once only, after 120 days have passed but not more than four semesters have elapsed. When the preliminary examination has been successfully completed, and the report of the committee is filed in the Office of the Registrar, the doctoral student is admitted to candidacy for the degree. At this time, the doctoral candidate has four years from the semester of the preliminary exam to complete the degree process.

Admission to Candidacy

Time spent in graduate study or accumulation of credit hours will not necessarily allow a student to become a candidate for an advanced degree. Admission to candidacy is an expression of the judgment of those who have observed the work and reviewed the credentials of the student, and deem the student worthy of the opportunity to complete the work for an advanced degree. Admission to candidacy for an advanced degree requires a specified procedure for specific degrees.

Final Examination

The final examination may not be held until after the beginning of the semester or session in which coursework is completed. The date, time, and place of the examination must be announced to the public a minimum of two weeks before the final examination is held. The committee may require the candidate to take a written examination as well as an oral examination. The thesis or dissertation document must be submitted to the candidate's committee at least three weeks prior to the final exam. The thesis or dissertation must be available for inspection by any other member of the faculty who may wish to examine it.

The oral and/or written examination should be held by the student's graduate committee at least 10 days before the end of the term of graduation. A student failing his/her final examination may retake the examination once only in the following minimum of one and not more than three semesters to allow the student to address any deficiencies identified by the committee during the initial testing.

Following the student's defense, the student will submit a signed Report on Final Examination form to the Office of the Registrar. The written vote of each member of a candidate's committee must be on record in the Office of the Registrar on the Report of Final Examination form. Committee signatures must indicate that the majority of the committee approve recommendation of the student to receive the advanced degree. Any majority of committee member signatures on this form that includes both the Chair and the Outside member will be received by the Registrar as indication that the degree should be awarded. The form also provides documentation from the student's committee that the student has passed the Final Examination/Defense and that the

committee has approved the final version of the thesis or dissertation that will be publicly available. The Registrar requires the student to make the document publicly available via ProQuest. All students whose programs require a Thesis/Dissertation must submit the document to ProQuest before the last day of classes. Once the final examination is passed and reported, a Degree Analyst will review the degree evaluation to verify that any discrepancies have been corrected, confirm that final grades on any remaining coursework have been posted, and that all required forms and documents have been submitted. Once all requirements have been met, the degree will be awarded.

Declaring a Graduation Date

An Anticipated Graduation Date form must be filed for the semester in which graduation is planned. This form puts the student on the list for graduation. If graduation does not occur during the projected semester, the student must submit a new form no later than the deadline date for the new final semester. By the designated deadline, students who are entering their semester of graduation should:

1. Download the Anticipated Graduation Form from the Office of the Registrar website and submit the completed form to the Office of the Registrar.
2. Pay their associated graduation fees (diploma and/or certificate fee) and retain receipt.

If discrepancies are found during the degree check, the Degree Analyst in the Office of the Registrar will contact the student/chair with instructions for resolution.

Final Steps in Completion of Degree Requirements

Thesis or Dissertation Documents

The candidate shall submit an electronic thesis or dissertation demonstrating the candidate's ability to communicate the outcomes of their graduate program.

The master's thesis and doctoral dissertation are integral components of graduate education. For many disciplines, publication of student research in peer-reviewed journals is a hallmark of successful graduate education that validates the scholarly results. The university encourages the use of published papers in the final document, subject to some guidelines.

Publications included within a thesis or dissertation must be must have been submitted for publication in scholarly peer-reviewed journals. The citation for any published papers must appear within the introductory chapter. The publications must be written by the student. Editorial oversight by the mentor and committee is desirable; however, the mentor and committee have the responsibility to ensure that the student is the main author of the thesis or dissertation. For multi-authored journal articles included in the thesis or dissertation, the contribution of each author must be clearly stated in the preface or introduction to the thesis or dissertation and in a footnote on the first page of the article. If more than one publication is included, the articles must be joined into a coherent whole, having a clear focus of inquiry. In addition to the journal papers, a thesis or dissertation must include comprehensive introduction and discussion chapters that unite the document and provide context for the journal papers. A thesis or dissertation is not evaluated relative to accumulated credit hours. The thesis or dissertation document and all appendices must be provided in an electronic format for upload into ProQuest following the format of standards established by the University Libraries, ProQuest Information and Learning.

Digitizing and ProQuest Upload Requirement

All graduate students accept as a condition of enrollment that completed theses and dissertations will be published through ProQuest Information and Learning. This involves a special fee. The appropriate form for submitting the thesis/dissertation is available when submitting the project electronically through ProQuest Information and Learning.

Survey of Earned Doctorates

The university requires the Survey of Earned Doctorates and the Report on Final Examination form be submitted on or before the date established by the Office of the Registrar for fulfilling the requirements for advanced degrees each semester. The survey is available on the Graduate Student Resources Web site. All Ph.D. students must complete this survey.

Patenting or Copyright by UW

In some cases, where significant university funds or resources have been used in dissertation research, the university may claim an interest in patenting or copyrighting the results. When this seems likely, the student (or the student's major professor) should consult with the college dean or the vice president for research.

Classified or Proprietary Research

The process of research in graduate education is one of free and open inquiry involving the student and faculty. Final examinations for graduate degrees are open to all faculty, and theses and dissertations are accessible to the public upon acceptance by the university unless embargoed as approved in advance.

For the purposes of this policy, classified research is defined as research that has a security classification established by a federal agency. Classified research projects also require approval of the trustees before being initiated. Classified research cannot be used for a thesis or dissertation.

Proprietary research is defined as research for which the sponsor requires a delay in publication. Given these clarifications, the following policies are used for theses and dissertations. Proprietary research may be used for theses and dissertations. However, any delay caused by the proprietary nature of the research must be alleviated before the thesis or dissertation is submitted to the Office of the Registrar. Such delays cannot exceed six months without the approval of the college dean. Delays greater than 12 months in length will be approved only in unusual circumstances unless embargoed as approved in advance by the college dean. Sponsors of proprietary research should be aware that theses and dissertations are accessible to the public upon acceptance.

Embargo

Students wishing to embargo/copyright or otherwise delay release of their thesis/dissertation must have previous authorization of the college dean and the Office of Research and Economic Development on file in the Office of the Registrar.

Overview of Graduate Degrees Awarded

In all cases, graduate students should confirm the departmental guidelines for the degree they seek. The information presented here is intended to provide only a general overview of the graduate degrees. Individual colleges and departments may apply more rigorous requirements for their graduate degrees than the minimal requirements described here.

Master's Candidates

The standard master's degrees are the Master of Arts (M.A.) and the Master of Science (M.S.). Generally, Master of Arts degrees are more common in the arts, humanities and social sciences, while Master of Science degrees are more common in the health, natural and physical sciences, business and engineering. The program of study includes a declaration that the student will pursue a particular project plan: either a Plan A thesis or a Plan B non-thesis. Once the program of study has been approved for a

master's student, the student advances to candidacy. The master's program of study, whether a declared thesis or non-thesis project plan, must include a minimum of 30 hours of graduate credit.

A culminating defense is required for the Plan A and the Plan B master's programs. The final defense is an essential component of all graduate degree programs.

The defense structure and format is flexible but it should allow opportunity for the student to demonstrate content comprehension and application, critical and quantitative analysis, creative thinking, problem solving, synthesis, and evaluation.

Following the defense, regardless of the outcome, the student will submit a Report of Final Examination form to the Office of the Registrar. This form is available at http://www.uwyo.edu/registrar/students/graduate_student_forms.html.

Plan A Master's

This program type must reflect a minimum of 26 hours of acceptable graduate coursework and four hours of Thesis Research credit (course number 5960; course number 5980 may also count). The Plan A thesis option accommodates original research, although the degree of originality and the definition thereof is sometimes program-specific. The planning, development, and production of the thesis is guided by the committee chair and the graduate committee.

The thesis is the final, written product of the project. General required guidelines for preparing a thesis are available in the "Thesis and Dissertation Format Guide." The thesis must be submitted to the student's committee at least two weeks before the intended date of final examination.

The electronic copy must meet the standards established by the faculty and those of the University Libraries. This copy, submitted to ProQuest will ultimately be deposited in the University Libraries. Each student normally submits at least three hard copies of his/ her thesis: one for the thesis director, one for the department, and one to retain for personal use.

Plan B Master's

The Plan B non-thesis program differs from the thesis program in that it includes additional hours of coursework instead of thesis hours. It permits a wider distribution of courses and permits a wider array of possible final products than the Plan A thesis program. The non-thesis project may take the form of a business plan or a professional portfolio. Each academic unit that engages in Plan B non-thesis activities often has its own set of principles that guide students in degree requirements. It is the responsibility of the student to consult with their committee chair to clarify specific guidelines for the Plan B Master's degree in their discipline.

Most, but by no means all, of the academic units that have students pursuing master's degrees in the Plan B non-thesis category have the students prepare a paper, or sometimes two papers, as their final project. In the selection of a subject and preparation of the paper(s), the student shall be guided by the committee, or adviser or, in some academic units, by the instructor(s) in charge of the course(s) connected to the paper(s). The paper(s) should present the results of study at a level of scholastic quality commensurate with a Plan A thesis project. The student and his or her adviser often, but not always, decide if a project will be Plan A or Plan B. Academic units have principles that guide students in this selection. Many units have rules that precisely dictate the type of program and project a student can conduct.

The format for the Plan B non-thesis paper should follow that of the Plan A thesis. However, Plan B non-thesis paper titles do not appear on the student's transcript, whereas, Plan A thesis titles do. Plan B non-thesis papers are not filed in the University Libraries and they are not submitted to ProQuest. They are filed with the major academic unit.

Master of Arts in Teaching (M.A.T.) and Master of Science in Teaching (M.S.T.)

Candidates for the M.A.T. or the M.S.T. should have completed the requirements for teacher certification prior to application for admission to graduate study. The M.A.T./M.S.T. program is completely separate from State certification requirements. Hours used to meet certification requirements cannot be applied toward the M.A.T./M.S.T. degrees.

The M.A.T./M.S.T. degrees are only modifications of the Plan B non-thesis option and are subject to the requirements of the admitting department and the general requirements of the faculty.

At least 24 of the 30 semester hours required must be in a particular teaching area (e.g., chemistry, history), with at least 12 hours in one department. A student working jointly in two departments must take at least 12 hours from each department.

The M.S.T. is designed for one teaching area and must include 18 hours in, or the total required by, that area. A program designed for two teaching areas must include 12 hours in, or required by, each of the specified two areas. Courses offered by the Science and Mathematics Teaching Center do not constitute a separate area in themselves but may be applied to an appropriate area. A program designed for two teaching areas must be approved by the heads of both departments, and the graduate committee for this program must include one member from each department. The M.S.T. is intended for individuals teaching at the secondary level. The program should represent the student's needs.

Master of Business Administration (M.B.A.)

The Master of Business Administration degree is offered to qualified students who wish to pursue a professional and highly applied degree program. Offerings include full-time, on-campus programs of study and part-time, online programs of study.

The U.W. M.B.A. program delivers professional management education that connects principles, concepts, and intense case analysis with real-world experience as tools for making business decisions. Students will develop leadership and managerial skills and will possess the education and training needed to compete in today's rapidly changing global business environment. The total program experience, inside and outside the classroom, is designed to provide experiential learning along with access to powerful networks. Satisfactory completion of at least 47 semester hours and participation in all MBA activities are required. Please see the Master of Business Administration section for specific requirements (<http://www.uwyo.edu/mba/>).

Master of Music in Performance (M.M.)

The Master of Music in Performance (M.M.) is intended for the student who wishes to pursue a career as a performer, to prepare for doctoral study, or to improve his or her performance ability. Students must pass an entrance audition for admission to the program. The entrance audition should be performed the semester prior to admission. Graduate Placement Examinations in history and theory will be administered the week prior to the commencement of classes and will determine if a student may advance to graduate level coursework. Failure of one or more sections will require a refresher course in the fall (Graduate Fundamentals). Major area studies consist of courses appropriate to the student's area of concentration. A minimum of 50% of courses taken must be deemed "graduate level only" (5000-level). Satisfactory completion of at least 30 semester hours and a Plan B paper or lecture-recital are required. Please see the Department of Music section for specific requirements (http://www.uwyo.edu/music/graduate_students/index.html).

Master of Music Education (M.M.E.)

The Master of Music Education is intended for those students who wish to improve their teaching abilities for the public school environment or to enable them to teach at the college and/or university level. Graduate Placement Examinations in history and theory will be administered the week prior to the commencement of classes and will determine if a student may advance to graduate level coursework. Satisfactory completion of at least 30 semester hours is required. Either Plan A (thesis) or Plan B (non-thesis) options are available. Please see the Department of Music section for specific requirements (http://www.uwyo.edu/music/graduate_students/index.html).

Master of Public Administration (M.P.A.)

The M.P.A. degree is designed for both pre-career and mid-career students who seek leadership positions in public service. The program is designed to meet the needs of place-based working professionals through distance education technology, while full-time traditional graduate students can pursue their coursework in-person, on campus. At least three years of successful professional experience is required to be classified as "mid-career." For traditional graduate applicants, an internship is required at some phase of their studies on campus. Satisfactory completion of at least 39 semester hours is required. Please see the Political Science section for specific requirements (<http://www.uwyo.edu/mpa/>).

Master of Social Work (M.S.W.)

The Master of Social Work is designed to prepare graduate students for advanced level social work practice and leadership positions in human service organizations with an emphasis on social justice and anti-oppressive perspectives. The M.S.W. program is focused on an advanced generalist curriculum and rural social work that relies on the problem-solving method and is based on the values, knowledge, and skills of the profession. The M.S.W. is a full time, campus-based program that utilizes different course delivery methods to accommodate its widespread student population. Satisfactory completion of at least 69 credit hours for the standard two-year program and 38 credit hours for the advanced standing M.S.W. program is required. Either Plan A (thesis) or Plan B (non-thesis) options are available. Please see the Division of Social Work section for specific requirements (<http://www.uwyo.edu/socialwork/prospective-students/msw-admissions/>).

Doctor of Nursing Practice (D.N.P.)

The Doctor of Nursing Practice degree is the terminal academic preparation for nursing practice. UW's DNP program prepares family nurse practitioners (FNPs) and psychiatric mental health nurse practitioners (PMHNPs) to engage in evidence-based practice to optimize health outcomes and engage in leadership activities to promote excellence in rural health care. Both the FNP and PMHNP programs of study require 3 years of full-time study, which includes 84 credit hours and a minimum of 1140 clock hours of clinical practice experiences. During their final year in the program, students conduct a capstone quality improvement project in conjunction with a clinical agency. Please see the School of Nursing section for specific requirements (<http://www.uwyo.edu/nursing/programs/dnp/index.html>).

Doctor of Pharmacy (Pharm.D.)

The University of Wyoming School of Pharmacy offers a four-year program of study leading to the Doctor of Pharmacy (Pharm.D.) degree as the only entry-level professional degree in pharmacy. Students are admitted to the professional program following a preprofessional program of not less than two years in length with a total of at least 67 semester credit hours. The Doctor of Pharmacy degree requires satisfactory completion of 146 hours of coursework taken over a four-year period. Please see the School of Pharmacy section for specific requirements (<http://www.uwyo.edu/pharmacy/pharmd-program/index.html>).

Doctor of Education (Ed.D.)

The degree of doctor of education (Ed.D.) is offered to competent students who wish to pursue a program of study and to participate in appropriate activities in preparation for professional service in teaching, administrative, and supervisory positions in education. The program is designed to meet the needs of those for whom intensive research is not a practical prerequisite to vocational goals. Doctoral students are expected to participate not only in organized coursework but also in informal types of activities that will insure breadth of outlook and technical competence.

Each student admitted into the Ed.D. program must furnish satisfactory evidence of having had three years of successful professional experience. This experience may be in teaching or administration or both. The student's graduate committee will determine what experience shall be required and when this requirement has been satisfied.

At least 36 semester hours must be earned in the major field. The degree requires a minimum of 72 graduate hours (beyond the bachelor's degree) to complete all requirements. In addition to the program of studies in organized coursework, the doctoral student will be required to complete and publicly defend an approved applied project report or dissertation within the major field of professional specialization. The project or dissertation can be a collaborative work conducted among multiple (typically two or three) graduate students in the same program area.

A student who has taken a major part of his/her undergraduate and graduate training at UW may be required by his/her graduate committee to do a specified portion of graduate work at some other institution. Please see the College of Education entry for specific requirements (www.uwyo.edu/education/current-students/graduate-education/edd-requirements.html).

Doctor of Philosophy (Ph.D.)

The doctor of philosophy degree does not represent a specified amount of work over a definite period of time but rather the attainment of independent and comprehensive scholarship in a particular field. Such scholarship will be manifest in a thorough acquaintance with present knowledge and a demonstrated capacity for research. The fulfilling of the following requirements suggests, therefore, only the minimum task one must undertake to earn the doctor of philosophy degree. No amount of time spent in graduate study or accumulation of credit hours entitles the student to become a candidate for this degree.

The program of study must include a minimum of 72 semester hours of credit at the 4000 level or above from UW or equivalent levels from another approved university. This 72-hour requirement may include graduate credits earned while working toward the master's degree in the same area, but at least 42 hours (of the 72) must be earned in formal coursework. Additional credits toward the 72-hour requirement may include additional formal course credits, Dissertation Research credits (5980 course number; course number 5960 credits may also be applied), or Internship credits (5990 course numbers). The program of study must be on file in the Office of the Registrar before the preliminary examination can be scheduled.

Miscellaneous Regulations

QuickStart Programs

QuickStart programs allow a qualified student to complete bachelor's and master's degrees in as little as five years. In addition to applying up to six hours of reserved graduate credit, approved QuickStart programs allow students to double-count up to six hours of 4000/5000-level coursework toward the bachelor's and master's degrees. QuickStart students only become classified as graduate students once they have completed all requirements of the bachelor's degree, usually in year five.

Readmission

When a student is not registered at UW for one or more years, without an approved leave of absence, the student is automatically reclassified as inactive and must reapply for admission.

Students wishing to pursue direct entry into a doctoral program following their bachelor's degree

The requirements for entry into a doctoral program are determined by the departmental faculty. In some cases, students may enter a doctoral program without having attained a master's degree. These decisions are made on an individual basis. Such students must fulfill all the requirements of a doctoral degree but may be limited in the number of graduate hours they hold in application to the 72 hour minimum. Careful planning with the graduate program and committee is needed to assure that the student makes clear progress to the degree. One consideration of the student is whether they will obtain a master's degree on the way to the doctorate. If so, the student should be considered a master's degree student until that degree is accomplished, or until the preliminary exam is passed. Once the preliminary exam is passed, the student may be considered a candidate for the doctoral degree, just as other students would. Students who do not hold a master's degree cannot be considered a candidate for the doctoral degree until they have passed their preliminary exam.

New Parent Accommodation Policy

The University of Wyoming is dedicated to ensuring optimal success for all graduate students. However, new parents are frequently forced to interrupt their education cycle, sometimes in a transient manner but often permanently.

The New Parent Accommodation policy is designed to allow new parents to maintain full-time, registered student status and facilitate their return to full participation in graduate activities in a seamless manner without penalty. The policy applies to full-time students enrolled in a graduate program. If both members of the new parent partnership are UW graduate students, one but not both will be eligible for the full accommodation. However, the university encourages accommodation of schedules for exams, assignments and programs of study for the graduate student partner. This accommodation does not apply to part-time students.

A student anticipating becoming a new parent is eligible for accommodation consideration for a period of up to one semester. The exact accommodation period will begin on the date specified on the New Parent Accommodation petition approved by the college dean. This petition must be filed and approved prior to the actual date of childbirth or adoption. Additional information can be found at www.uwyo.edu/uwgrad.

Armed Services

Time spent in the armed services is not computed in the total time allowed to complete the requirements for an advanced degree; however, students who are eligible and wish to use this time exclusion must file the leave of absence petition.

International Students

Upon arriving at the University of Wyoming, international students are required to visit the International Students and Scholars (ISS) office. This office:

- Provides support and counsel for UW's international students and scholars population regarding aspects of immigration regulations and procedures;
- orients this population to the policies and expectations of the university, the educational system, and the U.S. culture;
- hosts a mandatory orientation program for all new international students before the beginning of each semester.

Please see the ISS Web site for detailed information (www.uwyo.edu/iss).

International graduate assistants with teaching responsibilities must complete the English Proficiency Assessment Program and must participate in the Graduate Student Teaching and Learning Symposium. Check the Graduate Student Resources Web site (www.uwyo.edu/uwgrad) for dates and times.

- Participation in Commencement Exercises
- Graduation with Honors

Graduation Requirements

Students are personally responsible for knowing degree requirements and enrolling in courses that fulfill their degree program. Students, with the help of their advisers, design their program to satisfy their needs and aims. Students will be required to complete assessment activities as determined by the university prior to the awarding of degrees. Students are likewise held responsible for knowing regulations governing the standard of work required for continuance in the university involving academic probation and suspension.

Although this catalog is intended to set forth the various provisions for study and requirements for the awarding of degrees, periodic revisions of the provisions for study and degree requirements are appropriate (because of advances in knowledge, changes in occupational requirements, academic preparation of students, and in faculty and facilities at the university). In order for the catalog to be available in spring of each year, publication must begin the previous October. This is almost a year before the requirements specified therein become effective the following fall and almost five years before a student entering at that time could graduate. Accordingly, the university cannot guarantee the awarding of a degree based on the unchanged requirements as set forth in a particular catalog.

Adjustment to Changing Requirements

Students are expected to inform themselves of changes in degree requirements by reviewing the catalogs that are published annually and their Degree Evaluation reports; then, when necessary, adjust their degree plans accordingly.

If university or college requirements are changed, students are encouraged to adopt the new requirements; however, students will have the option of graduating under the requirements in effect when they entered the university or one of Wyoming's community colleges, provided the courses are still available. The student must accept either the new requirements or the requirements in effect when they entered the university or one of Wyoming's community colleges in their entirety, not a combination from each. Students changing colleges within the university or reentering the university after one or more years away are expected to adopt the requirements in effect at the time of the reentry. Any substitution to the above must be approved in writing by the student's adviser and the college dean and added to the student's advising folder in the department or college.

If departmental requirements are changed, students will ordinarily be permitted to continue under the requirements in effect when they entered that major department provided there has not been an interruption in their education for a year or more; however, students are encouraged to adopt the new requirements. Notice of changes will be available from departmental offices and advisers. It is the responsibility of students to keep in touch with their major departments, to learn of changes in requirements, and to plan ahead so that necessary courses can be taken by the expected time of completing a degree. Many courses are not given every semester and some not every year.

If required prerequisites for a course are changed, notice may be obtained from the department offices. The university cannot continue two courses, one with and one without a newly-adopted prerequisite. The student must therefore meet the new prerequisite or obtain permission from the instructor to enroll in the course. In the event of any doubt as to the adequacy of preparation for a course, the student should consult with the instructor or an adviser in the department as far in advance as possible. Independent study, if approved, may be accepted in lieu of a specific course prerequisite.

Scholarship Standards

A UW cumulative grade point average (GPA) of at least 2.000 is required for undergraduate degrees and 3.000 for graduate degrees. The cumulative grade point average is defined as the sum of all grade points earned in residence, via Distance Education at the University of Wyoming, with the following exceptions:

1. The credit hours shall not be counted in courses in which marks of W, S, or U were assigned, or in which marks of I (for incomplete) are still in effect.
2. For repeated courses:
 - a. First repeat: only the second credit and grade is used to calculate the cumulative GPA.
 - b. If repeated more than once, only the last grade is used to calculate the cumulative GPA.
 - c. If a mark of W, S, or U is assigned in a repeated course, the previous grade assigned will stand except when an S or U is earned repeating a previous S or U.
 - d. Courses applied towards one completed undergraduate degree may be repeated as part of a second degree; however, the grade and GPA in the original degree will not be changed.
3. Transfer grades are not counted in the UW GPA. If a course taken at UW is repeated for the first time at another institution, the credits and grade earned at UW will be deleted from the UW cumulative GPA if credit for the repeated course is transferred to UW.
4. For graduate students, courses numbered below 4000 are not added into the semester and cumulative totals, nor computed into the GPA.

Semester Hour Requirements

Completion of the total minimum credit hours for undergraduate degrees from the various colleges is indicated below:

College of Agriculture and Natural Resources	120-128 hours
College of Arts and Sciences	120-128 hours
College of Business	120 hours
College of Education	120-128 hours
College of Engineering and Applied Science	120-132 hours
College of Health Sciences	120-123 hours

These minimum hour requirements are in line with the Higher Learning Commission's criteria for accreditation.

The total minimum credit hours for graduate degrees depends on the degree earned. Masters degrees require 30 credit hours and Doctoral degrees require 72 credit hours. See the Graduate Student Regulations and Policies for more details.

University Baccalaureate Requirements

1. A cumulative GPA of 2.000 or better from the University of Wyoming;
2. Satisfactory completion of the prescribed curriculum in which the degree is sought, including fulfillment of the entrance requirements in the college concerned;
3. Satisfactory completion of the University Studies Program: Students who entered the University of Wyoming, one of Wyoming's community colleges, or an out-of-state academic institution fall 2015 or later, are required to complete the University Studies Program 2015, a university-wide program in general education. The detailed requirements for the University Studies Program are provided in this catalog on page 53.
4. Students must complete a minimum of 42 upper division (junior/ senior) or graduate-level semester credit hours, 30 of which must be earned from the University of Wyoming. Credit by examination does not count towards the required 30 hours of residency credit;
5. Not more than 24 semester hours of correspondence study courses may be used toward fulfilling requirements for a bachelor's degree;
6. Not more than 4 semester hours of credit in physical activity courses can count toward the minimum credit hour requirement for a bachelor's degree;
7. The last credit applicable to degree requirements must be earned from the University of Wyoming with the following exception: students of senior standing may complete degree requirements elsewhere by obtaining special permission of the department head, adviser, and college dean, and declaring an anticipated graduation date with the Office of the Registrar;
8. Native language credit: students are not allowed university credit for language courses below the 4000-level in their native language.

Assessment Requirement

Students may be required to complete assessment activities as determined by the university prior to the awarding of degrees.

Second Bachelor's Degree

Students seeking a second bachelor's degree must meet all of the university and college requirements as prescribed for a first bachelor's degree. Students whose first degree was received from an institution where English is not the predominant language must complete the University Studies Communication I (COM1) and Communication II (COM2) requirements. The second bachelor's degree may have the same title as the first degree and may be in the same college as the first degree; but if in the same college it must be in a different major. Grades earned in all undergraduate course work (including courses applied towards a previous UW bachelor's degree) are included in the calculation of the cumulative GPA.

The minimum study requirement for a second bachelor's degree is 30 additional semester hours earned from the University of Wyoming, 12 of which must be in upper division (junior/senior-level) or graduate-level courses. However, a student must also fulfill all of the college and major requirements for the second degree. Credit by examination does not count toward UW residency. The 30 hours is in addition to the study requirement for the first degree for those students earning the first degree from the University of Wyoming. The 30 additional hours would be added to the degree requiring the least number of hours. Both degrees may be awarded at the same commencement.

Courses applied towards one completed degree may be repeated as part of a second degree; however, the grade and GPA in the original degree will not be changed.

Students with a bachelor's degree from an accredited U.S. institution will be considered to have met the UW University Studies (USP) program requirements, with the exception of the US and Wyoming Constitution requirement, unless previously completed.

Second Bachelor's Degree Transfer Policy

Typically, undergraduate coursework from other collegiate institutions will not be loaded individually into the University of Wyoming student database after a bachelor's degree has been earned for the student. In situations in which a student who has previously earned one bachelor's degree from the University of Wyoming is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student's department can ask the Office of the Registrar to load selected courses into the student's record. As with all students who wish to earn two bachelor's degrees from the university, the student will be required to successfully complete the following requirements:

- Major requirements for the major of the second degree
- College requirements for the college which will award the second degree
- A minimum of 30 additional semester hours over the minimum required for the student's first degree
- At least 60 earned semester hours from the University of Wyoming (30 required hours for first degree, 30 additional hours required for second degree)
- At least 54 earned semester hours of upper division (3000+- or junior/senior- level) credit (42 required upper division hours for first degree, 12 additional upper division hours required for second degree)
- At least 42 earned semester hours of upper division (3000+- or junior/senior- level) credit from the University of Wyoming (30 required upper division hours from UW for first degree, 12 additional upper division hours from UW required for second degree)

Concurrent Majors

Students may pursue a concurrent major in one or more colleges. Only one degree (BA, BS, etc.) will be awarded from the college of the primary major. All university curricular requirements, including the University Studies Program requirements, must be met only once. Requirements for secondary major(s) will be established by the academic departments and may include college requirements, in addition to all major requirements. An academic adviser in each major is required and each adviser must review requirements. The degree will be granted on one date only and only one diploma will be awarded. Both majors will be indicated on the academic transcript and diploma.

