Mission

We honor our heritage as the state's flagship and land-grant university by providing accessible and affordable higher education of the highest quality; rigorous scholarship; the communication and application of knowledge; economic and community development; and responsible stewardship of our cultural, historical and natural resources.

In the exercise of our primary mission to promote learning, we seek to provide academic and co-curricular opportunities that will:

- Graduate students who have experienced the frontiers of scholarship and creative activity and who are prepared for the complexities of an interdependent world;
- Cultivate a community of learning energized by collaborative work among students, faculty, staff and external partners;
- Nurture an environment that values and manifests diversity, internationalization, free expression, academic freedom, personal integrity and mutual respect; and
- Promote opportunities for personal health and growth, physical health, athletic competition and leadership development for all members of the university community.

As Wyoming's only public university, we are committed to scholarship, outreach and service that extend our human talent and technological capacity to serve the people in our communities, our state, the nation and the world.

2021-2022 University Calendar

Fall 2021

August

- 18 Residence halls open - 7:00 a.m.
- 23 First day of classes; Late registration and add/drop periods begin
- 24 **1st eight-week courses only** - last day to add, change sections, or change grading options
- 26 Last day to add, change sections, or change grading options semester courses - **strictly enforced**
- 26 **1st eight-week courses only** - last day to drop

September

- 1 Tuition/Fees due in full, or first payment installment due if in payment plan (see Tuition and Fees)
- 1 Last day to drop semester courses - strictly enforced
- 1 Last day to make changes to health insurance selection
- 6 Labor Day (offices closed)
- 30 **1st eight-week courses only** - last day to withdraw

October

- 15 Midsemester
- 16 Midsemester Break - classes excused
- 18 First day of second half block (8 week courses)
- 19 **2nd eight-week courses only**- last day to drop
- 20 **2nd eight-week courses only** - last day to add, change sections, or change grading options
- 21 Midsemester grades must be loaded online (by noon)
- 25 Advising Period for Spring 2022 begins
- 27 Registration for Spring 2022 begins for continuing students

November

- 5 Last day to withdraw from individual semester courses
- 25-26 Thanksgiving Break - classes excused
- 30 **2nd eight-week courses only**- last day to withdraw

December

0003

3 Last day to work with Dean of Students office to leave all UW classes in Fall '21 and receive a grade of "W" for each class

TBD Registration for Spring 2022 for new or re-enrolling students begins

10 Last day of classes

10 Commencement

13-17 Finals Week

18 Residence halls close - 12:00 p.m.

23 Final grades must be loaded online (by 12:00 p.m.)

Notes:

Subject to change on not less than 30 days' notice unless an actual emergency arises, in which event the administration may exercise its option to make any change without notice.

Mission Statement

- University of Wyoming Non-Discrimination Statement
- University Communication Statement

ity by providing accessible and affordable higher education of the highest quality; rigorous scholarship; the communication and application of knowledge; economic and community development; and responsible stewardship of our cultural, historical and natural resources. In the exercise of our primary mission to promote learning, we seek to provide academic and co-curricular opportunities that will:

- Graduate students who have experienced the frontiers of scholarship and creative activity and who are prepared for the complexities of an interdependent world;
- Cultivate a community of learning energized by collaborative work among students, faculty, staff and external partners;
- Nurture an environment that values and manifests diversity, internationalization, free expression, academic freedom, personal integrity and mutual respect; and
- Promote opportunities for personal health and growth, physical health, athletic competition and leadership development for all members of the university community. As Wyoming's only public university, we are committed to scholarship, outreach and service that extend

our human talent and technological capacity to serve the people in our communities, our state, the nation and the world.

University of Wyoming Non-Discrimination Statement

The University is committed to equal opportunity for all persons in all facets of the University's operations and is an Equal Opportunity/ Affirmative Action Employer. The University will provide all applications for admissions, employment and all University employees with equal opportunity without regard to race, gender, religion, color, national origin, disability, age, protected veteran status, sexual orientation, gender identity, genetic information, creed, ancestry, political belief, or any other applicable protected category or participation in any protected activity. The University ensures non-discriminatory practices in all matters relating to its education programs and activities and extends the same non-discriminatory practices to recruiting, hiring, training, compensation, benefits, promotions, demotions, transfers, and all other terms and conditions of employment.

The University is also committed to complying with all of the rules, regulations, and relevant orders of the Secretary of Labor and the Office of Federal Contract Compliance Programs (OFCCP), issued pursuant to Executive Order 11246, the Vietnam Era Veterans' Readjustment Assistance Act, and Section 503 of the Rehabilitation Act of 1973, and has an audit and reporting system to facilitate compliance.

It is the continuing, active, individual responsibility of each principal Administrative Officer, Dean, Department and Division Head or Supervisor to assure that the University's Equal Employment Opportunity policy is followed when making decisions related to recruiting, hiring, training or promoting qualified persons.

For more information please see UW Regulation 1-3 (Equal Education and Equal Employment Opportunity Statement and Policy/Diversity Program).

University Communication Statement

The University of Wyoming assigned email account shall be one of the official means of communication with all students, faculty, and staff. All community members are responsible for all information sent to them via their University assigned email account. Members who choose to manually forward mail from their University email accounts are responsible for ensuring that all information, including attachments, is transmitted in its entirety to the preferred account.

All faculty, staff, and students are required to maintain an @uwo.edu computer account. This account provides both an online identification key and a University official email address. The University sends much of its correspondence solely through email. This includes, but is not limited to, policy announcements, student account billing notifications, emergency notices, meeting and event notifications, course syllabi and requirements, and correspondence between faculty, staff, and students. Such correspondence is mailed only to the University official email address.

Faculty, staff, and students are expected to check their email on a frequent and consistent basis in order to stay current with University-related communications.

Faculty, staff, and students have the responsibility to recognize that certain communications may be time-critical.

Undergraduate Admission

UW welcomes all students to apply and will consider each student based on their individual academic achievement. Admission and programs of the University of Wyoming are offered to all eligible people without regard to race, gender, religion, color, national origin, disability, age, protected veteran status, sexual orientation, gender identity, genetic information, creed, ancestry, political belief, or any other applicable protected category. The Director of Admissions, through the Provost, is responsible for the admission of students. Admission of graduate students must also be recommended by the department of an applicable graduate program.

I. Definitions

Diploma: A formal document certifying the successful completion of a prescribed program of studies.

First Time Student: A student who has no prior postsecondary experience attending any institution for the first time at the undergraduate level. There are two exceptions: (1) students who attended any institution for the first time the summer prior to

entering the University of Wyoming in the fall term and (2) students who enter UW with advanced standing (college credits earned before graduation from high school).

High School Student: A student enrolled in secondary school or pursuing a high school diploma or recognized equivalent. Includes students who have not received but are pursuing a high school diploma or recognized equivalent and taking college coursework concurrently.

High School Success Curriculum: Coursework during high school that includes successful completion of the following:

- A. Four (4) years of English;
- B. Four (4) years of math (including algebra I, II, and geometry);
- C. Four (4) years of science (including at least one year of physical science);
- D. Three (3) years of social science;
- E. Four (4) years of additional coursework including at least two (2) years of related courses taken in sequence (including fine and performing arts, career-vocational education, or foreign language).

Nationally Standardized Tests: ACT Assessment (ACT) or SAT Assessment (SAT) test results. Test results must be sent to the Admissions Office. SAT Assessment scores will be based off the Evidence-Based Reading and Writing + Math sections for exams administered in or after April 2016.

Returning Student: A student who previously attended UW but has not been enrolled for three consecutive semesters, including a summer term.

Transfer Student: A student entering the University of Wyoming for the first time but known to have previously attended a postsecondary institution at the same level (e.g., undergraduate, graduate). This includes new students enrolled in the fall term who transferred into the institution the prior summer term. The student may transfer with or without credit.

II. Undergraduate Admission Requirements

All applicants for admission under twenty-one (21) years of age or transfer students who have fewer than twelve (12) transferable semester credit hours after high school, must provide an official copy of their ACT or SAT test results. Test results must be sent to the Admissions Office.

A. First Time Students

Admission into a degree seeking program shall be based on individual academic achievement. The University seeks to admit qualified undergraduate students who are new first time students or students that are concurrently enrolled in post-secondary education classes.

To be considered for admission, prospective students must submit an application, a one-time nonrefundable application fee, official high school transcripts (or high school equivalency exam), and an official ACT or SAT test score (if the applicant is under 21) to the University's Office of Admissions.

B. Assured Admission

Assured undergraduate admission shall be granted to high school graduates who meet the following requirements:

1. A cumulative, un-weighted highschool GPA of 3.000 (on a 4.000 scale)
2. A minimum composite ACT score of 21 or SAT score of 1060; and
3. Completion of the High School Success Curriculum while attending high school.

*UW is test optional for admissions for incoming students for spring 2022, summer 2022 and fall 2022. PLEASE NOTE: check where test scores are required for scholarship consideration.

C. Admission with Support

Undergraduate admission with support shall be granted to high school graduates who meet the following requirements:

1. A cumulative, un-weighted high school GPA of 2.500-4.000 and a minimum ACT score of 17 or SAT score of 900, or 2.250-2.490 and a minimum composite ACT score of 20 or SAT score of 1020; and
2. Completion of the High School Success Curriculum with no more than two deficiencies. Both deficiencies cannot occur in the same curriculum category.

Students admitted with support are required to participate in the University's academic transition programs administered by the Learning Resource Network (LeaRN).

*UW is test optional for admissions for incoming students for spring 2022, summer 2022 and fall 2022.

D. Admission with Alternative Educational Credentials

Undergraduate applicants with General Education Development (GED) credentials or other approved alternative educational credentials (i.e., High School Equivalency Test (HiSet)) should contact the University's Office of Admissions for specific application requirements. Students under 21 years of age with GED or the approved credentials must also have a minimum ACT score of 17 or SAT score of 900.

E. Transfer Students

Transfer students with twelve (12) or more transferable hours after high school must submit an application, a one-time nonrefundable application fee, and official transcripts from each previously-attended higher education institution. Transfer students must have at least a 2.000 cumulative GPA for undergraduate admission.

Transfer students with eleven (11) or less transferable hours after high school must also submit, official high school transcripts (or approved alternative education credentials), official ACT or SAT test score (if the applicant is under 21) and official transcripts from each previously-attended higher education institution. Admissions to transfer students with eleven (11) or less transferable hours must have at least a 2.000 cumulative GPA as well as meet the assured admissions requirements for first time students.

Official transcripts must be sent directly from the institution(s) to the University's Office of Admissions. Failure to disclose all previously attended institutions will be seen as a deliberate attempt to withhold academic history and may be reason for denied admissions and/or dismissal.

F. Home Schooled Students

Home schooled students shall be considered for admissions under the same requirements as First Time students.

G. Returning Students

Students returning to the University of Wyoming after not registering for classes for three or more consecutive semesters, including a summer term will need to submit a new application, provide official transcripts from all institution(s) attended since leaving the University of Wyoming, and be in good academic standing. Failure to disclose information about all institution(s)

attended will be seen as a deliberate attempt to withhold academic history and may be reason for denied admissions and/or dismissal. Returning students must have a minimum 2.000 cumulative GPA from all undergraduate institutions.

Students suspended from the University of Wyoming must complete the reinstatement process. Academic reinstatement to the University of Wyoming does not constitute admissions to the institution. Students seeking reinstatement are required to meet admissions eligibility and criteria.

H. Holistic Alternative Admission

The University has the discretion to admit students who do not qualify under the above-described criteria.

III. International Students

Admission of international students is governed by the Admission Policy for International Students. This Policy is supplementary to the general admission policies described in this Regulation and provides for general admission standards for all international student applicants, including procedures for review and consultation with the various academic colleges and departments.

The Admission Policy for International Students shall be maintained and revised as determined by the Provost. Revisions are subject to the approval of both the Provost and the Associate Vice Provost for Enrollment Management, and shall become effective from the date of their approval.

The Admission Policy for International Students shall be published and distributed by the Office of Admissions and will be available through the Admission Office's website.

IV. High School Guests

High school students requesting admission as high school guests must submit transcripts demonstrating a cumulative high school GPA of 3.000 on a 4.000 scale (official high school transcripts must be sent directly from the high school to the Office of Admission); a written recommendation from a high school counselor or principal; and official ACT or SAT test scores, if any.

V. Non-Degree Students

The non-degree admission status is a special status that is not available to international students or students who have a suspension status at UW or another college or university.

Applicants seeking admission as non-degree undergraduate students must submit an application and a one-time nonrefundable application fee to the Office of Admissions. Under this admission status, undergraduate students may take a maximum of eight (8) credit hours per semester and cannot apply more than twelve (12) total credits taken as a non-degree student toward an undergraduate degree.

VI. Second Bachelor's Degree Students

Students who have received a bachelor's degree from the University of Wyoming and are seeking a second bachelor's degree, but have not taken coursework since graduation, must submit a new application.

Students who have received a bachelor's degree from another institution, or who graduated from the University of Wyoming and have taken courses at another institution since leaving the University, must submit an application, a one-time nonrefundable

application fee, and official transcripts from each previously-attended higher education institution. Official transcripts must be sent directly from the institution to the University's Office of Admissions.

Graduate Admission

I. Graduate Applicants

Prospective students are encouraged to consult with their respective academic department regarding the admission process before making a formal UW application.

Applicants must submit the UW graduate application and the nonrefundable application fee. One set of official transcripts must be sent directly to the UW Admissions Office from each previous collegiate institution.

Domestic applicants must have completed a bachelor's degree or equivalent from a regionally accredited institution. All applicants should have at least a 3.000 cumulative GPA (scale of 4.000).

Some graduate programs may require standardized examination scores for admission.

Applicants whose department requires the Graduate Record Examination (GRE) must request official scores be sent to the Admissions Office directly from the Educational Testing Service (ETS). Our institution code with ETS is 4855.

Some departments may require scores from the Graduate Management Admission Test (GMAT), rather than the GRE.

Letters of recommendation may also be required by some departments. Please see the academic department or program entries elsewhere in the Catalog for details about admission requirements.

Graduate applicants should contact the respective academic departments for questions concerning application status, degree program requirements, deadlines, and supplemental application materials they may require.

A. Admission Status Categories

Advanced-degree applicants may be admitted to the University of Wyoming in one of the following categories:

1. Admitted Graduate Student signifies the applicant has been accepted by the university and by a major department to work toward an advanced degree.
2. Conditional admission of a Graduate Student signifies the applicant did not meet the formal admission requirements but has sufficient potential that the university and the major department are convinced that the student will be successful as an advanced-degree candidate. Conditions are usually placed on such students in the form of performance criteria for the first one or two semesters. If the conditions of admission are not met within first two semesters, the student may be denied admission to the university graduate program and the degree program. At minimum, conditionally admitted graduate students must maintain a 3.000 GPA through their first semester. Failure to do so will result in revocation of admission. More restrictive conditions may be defined by the department.

Students admitted with graduate standing may elect to take any undergraduate or graduate courses for which they are prepared, subject to restrictions as outlined in the *University Catalog*. However, tuition will be assessed at the graduate level for all courses taken with graduate status. Admission to graduate study does not automatically make a student a candidate for an advanced degree.

Note: Students working toward a second bachelor's degree are not considered graduate students and are subject to all undergraduate regulations.

II. International Graduate Applicants

All graduate international students must also submit the following in addition to application materials required by the Academic Department.

1. Provide proof of satisfactory English ability if student's native language is not English. This can be done by providing official score reports from TOEFL or IELTS. The minimum acceptable TOEFL score is 540 (76 iBT). The minimum acceptable IELTS score is 6.5. Please note that some departments require higher TOEFL/IELTS scores than what is required by the Admissions Office.
2. Many departments may require a higher level of English proficiency than what is required by the Admissions Office.
3. Provide evidence of adequate financial resources to pay the total cost of their education. The Confidential Financial Statement for undergraduate international applicants can be found online at www.uwyo.edu/admissions/international/requirements-graduate.html. Students who are awarded a full graduate assistantship may not need to provide this documentation.

III. Graduate Non-Degree Student

1. Must complete and submit a Non-Degree Student application including a non-refundable \$50.00 application fee.
2. Transcripts are required for proof of undergraduate degree for non-degree status, and must be submitted to the Admissions Office.
3. Non-degree students may enroll in a maximum of 8 credit hours per semester (maximum of two courses). Only 12 credit hours taken in this status may be used towards a UW degree. This 12-credit hour rule may be decreased if prior courses were reserved for graduate credit as either an undergraduate or as non-degree student.
4. Admission with non-degree status is not available to international students or students on suspension.
5. Students admitted with non-degree status are assessed tuition and fees at the same tuition rate as degree-seeking students.
6. Students admitted with non-degree status do not qualify to receive financial aid.
7. Non-degree graduate students who decide to pursue a degree must apply to and be accepted by their respective graduate program and the Admissions Office.

College of Law Admission

(307) 766-5419

E-mail: lawadmis@uwyo.edu

Web site: www.uwyo.edu/law/

1. Admission to the professional curriculum of law is granted by the College of Law Admissions Committee. The College of Law reserves the right to restrict the number of entering students to a class size consistent with its facilities and its educational objectives. Additional information and requirements are provided on the College of Law website.
2. Complete the electronic University of Wyoming College of Law Application for Admission through LSAC between September 1 and April 30. Applications received by December 15 will be considered for early admission.
3. Submit the application fee online through the College of Law website or by sending a check or money order to the College of Law.
4. Applicants must have a bachelor's degree from an accredited college or university (subject to some limited exceptions).
5. Take the Law School Admission Test (LSAT) administered by the Law School Admission Council (LSAC) no later than the April administration. Beginning in 2019, the LSAT will be given ten times each year at numerous locations within and outside of the United States. Information about the test, dates, test locations and application form may be obtained from LSAC, Box 2000, Newtown, PA 18940-0998, (215) 968-1001, or on the Web at www.lsac.org.
6. Register with LSAC's Credential Assembly Service (CAS) between September and January. Registration with CAS can be completed through the LSAC website (www.lsac.org). An official transcript from each college attended must be sent

directly to CAS. It is advisable to register with CAS at the same time one registers for the LSAT. CAS prepares a report and forwards a copy to each law school to which application has been made. Applicants do not send transcripts directly to the College of Law until they are admitted. For more information about CAS, go to www.lsac.org.

7. International students must supply current TOEFL scores. Minimum scores required for admission are 600 on the written exam or 100 on the internet-based exam. International students must take the LSAT exam and register with the Law School Admissions Council (www.lsac.org). If a transcript analysis will not be provided by the LSAC for any foreign educational institutions attended, official transcripts must be provided with an English translation.

WWAMI Medical Education Program

WWAMI is a contract program between the State of Wyoming and the University of Washington School of Medicine for medical education. Admission is twofold.

1. Applicants must be certified residents of Wyoming. To be eligible for certification, the applicant or parent or guardian must be a legal resident of the State of Wyoming for five continuous years immediately prior to enrolling in the WWAMI program. The application for certification is available by June 1 at www.uwyo.edu/certwy and is due no later than October 15 of the year prior to the anticipated start date of medical school. Participants pay reduced tuition and must either pay back the money expended on their behalf plus interest or practice medicine in Wyoming for three years.
2. Applicants apply to the University of Washington School of Medicine through the usual procedures and are subject to criteria established by the University of Washington.

Information may be obtained from the College of Health Sciences, Preprofessional Advising Office, Dept. 3432, 1000 E. University Ave., Laramie, WY 82071; (307) 766-3878 or certoff@uwyo.edu.

WYDENT Dental Education Program

WYDENT is a contract program between the State of Wyoming and the University of Nebraska College of Dentistry and Creighton University School of Dentistry for dental education. Admission is twofold.

1. Applicants must be certified residents of Wyoming. To be eligible for certification, the applicant or parent or guardian must be a legal resident of the State of Wyoming for five continuous years immediately prior to enrolling in dental school. The application for certification is available by June 1 at www.uwyo.edu/certwy and is due no later than October 15 of the year prior to the anticipated start date of dental school. Participants pay reduced tuition and must either pay back the money expended on their behalf or practice dentistry in Wyoming for three years.
2. Applicants must apply to the dental schools through the usual procedures and are subject to admission criteria established by the dental schools.

Information is available from the College of Health Sciences; Preprofessional Advising Office; Dept. 3432, 1000 East University Ave; Laramie WY 82071; (307) 766-3878 or certoff@uwyo.edu.

School of Pharmacy Admission

Admission to the preprofessional pharmacy program is through the university admission process described previously.

Admission to the professional curriculum leading to the entry-level professional Doctor of Pharmacy (Pharm.D.) degree is granted by the Dean of the School of Pharmacy upon the advice of the School of Pharmacy Admissions Committee. The Pharmacy Early Assurance program grants provisional admission to the professional program to qualified freshman who meet program requirements. All preprofessional students participate in the application process. The application process requires that students apply to the School of Pharmacy using PharmCAS, for more information about PharmCAS log on to www.Pharmcas.org. Admission to the professional program is limited and competitive. For further information, contact the School of Pharmacy, Dept. 3375, 1000 E. University Ave., Laramie, WY 82071; (307) 766-6132.

Other Information

Wyoming Senior Citizen Policy

Wyoming senior citizens, age 65 and over, who have been admitted to UW may enroll in university courses on a space available basis at no cost upon presentation of evidence of age and Wyoming residence prior to the beginning of the term in which classes will be taken.

Scheduled Distance Education classes which meet minimum enrollment requirements are included in the courses available to senior citizens.

Board of Trustee Retirement Benefits

Beginning Spring 2002, official board retirees may attend University of Wyoming classes on a space available basis at no cost. To qualify for this benefit, you must be an official board retiree, 25 years of university service or age 60 with 15 years of immediately preceding university service. The spouse of an eligible retiree may receive a fifty (50) percent tuition discount and a surviving spouse may receive the employee's full tuition discount provided space is available. The spouses must contact Student Financial Services at sfs@uwyo.edu or (307) 766-6233 in order for this benefit to be applied.

Readmission

Readmission is the process for former University of Wyoming students to again be admitted to the university. Former UW students who have attended another college since their last UW enrollment must have one official transcript from each college sent directly to the UW Admissions Office. Undergraduate students who are returning to UW after an absence of one year or longer should complete an application for admission at least 30 days prior to registration, thereby allowing sufficient time to avoid delays in registration.

Academic Reinstatement: Former students who are on academic suspension at UW must petition for reinstatement through the dean of their college. A petition for reinstatement must be submitted no later than 15 days before the beginning of the semester or summer term in which the student wishes to register. A petition received after this deadline may not be processed until after the regular registration period.

Academic Renewal: An undergraduate student who returns to UW and has not completed a college course at UW, during the previous five years, will have the option of continuing his or her earlier UW cumulative GPA or commencing a new cumulative GPA under the Academic Renewal policy. Interested students must submit the Academic Renewal Application Form (which can be obtained in the Office of the Registrar) to the registrar no later than ten class days before the last day of classes of the semester in which the student returns to UW.

The entire UW transcript will remain intact. A note indicating the policy will precede the new part of the UW transcript if the student opts for academic renewal. At the discretion of the academic department in which the student is enrolled, credit hours for which the student earned the grade of C or better may be applied toward the completion of the degree requirements. The list of any departmentally approved courses must be indicated on the Academic Renewal Application Form when initially submitted to the registrar. No further changes may be requested.

A student's GPA and completed courses that were applied to a baccalaureate degree are not eligible for academic renewal.

Readmission for Military Service Members

Policy

The University of Wyoming acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies in order to perform military service. UW encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. 668.18 and the Department of Defense (DOD) Voluntary Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Student Responsibility

The student must provide oral or written notice of a uniformed service obligation to the Veterans Service Center as far in advance as possible, unless precluded by military necessity. Such notice does not need to indicate when the student will return to the university.

Tuition and Fees

A returning student must be charged the same tuition and fees in effect during the last academic year the student attended, unless veteran's education benefits or other service member education benefits will pay the amount in excess. For subsequent academic years, the returning student may not be charged tuition and fees in excess of what other students in the program are charged.

Readmission Requirements

A returning student will be permitted to reenroll in the next semester scheduled in the same academic program, unless the student requests a later date of reenrollment or agrees to a different program. A returning student will be readmitted into the same academic program the student was enrolled in prior to the military service or the student requests admission to a different program.

If the university determines that a returning student is not prepared to resume the program or is unable to complete the program, the university must make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student. If such efforts are unsuccessful or place an undue hardship on the university, the university is not required to readmit the student.

In accordance with federal regulations, returning student who receive a dishonorable or bad conduct discharge from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission under this policy. However, service members who receive dishonorable or bad conduct discharge may remain eligible for readmission even though they will not be entitled to the benefits outlined in this policy.

Residency Student Classification

The following Trustee regulations govern the classification of students at the University of Wyoming as resident or non-resident for tuition purposes, and shall be administered by the Associate Vice President for Enrollment Management and Registrar. (Trustee Regulation, Chapter VIII, Section 3.) See the University Regulations online for the most up-to-date version.

Student Classification for Tuition Assessment

Residing in Wyoming primarily as a student will not support a claim for resident status for tuition purposes. Qualifying for residency for tuition purposes at the University of Wyoming differs from what is normally required to be a "resident" of the State of Wyoming. A person may be considered a "resident" of Wyoming and still be a Non-Resident for tuition purposes at the University of Wyoming.

The governing regulation for residency classification for tuition and fee purposes, as approved by the University of Wyoming Board of Trustees, is UW Regulation 2-200. See the University Regulations online for the most up-to-date version.

Process

The University of Wyoming will determine the initial classification of resident or nonresident status for tuition purposes. Students classified as nonresidents who feel they meet residency requirements may apply to change their status through a form approved by the Office of the Registrar.

If a student classified as an out-of-state resident for tuition purposes wishes to petition their residency status at the University of Wyoming, they will need to conclusively demonstrate they have established a permanent home in Wyoming. Students must submit the Petition for Residency for Tuition Purposes, along with all specified relevant, appropriate, and verifiable documentation to the Office of the Registrar. The deadline for submission is no later than 5 p.m. of the first day of classes for the semester the student wishes to petition, based off of the University's academic calendar. The student bears the burden of providing documentation to show a permanent home has been established in Wyoming based on the required criteria of UW Regulation 8-1(III)(B)(8). See the University Regulations online for the most up-to-date version.

The Registrar or designee will evaluate the student's petition and documentation to determine whether the student has established a permanent home in Wyoming based on the requirements set forth in UW Regulation 8-1(III)(B)(8) or met any other residency criteria in UW Regulation 8-1. See the University Regulations online for the most up-to-date version. If a student subsequently meets the criteria of being a resident for tuition purposes, the student's residency status will be reclassified by the Office of the Registrar and the resident tuition rate will become effective the semester the student submitted the petition. Under no circumstances will any tuition or fee adjustments be retroactively applied to previous semesters.

If a student's petition is denied, the student will be notified in writing of the denial.

Appealing the Registrar's Decision

If a student has a petition denied by the Registrar, the student may appeal the decision by submitting the Denied Residency Petition Appeal form to the Office of the Registrar within ten (10) calendar days of the original decision by the Registrar or designee.

The Residency Classification Committee will receive the student's Denied Residency Petition Appeal form, the written decision of the Registrar, and the student's previously-submitted petition and documentation which were submitted to the Registrar prior to the submission deadline for that semester. The Residency Classification Committee will determine if an error was made by the Registrar and will make a decision to affirm or reverse the classification decision of the Registrar. The decision of the Residency Classification Committee is final and there is no further level of appeal for that semester.

Measles, Mumps, Rubella (MMR)

Immunization Requirement

The University of Wyoming has implemented a policy to protect the University community against measles (rubeola), mumps, and rubella. All new on-campus students must provide proof of immunity to measles, mumps, and rubella prior to registration. Two doses of MMR vaccine (or equivalent) are required. The MMR immunizations dates are to be entered into the Student Health Service Patient Portal (on the Student Health Service's webpage, <http://www.uwyo.edu/shser/>). Incoming students will use their UW user names and passwords to enter the Patient Portal, and click on Immunizations. Once the immunization dates are entered, students will upload a verified immunization record into the Patient Portal.

The only contraindication to the MMR immunization is a previous severe allergic reaction to the vaccine or vaccine component (neomycin, gelatin). Relative (temporary) contraindications include: pregnancy; persons with immunosuppressive illnesses or treatment; moderate or severe acute illness; and recent receipt of blood products. If you are uncertain as to whether you should receive the immunization, please talk with your health care clinician.

Exemptions may be granted to the requirement in two instances: a medical exemption for a contraindication noted above, and a religious exemption. A medical exemption requires completion of the Medical Exemption Form with a notation of the reason for the exemption and a medical clinician signature. To request a religious exemption, a notarized form must be completed and submitted. Exemption forms can be found on the Student Health Service website (www.uwyo.edu/shser), and the original form must be submitted. If an outbreak of one of these illnesses occurs on campus, students granted an exemption may be excluded from campus for the duration of the outbreak.

For students unable to verify MMR vaccinations, the vaccine is available at the Student Health Service for a nominal charge. It will be administered prior to registration for any eligible student, without an appointment, during office hours. Do not wait until registration to comply with the MMR immunization requirement, as this will delay the process.

In addition to the MMR requirement, international students are required to undergo tuberculosis screening prior to registration. Based on screening, a tuberculosis (Mantoux) skin test or (IGRA) blood test may be performed, and, if positive, a chest x-ray obtained with consultation with a Student Health Service physician. The student is responsible for the costs incurred for these tests.

Campus Safety

The University of Wyoming Police Department (UWPD) provides comprehensive law enforcement and security services to all components of the University including the academic campus, and other properties owned or controlled by the University. The University Police Officers are commissioned under Wyoming State Statute and have the full range of police authorities granted any peace officer including power to arrest, on property owned by or under the control of the University of Wyoming, including adjacent public streets and sidewalks. University Security Officers work closely with our police officers in constantly patrolling University properties and assisting employees and visitors in accessing University facilities. The UWPD operates 24 hours a day, 365 days a year, and is located at 1426 East Flint, Laramie, Wyoming 82071.

Campus safety is the responsibility of all members of the university community. Faculty/staff, students, and guests are encouraged to report crimes and other concerning behavior or observations promptly. The Dean of Students Office, Student Conduct, The STOP Violence Program, and the Office of Diversity and Employment Practices are available to provide further information.

A full description of campus safety, crime statistics, and educational programs designed to increase safety on campus is available in the 2014 Annual Security and Fire Safety Report of the University of Wyoming. To access the report, go to www.uwyo.edu/uwpd/_files/2015uwsecurityreport.pdf.

Degree Programs

College of Agriculture & Natural Resources

151 Agriculture Building

Barbara Rasco, Dean

Phone: (307)766-4135 Fax: (307)766-4030

Web site: www.uwyo.edu/uwag

The College of Agriculture and Natural Resources offers a wide variety of course work in agriculture, natural resources, molecular biology, and family and consumer sciences. The curriculum provides a sound background in basic sciences and the choice of a number of fields in which to specialize. Students are trained in principles which apply throughout the world, with special emphasis on agriculture and natural resources found in the Rocky Mountain region.

Laboratory work and other experiential learning opportunities are stressed in all programs. Students receive excellent training from case studies and practical experience provided at research and extension centers. Other facilities include modern laboratories and classrooms, an abattoir, meat processing rooms, livestock and crop farms and greenhouses.

In addition to the academic departments, the college includes the Agricultural Experiment Station and the UW Extension. Materials and techniques resulting from this effective triple combination benefit students in the never-ending search for problem-solving information. The close relationship between teachers, researchers, and extension educators creates a learning atmosphere that encourages the development of the finest students.

Programs of Study

Undergraduate Degrees

Bachelor of Science

- Agricultural business
- Agricultural communications
- Agroecology
- Animal and veterinary science
- Microbiology
- Molecular biology
- Rangeland ecology and watershed management

Bachelor of Science in Family and Consumer Sciences

Graduate Degrees

Master of Arts

Molecular biology

Master of Science

- Agricultural and applied economics
- Agricultural economics/water resources

Animal and veterinary sciences
 Entomology
 Entomology/water resources
 Family and consumer sciences
 Food science and human nutrition
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Rangeland ecology and watershed management/water resources
 Reproductive biology
 Soil science
 Soil science/water resources

Doctor of Philosophy

Animal and veterinary science

Biomedical Sciences
 Entomology
 Molecular and cellular life sciences
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Reproductive biology
 Soil science

The following certificates and/or degrees in the College of Agriculture and Natural Resources are available through Distance Education:

Certificate: Early Childhood Program Director
 Online bachelor's degrees: Family and Consumer Sciences (Professional Child Development Option)

For more information, contact the College of Agriculture and Natural Resources Office of Academic and Student Programs. Phone: (307)-766-4135

The College of Agriculture and Natural Resources also offers a graduate certificate in reclamation and restoration ecology. For more information, contact the Department of Ecosystem Science and Management.

Basic Education Core

All undergraduates in the College of Agriculture and Natural Resources curriculums are required to follow the basic education core as noted below.

Core Components (USP 2015).....Hrs.

- First-Year Seminar (FYS).....3
- Quantitative Reasoning (Q)3
- Communication 1 (COM1).....3
- Communication 2 (COM2).....3

Communication 3 (COM3).....3

Human Culture (H)6

Physical & Natural World (PN).....6

U.S. and Wyoming Constitutions (V).....3

Subtotal (min. core requirements) 30

Hours for major, support areas and electives as determined by division... 90-98

Total Hours 120-128

Core Components (USP 2003)

Core Components (USP 2003) Hrs.

Intellectual Community (I) 1-3

Writing 1 (WA)3

Oral Communication (O).....3

Quantitative Reasoning 1 (QA)*3

Quantitative Reasoning 2 (QB).....3

Science (S, SB, SP, SE).....4-8

Cultural Context (C, CH, CS, CA).....9

U.S. and Wyoming Constitutions (V).....3

Physical Activity and Health (P).....1

Subtotal (min. core requirements) 30-36 Hours for major, support areas and electives as determined by division....79-91

Total Hours 120-128

*Core Components are mutually exclusive of each other; hence, two core components may not be fulfilled by the same course. Except for the QA, core courses may have topics from the embeddable components list included in their curriculum, where appropriate.

Courses taken for S/U

A maximum of 20 elective hours with a grade of S (satisfactory) may be included as part of the total credit requirements for graduation; but no S/U hours may be used to satisfy university, major requirements or required electives, unless the course is offered for S/U grading only.

Minors in Agriculture and Natural Resources

Minors provide a formalized recognition of concentrated study in a specific subject area. A minor offers recognition for academic achievement outside of the students' major course curriculum and gives students a focus of work in the chosen minor area. A minors program can enable students to enhance and expand career opportunities. A minor will also improve the possibility of admission to graduate programs in any chosen major, minor, or related field of study.

Minors Available in the College of Agriculture and Natural Resources Include:

Agricultural business
 Agroecology
 Animal and veterinary science
 Apparel design
 Equine
 Farm and ranch management
 Forest resources
 General agricultural economics
 Horticulture
 Human development and family sciences
 Human nutrition
 Insect biology
 Interior design
 International agricultural economics
 Molecular biology
 Natural resource economics
 Plant protection
 Rangeland ecology and watershed management
 Reclamation and restoration ecology
 Soil science

Agricultural Communications Major

A wide variety of courses in agriculture, communications, and journalism provides students with basic preparation for positions as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio and television stations, and commercial businesses. Communication skills are also distinct assets in agricultural sales, research, service and teaching. Students enrolled in agricultural courses acquire up-to-date and knowledgeable backgrounds of the subject matter. Courses in communication and journalism develop proficiencies demanded by employers of communication professionals.

Minimum Requirements for Agricultural Communications Majors (B.S.)

Hrs.

University Studies Program requirements..... 30
 Communications/journalism core..... 24

COJO 1000, 1040, 2010, 2100 and minimum of 12 hours of communication/journalism elective. (Minimum grade of C required)

Agriculture core requirements..... 42

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 24 hours must be upper division (Ag 3000-4000) elective courses and include AGRI 4975.

Supporting course requirement4

STAT 2050 or 2070

Additional hours for major and electives 20

Total Hrs: 120

Students wishing to pursue an agricultural communications degree are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work. Agricultural communications majors may also complete an internship in their field. A variety of opportunities are available and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Bachelor of Applied Science

160 Agriculture Building

Awarded by the College of Agriculture and Natural Resources

Phone: (307)766-4034 Fax: (307)766-4030; Web site: www.uwyo.edu/basa/

Organizations need leaders at all levels who can effectively understand the environment and society in which they operate; analyze situations and solve problems; supervise and manage, interact and communicate appropriately within and outside the organization; anticipate changes; and plan for the future. The Bachelor of Applied Science degree (B.A.S.) is designed for individuals with a completed Associate of Applied Science, Associate of Science, Associate of Business or an Associate of Arts degree at a Wyoming Community College (or an equivalent degree at another accredited institution) and who need or desire the additional breadth in skills, knowledge and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

The fundamental philosophy of the B.A.S. degree is that the student must complete the general education (University Studies Program - USP) requirements expected of all UW bachelor's degrees and must engage in upperdivision coursework sufficient to provide focus and depth of learning. Following this philosophy, the B.A.S. has four basic components. These components are university studies, career specialty, professional concentration, and electives. The fundamental elements of the baccalaureate degree are provided by the general education core (USP) and the upper division professional concentration. At the end of the program, students are expected to meet the following Student Learning Outcomes:

1. to develop proficiency in accessing, evaluating and utilizing information, ideas, and data;
2. to develop proficiency in communicating information and ideas effectively and responsibly;
3. to gain an appreciation for leadership development as a tool for individual, organization and community problem solving;
4. to demonstrate an understanding of organizational design, behavior, ethical practices, and effective managerial and supervisory practices;
5. to gain an understanding of social, cultural, economic and environmental contexts essential for effective leadership and the management of change.

The University Studies Program (USP 2015) consists of a minimum of 27 credit hours as adopted by the UW faculty, and the Articulation Agreement between UW and the Wyoming Community Colleges. Students with an Associate of Applied Science degree from a Wyoming community college will normally matriculate with 15-20 hours of credit that count toward this

component. The remainder may be required as part of a UW student's coursework, including the Professional Concentration or Electives coursework.

The Career Specialty Component is fulfilled with the Associate of Applied Science, the Associate of Science, or Associate of Arts degrees. This component will consist of a minimum of 40 credit hours in the major.

The Professional Concentration Component is the advanced component of the program and the courses are selected by the student and the advisor. All students are required to take a range of courses from the prescribed set of areas of concentration within this component in order to provide them with the breadth and depth of learning necessary for a baccalaureate degree. This component will consist of 36-40 upper division or articulated equivalent credit hours. Note: Within the Professional Concentration, students have a choice between two Organizational Leadership areas. Option A focuses on Community Leadership; Option B focuses on Business Leadership.

The Elective Component will consist of the number of credit hours needed (after completing the other three components) to complete the degree components. A minimum of 120 hours is required for the B.A.S.

All University of Wyoming Students must earn a total of 42 upper division hours (at least 30 hours taken from UW), to earn their degree. Students in the B.A.S. program must earn a "C" in all courses on the B.A.S. checklist. Failure to do so will require repeating the course. Per university regulations, students may only attempt a course three times; an "F" or "W" count as attempts.

Application Process

All students must apply to the Bachelor of Applied Science program, including those who would like to change their major to the B.A.S. in Organizational Leadership. Students cannot just fill out a change of major form and have Admissions change their status. These are the steps for application:

1. Apply to the University of Wyoming through Admissions, declaring the Bachelor of Applied Science in Organizational Leadership.
2. Have official transcripts from all institutions attended sent to Admissions.
3. Email BAS@uwyo.edu when you have received your acceptance to UW. Include your W# in the message. We can then track your files to evaluate them for the BAS program.
4. Students will receive a letter telling the application decision. If a student is denied admission to the BAS, an explanation for the denial will be provided. If accepted, the student will be given information for how to work with the program advisor, Rosalind Grenfell (rgrenfel@uwyo.edu), to enroll in classes.

Major

Agricultural Business, B.S.

The Department of Agricultural and Applied Economics offers three options within the agricultural business bachelor of science degree program. They are agribusiness management, farm and ranch management, and livestock business management. All three options focus on the development of critical thinking, research, and communication skills for students interested in

1. agricultural operations,
2. small rural businesses
3. community economics,
4. financial institutions,
5. agricultural and natural resources development, and
6. other pursuits where applied economic tools will be useful.

The agricultural business curriculum is designed to enable our students to:

1. communicate effectively economic, agricultural, business decision-making and natural resource concepts,

2. fit into a business, agency, or academic environment and use economic concepts to quantify and analyze relevant issues, and
3. be familiar with issues related to agriculture, natural resources, and rural communities.

Options

A brief description of minimum course requirements for each of the four options in agricultural business is given below. In addition, professional advisers will work with students to tailor a curriculum to individual interests and goals.

- Agricultural Business, Agribusiness Management Option, B.S.
- Agricultural Business, Farm and Ranch Management Option, B.S.
- Agricultural Business, Livestock Business Management Option, B.S.

Environment and Natural Resources

Students interested in natural resource or environmental issues or careers may complete any of the four options within agricultural business offered by the department with an environment and natural resource emphasis. Inquiries about environment and natural resource concentrations in agricultural business should be directed to the Department of Agricultural and Applied Economics.

Agricultural Communications, B.S.

A wide variety of courses in agriculture, communications, and journalism provides students with basic preparation for positions as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio and television stations, and commercial businesses. Communication skills are also distinct assets in agricultural sales, research, service and teaching.

Students enrolled in agricultural courses acquire up-to-date and knowledgeable back-grounds of the subject matter. Courses in communication and journalism develop proficiencies demanded by employers of communication professionals.

Students wishing to pursue an area of emphasis in the agricultural communications option are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work.

Agricultural communication majors may also complete an internship in their field. A variety of opportunities are available and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Minimum Requirements

University Studies Program Requirements: 30 Hours

Communications/Journalism Core: 24 Hours

- COJO1000 - Introduction to Mass Media Credits: 3
 - COJO1040 - Introduction to Human Communication Credits: 3
 - COJO2010 - Public Speaking Credits: 3
 - COJO2100 - Media Writing Credits: 3
- AND
- Minimum of 12 hours of communication/journalism elective. (Minimum grade of C required)

Agriculture Core Requirements: 42 Hours

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 24 hours must be upper division (Ag 3000-4000) elective courses and include

- AGRI4975 - Agricultural Communications Senior Project Credits: 1

Supporting Course Requirement: 4 Hours

- STAT2050 - Fundamentals of Statistics Credits: 4
OR
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Additional Hours for Major and Electives: 20 Hours

Total Hours: 120

Agroecology, B.S.

The Department of Plant Sciences offers a Bachelor of Science degree in Agroecology jointly with the Ecosystem Science and Management Department, and three minors. Minors offered by Plant Sciences include Agroecology, Horticulture, and Plant Protection. The minor in Horticulture includes courses in plant propagation, organic food production, greenhouse design and management, and introductory horticulture. The minor in Plant Protection includes courses in agronomy, plant genetics, plant pathology, and weed science. These minors allow students within many bachelors programs to obtain an added emphasis in areas that enjoy strong employment opportunities.

A B.S. degree in agroecology prepares students for careers in agriculture, natural resources, environmental and life sciences and for advanced graduate studies in specific subdisciplines within these areas. It is a broad, interdisciplinary, undergraduate curriculum that combines and integrates courses in the crop, horticulture, disease, weeds, soil, and insect sciences and is supported by a science-based curriculum and general education. Flexibility is built into the agroecology curriculum to readily accommodate students seeking to pursue an emphasis or obtain a minor in a specific discipline. To that end the breadth of the curriculum is balanced with greater depth in biology, chemistry, crop science, entomology, environmental studies, natural resource management, soil science, plant pathology, weed science, horticulture, turf management, pre-veterinary medicine, rangeland ecology and watershed management, animal science, microbiology, and molecular biology. A liberal number of electives permits design of a program that best meets individual career and educational objectives. The agroecology program is well suited for students who possess a strong interest in, and an aptitude for, science, agriculture, the environment, life sciences, or natural resources.

The agroecology core curriculum is comprised of freshman- through senior-level courses that illustrate dynamic and complex interactions of plants, soils, and plant pests (diseases, insects, weeds) with the environment. Academic training is enhanced with experiential learning through research apprenticeships, internships, field studies, and special agroecology capstone courses. Special emphasis is given to development of critical thinking and communication skills, problem solving, and application of science. It is an interdisciplinary program designed to prepare students for "real world" situations.

Agroecology B.S. degree recipients are prepared for careers with private and public institutions and agencies in such areas as: agricultural consulting, production or sales, research, product development, education, extension education, international programs, and scientific and technological support. These careers include but are not limited to: soil scientist, conservationist, entomologist, consultant, plant scientist, integrated pest management specialist, ecologist, research associate or technician, agronomist, biotechnician, and agroecologist. Degree recipients are also prepared for graduate education in biological and environmental sciences.

The combined Plant Sciences B.S./M.S. Quickstart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in either Agroecology or Rangeland Ecology and Watershed Management and the M.S. degree in Plant Sciences. Please see additional information under the Plant Sciences Graduate Study section or online at <http://www.uwyo.edu/plantsciences/>.

Course Requirements

Agroecology: 22 Hours

- AECL1000 - Agroecology Credits: 4
- AECL3030 - Ecological Web: Ecology of Plant Protection Credits: 3
- AECL4990 - Agroecology Seminar Credits: 3
- SOIL2010 - Introduction to Soil Science Credits: 4
- SOIL4140 - Soil Microbiology Credits: 4

4 Hours From a Combination of:

- AECL4920 - Topics in Agroecology: Research Apprenticeship Credits: 1-2
- AECL4930 - Internship in Agroecology Credits: 1-3
- AECL4960 - Agroecology Field Studies Credits: 2

Supporting Science Biology/Genetics: 25-26 Hours

- ENTO1000 - Insect Biology Credits: 3
- **OR**
- ENTO1001 - Insect Biology Credits: 3
- **OR**
- ANSC1010 - Introduction to Animal Science Credits: 4

- AGECE1010 - Principles of Macroeconomics Credits: 3
- **OR**
- AGECE1020 - Principles of Microeconomics Credits: 3

- LIFE1010 - General Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- LIFE3400 - General Ecology Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4

Math/Statistics: 7 Hours

- MATH1400 - College Algebra Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4

Communications: 3 Hours

- COMM2010 - Public Speaking Credits: 3

Agriculture Science Electives: 9 Hours

Select 9 hours of upper division courses from those with the following course prefixes:

- ANSC (Animal Science)
- BOT (Botany)
- ENTO (Entomology)
- MICR (Microbiology)
- MOLB (Molecular Biology)
- PLNT (Plant Sciences)
- REWM (Rangeland Ecology and Watershed Management)
- SOIL (Soil Science)

Supporting Electives: 9 Hours

Select 9 hours of upper division courses from those with the following course prefixes:

- AGECE (Agricultural Economics)
- AECL (Agroecology)
- ANSC (Animal Science)
- BOT (Botany)
- CHEM (Chemistry)
- COJO (Communication and Journalism)
- ENR (Environment and Natural Resources)
- ENTO (Entomology)
- FDSC (Food Science)
- GEOG (Geography)
- GIST (Geospatial Information Science and Technology)
- LIFE (Life Sciences)
- MICR (Microbiology)
- MOLB (Molecular Biology)
- PATB (Pathobiology)
- PLNT (Plant Sciences)
- REWM (Rangeland Ecology and Watershed Management)
- SOIL (Soil Science)
- ZOO (Zoology and Physiology).

Additional

- Additional University Studies Credits: 12
- Electives (minimum) Credits: 33

Total: 120 Hours

Agroecology/Environment and Natural Resources Program, B.S.

(ENR, Plant Sciences, and Ecosystem Science and Management)

Students with an especially strong interest in the environment and natural resources may choose to pursue the B.S. in Agroecology/ENR. This degree is offered in conjunction with the Haub School of Environment and Natural Resources. See the ENR Information and Advising Guide for details.

Animal and Veterinary Science, B.S.

The Department of Animal Science and the Department of Veterinary Sciences have combined their efforts to offer several degree options leading to the bachelor of science degree in animal and veterinary science. Courses in animal science, food science, and pathobiology are the core offerings in the various options.

Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered.

Several degree options allow for specialization and graduate or professional school preparation. A brief description of each option and the educational opportunities they provide is given with the course requirements.

A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, ANSC 3100, ANSC 4120, ANSC 4540, ANSC 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, LIFE 2022.

Students are encouraged to participate in activities related to their degree option. The university has livestock, horse and meats judging teams. Each team travels and participates in at least one major exposition a year. Each year, the Academic Quadrathlon competition is held, combining practical and classroom skills for students. Field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Microbiology Club, Range Club, the Pre-vet Club, Wyoming Collegiate Cattlemens Association, and the Ranch Horse Team provide additional educational and recreational opportunities.

Options

- Animal and Veterinary Science, Production Option, B.S.
- Animal and Veterinary Science, Range Livestock Option, B.S.
- Animal and Veterinary Science, Business Option, B.S.
- Animal and Veterinary Science, Communication Option, B.S.
- Animal and Veterinary Science, Animal Biology Option, B.S.
- Animal and Veterinary Science, Meat Science and Food Technology Option, B.S.
- Animal and Veterinary Science, Pre-Veterinary Medicine Option, B.S.
- Animal and Veterinary Science, Equine Science Option, B.S.

Animal and Veterinary Science, Communication Option, B.S.

Students in this option obtain a basic education in animal and veterinary science and also acquire in-depth communication skills. Students interested in careers in agriculture communications with emphasis on the livestock industry should enroll in this option.

Animal and Veterinary Science

Required Courses:

- ANSC1010 - Introduction to Animal Science Credits: 4
- ANSC2020 - Feeds and Feeding Credits: 4
- ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals Credits: 4 *
- ANSC3100 - Principles of Animal Nutrition Credits: 3 *
- ANSC4120 - Principles of Mammalian Reproduction Credits: 3 *
- ANSC4540 - Principles of Animal Breeding Credits: 3 *
- ANSC4630 - Topics and Issues in Animal Science Credits: 3 * (COM3)

And Two Courses Selected From

- ANSC3150 - Equine Nutrition and Physiology Credits: 3
- ANSC4220 - Advanced Beef Production and Management Credits: 3
- ANSC4230 - Advanced Sheep Production & Management Credits: 3
- ANSC4240 - Advanced Swine Production and Management Credits: 3
- OR
- ANSC4250 - Advanced Equine Production and Management Credits: 3
- PATB4110 - Diseases of Food Animals Credits: 3 *

Communication

Required Courses:

- COMM2010 - Public Speaking Credits: 3 * (COM2)
- Plus 14 additional credit hours in COJO

Agricultural Sciences

Required Courses:

- FDSC3060 - Principles of Meat Science and Muscle Biology Credits: 3 *

Other Math/Science Courses

Required Courses:

- LIFE1010 - General Biology Credits: 4 * (PN)
- LIFE2022 - Animal Biology Credits: 4 *
- LIFE3050 - Genetics Credits: 4
- CHEM1000 - Introductory Chemistry Credits: 4 (PN)

- ANSC2010 - Domestic Animal Metabolism Credits: 3

OR

- CHEM2300 - Introductory Organic Chemistry Credits: 4
- MATH1400 - College Algebra Credits: 3 (Q)
- STAT2050 - Fundamentals of Statistics Credits: 4

OR

- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Other Communication Course

- ENGL1010 - College Composition and Rhetoric Credits: 3 * (COM1)

Other University Studies Courses

- First-Year Seminar* (FYS)
- 2 courses in Human Culture (H)
- U.S. and Wyoming Constitutions (V)

Required Credits: 128

*A grade of C or better must be earned in these courses for successful completion of degree.

**Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Animal and Veterinary Science, Meat Science and Food Technology Option, B.S.

Students taking this option will have an excellent background for entering the meat industry. The food industry is the largest employer in this country and offers a wide variety of career opportunities.

Animal and Veterinary Science

Required Courses:

- ANSC1010 - Introduction to Animal Science Credits: 4
- ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals Credits: 4 *
- ANSC3100 - Principles of Animal Nutrition Credits: 3 *
- ANSC4050 - Animal Growth and Development Credits: 3
- ANSC4630 - Topics and Issues in Animal Science Credits: 3 * (COM3)
- PATB4110 - Diseases of Food Animals Credits: 3 *

Food Science

Required Courses:

- FDSC1410 - Food and Our Well Being Credits: 3
- FDSC2040 - Principles of Meat Animal Evaluation Credits: 3
- FDSC3060 - Principles of Meat Science and Muscle Biology Credits: 3 *
- FDSC3062 - Carcass Fabrication Credits: 2
- FDSC3063 - Meat Processing Credits: 2
- FDSC4090 - Food Microbiology Credits: 3 *
- FDSC4100 - Laboratory Techniques in Food Microbiology Credits: 1
- FDSC 4720 *
- FDSC4900 - Food Safety Credits: 3 *

Agricultural Sciences

Required Courses:

- AGE1020 - Principles of Microeconomics Credits: 3
- AGE3860 - World Food, Ag, & Development Credits: 3
- MICR2021 - General Microbiology Credits: 4
- OR**
- MOLB2021 - General Microbiology Credits: 4

Other Math/Science Courses

Required Courses:

- LIFE1010 - General Biology Credits: 4 * (PN)
- LIFE2022 - Animal Biology Credits: 4 *
- CHEM1000 - Introductory Chemistry Credits: 4 (PN)
- ANSC2010 - Domestic Animal Metabolism Credits: 3
- OR**
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- MATH1400 - College Algebra Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Other Communication Courses

- ENGL1010 - College Composition and Rhetoric Credits: 3
- a COM2 * course

Other University Studies Courses

- First-Year Seminar* (FYS)
- U.S. and Wyoming Constitutions (V)

Suggested courses

- FDSC3061 - Livestock Slaughter Practicum Credits: 1
- FCSC1141 - Principles of Nutrition Credits: 3
- AGECE1010 - Principles of Macroeconomics Credits: 3
- AGECE1020 - Principles of Microeconomics Credits: 3

Required Credits: 128

*A grade of C or better must be earned in these courses for successful completion of degree.

**Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Design, Merchandising, and Textiles: Apparel Design and Product Development Career Track

Design, Merchandising, and Textiles is a diverse and competitive field in which individuals plan, provide, and promote apparel, interiors, and related goods desired by the consumer. The Apparel Design and Product Development career track allows students to develop the technical and creative skills necessary for the creation of textile products from concept to finished product. Throughout coursework, concepts of sustainable design and manufacturing, as well as the influence of design on well-being will be highlighted. Students will take a series of Design, Merchandising, and Textiles program core classes to gain experience with all three tracks. Students will be prepared for careers ranging from small business in Wyoming and rural areas of the West, to the highly competitive, fast paced global marketplace. All Design, Merchandising, and Textiles students are required to participate in a three-credit-hour internship, international field study tour, or a study abroad program.