Dual Degrees

It is possible to pursue degrees in one or more colleges. The university requirements and University Studies Program requirements must be met only once. Students must meet the all college and major requirements of both majors. Students must complete an additional 30 semester hours from the University of Wyoming, 12 of which must be in upper-division (junior/senior-level) or graduate-level courses beyond the credit hour requirement for the degree with the minimum number of credit hours required. An academic adviser in each major is required and each adviser must review requirements. Multiple degrees and multiple diplomas will be awarded; however, the completion date must be the same. Both colleges, degrees, and majors will be indicated on the academic transcript.

Graduate Student Requirements

Graduate students must have a Committee Assignment (if required), a Program of Study, and Preliminary Examination Results forms (doctoral students only) on file before they may submit an Anticipated Graduation Date form. Upon receipt of the form, the Degree Analyst in the Office of the Registrar will verify that all course requirements have been met. If discrepancies are found, the Degree Analyst will contact the student with instructions on how to resolve them. The Degree Analyst will also verify that the student has registered for a minimum of one semester hour for the current semester. If there are questions, the student should contact the appropriate Degree Analyst.

Before the Defense

A formal public announcement of thesis and dissertation defenses is required. Students should contact their department for specific procedures.

Prior to the defense, the student should complete the Report of Final Examination form and take it to the defense.

After the Defense

Following the defense and when all committee signatures have been secured, the student should submit the Report of Final Examination Results form to the Office of the Registrar (note: committee chairs may delay signature until all necessary changes to the thesis/dissertation/ non-thesis paperwork have been made and approved).

After submission of the Report of Final Examination Results form which indicates all changes/revisions have been made and the thesis/ dissertation is approved for final submission, the student will submit the document for format review and final electronic publication to ProQuest. The student will be advised if additional corrections are required.

Ph.D. students will need to complete the NORC Survey of Earned Doctorates through the procedure noted on the Graduate Student Graduation page of the Office of the Registrar website.

Degree Evaluation/Declaring a Graduation Date

All students have an electronic degree evaluation available through WyoWeb that shows requirements of the degree program and the progress that the student is making toward meeting those requirements. Any discrepancies should be reported to a degree analyst in the Office of the Registrar as soon as possible.

Students are responsible for notifying their degree analyst of their anticipated date of graduation with an Anticipated Graduation Date form. Students are encouraged to submit the Anticipated Graduation Date form as early as possible in the expected term of graduation. Delaying this action could affect graduation, as requirements indicated on the degree evaluation must be met prior to a student being cleared for graduation.

Graduation Fee

Payment of the graduation fee of \$25.00 for each degree or certificate to be earned is due by the last day of classes from all students planning to graduate.

Grades

Final grades covering completion of course work in Distance Education, transfer, special examinations, and incomplete work from previous attendance must be submitted to the Office of the Registrar no later than the deadline for submission of final UW grades for the term in which the degree is to be conferred.

Final Approval

Final recommendation of the faculty and approval of the University Trustees for conferral of degrees is required. The trustees may, for good cause, decline to confer a degree upon any candidate.

Participation in Commencement Exercises

Commencement is not the same thing as graduation. All academic colleges hold commencement exercises on the May graduation date. Several of the colleges also have commencement exercises in December. Check the appropriate college dean's office for specific information. Students in their final year of study who have declared graduation dates are considered candidates for graduation. Students in certificate programs do not participate in commencement. **Participation in the exercise does not automatically confer degrees. Confirmation of graduation will occur after a review of final course work.**

The official graduation dates for the 2020-2021 academic year are December 12, 2020 and May 15, 2021. Please note that commencement ceremonies might be held on days other than the official date. To be eligible for a graduation date, all work must be completed prior to that date.

Commencement exercises are a historical academic custom involving participation by all segments of the university and attendance by members of the graduate's families and friends as well as the general public. Those students who participate in commencement exercises are expected to wear appropriate traditional academic regalia.

Graduation with Honors

Designations of summa cum laude, magna cum laude, and cum laude will be added to the baccalaureate academic transcripts and diplomas of graduating undergraduate students earning at least 48 credit hours from the University of Wyoming (of which 45 hours must be for A-F grades) based on the following percentages:

Top 1%	summa cum laude
Next 4%	magna cum laude
Next 5%	cum laude

as computed from the GPAs of graduating undergraduate students in each college. Honors graduates will be identified by comparison to a 5-year rolling grade point distribution computed for each college, to be recomputed annually each spring semester.

These designations are effective with the fall 2000 semester and are not retroactive.

Honor graduation will be granted for students in the College of Law upon successful completion of 56 hours in the college with a cumulative GPA of 3.400 or better based on University of Wyoming College of Law courses.

A Doctor of Pharmacy is awarded with honor by the university to a student who graduates with scholarship in pharmacy of unusual excellence as defined by the School of Pharmacy.

All Academic Disciplines

Phi Beta Kappa has been one of the most respected societies in the world for more than 200 years. Phi Beta Kappa was founded in 1776 at the College of William and Mary, Virginia. Within a decade, chapters arose at Yale, Harvard, and Dartmouth. The Wyoming chapter received its charter in 1940, and today fewer than 270 colleges and universities in the United States meet the strict qualifications for housing a chapter. UW faculty and administrators annually elect to membership fewer than one-tenth of the leading scholars of the senior class, candidates for the degrees of Bachelor of Arts and Bachelor of Science. In exceptional cases a junior may be elected. In addition to having a distinguished academic record, a student eligible for Phi Beta Kappa must pursue a balanced and broad course of study, which includes a foreign language as well as courses in math, the sciences, and the humanities. At least 90 hours of the student's course work must be in the liberal arts and sciences. Students are reviewed for eligibility and are notified by mail the spring of their election. Phi Beta Kappa promotes the ideal of a community of scholarship, and every year the Chapter sponsors an eminent visiting lecturer for the entire university.

The national honor society of Phi Kappa Phi, founded in 1897, recognizes and encourages superior scholarship in all curricula of the colleges and divisions of the university. No other honor society has higher academic standards for admission. Good character is also an essential supporting attribute for those scholars elected to membership. The University of Wyoming chapter of Phi Kappa Phi sets minimum cumulative grade point requirements at 3.500 for seniors, 3.800 for juniors and 3.900 for graduate students. In addition, there are minimum requirements in terms of hours completed at UW. Since the chapter may initiate no more than ten percent of the number of seniors in each college, the actual grade point cutoff is often higher than these minimums. In the spring of each year, students' records are reviewed and letters of invitation are sent to those eligible for election to the society. Supplementing the work of its chapter, the national society awards fellowships for graduate study. The UW Phi Kappa Phi chapter is administered by the Honors College.

College of Agriculture and Natural Resources

Agriculture majors - *Alpha Zeta* is a national honorary for students in agriculture who demonstrate academic excellence, character and leadership. Applications for membership are sent to eligible students. *Gamma Sigma Delta* is a national honor society open to students in agriculture. Potential members are invited to membership based upon academic excellence. *Phi Upsilon Omicron* is a national honor society in family and consumer sciences. Potential members are invited to membership based on academic excellence and leadership. *Pi Alpha Xi* is a national honorary horticulture society, open to UW students with a minor in horticulture. Students are invited to join based upon academic excellence and leadership.

College of Arts and Sciences

Art - A *Bachelor of Fine Arts* in art is considered honorary.

Biology and Botany - This Honors Program is for students majoring in biology or botany with strong interests in independent research with a focus in ecology, evolution, systematics, bioinformatics, biostatistics or data science. Application to the biology or botany honors program may be made after completion of the sophomore year with a cumulative grade point average of 3.300.

Chemistry - *American Chemical Society* - The Department of Chemistry is closely associated with the Local Wyoming Chapter of the American Chemical Society. The American Chemical Society (ACS) is one of the largest scientific societies in the world - its purpose is to promote chemistry and educate the public on the impacts of the chemical profession on the economy, technology, and education. The ACS organizes both national and regional scientific meetings; our local section supports student travel to these meetings. The chemistry department also sponsors a Student Affiliates section of the ACS, which is mentored by a UW chemistry faculty member and serves the needs of our chemistry majors.

Communication - *Lambda Pi Eta* recognizes, fosters, and rewards outstanding scholastic achievement while stimulating interest in the communication discipline.

Criminal Justice - *Alpha Phi Sigma - Epsilon Omega Chapter*, criminal justice honorary. A national honorary society for Criminal Justice that recognizes the academic excellence of Criminal Justice students. Alpha Phi Sigma is a collaboration with the Academy of Criminal Justice Sciences.

English - *English Honors Program* enables junior and senior English majors who carry a grade point average of 3.500 or better in their English courses to intensify and enhance their studies by working closely with a supervising faculty member to develop a senior honors project, a piece of writing on a topic in English studies. *Sigma Tau Delta - Alpha Mu Omicron Chapter*, international English honor society.

Gender and Women's Studies - *National Women's Studies Association*; one of its primary objectives promoting and supporting the production and dissemination of knowledge about women and gender through teaching, learning, research and service in academic and other settings.

Geography - *Gamma Theta Upsilon - Eta Eta Chapter* candidates must have completed three semesters of college coursework and three courses in Geography, with a grade point average of 3.000 or higher for these courses. Contact department Department of Geology and Geophysics/ Geography Program for more information.

Geology - Eligible students are Bachelor of Science degree holders with honors, majoring in geology or geophysics. They must meet an overall grade point average of 3.200, a grade point average of 3.200 in the major, and successful completion of an independent research project. Contact department Department of Geology and Geophysics/ Geography Program for more information.

History - *Phi Alpha Theta* is a professional society whose mission is to promote the study of history through the encouragement of research, good teaching, publication, and the exchange of learning and ideas among historians. It seeks to bring students and teachers together for intellectual and social exchanges, which promote and assist historical research and publication by our members in a variety of ways. The society currently has over 400,000 members, with some 9,000 new members joining each year through 970 chapters nationwide.

International Studies - *Sigma Iota Rho*: The purpose of Sigma Iota Rho is to promote and reward scholarship and service among students and practitioners of international studies, international affairs, and global studies and to foster integrity and creative performances in the conduct of world affairs. Membership provides public recognition of the best and the brightest students in the International Studies major and highlights the importance of contributing to the global community.

Journalism - *Society of Professional Journalists, Sigma Delta Chi*

Languages - The Department of Modern and Classical Languages sponsors chapters of two nationally recognized Honor Societies in Spanish.

Alpha of Wyoming Chapter of Sigma Delta Pi - To honor those who attain excellence in the study of the Spanish language and in the study of the literature and culture of the Spanish-speaking peoples; to honor those who have made the Hispanic contributions to modern culture better known in the English-speaking world; to encourage college and university students to acquire a greater interest in and a deeper understanding of Hispanic culture; to foster friendly relations and mutual respect between the nations of

Hispanic speech and those of English speech; to serve its membership in ways which will contribute to the attainment of the goals and ideals of the society.

Sigma Delta Pi National Spanish Honorary Society celebrates its 100th anniversary in 2019. Our very active UW chapter was recognized in 2011 as a national honor chapter. Each semester we initiate new members who meet high academic standards and are dedicated to the study and teaching of Spanish. Chapter awards and student scholarships include study abroad opportunities and recognition of outstanding scholarly research and writing.

Music - *Presser Award* is conferred by vote of the department faculty for outstanding senior in music. *Pi Kappa Lambda*, selected by faculty on the basis of outstanding scholarship and musical accomplishments.

Physics and Astronomy - *Sigma Pi Sigma*: Sigma Pi Sigma (sigmapisigma.org) exists to honor outstanding scholarship in physics, to encourage interest in physics among students at all levels, to promote an attitude of service, and to provide a fellowship of persons who have excelled in physics.

American Physical Society (APS): The American Physical Society (www.aps.org) is a non-profit membership organization working to advance and diffuse the knowledge of physics through its outstanding research journals, scientific meetings, and education, outreach, advocacy and international activities. APS represents over 50,000 members, including physicists in academia, national laboratories and industry in the United States and throughout the world. Society offices are located in College Park, MD (Headquarters), Ridge, NY, and Washington, DC.

American Astronomical Society (AAS): The American Astronomical Society (aas.org) is the major organization of professional astronomers in North America. The mission of the American Astronomical Society is to enhance and share humanity's scientific understanding of the universe.

Political Science - *Pi Sigma Alpha, Epsilon Beta Chapter* seeks "to stimulate scholarship and intelligent interest in political science." The society sponsors programs and events of value to the profession and teaching of political science. Membership provides public recognition of the best and brightest students in the Political Science major. Each chapter is encouraged to provide a framework for enriching the exposure of its members and the wider university community to the study of government and issues of public concern.

Pi Alpha Alpha, national public administration honorary. The purpose of Pi Alpha Alpha is to encourage and recognize outstanding scholarship and accomplishment in public affairs and administration. Its objectives, such as fostering integrity, professionalism, and effective performance, promote the advancement of quality in the education and practice of the art and science of public affairs and administration. PAA membership identifies those with the highest performance levels in educational programs preparing them for public service careers.

Psychology - *Psi Chi* - The Psychology Department supports a chapter of Psi Chi, the International Honor Society in Psychology. This local Psi Chi group functions within a larger Psychology Club that serves undergraduates interested in Psychology. The chapter and club are jointly involved in many activities, including community service projects, peer advising and graduation festivities.

Sociology - *Alpha Kappa Delta*, the international honorary society for sociology. In addition, sociology majors with a 3.2 overall GPA, a 3.500 GPA in sociology courses and two 5000-level sociology classes graduate with honors in sociology.

College of Business

Accounting - *Beta Alpha Psi, Delta Alpha Chapter*, is the UW chapter of the national accounting honorary. Membership in this very active student honorary is awarded only to the very best accounting students.

Business Administration - *Beta Gamma Sigma* is the national scholastic honor society. It is the arm of the accrediting group, AACSB International. Membership is very selective and based on class rank and grade point average.

College of Education

Kappa Delta Pi - Alpha Mu Chapter is the university chapter of the international honor society in education. The purpose of the society is to promote excellence in and recognize outstanding contributions to education. Invitation for membership is extended to those persons who exhibit commendable professional qualities, worthy educational ideals and sound scholarship.

Mu Nu Tau Chapter of Chi Sigma Iota is a Counseling Academic and Professional Honor Society International for counselors-in-training, counselor educators, and professional counselors. The mission of Chi Sigma Iota is to promote scholarship, research, professionalism, leadership, and excellence in counseling, and to recognize high attainment in the pursuit of academic and clinical excellence in the field of counseling. The CSI International homepage can be found at www.csi-net.org/index.cfm. The local chapter, Mu Nu Tau, encourages the furtherance of high standards of scholarship and professional practice through study groups, speaker programs, workshops, colloquia awards, social activities, and networking opportunities.

College of Engineering and Applied Science

Engineering majors - Tau Beta Pi is a national honor society for all engineering majors. The purposes of the society are to honor outstanding student scholarship and to provide a spirit of liberal culture in the College of Engineering and Applied Science. Membership is offered to outstanding junior, senior and graduate engineering students of high scholastic ability and exemplary character.

College of Health Sciences

Kinesiology - Phi Epsilon Kappa is a national professional fraternity dedicated to enhancing education, promotion of student research, community outreach, and professional development for persons pursuing careers in health, physical education, recreation, and other related fields.

Nursing - Sigma Theta Tau - academic leadership honorary. The mission of the Honor Society of Nursing, Sigma Theta Tau International is advancing world health and celebrating nursing excellence in scholarship, leadership, and service.

Pharmacy - Rho Chi Society, Academic Honorary. The Rho Chi Society encourages and recognizes excellence in intellectual achievement and advocates critical inquiry in all aspects of pharmacy. The Society further encourages high standards of conduct and character and fosters fellowship among its members; Phi Lambda Sigma, Pharmacy Leadership Society - to support pharmacy leadership commitment by recognizing leaders and fostering leadership development.

Social Work - Phi Alpha. The purpose of the Epsilon Delta Chapter of the Phi Alpha Social Work National Honor Society at the University of Wyoming Division of Social Work is to provide a closer bond among students of social work and promote humanitarian goals and ideals. Phi Alpha fosters high standards of education for social workers and invites into membership those who have attained excellence in scholarship and achievement in social work. The goals of Phi Alpha include the provision of service to the campus, local, and state communities in Wyoming; the promotion of social, economic and environmental justice on campus and in the community; and the development of student leadership skills.

University Honors College

The UW Honors College provides recognition and awards for select students, faculty and administrators via *The National Collegiate Honors Council* and *The Western Regional Honors Council* in the areas of academic achievement, civic responsibility, and personal development. The Honors College also administers the University of Wyoming chapter of *Phi Kappa Phi*. In the spring of each year, students' records are reviewed and letters of invitation are sent to those eligible for election to the honor society. Supplementing the work of its chapter, the national honor society awards fellowships for graduate study.

College of Law

Law majors - *Order of the Coif* is an honorary society which recognizes legal scholastic excellence. Each year, the chapter may initiate into membership those students who graduate in the highest ten percent of their class.

Other University Services

- Distance Credit Programs

University Store

Misty Eaton, Manager

Wyoming Union, 1-800-370-2676, (307) 766-3264,

TTY: (307) 766-3267

Web site: www.uwyostore.com; www.facebook.com/uwyostore

The University Store is a self-supporting university department founded in 1921. It provides students, faculty, staff, and campus visitors with a variety of products and services. In order to fulfill its primary mission, the store stocks new and used textbooks, textbook rentals, e-textbooks, general books, school supplies, office products, educationally priced computer software, fine art supplies and electronics. The University Store is an authorized Lenovo distributor and an Apple Authorized campus store offering a full line of Apple products and accessories. As a convenience, the store also stocks additional items such as gifts, insignia gifts and clothing, greeting cards, candy and sundries. Services the store provides include prepaid textbook reservations, bookbinding, special order book service, cap and gown rental, used book buyback, and postage stamps, as well as UPS, FAX and Federal Express.

The University Store is located on the main level of the Wyoming Union. Hours of operation during the academic year are: 7:30 a.m. to 5:00 p.m., Monday through Friday; TBA Saturday.

Music

J.Scott Turpen, Department Head

2049 Buchanan Center for the Performing Arts, (307) 766-5242

Web site: www.uwyo.edu/music

The Department of Music offers many opportunities for students to participate in musical activities, as well as, to hear concerts by faculty artists, student ensembles and visiting artists. All qualified students within the university, no matter their major, are invited to participate for credit in any of the following: Marching Band, Symphonic Band, Wind Ensemble, Symphony Orchestra, Chamber Orchestra, Collegiate Chorale, Jazz Ensemble, Bel Canto, Singing Statesmen, Civic Chorus, and the many smaller ensembles such as string ensembles, brass ensembles, percussion ensemble, and various chamber groups. Note: some ensembles are by audition only. Private lessons on any instrument and voice are available at a fee to all interested students.

Summer offerings may include lessons, workshops, seminars, and regular courses. A summer music camp for students in grades 7 through 12 is also offered which includes band, choral, orchestral and keyboard experiences culminating in gala concerts. For further information, please write to the Department of Music, Dept. 3037, 1000 E. University Ave., Laramie, WY 82071 or musicdpt@uwyo.edu.

Theatre and Dance

Leigh Selting, Department Head

2099 Buchanan Center for the Performing Arts, (307) 766-5100

Theatre and Dance at the University of Wyoming offers students an excellent opportunity to participate in all aspects of theatre and dance arts. Auditions for productions are open to all qualified students within the university regardless of major or college. The production program provides opportunities for students to participate in technical theatre stage crews, set construction, costuming, lighting and sound. There are also opportunities to perform dance, drama, musicals and operas. Playwriting, screen writing, directing and choreography are available through upper-division courses. The BCPA contains a proscenium theatre, an experimental theatre, a thrust theatre, an acting for the camera studio and two dance studios, plus full support facilities for scene

and costume construction. Full-time university students may purchase tickets through the Fine Arts Ticket Office at a greatly reduced price.

University Police Department

Mike Samp, Chief of Police
1426 E.Flint, (307) 766-5179
Web site: www.uwyo.edu/UWPD

The University Police Department is responsible for crime prevention, public safety, and law enforcement in the UW community. The department is staffed by 15 certified peace officers, five security guards, and eight full-time staff members. All officers are fully trained and have arrest authority. The department operates 24 hours per day, 365 days a year. To keep members of the UW community aware of police activity on campus, the department maintains a chronological log of all incidents reported to the department. This log is open for public inspection through the UWPD web site. University crime reports are also included annually in the United States Department of Justice publication, *Crime in the United States*. Crime statistics, as well as other public safety information, are included in the Annual Security/Clery Report, which is available online. Department personnel present public safety programs upon request to any group or organization. Further information is available through the UWPD World Wide Web site.

Bicycle Regulations The University of Wyoming Bicycle Program was developed to promote an environment in which bicycles, pedestrians, and motor vehicles can safely co-exist. Persons riding bicycles are asked to familiarize themselves with the regulations and bike paths described in the pamphlet *Safe Cycling at UW*, which is available on the University Police Department web site. All bicycles must be registered.

University of Wyoming Alumni Association

Keener Fry, Executive Director
222 South 22nd Street, (307) 766-4166
Web site: www.uwyo.edu/alumni

The University of Wyoming Alumni Association has served the university and alumni since the association was first organized in 1895. Our purpose is to provide the pathways to share the legacy, spirit and pride of UW worldwide. The primary role of the UWAA is to connect and reconnect alumni to the institution and each other through effective communication and meaningful engagement. The Alumni Association creates partnerships that advance UW and enrich the lives of students and alumni worldwide.

The Alumni Association currently serves over 131,000 former students of the University of Wyoming. Daily operations include high performing programs which include the admitted student writing project, employer engagement through full time job opportunities and internships, Cowboy 2 Cowboy Informational interviews, chapter and network gatherings, campus partnerships and donor cultivation and stewardship. The scholarship program services Wyoming and out-of-state high school seniors, undergraduate and graduate students, non-traditional students, Wyoming community college transfer students, US Veterans, and multicultural and Native American students with a commitment of over \$187,000 annually.

The UWAA sponsors the UW Homecoming Parade and senior send-off.

The Alumni Association is located in the Alumni Center at the Marian H. Rochelle Gateway Center.

Cowboy Parents

Division of Student Affairs
408 Old Main, (307) 766-5123
Web Site: www.uwyo.edu/cowboyparents

Cowboy Parents is an organization that provides parents and families with their own University of Wyoming connection serving as a conduit for information and assistance. Cowboy Parents offers opportunities for families to get involved with the goal of promoting student success while also providing the institution with a unique perspective from parents and families. Cowboy Parents provides email updates, frequent and timely publications, volunteer opportunities, and much more.

University of Wyoming Extension

Kelly K.Crane, Associate Dean, Director
103 Agriculture Building, (307) 766-5124

The 1914 Smith-Lever Act created the University of Wyoming Extension, stating that its purpose was to "provide instruction and practical demonstrations in agriculture, home economics and related subjects." The University of Wyoming Extension is part of a national educational network which establishes partnerships with the United States Department of Agriculture, the state of Wyoming, the University of Wyoming, and county and tribal governments. UW Extension maintains offices in 27 Wyoming communities.

The mission of the University of Wyoming Extension is to provide lifelong learning opportunities for the people of Wyoming and empower them to make choices that enhance their quality of life. To accomplish its mission, the UW Extension continually updates its programs to meet the changing priorities, organizational structures and external relationships of Wyoming and its citizens. It is a dynamic organization pledged to providing educational programs which enable Wyoming citizens to improve their lives and communities through partnerships that put experience and research knowledge to work. The UW Extension delivers university research-based knowledge to Wyoming consumers through the broad program areas of Ag and Hort, 4-H Youth Development, Nutrition and Food Safety, Rangeland, and Community Development Education. Programs include a wide range of topic areas, including food and nutrition, water quality, wildlife, crop production, resource management, and energy related issues.

UW Extension can be accessed on campus through its administrative offices in the College of Agriculture and Natural Resources. In the state, UW Extension offices are found in each county and serve as resources to the county, while also representing a major connection between the university and the people of Wyoming.

Office of Distance Education

Web site: www.uwyo.edu/distance

For over a century UW has embraced the land grant mission by sending its faculty across the state to meet with citizens, students, teachers, business owners, ranchers, and farmers to help them learn. Currently and in partnership with the university's colleges and departments, UW extends the university learning experience to students across the state, region and nation by offering over 40 academic programs at the certificate, endorsement, bachelor, master, and doctorate award level. Career credentials are also available, mostly concentrated for K-12 educators. The programs feature two different delivery methods both requiring high speed Internet connectivity. Web conferencing courses are "real time" interactive courses that meet regularly throughout the semester. Courses can be delivered to your mobile devices or computers if you have a webcam and a microphone. Fully online courses are available anywhere and at any time. These courses are delivered via WyoCourses and may also use additional online communication and collaborative tools.

The Libraries

Ivan Gaetz, Dean

William Robertson Coe Library, (307) 766-3279

The University Libraries include the William Robertson Coe Library, the Emmett Chisum Special Collection; the Library Annex, located in the basement of the Biological Science Building, housing government publications and older journals; the Brinkerhoff Earth Resources Information Center, located in the S.H. Knight Geology Building; the Learning Resource Center, located in the Education Building; the Rocky Mountain Herbarium Research Collection, located in the Aven Nelson Building; and the National Park Service Research Center collection in Jackson, Wyoming. UW-Casper is served by the Casper College Goodstein Foundation Library.

The libraries' cataloged collections total over 1.6 million volumes, with over 33,000 volumes added annually. 14,000 active periodical and serial titles are supplemented with access to over 90,000 unique electronic journals and over 800,000 ebooks. In addition, the libraries provide extensive microforms collections and a library of over 175,000 maps, and serve as a depository for United States government publications.

Through participation in the Wyoming Libraries Database (WYLD), Colorado Alliance of Research Libraries ("Alliance"), the Greater Western Library Alliance (GWLA), Hathi Trust, OCLC, the National Network of Libraries of Medicine, on-line information retrieval systems, and the interlibrary loan network, access is provided to other library resources from throughout the nation and the world.

The College of Law maintains a separate Law Library.

Centennial Complex

Designed by internationally prominent architect Antoine Predock to represent both an "archival mountain" and a town at the foot of the mountain, this dramatic building contains the collections of the American Heritage Center and the UW Art Museum. It is located at 2111 Willett Drive, just north of the Arena Auditorium and War Memorial Stadium.

American Heritage Center

Paul Flesher, Director

(307) 766-4114

Web site: <http://ahc.uwyo.edu>

The American Heritage Center (AHC) is the university's repository of manuscripts collections, its rare books library, and its official archives. The Center is one of the largest and most consulted non-governmental repositories in the United States. In 2010 it was recognized as one of the most distinguished archives in the nation when it received the Society of American Archivists' Distinguished Service Award.

The Center places service to UW undergraduates, graduate students, and faculty as its highest priority. However, because the AHC's collections are known worldwide, UW undergraduates using the Center's holdings might be working alongside scholars from Japan or Nigeria or the producers of PBS's *American Experience*.

The AHC's collections are of interest to far more than history majors. Each year Center archivists work with students in more than two dozen disciplines at UW: Art, African-American Studies, Agricultural Education, American Indian Studies, American Studies, Anthropology, Botany, Business Administration, Civil Engineering, Creative Writing, Energy Law, Geography and Recreation, History, International Studies, Lab School, English, Music, Nursing, Pharmacy, Political Science, Religious Studies, Secondary Education, Sociology, University Studies, Women's Studies, Zoology. The AHC also works with a dozen public school classes annually.

- Like most major university repositories, the AHC collects both regionally and nationally in select areas. Major subject concentrations of the 75,000 cubic foot manuscript collections include Wyoming and the American West, the mining and petroleum industries, Western politics and leadership, conservation, journalism, transportation, and 20th century entertainment such as popular music, radio, television, and film.
- The Toppin Library is the University's rare book center. More than 50,000 items range from medieval illuminated manuscripts to the 21st century. Subject strengths include the American West, British and American literature, early exploration of North America, religion, hunting and fishing, natural history, women authors, and the book arts. Unlike most rare book libraries, it is an active teaching site and welcomes both undergraduates and the public.

The AHC website has earned several national awards. Our digital collections contain 100,000+ photos and historical documents: <http://digitalcollections.uwyo.edu>.

The faculty archivists of the AHC are state, regional, national, and international leaders in their fields, speaking and publishing on historical, archival, and library topics. Several teach national workshops. The Center's reference archivists are leaders in their profession in undergraduate outreach and instruction. Students and faculty are encouraged to visit and make use of the collections

- no appointments are necessary. The American Heritage Center hours are: Reading Room (M, 10am-7pm; Tu-F, 8am-5pm) / Toppan Library (M-F, 8:30am-5pm) / Building (M-F, 8am-5pm).

American Heritage Center Faculty:

SARA C. DAVIS, B.A. University of Wyoming 2005; 2012; M.S.L.S. Simmons College 2016; Associate Archivist 2018.

RACHEL GATTERMEYER, B.A. The Ohio State University 2013; M.L.I.S. University of Illinois Urbana-Champaign 2015; Assistant Archivist 2018.

GINNY KILANDER, B.A. Indiana University 1992; M.A. University of Wyoming 1998; Archivist 2017, 1999.

MOLLY MARCUSSE, B.A. University of Michigan 2010; M.L.S. University of Maryland 2013; Assistant Archivist 2015.

LESLIE C. WAGGENER, B.A. University of Texas, Austin 1995; M.L.I.S. 2000; Archivist 2018, 2000.

D. CLAUDIA THOMPSON, B.A. Metropolitan State College, Denver 1977; M.A. University of Denver 1978; Archivist 2016, 1995.

JOHN WAGGENER, B.A. University of Wyoming 1994; M.A. 2001; Archivist 2018, 2000.

Art Museum

Marianne Eileen Wardle, Director

(307) 766-6622

Web site: <http://www.uwyo.edu/artmuseum>

Located on the eastside of campus in the award-winning Centennial Complex, the Art Museum was established to "bring the world of art to Wyoming." As an academic museum and a leader in the arts, the Art Museum collects, preserves, exhibits and interprets art to inspire creativity and nurture lifelong learning for the people of Wyoming.

The Art Museum's permanent collection comprises over 8,000 objects, including European and American paintings, prints, sculpture and drawings, special collections of 18th and 19th century Japanese Ukiyo-e prints, 15th through 19th century Persian and Indian miniature paintings, 20th century Haitian art, 20th century Japanese netsuke, 20th century and contemporary photography, and Rapa Nui, Papua New Guinea, African, and Native American artifacts. Exhibitions are curated from the permanent collection, contemporary art by regional, national and international artists, and art from the American West to support the academic mission of the University of Wyoming, provide original resource material for students of all ages, and enhance the cultural life of Wyoming's citizens and visitors. The Art Museum provides extensive education programs for all ages, including preschool through 12th grade, university community and life-long learners. Museum experiences can be scheduled for all ages and are based on the model of observe, question, explore, create, and reflect. These experiences are active learning and often involved time in the galleries and studios planned and facilitated by a trained educator or curator. Each visit is tailored to group needs and can be tied to curriculum goals or group outcomes as needed.

The museum's statewide outreach programs include the Ann Simpson Artmobile and the Regional Touring Exhibition Service, which provide art-filled and creative opportunities to Wyoming people in even the most remote communities and underserved situations. The Artmobile brings original art and programming delivered by a professionally trained museum educator to schools, community centers, libraries, art spaces and adult-living centers. For a small one-way shipping fee, the Regional Touring Exhibition Service circulates exhibitions of original art from the permanent collection to venues across the state. Curriculum guides and interpretive materials are included.

The Art Museum is free to all and is open Tuesday through Saturday, 10:00 a.m.-5:00 p.m. Hours are extended to include Thursdays until 7 pm during the academic year. Additional information on the Art Museum is available on its webpage,

www.uwyo.edu/artmuseum; Facebook (University of Wyoming Art Museum), Instagram (#uwartmuseum) and YouTube (uwartmuseum).

Art Museum Faculty

KATIE CHRISTENSEN, B.F.A. University of Wyoming 2003; M.F.A. Bowling Green State University 2011; Curator of Education and Statewide Engagement/Assistant Lecturer 2015.

RAEHEL COOK, B.A. University of Northern Colorado 2010; M.F.A. Kansas State University 2014; Curator of Academic Engagement/Assistant Lecturer 2018.

NICOLE CRAWFORD, B.A. University of Nebraska 1997; M.A. 2005; Chief Curator/Associate Lecturer 2017, 2009.

SARITA TALUSANI KELLER, B.F.A. University of Houston 1997; M.Ed. 2002; Ph.D. University of North Texas 2014; Artmobile Educator/Assistant Lecturer 2018.

MARIANNE EILEEN WARDLE, B.A. Utah State University 1992; M.A. Brigham Young University 1997; Ph.D. Duke University 2010; Director 2018.

Anthropology Museum

The museum offers exhibits related to the four subfields of anthropology: archaeology, biological, linguistic, and cultural. The main gallery follows the "Human Odyssey," from the evolution of humans in Africa several million years ago to the spread of our species throughout the world, and on to the Late Pleistocene entry into the Americas. The Colby Mammoth Site, the Vore buffalo jump and other Wyoming archaeology sites are featured, with much of the museum devoted to a celebration of the rich Native American heritage of the Plains and Rocky Mountains. Other displays featuring archaeological research and world cultural diversity can be found in hallway displays throughout the building.

The Anthropology Museum is open 8 a.m. to 5 p.m. Monday through Friday during the academic year. During the summer, hours are from 7:30 a.m. to 4:30 p.m. Monday through Friday.

Division of Information Technology

Robert Aylward, Vice President for Information Technology

IT Center, Room 372, (307) 766-4860

Web site: www.uwyo.edu/InfoTech

The Division of Information Technology provides students, faculty and staff with technology infrastructure and support services—computing systems, networking, technical support for systems and applications, computer support, academic and classroom technology support, training, telecommunications services, and research computing support including high performance computing. Use of these University computing and data facilities is governed by UW Regulation 3-690, Ethical Use of Computers and Data Communications Facilities.

The office of the Vice President of the Division of Information Technology is located in room 372 of the Information Technology Center and is open during normal business hours. Those in need of assistance are encouraged to call the Client Support Help Desk at 766- 4357, option 1.

IT Service Center: provides technology support during normal business hours. The fastest way to contact the UWIT Service Center is to browse our Service Catalog and Knowledge Base at uwit.uwyo.edu. Our Knowledge Base contains self-help documents and videos, as well as information on IT services we provide to our campus community. Other options to contact the

help desk are to email userhelp@uwyo.edu or call 307-766-HELP (4357), option 1. You can also chat with the Service Center at support.uwyo.edu. IT Service Center hours are posted at www.uwyo.edu/InfoTech/services/helpdesk/.

IT Walk-In Service Center and Resnet: provides help to students, faculty, and staff with personal computers and mobile devices. The Walk-In Service Center is located in the ITC building room 160 and is typically open Monday - Friday, 9am - 4pm with reduced hours during breaks and the summer months. The Walk-In Service Center is closed during all University holidays.

One of the primary goals of the Service Center while helping with personal computing devices is to teach customers. Therefore, Information Technology does not allow devices to be dropped off to be repaired. IT requests its customers to take an active role and remain with their device while any repair work is underway. The IT Walk-In Service Center also provides one-on-one consulting if help is needed in purchasing a new personal computer or mobile device. More information on the Walk-In Service Center can be found at www.uwyo.edu/resnet.

Telecom Services: provides a range of telecommunications services including phone and data connections, long distance and voice mail. Contact Information Technology's Telecom Help Desk by calling 766-HELP (4357), option 2, or email teledesk@uwyo.edu to request these services.

Internet and Network Access: an extensive campus-wide data network provides connectivity to the Internet in all occupied campus buildings, computer labs across campus, and university housing. Wireless Ethernet (Wi-Fi) is available in most campus locations. Students, faculty, and staff should connect to the UWyo wireless network, since it is a faster, more secure connection than UWguest. More information can be found at www.uwyo.edu/askit or call the IT Help Desk at 766-HELP (4357), option 1.

Computer Labs: are located throughout campus for students, faculty, and staff use. The computer labs contain computers with a wide variety of software and computing equipment. Some labs are staffed by student lab assistants who are able to answer questions. Computer labs in Coe Library and the Information Technology Center are open and staffed 24 hours during the normal academic year. The UWStudent Remote Lab System is a collection of lab machines that are designed to be accessed from off campus networks. The remote lab is configured similar to the UWStudent labs found on campus.

More information, including a link to the UW Student Remote Lab System, a complete listing of labs, lab schedules, and software policies, is available online at microlab.uwyo.edu. For questions and assistance, please e-mail userhelp@uwyo.edu or call the Help Desk at 766-HELP (4357), option 1.

Classroom Technology Support (CTS): provides support and maintenance for audio visual and other technology used in classrooms and technology spaces across campus. For immediate assistance when teaching in a general pool classroom, pick up the phone; the phone will automatically connect to the UW IT Help Desk at the top of the queue. If the issue cannot be resolved over the phone, someone will arrive promptly to provide assistance. If you are in a room other than a general pool classroom, call the help desk at 766-4357 or press the help icon on the lectern touch panel. Please let them know if you require immediate help or if you do not want your class interrupted. Workshops for classroom technologies are available by request. Call 766-2872 for more information. Please go to www.uwyo.edu/centralscheduling/classroom-building/training.html for further details. Lecture capture technology (Wyocast) is available in several classrooms on campus. For more information on this popular technology please visit <http://www.uwyo.edu/infotech/services/multimedia/wyocast/>.

Data Center Operations (DC Ops): manages and operates the 6,000 ft² University Data Center, located in the Information Technology Center. The Data Center provides a state of the art, highly redundant infrastructure space for university IT equipment. University departments may apply for co-location space in the Data Center to house production computing equipment. For more information on co-location, contact Data Center Operations at operate-it@uwyo.edu.

Computer Maintenance: provides repair and general hardware support for PCs, laser printers, and other equipment as well as manufacturer warranty repair support for most Apple, HP, Dell, and Lenovo products. Computer repair requests may be submitted by filling out the web form at uwyo.teamdynamix.com/TDClient/Requests/ServiceCatalog?CategoryID=3285 or by contacting the Help Desk at 766-HELP (4357), option 1.

Software Sales: provides Adobe, Microsoft and statistical software to eligible faculty, staff, and students. For more information on available software and licensing information, please visit uwyo.teamdynamix.com/TDClient/Requests/ServiceCatalog?CategoryID=3091.

Geological Museum

Hours: Mon.-Sat. (10:00am-4:00pm), closed holidays

(307) 766-2646

E-mail: geolmus@uwyo.edu

Web site: www.uwyo.edu/geomuseum

The Geological Museum, in the east wing of the S.H. Knight Geology Building, exhibits the story of ancient Wyoming. Highlight exhibits include: a fully mounted skeleton of the well-known dinosaur *Apatosaurus (Brontosaurus)*; a mounted skeletal cast of the world-renowned "Big Al" the *Allosaurus*; a 50-million-year-old garfish from Wyoming's Green River Formation (one of the largest complete freshwater fossil fish on display in the world); casts of skulls of Wyoming's state dinosaur, *Triceratops*; and its contemporary, *Tyrannosaurus rex*; mounted skeletons of Miocene rhinos and camels; an interactive augmented reality sandbox, our fossil prep-lab, and a fluorescent mineral room, featuring specimens from Wyoming and the world. The museum maintains important display collections (particularly vertebrate and invertebrate fossils) that are available for study by students, as well as scientists from other institutions. The museum provides unique opportunities for undergraduate and graduate students to pursue research and display projects in Wyoming paleontology, and for students minoring in museum studies to gain valuable experience with natural history museums and collections.

William D. Ruckelshaus Institute of Environment and Natural Resources

Position currently vacant, Director

Bim Kendall House

804 E. Fremont St.

Laramie, Wyoming 82072

Phone: (307) 766-5080, Fax: (307) 766-5099

Email: ruckelshaus@uwyo.edu

Web site: www.uwyo.edu/haub/ruckelshaus-institute

The William D. Ruckelshaus Institute supports effective environment and natural resource decision making through compelling communication, applied research, and collaborative decision-making approaches. The Ruckelshaus Institute is housed within the Haub School of Environment and Natural Resources at the University of Wyoming, whose mission is to advance understanding and resolution of complex environmental and natural resource challenges.

Science Communication and Outreach: The Ruckelshaus Institute makes research available to stakeholders through accessible publications and by convening conferences on critical natural resource issues. The institute's annual magazine, *Western Confluence*, communicates university research on natural resource questions to a range of environmental and natural resource stakeholders. The institute also shares stories of new research findings relevant to environment and natural resource decision-making through a range of media formats including reports, press releases, films, social media, and more to engage the public on complex natural resource issues.

Applied Research: The Ruckelshaus Institute conducts surveys, spatial data analysis, information synthesis, and other methods to address questions related to such topic areas as private land conservation, wildlife management, energy development, and others.

Collaborative Solutions: The Ruckelshaus Institute supports sound, inclusive approaches to environmental conflict resolution by facilitating and convening collaborative processes, offering trainings in collaborative decision making for natural resource professionals, and teaching courses in negotiation theory and practice for UW students. The Collaboration Program in Natural Resources is a yearlong professional development series to train natural resource professionals in negotiation, facilitation, and collaborative processes.

Wyoming Geographic Information Science Center

Jeff Hamerlinck, Director

Agriculture C, Room 337 (307) 766-2532

E-mail: wygisc@uwyo.edu

Web site: www.uwyo.edu/wygisc

The Wyoming Geographic Information Science Center (WyGISC) has a mission to advance the understanding and application of geographic information science through basic and applied research, education and training, information and technology transfer, and by promoting utilization of geospatial technologies for science, management, and decision making within the University and throughout the state and region. Examples of geospatial technologies include geographic information systems, geographic cartography and visualization, Global Positioning System-based mapping, and image processing of remotely-sensed Earth resource data derived from aircraft or satellites. Broad applications areas exist in both environmental and social sciences, as well as agriculture, engineering and business.

Established in 2001, WyGISC operates under the Office of Academic Affairs and in close coordination with the Office of Research and Economic Development, providing assistance to all units on campus and to numerous private, local, state, and federal entities in Wyoming and the Rocky Mountain region. Services include research collaboration, technical expertise, geospatial technology short course training, and geospatial data dissemination.

GIST Curriculum:

Beginning in fall 2019, WyGISC began offering undergraduate and graduate courses and credentials in geospatial information science and technology under the GIST prefix. Credentials include undergraduate certificates in GIS and Remote Sensing, a Professional Master's Degree (online with no thesis), a Research Master's Degree (with thesis), and graduate certificates in GIS, Remote Sensing, and Unmanned Aerial Systems (UAS). These courses and credentials provide fundamental education in geographic information systems and remote sensing to students from across disciplines at UW.

WyGISC encourages undergraduate and graduate student participation in its research projects and has sponsored students from the McNair Scholars Program and other student research apprentice programs, as well as graduate students affiliated with participating departments and research centers. Part-time employment and internship opportunities are often available. Inquiries may be directed to the center using the contact information provided above.

Statistical Consulting Center

Ken Gerow, Director

337 Ross Hall, (307) 766-6600

The Statistical Consulting Center, a unit of the Department of Statistics, exists to coordinate the statistical knowledge and skills available within the department with the subject-matter expertise of other scientists throughout the university, and to bring that combination to bear on applied research problems in diverse areas. The center can provide assistance in research design, sampling, data collection, and/or data analysis for the full range of research needs. The initial consultation is free. Thereafter, a variety of mechanisms are available to acknowledge the contributions of statistical consulting to a given research project, including co-authorship on a scholarly publication, membership on a thesis or dissertation committee, direct compensation to the consultant at private consulting rates, subcontracting with the center on a grant project, etc. On occasion, the center can also offer paid employment and internships to graduate students who have appropriate training and skills to assist other researchers. For further information about any of the services available through the Statistical Consulting Center, please contact the center via the contact information above.

Wyoming Survey & Analysis Center

Tiffany Comer Cook, Interim Executive Director

UW Office Annex, Second Floor

Dept. 3925; 1000 E. University Ave.

Laramie, Wyoming 82071

Phone: (307) 766-2189, Fax: (307)766-2759

Email: wysac@uwyo.edu

Web site: www.uwyo.edu/wysac

The Wyoming Survey & Analysis Center at the University of Wyoming seeks to provide clear, accurate, and useful information to decision-makers through applied social science research, scientific polling, information technology services, and rigorous program evaluation. Without bias and with the highest standards of validity, WYSAC collects, manages, analyzes, and reports data for public and private sectors in Wyoming and throughout the nation.

WYSAC has four research areas. By Executive Order, WYSAC serves as Wyoming's statistical analysis center for criminal justice research. The Center for Criminal Justice Research (CJR) at WYSAC collects and analyzes criminal justice data to enable effective planning, practice, and policy development for the State of Wyoming. The CJR is also active nationally as a member of the Justice Research and Statistics Association.

The Center for Information Technology Services specializes in web-based applications, database management, and website development. We create case management programs, desktop applications for data management, prevention and evaluation data entry systems, and interactive online data visualizations.

The Center for Research and Evaluation conducts studies to inform programming, funding, and policy decisions, especially in the areas of public health, substance abuse prevention, and education. We collect qualitative and quantitative data, compile administrative records, conduct statistical analyses, interpret findings, write reports and fact sheets, conduct needs assessments, create evaluation plans and logic models, and write grant applications.

The Survey Research Center (SRC) specializes in survey design, administration, sampling, and data analysis. The SRC conducts phone, mail, internet, and mixed-mode surveys using current technologies and WYSAC's in-house call center. The SRC has expertise in weighting survey data, conducting statistical analysis of the collected data, and creating technical reports and PowerPoint presentations of the results.

WYSAC offers paid employment for students who are looking for experience in social science research. Contact us for additional information, or search for current job openings on UW's website.

UW National Park Service Research Center

(307) 766-4227

Web site: www.uwyo.edu/uwnps

The research center operates in a field station at the historic AMK Ranch in Grand Teton National Park, located 65 km north of Jackson, Wyoming. The field station provides scientists abundant research opportunities in the diverse terrestrial and aquatic environments of Grand Teton and Yellowstone National Parks as well as the surrounding National Forests and Wilderness areas that make up the entire Greater Yellowstone area (GYA). The station has housing for up to 60 researchers and provides terrestrial and aquatic laboratories, boats, field equipment, conference rooms, internet service and a library, all on site. A small grants program provides funding yearly for individual proposals up to \$5,000 as well as scholarship and intern funding for projects conducted in the GYA. Field courses and conference are accommodated in the spring and fall seasons. A weekly seminar series with a barbecue dinner is presented throughout the summer.

Inquiries concerning the UW-NPS Research Center program should be addressed to: Director, University of Wyoming-National Park Service Research Center, Dept. 3166, 1000 E. University Ave., Laramie, WY 82071 or emailed to uwnps@uwyo.edu.

Red Buttes Environmental Biology Laboratory

Within a few miles of Laramie, the Department of Zoology and Physiology operates the Red Buttes Environmental Biology Laboratory, a 9,600-square-foot facility equipped to handle both aquatic and terrestrial vertebrates. An aquatic ecology and toxicology laboratory, uniquely designed to accommodate a wide range of test conditions of water flow, temperature and composition, is available within the facility. Animal holding and surgical rooms are specifically constructed to accommodate experimentation on small (e.g. mice, squirrels), medium (e.g. coyote, badger) and large (e.g. elk, bighorn sheep) mammals. Outdoor corrals and fish runs are also available on the 400-acre site.

Inquiries concerning the Red Buttes Environmental Biology Laboratory should be addressed to the Department Head, Department of Zoology and Physiology, Dept. 3166, 1000 E. University Ave., Laramie, WY 82071, or (307) 766-3333.

Rocky Mountain Herbarium

Located in the Aven Nelson Building, the Rocky Mountain Herbarium and the associated U.S. Forest Service National Herbarium contain more than 1,250,000 plant specimens. The primary functions of the herbarium are to (1) serve as a source of information on the flora of the Rocky Mountain region in general and Wyoming in particular; (2) aid in the identification of plants submitted by ranchers, farmers, county agents, and state and federal agencies throughout the region; and (3) serve as a source of research and teaching material in systematic and ecological botany. Thousands of specimens are loaned each year to recognized institutions throughout the United States where research requires a knowledge of western plants. The web site (www.rmh.uwyo.edu) contains data on more than 700,000 specimens as well as thousands of specimen images and interactive distribution maps.

Open to university students and other qualified researchers, the herbarium invites queries regarding the identification of plants. Those persons wishing assistance in the identification of a plant should send two specimens to the herbarium. Inquiries should be addressed to The Curator, Rocky Mountain Herbarium, Department of Botany, Dept. 3165, 1000 E. University Ave., Laramie, WY 82071.

University of Wyoming Museum of Vertebrates

(307) 766-6227 & (307) 766-6169

Email: ewommack@uwyo.edu & mcaring@uwyo.edu

Web site: www.uwymv.org

The mission of the University of Wyoming Museum of Vertebrates (UWYMV) is to document and understand regional and global biodiversity through acquisition and investigation of collections to advance academic knowledge and public appreciation of the natural world. While its holdings primarily contain vertebrates found in the Rocky Mountain Region, the museum also houses specimens from all across the world. Although the UWYMV has no formal exhibits and is not regularly open to the public, its collections are widely used by researchers, educators, and for outreach activities.

To learn more about the UWYMV, including how to access our collections or schedule a tour, please visit www.uwymv.org.

Collections Location: The UWYMV collections can be found on the ground floor of the Berry Biodiversity Conservation Center, rooms 133 and 119.

Wilhelm G. Solheim Mycological Herbarium

The Wilhelm G. Solheim Mycological Herbarium, housed on the third floor of the Aven Nelson Building, facilitates the study of symbiotic and biotrophic fungi. The herbarium contains approximately 50,000 specimens of fungi from around the world and the largest collection of fungi in the Rocky Mountain Region. These collections are available for study by qualified students and researchers. Specimens may be borrowed by institutions without charge for a one-year period. Inquiries should be addressed to The Curator, Solheim Mycological Herbarium, Department of Botany, Dept. 3165, 1000 E. University Ave., Laramie, WY 82071.

Louis O. and Terua P. Williams Conservatory

Hours: Monday-Friday 10:00am-2:00pm, closed holidays

(307) 766-4336

Web site: www.uwyo.edu/conservatory

Email: conservatory@uwyo.edu

The Williams Conservatory is a year-round multipurpose facility that has promoted botanical research, education, and outreach since 1994. Located in the Aven Nelson building at the University of Wyoming, our greenhouse is home to over 600 tropical, neotropical, temperate, and arid species from around the world. Conservatory facilities are used by researchers, educators, students in both K-12 and post-secondary levels, artists, horticulture enthusiasts, and the general public. Walk-ins are welcome, or contact us in advance to schedule a guided tour.

Wyoming Cooperative Fish & Wildlife Research Unit

(307) 766-5415

Web site: www.coopunits.org/Wyoming

Email: wyo-coop@uwyo.edu

The Wyoming Cooperative Fish and Wildlife Research Unit is supported by the University of Wyoming, the Wyoming Game and Fish Department, the U.S. Geological Survey and the Wildlife Management Institute. The three permanent unit leaders serve as full faculty in the Department of Zoology and Physiology.

The Unit conducts research on many types of fish and wildlife issues. A primary emphasis is on evaluating the ecology and management of fish and wildlife in the northern Rocky Mountain region. Much of the Wyoming Game and Fish Department's field research is conducted through the Unit. Both students hired as technicians as well as graduate assistants are involved in Unit research. Additional details of the Unit's research program can be found at www.wyocoopunit.org.

For further information contact the Wyoming Cooperative Research Unit, Dept. 3166, 1000 E. University Ave., Laramie, WY 82071, or wyo-coop@uwyo.edu.

Wyoming State Veterinary Laboratory

1174 Snowy Range Road, (307) 766-9925

E-mail: vetrec@uwyo.edu

Web site: wyovet.uwyo.edu

Located west of campus and operated by the Department of Veterinary Sciences, the Wyoming State Veterinary Laboratory (WSVL) is responsible for diagnosis and reporting of animal diseases. Areas of expertise include morphological and clinical pathology, bacteriology, virology, toxicology, parasitology, electron microscopy, molecular diagnostics, and serology.

Cooperative diagnostic and research activities are conducted with various state and federal agencies. The WSVL building also houses a UW classroom, laboratories for the Wyoming Game and Fish Department, and Wyoming Department of Agriculture Analytical Services Laboratory. Students are encouraged to conduct domestic and wildlife disease research in an interdisciplinary setting.

For further information contact WSVL, 1174 Snowy Range Road, Laramie, WY 82070.

Western Interstate Commission for Higher Education (WICHE)

The Western Interstate Commission for Higher Education (WICHE) was created in 1953 by the governors and legislators of the western states. The primary commitment is to provide access to educational programs through interstate cooperation. Wyoming provides opportunities for qualified residents in the following programs:

Professional Student Exchange Program (PSEP) offers certified Wyoming residents access to professional education in the fields of dentistry, medicine, occupational therapy, optometry, osteopathic medicine, physical therapy, physician assistant, podiatry, and veterinary medicine. To be eligible for certification, the applicant or a spouse must be a legal resident of the State of Wyoming for one year immediately prior to enrolling in professional school. Applications for certification are available by June 1 at www.uwyo.edu/certwy and are due no later than October 15 of the year preceding the anticipated start date of professional school. Applicants who are accepted to a professional program and who receive state support pay reduced tuition. In all fields except veterinary medicine, students receiving state support must either pay back the money expended on their behalf, or practice in their fields in the state of Wyoming for three years. State support is dependent on continued appropriations from the Wyoming State Legislature. The University of Wyoming School of Pharmacy welcomes applicants from residents of Alaska, Nevada and the CMNI through the PSEP program. Students accepted through PSEP may be eligible for tuition support from their home state or territory.

Western Regional Graduate Program (WRGP) provides opportunities for qualified Wyoming residents to attend distinctive or health-related graduate programs in participating WICHE states and territories. Those accepted pay resident or significantly reduced tuition at the school they attend. Graduate students from WICHE states or territories interested in the Haub School of Environment and Natural Resources, Doctorate of Nurse Practice and Graduate Social Work may be eligible for reduced tuition via the WRGP program.

Information about WICHE PSEP or WRGP programs may be obtained from the WICHE Certifying Office; Dept. 3432, 1000 E. University Ave, Laramie, WY 82071; (307)766-3499 or certoff@uwyo.edu or from WICHE, 3035 Center Green Drive, Suite 200; Boulder, CO 80301-2204, (303) 541-0214.

Western Undergraduate Exchange (WUE) allows residents of participating states and territories to attend a participating institution at reduced cost of 150% of the institution's resident tuition. Not all programs in the participating states offer WUE opportunities.

The University of Wyoming invites competitive graduating high school senior from all WUE states and territories to apply for the WUE tuition discount. All undergraduate UW majors are eligible for WUE support. Information is available from the UW Admissions Office.

Scholarships and Financial Aid

- Eligibility Requirements
- Enrollment Requirements
- Satisfactory Academic Progress (SAP)
- Financial Aid Federal Return of Funds Policy
- Funds Distribution
- Veterans Educational Benefits
- National Guard Benefit

The Office of Scholarships and Financial Aid (OSFA) coordinates all student financial assistance available at UW. Available aid includes scholarships, grants (Hathaway Scholarships, Federal Pell, Federal SEOG), loans (Federal Direct, Federal PLUS and private) and employment (Federal Work-Study).

OSFA will help all qualified applicants to secure aid, but resources are limited. Aid is offered first to those applicants whose materials are completed and received by December 1 prior to the academic year for which aid is sought. Federal Pell Grants and Federal Direct Loans are available to qualified applicants throughout the year.

Unless another deadline is specified, prospective students seeking scholarships should send an application for admission, the nonrefundable application fee and a copy of their current high school or college transcript to the UW Admissions Office by March 1. Students who have attended another college must have that college submit an academic transcript to the UW Admissions Office.

Students seeking federal aid or assistance based on their financial need must file a Free Application for Federal Student Aid (FAFSA). Applicants may do so at studentaid.gov. Allow one week for processing. UW recommends using IRS Data Retrieval when completing the FAFSA. Final responsibility for ensuring that all required documents are received in a timely manner rests with the applicant. The FAFSA will be available October 1 for completion.

Eligibility Requirements

To receive federal financial aid (such as Federal Pell, and Federal SEOG grants, Federal Work Study, Federal Direct [subsidized or unsubsidized], and Federal Direct PLUS loans) you must meet the following conditions and provide supporting documentation when requested to do so: have a high school diploma or its equivalent, be enrolled or accepted for admission as a regular student at UW, not be concurrently enrolled in an elementary or a secondary school, be enrolled in a degree program, be a U.S. citizen or eligible non-citizen, have a demonstrated financial need if required, be prepared to prove attendance, maintain satisfactory academic progress (SAP), not be in default on a federal student loan or owe an overpayment of a federal grant at any institution (or, if so, have made satisfactory arrangements to repay or otherwise resolve the overpayment or default), not have borrowed in excess of the annual or aggregate loan limits of a federal loan program (loan borrowers only), agree to use funds received only for educational costs, register with the Selective Service if required, and not have had federal financial aid benefits suspended as result of a drug conviction.