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for the selected career track. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC1170 - Introduction to Apparel Construction Credits: 3 ***
- FCSC1175 - Design Communication Credits: 3 ***
- FCSC1180 - Applied Design Credits: 3 ***
- FCSC1185 - Introduction to Design, Merchandising and Textile Industry Credits: 3 ***
- FCSC2165 - Introduction to Fashion and Dress Credits: 3 ***
- FCSC2175 - Fashion Illustration Credits: 3 ***
- FCSC2185 - Trend Forecasting and Analysis Credits: 3 ***
- FCSC2188 - Interior Design Studio I Credits: 3 ***
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 ***
- FCSC2210 - Fashion Show Event Planning Credits: 2 ***
- FCSC2270 - Advanced Apparel Construction Credits: 3 ***
- FCSC3110 - Personal Finance Credits: 3 **
- FCSC3171 - Introduction to Textile Science Credits: 3 ***
- FCSC3173 - Visual Merchandising and Promotion Credits: 3 ***

- FCSC3174 - Flat Pattern Design Credits: 3 ***
- FCSC3175 - Apparel Design Through Draping Credits: 3 ***
- FCSC3185 - Product Development Through Design Thinking Credits: 3 ***
- FCSC4171 - Advanced Textiles and Product Evaluation Credits: 3 ***
- FCSC4172 - Advanced Textiles and Product Evaluation Lab Credits: 1 ***
- FCSC4176 - Historic Clothing Credits: 3 ***
- FCSC4178 - Fiber Arts Credits: 3 ***
- FCSC4181 - Global Trade and Sourcing for Textile Products Credits: 3 ***
- FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles Credits: 3 ***
- FCSC4185 - Product Development and Technology Credits: 3 ***
- FCSC4190 - Apparel Collection Development Credits: 3 ***
- FCSC4970 - Design and Merchandising Internship Credits: 3 ***
- AGECE1010 - Principles of Macroeconomics Credits: 3
- OR**
- AGECE1020 - Principles of Microeconomics Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4
- ART2020 - Art History II Credits: 3
- MATH1400 - College Algebra Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- SOC1000 - Sociological Principles Credits: 3
- OR**
- PSYC1000 - General Psychology Credits: 3

Degree Minimum: 120 Hours

*Meets FCSC Core Elective in HNF, Grade C or above required

**Meets FCSC Core Elective in HDFS, Grade C or above required

***Grade C or above required

Design, Merchandising, and Textiles: Interior Design Career Track

Design, Merchandising, and Textiles is a diverse and competitive field in which individuals plan, provide, and promote apparel, interiors, and related goods desired by the consumer. The Interior Design career track prepares students to creatively and effectively solve design problems for professional practice in residential and commercial interior design. Throughout coursework, concepts of sustainable design and manufacturing, as well as the influence of design on well-being will be highlighted. Students will take a series of Design, Merchandising, and Textiles program core classes to gain experience with all three tracks. Students will be prepared for careers ranging from small business in Wyoming and rural areas of the West, to the highly competitive, fast paced global marketplace. All Design, Merchandising, and Textiles students are required to participate in a three-credit-hour internship, international field study tour, or a study abroad program.

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for the selected career track. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC1170 - Introduction to Apparel Construction Credits: 3 ***
- FCSC1175 - Design Communication Credits: 3 ***
- FCSC1180 - Applied Design Credits: 3 ***
- FCSC1185 - Introduction to Design, Merchandising and Textile Industry Credits: 3 ***
- FCSC2180 - Housing and Residential Design Credits: 3 ***
- FCSC2185 - Trend Forecasting and Analysis Credits: 3 ***
- FCSC2188 - Interior Design Studio I Credits: 3 ***
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 ***
- FCSC2210 - Fashion Show Event Planning Credits: 2 ***
- FCSC3110 - Personal Finance Credits: 3 **
- FCSC3171 - Introduction to Textile Science Credits: 3 ***
- FCSC3173 - Visual Merchandising and Promotion Credits: 3 ***
- FCSC3180 - Contract Design I Credits: 3 ***
- FCSC3185 - Product Development Through Design Thinking Credits: 3 ***
- FCSC3188 - Interior Design Studio II Credits: 3 ***
- FCSC3288 - Environmental Psychology and Inclusive Design Credits: 1 ***
- FCSC4171 - Advanced Textiles and Product Evaluation Credits: 3 ***
- FCSC4172 - Advanced Textiles and Product Evaluation Lab Credits: 1 ***
- FCSC4181 - Global Trade and Sourcing for Textile Products Credits: 3 ***
- FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles Credits: 3 ***
- FCSC4188 - Contract Design II Credits: 3 ***
- FCSC4288 - Professional Practice and Advanced Interiors Studio Credits: 4 ***
- FCSC4970 - Design and Merchandising Internship Credits: 3 ***
- ARE1600 - Architectural Design Studio I Credits: 3
- ARE2410 - Fundamentals of Building Performance Credits: 3
- ARE2600 - Architectural Design Studio II Credits: 3
- ARE3030 - History of Architecture Credits: 3
- ART2020 - Art History II Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4
- OR
- CHEM1020 - General Chemistry I Credits: 4
- ECON1000 - Global Economic Issues Credits: 3
- ENR4560 - Conservation Entrepreneurship Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- PSYC1000 - General Psychology Credits: 3

Degree Minimum: 120 Hours

*Meets FCSC Core Elective in HNF, Grade C or above required

**Meets FCSC Core Elective in HDFS, Grade C or above required

***Grade C or above required

Design, Merchandising, and Textiles: Merchandising Career Track

Design, Merchandising, and Textiles is a diverse and competitive field in which individuals plan, provide, and promote apparel, interiors, and related goods desired by the consumer. The Merchandising career track offers knowledge and application of business principles within the fashion and interior industries, entry into the world of retailing, and marketing techniques for apparel and interior furnishings. Throughout coursework, concepts of sustainable design and manufacturing, as well as the influence of design on well-being will be highlighted. Students will take a series of Design, Merchandising, and Textiles program core classes to gain experience with all three tracks. Students will be prepared for careers ranging from small business in Wyoming and rural areas of the West, to the highly competitive, fast paced global marketplace. All Design, Merchandising, and Textiles students are required to participate in a three-credit-hour internship, international field study tour, or a study abroad program.

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for the selected career track. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC1170 - Introduction to Apparel Construction Credits: 3 ***
- FCSC1175 - Design Communication Credits: 3 ***
- FCSC1180 - Applied Design Credits: 3 ***
- FCSC1185 - Introduction to Design, Merchandising and Textile Industry Credits: 3 ***
- FCSC2165 - Introduction to Fashion and Dress Credits: 3 ***
- FCSC2185 - Trend Forecasting and Analysis Credits: 3 ***
- FCSC2188 - Interior Design Studio I Credits: 3 ***
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 ***
- FCSC2210 - Fashion Show Event Planning Credits: 2 ***
- FCSC3110 - Personal Finance Credits: 3 **
- FCSC3160 - Merchandise Retailing and Buying Credits: 3 ***
- FCSC3171 - Introduction to Textile Science Credits: 3 ***
- FCSC3173 - Visual Merchandising and Promotion Credits: 3 ***
- FCSC3185 - Product Development Through Design Thinking Credits: 3 ***
- FCSC4160 - Merchandising Strategies and Technology Credits: 3 ***
- FCSC4171 - Advanced Textiles and Product Evaluation Credits: 3 ***
- FCSC4172 - Advanced Textiles and Product Evaluation Lab Credits: 1 ***
- FCSC4176 - Historic Clothing Credits: 3 ***
- FCSC4181 - Global Trade and Sourcing for Textile Products Credits: 3 ***
- FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles Credits: 3 ***
- FCSC4970 - Design and Merchandising Internship Credits: 3 ***
- ACCT2010 - Principles of Accounting I Credits: 3
- AGEC1010 - Principles of Macroeconomics Credits: 3
- OR**
- AGEC1020 - Principles of Microeconomics Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4
- MATH1400 - College Algebra Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- MKT3310 - Professional and Technical Selling Credits: 3
- MKT4240 - Consumer Behavior Credits: 3

- SOC1000 - Sociological Principles Credits: 3
OR
- PSYC1000 - General Psychology Credits: 3

Degree Minimum: 120 Hours

*Meets FCSC Core Elective in HNF, Grade C or above required

**Meets FCSC Core Elective in HDF, Grade C or above required

***Grade C or above required

A Marketing or Entrepreneurship minor through the College of Business is recommended for students in this career track.

Dietetics

The Registered Dietitian Nutritionist (RDN) is a food and nutrition expert who has met the academic and professional requirements to qualify for the Registration Examination for Dietitians. Registered dietitian nutritionists work in a variety of settings that include, but are not limited to, hospitals, private practice, health-care facilities, community and public health, food and nutrition industry, business, sports nutrition, corporate wellness programs, academia, and research.

The UW Didactic Program in Nutrition and Dietetics (DPND) is nationally accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. The program provides the required dietetics coursework needed to pursue an approved post-graduation supervised practice experience - dietetic internship. The academic requirements and supervised practice experience must be completed before the student is eligible for the Registration Examination for Dietitians administered by the Commission on Dietetic Registration (CDR), the credentialing agency for the Academy.

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for this program. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Entrance into the DPND is made only through an application process. Each prospective DPND student will initially enter the Human Nutrition and Food concentration. It is recommended that students apply to the DPND in the spring semester of their sophomore year. A cumulative grade point average of 3.0 is required for program admission.

Before Admission to Program

Students must complete the following courses with a minimum 3.0 grade point average prior to DPND application:

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC1150 - Scientific Study of Food Credits: 3 *
- FCSC2141 - Nutrition Controversies Credits: 2 *
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 *
- CHEM1020 - General Chemistry I Credits: 4 *
- CHEM1030 - General Chemistry II Credits: 4 *
- ENGL1010 - College Composition and Rhetoric Credits: 3 *
- LIFE1010 - General Biology Credits: 4 *
- MATH1400 - College Algebra Credits: 3 *
- MOLB2021 - General Microbiology Credits: 4 *

- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3

After Admission to Program

In addition to USP and upper division requirements, students must complete the following courses after admission to the DPND while maintaining an overall grade point average of 3.000. Failure to maintain a grade point average of 3.000 could result in program probation and/or suspension.

- FCSC3142 - Geriatric Nutrition Credits: 2 *
- FCSC3145 - Sports Nutrition and Metabolism Credits: 3 *
- FCSC3147 - Community Nutrition Credits: 3 *
- FCSC3150 - Intermediate Foods Credits: 2 *
- FCSC3152 - Food Systems Production Credits: 3 *
- FCSC4044 - Maternal, Infant and Adolescent Nutrition Credits: 3 *
- FCSC4145 - Advanced Nutrition Credits: 4 *
- FCSC4147 - Nutrition and Weight Control Credits: 3 *
- FCSC4150 - Experimental Foods Credits: 3 *
- FCSC4210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis Credits: 4 *
- FCSC4220 - Therapeutic Nutrition II Credits: 4 *
- FCSC4230 - Therapeutic Nutrition Counseling Credits: 2
- CHEM2300 - Introductory Organic Chemistry Credits: 4 *
- OR**
- CHEM2420 - Organic Chemistry I Credits: 4 *
- ENGL4010 - Technical Writing in the Professions Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MOLB3610 - Principles of Biochemistry Credits: 4 *
- MOLB4100 - Clinical Biochemistry Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO3115 - Human Systems Physiology Credits: 4

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

- FCSC1180 - Applied Design Credits: 3
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- FCSC2180 - Housing and Residential Design Credits: 3
- FCSC3171 - Introduction to Textile Science Credits: 3

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- FCSC2121 - Child Development Credits: 4

- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3
- FCSC3110 - Personal Finance Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3

Degree Minimum: 120 Hours

*Grade of C or above required

HDFS Career Track for Family and Consumer Sciences Teacher Certification

A career track, leading to certification/ licensure to teach Family and Consumer Sciences in secondary schools, is available for majors in the Human Development and Family Sciences (HDFS) concentration. This program is made possible through a partnership agreement with UW Family and Consumer Sciences, Colorado State University (CSU) Family and Consumer Sciences program and the CSU Center for Educator Preparation. While meeting the requirements for the HDFS concentration, students will use electives to obtain expertise in other FCS specializations needed to teach adolescents in Wyoming and other state secondary programs. As a senior, students will then take the remaining courses needed to meet Wyoming and Colorado certification/ licensure requirements at CSU in Ft. Collins. In their last semester, Wyoming students may complete their student teaching requirements in Southern Wyoming FCS school classrooms with supervision by an FCS teacher educator. Students obtain expertise in areas needed to teach Family and Consumer Sciences in Wyoming and other state secondary school programs. Concurrent enrollment semesters will be required. By participating in this partnership, students earn dual bachelor's degrees—one from UW and one from CSU. Students must earn a minimum of 154 credit hours between the two programs (minimum of 120 at UW and a minimum of 34 at CSU) in order to be awarded a degree from each institution. In addition, students meet the requirements to apply for certification/licensure in Wyoming and in Colorado. Both licenses are reciprocal in many other states.

Upon declaring this career track, students must satisfactorily complete a mandatory security screen (background check). Advising will provide careful attention to the uniqueness of individual student situations and academic choices.

Students must meet all entry requirements at UW and CSU. Students in the CSU licensure program are required to earn a C or above in all content courses and teacher licensing courses, and a passing score on the appropriate licensing exam. Therefore, a C or above must be earned in all courses and an overall 2.750 GPA to be transferred to CSU to fulfill their program requirements.

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3
- FCSC1150 - Scientific Study of Food Credits: 3
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- OR**
- FCSC1170 - Introduction to Apparel Construction Credits: 3
- FCSC1180 - Applied Design Credits: 3
- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- FCSC2121 - Child Development Credits: 4
- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3
- FCSC2180 - Housing and Residential Design Credits: 3
- FCSC2188 - Interior Design Studio I Credits: 3
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3

- FCSC3110 - Personal Finance Credits: 3
- FCSC3119 - Parent-Child Relationships Credits: 3
- FCSC3122 - Adolescence Credits: 3
- FCSC3160 - Merchandise Retailing and Buying Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3
- FCSC4112 - Family Decision-Making and Resource Management Credits: 3
- FCSC4113 - Consumer Issues Credits: 3
- FCSC4118 - Family Policy Credits: 3
- FCSC4124 - Families of Young Children With Special Needs Credits: 3
- FCSC4125 - Professional Practices in Human Development and Family Sciences Credits: 3
- FCSC4138 - Family Stress and Coping Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4
- OR**
- CHEM1020 - General Chemistry I Credits: 4
- COMM1030 - Interpersonal Communication Credits: 3
- ECON1000 - Global Economic Issues Credits: 3
- OR**
- ECON1010 - Principles of Macroeconomics Credits: 3
- OR**
- ECON1020 - Principles of Microeconomics Credits: 3
- ENGL1010 - College Composition and Rhetoric Credits: 3
- ENGL4010 - Technical Writing in the Professions Credits: 3
- HIST1211 - U.S. to 1865 Credits: 3
- OR**
- HIST1221 - U.S. From 1865 Credits: 3
- LIFE1002 - Discovering Science Credits: 3
- OR**
- LIFE1003 - Current Issues in Biology Credits: 4
- OR**
- LIFE1010 - General Biology Credits: 4
- MATH1400 - College Algebra Credits: 3
- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Teacher Certification Option

Three additional semesters are required for completion of this teacher certification option. The first semester after completing UW oncampus coursework will require concurrent enrollment at UW and CSU. Required UW course FCSC 4117 (online - 3 credit hours) will be taken while enrolled at CSU to preserve WEU eligibility. Four additional credit hours must be transferred to UW from the second and third semesters' coursework at CSU to meet UW's 120 credit hour graduation requirement.

First Semester

Concurrent Fall Semester UW/CSU

- EDUC 331 - Educational Technology Credits: 2
- EDUC 340 - Literacy and the Learner - Phase I - RL Credits: 3 (Not included in WUE tuition)
- EDUC 350 - Instruction I: Individualization/Mgt - Phase II - TL Credits: 3
- EDUC 386 - Practicum - Instruction I - Phase II - TL 1
- EDCT 451 - Methods, FCS Education Credits: 4
- FCSC4117 - Understanding Community Leadership Credits: 3 (online from UW)

Second Semester

Spring Semester at CSU

- EDUC 450 - Instruction II: Standards/ Assessment - Phase III - T Credits: 4
- EDUC 486 - Practicum - Instruction II - Phase III - TL 1
- FACS 479 - Colloquium - FCS Credits: 2

Transfer one of the following to UW

- ART/HUM (Choose one: E140, PHIL 1000 or TH141) Credits: 3
OR
- HES 145 Health and Wellness Credits: 3

Final Semester

Fall Semester at CSU

- EDCT 485 - Student Teaching - Phase IV - TL Credits: 11
- ECDD 492 Seminar - Professional Relations - Phase IV - TL Credits: 1 (Transfer to UW)

Total UW Degree Minimum: 120 Hours

Total CSU Degree Minimum: 34 Hours

Total for Both Degrees: 154 Hours

Human Development and Family Sciences

This concentration provides a strong foundation in the areas of human development and family sciences while allowing personalized selection of electives and internship experiences that support specific student interests. The concentration prepares students to work in a variety of settings, serving individuals and families across the lifespan or to pursue graduate level education. Upon declaring this program option, students must satisfactorily complete a mandatory security screen (background check).

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for this concentration. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3 *
- FCSC2121 - Child Development Credits: 4 *
- FCSC2131 - Family Relations Credits: 3 *
- FCSC2133 - Intimate Relationships Credits: 3 *
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 *
- FCSC3110 - Personal Finance Credits: 3
- FCSC3119 - Parent-Child Relationships Credits: 3
- FCSC3122 - Adolescence Credits: 3 *
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3 *
- FCSC4112 - Family Decision-Making and Resource Management Credits: 3 *
- FCSC4117 - Understanding Community Leadership Credits: 3 *
- FCSC4118 - Family Policy Credits: 3 *
- FCSC4125 - Professional Practices in Human Development and Family Sciences Credits: 3 *
- FCSC4132 - Internship in Human Development and Family Sciences Credits: 6-8 *
- OR**
- FCSC4130 - Internship in Child Development Credits: 6-8
- OR**
- FCSC4131 - Administration Internship in Child Development Credits: 6-8
- FCSC4135 - Program Evaluation Credits: 3 *
- FCSC4138 - Family Stress and Coping Credits: 3 *
- ENGL4010 - Technical Writing in the Professions Credits: 3
- OR**
- ENGL4075 - Writing for Non-Profits Credits: 3

- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3

FCSC Core Elective in Human Nutrition and Food

Complete one of the following with a grade of C or above:

- FCSC1141 - Principles of Nutrition Credits: 3
- FCSC1150 - Scientific Study of Food Credits: 3

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

- FCSC1180 - Applied Design Credits: 3
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- FCSC2180 - Housing and Residential Design Credits: 3
- FCSC3171 - Introduction to Textile Science Credits: 3

Degree Minimum: 120 Hours

*Grade C or above required.

Human Nutrition and Food

Students who graduate from the human nutrition and food concentration will be prepared to pursue careers in human nutrition, the food industry, or to pursue graduate degrees.

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for this concentration. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC1150 - Scientific Study of Food Credits: 3 *
- FCSC2141 - Nutrition Controversies Credits: 2 *
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3 *
- FCSC3142 - Geriatric Nutrition Credits: 2 *
- FCSC4044 - Maternal, Infant and Adolescent Nutrition Credits: 3 *
- FCSC4145 - Advanced Nutrition Credits: 4 *
- FCSC4147 - Nutrition and Weight Control Credits: 3 *
- FCSC4150 - Experimental Foods Credits: 3 *
- CHEM1020 - General Chemistry I Credits: 4 *
- CHEM1030 - General Chemistry II Credits: 4

- CHEM2300 - Introductory Organic Chemistry Credits: 4
- OR**
- CHEM2420 - Organic Chemistry I Credits: 4
- ENGL4010 - Technical Writing in the Professions Credits: 3
- LIFE1010 - General Biology Credits: 4 *
- MATH1400 - College Algebra Credits: 3
- MOLB2021 - General Microbiology Credits: 4
- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO3115 - Human Systems Physiology Credits: 4

Human Nutrition and Food Elective

Complete one of the following with a grade of C or above:

- FCSC3145 - Sports Nutrition and Metabolism Credits: 3
- FCSC3147 - Community Nutrition Credits: 3
- FCSC3150 - Intermediate Foods Credits: 2
- FCSC3152 - Food Systems Production Credits: 3

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

- FCSC1180 - Applied Design Credits: 3
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- FCSC2180 - Housing and Residential Design Credits: 3
- FCSC3171 - Introduction to Textile Science Credits: 3

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- FCSC2121 - Child Development Credits: 4
- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3
- FCSC3110 - Personal Finance Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3

Degree Minimum: 120 Hours

*Grade of C or above required

Microbiology, B.S.

The microbiology curriculum is organized to provide students with the maximum flexibility in meeting their university studies program requirements. In addition, the curriculum is designed to prepare graduates for the future by combining a firm foundation in the basic sciences with a central core of microbiology classes, followed by the opportunity for students to specialize in areas of microbiology suiting their individual interests via the selection of electives. Prior to graduation, microbiology majors must complete the basic requirements and all microbiology core course requirements as listed below. Finally, to assure breadth of exposure in microbiology, students must complete 6 semester hours of microbiology electives.

Students pursuing the B.S. degree in microbiology who wish to pursue a dual major in both microbiology and molecular biology must satisfy the basic science/math and core/elective requirements in microbiology as well as those specified for the B.S. degree in molecular biology PLUS an additional 9 credits of electives in microbiology and/or molecular biology at the 4000/5000 level.

Basic Course Requirements for Microbiology Majors

- Total credit hours: 121 hours
- 3000-level or above credits (university requirements): 42 hours
- Completion of University Studies 2015 Program Requirements: 30-36 hours

Basic Sciences and Quantitative Reasoning

- MATH1450 - Algebra and Trigonometry Credits: 5
OR
 - MATH2200 - Calculus I Credits: 4
OR
 - MATH1400 - College Algebra Credits: 3
AND
 - MATH1405 - Trigonometry Credits: 3
-
- STAT2050 - Fundamentals of Statistics Credits: 4
 - LIFE1010 - General Biology Credits: 4
 - LIFE2022 - Animal Biology Credits: 4
OR
 - LIFE2023 - Biology of Plants and Fungi Credits: 4
 - CHEM1020 - General Chemistry I Credits: 4
 - CHEM1030 - General Chemistry II Credits: 4
 - CHEM2420 - Organic Chemistry I Credits: 4
 - CHEM2440 - Organic Chemistry II Credits: 4
 - PHYS1110 - General Physics I Credits: 4
 - PHYS1120 - General Physics II Credits: 4

Microbiology Core Course Requirements

- MICR2021 - General Microbiology Credits: 4
OR
 - MOLB2021 - General Microbiology Credits: 4
OR
 - MICR2240 - Medical Microbiology Credits: 4
OR
 - MOLB2240 - Medical Microbiology Credits: 4
-
- PATB2220 - Pathogenic Microbiology Credits: 3
 - LIFE3050 - Genetics Credits: 4
 - MOLB3000 - Introduction to Molecular Biology Credits: 3
 - MOLB3610 - Principles of Biochemistry Credits: 4
 - PATB4400 - Immunology Credits: 4
OR
 - MOLB4400 - Immunology Credits: 4
 - MOLB4440 - Microbial Genetics Credits: 3
 - MOLB4460 - Microbial Physiology and Metabolism Credits: 3
 - PATB4710 - Medical Virology Credits: 3
 - MICR4321 - Microbiology Capstone Credits: 4

Take 2 credits total of any combination of the following 1-credit seminar courses:

- PATB4150 - Seminar Credits: 1
OR
- MOLB4050 - Student Seminar Credits: 1
OR

- MOLB4051 - Departmental Seminar Credits: 1
OR
- MOLB4052 - Summer Seminar Credits: 1
- MICR Elective Credits: 6

Microbiology Electives

In addition to completing the required microbiology courses listed above, students must complete 6 hours of microbiology electives from any of the following lists.

Medical Microbiology

- PATB4001 - Epidemiology (Diseases in Population) Credits: 3
- PATB4110 - Diseases of Food Animals Credits: 3
- PATB4130 - Mammalian Pathobiology Credits: 3
- PATB4140 - Principles of Toxicology Credits: 3
- PATB4170 - Diseases of Wildlife Credits: 3
- MICR4200 - Diagnostic Bacteriology Credits: 1
- PATB4220 - Molecular Mechanisms of Bacterial Pathogenesis Credits: 3
- PATB4240 - Disease Ecology Credits: 3
- MICR4360 - Medical Entomology and Parasitology Credits: 4
- PATB4500 - Veterinary Parasitology Credits: 4
- PHCY3450 - Foundational Pathophysiology Credits: 4
- MOLB4100 - Clinical Biochemistry Credits: 4
- ZOO4110 - HIV/AIDS: The Disease and the Dilemma Credits: 3

Molecular and Cell Biology

- LIFE3600 - Cell Biology Credits: 4
- MOLB4600 - Advanced Biochemistry Credits: 3
- MOLB4260 - Quantitative Microscopy Credits: 1
- MOLB4450 - Cell and Developmental Genetics Credits: 3
- MOLB4670 - Advanced Molecular Cell Biology Credits: 3
- MOLB4680 - Signaling in Host-microbe Interaction Credits: 3

Environmental and Applied Microbiology

- MICR4540 - Microbial Diversity and Ecology Credits: 4
OR
- MOLB4540 - Microbial Diversity and Ecology Credits: 4

- MICR4140 - Soil Microbiology Credits: 4
- BOT4200 - Plant-Microbe Interactions Credits: 3
- PLNT3220 - Plant Pathology Credits: 3
- PLNT4000 - Plant Disease Control Credits: 3
- FDSC4090 - Food Microbiology Credits: 3

- FDSC4100 - Laboratory Techniques in Food Microbiology Credits: 1

Molecular Biology, B.S.

To obtain a B.S. degree in molecular biology, a student, with the aid of a molecular biology adviser, designs a program of study that includes courses from the Molecular Biology General Science Core and Elective Requirements listed below. Additional course lists are provided as an aid in developing an individualized program of study in key Emphasis Areas such as Cell Biology and Molecular Genetics, Microbiology, and Preprofessional Health Sciences. Courses listed under the Emphasis Areas are optional, and the student and adviser will design a unique curriculum suited to the student's personal interests. Flexibility in course selection also permits students to fulfill various requirements for postgraduate and professional schools. Completion of a B.S. in Molecular Biology provides a student with the tools needed to open the door to exciting futures in science, medicine and agriculture.

We expect that our graduating students will have a strong foundation in basic science, biochemistry and molecular biology that will enable them to:

1. understand the basis of multiple molecular mechanisms central to gene expression;
2. utilize molecular and microbiological laboratory techniques in future jobs or programs and trouble-shoot experimental challenges;
3. apply for graduate programs in molecular biology, microbiology or other life sciences;
4. begin employment as a laboratory research assistant in academia or the medical or agricultural biotechnology industries;
5. utilize a background in biochemistry and cell and molecular biology to promote success in the basic science curriculum in medical or other health professional schools;
6. integrate a background in biochemistry and cell and molecular biology into career development in professions such as law, genetic counseling, or public health policy;
7. employ evidence-based scientific reasoning skills in evaluating the use of molecular genetics in the prevention, diagnosis and treatment of medical disorders.

Requirements for Molecular Biology Majors

General Requirements

- Total credits (college requirement): 120
- 3000-level or above credits (university requirement): 42
- Fulfillment of University Studies Program (consult adviser)
- Fulfillment of molecular biology general science, core and elective requirements listed below

MOLB Requirements

General Science Requirement

- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2420 - Organic Chemistry I Credits: 4

- CHEM2440 - Organic Chemistry II Credits: 4
- PHYS1110 - General Physics I Credits: 4
- PHYS1120 - General Physics II Credits: 4
- MATH2200 - Calculus I Credits: 4 *
- STAT2050 - Fundamentals of Statistics Credits: 4

Total: 36 Credits

*The alternative math courses MATH 1450 or MATH 1400 and MATH 1405 may be substituted with adviser approval.

MOLB Core Requirement

- MOLB2021 - General Microbiology Credits: 4
- LIFE3050 - Genetics Credits: 4
- MOLB3320 - Molecular Biological Methods Credits: 4
- MOLB3610 - Principles of Biochemistry Credits: 4
- OR**
- CHEM4400 - Biological Chemistry Credits: 3

- MOLB4600 - Advanced Biochemistry Credits: 3
- MOLB4053 - Communications in Molecular Biology Credits: 3
- MOLB4440 - Microbial Genetics Credits: 3
- OR**
- MOLB4450 - Cell and Developmental Genetics Credits: 3

- MOLB4670 - Advanced Molecular Cell Biology Credits: 3
- MOLB4051 - Departmental Seminar Credits: 1
- OR**
- MOLB4052 - Summer Seminar Credits: 1

Total: 28-29 Credits

MOLB Elective Requirement (6 credits)

Courses from the following list that were not used to fulfill the MOLB Core Requirement may be applied to the MOLB Elective Requirement; a maximum of 3 credits of MOLB 4010 may be counted toward the MOLB Elective Requirement.