Enrollment Requirements

Students must attend classes to be eligible for federal financial aid or be prepared to pay all the money back. Most scholarships require the recipient to be enrolled full time. Hathaway Scholarships, Federal Pell Grants, and veteran's benefits may be pro-rated for part-time enrollment and Federal Direct Loans may only be borrowed by students enrolled for at least half time (a minimum of 6 hours for undergraduate and pharmacy students; a minimum of 4.5 hours for graduate and law students). Federal Pell Grants and Federal SEOG Grants are available to undergraduate students who have not completed the requirements for their first

undergraduate degree. Classes for audit are not acceptable for any kind of financial aid. Generally, Federal aid is not available for continuous registration hours, or for audit hours. For details, contact the Office of Scholarships and Financial Aid.

Satisfactory Academic Progress (SAP)

The University of Wyoming Office of Scholarships and Financial Aid is responsible for ensuring that all students receiving federal financial aid meet minimum standards. The University of Wyoming standard of Satisfactory Academic Progress (SAP) measures all students' academic performance.

Satisfactory Academic Progress is reviewed at the end of each payment period (fall, spring, summer) and the following three areas are measured:

1. Qualitative -- UW cumulative grade point average (Cum GPA) earned
2. Quantitative (Pace) -- completion rate for coursework enrolled
3. Timeframe -- maximum time frame to complete a degree

Minimum Standard Requirements

Qualitative Standard

A student must successfully meet the following minimum UW cumulative GPA for their program:

- Undergraduate programs - 2.0
- Professional programs - 2.0
- Graduate programs - 3.0

Quantitative Standard (Pace)

A student must successfully complete 67% of the cumulative hours attempted.

$$\text{Pace} = \frac{\text{Cumulative \# of credit hours successfully completed}}{\text{Cumulative \# of credit hours attempted}}$$

The following courses do count as attempted and completed in the SAP calculation.

- Successfully completed courses with grades of A, B, C, D, or S
- Transfer hours accepted by the Registrar
- Academic Renewal hours earned through previous enrollment
- Advanced Placement Credit
- Incomplete grades that are now completed
- Experiential Learning Credits
- Summer Session credits successfully completed
- Credits earned through Study Abroad and Consortium agreements

The following courses do count as attempted and not completed in the SAP calculation:

- Failed
- Withdrawn
- Incomplete
- Repeat
- Unsatisfactory

The following courses do not count as attempted or completed in the SAP calculation:

- Correspondence
- Audit
- Credit by exam
- Remedial
- Enrichment

Timeframe Standard

A student must be making progress toward a degree. The University of Wyoming sets the following maximum timeframe for student degrees:

- Undergraduate- 180 hours (150% of 120 hours)
- Master's Program- 45 hours (150% of 30 hours)
- Doctorate Program- 108 hours (150% of 72 hours)
- Law- 135 hours (150% of 90 hours)
- Pharmacy- 213 hours (150% of 146 hours)

Transfer hours accepted toward completion of the student's program are used in the calculation of the Timeframe Standard.

When pursuing multiple degrees or changing majors the maximum time frame may be adjusted based on a student generated appeal that includes a degree audit.

SAP Statuses

Financial Aid Warning

Students who have not met the minimum standard requirements for the previous semester will be placed on a Warning status. Students on Warning status are eligible for financial aid for one additional payment period. Students who do not meet Minimum Standard Requirements at the end of their Warning semester will be placed on Suspension for the next term. Note: Students who receive all failing grades in a semester are immediately placed on financial aid suspension. Students who fail the timeline standard will also be placed on immediate suspension.

Financial Aid Suspension

Students who have not met the minimum standard requirements (after being placed on Warning) are placed on Suspension. Students who are on Suspension are not eligible for financial aid unless a SAP appeal with academic plan is approved by the SAP Committee. Submitting an appeal does not guarantee approval. Students awaiting a decision on their SAP appeal are responsible for paying their tuition and fees by the payment deadline. Students having met the maximum timeframe are not eligible for a "Warning" period.

Financial Aid Probation

Students who have successfully appealed a financial aid suspension are placed on probation and are eligible to receive federal aid for one more payment period. After Probation, the student must be making SAP or successfully following their academic plan. Students are reviewed each term for compliance with their Academic Plan and SAP Standards.

Reinstatement

If a student loses federal financial aid eligibility due to not meeting SAP standards, they can regain eligibility in one of the following ways:

1. Completing courses using their own resources that will satisfy the deficient SAP area.

2. Successfully appealing by submitting a SAP Appeal Form with supporting documentation.

SAP Appeal Process

Students who have been suspended can appeal their status by submitting the SAP Appeal Form (one semester or multi semesters) and a formal written request with supporting documentation to the financial aid office no later than the conclusion of the "Drop/Add" period for the current semester. The appropriate appeal form is available to the student once they have met with a SAP counselor. The SAP Appeal Form must include the following:

- an explanation with supporting documentation of any extenuating circumstances that prevented the student from maintaining satisfactory academic progress,
- an explanation of what has changed that will allow the student to succeed academically,
- an academic advisor signature, and
- a degree audit for those students who have reached their maximum timeframe.

All appeals are reviewed by a Financial Aid SAP committee. The review time for appeals may take a minimum of 2 weeks. Students will be notified of the results by email and/or mail. If the appeal is denied, students may request an additional review by the Director of Scholarships and Financial Aid. Students must submit new information with supporting documentation for a secondary review. The Director's decision is final.

Financial Aid Federal Return of Funds Policy

A student who receives federal financial aid (other than Federal Work Study pay checks) and chooses to complete less than 60% of an academic term is considered not to have earned all the federal aid he or she has been awarded.

- If aid already disbursed is equal to earned aid, no further action is required.
- If aid already disbursed is less than earned aid, additional aid may be offered to the student after he or she withdraws.
- If aid already disbursed is greater than earned aid, UW and/or the student must return some federal funds.

To determine whether federal funds have been earned or must be returned, UW follows this procedure:

1. Determine the percentage of the term the student completed. This is calculated by dividing the number of calendar days (including weekends) in a term into the number of calendar days that the student was in attendance for that term.
2. Apply the percentage of time attended to the total amount of federal aid the student was eligible to receive for the term. This is the student's "earned aid."
3. Subtract the amount of earned aid from the amount of aid actually disbursed to the student. A positive remainder is the student's "unearned aid." A negative remainder is the student's "earned aid" that may still be offered to the student.
4. Determine the amount of unearned aid remaining that must be repaid by the student. Subtract the amount of unearned aid repaid by the institution from the total amount of unearned aid.

All unearned aid will be returned to the federal student loan lender or federal aid accounts in the following order: (1) Unsubsidized Federal Direct Loan; (2) Subsidized Federal Direct Loan; (3) Federal PLUS (Parent) Loan; (4) Federal Pell Grant; (5) Federal SEOG Grant. Any amount owed by the student on a grant will be reduced by 50%.

The date of a student's withdrawal from UW will be the date of the student's notification to the Dean of Students Office of an intent to withdraw if the student has no federal aid. For students who have received federal aid, the withdrawal date will be the last date of an academically related activity as reported by their instructors. When a student fails to officially withdraw from UW and has all F's at the end of the semester, the withdrawal date will be the latest date of an academically related activity as reported by their instructors.

UW will repay the lesser of (1) the total amount of unearned aid or (2) an amount equal to the student's institutional charges multiplied by the percentage of unearned aid. "Institutional charges" is defined as charges for tuition and fees, plus room and board charges for students living in UW residence halls and apartments. It does not include such charges as bookstore charges, student health insurance premiums, parking citations, or library fines.

The amount of unearned aid owed by the student on a loan may be repaid under the normal repayment terms of the loan. The amount of unearned aid owed by the student on a grant must be repaid immediately.

Any amount of earned aid not yet disbursed to the student will be offered to the student. Such offers will cover any undisbursed grants first, followed by the undisbursed loans.

Examples of how the amount of unearned federal aid a student must return is calculated are available from a professional adviser in the OSFA. A chart detailing the percentage of earned and unearned aid, by calendar day of the semester, is provided in the term's class schedule. In brief, to determine the percentage of earned federal aid, the calculation will use the total number of calendar days in the term divided by the total number of calendar days the student attended.

Funds Distribution

Each student who registers has his or her own student account with the university. Once a qualified student has registered for classes and accepted their awards on WyoRecords, the OSFA will authorize the electronic transfer of funds from UW financial aid accounts to the student's individual account at the university.

First-time borrowers of federal student loans must participate in entrance loan counseling (view a web presentation). All student loan borrowers must participate in an exit loan interview (on the web) prior to leaving UW.

Federal Work-Study funds are paid as payroll checks or direct deposit on the 15th and last working day of the month. Payroll checks may be direct deposited or mailed to the student.

The university will automatically charge a student's account for tuition and fees based on the student's enrollment. Likewise, if the student is living in a university residence hall, room and board charges will be placed on the student's account.

Any financial aid credited to a student's account will automatically pay tuition and fees first and then charges for room and board in UW residence halls. Unless directed otherwise in writing by the student, any remainder will be applied to other university charges. If a negative balance results, a credit balance will be prepared by the university and will be refunded to the student through the University's electronic refunding process.

Scholarships awarded for the academic year will be split into two equal payments to the recipient's student account with one to be paid at the beginning of each semester. Most non-UW scholarships are paid in the fall semester unless the donor or selection committee specifically directs that it be paid differently.

Students enrolled in a domestic or international exchange program or a study abroad program approved by UW for academic credit are eligible to apply for federal student financial assistance. Likewise, students concurrently enrolled in classes at two or more eligible institutions of post-secondary education may apply for federal aid. A special consortium agreement between institutions must be completed prior to each semester a concurrently enrolled student seeks aid. Those granted a Federal Work-Study allocation have opportunities to perform community services to earn their allocation.

Information describing available aid, award criteria, rights and responsibilities of aid recipients, costs of attendance or refund and repayment policies and schedules is available by writing to Office of Scholarships and Financial Aid, Dept. 3335, 1000 E. University Ave., Laramie, WY 82071, or viewing the financial aid web site at www.uwyo.edu/SFA/.

Important: Students are assumed to be full-time when their initial financial aid is determined. If you plan to attend less than full-time in any semester, your financial aid will be adjusted to reflect your true tuition costs. It is always best to make the OSFA aware of your intended enrollment prior to the start of a semester so that accurate amounts of financial aid may be applied to your account.

Financial aid policies are subject to change without notice to reflect modifications in federal, state and institutional laws and regulations.

Veterans Educational Benefits

Students who have served in the armed forces may be allowed credit for courses taken in some military schools. Students who desire to apply for credit on the basis of the military schools should submit a copy of the DD-214 Form or its equivalent to the Office of the Registrar. Individual colleges will determine whether such courses will be applicable to degree programs.

All veterans seeking educational benefits must register with the veterans' certification specialist in the Office of Scholarships and Financial Aid, 174 Knight Hall, (307) 766-2525. This includes completing a veteran's registration card each semester. Those veterans not completing a veteran's registration card by the last day of the late registration period will be dropped from VA educational assistance at the university. Class load requirements for veterans are as follows:

Undergraduate and Pharm.D. Veterans:

Full-time	12 or more credit hours
3/4 time	at least 9, but fewer than 12 hours
1/2 time	at least 6, but fewer than 9 hours
Less than 1/2	registration credit hour fee reimbursement only

Graduate and Law Veterans:

Full-time	9 or more graduate credit hours or certification by the Office of the Registrar*
3/4 time	at least 7 but fewer than 9 graduate credit hours or certification by the Office of the Registrar*
1/2 time	at least 4.5, but fewer than 7 graduate credit hours
Less than 1/2	registration credit hour fee reimbursement only

*The final responsibility for seeing that the veterans' certification specialist has a certification from the Office of the Registrar rests with the student. It must be received by the last day of scheduled registration.

If any portion of a veteran's schedule is composed of courses which are less than the full semester in length (i.e., short courses, workshops, "blocked" courses, etc.), the rate of benefit payment may be affected. If you have any questions or concerns, contact the veteran's certifying official in the OSFA, 174 Knight Hall, (307) 766-2525.

Withdrawal from a class or classes could reduce a veteran's benefits for that term. For details, contact the veteran's certifying official in the OSFA.

National Guard Benefit

Active Wyoming National Guard members in good standing and considered to be satisfactory participants may apply to participate in the Guard's Education Assistance Plan. The Plan provides 100 percent tuition and mandatory fee payment for all courses (except repeated courses) leading to one degree at UW, as long as the recipient continues to meet academic and service

commitment requirements. Recipients must agree to serve in the Guard for at least two years after earning their degrees. This benefit may be used concurrently with Veterans Educational GI Bill ® Benefits. For information and application packets, please contact the Wyoming National Guard at 800-832-1959, ext. 5262.

Tuition and Fees

- Semester Tuition and Fee Schedule 2021-22 (subject to change)
- Student Benefit Package and Insurance
- Tuition and Fee Payment 2021-22
- Special Course Registration Fees
- Tuition Waivers
- Financial Holds
- Summer Session 2022
- Refunds/Cancellations
- Interaction of Federal Return of Funds Policy and Institutional Refund Policy
- Student WyoOne ID Cards

Semester Tuition and Fee Schedule 2021-22 (Subject to Change)

The University of Wyoming semester tuition and fee schedules for the 2021-22 academic year, which begins with fall semester 2021, will be available in the Fee Book at <http://www.uwyo.edu/administration/financial-affairs/feebook/> or from Student Financial Services, room 172, Knight Hall. Fall charges will post to accounts in WyoRecords by the end of July and spring charges will start posting by the end of November.

Summer school tuition and fees will be published in the *Summer Bulletin*.

Full-time undergraduate refers to undergraduate students enrolled for 12 or more hours, and part-time undergraduate refers to undergraduate students enrolled for less than 12 hours. At the graduate level, nine or more hours is considered full-time and less than nine hours is classified as part-time.

Student Benefit Package and Insurance

At the beginning of each semester, the part-time student benefit package will be added to student accounts of all part-time students who have elected to purchase UW health insurance and have not been charged the mandatory student services fee. The benefit package allows part-time students the same benefits as full-time students including, but not limited to, the use of Student Health Service, Half Acre Gym and the opportunity to apply for short-term emergency student loans.

Graduate students taking less than 4.5 credit hours should contact their academic department and also refer to the "Graduate Student Optional Fee Package Petition" document, which may be found on the Office of the Registrar website.

Students not assessed insurance who would like to purchase the benefit package, not for full-time status purposes, can fill out a form in Student Financial Services, 172 Knight Hall, and then pay for the package at the Cashier's Office, 170 Knight Hall, or online via the student financial portal.

Student medical insurance is mandatory for international students. International students are automatically enrolled in the medical insurance every fall and spring semester that they enroll in classes. Students may potentially waive this requirement if they meet university regulations and provide the necessary documentation by the add/drop deadline.

Each domestic enrolling student will be required, as part of the registration process, to make a student medical insurance selection. If the eligible student selects "YES" to the question, the premium will be assessed on the student's account. If the

student selects "NO," they will not be assessed for the premium. Part-time students who select yes for the health insurance will also be assessed for the Part-time Student Benefit Package.

Domestic students are eligible for insurance if they are enrolled in at least 6 hours for undergraduate or 4.5 hours for graduate students. Students are not eligible for student health insurance if online or remote only.

For questions regarding the Student Medical Insurance program, contact the Student Medical Insurance Advocate (248 Knight Hall) at (307) 766-3025.

Tuition and Fee Payment 2021-22

All university charges are due by September 1 (fall), February 1 (spring), and June 1 (summer).

An institutional payment plan is available for students who need extra time paying.

A non-refundable \$50.00 payment plan enrollment fee is charged per semester to all students that are not paid in full by the the payment dates above. The payment plan adds three monthly installments in addition to the first due date above. These are due on the 1st of three subsequent months. Registration holds and interest of 1.5% per month may be charged on all past due amounts.

Special Course Registration Fees

Additional charges (special course, college, advising, and program fees) must be paid by students enrolling in those courses and colleges with approved special fees. Fees for these courses and colleges will be indicated in the Fee Book. Program fees, assessed to all courses under 5000 level, are by the college in which the course is held and may be different than a student's primary program.

Tuition Waivers

If an employee, spouse of an employee or cooperating agency waiver is used for payment of tuition and/or fees, the properly completed and signed waiver must be received by the Student Financial Services office by the first day of the term. All waivers will be applied to accounts after the drop deadline. To be eligible for the waiver, the student must be a benefited employee by the first day of class.

Financial Holds

A student failing to pay fees, charges, fines, penalties, deposits or short term loans as prescribed by the Trustees of the University of Wyoming shall be denied registration at the university and copies of academic transcripts and/or diplomas until such fees, charges, fines, penalties, deposits or short term loans are paid in full. A ten-day wait is required before a student loan hold can be removed if the debt is paid with a personal check. Contact Student Financial Services in Knight Hall for information regarding financial holds.

If a payment is made on a student account and the payment is returned to the University as a result of insufficient funds or otherwise, the student will have a hold on their account until the return payment fee in addition to the original amount is a paid. Registered classes secured by a returned payment are subject to cancellation.

Summer Session 2022

Please refer to the 2022 Summer Course Schedule applicable deadlines. Shorter classes have shorter refund periods.

Refunds/Cancellations

Tuition and course fees will be canceled or refunded to a student who officially drops a class or classes, withdraws from the university through the Dean of Students office, or changes enrollment status (i.e. non-resident to resident; full-time to part-time) in accordance with the institutional refund policy outlined below.

No tuition penalty will be assessed for dropping and adding during the drop period identified in the term's class schedule. Students who withdraw from individual courses after the end of the drop/add period will have their charges canceled in accordance with the institutional refund policy outlined below.

Mandatory fees, course fees, late registration fees, or service fees are not refundable after the drop period.

The portion of tuition refund/cancellation is computed from the first day of the term, not class meeting pattern. If a student's initial registration includes blocked classes or short courses that begin at a later date, the refund/cancellation will still be computed from the first day of the block/session. If a student's initial registration occurs during an approved late registration period, the date for computing a refund/cancellation will be the first day of the term.

Institutional Refund Schedule

Before first day of semester	100%
Semester Class Day 1-8	100%
Semester Class Day 9-15	75%
Semester Class Day 16-20	50%
Semester Class Day 21-25	25%
Semester Class Day 26 on	0%

Examples of these calculations are available in Student Financial Services.

Interaction of Federal Return of Funds Policy and Institutional Refund Policy

When a student who receives federal financial aid withdraws from the university, he or she may owe a repayment of federal funds and/ or be due a refund from UW or owe an additional amount to UW. For details on the application of these policies to a specific situation, please consult with Student Financial Services, 172 Knight Hall, (307) 766-6232.

Student WyoOne ID Cards

167 Information Technology Center, (307) 766-5268

ID cards are issued to all students during their first semester of enrollment. These cards are used throughout the student's entire career at the university.

The ID card, also referred to as the WyoOne card, is needed to pick up transcripts, financial aid, cash checks, access student health services, attend athletic events, enter recreation facilities, check out library books and materials, food service access, enter residence halls, and other necessities. Visit the online card office at www.uwyo.edu/idoffice/ to make deposits, view transaction history, and access other card management features.

The WyoOne card may also be used as a debit card to make purchases at some locations on campus after the deposit account is established. Spouses, domestic partners and dependents of students are eligible for an ID card.

University Accreditation/Membership

- University Accreditation/Membership

University Accreditation/Membership

The University of Wyoming, and all UW academic programs are accredited by The Higher Learning Commission, a commission of the North Central Association of Colleges and Schools Commission on Institutions of Higher Education, 230 South LaSalle Street, Suite 7-500, Chicago, IL 60604 or (800) 621-7440.

In addition, many individual academic programs are either approved, accredited or hold membership as indicated below.

Recognized or accredited by:

- ABET (formerly known as Accreditation Board for Engineering and Technology)
- Accreditation Association for Ambulatory Health Care, Inc.
- Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics
- Accreditation Council for Graduate Medical Education
- Accreditation Council for Pharmacy Education
- American Alliance of Museums
- American Association of Professional Landman
- American Association of Vet Lab Diagnosticians
- American Bar Association
- American Chemical Society
- American Dental Association
- American Psychological Association
- Association of American Law Schools
- Association to Advance Collegiate Schools of Business (AACSB)
- Council for Accreditation of Educator Preparation
- Commission on Collegiate Nursing Education
- Computer Science Accreditation Commission (a participating body of ABET)
- Council for Accreditation of Counseling and Related Educational Programs
- Council on Academic Accreditation in Audiology and Speech Language Pathology
- Council on Social Work Education
- International Association of Management Education
- National Association of Schools of Music
- National Association for Sport & Physical Education - Accreditation
- National Council for Accreditation of Teacher Education
- National Council on Family Relations
- Society for Range Management
- Specialized Professional Association-Licensure K12 Physical Education
- Wyoming Professional Teaching Standards Board

Holds membership in:

- American Association of Colleges of Teacher Education
- American Association of University Women
- American Council on Education

- American Society for Engineering Education
- Association for the Advancement of International Education
- Association of Academic Survey Research Organizations
- Association of American Colleges and Universities
- Council for the Advancement and Support of Education
- Council of Academic Deans from Research Education Institutions
- Council of Colleges of Arts and Sciences
- Council of Graduate Schools
- Justice Research and Statistics Association
- Greater Western Library Alliance
- Associate of Public and Land Grant Universities
- National Network for Educational Renewal
- University Professional and Continuing Education Association
- Western Association of Graduate Schools
- Western Cooperative for Educational Technology
- Western Interstate Commission for Higher Education

Assessment of Student Learning at the University of Wyoming

The University of Wyoming is committed to providing students with high quality academic programs and services. As a result, UW is actively engaged in several processes to assess student learning with the ultimate goal of continuous improvement. A university wide assessment plan and individual department plans are in various stages of implementation. The purpose of these plans is to identify and articulate student learning outcomes - the skills, abilities, and knowledge that students are expected to acquire by the completion of their programs - and the means by which these outcomes would be measured. Learning is assessed at the university, college and departmental levels. Current assessment activities include, but are not limited to, surveys, interviews, portfolios, exams and senior capstone projects. In order for UW's assessment efforts to be successful, students must become engaged in the process. As such, students are expected and/or required to complete various assessments as determined by the university or department prior to the awarding of degrees.

For more information regarding the student learning outcomes for a particular program of study, see the section on College and Division Programs. For further information about the University of Wyoming's assessment of student learning efforts, see the Assessment of Student Learning webpage at www.uwyo.edu/assessment.

The University Studies Program 2015

- Knowledge of Human Culture, the Physical & Natural World, and the U.S. & Wyoming Constitutions
- Intellectual and Practical Skills
- Personal & Social Responsibility

Students who enter the University of Wyoming or a Wyoming community college beginning in fall 2015 will be required to meet the USP 2015 requirements for graduation. Requirements of the USP are divided into categories based on the student learning outcomes. All courses are mutually exclusive of each other; no single course may count in more than one category. USP designated courses are open to all UW students (with a few exceptions for the Fall Bridge and Honors College).

Knowledge of Human Culture, the Physical & Natural World, and the U.S. & Wyoming Constitutions

Human Culture (H) Credits 6

Students will understand human behaviors, activities, ideas, and values in different situations and contexts. Complete six approved credit hours of coursework. **Approved coursework does not include courses taken within the student's major department.**

Physical and Natural World (PN) Credits 6

Students will understand the fundamental concepts of scientific and quantitative inquiry and develop the ability to understand the relevance of scientific, technological, and quantitative skills to contemporary society. Complete six approved credit hours of course work. **Approved coursework does not include courses taken from the student's major department.**

U.S. & Wyoming Constitutions (V) Credits 3

Students will demonstrate an understanding of the U.S. and Wyoming constitutions in order to develop the combination of knowledge, values, and motivation to participate in and improve the life of our local and global communities. Approved V courses fulfill both the U.S. and Wyoming Constitution requirements.

Intellectual and Practical Skills

Communication 1 (C1) Credits 3

Students will develop skills in written, oral, and digital communication as appropriate to specific disciplines and courses at the introductory, intermediate, and advanced level. Through repeated instruction, practice, and feedback, the communication sequence will emphasize and progressively develop transferable skills for students' academic work and future professions. The introductory course (C1) will emphasize foundational skills for academic writing. **Communication 1 must be completed with a C or better.**

Communication 2 (C2) Credits 3

Intermediate courses (C2) will emphasize foundational oral and digital communication skills and continue to build on writing skills. Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. **Communication 2 must be completed with a C or better.**

Communication 3 (C3) Credits 3

Advanced courses (C3) will emphasize using the discourse of a discipline or interdisciplinary field to communicate to academic or professional audiences through written, oral, and digital communication. Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the students' major department.

First-Year Seminar (FY) Credits 3

Students will critically examine and evaluate evidence, claims, beliefs, or points of view about meaningful, relevant issues. Students will be introduced to active learning, inquiry of pressing issues, and individual and collaborative processing of ideas through the First-Year Seminar curriculum. These skills will be reinforced throughout the baccalaureate experience. The First-Year Seminar will provide the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular FY class for a major. **First-Year Seminar must be completed with a C or better.**

Quantitative Reasoning (Q) Credits 3

Students will reason and solve quantitative problems from a wide array of authentic contexts and everyday life situations. All students must fulfill the Q requirement, either through successfully completing the Q course or with SAT Math 600+, ACT Math 26+, or a *proctored MPE* Level 4.

Personal & Social Responsibility

No mandatory USP courses. Students will have varied experiences depending on coursework and co-curricular activities chosen by them.

Wyoming Community colleges have defined a Common General Education Core Curriculum as a component of an associate's degree. Per transfer policy, an AA or AS or AB degree from a Wyoming community college will satisfy the lower-division requirements of the University Studies Program. Students transferring to UW from any Wyoming community college without an associate's degree will have their transcript reviewed on a course-by-course basis.

Students who enrolled at the University of Wyoming or a Wyoming community college prior to the fall of 2015 and who maintained continuous enrollment have the option of satisfying USP 2003 or USP 2015 requirements.

The following courses were approved for the University Studies Program 2015 at the time this catalog went to press. The process of course approval is ongoing. For a complete and updated list of approved courses, see the USP web site at <http://www.uwyo.edu/usp/>.

Colleges and Schools

University of Wyoming

College of Agriculture & Natural Resources

151 Agriculture Building

Barbara Rasco, Dean

Phone: (307)766-4135 Fax: (307)766-4030

Web site: www.uwyo.edu/uwag

The College of Agriculture and Natural Resources offers a wide variety of course work in agriculture, natural resources, molecular biology, and family and consumer sciences. The curriculum provides a sound background in basic sciences and the choice of a number of fields in which to specialize. Students are trained in principles which apply throughout the world, with special emphasis on agriculture and natural resources found in the Rocky Mountain region.

Laboratory work and other experiential learning opportunities are stressed in all programs. Students receive excellent training from case studies and practical experience provided at research and extension centers. Other facilities include modern laboratories and classrooms, an abattoir, meat processing rooms, livestock and crop farms and greenhouses.

In addition to the academic departments, the college includes the Agricultural Experiment Station and the UW Extension. Materials and techniques resulting from this effective triple combination benefit students in the never-ending search for problem-solving information. The close relationship between teachers, researchers, and extension educators creates a learning atmosphere that encourages the development of the finest students.

Programs of Study

Undergraduate Degrees

Bachelor of Science

- Agricultural business
- Agricultural communications
- Agroecology
- Animal and veterinary science
- Microbiology
- Molecular biology
- Rangeland ecology and watershed management

Bachelor of Science in Family and Consumer Sciences

Graduate Degrees

Master of Arts

Molecular biology

Master of Science

Agricultural and applied economics
 Agricultural economics/water resources
 Animal and veterinary sciences
 Entomology
 Entomology/water resources
 Family and consumer sciences
 Food science and human nutrition
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Rangeland ecology and watershed management/water resources
 Reproductive biology
 Soil science
 Soil science/water resources

Doctor of Philosophy

Animal and veterinary science

 Biomedical Sciences
 Entomology
 Molecular and cellular life sciences
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Reproductive biology
 Soil science

The following certificates and/or degrees in the College of Agriculture and Natural Resources are available through Distance Education:

Certificate: Early Childhood Program Director
 Online bachelor's degrees: Family and Consumer Sciences (Professional Child Development Option)

For more information, contact the College of Agriculture and Natural Resources Office of Academic and Student Programs.
 Phone: (307)-766-4135

The College of Agriculture and Natural Resources also offers a graduate certificate in reclamation and restoration ecology. For more information, contact the Department of Ecosystem Science and Management.

Basic Education Core

All undergraduates in the College of Agriculture and Natural Resources curriculums are required to follow the basic education core as noted below.

Core Components (USP 2015).....Hrs.

First-Year Seminar (FYS).....3
 Quantitative Reasoning (Q)3

Communication 1 (COM1).....	3
Communication 2 (COM2).....	3
Communication 3 (COM3).....	3
Human Culture (H)	6
Physical & Natural World (PN).....	6
U.S. and Wyoming Constitutions (V).....	3
Subtotal (min. core requirements)	30
Hours for major, support areas and electives as determined by division...	90-98

Total Hours 120-128

Core Components (USP 2003)

Core Components (USP 2003) Hrs.

Intellectual Community (I)	1-3
Writing 1 (WA)	3
Oral Communication (O).....	3
Quantitative Reasoning 1 (QA)*	3
Quantitative Reasoning 2 (QB).....	3
Science (S, SB, SP, SE).....	4-8
Cultural Context (C, CH, CS, CA).....	9
U.S. and Wyoming Constitutions (V).....	3
Physical Activity and Health (P).....	1
Subtotal (min. core requirements)	30-36
Hours for major, support areas and electives as determined by division....	79-91

Total Hours 120-128

*Core Components are mutually exclusive of each other; hence, two core components may not be fulfilled by the same course. Except for the QA, core courses may have topics from the embeddable components list included in their curriculum, where appropriate.

Courses taken for S/U

A maximum of 20 elective hours with a grade of S (satisfactory) may be included as part of the total credit requirements for graduation; but no S/U hours may be used to satisfy university, major requirements or required electives, unless the course is offered for S/U grading only.

Minors in Agriculture and Natural Resources

Minors provide a formalized recognition of concentrated study in a specific subject area. A minor offers recognition for academic achievement outside of the students' major course curriculum and gives students a focus of work in the chosen minor area. A minors program can enable students to enhance and expand career opportunities. A minor will also improve the possibility of admission to graduate programs in any chosen major, minor, or related field of study.

Minors Available in the College of Agriculture and Natural Resources Include:

Agricultural business
Agroecology
Animal and veterinary science
Apparel design
Equine
Farm and ranch management
Forest resources
General agricultural economics
Horticulture
Human development and family sciences
Human nutrition
Insect biology
Interior design
International agricultural economics
Molecular biology
Natural resource economics
Plant protection
Rangeland ecology and watershed management
Reclamation and restoration ecology
Soil science

Agricultural Communications Major

A wide variety of courses in agriculture, communications, and journalism provides students with basic preparation for positions as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio and television stations, and commercial businesses. Communication skills are also distinct assets in agricultural sales, research, service and teaching. Students enrolled in agricultural courses acquire up-to-date and knowledgeable backgrounds of the subject matter. Courses in communication and journalism develop proficiencies demanded by employers of communication professionals.

Minimum Requirements for Agricultural Communications Majors (B.S.)

Hrs.

University Studies Program requirements..... 30

Communications/journalism core..... 24

COJO 1000, 1040, 2010, 2100 and minimum of 12 hours of communication/journalism elective. (Minimum grade of C required)

Agriculture core requirements..... 42

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 24 hours must be upper division (Ag 3000-4000) elective courses and include AGRI 4975.

Supporting course requirement4

STAT 2050 or 2070

Additional hours for major and electives 20

Total Hrs: 120

Students wishing to pursue an agricultural communications degree are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work. Agricultural communications majors may also complete an internship in their field. A variety of opportunities are available and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Bachelor of Applied Science

160 Agriculture Building

Awarded by the College of Agriculture and Natural Resources

Phone: (307)766-4034 Fax: (307)766-4030; Web site: www.uwyo.edu/basa/

Organizations need leaders at all levels who can effectively understand the environment and society in which they operate; analyze situations and solve problems; supervise and manage, interact and communicate appropriately within and outside the organization; anticipate changes; and plan for the future. The Bachelor of Applied Science degree (B.A.S.) is designed for individuals with a completed Associate of Applied Science, Associate of Science, Associate of Business or an Associate of Arts degree at a Wyoming Community College (or an equivalent degree at another accredited institution) and who need or desire the additional breadth in skills, knowledge and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

The fundamental philosophy of the B.A.S. degree is that the student must complete the general education (University Studies Program - USP) requirements expected of all UW bachelor's degrees and must engage in upperdivision coursework sufficient to provide focus and depth of learning. Following this philosophy, the B.A.S. has four basic components. These components are university studies, career specialty, professional concentration, and electives. The fundamental elements of the baccalaureate degree are provided by the general education core (USP) and the upper division professional concentration. At the end of the program, students are expected to meet the following Student Learning Outcomes:

1. to develop proficiency in accessing, evaluating and utilizing information, ideas, and data;
2. to develop proficiency in communicating information and ideas effectively and responsibly;
3. to gain an appreciation for leadership development as a tool for individual, organization and community problem solving;
4. to demonstrate an understanding of organizational design, behavior, ethical practices, and effective managerial and supervisory practices;
5. to gain an understanding of social, cultural, economic and environmental contexts essential for effective leadership and the management of change.

The University Studies Program (USP 2015) consists of a minimum of 27 credit hours as adopted by the UW faculty, and the Articulation Agreement between UW and the Wyoming Community Colleges. Students with an Associate of Applied Science degree from a Wyoming community college will normally matriculate with 15-20 hours of credit that count toward this component. The remainder may be required as part of a UW student's coursework, including the Professional Concentration or Electives coursework.

The Career Specialty Component is fulfilled with the Associate of Applied Science, the Associate of Science, or Associate of Arts degrees. This component will consist of a minimum of 40 credit hours in the major.

The Professional Concentration Component is the advanced component of the program and the courses are selected by the student and the advisor. All students are required to take a range of courses from the prescribed set of areas of concentration within this component in order to provide them with the breadth and depth of learning necessary for a baccalaureate degree. This component will consist of 36-40 upper division or articulated equivalent credit hours. Note: Within the Professional Concentration, students have a choice between two Organizational Leadership areas. Option A focuses on Community Leadership; Option B focuses on Business Leadership.

The Elective Component will consist of the number of credit hours needed (after completing the other three components) to complete the degree components. A minimum of 120 hours is required for the B.A.S.

All University of Wyoming Students must earn a total of 42 upper division hours (at least 30 hours taken from UW), to earn their degree. Students in the B.A.S. program must earn a "C" in all courses on the B.A.S. checklist. Failure to do so will require repeating the course. Per university regulations, students may only attempt a course three times; an "F" or "W" count as attempts.

Application Process

All students must apply to the Bachelor of Applied Science program, including those who would like to change their major to the B.A.S. in Organizational Leadership. Students cannot just fill out a change of major form and have Admissions change their status. These are the steps for application:

1. Apply to the University of Wyoming through Admissions, declaring the Bachelor of Applied Science in Organizational Leadership.
2. Have official transcripts from all institutions attended sent to Admissions.
3. Email BAS@uwyo.edu when you have received your acceptance to UW. Include your W# in the message. We can then track your files to evaluate them for the BAS program.
4. Students will receive a letter telling the application decision. If a student is denied admission to the BAS, an explanation for the denial will be provided. If accepted, the student will be given information for how to work with the program advisor, Rosalind Grenfell (rgrenfel@uwyo.edu), to enroll in classes.

Department of Agricultural and Applied Economics

Department Head: Benjamin S. Rashford

Professors:

MATTHEW A. ANDERSEN, B.A. Colorado College 1991; M.S. Colorado School of Mines 2000; Ph.D. University of California, Davis 2005; Professor of Agricultural Economics 2013, 2007.

CHRISTOPHER T. BASTIAN, B.S. University of Wyoming 1987; M.S. 1990; Ph.D. Colorado State University 2004; Professor of Agricultural Economics 2017, 2005.

ROGER COUPAL, B.S. Utah State University 1978; M.S. University of Arizona 1985; Ph.D. Washington State University 1997; Professor of Agricultural Economics 2015, 1997.

DON MCLEOD, B.S. St. John's College 1982; M.S. Oregon State University 1987; Ph.D. 1994; Professor of Agricultural Economics 2015, 1995.

JOHN RITTEN, B.S. Arizona State University 2001; M.B.A. New Mexico State University 2004; Ph.D. Colorado State University 2008; Professor of Agricultural Economics 2020, 2008.

L. STEVEN SMUTKO, B.S. Colorado State University 1978; M.C.R.P. North Dakota State University 1982; Ph.D. Auburn 1995; Spicer Chair of Collaborative Practice, Professor of Agricultural Economics 2009.

Associate Professors:

MARIAH D. EHMKE, B.S. Kansas State University 1997; M.S. Ohio State University 2001; Ph.D. Purdue University 2005; Associate Professor of Agricultural Economics 2012, 2005.

KRISTIANA M. HANSEN, B.A. Reed College 1996; M.S. University of California, Davis 2003; Ph.D. 2008; Associate Professor of Agricultural Economics 2016, 2009.

CHIAN A. JONES-RITTEN, B.S. Northern Arizona University 2003; M.A. Colorado State University 2007; Ph.D. 2011; Associate Professor of Agricultural Economics 2013.

BENJAMIN S. RASHFORD, B.S. University of Wyoming 1999; M.S. 2001; Ph.D. Oregon State University 2006; Associate Professor of Agricultural Economics 2012, 2006.

Assistant Professor:

VARDGES HOVHANNISYAN, B.S. Armenian State University of Economics 1999; M.S. Armenian State Agrarian University 2002; Ph.D. University of Wisconsin-Madison 2012; Assistant Professor of Agricultural Economics 2015.

ANDERS VAN SANDT, B.A. Linfield University 2012; Ph.D. Colorado State University 2018; Assistant Professor of Agricultural Economics 2020.

Academic Professionals:

JEFFERSON G. EDGENS, B.A. Presbyterian College 1989; M.P.A. Coastal Management University of West Florida 1992; Ph.D. Michigan State University 1998; Senior Lecturer 2017.

COLE EHMKE, B.A. Bethany College 1997; M.S. University of Sydney, Australia 1999; Associate University Extension Educator 2011, 2005.

BRIDGER M. FEUZ, B.S. University of Wyoming 1994; M.S. 1996; Senior Extension Educator 2012, 2004.

THOMAS FOULKE, B.A. University of Montana 1985; M.S. University of Wyoming 1992; Senior Research Scientist 2010, 1998.

LETICIA HENDERSON, B.S. New Mexico State University 2010; M.S. 2012; Assistant Lecturer 2019.

JOHN HEWLETT, B.S. Montana State University 1985; M.S. Oregon State University 1987; Senior Extension Educator 1987.

BRIAN LEE, B.S. University of Wyoming 2010; M.S. 2012; Research Scientist 2012.

AMY NAGLER, B.A. University of Wyoming 1996; M.S. 2002; Assistant Research Scientist 2016.

DUANE D. WILLIAMS, B.S. Oklahoma State University 1981; M.S. 1983; Ph.D. Kansas State University 1995; Senior Academic Professional 2014.

Temporary Lecturer:

JIM THOMPSON, B.A. Occidental College; M.A., Ph.D. University of Illinois-Chicago.

Professors Emeritus:

Nicole Ballenger, Edward Bradley, Larry J. Held, James J. Jacobs, Dale Menkhaus, Carl Olson, Alan C. Schroeder, David T. Taylor, Glen D. Whipple

The Department of Agricultural and Applied Economics offers three concentrations within the agricultural business bachelor of science degree program. They are agribusiness management, farm and ranch management, and livestock business management. All three concentrations focus on the development of critical thinking, research, and communication skills for students interested in

1. agricultural operations,
2. small rural businesses,
3. community economics,
4. financial institutions,
5. agricultural and natural resources development, and
6. other pursuits where applied economic tools will be useful.

A brief description of minimum course requirements for each of the three concentrations in agricultural business is given below. In addition, professional advisers will work with students to tailor a curriculum to individual interests and goals.

Agribusiness Management Concentration

This curriculum is for students preparing for careers in the agribusiness field. Applied agricultural economics courses are supplemented with marketing, management, finance and other courses from the College of Business and production-oriented courses from other departments in the College of Agriculture and Natural Resources.

Minimum Course Requirements for Agricultural Business (B.S.) Majors within the Agribusiness Management Concentration¹

Hrs.

First-Year Seminar (FYS).....	3
Writing	9
ENGL 10102 (COM1), Communication II (COM2), AGEC 4965 or AGEC 4970 (COM3)	
Quantitative (Q) (required for major).....	7
MATH 1400; 2350	
Science (PN)	6
Human Culture (H)	6
U.S. & Wyoming Constitutions (V).....	3
Agricultural Economics	24
1010, 1020, 3400, 4050 or MKT 3210 (count for either upper-division AGEC or business credit, but not both), 4060, 4500; either 4450 or 4830 or 4840 or 4880; 3 hours of AGEC electives	
Supporting Agriculture	9
AG College hours other than Agricultural Economics	
Statistics	4
Computers	3
Supporting Economics.....	6
ECON 3010 and 3020	
Business	15
ACCT 2010 and 2020; and 9 hours of 3000-4000 level business courses	
Electives	25
Total Hours 120	

¹ A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

²Recommend or equivalent COM1 course.

³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

H requirement cannot be fulfilled with AGEC or ECON courses; USP-approved H language courses are recommended.

24 credit hours in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

COSC 1200 recommended, or IMGT 2400.

Farm and Ranch Management Concentration

This curriculum is for students intending to become operators or professional managers of farms, ranches or feedlots. It is also well suited for students interested in the field of agricultural finance, or a minor in biological fields such as agroecology or range management. In this concentration, courses in farm and ranch management, finance, and marketing are supplemented by courses in crops, range management, veterinary sciences and animal science, with electives in other areas.

Minimum Course Requirements for Agricultural Business (B.S.) Majors within the Farm and Ranch Management Concentration ¹

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW. ² Recommend or equivalent COM1 course. ³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits. H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended. 24 credits in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level. COSC 1200 recommended, or IMGT 2400.

Livestock Business Management Concentration

This curriculum is for students intending to work in any sector of the livestock and meat industry, ranging from input suppliers, to ranches, feedlots, meat packing companies, marketing and sales agents, futures/commodities exchange groups, policy makers, and international trade organizations. In this option, courses in farm and ranch management, agricultural finance, marketing, and trade are supplemented with courses in animal science, biology, range management, food science, data analysis, and other disciplines. Students may pursue a minor in Animal Science as part of this option, but can choose the non-minor version instead. Students will gain a broad understanding of both the business and science of the livestock industry.

Minimum Course Requirements for Agricultural Business (B.S.) Majors within the Livestock Business Management Concentration¹

Hrs.

Total Hrs. 120

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW. ² Must earn a "C" or better. ³PN and H may not be fulfilled by AGECE or ECON courses. 31 credits in Ag Econ beyond those earned to satisfy University Studies requirements; 21 of these 31 credit hours must be earned at the 3000-4000 level. AGECE 4840 may not be double-counted towards both Agricultural Economics and Quantitative Skills. Suggest COSC 1200 for most, or IMGT 2400 (for advanced users). Must earn a "C" or better in all courses required in the minor to earn the minor.

Environment and Natural Resources

Students interested in natural resource or environmental issues or careers may complete any of the four options within agricultural business offered by the department with an environment and natural resource emphasis. Inquiries about environment and natural resource concentrations in agricultural business should be directed to the Department of Agricultural and Applied Economics.

Minor Programs

The department also offers five minor programs. These five minors are to give students majoring in other undergraduate curricula in the university a concentration of work in any of the specialized undergraduate curricula offered by the department or in general agricultural economics. Each minor requires 27 hours in prescribed course work including 6 hours in supporting agriculture. Students need to plan their course work to meet course prerequisites.

Agricultural Business Minor. AGECE 1010, 1020, 4050 or MKT 3210, and 4060; ACCT 2010; 6 additional hours in upper-level agricultural economics courses; 6 hours in supporting agriculture courses.

Farm and Ranch Management Minor. AGECE 1010, 1020, 2020 and 4640; 9 additional hours in upper-level agricultural economics courses; 6 hours in supporting agriculture courses.

International Agriculture Minor. AGECE 1010, 1020, 3860 and 4880; 6 additional hours in upper-level agricultural economics courses; 3 hours in foreign culture or language; 6 hours in supporting agriculture courses.

Natural Resource Economics Minor. AGECE 1020, 3750, 4700, 4720; choose 9 additional hours from: AGECE 4450, 4600, 4710, ECON 2400, 4400, 4410, 4520 (note: College of Business prerequisites), ENR 4500.

General Agricultural Economics Minor. AGECE 1010, 1020 and 15 additional hours in agricultural economics courses with 12 hours at the upper-level; 6 hours in supporting agriculture courses.

Graduate Study

The Department of Agricultural and Applied Economics offers graduate work leading to the Master of Science degree. Students may choose among major options in the areas of agricultural and applied economics and agricultural business. The Plan A agricultural economics major emphasizes research with any of the following focus areas:

production economics and management, marketing and market analysis, resource and environmental economics, international agriculture, and economic and rural development.

The Plan B agricultural business option offers advanced skills to students who desire professional careers in the business sector. Students in the agricultural business option may concentrate their coursework and writing in management, marketing, or finance. Dual majors in water resources, and environment and natural resources are also offered.

Finally, the Department offers a graduate minor in applied economics. This program is for currently enrolled graduate students in other disciplines seeking a foundation in economics as well as their major discipline.

Program Specific Admission Requirements

Undergraduate major in agricultural economics or economics is not required.

Students may be required to complete program prerequisite courses, without graduate credit, that were not completed in their undergraduate education.

Specifically, students who have not completed at least one course in calculus, statistics, and intermediate microeconomic theory may be required to complete these courses without graduate credit during their first semester in residence.

Program Specific Degree Requirements

Master of Science in Agricultural Economics

The following courses constitute the M.S. in Agricultural Economics core requirements and are required of all Plan A candidates (22 hours).

Economic Theory

AGEC 5310 Theory of Producer Behavior...	3
AGEC 5630 Advanced Natural Resource Economics	3
AGEC 5710 Advanced Agricultural Market Theory	3
AGEC 5740 Theory of Consumer Behavior	3

Quantitative Methods

AGEC 5230 Intermediate Econometric Theory	3
AGEC 5320 Quantitative Methods in Agricultural Economics.....	3

Research

AGEC 5650 Communicating Research.....	3
---------------------------------------	---

AGEC 5880 Advanced Seminar.....1

Plan A (thesis):

Minimum of 30 credit hours including AGECE M.S. core requirements, thesis hours and electives. No more than three hours of AGECE coursework numbered below 5000-level count toward the 30 hour requirement. Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements. The student's graduate committee, nominated by the major professor, the student, and the department head determine the final program of study and thesis research topic. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Plan B (non-thesis):

Minimum of 32 hours of coursework; Non-thesis business analysis paper accepted by the student's graduate committee. Minimum of 13 credit hours of agricultural economics coursework numbered at the 5000-level are required, including:

AGEC 5310

AGEC 5740

AGEC 5880

AGEC 5630 or 5710

AGEC 5320 or 5230

In addition, students are required to complete 3 credit hours from each of the following three areas:

Management:

AGEC 4060, 4640 or 5460; or MGT 4410, 4420, 4440, 4470, or 4520

Marketing:

AGEC 4050, 4830, 4840, 4880, or 5710; or MKT 4240, 4430, 4520, or 4540

Finance:

AGEC 4500; or FIN 4510, 4520, 4610, 4810; or ECON 4740

Remaining credit hours will be filled with electives. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic. Presentation of the business analysis paper at a formal public seminar. An internship experience is strongly encouraged as part of the agricultural business option (AGEC 5990).

Master of Science in Agricultural Economics/ Water Resources; Plan A (thesis):

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 10 credit hours in water resources approved courses. Please refer to Water Resources Degree program in this Catalog for updated degree requirements. Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the water resources area. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Master of Science in Agricultural Economics/Environment and Natural Resources (ENR); Plan A (thesis):

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 15 credit hours in environment and natural resources, as approved by the student's committee and the ENR academic adviser. Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the area of environment and natural resources. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Graduate Minor in Applied Economics:

Graduate standing. AGEC 4640, AGEC 5310 or 5740, AGEC 5320 or 5230, and 6 additional credits of approved courses. Committee selection for the student's major thesis or dissertation committee should include at least one faculty member from AGEC.

Department of Animal Science

Professors:

BRENDA M. ALEXANDER, B.S. University of Wyoming 1986; M.S. 1988; Ph.D. 1999; Professor of Animal Science 2019, 2006.

JIM PRU, B.S. 1991 and M.S. 1993 Zoology and Physiology, University of Wyoming; Ph.D. Molecular Reproductive Biology University of Wyoming 2000; Professor University of Wyoming 2021.

DANIEL C. RULE, B.S. University of California, Davis 1977; M.S. 1980; M.S. Washington State University; Ph.D. Iowa State University 1984; Professor and Rochelle Chair of Animal Science 1999, 1987, 2021.

Associate Professors:

BLENDAR BISHA, D.V.M. Agricultural University of Tirana-Albania 1999; M.S. Iowa State University 2004; Ph.D. 2009; Assistant Professor of Animal Science 2013.

SCOTT L. LAKE, B.S. University of Nevada 1998; M.S. 2001; Ph.D. University of Wyoming 2005; Associate Professor of Animal Science 2014, 2008. Extension Livestock Specialist.

PAUL A. LUDDEN, B.S. University of Nebraska-Lincoln 1991; M.S. Purdue University 1994; Ph.D. University of Missouri-Columbia 1997; Associate Professor of Ruminant Nutrition 2004, 1998.

WARRIE J. MEANS, B.S. Colorado State University 1979; M.S. 1982; Ph.D. 1985; Associate Professor of Animal Science 2002, 1992.

STEVEN I. PAISLEY, B.S. University of Wyoming 1993; M.S. 1995; Ph.D. Oklahoma State University 1998; Extension Beef Cattle Specialist; Associate Professor of Animal Science 2007, 2001.

Assistant Professors:

JEREMY BLOCK, B.S. University of Missouri 1998; M.S. University of Florida 2003; Ph.D. 2007

HANNAH C. CUNNINGHAM-HOLLINGER, B.A. St. Olaf College 2012; M.S. University of Wyoming 2014; Ph.D. 2018; Assistant Professor of Animal Science 2019.

SHELBY ROSASCO, B.S. California State University 2012; M.S. New Mexico State University 2016; Ph.D. New Mexico State University 2020; Assistant Professor of Animal Science 2020.

WHIT STEWART, B.S. Brigham Young University-Idaho 2008; M.S. Oregon State University 2010; Ph.D. New Mexico State University 2015; Assistant Professor of Animal Science 2017.

CODY GIFFORD, B.S. 2013, M.S. 2016; Ph.D. Colorado State University 2019; Assistant Professor of Animal Science 2019.

Academic Professional Lecturers:

CURTIS DOUBET

McKENSIE K. HARRIS, B.S. University of Wyoming 2015; M.S. Texas A&M University 2017; Assistant Lecturer in Animal Science 2018.

JENNIFER A. INGWERSON, B.S. University of Nebraska-Lincoln 2005; M.S. Iowa State University 2014; Academic Professional Lecturer in Animal Science 2014.

SIERRA JEPSEN, B.S. The Ohio State University 2017; Assistant Lecturer in Animal Science 2019.

Adjunct Professors:

Kristi Cammack, Jeff Chandler, Thomas Hansen, John Johnston, Tom McDonald, Peter Nathanielsz, Mark Nijland, Heywood Sawyer, Donal Skinner, D. Paul Thomas, Meijun Zhu

Professors Emeriti:

Ray Field, Frank Hinds, Doug Hixon, Steven W. Horn, Conrad Kercher, Richard J. McCormick, Gary Moss, William Murdoch, Johannes Nel, Bibek Ray, Bret Hess

The Department of Animal Science offers a variety of courses in animal and food science. The department uses modern laboratories and excellent animal facilities including a livestock teaching arena and a meat processing facility.

The Department of Animal Science and the Department of Veterinary Science have a combined curriculum, under Animal and Veterinary Science (ANVS). The curriculum has options in production, range livestock, business, communication, animal biology, preveterinary medicine, meat science and food technology, and equine science. The curriculum leads to a wide variety of career opportunities for animal and veterinary science graduates.

Animal and veterinary science

The Department of Animal Science and the Department of Veterinary Sciences have combined their efforts to offer several degree options leading to the bachelor of science degree in animal and veterinary science. Courses in animal science, food science, and pathobiology are the core offerings in the various options. Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered. Several degree options allow for specialization and graduate or professional school preparation. A brief description of each option and the educational opportunities they provide is given with the course requirements. A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, 3100, 4120, 4540, 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, 2022. Students are encouraged to participate in activities related to their degree option. The university has livestock, horse and meats judging teams. Each team travels and participates in at least one major exposition a year. Each year, the Academic Quadrathlon competition is held, combining practical and classroom skills for students. Field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Microbiology Club, Range Club, the Pre-vet Club, Wyoming Collegiate Cattlemens Association, and the Ranch Horse Team provide additional educational and recreational opportunities.

Production Option

This option provides a strong background in livestock production and management. Students interested in livestock production should enroll in this option.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, or 4250; PATB 4110*

Agricultural Sciences.....

Required courses: FDSC 2040, 3060*; AGE 1020, 2020; REWM 2000

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses.....

First-Year Seminar* (FYS), 1 course in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Range Livestock Option

This option emphasizes range livestock management. Students interested in the management of livestock and range resources should enroll in this option. Animal and Veterinary Science.....

Required courses: ANSC 1010, 3010*, 3100*, 2020, 4120*, 4150, 4220, 4230 or 3150, 4540*, 4630* (COM3); PATB 4110*

Rangeland Ecology and Watershed Management

Required courses: REWM 2000, 2400, 4000, 4330; LIFE 3400

Agricultural Sciences.....

Required courses: FDSC 2040, 3060*; AGEC 1020, 2020

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400(Q); STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses.....

First-Year Seminar* (FYS), 2 courses in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Business Option

Students desiring a strong background in business in addition to the basic courses in animal and veterinary science should enroll in this option. Graduates will be qualified for careers in the livestock agribusiness industry.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, or 4250; PATB 4110*

Agricultural Economics and Business.....

Required courses: AGEC 1010, 1020, 3860 or 4880; AGEC 4060 or MGT 3210; AGEC 4050 or MKT 3210; ACCT 2010

Agricultural Sciences.....

Required course: FDSC 3060*

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses.....

First-Year Seminar* (FYS), 1 course in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Communication Option

Students in this option obtain a basic education in animal and veterinary science and also acquire in-depth communication skills. Students interested in careers in agriculture communications with emphasis on the livestock industry should enroll in this option. Animal and Veterinary Science.....

Required courses:

ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, 4240, or 4250; PATB 4110*

Communication

Required courses: COJO 2010* (COM2), plus 14 additional credit hours in COJO

Agricultural Sciences.....

Required course: FDSC 3060*

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 or 2070

Other communication course

ENGL 1010* (COM1)

Other University Studies courses.....

First-Year Seminar* (FYS), 2 courses in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Animal Biology Option

This option within the major requires more complete and stringent basic sciences. Students may complete premedical requirements or other pre-professional allied health requirements while completing a B.S. degree that prepares them for alternate career choices. Selected courses provide opportunity for more complete exposure in both biological sciences and pathobiology. Possible alternatives to professional schools include graduate school admission or employment by government or industry in research, promotion or sales. Because of the variation in pre-professional requirements for different professional programs, students are encouraged to determine the specific requirements of the programs in which they are interested.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 3010*, 3100*, 4120*, 4630* (COM3); MOLB 4400

Agricultural Sciences.....

Required courses: FDSC 3060*; MICR/ MOLB 2021 or 2240; MOLB 3610

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1020 (PN), 1030, 2300 or CHEM 2420 and 2440; PHYS 1050 or PHYS 1110 and PHYS 1120; ZOO/PSYC 3600; MATH 1400 and MATH 1405 or 1450; STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses.....

First-Year Seminar* (FYS), 2 courses in Human Culture (H), and U.S. and Wyoming Constitutions (V) Required credits 128**
*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Meat Science and Food Technology Option

Students taking this option will have an excellent background for entering the meat industry. The food industry is the largest employer in this country and offers a wide variety of career opportunities.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 3010*, 3100*, 4050, 4630* (COM3); PATB 4110*

Food Science

Required courses: FDSC 1410, 2040, 3060*, 3062, 3063, 4090*, 4100, 4720*, 4900*

Agricultural Sciences.....