- MOLB4010 - Laboratory Research in Molecular Biology Credits: 1-3
- MOLB4100 - Clinical Biochemistry Credits: 4
- MOLB4260 - Quantitative Microscopy Credits: 1
- MOLB4400 - Immunology Credits: 4
- MOLB4440 - Microbial Genetics Credits: 3
- MOLB4450 - Cell and Developmental Genetics Credits: 3
- MOLB4460 - Microbial Physiology and Metabolism Credits: 3
- MOLB4540 - Microbial Diversity and Ecology Credits: 4
- MOLB4680 - Signaling in Host-microbe Interaction Credits: 3

Total: 6 Credits

Molecular Biology Emphasis Areas

After discussing individual interests with a molecular biology adviser, a student should enroll in additional courses that will enhance preparation for a chosen career objective. Listed below are recommended courses that are not required but will further develop a student's skills and understanding in three Emphasis Areas.

Cell Biology and Molecular Genetics

- MOLB4010 - Laboratory Research in Molecular Biology Credits: 1-3
- MOLB4260 - Quantitative Microscopy Credits: 1
- MOLB4440 - Microbial Genetics Credits: 3
- MOLB4450 - Cell and Developmental Genetics Credits: 3
- MOLB4610 - Biochemistry 2: Molecular Mechanisms Credits: 3
- MOLB4680 - Signaling in Host-microbe Interaction Credits: 3
- ZOO4280 - Introduction to Neuroscience Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4

Microbiology

- MICR2220 - Pathogenic Microbiology Credits: 3
- MICR4130 - Mammalian Pathobiology Credits: 3
- MICR4220 - Molecular Mechanisms of Bacterial Pathogenesis Credits: 3
- MICR4360 - Medical Entomology and Parasitology Credits: 4
- MOLB4010 - Laboratory Research in Molecular Biology Credits: 1-3
- MOLB4400 - Immunology Credits: 4
- MOLB4440 - Microbial Genetics Credits: 3
- MOLB4460 - Microbial Physiology and Metabolism Credits: 3
- MOLB4540 - Microbial Diversity and Ecology Credits: 4
- MOLB4680 - Signaling in Host-microbe Interaction Credits: 3
- MICR4710 - Medical Virology Credits: 3

Preprofessional Health Sciences

- MOLB4010 - Laboratory Research in Molecular Biology Credits: 1-3
- MOLB4100 - Clinical Biochemistry Credits: 4
- MOLB4400 - Immunology Credits: 4
- MOLB4450 - Cell and Developmental Genetics Credits: 3
- MOLB4610 - Biochemistry 2: Molecular Mechanisms Credits: 3
- MICR2220 - Pathogenic Microbiology Credits: 3
- MICR4710 - Medical Virology Credits: 3
- PHCY3450 - Foundational Pathophysiology Credits: 4
- PSYC1000 - General Psychology Credits: 3
- PSYC2210 - Drugs and Behavior Credits: 3
- **OR**
- PSYC2340 - Abnormal Psychology Credits: 3

- SOC1000 - Sociological Principles Credits: 3
- SOC3550 - Medical Sociology Credits: 3
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO3115 - Human Systems Physiology Credits: 4
- ZOO4125 - Integrative Physiology Credits: 5
- ZOO4280 - Introduction to Neuroscience Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4

Recommended Course Sequence

In order to fulfill course prerequisites in a timely manner, the following sequence of courses is recommended. This plan does not list other university requirements, electives, study abroad or undergraduate research opportunities, as these may be placed in many different locations in a student's overall academic plan. Transfer students who have completed 2 years at Wyoming Community colleges or at other universities are encouraged to take MOLB 3610 in the summer semester preceding the fall semester of their junior year or in the fall semester of their junior year at the latest, MOLB 3320 in spring semester junior year, and MOLB 4600 in fall semester senior year. Students interested in taking full advantage of the educational and undergraduate research opportunities in the Department of Molecular Biology may opt to complete their undergraduate degree in five years.

Freshman Year: Fall

- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- MOLB1101 - First-Year Seminar: Genetic Engineering and Synthetic Biology Credits: 3
OR other USP First-Year Seminar
- MATH2200 - Calculus I Credits: 4

Freshman Year: Spring

- MOLB2021 - General Microbiology Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- USP COM1 Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4

Sophomore Year: Fall

- CHEM2420 - Organic Chemistry I Credits: 4
- USP COM2 Credits: 3
- LIFE3050 - Genetics Credits: 4

Sophomore Year: Spring

- CHEM2440 - Organic Chemistry II Credits: 4
- MOLB3320 - Molecular Biological Methods Credits: 4
- MOLB3610 - Principles of Biochemistry Credits: 4

Junior Year: Fall

- MOLB4600 - Advanced Biochemistry Credits: 3
- PHYS1110 - General Physics I Credits: 4

Junior Year: Spring

- PHYS1120 - General Physics II Credits: 4
- MOLB4440 - Microbial Genetics Credits: 3
OR MOLB 4450 Cell and Developmental Genetics Credits: 3
- MOLB4053 - Communications in Molecular Biology Credits: 3
- MOLB 4000-level elective Credits: 3 or 4

Senior Year: Fall

- MOLB4670 - Advanced Molecular Cell Biology Credits: 3
- MOLB 4000-level elective Credits: 3 or 4

Senior Year: Spring

- MOLB4051 - Departmental Seminar Credits: 1
- MOLB 4000-level credits or other 4000-level credits

Professional Child Development

The professional child development concentration is offered by distance delivery only but has the same quality and requirements as on-campus programs. All students are assigned an advisor who works closely with them throughout their program. Completion of this degree prepares students for teaching and administrative positions in early childhood development and care.

Entry into this concentration is by application only. Students must apply for admission to UW first. Official transcripts from all institutions attended must be submitted to UW Admissions. Once a student has applied and their transcripts have been received, their application will be reviewed. Transcripts will not be analyzed prior to application. Applicants must also satisfactorily complete a mandatory security screen (background check).

Completion of this degree requires a minimum of 120 credit hours that include a) University Studies requirements (USP), b) departmental core curriculum, and c) specific courses for this concentration. Courses should be selected in consultation with a student's advisor to enhance the student's educational experience and to ensure fulfillment of upper division course requirements (42 credit hours overall with 30 taken from UW).

Required Courses Before Entry

- EDEC1020 - Introduction to Early Childhood Education Credits: 3
- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3
- ENGL1010 - College Composition and Rhetoric Credits: 3

Required Courses After Entry

- FCSC1141 - Principles of Nutrition Credits: 3 *
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- OR**
- FCSC3171 - Introduction to Textile Science Credits: 3 **
- FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs Credits: 2
- FCSC2121 - Child Development Credits: 4
- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3
- FCSC2200 - Professionalism and Communication in FCSC Credits: 3

- FCSC3110 - Personal Finance Credits: 3
- OR**
- FCSC4112 - Family Decision-Making and Resource Management Credits: 3

- FCSC3119 - Parent-Child Relationships Credits: 3
- FCSC3122 - Adolescence Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3
- FCSC4124 - Families of Young Children With Special Needs Credits: 3
- FCSC4127 - Directing Preschool and Daycare Programs Credits: 3
- FCSC4130 - Internship in Child Development Credits: 6-8
- OR**
- FCSC4131 - Administration Internship in Child Development Credits: 6-8

- FCSC4138 - Family Stress and Coping Credits: 3
- EDEC3000 - Observing Young Children Credits: 3
- EDEC3220 - Curriculum and Learning Environments in Early Childhood Education Credits: 3
- EDEC4320 - Oral and Written Language Acquisition Credits: 3
- ENGL4010 - Technical Writing in the Professions Credits: 3
- OR**
- ENGL4075 - Writing for Non-Profits Credits: 3
- PSYC4310 - Developmental Psychopathology Credits: 3

Degree Minimum: 120 Hours

*Meets FCSC Core Elective in Human Nutrition and Food (grade of C or above required)

**Meets FCSC Core Elective in Design, Merchandising and Textiles (grade of C or above required)

*** Grade of C or above required

Rangeland Ecology and Watershed Management, B.S.

Rangeland occupies 47% of the Earth's land area. The 50 million acres of rangeland in Wyoming provide diverse opportunities for the multiple uses of livestock and wildlife grazing, recreation, water production and natural beauty. Students are taught to understand and manage complex rangeland ecosystems.

The rangeland ecology and watershed management curriculum is designed for students choosing to study ecology, utilization and management of rangelands and wildland watersheds and related resources of forestry, recreation, wildlife management, soil science, botany, and zoology. Degrees include Bachelor of Science, Master of Science, and Doctor of Philosophy.

The undergraduate course of study helps students become well prepared for careers in natural resource management (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, ranch management, various types of environmental consulting), or other natural science careers. The curriculum fully meets the Office of Personnel Management (OPM) requirements for Range Conservationist. By appropriate course selection within the elective hours, students will also meet OPM requirements for additional professional work, such as soil conservationist or hydrologist.

Course Requirements

- First-Year Seminar Credits: 3
- US and WY Government Credits: 3
- Electives Credits: 28-29

REWM Courses: 37 Hours

- REWM2000 - Principles of Rangeland Management Credits: 3 *
- REWM2400 - Range Ecosystems and Plants Credits: 4 *
- REWM3000 - Plant Ecophysiology/Plant Form and Function Credits: 4 *
- REWM3100 - Principles of Wildland Water Quality Credits: 3 *
- REWM4100 - Nutritional Ecological Management of Range Herbivores Credits: 3 *
- REWM4285 - Wildland Hydrology Credits: 3 *
- REWM4330 - Rangeland Ecosystem Assessment and Monitoring Credits: 4 *
- REWM4530 - Seminar Credits: 1 *
- REWM4700 - Wildland Watershed Management Credits: 3 *
- REWM4830 - Ecological Applications for Wildland Management Credits: 3 *
- REWM4850 - Rangeland Vegetation Management Techniques Credits: 3 *
- REWM4900 - Rangeland Management Planning Credits: 3 *

Resource Management: 14-15 Hours

- SOIL2010 - Introduction to Soil Science Credits: 4 *
- SOIL4120 - Genesis, Morphology and Classification of Soils Credits: 4 *
- AGECE4700 - Economics of Range Resources Credits: 3 *

Choose One From

- RNEW4130 - Applied Remote Sensing for Agricultural Management Credits: 3 *
- BOT 4111 *
- BOT 3150 *

Physical and Natural World: 8 Hours

- LIFE1010 - General Biology Credits: 4
- CHEM1000 - Introductory Chemistry Credits: 4

Biological Sciences: 7 Hours

0061

- LIFE2022 - Animal Biology Credits: 4 *
- **OR**
- LIFE2023 - Biology of Plants and Fungi Credits: 4 *
- LIFE3400 - General Ecology Credits: 3 *

Communication Skills: 6 Hours

- USP Communication 1
- COMM2010 - Public Speaking Credits: 3

Quantitative Reasoning: 7 Hours

- MATH1400 - College Algebra Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4

Human Culture: 6 Hours

- Human Culture
- ECON1020 - Principles of Microeconomics Credits: 3

Total Hours: 120

*Course must be completed with a C or better.

Minor

Agricultural Business Minor

Courses Required

- AGE1010 - Principles of Macroeconomics Credits: 3
- AGE1020 - Principles of Microeconomics Credits: 3
- AGE4050 - Agribusiness Marketing Credits: 3
- **OR**
- MKT3210 - Introduction to Marketing Credits: 3
- AGE4060 - Agribusiness Management Credits: 3
- ACCT2010 - Principles of Accounting I Credits: 3
- 6 additional hours in upper-level agricultural economics courses;
- 6 hours in supporting agriculture courses.

Agroecology Minor

(Plant Sciences & Ecosystem Science and Management)

Minimum Requirements: 20-21 Hours

- AECL1000 - Agroecology Credits: 4

Two of the Following:

- SOIL2010 - Introduction to Soil Science Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- AECL3030 - Ecological Web: Ecology of Plant Protection Credits: 3

9 Additional Upper Division Hours from the Following:

- ENTO
- PLNT AND/OR
- SOIL

Apparel Design Minor

A minor in apparel design is sponsored jointly by the departments of Family and Consumer Sciences and Art. It is designed to enable students with career interests in this field to gain experience in the competency areas expected of apparel designers. This minor blends functional, artistic, and fashion considerations in the design of body coverings. Students interested in this minor should consult the sponsoring departments to receive an advisor for the minor. Students must take all courses required for this minor for letter grade and receive a grade of C or above in each course.

Required Courses

- FCSC1170 - Introduction to Apparel Construction Credits: 3
- FCSC1175 - Design Communication Credits: 3
- FCSC2175 - Fashion Illustration Credits: 3
- FCSC2270 - Advanced Apparel Construction Credits: 3
- FCSC3171 - Introduction to Textile Science Credits: 3
- FCSC3174 - Flat Pattern Design Credits: 3
- FCSC3175 - Apparel Design Through Draping Credits: 3

One of the Following

- FCSC1180 - Applied Design Credits: 3
- ART1120 - Foundation: Three Dimensional Credits: 3

One of the Following

- FCSC4178 - Fiber Arts Credits: 3
- **OR**
- FCSC5178 - Fiber Arts Credits: 3
- FCSC4190 - Apparel Collection Development Credits: 3

Minor Total: 27 Hours

Applied Economics Minor

Graduate standing.

Committee selection for the student's major thesis or dissertation committee should include at least one faculty member from AGECE.

Courses Required

- AGECE4640 - Advanced Farm/Ranch Management Credits: 3
- AGECE5310 - Theory of Producer Behavior Credits: 3
OR
- AGECE5740 - Consumer Behavior and Prices Analysis Credits: 3
- AGECE5320 - Quantitative Methods in Agricultural Economics Credits: 3
OR
- AGECE5230 - Intermediate Econometric Theory Credits: 3
- 6 additional credits of approved courses.

Equine Science Minor

The courses required for this minor must be taken for a letter grade and the student must receive a grade of C or better in each course.

Core Courses

12 total credit hours

- ANSC1030 - Equine Management Credits: 3
- ANSC3150 - Equine Nutrition and Physiology Credits: 3
- ANSC3250 - Equine Behavior and Welfare Credits: 3
- ANSC4111 - Equine Health and Disease Credits: 3
OR
- PATB4111 - Equine Health and Disease Credits: 3

Electives

Must choose 3 courses minimum (minimum of 8 credits) - 8 to 10 total credit hours

*Maximum of 3 credits allowed in ANSC 3560

- ANSC2020 - Feeds and Feeding Credits: 4
- ANSC3555 - Equine Evaluation and Selection Credits: 3

- ANSC3560 - Advanced Equine Evaluation and Selection Credits: 1-2 *
- ANSC4132 - Equine Reproduction Credits: 2
- ANSC4250 - Advanced Equine Production and Management Credits: 3

Farm and Ranch Management Minor

Courses Required

- AGE1010 - Principles of Macroeconomics Credits: 3
- AGE1020 - Principles of Microeconomics Credits: 3
- AGE2020 - Farm and Ranch Business Management Credits: 4
- AGE4640 - Advanced Farm/Ranch Management Credits: 3
- 9 additional hours in upper-level agricultural economics courses;
- 6 hours in supporting agriculture courses.

Forest Resources Minor

The primary goal of the Forest Resources minor degree program is to develop a working knowledge of the processes that influence provision of the key products derived from forest lands. Courses taken in fulfillment of a major degree program will also be able to be applied to a minor degree program.

Minimum Requirements: 20 Hours

- RNEW2100 - Forest Management Credits: 3
- SOIL4150 - Forest and Range Soils Credits: 3
- RNEW4775 - Forest Ecology Credits: 4
- REWM4540 - Problems Credits: 1-4

Choose One From

- REWM3100 - Principles of Wildland Water Quality Credits: 3
- REWM4285 - Wildland Hydrology Credits: 3
- REWM4700 - Wildland Watershed Management Credits: 3
- GEOG 4420

Choose One From

- REWM4103 - Range and Ranch Recreation Credits: 3

Choose One From

- REWM2000 - Principles of Rangeland Management Credits: 3
- ZOO2450 - Fish and Wildlife Management in the Anthropocene Credits: 4
- RNEW3000 - Tropical Ecology Credits: 3
- GEOG4470 - Fire Ecology Credits: 3

General Agricultural Economics Minor

Courses Required

- AGE1010 - Principles of Macroeconomics Credits: 3
- AGE1020 - Principles of Microeconomics Credits: 3
- 15 additional hours in agricultural economics courses with 12 hours at the upper-level;
- 6 hours in supporting agriculture courses.

Horticulture Minor

(Plant Sciences)

Minimum Requirements: 16 Hours

- PLNT2025 - Horticultural Science Credits: 3
- PLNT2026 - Horticultural Sciences Laboratory Credits: 1

12 Additional Hours from the Following:

- PLNT3000 - Irrigated Agriculture Credits: 3
- PLNT3036 - Grape Production Credits: 3
- PLNT3300 - Horticultural Plant Propagation Credits: 3
- PLNT4120 - Organic Food Production Credits: 3
- PLNT4180 - Greenhouse Crop Production Credits: 4
- PLNT4190 - Herbs, Spices and Medicinal Plants Credits: 3
- PLNT4200 - Greenhouse Design and Management Credits: 3
- PLNT4975 - Problems in Plant Science Credits: 1-2

Human Development and Family Sciences Minor

A minor in human development and family sciences provides students with a foundation of basic principles and knowledge. The coursework can enrich and complement a student's primary area of study. Students must complete 22 credit hours outlined below. Students must take courses for letter grade and receive a grade of C or above in each course.

Required Courses

- FCSC2121 - Child Development Credits: 4
- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3

Plus 12 Credit Hours from the Following

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3

- FCSC3110 - Personal Finance Credits: 3
- FCSC3119 - Parent-Child Relationships Credits: 3
- FCSC3122 - Adolescence Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3
- FCSC4112 - Family Decision-Making and Resource Management Credits: 3
- FCSC4113 - Consumer Issues Credits: 3
- FCSC4117 - Understanding Community Leadership Credits: 3
- FCSC4124 - Families of Young Children With Special Needs Credits: 3
- FCSC4127 - Directing Preschool and Daycare Programs Credits: 3
- FCSC4118 - Family Policy Credits: 3
- FCSC4135 - Program Evaluation Credits: 3
- FCSC4138 - Family Stress and Coping Credits: 3

Minor Total: 22 Hours

Human Nutrition Minor

A minor in human nutrition strengthens degrees in kinesiology and health, food science, nursing, animal science, and related fields. Students who minor in human nutrition learn how food choices can influence their health and well-being. While the coursework provides a foundation for making positive lifestyle choices, it does not prepare students to provide nutrition counseling or medical nutrition therapy. Students must take courses for letter grade and receive a grade of C or above in each course.

Required Courses

- FCSC1141 - Principles of Nutrition Credits: 3
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- ZOO3115 - Human Systems Physiology Credits: 4

Plus One of the Following

- MOLB3610 - Principles of Biochemistry Credits: 4 *
- FCSC4145 - Advanced Nutrition Credits: 4

Plus Three of the Following

- FCSC1101 - First-Year Seminar Credits: 3
- FCSC1150 - Scientific Study of Food Credits: 3
- FCSC2141 - Nutrition Controversies Credits: 2
- FCSC3142 - Geriatric Nutrition Credits: 2
- FCSC3145 - Sports Nutrition and Metabolism Credits: 3
- FCSC3147 - Community Nutrition Credits: 3
- FCSC4044 - Maternal, Infant and Adolescent Nutrition Credits: 3
- FCSC4145 - Advanced Nutrition Credits: 4 *
- FCSC4147 - Nutrition and Weight Control Credits: 3

Minor Total: 23-25 Hours

* Course can be used to fulfill only one category.

Insect Biology Minor

This minor is intended for students who have an interest in insects as organisms, including their basic biology, ecology and evolution. As insects dominate biological diversity, they are essential to most ecological systems, and have unique physiological systems. Students majoring in zoology, botany, molecular biology, biology or similar fields will find the study of these organisms a rewarding and valuable (if not essential) element of the life sciences.

In terms of biological diversity, at least 75 percent of all species are insects, with over 800,000 known species and another 10-50 million yet to be described. Insects are increasingly used as bioindicators of environmental health. Many industries now recognize that insects may be the world's richest, untapped natural resource, with billions of dollars of unexploited goods and services. Accessing these resources requires trained entomologists. Such training demands an academic setting, such as the University of Wyoming, where collections are maintained, productive faculty are involved in quality research and teaching, the latest methodologies are available and taught, the necessary scientific literature is readily accessible and a curriculum available that allows the student to pursue this field.

Minimum Requirements: 13 Hours

Choose One From

- ENTO1000 - Insect Biology Credits: 3
- **OR**
- ENTO1001 - Insect Biology Credits: 3

Choose From

Then choose from the list below to meet the minimum 13 credit hour requirement.

- ENTO4678 - Aquatic Entomology Credits: 3
- ENTO4682 - Insect Anatomy and Physiology Credits: 5
- ENTO4684 - Classification of Insects Credits: 4
- ENTO4686 - Problems in Entomology Credits: 1-3
- ENTO4687 - Insect Evolution Credits: 3
- ENTO4884 - Insect Behavior Credits: 3

Insect Biology/Entomology Graduate Study Minor

The department offers graduate work leading to the Master of Science and Doctor of Philosophy in entomology and an affiliated graduate option in water resources. Department faculty have active programs in insect ecology (biological control, population biology and plant-insect interactions), systematics (taxonomy, phylogeny and evolution) and pest management (biological control, biometrics and sampling, and pest management on humans, livestock, crops and rangeland).

Interior Design Minor

A minor in Interior Design is sponsored jointly by the Departments of Family and Consumer Sciences and Civil and Architectural Engineering. It is designed to enable students with career interests in this field to gain experience in the competency areas expected of interior designers. Students who hope to use this minor to prepare for professional certification examination following graduation should consult the sponsoring departments to receive an advisor for the minor. Students must take all courses required for this minor for letter grade and receive a grade of C or above in each course.

Required Courses

- FCSC2188 - Interior Design Studio I Credits: 3
- FCSC3288 - Environmental Psychology and Inclusive Design Credits: 1
- FCSC3171 - Introduction to Textile Science Credits: 3
- ARE1600 - Architectural Design Studio I Credits: 3
- ARE2600 - Architectural Design Studio II Credits: 3

Plus One of the Following

- FCSC3180 - Contract Design I Credits: 3
- FCSC4188 - Contract Design II Credits: 3

Plus One of the Following

- FCSC1180 - Applied Design Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3
- ART1120 - Foundation: Three Dimensional Credits: 3
- ARE3600 - Architectural Design Studio III Credits: 3

Plus One of the Following

- ARE3030 - History of Architecture Credits: 3
- ART2020 - Art History II Credits: 3

Minor Total: 21 Hours

International Agricultural Minor

Courses Required

- AGECE1010 - Principles of Macroeconomics Credits: 3
- AGECE1020 - Principles of Microeconomics Credits: 3
- AGECE3860 - World Food, Ag, & Development Credits: 3
- AGECE4880 - International Agricultural Trade, Markets and Policy Credits: 3
- 6 additional hours in upper-level agricultural economics courses;
- 3 hours in foreign culture or language;
- 6 hours in supporting agriculture courses.

Molecular Biology Minor

Students wishing to minor in molecular biology should discuss their plans with an adviser. Formal declaration of molecular biology as a minor requires 1) submission of a form approved by the Department of Molecular Biology and the College of Agriculture and Natural Resources Dean's Office, 2) appointment of an adviser for the Department of Molecular Biology.

To receive a minor in molecular biology, a student must complete courses listed in the following areas:

General Science Requirement

- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- OR**
- CHEM2420 - Organic Chemistry I Credits: 4

- MATH2200 - Calculus I Credits: 4
- OR**
- MATH1450 - Algebra and Trigonometry Credits: 5
- OR**
- MATH1400 - College Algebra Credits: 3
- AND**
- MATH1405 - Trigonometry Credits: 3

MOLB Core and Elective Requirement

- MOLB2021 - General Microbiology Credits: 4
- MOLB3000 - Introduction to Molecular Biology Credits: 3
- LIFE3050 - Genetics Credits: 4
- MOLB3320 - Molecular Biological Methods Credits: 4
- OR 3 credits of**
- MOLB4010 - Laboratory Research in Molecular Biology Credits: 1-3

- MOLB3610 - Principles of Biochemistry Credits: 4
- OR**
- CHEM4400 - Biological Chemistry Credits: 3

- **MOLB elective requirement:** 6 credits of 4000-level MOLB courses, excluding MOLB 4010, MOLB 4050, MOLB 4051, MOLB 4052, MOLB 4850

Natural Resource Economics Minor

Courses Required

- AGE1020 - Principles of Microeconomics Credits: 3
- AGE3750 - Natural Resource Planning and Economics Credits: 3
- AGE4700 - Economics of Range Resources Credits: 3
- AGE4720 - Water Resource Economics Credits: 3

Choose 9 Additional Hours From:

- AGE4450 - Negotiation Credits: 3
- AGE4600 - Community Economic Analysis Credits: 3
- AGE4710 - Natural Resource Law and Policy Credits: 3
- ECON2400 - Economics of the Environment Credits: 3
- ECON4400 - Environmental Economics Credits: 3
- ECON4410 - Natural Resource Economics Credits: 3
- ECON4520 - Public Economics Credits: 3 (note: College of Business prerequisites)
- ENR4500 - Risk Analysis Credits: 4

Plant Protection Minor

(Plant Sciences)

Minimum Requirements: 17 Hours

- AECL1000 - Agroecology Credits: 4
- AECL3030 - Ecological Web: Ecology of Plant Protection Credits: 3

10 Additional Hours from the Following:

- PLNT3220 - Plant Pathology Credits: 3
- PLNT4000 - Plant Disease Control Credits: 3
- PLNT4070 - Weed Science and Technology Credits: 4
- PLNT4120 - Organic Food Production Credits: 3

Rangeland Ecology and Watershed Management Minor

A minor in rangeland ecology and watershed management is available for students in other majors interested in increasing their knowledge of the field. The number of hours required is 22.

Required Courses

The required courses for the minor are:

- LIFE1010 - General Biology Credits: 4
- LIFE3400 - General Ecology Credits: 3
- REWM2000 - Principles of Rangeland Management Credits: 3
- REWM 2500 Credits: 2
- REWM4330 - Rangeland Ecosystem Assessment and Monitoring Credits: 4

- REWM4530 - Seminar Credits: 1
- 6 hrs. selected from other REWM upper-division (3000 or 4000 level) courses.

Reclamation and Restoration Ecology Minor

This program covers the use of basic and applied ecological concepts to rehabilitate and restore processes and functions to disturbed ecosystems.

Required Courses: 14 Hours

- LIFE3400 - General Ecology Credits: 3
- SOIL2010 - Introduction to Soil Science Credits: 4
- REWM4200 - Reclamation of Drastically Disturbed Lands Credits: 3
- REWM4580 - Rangeland Restoration Ecology Credits: 3
- REWM4990 - Undergraduate Teaching Practicum Credits: 1

Planning and Policy: 3 Hours

(choose one)

- AGE4710 - Natural Resource Law and Policy Credits: 3
- ENR3000 - Approaches to ENR Problem Solving Credits: 3
- GEOG4040 - Conservation of Natural Resources Credits: 3
- GEOG 4750
- REWM4051 - Environmental Politics Credits: 3
- REWM4052 - Federal Land Politics Credits: 3
- REWM4900 - Rangeland Management Planning Credits: 3

Below-Ground Processes: 3-4 Hours

(choose one)

- CE4800 - Hydrology Credits: 3
- CE 4820
- SOIL4100 - Soil Physics Credits: 3
- SOIL4120 - Genesis, Morphology and Classification of Soils Credits: 4
- SOIL4140 - Soil Microbiology Credits: 4
- SOIL4150 - Forest and Range Soils Credits: 3
- SOIL4160 - Soil Health and Nutrient Cycling Credits: 3

Above-Ground Processes: 2-4 Hours

(choose one)

- BOT4700 - Vegetation Ecology Credits: 4
- BOT 4111
- ENTO4678 - Aquatic Entomology Credits: 3

- ENTO 4685
- REWM4285 - Wildland Hydrology Credits: 3
- REWM4540 - Problems Credits: 1-4
- REWM4700 - Wildland Watershed Management Credits: 3
- REWM4710 - Watershed Water Quality Management Credits: 3
- REWM4850 - Rangeland Vegetation Management Techniques Credits: 3
- ZOO 4550

Total: 22-25

Soil Science Minor

This program is designed to enhance soil expertise for students majoring in agricultural, natural resources, and environmental sciences degree programs. Undergraduate students minoring in Soil Science will enhance their job prospects with federal land management or conservation agencies (e.g., Forest Service, Bureau of Land Management, Natural Resources Conservation Society), state and federal regulatory agencies (e.g., Wyoming Department of Environmental Quality), mining and oil companies, environmental consulting companies, or scientific research organizations.