Required courses: AGECE 1020, AGECE 3860, MICR/MOLB 2021

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); Stat 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses.....

First-Year Seminar* (FYS), and U.S. and Wyoming Constitutions (V)

Suggested courses.....

FDSC 3061; FCSC 1141

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Pre-Veterinary Medicine Option

This option is especially designed to prepare students for application to colleges of veterinary medicine. There is a strong emphasis on the biological, biomedical and physical sciences. This curriculum is also appropriate for students wishing to pursue graduate school opportunities, other professional school applications, or careers in many areas of agribusiness. A minimum of three years of formal course work is required before one can apply to a college of veterinary medicine. Students accepted before completion of their B.S. degree can transfer credits back to UW to complete their degree requirements. Wyoming does not have a college of veterinary medicine. Faculty advisers insure that students meet the variable preveterinary requirements for application to colleges of veterinary medicine in their home state or region.

Animal and Veterinary Science.....

Required courses: ANSC 3010*, 3100*, 4120*; one course selected from ANSC 3150, 4220, 4230, or 4250; PATB 4110*, 4400, 4500, 4710

Agricultural Sciences.....

Required courses: MICR/MOLB 2021, MICR/PATB 2220; MOLB 3610

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1020 (PN), 1030, 2420, 2440; PHYS 1110, 1120; MATH 1400 (Q), 1405 (Q); STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1), a COM2* course, ANSC 4630* (COM3) or other COM3* course

Suggested courses

ANSC 4050, 4132, 4150, 4260, 4540; FDSC 3060; PATB 4001, 4130, 4170, 4360; ANSC/PATB 4111

Other University Studies courses.....

First-Year Seminar* (FYS), 2 courses in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Equine Science Option

This option provides a strong background in equine production and management. Students interested in equine should enroll in this option.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 1030, 3010*, 3100*, 3150*, 3250, 4120, 4132, 4250*, 4540*, 4630* (COM3); ANSC/ PATB 4111*

Agricultural Sciences.....

Required courses: FDSC 3060; AGECE 2020; REWM 2000

Horsemanship

2 advisor/department head approved courses

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022*, 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 or 2070

Other communication courses.....

ENGL 1010* (COM1) and a COM2* course

Other University Studies courses

First-Year Seminar* (FYS), 2 courses in Human Culture (H), and U.S. and Wyoming Constitutions (V)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Agriculture Education with Concentration in Animal and Veterinary Science

This program consists of 128 total hours. Minimum 2.750 cumulative GPA and minimum 2.500 content GPA required. This major will be advised in the College of Education with a secondary adviser in Animal Science. Refer to the College of Education for specific curriculum requirements.

Undergraduate Minors

The Departments of Animal Science and Veterinary Sciences offers two minors: a minor in animal and veterinary science for non-majors and a minor in Equine Science.

Animal and Veterinary Science Minor

The courses required for this minor must be taken for a letter grade and the student must receive a grade of C or better in each course. Courses required are: ANSC 3010, 3100, 4120, 4540; FDSC 3060; PATB 4110 and at least one of the following: ANSC 3150, 4220 or 4230. The Department of Animal Science undergraduate minor adviser may be contacted by students needing assistance or having questions.

Equine Science Minor

The courses required for this minor must be taken for a letter grade and the student must receive a grade of C or better in each course.

Core Courses - 12 total credit hours

ANSC 10303

ANSC 31503

ANSC 32503

ANSC/PATB 41113

Electives - must choose 3 courses minimum (minimum of 8 credits) - 8 to 10 total credit hours

ANSC 20204

ANSC 35553

ANSC 3560* 1-2

ANSC 41322

ANSC 42503

*Maximum of 3 credits allowed in ANSC 3560

Graduate Study

The Departments of Animal Science and Veterinary Science offer programs leading to the M.S. (Plan A and Plan B) and Ph.D. degrees in animal and veterinary science. A M.S. degree in food science and human nutrition is offered in cooperation with the Department of Family and Consumer Sciences. The Department of Animal Science also participates in the interdisciplinary M.S./Ph.D. The Department of Animal Science also participates in the interdisciplinary M.S./Ph.D. Biomedical Science Program.

Program Specific Degree Requirements

Master's Program - Plan A (thesis)

The student, major professor, and graduate committee determine the program of study and research project, which meets the needs of the individual student. The candidate's graduate committee should be established and functioning by the time the student has completed 12 semester hours of formal coursework. The master of science program should be approved and filed by the end of the student's second semester of graduate study in animal science. This committee shall also determine if the student is making satisfactory progress to be advanced to a candidate for a master's degree or continued in a doctoral program by the end of the student's third semester following matriculation. The student can specialize in breeding, food science and human nutrition, nutrition, physiology, meat science, reproduction or wool for coursework and thesis/dissertation project. In addition, supporting coursework is available in agricultural economics, biochemistry, microbiology, range management, genetics, statistics, and other areas of interest to the individual. In certain cases it is possible to develop a joint research project between animal science and another department. Students may use the research facilities and herds of beef cattle, sheep, and swine at the university livestock center near the university or at one of the university research and extension centers in the state. Research laboratories are located on campus and include a modern meat processing facility. The Thesis program is a 30 hour program, 26 hours of coursework and 4 hours of thesis research.

Master's Program - Plan B (non-thesis)

The Non-thesis program requires a coursework-intensive, non-thesis master of science program for those students whose career paths may not require a thesis research program. The program requires 32 hours of coursework in addition to an acceptable non-thesis research paper as defined by the student's graduate committee.

Doctoral Program

The program requires 72 hours. Students must follow minimum graduate requirements.

Food Science

Food science is the application of basic sciences to the processing, quality control, storage, distribution and consumer use of food products. The microbiological, chemical and physical characteristics of foods as related to food processing and product quality are studied. Major emphasis is placed in the area of animal food products.

THIJS KELLENERS, B.S. Wageningen University, The Netherlands 1988; M.S. 1993; Ph.D. 2001. Professor of Soil Science 2018, 2012.

SCOTT N. MILLER, B.S. Brown University 1991; M.S. University of Arizona 1995; Ph.D. 2002; Professor of Rangeland Ecology and Watershed Management 2017, 2002.

JAY B. NORTON, B.S. University of Montana 1985; M.S. Iowa State University 1996; Ph.D. University of Montana 2000; Professor of Soil Science 2018, 2012.

VIRGINIA B. PAIGE, B.A. Colorado College 1984; M.S. University of Massachusetts 1992; Ph.D. University of Arizona 2000; Professor Rangeland Ecology and Watershed Management 2019, 2004.

SCOTT R. SHAW, B.S. Michigan State University 1977; M.S. University of Maryland 1981; Ph.D. 1984; Professor of Entomology 1998, 1989.

PETER D. STAHL, B.S. Oklahoma State University 1978; M.S. University of Wyoming 1982; Ph.D. 1989; Professor of Restoration Ecology 2009, 2000; Director, Wyoming Reclamation and Restoration Center.

TIMOTHY R. COLLIER, B.S. University of California-Riverside 1987; Ph.D. University of California-Santa Barbara 1994; Associate Professor of Entomology 2008, 2002.

KRISTINA HUFFORD, B.A. University of California-Berkeley 1993; Ph.D. University of Georgia 2001; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MELANIE MURPHY, B.S. University of Idaho 1998; M.S. 2001; Ph.D. Washington State University 2008; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MENGQIANG ZHU, B.E. North China Electric Power University 2002; M.S. Chinese Academy of Sciences 2005; Ph.D. University of Delaware 2010; Associate Professor of Soil and Environmental Biogeochemistry 2019, 2013.

Associate Professors:

TIMOTHY R. COLLIER, B.S. University of California-Riverside 1987; Ph.D. University of California-Santa Barbara 1994; Associate Professor of Entomology 2008, 2002.

KRISTINA HUFFORD, B.A. University of California-Berkeley 1993; Ph.D. University of Georgia 2001; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MELANIE MURPHY, B.S. University of Idaho 1998; M.S. 2001; Ph.D. Washington State University 2008; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

J. DEREK SCASTA, B.S. Texas A&M University 2004; M.S. 2008; Ph.D. Oklahoma State University 2014; Assistant Professor of Rangeland Ecology and Watershed Management 2014.

MENGQIANG ZHU, B.E. North China Electric Power University 2002; M.S. Chinese Academy of Sciences 2005; Ph.D. University of Delaware 2010; Associate Professor of Soil and Environmental Biogeochemistry 2019, 2013.

Assistant Professors:

DAVID CHRISTIANSON, B.S. Montana State University 2003; Ph.D. 2008; Assistant Professor of Rangeland Ecology and Watershed Management 2019.

FABIAN NIPPGEN, M.S. Albert-Ludwigs University 2007; Ph.D. Montana State University 2014; Assistant Professor of Rangeland Ecology and Watershed Management 2017.

LINDA VAN DIEPEN, B.S. Hogeschool IJsselland, Deventer 1999; M.S. Wageningen University 2002; Ph.D. Michigan Technological University 2008; Assistant Professor of Soil Microbiology 2015.

KAREN L. VAUGHAN, B.S. University of Delaware-Newark 2001; M.S. University of Maryland-College Park 2004; Ph.D. University of Idaho-Moscow 2008; Assistant Professor of Pedology 2015.

KEVIN WILCOX, B.S. Central Washington University 2008; Ph.D. Colorado State University 2015; Assistant Professor of Rangeland Ecology and Watershed Management 2018.

Academic Professionals:

CRAIG COOK, B.S. University of Utah 1978; Research Scientist, Stable Isotope Facility Manager.

SCOTT SCHELL, B.S. University of Wyoming 1991; M.S. 1994; Senior Extension Entomologist 2005, Associate Research Scientist 2009.

Adjunct Professors:

Justin Derner, Jack Morgan, Brenda Schladweiler, Gerald Schuman, Nancy Shaw, Ramesh Sivanpillai

Professors Emeriti:

Ann Hild, Alexandre Latchininsky, William Laycock, David Legg, Larry Munn, Richard Olson, Katta Reddy, J. Daniel Rodgers, Quentin Skinner, Michael Smith, John A. Tanaka, George Vance, James Waggoner, James Wangberg, Thomas Wesche, Stephen Williams

The Department of Ecosystem Science and Management offers two programs leading to a Bachelor of Science degree. These are Rangeland Ecology and Watershed Management and Agroecology (an interdepartmental program offered through the Department of Ecosystem Science and Management and the Department of Plant Sciences). The coursework requirements necessary for obtaining an agroecology degree are described in the Department of Plant Sciences section of this publication. Either degree can also be obtained as an affiliate degree in conjunction with the School of Environment and Natural Resources. Six minor degree programs are offered through the department: Insect Biology, Rangeland Ecology and Watershed Management, Soil Science, Agroecology, Forest Resources, and Reclamation and Restoration Ecology. Obtaining a minor to complement a B.S. major degree program provides credentials and knowledge that can expand career opportunities.

The Department of Ecosystem Science and Management offers two programs leading to a Bachelor of Science degree. These are Rangeland Ecology and Watershed Management and Agroecology (an interdepartmental program offered through the Department of Ecosystem Science and Management and the Department of Plant Sciences). The coursework requirements necessary for obtaining an agroecology degree are described in the Department of Plant Sciences section of this publication. Either degree can also be obtained as an affiliate degree in conjunction with the School of Environment and Natural Resources. Six minor degree programs are offered through the department: Insect Biology, Rangeland Ecology and Watershed Management, Soil Science, Agroecology, Forest Resources, and Reclamation and Restoration Ecology. Obtaining a minor to complement a B.S. major degree program provides credentials and knowledge that can expand career opportunities.

The degree programs reflect the department's diverse expertise in natural resource and agriculture sciences. Students completing degrees offered through the department are well prepared for careers in natural resource management and sustainable agriculture (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, biocontrol/ integrated pest management, soil science and various types of environmental consulting) or other science careers.

Student Learning Outcomes

The goal of the Department of Ecosystem Science and Management is to provide students with a comprehensive knowledge in several different areas in addition to their specific area of study. These expectations ensure that students may take these learned skills and successfully apply them in their post-graduate endeavors. Assessments in all areas are based on knowledge, skills, and attitude.

These areas include:

Oral communication encompasses all the abilities necessary for effective expression and sharing of information, ideas, and feelings in a format including verbal and nonverbal symbols.

Proficiency in written communication will ensure that students will be able to write for different audiences, from expressive writing to technical writing, using a range of sophistication in language.

Professional behavior involves attaining high standards of behavior and appropriate attitudes, not only through acquiring knowledge and experience, but a lifelong commitment to learning and achievement.

Competency in critical thinking and problem solving will enable students to engage in reasonable, reflective thinking focused on deciding what to believe or do.

Computer and information literacy ensures that students will be viewed as trainable and adaptable in a computerized work environment. Proficiency in this area also enables students to effectively access online information, and skillfully make use of it.

The results in these different areas will aid the department in:

Planning instructional strategies to address student strengths and weaknesses;
 Evaluating and describing overall student achievement;
 Counseling students for academic and career options; and
 Evaluating the effectiveness of instructional programs.

Minor in Forest Resources

The primary goal of the Forest Resources minor degree program is to develop a working knowledge of the processes that influence provision of the key products derived from forest lands. Courses taken in fulfillment of a major degree program will also be able to be applied to a minor degree program.

Graduate Study

The Department of Ecosystem Science and Management is an interdisciplinary department made up of five disciplinary areas: entomology, rangeland ecology, soil sciences, agroecology, and watershed management. The department offers the master of science and doctor of philosophy degrees in entomology, rangeland ecology and watershed management, and soil science. A water resources dual major may be obtained in conjunction with each of these master's degrees. For the rangeland ecology and watershed management degrees, thesis and dissertation problems may be developed in aspects of range ecology, wildlife habitat, reclamation of disturbed lands, watershed management, utilization and improvement of rangelands, and many other facets of range and forest ecology management. For the entomology degrees, thesis and dissertation problems may be developed in many areas of basic and applied aspects of insect ecology. For the soil degrees, thesis and dissertation problems may be developed in

many basic and applied aspects of soil science. The degree programs reflect the department's diverse expertise in natural resource and agriculture sciences. Students completing degrees offered through the department are well prepared for careers in natural resource management and sustainable agriculture (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, biocontrol/integrated pest management, soil science and various types of environmental consulting) or other science careers. A graduate certificate in reclamation and restoration ecology may be obtained after completion of a B.S. degree or in conjunction with an M.S. or Ph.D. degree. At present, no program for graduate degrees in agroecology is offered; however, some courses at the graduate level are available. Responsibility for this program is shared with the Department of Plant Sciences.

Program Specific Admission Requirements

Admission is contingent upon a faculty member being willing to assume responsibility for working with the student as an adviser.

Applicants are encouraged to initiate correspondence with faculty who share similar research interests as part of the process of securing faculty advising commitment.

In special circumstances, and with the faculty adviser's support, a student may be admitted in a provisional status with continued enrollment dependent upon meeting performance requirements specified at the time of admission.

Program Specific Graduate Assistantship Information

Current graduate assistantship availability, subject of study, and remuneration can be determined by checking: www.uwyo.edu/esm. Prospective students are also encouraged to directly correspond about future opportunities for graduate assistantships with faculty that share similar research interests.

Courses of instruction in the department are offered in agroecology, entomology, rangeland ecology and watershed management, renewable resources, and soil science.

Program Specific Degree Requirements

Master of Science in Entomology

Plan A (thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

Plan B (non-thesis)

Requires 30 hours of graduate credit to include 9 hours of required courses, 11 hours of required electives, and 10 hours of other electives.

Plan B project - follows format of Plan A thesis.

A Plan B master of science will be a terminal degree program in the Department of Ecosystem Science and Management. Students completing this option will not qualify for a subsequent Ph.D. program in Department of Ecosystem Science and Management at the University of Wyoming.

Master of Science in Entomology/Water Resources

Please refer to the Water Resources section of this Catalog for degree requirements.

*Master of Science in Soil Science**Plan A (thesis)*

Plan A requires the university minimum degree requirements and an oral final examination.

Plan B (non-thesis)

Plan B is available and requires 30 hours of graduate coursework. An oral defense of the paper(s) is required.

Master of Science in Soil Science/Water Resources

Please refer to the Water Resources section of this Catalog for degree requirements.

Doctoral Programs

Doctor of Philosophy in Entomology

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Doctor of Philosophy Program in Hydrolic Science

Water Resources/Environmental Science and Engineering (WRESE) is an Interdisciplinary Ph.D. program that fulfills an important need by organizing a rigorous Ph.D.- level curriculum, with sufficient numbers of relevant, frequently-offered courses to serve the needs of Ph.D. students affiliated with program faculty.

The program's Ph.D.-level coursework is essential and forward-looking in areas such as aquatic chemistry, transport in natural systems, hydrometeorology, land-atmosphere interactions, eco-hydrology, hydrogeology, vadose zone hydrology, hydrologic applications of stable isotopes, limnology, hydrologic modeling, hydrological and water quality effects on aquatic organisms, hydroclimatology, hydrologic remote sensing and watershed hydrology.

Doctor of Philosophy in Rangeland Ecology and Watershed Management

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Doctor of Philosophy in Soil Science

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Doctor of Philosophy in Ecosystem Science and Management/Applied Economics

The course requirements for the PhD program in Ecosystem Science and Management (ESM) with a concentration in Applied Economics are highly flexible to accommodate a wide variety of student backgrounds and interests. Students can major in any PhD program within ESM including Rangeland Ecology and Watershed Management (REWM), Soil Science (SOIL), and Entomology (ENTO) following the ESM admission procedures. The student's graduate committee, with the approval of the

Department Heads and College Dean, determine the final program of study. Acknowledging flexibility, each student's program of study is expected to meet the following minimum requirements:

A minimum of 72 credit hours of coursework. The credit hour requirement can include:

Up to 48 credit hours transferred from approved graduate courses earned while pursuing an M.S. degree (no more than 4 credit hours of thesis);

A minimum of 12 credit hours of approved ESM (REWM, SOIL, ENTO) courses;

A minimum of 18 credit hours of approved AGECE or ECON courses, with at least 12 credit hours at the 5000-level.

At least 42 of the 72 credit hour requirement must be earned in formal coursework.

No more than 12 credit hours of 4000-level courses can count towards the 72 credit hour requirement.

In addition to the degree requirements listed, students pursuing this option will also meet the following general requirements:

Enroll in, and complete, the graduate minor in Applied Economics.

Include co-chairs, one from ESM and one from AGECE, on the graduate committee.

Participate in a meaningful teaching experience to be coordinated by the student's major professor.

Complete a preliminary examination covering knowledge related to both ESM and AGECE.

Present research results at a formal public seminar.

Complete a final oral examination covering the student's thesis research administered by the graduate committee.

Graduate Certificate Program

Reclamation/Restoration Ecology Graduate Certificate

The Reclamation/Restoration Ecology (RRE) graduate certificate prepares the student to use basic and applied ecological concepts to reclaim and/or restore processes and functions to disturbed ecosystems. Reclamation and/or restoration of disturbed ecosystems requires an understanding of the edaphic, biotic, hydrologic, geologic, and topographic factors comprising these ecosystems, including the complex interrelationships that support and perpetuate ecosystem function.

The graduate certificate will be granted to students who have completed a B.S. in an appropriate science-oriented discipline or are currently enrolled in an M.S. or Ph.D. program. The graduate certificate will also be available to professionals working in reclamation/ restoration oriented fields seeking to upgrade their training in reclamation and restoration ecology. Those interested in the graduate certificate will be required to complete the course work listed below as well as write a synopsis paper with a formal presentation advertised as an open forum seminar.

Required Certificate Courses:

Reclamation and restoration ecology courses

REWM 4200, REWM 5580 6 hours

Reclamation problems

SOIL 5565 or REWM 5640..... 4 hours

Reclamation process course (choose one)

BOT 5700, BOT 5730, BOT 5780, PLNT 5070, PLNT 5470, GEOL 5444, GEOL 5570, REWM 5280, REWM 5710, RNEW 5540, SOIL 5100, SOIL/MATH 5110, SOIL 5120, SOIL 5130, SOIL 5140, SOIL 5150, ZOO 5550 3 hours

Planning/policy courses (choose one)

ENR 4900, ENR 5900 3 hours

Minimum total credits needed: 16 hours

Courses of instruction in the department are offered in agroecology, entomology, rangeland ecology and watershed management, renewable resources, and soil science.

Environment and Natural Resources Affiliate Degrees

Bachelor of Science degrees in either the Agroecology or the Rangeland Ecology and Watershed Management offered through the Ecosystem Science and Management Department may also be obtained as affiliate degrees with the School of Environment and Natural Resources (i.e., the degree titles would be Environment and Natural Resources/Rangeland Ecology and Watershed Management or Environment and Natural Resources/Agroecology). The additional coursework requirements necessary for obtaining an affiliate degree are described in the School of Environment and Natural Resources section of this publication.

Entomology Minors Programs

Because of the pervasiveness of insects, the entomology minors programs provide a vital link among the life and environmental sciences at the University of Wyoming. Students will be prepared to serve society not just through the vital industry of agriculture, but through contributions to basic biology, human and animal health, ecosystem management, wildlife conservation and a myriad of other ways.

Minor in Insect Biology

This minor is intended for students who have an interest in insects as organisms, including their basic biology, ecology and evolution. As insects dominate biological diversity, they are essential to most ecological systems, and have unique physiological systems. Students majoring in zoology, botany, molecular biology, biology or similar fields will find the study of these organisms a rewarding and valuable (if not essential) element of the life sciences.

In terms of biological diversity, at least 75 percent of all species are insects, with over 800,000 known species and another 10-50 million yet to be described. Insects are increasingly used as bioindicators of environmental health. Many industries now recognize that insects may be the world's richest, untapped natural resource, with billions of dollars of unexploited goods and services. Accessing these resources requires trained entomologists. Such training demands an academic setting, such as the University of Wyoming, where collections are maintained, productive faculty are involved in quality research and teaching, the latest methodologies are available and taught, the necessary scientific literature is readily accessible and a curriculum available that allows the student to pursue this field.

Minimum requirements.....13

Choose one from ENTO 1000 or 1001, then choose from ENTO 4678, 4682, 4684, 4686, 4687, and 4884 to meet the minimum 13 credit hour requirement.

Insect Biology/Entomology Graduate Study

The department offers graduate work leading to the Master of Science and Doctor of Philosophy in entomology and an affiliated graduate option in water resources. Department faculty have active programs in insect ecology (biological control, population biology and plant-insect interactions), systematics (taxonomy, phylogeny and evolution) and pest management (biological control, biometrics and sampling, and pest management on humans, livestock, crops and rangeland).

Agroecology Program

**Rooms 50/2013 Agriculture Building
(307) 766-3103/766-2263**

Departments of Plant Sciences and Ecosystem Science and Management

The Bachelor of Science degree program in agroecology is an interdepartmental major involving the collaborative teaching, advising and research expertise in the Departments of Plant Sciences and Ecosystem Science and Management. An agroecology minor is also available. See the Plant Sciences section under the College of Agriculture and Natural Resources for more information on the Agroecology program.

Rangeland Ecology and Watershed Management Major

Rangeland occupies 47% of the Earth's land area. The 50 million acres of rangeland in Wyoming provide diverse opportunities for the multiple uses of livestock and wildlife grazing, recreation, water production and natural beauty. Students are taught to understand and manage complex rangeland ecosystems.

The rangeland ecology and watershed management curriculum is designed for students choosing to study ecology, utilization and management of rangelands and wildland watersheds and related resources of forestry, recreation, wildlife management, soil science, botany, and zoology. Degrees include Bachelor of Science, Master of Science, and Doctor of Philosophy.

The undergraduate course of study helps students become well prepared for careers in natural resource management (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, ranch management, various types of environmental consulting), or other natural science careers. The curriculum fully meets the Office of Personnel Management (OPM) requirements for Range Conservationist. By appropriate course selection within the elective hours, students will also meet OPM requirements for additional professional work, such as soil conservationist or hydrologist.

Rangeland Ecology and Watershed Management Graduate Study

Areas of graduate study leading to a M.S. or Ph.D. in rangeland ecology and watershed management include range ecology, animal nutrition, watershed management, wildlife habitat management, restoration ecology, and reclamation of disturbed lands. A graduate certificate in reclamation and restoration ecology and a graduate option in water resources are offered in affiliation with the rangeland ecology and watershed management graduate degree.

Minor

A minor in rangeland ecology and watershed management is available for students in other majors interested in increasing their knowledge of the field. The number of hours required is 24. The required courses for the minor are: LIFE 1010 (4 hrs.) and 3400 (3); and REWM 2000 (3), 2400 (4), 4330 (3), 4530 (1) and 6 hrs. selected from other REWM upper-division (3000 or 4000 level) courses.

Minor in Soil Science

This program is designed to enhance soil expertise for students majoring in agricultural, natural resources, and environmental sciences degree programs. Undergraduate students minoring in Soil Science will enhance their job prospects with federal land management or conservation agencies (e.g., Forest Service, Bureau of Land Management, Natural Resources Conservation Society), state and federal regulatory agencies (e.g., Wyoming Department of Environmental Quality), mining and oil companies, environmental consulting companies, or scientific research organizations.

Course requirements (15 credit hours) for a Soil Science minor are: SOIL 2010, plus 11 credits of upper-division soil science courses for a total of 15 credits.

Soil Science Graduate Study

The department offers graduate work leading to the Master of Science and Doctor of Philosophy degrees in soil science, an affiliated graduate certificate in reclamation and restoration ecology, and an affiliated graduate option in water resources. Our

faculty have active programs in soil-plant fertility and nutrition, soil morphology, genesis and classification, soil and water quality, environmental soil microbiology, soil and environmental chemistry, and soil and water physics.

Interdisciplinary Programs

Water Resources (WARE)

College of Agriculture and Natural Resources

Department of Ecosystem Science and Management

2013 Agriculture Building

Phone: (307) 766-4274

E-mail: smiller@uwyo.edu

Web Address: www.uwyo.edu/ware/

Program Director: Scott N. Miller

Degrees Offered

M.A. or M.S. in (Program Name)/Water Resources

Academic departments across the university cooperate to provide master of arts or master of science degree programs that contain multidisciplinary training in water resources. The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

The educational underpinnings of this program include the following: The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates. Training is to be consistent with the rigor of professional water resources demands. The interdisciplinary major program is flexible so as to meet the candidates' individual professional objectives.

Primary responsibility for student guidance and graduate program formulation resides with the sponsoring department and sponsoring major professor. Please refer to latest updated information on the website listed above. Upon acceptance to the program, the sponsoring department must assign a member of the Water Resources Curriculum Committee to the candidate's graduate committee. The Water Resources Curriculum Committee's representatives on the candidate's graduate committee shall aid in formulating deficiency requirements, course program design, academic performance criteria, and research objectives throughout the candidate's tenure in the program.

Program Specific Admission Requirements

University application and fee; Application fee is valid for three years; Official documentation indicating bachelor's degree earned (not necessary if UW is the most recent institution attended); Potential candidates are encouraged to apply for admission to this program by contacting the participating department and by specifying at the initiation that they desire admission to the water resources interdisciplinary major. Their credentials will be evaluated by the sponsoring department and the department recommends admission of the individual into the program to the UW Admissions office.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To insure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

Agricultural Economics/ Water Resources

Department of Agricultural and Applied Economics

206 Agriculture Building

Phone: (307) 766-2386

E-mail: ag-econ@uwyo.edu

website: www.uwyo.edu/agecon/

The objective of this program is to provide students with specialized study in water resources and to signify this specialization by the designation of the water resources interdisciplinary major on the transcript.

Coursework and Thesis

Students must complete the 24 credit hour agricultural and applied economics including M.S. core requirements plus 4 thesis hours and 9 credit hours in water resources approved courses. Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements. The candidate's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and thesis research topic, which must be in the water resources area. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the graduate committee.

Oral Exam Requirement

In addition to coursework and a Plan A Thesis, students must pass a final oral examination. The student's committee may also require a written examination.

Interdisciplinary Component

nine hours (see Water Resources degree requirements)

Botany/Water Resources

Department of Botany

114 Aven Nelson Building

Phone: (307) 766-2380

Web Address: www.uwyo.edu/botany

In addition to the general requirements for admission to the existing master's program in botany, the master of science in botany/water resources interdisciplinary major requirements will include the following variations:

Coursework and Thesis

16 semester hours are required in botany, plus 9 semester hours in water resources courses. Other courses in mathematics, physics, chemistry, and statistics also may be required as the special program and undergraduate preparation require. Due to the various, potential subspecialties that students might follow in connection with a botany/water resources interdisciplinary major, no particular botany courses are prescribed. An appropriate array of courses for the desired specialty will be determined by agreement between the advisory committee, graduate student adviser, student, and with the approval of the Water Resources Curriculum Committee. For the water resources interdisciplinary major, a Plan A Thesis is required. The student must present his or her research in a seminar before the department, and must pass an oral exam on the thesis research.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Civil Engineering/Water Resources

Department of Civil and Architectural Engineering

3074 Engineering Building

Phone: (307) 766-5255

E-mail: ceinfo@uwyo.edu

Web Address: www.uwyo.edu/civil/

The purpose of this program is to broaden the students' master of science program in the water resource area in civil engineering.

Plan A Thesis Requirement

Only students with a M.S. Plan A thesis option are eligible. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Coursework and Thesis

Each student must complete a minimum of 28 hours of graduate level coursework and a thesis under Plan A (4 credit hours) to qualify for the master of science in civil engineering/ water resources. The student must obtain at least 18 credit hours of graduate level coursework in engineering, emphasizing a concentration of core courses in a particular area of emphasis in civil engineering. The core course areas of emphasis for this program are hydrologic and hydraulic engineering. The particular set of courses for a given area of emphasis will be designated by the faculty in the water resources area for these areas of emphasis with the approval of the Civil Engineering Graduate Committee.

Entomology/Water Resources

Department of Ecosystem Science and Management

2013 Agriculture Building

Phone: (307) 766-3114

Web Address: www.uwyo.edu/esm

Ecosystem Science and Management E-mail: esm@uwyo.edu

The purpose of this program is to enhance the cross-disciplinary linkage between entomology and water resources, and to provide students an entomology degree program which emphasizes the important issues in water resources. Aquatic insects are increasingly being used as bioindicators of aquatic ecosystem health. This is an area of environmental assessment that is rapidly expanding, as is the job market for scientists with this blend of skills.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of ENTO 5960 to qualify for a master of science degree in entomology/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

A. ENTO 5678 Aquatic Entomology (3)

B. Interdisciplinary component

9 hours (see Water Resources degree requirements)

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in entomology/water resources. In addition to coursework and a Plan A thesis, students must pass a final written and oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in entomology/water resources degree requirements and that research efforts are in the water area.

Geology/Water Resources & Geophysics/Water Resources

Department of Geology and Geophysics

122 S.H. Knight Geology Building

Phone: (307) 766-3386

E-mail: acadcoord.gg@uwyo.edu

Web Address: <http://geology.uwyo.edu>

The purpose of this program is to formalize and broaden strong department offerings at the master of science level in ground water geology, natural waters geochemistry, mathematical hydrology, and fluvial geomorphology.

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

A. GEOL 5444 Geohydrology.....3

B. 1 of the following: GEOL 4830 Introduction Quantitative Methods in Geology3

 GEOL 4880 Surficial Processes3

 GEOL 5050 Introduction to Isotope Geology3

C. GEOL 5777 Geochemistry of Natural Waters3

GEOL 5444 can be used to satisfy the 3 hour technical course requirement or GEOL 5777 can be used to satisfy the 3 hour water quality course requirement.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Rangeland Ecology and Watershed Management/ Water Resources

Department of Ecosystem Science and Management

2013 Agriculture C Building

Phone: (307) 766-3114

E-mail: esm@uwyo.edu

website: www.uwyo.edu/esm

The purpose of this program is to enhance the cross-disciplinary linkage between range and forest management and water resources, and to provide students with a degree program in rangeland ecology and watershed management which emphasizes the important issues in water resources.

Coursework and Thesis

Water Resources requirements*: 10 Statistics: 3

Range Management Seminar (REWM 5620): 1

Other recommended graduate courses or substitution courses with adviser consent: 12 Plan A thesis credit: 4 Minimum: 30

*Water Resources Requirements Interdisciplinary component

9 hours (see Water Resources degree requirements)

REWM 5250.

Seminar in Water Resources (1)

Soil Science/Water Resources

Department of Ecosystem Science and Management

2013 Agriculture C Building

Phone: (307) 766-3114

E-mail: esm@uwyo.edu

Web Address: www.uwyo.edu/esm

The purpose of this program is to enhance the cross-disciplinary linkage between soil science and water resources, and to provide students a soil science degree program which emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of SOIL 5960 to qualify for a master of science degree in soil science/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

A. Core courses - Students must take or have taken equivalent courses in the four soils disciplines: physics, pedology, chemistry, and microbiology.

SOIL 5100 Soil Physics (4)

SOIL 5120 Genesis, Morphology and Classification of Soils (3)

SOIL 5130 Chemistry of the Soil Environment (3)

SOIL 5140 Soil Microbiology (4)

B. Enhancement courses - Students must take at least one of the following courses:

SOIL 5110 Modeling Flow Transport in Soil and Groundwater Systems

SOIL 5150 Forest and Range Soils

SOIL 5160 Soil Fertility and Fertilizers

SOIL 5170 Analytical Methods for Ecosystems Research

C. Interdisciplinary component 9 hours (see Water Resources degree requirements)

D. REWM 5250 Sem in Water Resources1

E. SOIL 5720. Graduate Seminar in Soil Science1

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in soil science/water resources. In addition to coursework and a Plan A thesis, students must pass a final oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in soil science/water resources degree requirements and that research efforts are in the water area.

Zoology and Physiology/ Water Resources

Department of Zoology and Physiology 114 Aven Nelson

Phone: (307) 766-4207

E-mail: zprequest@uwyo.edu

Web Address: www.uwyo.edu/zoology

The purpose of this program is to broaden the master of science program in the water resources area by having students take 10 semester hours of coursework associated with water resources.

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and 4 hours of Plan A thesis credit to qualify for the master of science in zoology and physiology/ water resources. Specific coursework requirements will be determined by the student's graduate committee. The student must obtain at least 10 credit hours as indicated. Depending upon the student's undergraduate background and career interests, the graduate committee may require that these 10 credits be part of, or in addition to, the 26 credit hours required for a master of science in zoology and physiology.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

The Willard C. and Elaine N. Rhoads Scholarship for Graduate Students in Water Resources at the University of Wyoming

The Willard C. and Elaine N. Rhoads Scholarship for Graduate Studies in Water Resources was established to honor Willard Rhoads, a member of the Research Review and Priorities Committee for the Wyoming Water Resources Center and a long-time member of the Wyoming Water Development Commission. Funds for the Rhoads Scholarship were donated to the University of Wyoming by Mrs. Rhoads and her family and friends, with some matching funds provided by the university. Two annual awards for the academic year will be made in the amount of \$1,000 to a master's degree candidates for use in furthering research on Wyoming's water resources.

Eligibility Requirements and Evaluation Procedures

The applicant must be accepted into the interdisciplinary water resources major program administered by the student's academic department.

The applicant must agree to take a minimum of 9 credit hours (including thesis credits) in each of the two semesters for which the award applies.

Applicants for the scholarship can apply more than once, with the exception of past recipients.

The recipient will be chosen by a selection committee appointed by the Water Resources Curriculum Committee.

Applicants meeting the eligibility requirements above will be judged on the basis of promise of academic excellence as evident in grades for graduate level courses, and a recommendation from the student's graduate adviser.

Funds for the academic year will be dispersed to the recipient equally in the fall and spring semesters for half of the total amount.

Application Guidelines

Applicants meeting the above requirements should submit the following:

Application deadline is April 1.

A letter from the applicant listing the name of the scholarship for which he/she is applying, which includes a statement that the applicant agrees to enroll for a minimum of nine hours of graduate level courses (including thesis credits) in each of the two semesters for which the award applies, and a statement of academic and career goals related to water research. The applicant must also state the purpose for which the scholarship funds will be used.

An official transcript of grades for graduate level courses earned at the University of Wyoming or other institutions.

A note from the academic department, verifying that the applicant has been accepted into a water resources interdisciplinary major program.

A confidential letter of recommendation from the applicant's graduate adviser addressing the applicant's promise for attaining academic and career goals through his/her research in water resources. Up to two additional letters of recommendation can be provided at the applicant's discretion.

The applicant should arrange for all materials to be sent to:

Scott Miller, Chair, Roads Scholarship Committee
Department of Ecosystem Science and Management
Dept. 3354, 1000 E. University Ave.
Laramie, WY 82071-3354

Department of Family and Consumer Sciences

Department Information

Our mission is to enhance the physical, social, and economic well-being of individuals, families, and communities, emphasizing healthy and sustainable living across the lifespan. We fulfill our mission through instructional, research, and outreach/extension efforts that challenge, motivate, and inspire.

Family and Consumer Sciences integrates the fundamental components of human life—food, shelter, clothing, human relationships, and family—with larger societal systems. Through programs in textiles, apparel and design; food and nutrition; and human development and family sciences, our department prepares learners to meet the opportunities and challenges of today's complex world.

All students pursuing the Bachelor of Science degree in Family and Consumer Sciences are required to complete a minimum of 120 credit hours that include a) University Studies requirements (USP); b) departmental core curriculum; and c) courses in one of the following concentrations: dietetics (application only), human nutrition and food, human development and family sciences, professional child development (online only), or one of the three career tracks in design, merchandising and textiles. Minors in apparel design, human development and family sciences, human nutrition, and interior design are also available.

Grade Requirements

Majors are required to pass all courses within the Department of Family and Consumer Sciences with a grade of C or above. Students enrolled in family and consumer sciences minors are required to take all courses required for the minor for letter grade and complete each course with a grade of C or above.

Security Screening

All students applying for admission to the Professional Child Development concentration are required to complete a security screening before program entry. Students in the Human Development and Family Sciences concentration must complete their security screening upon declaration of their major. Failure to satisfactorily complete this requirement will result in the student being dropped from or denied entry to the program.

Family and Consumer Sciences Core Requirements

(Please click on link to review core requirements for all undergraduate majors).

Family and Consumer Sciences Core Requirements

Family and Consumer Sciences Student Learning Outcomes

Students graduating from the Department of Family and Consumer Sciences will be proficient in their concentration content as well as be able to effectively communicate (both written and orally), possess intellectual skills (such as critical and creative thinking and problem solving), and demonstrate appropriate levels of professionalism.

Family and Consumer Sciences Concentrations

Students should obtain and follow a degree plan for their chosen concentration. Standards established by several professional organizations require completion of specific courses in addition to the family and consumer sciences core and USP requirements. All students are assigned to a professional advisor and a faculty mentor. Students should work closely with their advisor to be sure all degree requirements are met. All concentrations are listed below.

Family and Consumer Sciences Minors

Required courses in the following minors in Family and Consumer Sciences must be taken for a letter grade and completed with a grade of C or above. All minors are listed below.

Graduate Study

The Department of Family and Consumer Sciences offers a program of graduate study leading to a Master of Science in Family and Consumer Sciences with a concentration in human development and family sciences; human nutrition and food; or design, merchandising and textiles. The department also participates in an interdisciplinary degree in Food Science and Human Nutrition.

Department of Molecular Biology

Department of Molecular Biology

203 Animal Science/Molecular Biology Bldg.

(307) 766-3300

Web site: www.uwyo.edu/MolecBio/

Department Chair: Jesse "Jay" Gatlin

Modern biology is based on a fundamental understanding of molecular processes essential in living organisms. Recent advances in molecular biology have led to an explosion of knowledge about gene expression and the role gene products play in cell function. Undergraduate programs in molecular biology offer learning opportunities at the forefront of modern biology.

The molecular biology degree programs are designed to prepare students for the future by combining a foundation in basic sciences and humanities with a broad selection of courses in molecular biology, biochemistry, genetics and microbiology.

Advanced undergraduates attend an outside speaker's program that includes some of the world's best-known scientists. Modern, well-equipped teaching and research laboratories contribute significantly to the educational experience of a student. All junior- and senior-level undergraduates are encouraged to participate in research projects with individual faculty members. Involvement in an active research program provides the student with an additional dimension of learning beyond what is assimilated in courses. A student learns to plan experiments, solve technical problems and experience scientific advances first hand. An undergraduate research project also promotes close interaction between the undergraduate and graduate students, postdoctoral researchers, staff and faculty.

Many molecular biology majors continue their education beyond the bachelor's level by going to graduate school or to medical, dental or veterinary school. Some students choose to use their education to gain employment in biotechnology, clinical or basic research laboratories. Other career choices include teaching, medical technology, law and business. In addition, the Department of Molecular Biology offers the Ph.D., M.S. and M.A. degrees for students who wish to do graduate work in molecular biology, in preparation for careers in academia, the biotechnology and biopharmaceutical industry, medicine, or other professions.

Professors

DAVID FAY, B.S. Tufts University 1988; Ph.D. Yale University 1995; Professor of Molecular Biology 2010, 2001.

JESSE "JAY" C. GATLIN, B.S. University of Colorado-Boulder 1995; Ph.D. University of Colorado-Aurora 2005; Professor of Molecular Biology 2021, 2010.

MARK GOMELSKY, B.S. Moscow Institute of Chemical Technology 1986; M.S. 1988; Ph.D. Institute of Genetics and Selection of Industrial Microorganisms 1991; Professor of Molecular Biology 2011, 1999.

DONALD L. JARVIS, B.S. Idaho State University 1978; M.S. 1980; Ph.D. Baylor College of Medicine 1986; Professor of Molecular Biology 2000, 1998.

DANIEL L. LEVY, B.S. California Institute of Technology 2000; Ph.D. University of California San Francisco 2006; Professor of Molecular Biology 2021, 2011.

DANIEL WALL, B.A. Sonoma State University 1988; Ph.D. University of Utah 1994; Professor of Molecular Biology 2018, 2007.

CYNTHIA WEINIG, B.A. Brown University 1991; Ph.D. Indiana University 1999; Professor of Botany and Molecular Biology 2013, 2007.

Associate Professors

GRANT BOWMAN, B.S. University of Rochester 1997; Ph.D. University of Chicago 2004; Associate Professor of Molecular Biology 2019, 2012.

JASON GIGLEY, B.S. University of New Hampshire 1994; Ph.D. Dartmouth Medical School 2007; Associate Professor of Molecular Biology 2019, 2012.

PAMELA J. LANGER, B.S. Indiana University-Bloomington 1973; Ph.D. Massachusetts Institute of Technology 1980; Associate Professor of Molecular Biology 1994, 1987.

Assistant Professors

THOMAS BOOTHBY, B.S. Tulane University 2008; Ph.D. University of Maryland 2013; Assistant Professor of Molecular Biology, 2019.

EUNSOOK PARK, M.S. Seoul National University 2001; Ph.D. University of Tennessee, Knoxville 2010; Assistant Professor of Molecular Biology 2019.

TODD SCHOBORG, B.S. Murray State University 2008; Ph.D. University of Tennessee 2013; Assistant Professor of Molecular Biology, 2019.

Associate Lecturer

BRIDGET DECKER, B.S. Colorado State University 1998; Ph.D. Dartmouth College 2006; Associate Lecturer Molecular Biology, 2021, 2015.

Assistant Lecturer

KASSANDRA WILLINGHAM, B.S. University of Wyoming 2010, B.S. University of Wyoming-Casper 2017; M.S. Colorado State University 2016; Assistant Lecturer Molecular Biology 2020.

Instructional Teaching Laboratory Coordinator

HOLLY STEINKRAUS, B.A. Ripon College 1987; Ph.D. University of Wyoming 1993; Instructional Teaching Laboratory Coordinator, 2015.

Adjunct Professor

ANNE W. SYLVESTER, B.S. University of Washington 1980; M.S. 1982; Ph.D. 1987; Professor of Molecular Biology 2010, 2006.

Professors Emeritus

Dale Isaak, Randy Lewis, Nancy Petersen, Don Roth, Mark M. Stayton, Peter E. Thorsness, Jordanka Zlatanova

ELIZABETH MOORE, B.S. West Texas A&M University 2001; M.S. 2004; Assistant Lecturer of Horticulture and Plant Production 2021.

KAREN PANTER, B.S. Colorado State University 1979; M.S. University of Nebraska 1981; Ph.D. Colorado State University 1985; Extension Horticulture Specialist 1998; Senior Extension Educator 2012.

Emeritus/Retired Faculty:

Rollin H. Abernethy, Jack Cecil, James Cook, Ron Delaney, Mark Ferrell, Alan Gray, Robin W. Groose, Bernie Kolp, James M. Krall, Stephen D. Miller, Thomas D. Whitson, David Wilson

Agroecology Major

The Department of Plant Sciences offers a Bachelor of Science degree in Agroecology jointly with the Ecosystem Science and Management Department, and three minors. Minors offered by Plant Sciences include Agroecology, Horticulture, and Plant Protection. The minor in Horticulture includes courses in plant propagation, organic food production, greenhouse design and management, and introductory horticulture. The minor in Plant Protection includes courses in agronomy, plant genetics, plant pathology, and weed science. These minors allow students within many bachelors programs to obtain an added emphasis in areas that enjoy strong employment opportunities.

A B.S. degree in agroecology prepares students for careers in agriculture, natural resources, environmental and life sciences and for advanced graduate studies in specific subdisciplines within these areas. It is a broad, interdisciplinary, undergraduate

curriculum that combines and integrates courses in the crop, horticulture, disease, weeds, soil, and insect sciences and is supported by a science-based curriculum and general education. Flexibility is built into the agroecology curriculum to readily accommodate students seeking to pursue an emphasis or obtain a minor in a specific discipline. To that end the breadth of the curriculum is balanced with greater depth in biology, chemistry, crop science, entomology, environmental studies, natural resource management, soil science, plant pathology, weed science, horticulture, turf management, pre-veterinary medicine, rangeland ecology and watershed management, animal science, microbiology, and molecular biology. A liberal number of electives permits design of a program that best meets individual career and educational objectives. The agroecology program is well suited for students who possess a strong interest in, and an aptitude for, science, agriculture, the environment, life sciences, or natural resources.

The agroecology core curriculum is comprised of freshman- through senior-level courses that illustrate dynamic and complex interactions of plants, soils, and plant pests (diseases, insects, weeds) with the environment. Academic training is enhanced with experiential learning through research apprenticeships, internships, field studies, and special agroecology capstone courses. Special emphasis is given to development of critical thinking and communication skills, problem solving, and application of science. It is an interdisciplinary program designed to prepare students for "real world" situations.

Agroecology B.S. degree recipients are prepared for careers with private and public institutions and agencies in such areas as: agricultural consulting, production or sales, research, product development, education, extension education, international programs, and scientific and technological support. These careers include but are not limited to: soil scientist, conservationist, entomologist, consultant, plant scientist, integrated pest management specialist, ecologist, research associate or technician, agronomist, biotechnician, and agroecologist. Degree recipients are also prepared for graduate education in biological and environmental sciences.

The combined Plant Sciences B.S./M.S. Quickstart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in either Agroecology or Rangeland Ecology and Watershed Management and the M.S. degree in Plant Sciences. Please see additional information under the Plant Sciences Graduate Study section or online at <http://www.uwyo.edu/plantsciences/>.

Course Requirements for Agroecology Majors:

Agroecology: 22 Hrs.

AECL 1000, 3030, 4990, SOIL 2010, 4140, and 4 hrs from a combination of AECL 4920, 4930 or 4960

Supporting Science Biology/Genetics: 25-26 Hrs.

ENTO 1000 or 1001 or ANSC 1010, and AGECE 1010 or 1020 and LIFE 1010, 2023, 3400, and CHEM 1000, 2300

Math/Statistics: 7 Hrs.

MATH 1400, STAT 2050

Communications: 3 Hrs.

COJO 2010

Agriculture Science Electives: 9 Hrs.

Select 9 hours of upper division courses from those with the following course prefixes: ANSC (Animal Science), BOT (Botany), ENTO (Entomology), MICR (Microbiology), MOLB (Molecular Biology), PLNT (Plant Sciences), REWM (Rangeland Ecology and Watershed Management), or SOIL (Soil Science).

Supporting Electives: 9 Hrs.

Select 9 hours of upper division courses from those with the following course prefixes: AGEC (Agricultural Economics), AECL (Agroecology), ANSC (Animal Science), BOT (Botany), CHEM (Chemistry), COJO (Communication and Journalism), ENR (Environment and Natural Resources), ENTO (Entomology), FDSC (Food Science), GEOG (Geography), GIST (Geospatial Information Science and Technology), LIFE (Life Sciences), MICR (Microbiology), MOLB (Molecular Biology), PATB (Pathobiology), PLNT (Plant Sciences), REWM (Rangeland Ecology and Watershed Management), SOIL (Soil Science), or ZOO (Zoology and Physiology).

Additional University Studies: 12 Hrs.

Electives (minimum): 33 Hrs.

Total: 120 Hrs.

Agroecology/Environment and Natural Resources Program, B.S.

(ENR, Plant Sciences, and Ecosystem Science and Management)

Students with an especially strong interest in the environment and natural resources may choose to pursue the B.S. in Agroecology/ ENR. This degree is offered in conjunction with the Haub School of Environment and Natural Resources. See the ENR Information and Advising Guide for details.

Agroecology Minor

(Plant Sciences & Ecosystem Science and Management)

Minimum requirements: 20-21 Hrs.

AECL 1000; two of the following: SOIL 2010, LIFE 2023, AECL 3030; and 9 additional upper division hours from the following: ENTO, PLNT, and/or SOIL

Horticulture Minor

(Plant Sciences)

Minimum requirements: 16 Hrs.

PLNT 2025 and 2026, and 12 additional hours from the following: PLNT 3000, 3036, 3300, 4120, 4180, 4190, 4200, 4975

Plant Protection Minor

(Plant Sciences)

Minimum requirements: 17 Hrs.

AECL 1000, AECL 3030, and 10 additional hours from the following: PLNT 3220, 4000, 4070, and 4120

Graduate Study

The Department of Plant Sciences offers curricula leading to the master of science and doctor of philosophy degrees in Plant Sciences. Courses within the department are offered in crop science, horticulture, plant pathology, weed science, and agronomy. Interdisciplinary coursework and research projects are common for Plant Sciences graduate students.

Plant Sciences B.S./M.S. QuickStart Program

The combined Plant Sciences B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in either Agroecology or Rangeland Ecology and Watershed Management and the M.S. degree in Plant Sciences. This program allows for early planning of the M.S. portion of the student's education, along with beginning a thesis research project before the completion of the B.S. degree. It offers increased flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit hour load. Up to six credit hours may be counted toward both the B.S. and M.S. degree programs.

Admission to the program

Minimum requirements for admission to the accelerated program are:

1. completion of sophomore year, 60 credit hours,
2. a minimum overall GPA of 3.0,
3. a minimum GPA of 3.0 in AECL, PLNT, RNEW, and REWM courses,
4. a minimum of three letters of recommendation (at least two must be from faculty at UW),
5. a DPS faculty member willing to serve as M.S. advisor, and
6. a research proposal submitted to, and approved by, the student's M.S. advisor and at least one other Plant Sciences faculty member as a presumptive graduate committee member.

Transfer students must have also completed at least 15 credit hours of coursework at UW to be eligible for admission to this program.

If interested in this program, please visit our website at <http://www.uwyo.edu/plantsciences/> for further information on additional requirements.

Program Specific Admission Requirements

In addition to university minimum requirements, a majority of the department faculty and department head must approve the admission. To be considered for admission, candidates must establish a faculty member willing to serve as advisor.

In order to apply, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>): a statement of purpose that describes your professional objectives and scientific interests, a current Curriculum Vitae, current academic transcripts, TOEFL scores (if English is not your primary language), and three letters of recommendation. Our regular deadline for fall semester admission is February 15, although we will accept applications any time during the year (including for spring semester admission as well).

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information, or visit UW's Graduate Education website at <http://www.uwyo.edu/uwgrad/>.

Program Specific Graduate Assistantship Information

M.S. assistantships include a stipend, plus tuition and fee waiver, and health insurance. Ph.D. assistantships include a stipend, plus tuition and fee waiver, and health insurance. These assistantships are for the 9-month academic year, but summer support is typically available.

Program Specific Degree Requirements

Master of Science in Plant Sciences

Plan A (thesis)

Requirements for the master of science degree include 26 hours of coursework beyond the bachelor's degree numbered 4000 or above, 4 hours of thesis research, a research proposal, original research, and oral defense of the thesis.

The M.S. degree is typically completed in two years. The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

Doctoral Program

The requirements for the doctor of philosophy degree include 60 hours of coursework beyond the bachelor's degree numbered 4000 or above, 12 hours of dissertation research, a research proposal, original research, written and oral preliminary exams to be taken when most or all coursework is completed, and an oral defense of the dissertation.

Dissertations may be in a modified journal article format but must meet university formatting requirements.

The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

The student is expected to participate in the usual activities of scientific research such as attending and presenting at research seminars and professional meetings and publishing his/her research.

Department Head: Jonathan Fox

Professors:

HOLLY ERNEST, B.Sc. Cornell University 1980; M.S. Ohio State University 1982; D.V.M. 1986; Ph.D. University of California, Davis 2001; Professor of Veterinary Sciences, Wyoming Excellence Chair in Disease Ecology 2014.

JONATHAN H. FOX, B.Sc., B.VSc. University of Liverpool, UK 1993; Ph.D. Virginia Tech 2002; Associate Professor of Veterinary Sciences 2008; Professor of Veterinary Sciences 2016.

WILLIAM W. LAEGREID, B.S. Washington State University 1980; M.S. Washington State University 1984; D.V.M. Washington State University 1985; Ph.D. Washington State University 1988; Professor, Director of the Wyoming State Veterinary Laboratory 2012.

DONAL T. O'TOOLE, M.V.B. Trinity College, Dublin, Ireland 1977; Ph.D. Colorado State University 1982; Professor of Veterinary Sciences 1998, 1990.

Associate Professors:

GERARD P. ANDREWS, B.S. Pennsylvania State University 1980; M.S. University of New Hampshire 1983; Ph.D. Uniformed Services University of Health Sciences 1993; Associate Professor of Veterinary Sciences 2011, 2004.

TODD E. CORNISH, B.S. University of California-Davis 1990; D.V.M. 1994; Ph.D. University of Georgia 1999; Associate Professor of Veterinary Sciences 2005, 1999.

MYRNA M. MILLER, B.S. Colorado State University 1980; D.V.M. 1984; Ph.D. Cornell University 2005; Associate Professor of Veterinary Sciences 2016, 2010.

KERRY SONDGEROTH, B.A. University of New Hampshire 1997; D.V.M. Colorado State University 2006; Ph.D. Washington State University 2013; Assistant Professor of Veterinary Sciences 2014. Associate Professor of Veterinary Sciences 2020.

Assistant Professors:

BERIT BANGOURA, D.V.M. Leipzig University 2003; Ph.D. 2008; Ph.D. 2015; Diplomate EVPC 2014; Assistant Professor of Veterinary Sciences 2017.

JENNIFER L. MALMBERG, B.S. Doane University 2004; M.A. Chadron State University 2013; Ph.D. Colorado State University 2018; Assistant Professor of Veterinary Sciences 2019.

ELIZABETH CASE, B.S. Oklahoma State University 2002; Ph.D. University of California-Irvine 2010; Assistant Professor of Veterinary Sciences 2020.

Clinical Assistant Professor:

JACQUELINE P. KURZ, B.S. Cornell University 2006; B.V.M.&S. Royal (Dick) School of Veterinary Studies, University of Edinburgh, UK 2010; Ph.D. Utah State University 2018; Clinical Assistant Professor of Veterinary Sciences 2020.

Adjunct Professor:

GEOFFREY J. LETCHWORTH, B.S. Trinity College 1965; D.V.M. New York State College of Veterinary Medicine 1972; Ph.D. Cornell University 1980; Adjunct Professor of Veterinary Sciences 2001.

SAMANTHA ALLEN, BSc and MSc University of Guelph 2007 and 2010; DVM Ontario Veterinary College 2014; PhD University of Guelph 2021; Adjunct Professor of Veterinary Sciences 2021.

Professors Emeritus

E. Lee Belden, Francis D. Galey, Bill Jolley, Merl Raisbeck, Lynn Woodard

The Department of Veterinary Sciences and the Department of Animal Science have combined their efforts to offer B.S., M.S., and Ph.D. degrees in animal and veterinary science (see listing under this title). Several options within the major are available including preveterinary medicine and animal biology. Undergraduate course offerings of the Department of Veterinary Sciences are listed under the title of pathobiology. They were designed to familiarize students with the principles of animal disease and the basic biological and biomedical sciences.

The department operates the Wyoming State Veterinary Laboratory, an animal disease diagnostic laboratory (wyovet.uwyo.edu). This laboratory provides valuable hands-on experience for students interested in laboratory animal care, laboratory procedures, and research. Excellent faculty mentors are available for students interested in preveterinary medicine, microbiology, and animal biology.