Course Requirements: 15 Credit Hours

Course requirements (15 credit hours) for a Soil Science minor are:

- SOIL2010 - Introduction to Soil Science Credits: 4
- plus 11 credits of upper-division soil science courses for a total of 15 credits.

Graduate

Agricultural Economics, M.S.

Degree Requirements

The following courses constitute the M.S. in Agricultural Economics core requirements and are required of all Plan A candidates (22 hours).

Economic Theory

- AGE5310 - Theory of Producer Behavior Credits: 3
- AGE5630 - Advanced Natural Resource Economics Credits: 3
- AGE5710 - Advanced Agricultural Market Theory Credits: 3
- AGE5740 - Consumer Behavior and Prices Analysis Credits: 3

Quantitative Methods

- AGE5230 - Intermediate Econometric Theory Credits: 3
- AGE5320 - Quantitative Methods in Agricultural Economics Credits: 3

Research

- AGEC5650 - Communicating Research Credits: 3
- AGEC5880 - Advanced Seminar Credits: 1-2

Plan A (Thesis):

Minimum of 30 credit hours including AGEC M.S. core requirements, thesis hours and electives.

No more than three hours of AGEC coursework numbered below 5000-level count toward the 30 hour requirement.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student, and the department head determine the final program of study and thesis research topic.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Plan B (Non-thesis):

Minimum of 32 hours of coursework;

Non-thesis business analysis paper accepted by the student's graduate committee.

Minimum of 13 credit hours of agricultural economics coursework numbered at the 5000-level are required, including:

- AGEC5310 - Theory of Producer Behavior Credits: 3
- AGEC5740 - Consumer Behavior and Prices Analysis Credits: 3
- AGEC5880 - Advanced Seminar Credits: 1-2

- AGEC5630 - Advanced Natural Resource Economics Credits: 3
OR
- AGEC5710 - Advanced Agricultural Market Theory Credits: 3

- AGEC5320 - Quantitative Methods in Agricultural Economics Credits: 3
OR
- AGEC5230 - Intermediate Econometric Theory Credits: 3

In Addition:

Students are required to complete 3 credit hours from each of the following three areas:

Management:

- AGEC4060 - Agribusiness Management Credits: 3

- AGEC4640 - Advanced Farm/Ranch Management Credits: 3
OR

- AGEC 5460
OR
- MGT 4410

- MGT 4420
- MGT 4440

- MGT4470 - Negotiations and Conflict Resolution Credits: 3
OR
- MGT 4520

Marketing:

- AGEC4050 - Agribusiness Marketing Credits: 3
- AGEC4830 - Agricultural Commodities and Futures Markets Credits: 3
- AGEC4840 - Agricultural Market Analysis Credits: 3

- AGEC4880 - International Agricultural Trade, Markets and Policy Credits: 3
OR
- AGEC5710 - Advanced Agricultural Market Theory Credits: 3
OR
- MKT4240 - Consumer Behavior Credits: 3

- MKT4430 - Marketing Management Credits: 3

- MKT4520 - Marketing Research and Analysis Credits: 3
OR
- MKT4540 - International Marketing Credits: 3

Finance:

- AGEC4500 - Agricultural Finance Credits: 3
OR
- FIN4510 - Bank Management Credits: 3

- FIN 4520
- FIN 4610

- FIN4810 - Real Estate Investment Credits: 3
OR
- ECON4740 - International Economics and Policy Credits: 3

Remaining Credit Hours

Remaining credit hours will be filled with electives.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic.

Presentation of the business analysis paper at a formal public seminar.

An internship experience is strongly encouraged as part of the agricultural business option (AGEC 5990).

Agricultural Economics/Environment and Natural Resources, M.S.

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 15 credit hours in environment and natural resources, as approved by the student's committee and the ENR academic adviser.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the area of environment and natural resources.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Agricultural Economics/Water Resources, M.S.

The objective of this program is to provide students with specialized study in water,resources and to signify this specialization by the designation of the water resources interdisciplinary major on the transcript.

Coursework and Thesis

Students must complete the 24 credit hour agricultural and applied economics including M.S. core requirements plus 4 thesis hours and 9 credit hours in water resources approved courses.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The candidate's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and thesis research topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the graduate committee.

Oral Exam Requirement

In addition to coursework and a Plan A Thesis, students must pass a final oral examination. The student's committee may also require a written examination.

Interdisciplinary Component

nine hours (see Water Resources degree requirements)

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 10 credit hours in water resources approved courses.

Please refer to Water Resources Degree program in this *Catalog* for updated degree requirements.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Animal and Veterinary Science, M.S.

Plan A (Thesis)

The student, major professor, and graduate committee determine the program of study and research project, which meets the needs of the individual student. The candidate's graduate committee should be established and functioning by the time the student has completed 12 semester hours of formal coursework. The master of science program should be approved and filed by the end of the student's second semester of graduate study in animal science. This committee shall also determine if the student is making satisfactory progress to be advanced to a candidate for a master's degree or continued in a doctoral program by the end of the student's third semester following matriculation.

The student can specialize in breeding, food science and human nutrition, nutrition, physiology, meat science, reproduction or wool for coursework and thesis/dissertation project. In addition, supporting coursework is available in agricultural economics, biochemistry, microbiology, range management, genetics, statistics, and other areas of interest to the individual. In certain cases it is possible to develop a joint research project between animal science and another department.

Students may use the research facilities and herds of beef cattle, sheep, and swine at the university livestock center near the university or at one of the university research and extension centers in the state. Research laboratories are located on campus and include a modern meat processing facility.

The Thesis program is a 30 hour program, 26 hours of coursework and 4 hours of thesis research.

Plan B (Non-thesis)

The Non-thesis program requires a coursework-intensive, non-thesis master of science program for those students whose career paths may not require a thesis research program.

The program requires 32 hours of coursework in addition to an acceptable non-thesis research paper as defined by the student's graduate committee.

Options

Program Specific Degree Requirements

Only offered as Plan A

A minimum of 30 credit hours including 4 thesis hours must be earned in 4000-5999 level courses.

Two semesters of graduate seminar (PATB 5515) and STAT (5050) or their equivalents are required.

The program of study is arranged with the student's graduate committee.

Animal and Veterinary Science, Ph.D.

A 72 hour program.

Students must meet the university minimum requirements.

Ecosystem Science and Management/Applied Economics, Ph.D.

The course requirements for the PhD program in Ecosystem Science and Management (ESM) with a concentration in Applied Economics are highly flexible to accommodate a wide variety of student backgrounds and interests. Students can major in any PhD program within ESM including Rangeland Ecology and Watershed Management (REWM), Soil Science (SOIL), and Entomology (ENTO) following the ESM admission procedures. The student's graduate committee, with the approval of the Department Heads and College Dean, determine the final program of study. Acknowledging flexibility, each student's program of study is expected to meet the following minimum requirements:

A minimum of 72 credit hours of coursework. The credit hour requirement can include:

Up to 48 credit hours transferred from approved graduate courses earned while pursuing an M.S. degree (no more than 4 credit hours of thesis);

A minimum of 12 credit hours of approved ESM (REWM, SOIL, ENTO) courses;

A minimum of 18 credit hours of approved AGECE or ECON courses, with at least 12 credit hours at the 5000-level.

At least 42 of the 72 credit hour requirement must be earned in formal coursework.

No more than 12 credit hours of 4000-level courses can count towards the 72 credit hour requirement.

In addition to the degree requirements listed, students pursuing this option will also meet the following general requirements:

Enroll in, and complete, the graduate minor in Applied Economics.

Include co-chairs, one from ESM and one from AGECE, on the graduate committee.

Participate in a meaningful teaching experience to be coordinated by the student's major professor.

Complete a preliminary examination covering knowledge related to both ESM and AGECE.

Present research results at a formal public seminar.

Complete a final oral examination covering the student's thesis research administered by the graduate committee.

Entomology, M.S.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

Plan B (Non-thesis)

Requires 30 hours of graduate credit to include 9 hours of required courses, 11 hours of required electives, and 10 hours of other electives.

Plan B project - follows format of Plan A thesis.

A Plan B master of science will be a terminal degree program in the Department of Ecosystem Science and Management. Students completing this option will not qualify for a subsequent Ph.D. program in Department of Ecosystem Science and Management at the University of Wyoming.

Entomology, Ph.D.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Entomology/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between entomology and water resources, and to provide students an entomology degree program which emphasizes the important issues in water resources. Aquatic insects are increasingly being used as bioindicators of aquatic ecosystem health. This is an area of environmental assessment that is rapidly expanding, as is the job market for scientists with this blend of skills.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of ENTO 5960 to qualify for a master of science degree in entomology/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

- A. ENTO 5678 Aquatic Entomology (3)
- B. Interdisciplinary component 9 hours (see Water Resources degree requirements)

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in entomology/water resources. In addition to coursework and a Plan A thesis, students must pass a final written and oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in entomology/water resources degree requirements and that research efforts are in the water area.

Family and Consumer Sciences - Master of Science

The master's program in family and consumer sciences offers three specialized and very different concentrations that prepare graduate students for a variety of pathways, including advanced degree programs and family consumer science jobs. Student may choose Plan A - Thesis option or Plan B - Project.

Choose from three concentrations based on your ambitions and interests:

- **Design, Merchandising and Textiles** elevates your knowledge of apparel design and the merchandising of textiles. You will be provided with one-on-one mentorship, opportunities to engage in research and creative scholarship with faculty and resources to help travel to conferences.
- **Human Nutrition and Food** increases your understanding of food and nutritional science and how to apply that knowledge to disease prevention and enhancement of human potential. You will receive research training and mentorship and engage with faculty across campus. You may also receive financial support for your thesis work and conference travel.
- **Human Development and Family Sciences** offers an opportunity to earn your master's online while expanding your knowledge of individuals and families across the lifespan. Particularly beneficial for graduate students who are currently working in human services fields and would like to further their education, this concentration is an entirely online degree program that allows you to progress through the curriculum at your own pace.

Graduate Admission Requirements

Admission to our graduate program and selection for department-funded assistantships is highly competitive. Faculty in each program area will review the applications for their program area and priority consideration will be given to applicants who meet or exceed admission requirements and possess research interests that parallel those of the faculty.

Admission requirements include:

- A bachelor's degree from an accredited or recognized school is required.
- A grade point average of 3.000 or higher is required.
- A Graduate Record Exam (GRE) score. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing).
- For international students whose native language is not English, a minimum TOEFL score of 540 on the written exam or 76 on the Internet-based exam is required. We will also accept an official IELTS score of 6.5 or above.
- International students must also provide evidence of adequate financial resources.

For more information please visit UW's graduate admissions website <http://www.uwyo.edu/uwgrad/>.

Application packets for fall entry are due no later than March 1. Applications may be considered throughout the year if space in a program area is available.

To apply please complete the online application at the UW Office of Admissions application website <http://www.uwyo.edu/admissions/apply-online.html> and submit the following:

- Transcripts from all institutions attended. All transcripts must be official. In order for them to be considered as such, they must be sent directly from the school(s) attended, in a sealed envelope, to UW Admissions.
- Official GRE scores
- Letters of recommendation -- Applicants must submit names and contact information for at least 3 people who will provide letters of recommendation about the applicant's preparedness and/or qualifications for the desired graduate degree program
- A statement of purpose (letter of intent) that includes research interests, future goals related to the program of interest, why the applicant is seeking this degree and prior work related experience.
- A brief resume or curriculum vitae
- International applicants must provide official TOEFL or IELTS scores and evidence of adequate financial resources.

For more information, please contact the Department of Family and Consumer Sciences at 307-766-4145 or famconsci@uwyo.edu.

Food Science and Human Nutrition Interdisciplinary Master of Science

Food Science and Human Nutrition is an interdisciplinary program leading to a Master of Science degree within the College of Agriculture and Natural Resources. Cooperating curricula include Food Science from the Department of Animal Science and Human Nutrition from the Department of Family and Consumer Sciences. Entering students will choose research programs and will work with faculty members from the appropriate curricula. Prior to admission to the program, students will select the major department (Animal Science or Family and Consumer Sciences) that best suits their desired research area(s). Students will gain expertise in theory as well as research in some combination of the areas of human nutrition and metabolism, food product development, and community nutrition, food microbiology, meat science and food chemistry. All students will be exposed to laboratory as well as classroom learning experiences.

A minimum of 30 credit hours is required for this degree. Students may be required to take more than the minimum number of credit hours, either because they have to satisfy prerequisites for some of their graduate-level courses, or because a student's committee determines that more than 30 hours will be needed for the student to reach his/her professional objective. The student's program of study must include at least one credit hour of graduate level seminar. A thesis is required. See the Food Science (FDSC) and Family and Consumer Sciences (FCSC) section of this catalog for course listings.

Students may use facilities such as the meat processing laboratory, sensory evaluation rooms, experimental kitchens, and a variety of modern facilities for research involving small animals and human subjects. Laboratory instruments including high performance liquid chromatographs, indirect calorimetry, electrophoresis equipment, densitometers, gas chromatographs, ultracentrifuges, scintillation counters, differential scanning calorimeters, and histological equipment are available.

Program Specific Admission Requirements

Recommended prerequisites for students entering the program:

- One semester of organic chemistry (may include laboratory)
- Human or animal nutrition, anatomy and physiology
- Introductory statistics

Application must include:

- A bachelor's degree based on a four-year curriculum from an institution accredited by one of the regional associations of the Commission on Institution of Higher Education or equivalent.
- A grade point average of 3.000 or higher in the previous degree.
- A Graduate Record Exam (GRE) score - The GRE is considered in the admissions process. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing)
- For international students whose native language is not English, a minimum TOEFL score of 76 or an official IELTS score of 6.5.
- International students must also provide evidence of adequate financial resources.

Application packets for fall entry are due no later than March 1. Applications may be considered throughout the year if space in a program area is available.

For more information please visit the UW Graduate Education website <https://www.uwyo.edu/admissions/graduate/>.

To apply please complete the online application at the UW Office of Admissions application website <http://www.uwyo.edu/admissions/apply.html> and submit the following:

- Transcripts from all institutions attended
- Official GRE scores
- Letters of recommendation - Applicants must submit names and contact information for at least three (3) people who will provide letters of recommendation about the applicant's preparedness and/or qualifications for their desired graduate degree program.
- A statement of intent that includes: research interests, future goals related to the program of interest, why the applicant is seeking this degree, prior work related experience.

- A brief resume or curriculum vitae
- International applicants must provide: official TOEFL or IELTS scores and evidence of adequate financial resources.

Hydrology, Ph.D.

Water Resources/Environmental Science and Engineering (WRESE) is an Interdisciplinary Ph.D. program that fulfills an important need by organizing a rigorous Ph.D.- level curriculum, with sufficient numbers of relevant, frequently-offered courses to serve the needs of Ph.D. students affiliated with program faculty.

The program's Ph.D.-level coursework is essential and forward-looking in areas such as aquatic chemistry, transport in natural systems, hydrometeorology, land-atmosphere interactions, eco-hydrology, hydrogeology, vadose zone hydrology, hydrologic applications of stable isotopes, limnology, hydrologic modeling, hydrological and water quality effects on aquatic organisms, hydroclimatology, hydrologic remote sensing and watershed hydrology.

Molecular Biology, M.A.

An applicant for the M.A. degree in Molecular Biology is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant needs to contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can apply to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: (http://www.uwyo.edu/registrar/university_catalog/grad_students.html)

The pursuit of an M.A. degree in Molecular Biology is suitable for students interested in obtaining a master's degree that does not necessarily include laboratory work. Students who intend to pursue education in medical, dental, veterinary or law schools may choose to pursue an M.A. in Molecular Biology before continuing their education. An appropriate research project is selected in consultation with the M.A. degree candidate and their graduate adviser. Student performance is monitored by a thesis committee that will evaluate a student's written thesis, public seminar, and oral thesis defense. A student pursuing an M.A. degree should not have expectations of financial support. Students pursuing the M.A. degree in Molecular Biology usually complete their program in two academic semesters plus two summer semesters.

Requirements for M.A. degree in Molecular Biology

An M.A. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit. Specific requirements for the M.A. Program in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.

- This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of the seminar presentation course MOLB 5050 (2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program)
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee

Molecular Biology, M.S.

The M.S. is a research-intensive degree. An applicant is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters. An M.S. candidate will conduct a research project as well as present at the departmental seminars and at scientific meetings. Student performance is monitored by a thesis committee that evaluates a student's research proposal, seminar presentations, written thesis, final public seminar, and final oral defense of the thesis. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Graduate assistantships for M.S. degree students are at the discretion of their graduate adviser. Students pursuing the M.S. degree in Molecular Biology usually complete their program in two to three years.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: (http://www.uwyo.edu/registrar/university_catalog/grad_students.html)

Requirements for M.S. degree in Molecular Biology

An M.S. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit, including 26 credits of formal coursework and 4 credits of thesis research MOLB 5960. Specific requirements for the M.S. degree in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee
- MOLB 5960 Thesis Research (4 credits)

Molecular Biology, Ph.D.

The Ph.D. in Molecular Biology is a research-intensive degree. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential

adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

An application to the Ph.D. program should include a curriculum vitae (CV), a 2-page statement of research interests and career plans, contact information for three references, transcripts from previous institutions, and GRE scores. Those students with an M.S. degree may be excluded from the GRE requirement. Following admission, a student will conduct a guided research project in the laboratory into which they have been accepted. The faculty research adviser is responsible for financial support of the student. A research project is expected to result in publications in peer-reviewed journals as well as presentations at the departmental seminars and scientific meetings.

Throughout the degree program, a graduate student is guided and evaluated by their research adviser and graduate committee. A student must develop a Program of Study approved by the student's graduate committee. Student performance is monitored by a dissertation committee that evaluates a student's seminar presentations, research proposal, preliminary exam, written dissertation, final public seminar, and final oral defense of the dissertation. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Students pursuing the Ph.D. degree in Molecular Biology usually complete their program in approximately five years.

Requirements for Ph.D. degree in Molecular Biology

A Program of Study for the Ph.D. in Molecular Biology must include a minimum of 72 semester hours of credit at the 4000 level or above from UW or equivalent levels from another approved university. This 72-hour requirement may include graduate credits earned while working toward the master's degree in the same area, but at least 42 hours (of the 72) must be earned in formal coursework, including the specific requirements for the program detailed below. Additional credits toward the 72-hour requirement may include additional formal course credits, Dissertation Research credits (MOLB 5980), or MOLB 5960 credits or Internship credits (MOLB 5990). The Program of Study must be on file in the Office of the Registrar before the preliminary examination can be scheduled. Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: (http://www.uwyo.edu/registrar/university_catalog/grad_students.html)

Specific requirements for the Ph.D. degree in Molecular Biology are listed below. The Program of Study is determined in consultation with the student's graduate committee.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600 , MOLB 5600 , or transfer credits for an equivalent course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400 , MOLB 5440 , MOLB 5450 , MOLB 5460 , MOLB 5610 , MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other course credits as determined by the student in consultation with their graduate committee
- MOLB 5980 Dissertation Research (number of credits to be determined in consultation with the student's graduate committee)

Plant Sciences, M.S.

Plan A (Thesis)

Requirements for the master of science degree include 26 hours of coursework beyond the bachelor's degree numbered 4000 or above, 4 hours of thesis research, a research proposal, original research, and oral defense of the thesis.

The M.S. degree is typically completed in two years. The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

Plant Sciences, Ph.D.

The requirements for the doctor of philosophy degree include 60 hours of coursework beyond the bachelor's degree numbered 4000 or above, 12 hours of dissertation research, a research proposal, original research, written and oral preliminary exams to be taken when most or all coursework is completed, and an oral defense of the dissertation.

Dissertations may be in a modified journal article format but must meet university formatting requirements.

The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

The student is expected to participate in the usual activities of scientific research such as attending and presenting at research seminars and professional meetings and publishing his/her research.

Rangeland Ecology and Watershed Management, M.S.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

An oral defense of the thesis is required.

Plan B (Non-thesis)

Plan B is available under special circumstances and requires 30 hours of graduate coursework.

Plan B candidates must also prepare one professional paper (i.e., content and form compatible with publication in a scientific journal) or, if the adviser requests, two professional papers in selected topic areas.

An oral defense of the paper(s) is required.

Rangeland Ecology and Watershed Management, Ph.D.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Rangeland Ecology and Watershed Management/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between range and forest management and water resources, and to provide students with a degree program in rangeland ecology and watershed management which emphasizes the important issues in water resources.

Coursework and Thesis

- Water Resources requirements Credits: 10 *
- Statistics Credits: 3
- REWM 5620 - Range Management Seminar Credits: 1
- Other recommended graduate courses or substitution courses with adviser consent Credits: 12
- Plan A thesis Credit: 4

Minimum Credits: 30

*Water Resources Requirements

- Interdisciplinary component 9 hours (see Water Resources degree requirements)
- REWM5250 - Water Resources Seminar Credits: 1

Soil Science, M.S.

Plan A (Thesis)

Plan A requires the university minimum degree requirements and an oral final examination.

Plan B (Non-thesis)

Plan B is available and requires 30 hours of graduate coursework.

An oral defense of the paper(s) is required.

Soil Science, Ph.D.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Soil Science/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between soil science and water resources, and to provide students a soil science degree program which emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of SOIL 5960 to qualify for a master of science degree in soil science/water resources. Specific coursework will be determined by the

student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

Core Courses

Students must take or have taken equivalent courses in the four soils disciplines: physics, pedology, chemistry, and microbiology.

- SOIL5130 - Chemistry of the Soil Environment Credits: 3
- SOIL5140 - Soil Microbiology Credits: 4

Enhancement Courses

Students must take at least one of the following courses:

- SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems Credits: 4
- SOIL5150 - Forest and Range Soils Credits: 3
- SOIL5160 - Soil Health and Nutrient Cycling Credits: 3
- SOIL 5170 - Analytical Methods for Ecosystems Research

Interdisciplinary Component: 9 Hours

(see Water Resources degree requirements)

Seminar in Water Resources: 1 Hour

- REWM5250 - Water Resources Seminar Credits: 1

Graduate Seminar in Soil Science: 1 Hour

- SOIL5720 - Advanced Generalist Practice: Community and Rural Practice Credits: 3

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in soil science/water resources. In addition to coursework and a Plan A thesis, students must pass a final oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in soil science/water resources degree requirements and that research efforts are in the water area.

Water Resources, M.A.

Academic departments across the university cooperate to provide master of arts or master of science degree programs that contain multidisciplinary training in water resources. The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

The educational underpinnings of this program include the following:

- The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates.
- Training is to be consistent with the rigor of professional water resources demands.
- The interdisciplinary major program is flexible so as to meet the candidates' individual professional objectives.

Primary responsibility for student guidance and graduate program formulation resides with the sponsoring department and sponsoring major professor.

Please refer to latest updated information on the Web site listed above.

Upon acceptance to the program, the sponsoring department must assign a member of the Water Resources Curriculum Committee to the candidate's graduate committee. The Water Resources Curriculum Committee's representatives on the candidate's graduate committee shall aid in formulating deficiency requirements, course program design, academic performance criteria, and research objectives throughout the candidate's tenure in the program.

Program Specific Admission Requirements

- University application and fee;
- Application fee is valid for three years;
- Official documentation indicating bachelor's degree earned (not necessary if UW is the most recent institution attended);
- Potential candidates are encouraged to apply for admission to this program by contacting the participating department and by specifying at the initiation that they desire admission to the water resources interdisciplinary major. Their credentials will be evaluated by the sponsoring department and the department recommends admission of the individual into the program to the UW Admissions office.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To insure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Hydrology (3 Hours)

- CE4800 - Hydrology Credits: 3
- CE 4820 - Groundwater and Drainage Engineering Credits: 3
- CE5810 - Groundwater Hydrology Credits: 3
- GEOL5444 - Geohydrology Credits: 3
- GEOL5550 - Numerical Methods in Ground Water Geology I Credits: 3
- GEOL5570 - Advanced Geohydrology Credits: 3
- REWM5285 - Wildland Hydrology Credits: 3
- SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems Credits: 4
- MATH 5110 - Modelling Flow Transport in Soil and Groundwater Systems Credits: 4

Law/Natural Resource Economics (3 Hours)

- AGE4710 - Natural Resource Law and Policy Credits: 3
- AGE4720 - Water Resource Economics Credits: 3
- AGE5630 - Advanced Natural Resource Economics Credits: 3
- ECON4400 - Environmental Economics Credits: 3
- ECON4410 - Natural Resource Economics Credits: 3
- ECON5400 - Advanced Resource and Environmental Economics Credits: 3
- LAW6660 - Environmental Law Credits: 3
- LAW6860 - Water Law and Policy Credits: 3

Water Quality (3 Hours)

- GEOL4490 - Geochemistry Credits: 4
- GEOL5450 - Geochemical Modeling Credits: 3
- GEOL5777 - Geochemistry of Natural Waters Credits: 3
- REWM4710 - Watershed Water Quality Management Credits: 3
- REWM5710 - Watershed Water Quality Management Credits: 3
- SOIL4130 - Chemistry of the Soil Environment Credits: 3
- SOIL5130 - Chemistry of the Soil Environment Credits: 3
- ZOO4440 - Limnology Credits: 3

One-Hour Seminar in Water Issues

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

- REWM5250 - Water Resources Seminar Credits: 1

Water Resources, M.S.

Academic departments across the university cooperate to provide master of arts or master of science degree programs that contain multidisciplinary training in water resources. The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

The educational underpinnings of this program include the following:

- The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates.
- Training is to be consistent with the rigor of professional water resources demands.
- The interdisciplinary major program is flexible so as to meet the candidates' individual professional objectives.

Primary responsibility for student guidance and graduate program formulation resides with the sponsoring department and sponsoring major professor.

Please refer to latest updated information on the Web site listed above.

Upon acceptance to the program, the sponsoring department must assign a member of the Water Resources Curriculum Committee to the candidate's graduate committee. The Water Resources Curriculum Committee's representatives on the candidate's graduate committee shall aid in formulating deficiency requirements, course program design, academic performance criteria, and research objectives throughout the candidate's tenure in the program.

Program Specific Admission Requirements

- University application and fee;
- Application fee is valid for three years;

- ECON4410 - Natural Resource Economics Credits: 3
- ECON5400 - Advanced Resource and Environmental Economics Credits: 3
- LAW6660 - Environmental Law Credits: 3
- LAW6860 - Water Law and Policy Credits: 3

Water Quality (3 Hours)

- GEOL4490 - Geochemistry Credits: 4
- GEOL5450 - Geochemical Modeling Credits: 3
- GEOL5777 - Geochemistry of Natural Waters Credits: 3
- REWM4710 - Watershed Water Quality Management Credits: 3
- REWM5710 - Watershed Water Quality Management Credits: 3
- SOIL4130 - Chemistry of the Soil Environment Credits: 3
- SOIL5130 - Chemistry of the Soil Environment Credits: 3
- ZOO4440 - Limnology Credits: 3

One-Hour Seminar in Water Issues

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

- REWM5250 - Water Resources Seminar Credits: 1

Certificate

Early Childhood Program Director's Certificate

The Early Childhood Program Director's Certificate is available to early childhood professionals in the state as well as to students. The certificate program is designed to:

- fit Wyoming's Professional Development Career Lattice,
- fit the National Association for the Education of Young Children's guidelines for the Preparation of Early Childhood Professionals,
- complement the definition of Quality Child Care developed by the Wyoming Governor's Council on Early Childhood Development, and
- allow a variety of paths to certification.