Animal and Veterinary Sciences

The Department of Animal Science and the Department of Veterinary Sciences have combined their efforts to offer several degree options leading to the bachelor of science degree in animal and veterinary science. Courses in animal science, food science, and pathobiology are the core offerings in the various options. Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered.

Several degree options allow for specialization and graduate or professional school preparation. A brief description of each option and the educational opportunities they provide is given with the course requirements. A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, 3100, 4120, 4540, 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, 2022.

Students are encouraged to participate in activities related to their degree option. The university has livestock, horse and meats judging teams. Each team travels and participates in at least one major exposition a year. Each year, the Academic Quadrathlon competition is held, combining practical and classroom skills for students. Field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Microbiology Club, Range Club, the Pre-vet Club, Wyoming Collegiate Cattlemens Association, and the Ranch Horse Team provide additional educational and recreational opportunities.

Graduate Study

The Department of Veterinary Sciences offers advanced study leading to the master of science and doctor of philosophy in animal and veterinary science. Areas of emphasis include: pathology, molecular diagnostics, bacteriology, virology, parasitology, epidemiology, immunology, and toxicology of wild and domestic animals.

Program Specific Admission Requirements

Open to students with a bachelor of science degree who meet the requirements set forth in this Catalog.

Recommended prerequisites include: chemistry, biochemistry, animal anatomy and physiology, biology, microbiology, and introductory statistics.

Preferred Requirements

Competitive applicants for either degree program will have a GPA 3.250 or higher and high GRE scores (153 verbal, 149 quantitative, 302 total using best composite scores).

Microbiology Program: Interdepartmental major

Microbiology Program

5004 Agriculture Building, (307) 766-3139

FAX: (307) 766-3875

E-mail: gandrews@uwyo.edu

Program Director: Dr. Gerard Andrews

Microbiology is the study of life forms too small to be observed without the aid of magnification; major groups of microbes include the bacteria, fungi (yeasts and molds), protozoa, and algae, as well as the viruses. In addition, related disciplines such as immunology and molecular biology are included because of their historical origins within microbiology.

As such, the science of microbiology is divided into numerous subspecialty areas that reflect not only the individual groups of microbes (e.g., bacteriology, virology, mycology, etc.), but also their significance in applied areas (e.g., medical microbiology/infectious diseases, microbial ecology, food microbiology, industrial microbiology, biotechnology, etc.) or in areas of basic science (e.g., molecular genetics). Throughout its history, microbiology has played a key role in the development of our understanding of basic biochemical and genetic processes, control of infectious diseases, production of increased and improved food supplies, and the production of numerous commercial products. With the development of molecular techniques to construct genetically engineered microbes, microbiologists will continue to make expanding contributions in these and other areas.

Because microbiology is a diverse science, individuals trained as microbiologists find exciting career opportunities in many areas of the basic and applied sciences. Typically, microbiologists are employed in five major sectors: private industry; clinical laboratories; government agencies; universities; and various other settings such as water treatment, food production/inspection facilities, and other public health-related areas. Recent manpower assessment studies at both the national and regional levels have provided evidence for a continuing and expanding need for microbiologists such that successful undergraduate students completing this program may look forward to exciting careers. In addition, undergraduates trained in the microbiological sciences are well prepared for competitive application to graduate school programs and professional programs in human or veterinary medicine, optometry or dentistry.

The bachelor of science degree program in microbiology is organized as an interdepartmental major involving the collaborative teaching, advising, and research expertise of more than 20 microbiology faculty from the Colleges of Agriculture and Natural Resources, Arts and Sciences, and Health Sciences. The program is administered by a Program Director and the Interdepartmental Microbiology Steering Committee, representing each of the participating colleges. Students obtain their degree in the College of Agriculture and Natural Resources. Additional information about the microbiology program may be obtained at the following website address and by contacting the Program Director or one of the members of the Interdepartmental Microbiology Steering Committee listed below.

College of Arts & Sciences

113 Arts and Sciences Building

Camellia Okpodu, Dean

Phone: (307) 766-4106 FAX: (307) 766-2697

Web site: www.uwyo.edu/as

Aims and Objectives

The College of Arts and Sciences (A&S) is committed to providing a balanced education that matches cultural breadth with disciplinary depth. Students in the College of Arts and Sciences learn to address complex contemporary problems and to place them in their wider social, historical and ethical contexts. To achieve these goals, degree programs require students to develop expertise in a particular field, gain critical understanding of major areas of human knowledge and select from required courses and free electives to prepare for the challenges of the new century.

A successful student in any of the departments and programs in the College of Arts and Sciences will have an excellent foundation for professional success, graduate study, and a passion for lifelong learning.

Through hands-on research and creative projects (either on faculty projects or independently with faculty guidance and mentoring), fieldwork, internships, and study abroad, students integrate and bring coherence to their classroom learning.

Student Responsibilities

To graduate from the College of Arts and Sciences, students must satisfy all university, college, and major requirements for a given degree. These requirements apply whether the work is taken within the college or transferred from anywhere else within or outside the university (please refer to section below "Acceptance of Transfer Credit").

The college holds students responsible for knowing degree and major requirements and for completing the necessary courses. Students are also expected to know the regulations that govern the academic standards needed to continue study at the university. Students should be aware that changing majors and/or colleges may result in delays in meeting degree requirements and that requirements themselves sometimes change (see "Graduation Requirements and Procedures" section of this *Catalog*).

Academic Advising

To help plan a program of study, students are assigned an academic adviser by the department/ program of their major. Students undecided about a major are advised in the UW Advising, Career, and Exploratory Studies office (222 Knight Hall).

Students should consult regularly with their academic adviser not only for course scheduling, but also to discuss educational and career goals. Faculty and professional advisers can connect students to the many college and university resources to assist undergraduate study. Instructors are also willing to discuss concerns students may have regarding specific courses.

Changing/Declaring a Major or Minor

When ready to declare or change a major, minor, or dual/concurrent major in a department or program in the college, the appropriate form is available from the Office of the Registrar (167 Knight Hall) or the Registrar's Web page. Approval is required from the appropriate department heads/program directors. Departments/programs will assign advisors at the time of signing their approval on the form.

Programs of Study

Undergraduate Degrees

A variety of specialized concentrations are offered within many of the following degree programs. Take a look at the department sections in this *Catalog* that follow this section or the departments' Web sites. Additionally, there are several inter-college or interdisciplinary degrees/majors such as Earth System Science and the affiliated major in Environment and Natural Resources that draw courses from several disciplines. See more detailed descriptions in this *Catalog* or the University of Wyoming home page at www.uwyo.edu, click on the A-Z Directory.

Minors in Arts and Sciences

The College of Arts and Sciences offers all university students systematic studies leading to recognized academic minors. Minors are available in all academic programs in the college and in a number of interdisciplinary areas.

A&S minors have two aims: to encourage students to create a focus for their course work outside their major by coordinating their elective studies; and to enhance chances

of employment or graduate admission with a formally recognized field of study.

Minors consist of course requirements ranging from 18-24 credit hours of study, typically including significant work at the junior and senior level. A&S departments and programs offering minors and interdisciplinary degrees may have further conditions and restrictions regarding requirements in the minor. To be counted toward a minor, courses must be completed with a grade of C or better.

Students desiring a minor must notify the department in which the minor is offered. Forms for declaring a minor are available in the Office of the Registrar (167 Knight Hall) or on the Registrar's Web page. The department of the minor will assign an adviser.

For a description of the minors in A&S, see department offices or Web sites.

Minors available in the College of Arts and Sciences include:

African American and Diaspora Studies

Aging Studies

American Studies

Anthropology

Art Department

Art History

Ceramics

Drawing

Graphic Design

Metalsmithing

Museum Studies

Painting

Photography

Printmaking

College Degree Requirements- The 2015 A&S Core

Bachelor of Arts or Science Programs

Beginning fall 2015, new university and college general education curricula, the 2015 University Studies Program (USP) and the 2015 A&S Core, were implemented. Refer to the USP section of this *Catalog* for details regarding University Studies requirements.

Students who matriculate for the first time at UW or a Wyoming community college in fall 2015 or after are required to follow both the new USP and A&S Core. Students transferring from a Wyoming community college with an associate's degree and the Wyoming Core completed between May 2013 and fall 2015, may continue to complete the 2003 USP and 2003 A&S Core requirements (if there has been no interruption in their enrollment for a year or more). Students who matriculated at UW or a Wyoming community college prior to fall 2015 and choose the 2015 USP must also complete the 2015 A&S Core requirements. For additional information please refer to the sections in this *Catalog* that describe the university graduation requirements, the 2015 University Studies Program, and the policies for reenrolling at UW after an absence of a year or more.

I. College credit hour requirements

- A. **Minimum total semester hours 120**
- B. **Upper-division credit requirements (42).** Thirty of the 42 hours must be earned from UW. Courses must be taken for a letter grade unless offered for S/U only. This is an all-university requirement for all degree programs and may come from the courses that fulfill the USP, the A&S Core, the major, the minor, and electives.
- C. **Major field of study (30-60).** Credit hours in excess of 60 in the major subject may not be used to satisfy the requirement of 120 hours for graduation. Credits in AS internship, independent study or special topics courses (AS 2400, AS 2490, AS 4400, AS 4500, AS 4510, AS 4900, and AS 4975) may not be used to fulfill these outside the major requirements. At least 30 hours of C grade or better must be earned in the major subject (the major may require more). Courses in the major must be taken for a letter grade unless offered for S/U only.
- D. **A&S Core requirements (6).** Courses must be taken for a letter grade unless offered for S/U only.

All other university and college regulations apply. See "Graduation Requirements and Procedures" section of this *Catalog* for more information. Graduate level "Enrichment" courses do not count toward the requirements for a bachelor's degree.

II. 2015 A&S Core Curriculum

Graduates of the College of Arts and Sciences are expected to be liberally educated, to have the knowledge and skills to deal with the unexpected, and to see opportunities from multiple perspectives. To develop these abilities, the college faculty implemented the A&S Core.

The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

1. **U.S. Diversity (ASD).** This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.

2. **Global Awareness (ASG).** Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples of the world, including international systems of commerce, art, science, technology, politics, communication, belief, and justice, among other.

College Degree Requirements Prior to Fall 2015 for Continuing and Reenrolling Students

A&S Core requirements for a student continuing a degree program in effect at the time of matriculation at UW are found in the relevant previous *Catalog*. Contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwyo.edu.

Students who re-enter the university after an absence of a year or more should refer to other sections of this Catalog for university policies and procedures. Unless approved otherwise, reenrolling students, after a year's absence, are required to follow the University Studies and A&S Core requirements in effect the semester of their re-enrollment. However, all majors in A&S who have yet to complete the A&S Core, regardless of their initial enrollment, must refer to the current list of approved courses.

Checksheets and lists of courses that satisfy A&S college core requirements are available on the Web at www.uwyo.edu/as or in the A&S Advising Center, Ross 6, 766-4013, asadvising@uwyo.edu.

Departments and programs in the College of Arts and Sciences may require reenrolling students to complete requirements in the major that meet the current expectations of the discipline.

Transfer Students and Acceptance of Transfer Credit

The College of Arts and Sciences and its departments reserve the right to grant transfer credit toward the bachelor's degree only for those courses where a grade of C or better was earned. Students transferring credits from a university or college outside Wyoming with questions about how courses taken elsewhere fulfill the A&S Core may contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwyo.edu.

Courses Taken for S/U Credit

Students may include up to 20 semester credit hours in free electives with a grade of S as part of the total hours required by the College of Arts and Sciences for graduation. However, no S/U hours may be used to satisfy university and college core general education requirements or major requirements, including the required 42 upper-division credit hours unless the course is offered for S/U grading only.

Students registering in courses for S/U grades are subject to all general regulations.

Concurrent Majors

Students may pursue two or more majors simultaneously. With careful planning, A&S students may be able to use all or most of the free elective hours for requirements in the other majors. Refer also to the section, "Graduation Requirements and Procedures" in this *Catalog*.

The A&S Core must be met only once by students whose primary major is in the College of Arts and Sciences. Students whose degree programs are in other UW colleges are welcome to earn a concurrent major in A&S. These students do not have to meet the A&S Core requirements. The student earns one degree with one diploma.

Students pursuing a concurrent major must contact both departments involved for assignments to advisers.

Dual Degrees

Students may simultaneously pursue degrees in the same or more than one UW college. In addition to requirements described in the section "Graduation Requirements and Procedures" in this *Catalog*, students in another UW college who wish to earn a degree from A&S must also complete the A&S Core. A&S students working on dual degrees in the A&S College need to meet the A&S Core just once. A diploma is awarded for each degree.

Each additional degree requires 30 more credit hours added to the 120 credits to the primary degree. Of these 30 credits, 12 have to be at the 3XXX-4XXX levels.

Second Bachelor's Degrees

For students seeking a second bachelor's degree in the College of Arts and Sciences whose **first degree is from another university**, the minimum requirements include:

- 30 semester hours earned from the University of Wyoming, 12 of which must be upper division (3XXX-4XXX level) or graduate level (credit by examination does not count as UW hours).
- Completion of the U.S. and Wyoming Constitutions requirement (V courses in the University Studies Program course list in this *Catalog*).
- If the first degree is from an institution where English is not the predominant language, the COM1 and COM2 requirements of the University Studies Program must be completed successfully.
- Students must also meet the 2015 A&S Core requirements.

For students whose **first degree is from UW**:

- The additional required 30 hours (12 of these at the 3XXX-4XXX) are added to the degree requiring the least number of hours. For example, for a first degree A&S requires 120 hours. So the total credits a UW student would have to complete for the second bachelor's degree is a minimum of 150 credits. Since the University requires a total of 42 upper division hours for a degree, for the second degree from A&S, a UW student would need to earn a total of 54 hours at the 3XXX-4XXX level. For more information, please see the Second Bachelor's Degree entry in the section, "Graduation Requirements and Procedures" in this *Catalog*.
- Students whose **first degree is from another UW college** must meet the 2015 A&S Core requirements.
- In situations in which a student is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student's department can ask the Office of the Registrar to load selected courses into the student's record.

Concurrent Major in Environment and Natural Resources

A student majoring in any A&S department/program may earn a double major by completing the courses required for the Environment and Natural Resource (ENR) program in addition to the requirements in their A&S major and the College A&S Core. The School of ENR Web site, <http://www.uwyo.edu/enr> has detailed information, or contact the School at (307) 766-5080.

Preprofessional Studies

The College of Arts and Sciences prepares students to enter professional schools through preprofessional programs of study described below.

Prelaw Study. Students usually need a bachelor's degree prior to beginning the study of law. There is no prescribed course of undergraduate study and no restrictions as to the field in which the degree is earned. However, to prepare for this competitive profession, prelaw students are advised to select courses that help to develop those talents and skills essential to the study and practice of law. Logical and critical thinking, conflict evaluation/resolution and effective verbal/nonverbal communication skills are essential. Additionally, students should understand the political, economic, social and cultural institutions and values that characterize human society. Rigorous courses in any discipline increase abilities in these areas. Regardless of the prelaw major, courses in the broad liberal arts--the sciences, social sciences, fine arts and humanities--increase understanding of the public's diverse interests and backgrounds.

Prelaw students do not have to declare a major at the time of first enrollment if they wish to explore options. Students who are undeclared in the College of Arts & Sciences are assigned advisers in the Advising, Career, and Exploratory Studies office until they decide upon a degree program. Please note that a prelaw minor is available.

In addition to an adviser in the major, prelaw students may contact the designated UW prelaw adviser for assistance in developing a program of study, for career counseling and for guidance in applying to law schools. Contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwyo.edu for information.

Detailed information about applying to law schools, the Law School Admissions Test (LSAT) and preparation materials, and links to other web sites are at www.LSAC.org.

Library Preprofessional Study. Librarians are information professionals who research, organize, and classify materials so the public can access information. Not only do they work with printed materials, but all the technological advances in digital media such as electronic databases and eBooks. Some librarians focus on teaching the public, scholars, and students how to access and use these materials, while others concentrate on collecting and maintaining these diverse resources. Librarianship offers many career opportunities to people of different academic backgrounds, interests, and talents. Most public, academic, and special libraries require a Master's degree in library science (MLS).

The degree programs and minors in the College of Arts and Sciences offer the variety of academic preparation expected by accredited library schools in the country. Most of the graduate schools in library science require a bachelor's degree, a good undergraduate record, and a reading knowledge of a foreign language for admission. The best undergraduate preparation includes a wide range of courses in the sciences, social sciences, and humanities along with a strong concentration in one subject area. The choice of a major will be determined by the student's academic interest and professional objective. The general education that the University Studies and the A&S Core require provide the well-rounded background graduate schools expect of their MLS candidates.

Additional information about library schools, their requirements, and programs as well as career opportunities may be obtained from the reference desk at Coe Library and the Center for Advising and Career Services. The U.S. Bureau of Labor Statistics "Occupational Outlook Handbook" at www.bls.gov/ooh/ has detailed descriptions of the varied work of librarians, working conditions, employment outlook, and sources for additional information.

Pre-Health Study. Students in several A&S majors may be working toward the following careers: athletic training, chiropractic, dentistry, medicine, occupational therapy, optometry, physical therapy, physician assistant, or public health. These professional schools are favorably impressed by a broad educational background, including a substantial number of non-science and science courses; therefore, students are well advised to look beyond the minimum requirements.

Students may select any major in which they are interested to discuss preparation for such careers. In addition to completing all university, college and departmental requirements, students must include in their curriculum the basic professional school requirements, including courses in biology, chemistry, math, and physics. Professional schools have other specific requirements and students should learn about any additional recommendations from those professional schools in which they are interested. We strongly suggest contacting the Pre-Health Advising office [College of Health Sciences, 110 Health Sciences, (307) 766-3878, or hsadvise@uwyo.edu] website: www.uwyo.edu/preprof/.

Common majors in the College of A & S for these preprofessional programs include Chemistry, Biology, Botany, Psychology, and Physiology. However, there are pre-health students in programs as diverse as theatre and dance and anthropology. Students need not declare a major immediately upon first enrollment. Advisers in individual departments can discuss options or if students

wish to remain undeclared, they are advised in either the UW Advising, Career, and Exploratory Studies office or the Health Sciences Advising office.

The pre-health advisers in the College of Health Sciences have current information regarding professional school admission requirements, entrance examinations, programs in Western Interstate Commission on Higher Education (WICHE), the Wyoming Medical Contract Program WWAMI (affiliated with the University of Washington School of Medicine) and financial assistance for professional education. The website, <http://www.uwyo.edu/preprof/> includes additional information.

Internships

Many departments in the College of Arts and Sciences offer internships for academic credit, and some provide monetary compensation. Academic internships provide practical, hands-on experience in a professional job setting as a complement to classroom instruction. An internship can provide students with both insight and preparation for future jobs. All internships require a strong background in writing, organizational ability and analytic skills. Junior or senior standing is recommended.

The School of Culture, Gender, and Social Justice

African American and Diaspora Studies

108 Ross Hall, (307) 766-2481

Director: Dr. Ulrich Adelt

Web site: www.uwyo.edu/aads

Professors:

JACQUELYN BRIDGEMAN, B.A. Stanford University 1996; J.D. University of Chicago 1999; Professor of Law 2008, 2002.

DARRELL D. JACKSON, B.A. College of William and Mary 1987; J.D. George Mason University School of Law 1990; Ph.D. University of Colorado School of Education 2011; Professor of Law 2018, 2013.

TRACEY OWENS PATTON, B.A. Colorado State University 1993; M.A. 1996; Ph.D. University of Utah 2000; Professor of Communication and Journalism 2012, 2003.

Associate Professor:

ULRICH ADELDT, M.A. University of Hamburg, Germany 2000; Ph.D. University of Iowa 2007; Associate Professor of American Studies 2015, 2009.

Assistant Professor:

FREDRICK D. DIXON, B.A. Purdue University 1993; M.A. Northeastern Illinois University 2003; Ph.D. University of Illinois Urbana-Champaign 2018; Assistant Professor of African American and Diaspora Studies 2019.

Associate Academic Professional Lecturer:

MARY L. KELLER, B.A. Williams College 1987; M.A. Syracuse University 1992; Ph.D. 2002.

Lecturers:

JASCHA HERDT, B.A. University of Wyoming; M.A. 2011.

ERIC D. JOHNSON, B.A. University of Alabama 2003; MA, University of Iowa 2009; Ph.D 2021.

CHAD D. ROBINSON, B.S. Northwestern University 1992; MA, City University of New York 2006; M.S. Mercy College 2008.

The African American and Diaspora Studies Program, through an interdisciplinary course of study, examines the experiences of African Americans in the United States, in the context of Africa and its Diaspora in Europe and the Americas.

Undergraduate Studies

The population of Black America has nearly doubled in Wyoming since the year 2000. As the population becomes more diverse it is important to provide students with a background in multicultural relations so that they are prepared for the global workforce. We intend to provide students with the necessary knowledge to prepare them to participate in an increasingly interconnected world. Therefore, African American and Diaspora Studies offers a bachelor of arts (B.A.) and an undergraduate minor in African American and Diaspora Studies.

Students may access a copy of the undergraduate major and minor check sheets at www.uwyo.edu/aads/major-minor/index.html.

At present, no program for graduate degrees in African American and Diaspora Studies is offered; however, some courses may be counted at the graduate level.

Native American and Indigenous Studies

**Main Office: 117 Native American Education, Research and Culture Center,
(307) 766-6520**

**Director's Office: Native American Center,
(307) 766-6520**

Web site: www.uwyo.edu/nais/

Director: Dr. Christopher Caskey Russell

Professor:

Associate Professor:

CHRISTOPHER CASKEY RUSSELL, B.A. Western Washington University 1993, M.A. 1996; Ph.D. University of Oregon 2001.

Assistant Professor:

JESSICA F. NELSON, B.A. University of Michigan 2006; M.A. University of Arizona 2011; Ph.D. 2018; Assistant Professor of Native American and Indigenous Studies 2019.

Assistant Lecturer:

ROBYN LOPEZ, A.A. Central Wyoming College 2004; B.A. University of Wyoming 2007; M.A. University of Hawai'i at Mānoa; Assistant Lecturer of Native American and Indigenous Studies 2019.

Adjunct Faculty:

(See Catalog section following name for academic credentials.)

Pamela Innes, Anthropology
Jeffrey Means, History

Affiliated Faculty:

ANGELA JAIME, B.A. California State University, Sacramento; M.A. San Francisco State; Ph.D. Purdue University; Professor of Native American and Indigenous Studies 2019, 2004.

The Native American and Indigenous Studies offers an academic major at the undergraduate level and a minor at both the undergraduate and graduate level. This interdepartmental course of study examines Native North American cultural and social life, as well as Indigenous cultural and social life globally, including economic, political, and educational systems. Historical and contemporary perspectives of American Indian and global Indigenous experiences are included in this program.

Students may choose a NAIS studies minor to complement a major field of study. Related disciplines include American studies, anthropology, art, ethnic studies, geography, history, law, music, philosophy, political science, and sociology. A minor in Native American and Indigenous Studies provides excellent preparation for teachers, researchers, social workers, healthcare providers, resource managers, economic developers, and legal practitioners.

Gender and Women's Studies

108 Ross Hall, (307) 766-2733
FAX: (307) 766-2555
Web site: www.uwyo.edu/gwst

Director: Michelle Jarman

Professors:

CATHERINE CONNOLLY, B.S. State University College at Buffalo 1984; M.A. State University of New York at Buffalo 1989; J.D. 1991; Ph.D. 1992; Professor of Sociology and Women's Studies 2004, 1998, 1992.

COLLEEN DENNEY, B.A. Louisiana State University 1981; M.A. 1983; Ph.D. University of Minnesota 1990; Professor of Art 2005, 1990; Professor of Gender and Women's Studies 2009.

Assistant Professor:

Visiting Assistant Professors:

SAMANTHA L. VANDERMEADE, B.A., Appalachian State University, 2009; M.A., North Carolina State University, 2015; Ph.D., Arizona State University, 2020; Visiting Assistant Professor of Gender and Women's Studies 2020.

Assistant Lecturer:

ALISON QUAGGIN HARKIN, B.A. Trinity College at the University of Toronto 1981; M.A. Athabasca University 2010; Assistant Lecturer of Gender and Women's Studies 2019.

Professor Emeriti:

Susan McKay (Distinguished Professor Emeritus in Gender and Women's Studies)

Adjunct Faculty:

(see department section following name for academic credentials)

Ulrich Adelt, African American and Diaspora Studies, American Studies

Stephanie Anderson, Political Science

Cecelia Aragon, Latina/o Studies, Theatre and Dance

Christine Boggs, Elbogen Center for Teaching & Learning

Christin Covello, Gender and Women's Studies

Susan C. Frye, English

Teena Gabrielson, Political Science

Susanna Goodin, Philosophy

Cynthia Hartung, Psychology

Isadora Helfgott, History

Michelle Jarman, Disability Studies, WIND

Frieda E. Knobloch, American Studies

Renee Laegreid, History

Barbara Ellen Logan, History

Tracey Patton, African American and Diaspora Studies, Communication and Journalism

Chian Jones Ritten, Agricultural and Applied Economics

Nancy Shea, Gender and Women's Studies

Nathanial Smith, Gender and Women's Studies

Lilia Soto, American Studies, Latina/o Studies

Grant Walsh-Haines, Gender and Women's Studies

Rachel Watson, Chemistry, Director, Queer Studies

NOTE: Gender & Women's Studies is in the process of changing our course prefix to GWST (from WMST). All former WMST courses will count toward Gender & Women's Studies degree programs.

The Gender and Women's Studies Program offers an interdisciplinary course of study that examines the relevance of sex, gender and sexuality in history, societies, and cultures. Students may earn a major, minor, or graduate minor in Gender and Women's Studies, or a minor or graduate minor in Queer Studies.

Students graduating with a degree in Gender and Women's Studies will have skills to apply in a variety of settings indicated by their ability to:

- Engage in intersectional, interdisciplinary feminist analysis.
- Analyze socio-historical and contemporary power dynamics underpinning group relations, social institutions, and systems of representation.
- Situate their analyses within various place-based contexts, including the rural, local, community, transnational, and global.
- Understand and articulate the history, strategies, and goals of interconnected movements for social justice.
- Demonstrate mastery of critical thinking skills necessary to succeed in diverse, 21st century work forces and communities.

Major Requirements

For the Gender and Women's Studies major, the student must complete 30 credit hours of Gender and Women's Studies courses. All courses must be completed with a grade of "C" or better.

Core Courses (9 credit hours)

1. Introductory Course: (3 credits)

Choose ONE from: a. GWST 1080: Intro to Women's Studies or b. GWST 2000: Intro to GLBTQ/NS Studies or c. GWST 1900: Women & Leadership

2. Theory/Methods Courses (6 credits)

a. GWST 3710: Gender & Humanities *or* GWST 2500: Gender & Society **or** GWST 4210: Feminist Research Methods; and

b. GWST 4700: Feminist Theories

Free Electives: 21 credit hours.

Students may choose from our full complement of courses to complete their major requirements. We encourage students to take courses that are history-based, transnational, and those that address sexuality, ethnicity, and identity. Students have the option to do 21 hours in one of the following areas, in one or more areas, or create an independent path under consultation with the advisor. Possible areas of emphasis include: Culture and Representation; Science, the Body and Sexualities; Social Policy and Social Justice; Independent Path. (see advisor for list of offerings) As part of their 21 free elective hours students, with a minimum GPA of 3.300, have the option of pursuing internships (GWST 4970).

Gender and Women's Studies with Honors

Honors in Gender and Women's Studies recognizes academically ambitious students who have excelled in their undergraduate careers, and who are ready for graduate school and/or employment in the public or private spheres. Requirements include an overall minimum GPA of 3.500 and the completion of GWST 4965, Senior Honors Project. Students in the UW Honors College, McNair Scholars Program, or other departments that require completion of an independent research project may dovetail their honors work in GWST with those programs. For students beginning in Fall 2015, Honors in Gender and Women's Studies requires the completion of 3 semesters of foreign language or sign language, or a concentration in quantitative analysis and research methods, including statistics.

Minor Requirements

For the Gender and Women's Studies minor, students must complete 18 hours of GWST course work including one of the following core courses: GWST 1080, 1900, 2000, 3500, 3710, 4210 or 4700. A minimum of 12 hours of credit in the minor must be exclusive of hours earned in the student's major. Nine of the required hours must be 3000-level or above. All classes for the minor must be completed with a grade of "C" or better.

Minor in Queer Studies

The Queer Studies minor requires the completion of 18 hours of classes, including GWST 2000-Intro to LGBTQ/NS and nine or more credits at the 3000-level or above. Each semester, students, in consultation with a queer studies advisor, will choose elective courses. A capstone project or internship is required but can be variable and determined in consultation with an advisor.