The Early Childhood Program Director's Certificate can be completed as a stand-alone certificate, simultaneously with the distance Professional Child Development undergraduate concentration or the on-campus Human Development and Family Sciences undergraduate concentration in Family and Consumer Sciences, or to complement other related degree programs. Courses satisfy certification requirements in many states. They also fit professional development for home providers and daycare professionals.

Those who would benefit from these courses include: Head Start teachers and directors; home providers; Departments of Family Services, Adoption, and Social Service workers; public health nurses; school nurses; directors of school-age child care programs; preschool program teachers, and public school teachers.

The following courses are recommended for this certification. All courses must be taken for letter grade and completed with a grade of C or above.

Required Nutrition Course

- FCSC1141 - Principles of Nutrition Credits: 3

Required Early Childhood Program Administration Course

- FCSC4127 - Directing Preschool and Daycare Programs Credits: 3

Uniqueness and Cultural Awareness Courses:

Choose one of the following Uniqueness and Cultural Awareness courses:

- FCSC3220 - Multicultural Influences on Children and Families Credits: 3
- EDEC5220 - Children with Disabilities Credits: 3
- EDEC5240 - Evaluation of Young Children with Disabilities Credits: 3
- NURS 3020 - Cultural Diversity in Family Health Care Credits: 3
- SOC2350 - Race and Ethnic Relations Credits: 3

Family Relationships Courses:

Choose one of the following Family Relationships courses:

- FCSC2131 - Family Relations Credits: 3
- FCSC 3119 - Parent Child Relationships Credits: 3
- FCSC4124 - Families of Young Children With Special Needs Credits: 3

Early Childhood Growth and Development Courses:

Choose one of the following Early Childhood Growth and Development courses:

- FCSC2121 - Child Development Credits: 4
- OR
- PSYC2300 - Developmental Psychology Credits: 3 AND
- FCSC2122 - Child Development Lab Credits: 1

Health and Safety Courses:

Choose one of the following Health and Safety courses:

- FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs Credits: 2
- EDEC4350 - Health Management Issues in Early Education Credits: 3

Early Childhood Methods and Techniques Courses:

Choose nine credit hours from the following Early Childhood Methods and Techniques courses:

- FCSC4131 - Administration Internship in Child Development Credits: 6-8

- FCSC4130 - Internship in Child Development Credits: 6-8
- EDEC3000 - Observing Young Children Credits: 3
- EDEC3220 - Curriculum and Learning Environments in Early Childhood Education Credits: 3
- EDEC4320 - Oral and Written Language Acquisition Credits: 3
- EDEC5230 - Curriculum and Materials for Young Children with Disabilities Credits: 3

Reclamation/Restoration Ecology Graduate Certificate

The Reclamation/Restoration Ecology (RRE) graduate certificate prepares the student to use basic and applied ecological concepts to reclaim and/or restore processes and functions to disturbed ecosystems. Reclamation and/or restoration of disturbed ecosystems requires an understanding of the edaphic, biotic, hydrologic, geologic, and topographic factors comprising these ecosystems, including the complex interrelationships that support and perpetuate ecosystem function. The graduate certificate will be granted to students who have completed a B.S. in an appropriate science-oriented discipline or are currently enrolled in an M.S. or Ph.D. program.

The graduate certificate will also be available to professionals working in reclamation/restoration oriented fields seeking to upgrade their training in reclamation and restoration ecology. Those interested in the graduate certificate will be required to complete the course work listed below as well as write a synopsis paper with a formal presentation advertised as an open forum seminar.

Required Certificate Courses:

Reclamation and Restoration Ecology Courses: 6 Hours

- REWM4200 - Reclamation of Drastically Disturbed Lands Credits: 3
- REWM5580 - Rangeland Restoration Ecology Credits: 3

Reclamation Problems: 4 Hours

- SOIL5565 - Research in Soil Science Credits: 1-4
- OR
- REWM5640 - Investigation Credits: 1-4

Reclamation Process Course: 3 Hours

(choose one)

- BOT5700 - Vegetation Ecology Credits: 4
- BOT5730 - Plant Physiological Ecology Credits: 4
- BOT5780 - Biogeochemistry Credits: 3
- PLNT5070 - Weed Science and Technology Credits: 4
- PLNT5470 - Seed Science and Technology Credits: 3
- GEOL5444 - Geohydrology Credits: 3
- GEOL5570 - Advanced Geohydrology Credits: 3
- REWM 5280
- REWM5710 - Watershed Water Quality Management Credits: 3
- RNEW5540 - Shrubland Ecology Credits: 3

- SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems Credits: 4
- MATH 5110
- SOIL5130 - Chemistry of the Soil Environment Credits: 3
- SOIL5140 - Soil Microbiology Credits: 4
- SOIL5150 - Forest and Range Soils Credits: 3
- ZOO 5550

Planning/Policy Courses: 3 Hours

(Choose One)

- ENR4900 - ENR Policy in Practice Credits: 3
- ENR5900 - ENR Policy in Practice Credits: 3

Minimum Total Credits Needed: 16 Hours

Other Programs

Family and Consumer Sciences Core Requirements

A core curriculum is required of all family and consumer sciences majors. This requirement is based on a common body of knowledge in family and consumer sciences that includes concepts relevant to all concentrations.

Core Courses:

The Family and Consumer Sciences Core Consists of the Following Courses

- FCSC2200 - Professionalism and Communication in FCSC Credits: 3

Plus

Plus one course from each of the following categories outside your concentration - in consultation with your advisor:

Human Nutrition and Food:

- FCSC1141 - Principles of Nutrition Credits: 3
- FCSC1150 - Scientific Study of Food Credits: 3

Design, Merchandising and Textiles:

- FCSC1180 - Applied Design Credits: 3
- FCSC2165 - Introduction to Fashion and Dress Credits: 3
- FCSC2180 - Housing and Residential Design Credits: 3
- FCSC3171 - Introduction to Textile Science Credits: 3

Human Development and Family Sciences:

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- FCSC2121 - Child Development Credits: 4
- FCSC2131 - Family Relations Credits: 3
- FCSC2133 - Intimate Relationships Credits: 3
- FCSC3110 - Personal Finance Credits: 3
- FCSC3220 - Multicultural Influences on Children and Families Credits: 3

College of Arts & Sciences

113 Arts and Sciences Building

Camellia Okpodu, Dean

Phone: (307) 766-4106 FAX: (307) 766-2697

Web site: www.uwyo.edu/as

Aims and Objectives

The College of Arts and Sciences (A&S) is committed to providing a balanced education that matches cultural breadth with disciplinary depth. Students in the College of Arts and Sciences learn to address complex contemporary problems and to place them in their wider social, historical and ethical contexts. To achieve these goals, degree programs require students to develop expertise in a particular field, gain critical understanding of major areas of human knowledge and select from required courses and free electives to prepare for the challenges of the new century.

A successful student in any of the departments and programs in the College of Arts and Sciences will have an excellent foundation for professional success, graduate study, and a passion for lifelong learning.

Through hands-on research and creative projects (either on faculty projects or independently with faculty guidance and mentoring), fieldwork, internships, and study abroad, students integrate and bring coherence to their classroom learning.

Student Responsibilities

To graduate from the College of Arts and Sciences, students must satisfy all university, college, and major requirements for a given degree. These requirements apply whether the work is taken within the college or transferred from anywhere else within or outside the university (please refer to section below "Acceptance of Transfer Credit").

The college holds students responsible for knowing degree and major requirements and for completing the necessary courses. Students are also expected to know the regulations that govern the academic standards needed to continue study at the university. Students should be aware that changing majors and/or colleges may result in delays in meeting degree requirements and that requirements themselves sometimes change (see "Graduation Requirements and Procedures" section of this *Catalog*).

Academic Advising

To help plan a program of study, students are assigned an academic adviser by the department/ program of their major. Students undecided about a major are advised in the UW Advising, Career, and Exploratory Studies office (222 Knight Hall).

Students should consult regularly with their academic adviser not only for course scheduling, but also to discuss educational and career goals. Faculty and professional advisers can connect students to the many college and university resources to assist undergraduate study. Instructors are also willing to discuss concerns students may have regarding specific courses.

Changing/Declaring a Major or Minor

When ready to declare or change a major, minor, or dual/concurrent major in a department or program in the college, the appropriate form is available from the Office of the Registrar (167 Knight Hall) or the Registrar's Web page. Approval is required from the appropriate department heads/program directors. Departments/programs will assign advisors at the time of signing their approval on the form.

Programs of Study

Undergraduate Degrees

A variety of specialized concentrations are offered within many of the following degree programs. Take a look at the department sections in this *Catalog* that follow this section or the departments' Web sites. Additionally, there are several inter-college or interdisciplinary degrees/majors such as Earth System Science and the affiliated major in Environment and Natural Resources that draw courses from several disciplines. See more detailed descriptions in this *Catalog* or the University of Wyoming home page at www.uwyo.edu, click on the A-Z Directory.

Minors in Arts and Sciences

The College of Arts and Sciences offers all university students systematic studies leading to recognized academic minors. Minors are available in all academic programs in the college and in a number of interdisciplinary areas.

A&S minors have two aims: to encourage students to create a focus for their course work outside their major by coordinating their elective studies; and to enhance chances of employment or graduate admission with a formally recognized field of study.

Minors consist of course requirements ranging from 18-24 credit hours of study, typically including significant work at the junior and senior level. A&S departments and programs offering minors and interdisciplinary degrees may have further conditions and

restrictions regarding requirements in the minor. To be counted toward a minor, courses must be completed with a grade of C or better.

Students desiring a minor must notify the department in which the minor is offered. Forms for declaring a minor are available in the Office of the Registrar (167 Knight Hall) or on the Registrar's Web page. The department of the minor will assign an adviser.

For a description of the minors in A&S, see department offices or Web sites.

Minors available in the College of Arts and Sciences include:

African American and Diaspora Studies

Aging Studies

American Studies

Anthropology

Art Department

Art History

Ceramics

College Degree Requirements- The 2015 A&S Core

Bachelor of Arts or Science Programs

Beginning fall 2015, new university and college general education curricula, the 2015 University Studies Program (USP) and the 2015 A&S Core, were implemented. Refer to the USP section of this *Catalog* for details regarding University Studies requirements.

Students who matriculate for the first time at UW or a Wyoming community college in fall 2015 or after are required to follow both the new USP and A&S Core. Students transferring from a Wyoming community college with an associate's degree and the Wyoming Core completed between May 2013 and fall 2015, may continue to complete the 2003 USP and 2003 A&S Core requirements (if there has been no interruption in their enrollment for a year or more). Students who matriculated at UW or a Wyoming community college prior to fall 2015 and choose the 2015 USP must also complete the 2015 A&S Core requirements. For additional information please refer to the sections in this *Catalog* that describe the university graduation requirements, the 2015 University Studies Program, and the policies for reenrolling at UW after an absence of a year or more.

I. College credit hour requirements

- A. **Minimum total semester hours 120**
- B. **Upper-division credit requirements (42).** Thirty of the 42 hours must be earned from UW. Courses must be taken for a letter grade unless offered for S/U only. This is an all-university requirement for all degree programs and may come from the courses that fulfill the USP, the A&S Core, the major, the minor, and electives.
- C. **Major field of study (30-60).** Credit hours in excess of 60 in the major subject may not be used to satisfy the requirement of 120 hours for graduation. Credits in AS internship, independent study or special topics courses (AS 2400, AS 2490, AS 4400, AS 4500, AS 4510, AS 4900, and AS 4975) may not be used to fulfill these outside the major requirements. At least 30 hours of C grade or better must be earned in the major subject (the major may require more). Courses in the major must be taken for a letter grade unless offered for S/U only.
- D. **A&S Core requirements (6).** Courses must be taken for a letter grade unless offered for S/U only.

All other university and college regulations apply. See "Graduation Requirements and Procedures" section of this *Catalog* for more information. Graduate level "Enrichment" courses do not count toward the requirements for a bachelor's degree.

II. 2015 A&S Core Curriculum

Graduates of the College of Arts and Sciences are expected to be liberally educated, to have the knowledge and skills to deal with the unexpected, and to see opportunities from multiple perspectives. To develop these abilities, the college faculty implemented the A&S Core.

The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

1. **U.S. Diversity (ASD).** This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.
2. **Global Awareness (ASG).** Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples

of the world, including international systems of commerce, art, science, technology, politics, communication, belief, and justice, among other.

College Degree Requirements Prior to Fall 2015 for Continuing and Reenrolling Students

A&S Core requirements for a student continuing a degree program in effect at the time of matriculation at UW are found in the relevant previous *Catalog*. Contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwoyo.edu.

Students who re-enter the university after an absence of a year or more should refer to other sections of this Catalog for university policies and procedures. Unless approved otherwise, reenrolling students, after a year's absence, are required to follow the University Studies and A&S Core requirements in effect the semester of their re-enrollment. However, all majors in A&S who have yet to complete the A&S Core, regardless of their initial enrollment, must refer to the current list of approved courses.

Checksheets and lists of courses that satisfy A&S college core requirements are available on the Web at www.uwoyo.edu/as or in the A&S Advising Center, Ross 6, 766-4013, asadvising@uwoyo.edu.

Departments and programs in the College of Arts and Sciences may require reenrolling students to complete requirements in the major that meet the current expectations of the discipline.

Transfer Students and Acceptance of Transfer Credit

The College of Arts and Sciences and its departments reserve the right to grant transfer credit toward the bachelor's degree only for those courses where a grade of C or better was earned. Students transferring credits from a university or college outside Wyoming with questions about how courses taken elsewhere fulfill the A&S Core may contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwoyo.edu.

Courses Taken for S/U Credit

Students may include up to 20 semester credit hours in free electives with a grade of S as part of the total hours required by the College of Arts and Sciences for graduation. However, no S/U hours may be used to satisfy university and college core general education requirements or major requirements, including the required 42 upper-division credit hours unless the course is offered for S/U grading only.

Students registering in courses for S/U grades are subject to all general regulations.

Concurrent Majors

Students may pursue two or more majors simultaneously. With careful planning, A&S students may be able to use all or most of the free elective hours for requirements in the other majors. Refer also to the section, "Graduation Requirements and Procedures" in this *Catalog*.

The A&S Core must be met only once by students whose primary major is in the College of Arts and Sciences. Students whose degree programs are in other UW colleges are welcome to earn a concurrent major in A&S. These students do not have to meet the A&S Core requirements. The student earns one degree with one diploma.

Students pursuing a concurrent major must contact both departments involved for assignments to advisers.

Dual Degrees

Students may simultaneously pursue degrees in the same or more than one UW college. In addition to requirements described in the section "Graduation Requirements and Procedures" in this *Catalog*, students in another UW college who wish to earn a degree from A&S must also complete the A&S Core. A&S students working on dual degrees in the A&S College need to meet the A&S Core just once. A diploma is awarded for each degree.

Each additional degree requires 30 more credit hours added to the 120 credits to the primary degree. Of these 30 credits, 12 have to be at the 3XXX-4XXX levels.

Second Bachelor's Degrees

For students seeking a second bachelor's degree in the College of Arts and Sciences whose **first degree is from another university**, the minimum requirements include:

- 30 semester hours earned from the University of Wyoming, 12 of which must be upper division (3XXX-4XXX level) or graduate level (credit by examination does not count as UW hours).
- Completion of the U.S. and Wyoming Constitutions requirement (V courses in the University Studies Program course list in this *Catalog*).
- If the first degree is from an institution where English is not the predominant language, the COM1 and COM2 requirements of the University Studies Program must be completed successfully.
- Students must also meet the 2015 A&S Core requirements.

For students whose **first degree is from UW**:

- The additional required 30 hours (12 of these at the 3XXX-4XXX) are added to the degree requiring the least number of hours. For example, for a first degree A&S requires 120 hours. So the total credits a UW student would have to complete for the second bachelor's degree is a minimum of 150 credits. Since the University requires a total of 42 upper division hours for a degree, for the second degree from A&S, a UW student would need to earn a total of 54 hours at the 3XXX-4XXX level. For more information, please see the Second Bachelor's Degree entry in the section, "Graduation Requirements and Procedures" in this *Catalog*.
- Students whose **first degree is from another UW college** must meet the 2015 A&S Core requirements.
- In situations in which a student is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student's department can ask the Office of the Registrar to load selected courses into the student's record.

Concurrent Major in Environment and Natural Resources

A student majoring in any A&S department/program may earn a double major by completing the courses required for the Environment and Natural Resource (ENR) program in addition to the requirements in their A&S major and the College A&S Core. The School of ENR Web site, <http://www.uwyo.edu/enr> has detailed information, or contact the School at (307) 766-5080.

Preprofessional Studies

The College of Arts and Sciences prepares students to enter professional schools through preprofessional programs of study described below.

Prelaw Study. Students usually need a bachelor's degree prior to beginning the study of law. There is no prescribed course of undergraduate study and no restrictions as to the field in which the degree is earned. However, to prepare for this competitive profession, prelaw students are advised to select courses that help to develop those talents and skills essential to the study and

practice of law. Logical and critical thinking, conflict evaluation/resolution and effective verbal/nonverbal communication skills are essential. Additionally, students should understand the political, economic, social and cultural institutions and values that characterize human society. Rigorous courses in any discipline increase abilities in these areas. Regardless of the prelaw major, courses in the broad liberal arts--the sciences, social sciences, fine arts and humanities--increase understanding of the public's diverse interests and backgrounds.

Prelaw students do not have to declare a major at the time of first enrollment if they wish to explore options. Students who are undeclared in the College of Arts & Sciences are assigned advisers in the Advising, Career, and Exploratory Studies office until they decide upon a degree program. Please note that a prelaw minor is available.

In addition to an adviser in the major, prelaw students may contact the designated UW prelaw adviser for assistance in developing a program of study, for career counseling and for guidance in applying to law schools. Contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwyo.edu for information.

Detailed information about applying to law schools, the Law School Admissions Test (LSAT) and preparation materials, and links to other web sites are at www.LSAC.org.

Library Preprofessional Study. Librarians are information professionals who research, organize, and classify materials so the public can access information. Not only do they work with printed materials, but all the technological advances in digital media such as electronic databases and eBooks. Some librarians focus on teaching the public, scholars, and students how to access and use these materials, while others concentrate on collecting and maintaining these diverse resources. Librarianship offers many career opportunities to people of different academic backgrounds, interests, and talents. Most public, academic, and special libraries require a Master's degree in library science (MLS).

The degree programs and minors in the College of Arts and Sciences offer the variety of academic preparation expected by accredited library schools in the country. Most of the graduate schools in library science require a bachelor's degree, a good undergraduate record, and a reading knowledge of a foreign language for admission. The best undergraduate preparation includes a wide range of courses in the sciences, social sciences, and humanities along with a strong concentration in one subject area. The choice of a major will be determined by the student's academic interest and professional objective. The general education that the University Studies and the A&S Core require provide the well-rounded background graduate schools expect of their MLS candidates.

Additional information about library schools, their requirements, and programs as well as career opportunities may be obtained from the reference desk at Coe Library and the Center for Advising and Career Services. The U.S. Bureau of Labor Statistics "Occupational Outlook Handbook" at www.bls.gov/ooh/ has detailed descriptions of the varied work of librarians, working conditions, employment outlook, and sources for additional information.

Pre-Health Study. Students in several A&S majors may be working toward the following careers: athletic training, chiropractic, dentistry, medicine, occupational therapy, optometry, physical therapy, physician assistant, or public health. These professional schools are favorably impressed by a broad educational background, including a substantial number of non-science and science courses; therefore, students are well advised to look beyond the minimum requirements.

Students may select any major in which they are interested to discuss preparation for such careers. In addition to completing all university, college and departmental requirements, students must include in their curriculum the basic professional school requirements, including courses in biology, chemistry, math, and physics. Professional schools have other specific requirements and students should learn about any additional recommendations from those professional schools in which they are interested. We strongly suggest contacting the Pre-Health Advising office [College of Health Sciences, 110 Health Sciences, (307) 766-3878, or hsadvise@uwyo.edu] website: www.uwyo.edu/preprof/.

Common majors in the College of A & S for these preprofessional programs include Chemistry, Biology, Botany, Psychology, and Physiology. However, there are pre-health students in programs as diverse as theatre and dance and anthropology. Students need not declare a major immediately upon first enrollment. Advisers in individual departments can discuss options or if students wish to remain undeclared, they are advised in either the UW Advising, Career, and Exploratory Studies office or the Health Sciences Advising office.

The pre-health advisers in the College of Health Sciences have current information regarding professional school admission requirements, entrance examinations, programs in Western Interstate Commission on Higher Education (WICHE), the Wyoming Medical Contract Program WWAMI (affiliated with the University of Washington School of Medicine) and financial assistance for professional education. The website, <http://www.uwyo.edu/preprof/> includes additional information.

Internships

Many departments in the College of Arts and Sciences offer internships for academic credit, and some provide monetary compensation. Academic internships provide practical, hands-on experience in a professional job setting as a complement to classroom instruction. An internship can provide students with both insight and preparation for future jobs. All internships require a strong background in writing, organizational ability and analytic skills. Junior or senior standing is recommended.

Major

African American and Diaspora Studies, B.A.

Thematic tracks in the major or minor are optional:

- History
- Culture & Aesthetics
- Politics & Law
- Rhetoric & English
- Religion & Philosophy
- Media Studies

Major Requirements

The B.A. in African American and Diaspora Studies consists of 35 credit hours:

Core Courses

15 credit hours of core course requirements:

- AAST1000 - Introduction to African American Studies Credits: 3
- AAST2240 - Introduction to African Studies Credits: 3
- AAST2360 - African American History Credits: 3
- AAST3130 - Global Impact of African Cultures Credits: 3
- AAST4975 - Independent Research Credits: 1-3

Lower Division Course

- 3 credit hours of a lower division (1000- or 2000- level) AAST course (excludes core courses)

Upper Division Courses

- 6 credit hours of upper division (3000- or 4000-level) AAST courses - internships are highly recommended

Lower Division or Upper Division AAST Course

- 3 credit hours of a lower division or upper division AAST course (excludes core courses)

Foreign Language

- 8 credit hours of a single foreign language

American Studies, B.A.

Undergraduate Major

The American Studies B.A. frames and develops each student's individual interests, and allows students to include courses from any program and department that sustain a student's engagement with their particular emphasis. Individual programs of study are as varied as our students.

We value each student as a person, and understand that an education is much more than a list of courses. Our advising is central in supporting each student's path and success through the major and beyond the degree.

Examples of concentrations that draw on courses outside American Studies - interests which we then integrate in our independent studies, internships, and the senior seminar - include sports studies, popular music history, comparative ethnic studies, marketing, military history, sustainability, disability advocacy, museum studies, philosophy of science, environmental studies, public health and social justice, and the U.S. in international perspectives. Each student develops a concentration of study with their American Studies advisor with ample room to combine courses and interests into a coherent undergraduate education.

The American Studies B.A. can be an attractive second major for students in any UW degree program where cultural context enriches and expands work in their professional or scholarly field. The flexible nature of our B.A. allows us to work effectively with students changing majors at any point in their undergraduate experience as well as transfer students.

Program Learning Outcomes

Students graduating with a B.A. in American Studies integrate study from several fields with their study in American Studies courses, in individual programs of study. The American Studies B.A. prepares students to enter graduate and professional programs, enter education certification programs, and work in community organizations and other public professional settings. Coursework in American Studies prepares students to:

- Interpret American experiences and creative expressions by applying appropriate approaches to words, narratives, images, material objects, communities, built environments, cross-cultural comparison, continuities and discontinuities with the past in a range of American cultural settings.
- Understand the processes of diversity experience including their own, through study of identity formation, performance of identity, stereotyping, contact, memory, and national identity.
- Demonstrate critical analysis, interpretation, or insight, through effective communication primarily in writing but also in speaking (when appropriate, performance or display may embody these as well), as demonstrated in analytically coherent interpretive writing, authoritative, informed oral presentation, and well-documented, visually effective performance or display (where appropriate).
- Apply American Studies methods field-based courses and/or internships, through use of Studies approaches and competencies in non-classroom settings, as demonstrated in field course or internship evaluations and students' final reports.

Internship

The internship experience is essential for students specializing in public sector American studies. The American Studies program has an active program of scholarship-supported internships that can place students in work environments in Wyoming, other parts of the U.S., or in selected foreign countries.

Language

Because American Studies is both an international field with scholars all over the world, and the U.S. has transnational significance, **we strongly encourage students to take 2 years of language study** to achieve meaningful access to skills as readers, scholars, and travelers, and consider participating in an international exchange. Some languages currently in demand by American Studies students include Spanish, Arabic, and Japanese.

Curriculum

Through the following curriculum, students develop individual programs of study, with their advisers, to understand and engage American cultures.

Students pursuing Program Honors should also write an undergraduate thesis. Contact the Program Director for more details.

Foundation (12 credit hours)

- AMST2010 - Introduction to American Studies (3 credit hours)
- One course at the 1000- or 2000-level in an interdisciplinary field, including American History, or from departments and programs such as AADS, ENR, INST, GWST, LTST, NAIS, RELI, or appropriate courses transferred from other institutions, to be named in the program of study in consultation with an American Studies advisor. (3 credit hours)
- Two courses at any level from programs in The School of Culture, Gender, and Social Justice or appropriate substitutes in consultation with an American Studies advisor. (6 credit hours)

Concentration (27 credit hours)

Core (9 credit hours)

Each student must take three AMST courses at the 3000-4000 level, excluding the senior seminar. These seminars are designed to maintain an interdisciplinary view of American culture and to foster an American Studies community. (9 credit hours)

Theme (18 credit hours)

An American Studies theme is devised, in consultation with the student's adviser, and is presented to the American Studies core faculty in writing as a proposed course of study. This proposal is usually made at the end of the second year of study (or upon completion of 60 hours of course work toward graduation), since the document guides the student through an exploration of American culture. Typical themes include: American diversity, environment and society, material culture and everyday life, visual culture and media, American cultural history, American institutions and public culture, the United States in international perspective. The theme must include a minimum of 6 credit hours and a maximum of 9 credit hours in a single discipline. Up to 3 credits can be granted for courses at the 1000-2000 level. (18 credit hours)

Capstone (6 Credits)

As part of the 6 credit hours of senior capstone requirements, each student must complete 3 credit hours of Senior Seminar. The additional 3 credit hours can be through either Independent Study or Internship.

- AMST4985 - Senior Seminar Credits: 3
AND
- AMST4010 - Independent Study Credits: 1-3
OR
- AMST4970 - Internship Credits: 1-3

Anthropology, B.A.

At the completion of the Bachelor of Arts degree in Anthropology, students will be able to demonstrate knowledge about the four subfields of anthropology and their interrelationships; they will have participated in a research experience and understand its process; and, they will demonstrate ability to analyze and synthesize in relation to anthropological issues or theories.

Specific Requirements for a B.A.

In addition to university and college requirements listed in this *Catalog*, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975.

- ANTH1100 - Introduction to Biological Anthropology Credits: 4
- ANTH1200 - Introduction to Cultural Anthropology Credits: 3
- ANTH1300 - Introduction to Archaeology Credits: 3
- ANTH2000 - Introduction to Linguistic Anthropology Credits: 3

- ANTH3300 - Ethnographic Methods in Anthropology Credits: 3
OR
- ANTH3310 - Introduction to Anthropology Research Methods Credits: 3

Also Required

Also required are an additional 21 credits of upper division anthropology for a total of 25 upper division (3000+) credits within the major, including at least one course from three different subfields (cultural anthropology, linguistic anthropology, biological anthropology, and archaeology).

Upper Division Cultural Anthropology

Courses that can be used to fulfill upper division cultural anthropology are

- ANTH4023 - Seminar in Cultural Anthropology Credits: 3
- ANTH4300 - Anthropology of Religion Credits: 3
- ANTH4310 - Environmental Anthropology Credits: 3
- ANTH4320 - Political Anthropology Credits: 3
- ANTH4325 - Symbolic Anthropology Credits: 3
- ANTH4330 - Social Organization Credits: 3
- ANTH4340 - Culture Change Credits: 3

- ANTH4350 - Medical Anthropology Credits: 3
- ANTH4380 - Visual Anthropology Credits: 3
- ANTH4020 - Seminar Credits: 3-6 (with instructor's Consent)

Upper Division Linguistic Anthropology

Courses that can be used to fulfill upper division linguistic anthropology are

- ANTH4024 - Seminar in Linguistic Anthropology Credits: 3
- ANTH4740 - Native American Languages and Cultures Credits: 3
- ANTH4765 - Language Humor and Games Credits: 3
- ANTH 4775
- ANTH4785 - Language and Racism Credits: 3
- ANTH4795 - Language Change Credits: 3
- ANTH4020 - Seminar Credits: 3-6 (with instructor's Consent)

Upper Division Biological Anthropology

Courses that can be used to fulfill upper division biological anthropology are

- ANTH4022 - Seminar in Biological Anthropology Credits: 3
- ANTH4210 - Human Osteology Credits: 3
- ANTH4215 - Hominin Evolution Credits: 3
- ANTH4220 - Human Variation Credits: 3
- ANTH4230 - Forensic Anthropology Credits: 3
- ANTH4255 - Bioarchaeology Credits: 3
- ANTH4260 - Anthropology of Food, Culture, and Nutrition Credits: 3
- ANTH4020 - Seminar Credits: 3-6 (with instructor's Consent)

Upper Division Archaeology

Courses that can be used to fulfill upper division archaeology are

- ANTH4021 - Seminar in Archaeology Credits: 3
 - ANTH4110 - Zooarchaeology I Credits: 3
 - ANTH4115 - Lithic Analysis Credits: 3
 - ANTH4120 - North American Archaeology Credits: 3
 - ANTH4125 - Northwestern Plains Prehistory Credits: 3
 - ANTH4130 - Old World Archaeology Credits: 3
 - ANTH4145 - Origins of the State Credits: 3
 - ANTH4150 - Seminar in Prehistory Credits: 1-3
 - ANTH4160 - GIS in Anthropology Credits: 4
 - ANTH4170 - Geoarchaeology Credits: 3
 - ANTH4175 - South American Prehistory Credits: 3
 - ANTH4020 - Seminar Credits: 3-6 (with instructor's consent)
- OR**
- Six credits of archaeological field school (ANTH 4140 or ANTH 5180).

Recommended

It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or STAT 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

Art Education, B.A.

B.A. IN ART EDUCATION DEGREE

The Art Education degree supports students' development as reflective, innovative and engaged K-12 art educators. The curriculum encompasses extensive Studio Art competencies as well as studies in Art History and Professional Education. Art Education courses cover a variety of teaching practices and methods of curriculum development that include interdisciplinary, multicultural approaches to teaching and emphasize relevance to the lives of K-12 students and the realities of our contemporary world. In-class learning is augmented with firsthand teaching experiences in local and regional schools, the University of Wyoming Art Museum, and includes teaching people of all ages in community-based arts settings. Upon graduation from our program, students earn Wyoming licensure for teaching K-12 Art.

Degree Requirements

Requirements of the degree include:

- 120 hours, including 91 hours within the major
- C or better in all courses taken to satisfy Major requirements
- Background check for all incoming art education degree students required prior to enrollment
- Application for art education degree is due prior to enrollment in Art Education courses
- 2.75 UW Total Institution GPA must be maintained throughout the Art Education Program of study
- 2.75 GPA within the major must be maintained throughout the Art Education Program of study
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses
- Score of 158 or above on the on the Praxis II Test: Art Content and Analysis by the end of the Residency semester

Application

Students must fulfill the requirements listed in the *Application for the Art Education Program Checklist*:

- Satisfactory Completion of ART 2000 Portfolio Review
- C or above in all Education Courses
- C or above in all Art Content Courses
- Junior Standing (60+ credits)
- 2.75 or above overall UW total institutional GPA
- 2.75 or above in Major courses
- Completed background check

Probation, Removal, and Re-Application

- An Institutional and/or Major GPA below 2.75 mandates a probationary semester in the program (continuing with art ed courses) to raise GPA back up to 2.75 to continue

- If Institutional and Major GPA are not both above 2.75 by the end of the probationary semester, the student will be removed from the program
- Students may re-apply after removal from program if their GPA is again at or above 2.75

Foundation Core: 15 Hours

- ART1005 - Drawing I Credits: 3
required
- ART1110 - Foundation: Two Dimensional Credits: 3
required
- ART1120 - Foundation: Three Dimensional Credits: 3
required
- ART1130 - Foundation: Color Theory Credits: 3
required
- ART1115 - Digital Media Credits: 1
required
- ART2000 - Portfolio Review Credits: 1
required
- ART2305 - Techniques: Wood/Art Preparation Credits: 1
required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

- ART2005 - Drawing II Credits: 3
- ART2210 - Painting I Credits: 3
- ART2112 - VCD I Visual Thinking Credits: 3

- ART2255 - Introduction to Photography, Digital Credits: 3
OR
- ART2265 - Introduction to Photography, Black and White Credits: 3

- ART3510 - Printmaking I Credits: 3

3D Studio

Note: only one Ceramics class can count in the Studio Core

- ART2310 - Sculptural Practices I Credits: 3
- ART2350 - Metalsmithing I Credits: 3

- ART2410 - Ceramics I Credits: 3
OR

- ART2420 - Ceramics II Credits: 3

Art History Core: 6 Hours

- ART2010 - Art History I Credits: 3
required
- ART2020 - Art History II Credits: 3
required

Upper Division Art History: 6 hours

6 credits of upper division art history beyond ART 2010 and ART 2020

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Art Education Program Requirements

Minimum Course Requirements for B.A. in Art Education

Minimum course requirements for Art Education Majors follow the curriculum plan for the B.A. in Studio Art Degree:

- University and College requirements,
- Foundations Core,
- Art History Core,
- Studio Core
- Upper Division Studio Electives.

The exception that there is no Foreign Language requirement. Students are required to apply for a Wyoming Substitute Teaching Certificate in the fall of their first semester in the program. Additional requirements are:

Professional Education Courses: 10 Hours

EDST 2480: Diversity and the Politics of Schooling Credits: 4

required

- EDST2450 - Foundations of Development and Learning Credits: 3
required
- EDEX2484 - Introduction to Special Education Credits: 3
required

Art Education Courses: 27 Hours

- ART3430 - Methods I Credits: 3
required
- ART3490 - Philosophy, Theory and Issues Credits: 3

required

- ART3550 - Art Education Practicum Credits: 1-3
required
- ART4440 - Methods II Credits: 3
required
- ART4460 - Curriculum Design Credits: 3
required
- ART4810 - Residency for Elementary Credits: 6
required
- ART4820 - Residency for Secondary Credits: 6
required

Studio or Art History Elective, any level: 3 Hours

**3 units of course in Studio Art or Art History at any level*

Art History, B.A.

The B.A. in Art History major offers students with a course of study that will provide depth and breadth in the history of art. Students will develop a broad understanding of world art, study the art of western and other global cultures in-depth, and explore the historiography and professional practices related to the field. Closely linked to the Museum Studies minor curriculum, the B.A. in Art History has a strong vocational application. This degree provides preparation for entry into graduate school or for students who want to enter the work force after their undergraduate education. Students will have the experience and training to enter into the cultural sector (arts or archival management, non-profit work in the arts and humanities, etc.).

Program Requirements

Requirements of the degree include:

- 120 hours, including 58 hours within the major
- All Art courses must be passed with a letter grade of C or better
- 2.50 GPA within major required
- 2.50 or above overall UW total institutional GPA
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses

Art History Core: 12 Hours

- ART2010 - Art History I Credits: 3 *required*
- ART2020 - Art History II Credits: 3 *required*
- ART2030 - History of Graphic Design Credits: 3
required
- ART2700 - Introduction to Museology Credits: 3
required

Upper Division Electives: 30 Hours

**30 units - with the following stipulations:*

15 hours 3000 or 4000 level Art History Courses

6 hours of ART 4790 Art Seminar

6 hours of upper division art history taken in other departments with cross listed courses

Courses in other disciplines as applicable

Honors Courses as applicable (Honors Program)

Potential other courses on a case by case basis in consultation with art history advisor

3 credits Internship or Art History travel course in consultation with art history advisor

Cross listed and applicable courses

*6 hours of upper division art history may be taken in other departments with cross listed courses (that may have prerequisites other than Art History).

- ART4830 - Victorian Women's Lives: Their Art, Literature and Culture Credits: 3
OR
- GWST4830 - Victorian Women's Lives: Their Art, Literature and Culture Credits: 3

- ART4780 - History of Women Artists Credits: 3
OR
- GWST4780 - History of Women Artists Credits: 3

- ARE3030 - History of Architecture Credits: 3
- AMST4250 - The Harlem Renaissance Credits: 3

- AMST4640 - Art and Ecology Credits: 3
OR
- ART 4640 - Art and Ecology Credits: 3

- Special Topics in American Studies including travel courses (as appropriate)
- Special topics in Classical and Modern Languages-including travel courses (as appropriate)
- HIST 4070 - History of the Book
- HIST 4075 - History of the Book
- HIST 4076 - History of the Book
- HIST4077 - Book History: Topics Credits: 3

Art Seminar

*6 hours of ART 4790 Art Seminar (fulfills USP COM 3 requirement)

- ART4790 - Art Seminar Credits: 1-3
required

Upper Division Art History: 15 hours

*15 hours 3000 or 4000 level Art History Courses

Internship or Travel

*3 credits Internship or Art History travel course in consultation with art history advisor

- ART4400 - Internship Credits: 1-3

Foreign Language: 15 Hours

- LANG1010 - First Semester in (TOPIC) Credits: 1-4
- LANG1020 - Second Semester in (TOPIC) Credits: 1-4
- LANG2030 - Third Semester in (TOPIC) Credits: 1-4
- LANG2040 - Fourth Semester in: (TOPIC) Credits: 3

Astronomy and Astrophysics, B.S.

The Bachelor of Science degree in astronomy and astrophysics is administered by the Department of Physics and Astronomy faculty. Please see the Physics and Astronomy listing in this *Catalog* for more information.

Requirements

Students in the Bachelor of Science in Astronomy major program are required to complete the following courses:

- ASTR1050 - Survey of Astronomy Credits: 4
- ASTR2310 - General Astronomy I Credits: 4
- ASTR2320 - General Astronomy II Credits: 4
- ASTR4610 - Introduction to Astrophysics Credits: 3
- PHYS1210 - Engineering Physics I Credits: 4
- **OR**
- PHYS1310 - College Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
- **OR**
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3
- PHYS3000 - Methods of Physics Credits: 4
- PHYS3640 - Modern Electronics and Experimental Techniques Credits: 4
- PHYS3650 - Advanced Lab in Modern Physics and Electronics Credits: 4
- PHYS4210 - Classical Mechanics I Credits: 3
- PHYS4310 - Quantum Mechanics Credits: 3
- PHYS4410 - Electricity and Magnetism I Credits: 3
- PHYS4420 - Electricity and Magnetism II Credits: 3
- PHYS4510 - Thermodynamics and Statistical Mechanics Credits: 3
- PHYS4840 - Mathematical and Computational Physics II Credits: 4
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2310 - Applied Differential Equations I Credits: 3

Biology, B.S.

The Bachelor of Science degree in Biology is designed to provide a thorough foundation in biology and other supporting areas of science and mathematics, while providing maximum flexibility and student choice. The degree program is administered by the Department of Botany.

The Biology major is designed for students interested in obtaining a broad education in biological sciences. It enables students to combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the major. On completion of the core requirements for the major, specific courses selected to complete the major may vary according to students' interests and are worked out by consultations between student and adviser. The requirements for a bachelor of science degree in biology are as follows:

*Course must be completed with a grade of C or better.

Freshman Year: Fall

- LIFE1010 - General Biology Credits: 4 *
- First-Year Seminar Credits: 3 * (FY)
- MATH1400 - College Algebra Credits: 3
- CHEM1020 - General Chemistry I Credits: 4
- **OR**
- CHEM1000 - Introductory Chemistry Credits: 4

Total: 14 Hours

Freshman Year: Spring

- ENGL1010 - College Composition and Rhetoric Credits: 3 *
- MATH1405 - Trigonometry Credits: 3
- COSC1010 - Introduction to Computer Science I Credits: 4
- A&S Core Global Credits: 3

One of the Following

- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- MICR2021 - General Microbiology Credits: 4
- MOLB2021 - General Microbiology Credits: 4

Total: 16 Hours

Sophomore Year: Fall

- MATH2200 - Calculus I Credits: 4
- PHYS1110 - General Physics I Credits: 4
- Human Culture Credits: 3 (H)

One of the Following

- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- MICR2021 - General Microbiology Credits: 4
- MOLB2021 - General Microbiology Credits: 4

Total: 15 Hours

Sophomore Year: Spring

- LIFE3050 - Genetics Credits: 4
- LIFE2100 - Intro Research and Analysis Credits: 4
OR
- STAT2050 - Fundamentals of Statistics Credits: 4
- PHYS1120 - General Physics II Credits: 4
- Human Culture Credits: 3 (H)

Total: 15 Hours

Junior Year: Fall

- CHEM2300 - Introductory Organic Chemistry Credits: 4
- Communication II Credits: 3 (COM2) *
- LIFE3400 - General Ecology Credits: 3
- US and WY Constitutions Credits: 3 (V)

Total: 13 Hours

Junior Year: Spring

- MOLB3610 - Principles of Biochemistry Credits: 4
- A&S Core US Diversity Credits: 3
- LIFE3500 - Evolutionary Biology Credits: 3
- Upper Division Electives Credits: 6

Total: 16 Hours

Senior Year: Fall

- LIFE3600 - Cell Biology Credits: 4
- BOT4100 - Scientific Communication Credits: 2 (COM3) *
- BOT4101 - Scientific Communication Lab Credits: 1 (COM3) *
- Upper Division Electives Credits: 8

Total: 15 Hours

Senior Year: Spring

- Upper Division Electives Credits: 16

Total: 16 Hours

Biology, Ecology and Evolution Concentration, B.S.

The Department of Botany offers the Ecology and Evolution Concentration for Biology majors. This concentration will prepare students for a career or further graduate study. Students will receive the academic training to become park naturalists, environmental consultants, restoration ecologists, natural resource managers, conservation scientists, environmental educators, and research technicians in academic or government agencies. In addition to core concepts and theories, this concentration will teach students important skills that are required in the workforce, including organism identification, quantitative reasoning, data analysis, and scientific communication. Students also will have opportunities to participate in faculty research projects, which will train them for graduate research, careers in scientific discovery, or any endeavor where critical thinking and problem solving are essential components of the vocation.

To fulfill the requirements of the concentration, students will select five courses that meet a minimum of 15 credit hours in addition to what is required for the Biology Major. These will be selected from a variety of upper-division (3000-4000) courses that satisfy their individual interests (listed below).

Students must select

1. one course in organismal biology (A),
2. one course in ecology (B),
3. one course in evolution (C),
4. any one additional course from these three categories,
5. and one fourth-year capstone course (D).

Students who concentrate in Ecology and Evolution should plan to take LIFE3500 - Evolutionary Biology in their third year to be able to take an additional evolution course before graduating. All courses listed below will count toward this concentration. However, there are many other excellent courses offered across campus that are relevant to this concentration. Students can obtain approval to take other courses that are not included on the list below to satisfy the requirements of the concentration.

List of Potential Courses

A. Organismal Biology

- BOT3600 - Plant Diversity and Systematics Credits: 4
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- BOT4360 - Mushrooms of the Rocky Mountains Credits: 3
- SOIL4540 - Microbial Diversity and Ecology Credits: 4
- ZOO4540 - Invertebrate Zoology Credits: 4
- BOT4395 - Symbiosis Credits: 3

B. Ecology

- BOT4700 - Vegetation Ecology Credits: 4
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4650 - Tropical Field Ecology Ecuador Credits: 4

- BOT4280 - Paleobotany Credits: 4
OR
- GEOL4280 - Paleobotany Credits: 4

- BOT4780 - Biogeochemistry Credits: 3
- BOT4235 - Marine Biology Credits: 3
- BOT4200 - Plant-Microbe Interactions Credits: 3

C. Evolution

- BOT4790 - Special Topics in Ecology Credits: 1-3 (Macroevolution)
- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution of development)
- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution seminar)

- BOT5060 - Fundamental Concepts in Evolution Credits: 3
OR
- ZOO5060 - Fundamental Concepts in Evolution Credits: 3

D. Senior Capstone Course

- BOT4965 - Undergraduate Research in Botany Credits: 1-10

Botany, B.S.

Botany is a B.S. degree and are required to take the following:

*Course must be completed with a grade of C or better.

Freshman Year

Students take introductory courses in biology, chemistry, physics, and mathematics. These courses provide the foundation for more advanced work in upper division biology courses and contribute to a more comprehensive understanding of biological processes.

Freshman Year: Fall

- LIFE1010 - General Biology Credits: 4
- First-Year Seminar Credits: 3 * (FY)
- MATH1400 - College Algebra Credits: 3
- CHEM1020 - General Chemistry I Credits: 4
OR
- CHEM1000 - Introductory Chemistry Credits: 4

Total: 14 Hours

Freshman Year: Spring

- LIFE2022 - Animal Biology Credits: 4
- ENGL1010 - College Composition and Rhetoric Credits: 3
- MATH1405 - Trigonometry Credits: 3
- CHEM1030 - General Chemistry II Credits: 4
- A&S Core Global Credits: 3

Total: 17 Hours

Sophomore Year

Students take introductory courses in biology, chemistry, physics, and mathematics. These courses provide the foundation for more advanced work in upper division biology courses and contribute to a more comprehensive understanding of biological processes.

Sophomore Year: Fall

- LIFE2023 - Biology of Plants and Fungi Credits: 4
- MATH2200 - Calculus I Credits: 4

- LIFE2100 - Intro Research and Analysis Credits: 4
OR
- STAT2050 - Fundamentals of Statistics Credits: 4
- PHYS1110 - General Physics I Credits: 4
- Human Culture Credits: 3 (H)

Total: 15 Hours

Sophomore Year: Spring

- MICR2021 - General Microbiology Credits: 4
OR
- MOLB2021 - General Microbiology Credits: 4
- BOT3000 - Plant Ecophysiology/Plant Form and Function Credits: 4
- PHYS1120 - General Physics II Credits: 4
- Human Culture Credits: 3 (H)

Total: 15 Hours

Junior Year

Students take courses in genetics, ecology, evolution and statistics and meet with their adviser regularly to assess progress toward meeting all degree requirements.

Junior Year: Fall

- BOT3600 - Plant Diversity and Systematics Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- Communication II Credits: 3 (COM2)
- LIFE3400 - General Ecology Credits: 3
- LIFE3410 - Introduction to Field Ecology Credits: 2

Total: 16 Hours

Junior Year: Spring

- MOLB3610 - Principles of Biochemistry Credits: 4
- A&S Core US Diversity Credits: 3
- LIFE3050 - Genetics Credits: 4
- Elective Credits: 3

Total: 14 Hours

Senior Year

In consultation with their advisers, students select advanced courses in the biological sciences that they find particularly interesting. Advisers maintain lists of suggested courses that include offerings from a variety of departments at UW.

Senior Year: Fall

- BOT4700 - Vegetation Ecology Credits: 4
- BOT4100 - Scientific Communication Credits: 2 (COM3) *
- BOT4101 - Scientific Communication Lab Credits: 1 (COM3) *
- Upper Division Elective Credits: 4 (BOT)
- Elective Credits: 3

Total: 14 Hours

Senior Year: Spring

- BOT4730 - Plant Physiological Ecology Credits: 4
- US and WY Constitutions Credits: 3 (V)
- Upper Division Electives Credits: 8

Total: 15 Hours

Chemistry, B.A.

The department offers both, B.A. and B.S. degree programs. The B.A. degree includes a minimum of 32 hours of chemistry. The Plan 1 B.S. degree requires at least 38 hours. The Plan 2 B.S. requires 46 hours of chemistry courses. Since the chemistry required in the first two years of all programs is the same, students interested in pursuing a chemistry major can elect any program initially. Discussions with a departmental adviser will allow students to choose the most appropriate major for their career objectives. In general, students planning graduate work in chemistry should elect one of the B.S. programs. The B.A. program has a more liberal content with additional electives. It would support careers in business, law and advanced study in areas needing a strong chemistry background such as toxicology or forensic science.

A B.A. is suitable for students in the College of Education who wish to obtain an A&S degree, and may also be appropriate for some premedical tracks. The Plan 2 (CACS) program is designed to meet standards set by the American Chemical Society (ACS). A student who completes the Plan 2 B.S. program will be certified by the Department of Chemistry to the ACS as having met the specific ACS requirements for undergraduate professional training in chemistry. Students must obtain a grade of C- or higher in each of the chemistry, physics or math courses specifically required for their degree.

Plan 1

(32 hours of chemistry)

Course Requirements

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- **Additional USP requirements** Credits: 21
- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 45

Basic Chemistry: 26 Hours

- CHEM1050 - Advanced General Chemistry I Credits: 4 **AND**
- CHEM1060 - Advanced General Chemistry II Credits: 4
- **OR**
- CHEM1020 - General Chemistry I Credits: 4 **AND**
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3
- **OR**
- CHEM4507 - Physical Chemistry I Credits: 3
- CHEM4110 - Introductory Inorganic Chemistry Credits: 3

Additional Upper-Level Chemistry: 6 Hours

(Including one of the following)

- CHEM4100 - Inorganic Chemistry Laboratory Credits: 2
- CHEM4230 - Instrumental Methods of Chemical Analysis Credits: 5
- CHEM4530 - Physical Chemistry Laboratory II Credits: 1

PHYS: 8 Hours

- PHYS1310 - College Physics I Credits: 4 **AND**
- PHYS1320 - College Physics II Credits: 4
- **OR**
- PHYS1110 - General Physics I Credits: 4 **AND**
- PHYS1120 - General Physics II Credits: 4
- **OR**
- PHYS1210 - Engineering Physics I Credits: 4 **AND**
- PHYS1220 - Engineering Physics II Credits: 4

Minimum Total: 120 Hours

Suggested Program for a Bachelor's Degree in Chemistry

(Freshman and Sophomore Years)

Suggested Course Sequence

Freshman Year: Fall

- CHEM1050 - Advanced General Chemistry I Credits: 4
- **OR**
- CHEM1020 - General Chemistry I Credits: 4
- ENGL1010 - College Composition and Rhetoric Credits: 3
- MATH2200 - Calculus I Credits: 4
- A&S Core or University Studies Requirements Credits: 3-4

Total: 14-15 Hours

Freshman Year: Spring

- CHEM1060 - Advanced General Chemistry II Credits: 4
- **OR**
- CHEM1030 - General Chemistry II Credits: 4
- MATH2205 - Calculus II Credits: 4
- A&S core or University Studies requirements Credits: 6-8

Total: 14-16 Hours

Sophomore Year: Fall

- CHEM2420 - Organic Chemistry I Credits: 4
- PHYS1310 - College Physics I Credits: 4
- **OR**

- PHYS1210 - Engineering Physics I Credits: 4
OR
- PHYS1110 - General Physics I Credits: 4
- A&S core or University Studies requirements Credits: 3-4

Total: 15-16 Hours

Sophomore Year: Spring

- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- PHYS1320 - College Physics II Credits: 4
OR
- PHYS1220 - Engineering Physics II Credits: 4
OR
- PHYS1120 - General Physics II Credits: 4
- A&S core or University Studies requirements Credits: 3-4

Total: 15-16 Hours

Chemistry, B.S.

The department offers both, B.A. and B.S. degree programs. The B.A. degree includes a minimum of 32 hours of chemistry. The Plan 1 B.S. degree requires at least 38 hours. The Plan 2 B.S. requires 46 hours of chemistry courses. Since the chemistry required in the first two years of all programs is the same, students interested in pursuing a chemistry major can elect any program initially. Discussions with a departmental adviser will allow students to choose the most appropriate major for their career objectives. In general, students planning graduate work in chemistry should elect one of the B.S. programs. The B.A. program has a more liberal content with additional electives. It would support careers in business, law and advanced study in areas needing a strong chemistry background such as toxicology or forensic science.

A B.A. is suitable for students in the College of Education who wish to obtain an A&S degree, and may also be appropriate for some premedical tracks. The Plan 2 (CACs) program is designed to meet standards set by the American Chemical Society (ACS). A student who completes the Plan 2 B.S. program will be certified by the Department of Chemistry to the ACS as having met the specific ACS requirements for undergraduate professional training in chemistry. Students must obtain a grade of C- or higher in each of the chemistry, physics or math courses specifically required for their degree.

Plan 1

(38 hours of chemistry)

Course Requirements

- CHEM4930 - Undergraduate Research Credits: 1-3
- Additional upper-level chemistry Credits: 3
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- **Additional USP requirements** Credits: 21

- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 34

Basic Chemistry: 34 Hours

- CHEM1050 - Advanced General Chemistry I Credits: 4 **AND**
- CHEM1060 - Advanced General Chemistry II Credits: 4
- **OR**
- CHEM1020 - General Chemistry I Credits: 4 **AND**
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM4000 - Career Skills Credits: 1 (1 Hour)
- CHEM4100 - Inorganic Chemistry Laboratory Credits: 2
- CHEM4110 - Introductory Inorganic Chemistry Credits: 3
- CHEM4507 - Physical Chemistry I Credits: 3
- CHEM4508 - Physical Chemistry II Credits: 3
- CHEM4525 - Physical Chemistry Lab I Credits: 1
- CHEM4530 - Physical Chemistry Laboratory II Credits: 1

PHYS: 8 Hours

- PHYS1310 - College Physics I Credits: 4 **AND**
- PHYS1320 - College Physics II Credits: 4
- **OR**
- PHYS1210 - Engineering Physics I Credits: 4 **AND**
- PHYS1220 - Engineering Physics II Credits: 4

Minimum Total: 120 Hours

Plan 2 (CACS)

(46 hours of chemistry)

Course Requirements

- CHEM4930 - Undergraduate Research Credits: 1-3
- Additional upper-division chemistry Credits: 2-3
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- **Additional USP requirements** Credits: 21
- **Additional A & S core requirements** Credits: 6
- **Electives** Credits: 4-6

Basic Chemistry: 41-42 Hours

- CHEM1050 - Advanced General Chemistry I Credits: 4 **AND**
- CHEM1060 - Advanced General Chemistry II Credits: 4
- **OR**
- CHEM1020 - General Chemistry I Credits: 4 **AND**
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM4400 - Biological Chemistry Credits: 3
- **OR**
- MOLB3610 - Principles of Biochemistry Credits: 4
- **OR**
- MOLB4600 - Advanced Biochemistry Credits: 3
- CHEM4000 - Career Skills Credits: 1 (1 Hour)
- CHEM4100 - Inorganic Chemistry Laboratory Credits: 2
- CHEM4110 - Introductory Inorganic Chemistry Credits: 3
- CHEM4230 - Instrumental Methods of Chemical Analysis Credits: 5
- CHEM4507 - Physical Chemistry I Credits: 3
- CHEM4508 - Physical Chemistry II Credits: 3
- CHEM4525 - Physical Chemistry Lab I Credits: 1
- CHEM4530 - Physical Chemistry Laboratory II Credits: 1

PHYS: 8 Hours

- PHYS1310 - College Physics I Credits: 4 **AND**
- PHYS1320 - College Physics II Credits: 4
- **OR**
- PHYS1210 - Engineering Physics I Credits: 4 **AND**
- PHYS1220 - Engineering Physics II Credits: 4

Computer Science: 3 Hours

- STAT2050 - Fundamentals of Statistics Credits: 4
- CHEM4515 - Applied Mathematics in Physical Chemistry I Credits: 3
- COSC1010 - Introduction to Computer Science I Credits: 4

Program Supporting Courses: 18 Hours

A group of courses selected to further the career objectives of the individual student. These are chosen after consultation with the departmental adviser and must subsequently be approved by the departmental Undergraduate Studies Committee. A grade of C- or higher is required for all program supporting courses.

Minimum Total: 120 Hours

Suggested Program for a Bachelor's Degree in Chemistry

(Freshman and Sophomore Years)

Communication, B.A.

Communication is a liberal arts degree relevant to a variety of careers in community relations, public relations, politics, administration, law, sales management and many other fields.

Required Courses

- COJO1040 - Introduction to Human Communication Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3040 - Advanced Communication Theory Credits: 3
- Electives Credits: 15 (At least 12 elective hours must be at the 3000-level or higher)

Additional Program Requirements

- Human Culture Credits: 6 (H)

Communication, B.S.

Communication is a liberal arts degree relevant to a variety of careers in community relations, public relations, politics, administration, law, sales management and many other fields.

Required Courses

Departmental Core Classes

- COJO1040 - Introduction to Human Communication Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3040 - Advanced Communication Theory Credits: 3
- Electives Credits: 15 (At least 12 elective hours must be at the 3000-level or higher)

Additional Program Requirements

- Physical and Natural World Credits: 6-8 (PN)
OR
- Quantitative Reasoning Credits: 6-8 (Q)

Criminal Justice, B.A.

Students pursuing a B.A. in criminal justice must fulfill university studies and college requirements as listed in this Catalog, satisfy required prerequisites to courses in the major program, and complete a minimum of 40 credit hours in the major. Only courses in which a grade of C or better has been earned may be used to satisfy major requirements.

Foundation Courses

- CRMJ1001 - Introduction to Criminal Justice Credits: 3
- CRMJ2210 - Criminal Law Credits: 3

- CRMJ2400 - Criminology Credits: 3
- OR**
- SOC2400 - Criminology Credits: 3

- CRMJ2685 - Research Methods in Criminal Justice Credits: 4
- CRMJ3110 - Criminal Courts and Processes Credits: 3
- CRMJ3350 - Correctional Theory and Practice Credits: 3
- CRMJ3490 - Issues in Policing Credits: 3
- CRMJ4200 - Ethics in Administration of Justice Credits: 3

Crime and Deviance

(2 courses, total of six hours)

- CRMJ3250 - Juvenile Delinquency Credits: 3
- OR**
- SOC3250 - Juvenile Delinquency Credits: 3
- CRMJ3400 - Deviant Behavior Credits: 3
- OR**
- SOC3400 - Deviant Behavior Credits: 3
- CRMJ3500 - Drugs and the Criminal Justice System Credits: 3
- CRMJ4151 - Crime Causation Credits: 3
- CRMJ4260 - Gangs Credits: 3

- CRMJ4705 - Terrorism Credits: 3
- OR**
- INST4705 - Terrorism Credits: 3
- OR**
- POLS4705 - Terrorism Credits: 3
- OR**
- SOC4705 - Terrorism Credits: 3

Criminal Justice Institutions & Processes

(2 courses, total of six hours)

- CRMJ4130 - Leadership and Management in the Criminal Justice System Credits: 3
- CRMJ4140 - Criminal Legal Procedure Credits: 3
- CRMJ4150 - Community-Based Corrections Credits: 3
- CRMJ4280 - Comparative Criminal Justice Credits: 3
- CRMJ4750 - Internship in Criminal Justice Credits: 1-12 (only 3 credit hours allowed for this category)
- CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law Credits: 3

Supporting Courses

(three credit hour course; or 1 additional course from Crime & Deviance or Criminal Justice Institutions & Processes categories):

- CRMJ4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
OR
- POLS4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- CRMJ4230 - Forensic Anthropology Credits: 3
OR
- ANTH4230 - Forensic Anthropology Credits: 3
- CRMJ4350 - Sociology of Law Credits: 3
OR
- SOC4350 - Sociology of Law Credits: 3
- CRMJ4370 - Criminal Psychopathology Credits: 3
OR
- PSYC4370 - Criminal Psychopathology Credits: 3
- CRMJ4540 - Gender and Crime Credits: 3
OR
- GWST4540 - Gender and Crime Credits: 3
- CRMJ4600 - Political Violence Credits: 3
OR
- POLS4600 - Political Violence Credits: 3
- CRMJ4730 - Psychology and Law Credits: 3
OR
- PSYC4730 - Psychology and Law Credits: 3
- CRMJ4750 - Internship in Criminal Justice Credits: 1-12

- CRMJ4760 - Child Maltreatment Credits: 3
OR
- PSYC4760 - Child Maltreatment Credits: 3
- CRMJ4965 - Research Hours in Criminal Justice Credits: 1-6
- CRMJ4975 - Readings Credits: 1-3
- CRMJ4990 - Topics: Credits: 1-3

In Addition

In addition to the above required courses, it is required that students take POLS 1000, STAT 2050 or STAT 2070, one lab science, and two semesters of the same foreign language. A grade of C or better must be earned to satisfy these additional requirements. Upper division course work that was completed more than ten years prior to graduation will not meet major requirements.

Criminal Justice, Prelaw Concentration, B.A.

The Department of Criminal Justice offers a Pre-Law Concentration for Criminal Justice majors that consists of courses selected from several departments across the university. These courses were chosen to help prepare students for the challenges of law school and the practice of law. Students electing the Pre-Law Concentration are urged to seek advising early.

Along with the 40 hours of criminal justice degree requirements, an additional 27 credit hours (18 of which must be 3000-level courses or above) must be earned for the Pre- Law Concentration. All coursework must be completed with a grade of C or better to be counted toward the concentration.

Verbal Comprehension and Expression: 3 Hours Minimum

- COJO2095 - Persuasive Argumentation Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3160 - Theory of Language and Society Credits: 3
- AGECE4450 - Negotiation Credits: 3
- HIST4515 - American Legal History Credits: 3

Written Comprehension and Expression: 6 Hours Minimum

- Any two (2) courses with a USP designation of WC
OR
- COM3 may be counted in this area.

Critical Understanding of Human Institutions and Values: 3 Hours Minimum

- ECON1020 - Principles of Microeconomics Credits: 3
- MGT3110 - Business Ethics Credits: 3
- PHIL3120 - Ancient Greek Philosophy Credits: 3
- PHIL3250 - Global Justice Credits: 3
- PHIL3300 - Ethical Theory Credits: 3

- PHIL3340 - Philosophy in Literature Credits: 3 (max. 3 hours)
OR
- ENGL3340 - Philosophy in Literature Credits: 3 (max. 3 hours)
- PHIL3350 - History of Moral Philosophy Credits: 3
- PHIL3500 - History of Science Credits: 3
- POLS4051 - Environmental Politics Credits: 3
OR
- AMST4051 - Environmental Politics Credits: 3
OR
- ENR4051 - Environmental Politics Credits: 3
OR
- GEOG4051 - Environmental Politics Credits: 3
OR
- REWM4051 - Environmental Politics Credits: 3
- COJO4260 - Rhetoric and Social Justice Credits: 3
OR
- AAST4260 - Rhetoric and Social Justice Credits: 3

Creative and Analytical Thinking: 3 Hours Minimum

- CW2050 - Introduction to Fiction Credits: 3
OR
- CW2060 - Introduction to Nonfiction Credits: 3 (max. 3 hours)
OR
- CW2080 - Introduction to Poetry Credits: 3 (max. 3 hours)

- PHIL3140 - Philosophy of Science Credits: 3
- PHIL3420 - Symbolic Logic Credits: 3
- PHIL3510 - Introduction to Epistemology Credits: 3
- STAT4015 - Regression Analysis Credits: 3

- AGE4550 - Negotiation Analysis Credits: 3
OR
- ENR4550 - Negotiation Analysis Credits: 3

World Cultures and International Institutions: 3 Hours Minimum

- INBU1040 - Introduction to International Business Credits: 3
OR
- INST1040 - Introduction to International Business Credits: 3
- HIST1320 - World History to 1500 Credits: 3
- HIST1330 - World History since 1500 Credits: 3

- INST2310 - Introduction to International Relations Credits: 3
OR
- POLS2310 - Introduction to International Relations Credits: 3

- PHIL3320 - Eastern Thought Credits: 3
- ANTH3420 - The Anthropology of Global Issues Credits: 3
OR
- INST3420 - The Anthropology of Global Issues Credits: 3
- CRMJ4280 - Comparative Criminal Justice Credits: 3

- INST4340 - International Organizations Credits: 3
OR
- POLS4340 - International Organizations Credits: 3
- INST4370 - Global Political Economy Credits: 3
OR
- SOC4370 - Global Political Economy Credits: 3

Electives: 9 Hours Max (3 Courses)

- ECON1000 - Global Economic Issues Credits: 3

- COMM1030 - Interpersonal Communication Credits: 3
OR
COJO 1030 - Interpersonal Communication Credits: 3

- COMM1040 - Intro to Communication Theory Credits: 3
OR
COJO 1040 - Intro to Communication Theory Credits: 3

- MGT1040 - Legal Environment of Business Credits: 3
- ANTH1200 - Introduction to Cultural Anthropology Credits: 3

- CNSL2200 - Introduction to Student Leadership Credits: 2
- STAT3050 - Statistical Methods Credits: 3
- POLS3100 - Politics and the Judicial Process Credits: 3
- COJO3190 - Cross-Cultural Communication Credits: 3
- PHIL3440 - Philosophy of Mind Credits: 3
- POLS4100 - Constitutional Law: Institutional Powers Credits: 3
- CRMJ4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- OR**
- POLS4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- ANTH4340 - Culture Change Credits: 3
- OR**
- INST4350 - Culture Change Credits: 3

- CNSL4520 - Fundamentals of Counseling (B) Credits: 3
- POLS4840 - Seminar in Public Law Credits: 3

English, B.A.

The English major requires 36 hours of work within the major and an additional 12 hours of a single foreign language. 21 of the hours within the major must be taken at the upper division. Only those courses in which a grade of C or better has been earned may count toward the 36 hours required for the B.A. and the foreign language requirement. No 1000-level courses count toward the B.A.

Specific courses that fulfill the Expanding the Canon requirements will be identified each semester. They will focus on global/postcolonial texts or texts of diversity (e.g. Native American, African-American, and Latinx literatures; feminist or queer theory, disability studies). Additional courses that may fulfill the Historical Period requirements beyond those listed below will also be identified each semester.

Prerequisites

Most 2000-level courses require the completion of the COM1 requirement. Normally, 3000-level courses have the COM1, ENGL 2025, and one 2000-level "broad historical sweep" course (one of ENGL 2410, ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, ENGL 2360) as prerequisites, and 4000-level courses have 6 hours of 2000-level English courses as prerequisites. Students without certain prerequisites should consult the English department for permission to enroll.

English Tracks

There are two tracks within the English degree: a Literary Studies track and an English Studies track. The former focuses on the study of literature and culture, while the latter balances literary study with courses in rhetoric and composition and professional writing. All English Education students are required to take the English Studies track.

- Literary Studies Track
- English Studies Track

Environmental Geology and Geohydrology, B.S.

The Environmental Geology and Geohydrology (EGGH) degree is designed for those students who intend to become professionals in environmental fields such as consulting, site assessment, hazard assessment, and remediation. The degree will prepare students for graduate school in environmental disciplines and for entry-level jobs.

Required Courses

One of the Following:

- GEOL1005 - Earth History Credits: 4
- GEOL1100 - Physical Geology Credits: 4
- GEOL 1200 - Historical Geology Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4

And Each of the Following:

- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- GEOL2010 - Mineralogy Credits: 3
- GEOL2080 - General Field Geology Credits: 3
- GEOL2100 - Stratigraphy and Sedimentation Credits: 4
- GEOL4444 - Geohydrology Credits: 4
- GEOL4490 - Geochemistry Credits: 4
- GEOL4777 - Geochemistry of Natural Waters Credits: 3
- GEOL4880 - Earth Surface Processes Credits: 3
- GEOL4820 - Capstone Credits: 3

Required Allied Math and Science Courses

- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- PHYS1110 - General Physics I Credits: 4
- **OR**
- PHYS1210 - Engineering Physics I Credits: 4
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4

One of the Following:

- LIFE1010 - General Biology Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- MATH2210 - Calculus III Credits: 4
- PHYS1120 - General Physics II Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4

Additional Electives

Additional 18 credit hours of Electives, in consultation with advisor

- GEOL 2005 - Intro to Geophysics Credits: 4
- OR**
- GEOL3005 - Principles of Geophysics Credits: 4
- GEOL2020 - Introduction to Petrology Credits: 2
- GEOL2070 - Introduction to Oceanography Credits: 4
- GEOL4610 - Structural Geology and Tectonics Credits: 4
- GEOL3400 - Geologic Hazards: A Historical and Scientific Review Credits: 4
- GEOL3500 - Global Change: A Geological Perspective Credits: 4
- GEOL3600 - Earth and Mineral Resources Credits: 4
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4
- GEOL4001 - Modeling the Earth System Credits: 4
- GEOL4113 - Geological Remote Sensing Credits: 4
- GEOL4525 - Environmental Data Analysis Credits: 4
- GEOL4888 - Glaciology Credits: 3

Note:

Students are encouraged, in consultation with their adviser, to design a major that best fits their interests and goals. With this in mind, there are many courses outside the Department of Geology and Geophysics that may be substituted for courses in the Electives (B) list above provided that such substitutions are made with the consent of an adviser. A list of such courses may be obtained from the Department. Students who seek the Geology BS may not also seek EGGH as a double major, and vice versa.

French, B.A.**Required Courses**

- FREN2040 - Second Year French II Credits: 3
- FREN2140 - Introduction to Reading Credits: 3
- FREN3005 - French Phonetics and Pronunciation Credits: 3
- FREN3050 - Third Year French I Credits: 3
- FREN3060 - Third Year French II Credits: 3
- 15 hours of electives at the 3000 or 4000 level.

Suggested Curriculum: Four Year Plan

(for students with no prior background in the language)

Freshman Year: Fall

- FREN1010 - First Year French I Credits: 4

Freshman Year: Spring

- FREN1020 - First Year French II Credits: 4

Sophomore Year: Fall

- FREN2030 - Second Year French I Credits: 4

Sophomore Year: Spring

- FREN2040 - Second Year French II Credits: 3
- FREN2140 - Introduction to Reading Credits: 3

Junior Year: Fall

- FREN3005 - French Phonetics and Pronunciation Credits: 3
- FREN3050 - Third Year French I Credits: 3

Junior Year: Spring

- FREN3060 - Third Year French II Credits: 3
- French 3000-4000-level Credits: 3

Senior Year: Fall

- FREN4200 - Introduction to Research Credits: 3
- French 3000-4000-level Credits: 3

Senior Year: Spring

- Language 4000-5000-level Credits: 6

Total: 30 Hours

Gender and Women's Studies, B.A.

For the gender and women's studies major, the student must complete 30 credit hours of gender and women's studies courses. All courses must be completed with a grade of "C" or better.

Core Courses Credits: 9 Hours

Introductory Course Credits: 3 Hours

Choose ONE from:

- GWST1080 - Introduction to Women's Studies Credits: 3
- GWST2000 - Introduction to LGBTQ/NS Studies Credits: 2
- GWST1900 - Women and Leadership Credits: 3

Theory/Methods Courses Credits: 6 Hours

- GWST3710 - Gender and Humanities Credits: 3
OR
- GWST2500 - Gender and Society Credits: 3
OR
- GWST4210 - Feminist Research Methods Credits: 3
- GWST4700 - Feminist Theories Credits: 3

Free Electives Credits: 21 Hours

Students may choose from our full complement of courses to complete their major requirements.

We encourage students to take courses that are history-based, global, and those that address sexuality, ethnicity, and identity. Students have the option to do 21 hours in one of the following areas, in one or more areas, or create an independent path under consultation with the advisor. Possible areas of emphasis include:

Culture and Representation; Science, the Body and Sexualities; Social Policy and Social Justice; Independent Path. (see advisor for list of offerings)

As part of their 21 free elective hours students, with a minimum GPA of 3.300, have the option of pursuing internships (GWST 4970).

Gender and Women's Studies with Honors

Honors in Gender and Women's Studies recognizes academically ambitious students who have excelled in their undergraduate careers, and who are ready for graduate school and/or employment in the public or private spheres. Requirements include an overall minimum GPA of 3.500 and the completion of GWST 4965, Senior Honors Project. Students in UW Honors Program, McNair Scholars Program, or other departments that require completion of an independent research project may dovetail their honors work in GWST with those programs.

For students beginning in Fall 2015, Honors in Gender and Women's Studies requires the completion of 3 semesters of foreign language or sign language, or a concentration in quantitative analysis and research methods, including statistics.

Geology and Earth Science, B.A.

Program Objectives

The primary mission of our B.A. geology program is to provide a broad educational experience that prepares men and women for careers in earth science-related fields. We expect that our graduate should:

- Have the basic knowledge and skills demanded for entry-level competence in typical careers in earth science related fields.
- Be able to apply their knowledge to specific situations or problems.
- Cultivate the skills and ethics that will allow them effectively to serve their employers and to enhance their own career development.
- Develop increased capacity for independent learning, critical thinking, and problem solving.

- Develop basic numerical skills and computer literacy as part of an undergraduate program designed to deliver a current and relevant knowledge of their discipline.
- Communicate effectively and professionally through oral, written, and graphical means and to participate effectively in the work environment, both in individual and team-related activities.
- Have the broad general education needed to appreciate the role of Earth Sciences in the societal context and appreciate the importance of ethics in the practice of the profession.

Program Goals

The department of Geology and Geophysics has the following specific goals for its B.A. program:

- Students in the B.A. program will receive a broad preparatory education in earth science and related fields that is current, relevant, practical, and personal.
- B.A. students who graduate with appropriate grades will be able to compete successfully for positions at graduate schools nationwide.
- B.A. students who graduate with appropriate grades will be well prepared for entry-level positions in the geosciences and other related disciplines.

Required Courses

Each of the following:

- GEOL 1000-level intro lab course(s) Credits: 4-8
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- GEOL2010 - Mineralogy Credits: 3
- GEOL2020 - Introduction to Petrology Credits: 2
- GEOL2100 - Stratigraphy and Sedimentation Credits: 4
- GEOL2080 - General Field Geology Credits: 3
- GEOL4820 - Capstone Credits: 3
- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- PHYS1110 - General Physics I Credits: 4
- MATH1405 - Trigonometry Credits: 3
- **OR**
- MATH1450 - Algebra and Trigonometry Credits: 5

Six Courses from the Following

- ATSC2000 - Introduction to Meteorology Credits: 4
- **OR**
- GEOG3450 - Weather and Climate Credits: 3
- ECON2400 - Economics of the Environment Credits: 3
- GEOG3010 - Geomorphology of Earth's Dynamic Landscapes Credits: 3
- GEOL 2005 - Intro to Geophysics Credits: 4
- **OR**
- GEOL3005 - Principles of Geophysics Credits: 4
- GEOL2050 - Principles of Paleontology Credits: 3
- GEOL2070 - Introduction to Oceanography Credits: 4

- GEOL3600 - Earth and Mineral Resources Credits: 4
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4
- GEOL3400 - Geologic Hazards: A Historical and Scientific Review Credits: 4
- GEOL3500 - Global Change: A Geological Perspective Credits: 4
- GEOL4444 - Geohydrology Credits: 4
- GEOL4490 - Geochemistry Credits: 4
- GEOL4610 - Structural Geology and Tectonics Credits: 4
- GEOL4835 - Applied/Exploration Geophysics Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- SOIL4120 - Genesis, Morphology and Classification of Soils Credits: 4
- ECON4400 - Environmental Economics Credits: 3
- OR**
- ECON4410 - Natural Resource Economics Credits: 3

Additional Electives

Additional 12 hours of electives with adviser consultation, at least 6 hours of which must be taken outside of the Department of Geology and Geophysics.

Geology, B.S.

Program Objectives

The primary mission of our B.S. geology program is to provide a quality educational experience that prepares men and women to enter careers in geology and related fields. We expect that our graduates should:

- Have the basic knowledge and skills demanded for entry-level competence in typical careers in earth science.
- Be able to apply basic scientific and technical knowledge to specific tasks and problems.
- Cultivate the specific scientific and technical skills that will allow them effectively to serve their employers and to enhance their own career development.
- Develop increased capacity in the skills of independent learning, critical thinking, problem definition, and problem solving.
- Develop enhanced numerical skills and computer literacy as part of an undergraduate program designed to deliver a current and relevant knowledge of their discipline.
- Communicate effectively and professionally through oral, written, and graphical means and to participate effectively in their workplace and in individual and team-related activities.
- Have the broad general education needed to appreciate the role of Earth Sciences in the societal context and appreciate the importance of ethics in the practice of the profession.

Program Goals

The department of Geology and Geophysics has the following specific goals for its B.S. program:

- Students in the B.S. program will receive a quality preparatory education in the discipline that is current, relevant, practical, and personal.
- B.S. students who graduate with appropriate grades will be able to compete successfully for positions at graduate schools nationwide.

- B.S. students who graduate with appropriate grades will be well prepared for entry-level positions as professionals within their and other related disciplines.

Required Courses

Note: This program represents a minimum proficiency. Students are strongly advised to elect additional courses in geology.

One of the Following:

- GEOL1005 - Earth History Credits: 4
- GEOL1100 - Physical Geology Credits: 4
- GEOL 1200 - Historical Geology Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4

And Each of the Following:

- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- GEOL 2005 - Introduction to Geophysics Credits: 4
OR
- GEOL3005 - Principles of Geophysics Credits: 4
- GEOL2010 - Mineralogy Credits: 3
- GEOL2020 - Introduction to Petrology Credits: 2
- GEOL2100 - Stratigraphy and Sedimentation Credits: 4
- GEOL4610 - Structural Geology and Tectonics Credits: 4
- GEOL4717 - Field Course in Geology Credits: 1-8 (to be taken in 1 of the last 2 summers on campus)
- GEOL4820 - Capstone Credits: 3

Additional Geology Courses

Additional 18 credit hours in Geology courses at 2000-level and above:

Allied Math and Sciences Credits: 20 Hours

- CHEM1020 - General Chemistry I Credits: 4
OR
 - CHEM1050 - Advanced General Chemistry I Credits: 4
 - CHEM1030 - General Chemistry II Credits: 4
OR
 - CHEM1060 - Advanced General Chemistry II Credits: 4
OPTION A: Fundamental Math
 - GEOL2120 - Quantitative GeoMethods Credits: 3
AND
 - MATH2200 - Calculus I Credits: 4
- OR**

OPTION B: Advanced Math

MATH 2200 - Calculus I. Credits: 4

AND

- MATH2205 - Calculus II Credits: 4
- OR**
- MATH2250 - Elementary Linear Algebra Credits: 3
- OR**
- GEOL4525 - Environmental Data Analysis Credits: 4
- PHYS1110 - General Physics I Credits: 4
- OR**
- PHYS1210 - Engineering Physics I Credits: 4
- OR**
- Eng Physics Credits: 4

German, B.A.

Required Courses

- GERM2040 - Second Year German II Credits: 3
- GERM3050 - Third Year German I Credits: 3
- GERM3060 - Introduction to German Literature Credits: 3
- 21 hours of electives in German above GERM 2030.

Suggested Curriculum

(for students with no prior background in the language)

Freshman Year: Fall

- GERM1010 - First Year German I Credits: 4

Freshman Year: Spring

- GERM1020 - First Year German II Credits: 4

Sophomore Year: Fall

- GERM2030 - Second Year German I Credits: 4

Sophomore Year: Spring

- GERM2040 - Second Year German II Credits: 3

Junior Year: Fall

- GERM3050 - Third Year German I Credits: 3
- German 3000-4000-level Credits: 3

Junior Year: Spring

- GERM3060 - Introduction to German Literature Credits: 3
- German 3000-4000-level Credits: 6

Senior Year: Fall

- GERM4200 - Introduction to Research Credits: 3
- German 3000-4000-level Credits: 3

Senior Year: Spring

- German 4000-5000-level Credits: 6

Total: 30 Hours

History, B.A.

The History major requires a minimum of 36 credit hours in History courses or approved substitutions and an additional 12 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages. All courses used to satisfy major requirements - including the language requirement - must be completed with a grade of C or better. To complete the Bachelor of Arts (B.A.) degree in History, all University Studies Program (USP) and college requirements must also be satisfied.

Requirements

Specific requirements for the History major are as follows:

Lower-Division Electives: 12 Hours

Upper-Division Electives: 15 Hours

Elective: Any Level: 3 Hours

One additional History course at any level

Two Required Courses: 6 Hours

- HIST3020 - Historical Methods Credits: 3
- HIST4030 - Senior Capstone Seminar Credits: 3

Language

Students must complete three semesters of a single foreign language or the equivalent as determined by the Department of Modern and Classical Languages. This requirement may be satisfied by American Sign Language.

History, Public History Concentration, B.A.

Public History Concentration

Combined with the History B.A. requirements, students can declare a Public History Concentration. The History B.A. requires a minimum of 36 credit hours in History courses, and 18 of those can qualify to meet the Public History Concentration requirements. The Public History Concentration requires a minimum of 18 hours of History coursework that may be tailored for individual student career goals.

Specific requirements for the History major are in the link below:

History, B.A.

Specific course requirements for the Public History Concentration are as follows:

Required Courses

HIST2050 - Introduction to Public History

HIST2700 - Introduction to Museology

HIST3020 - Historical Methods

HIST4400 - Internship

Elective

2 of the following courses:

HIST4055 - Archival Research Methods

HIST4077 - Book History: Topics

HIST4315 - History, Politics and Memory of the Holocaust in Europe

HIST4320 - Memory and National Identity in Twentieth Century Europe

HIST4400 - Internship (Students are allowed 2 Internship courses if approved by an advisor)

International Studies, B.A.

Students graduating with a degree in international studies will be able to recognize and appreciate the historical, political, social, cultural, and economic dimensions of international processes and issues, integrating these into an interdisciplinary perspective. uwo.edu/sppais.

International Study Abroad and Internship Opportunities

All International Studies majors are strongly encouraged to consider taking part in a semester long study abroad program or a shorter-term faculty-led international fieldwork or study abroad courses taught by UW faculty (typically offered during the Summer and Winter breaks) as a way to earn course credit towards their International Studies degree. In addition, International Studies majors are also encouraged to consider participating in paid or unpaid international internship opportunities as a way of earning additional academic credit towards their International Studies degree. For more information on international study abroad exchanges, faculty-led fieldwork courses and internship opportunities, please visit the UW Abroad Office at: uwoyo.edu/geo/eda/index.

Requirements

All required courses for the major must be passed with a grade of C or better. There are numerous special topics courses offered during the academic year and these courses can fulfill the international studies requirements with approval from your adviser. Students are encouraged to satisfy the USP Q (quantitative reasoning) requirement by taking STAT2070 - Introductory Statistics for the Social Sciences.

Core Courses

Students take 9 hours of core coursework. INST2350 - Introduction to Global Studies and INST2310 - Introduction to International Relations provide the theoretical framework for the global and regional tracks. INST4950 - Capstone in International Studies (Capstone) provides the culminating experience for students completing the B.A. degree in international studies and fulfills the COM3 writing requirement for the University Studies Program.

Area of Focus

Students will complete a minimum of 18 hours of coursework in two specific areas of focus, choosing a global and regional track. Students must complete a minimum of 9 hours in each track.

Global and regional tracks have suggested Gateway courses. Most Gateway courses fulfill University Studies requirements. All INST students are required to take the Regional Gateway course in their chosen region. All INST students are required to take the Regional Gateway course in their chosen region. These courses fulfill the COM2 requirement for the University Studies Program and count towards the 9 hours required for the Regional Track.

- INST2230 - Introduction to Asian Studies Credits: 3
- INST2240 - Introduction to African Studies Credits: 3

- INST2250 - Introduction to Latin American Studies Credits: 3
- OR
- INST2280 - Introduction to European Studies Credits: 3
- OR
- POLS2200 - Politics of Europe and the European Union Credits: 3

Global Tracks

9 hours of coursework from a single track. This list is not comprehensive; students are strongly encouraged to review the International Studies Newsletter each semester to see what additional qualifying courses are currently being offered.

- Global Track, Sustainable Development and the Environment
- Global Track, Economic Systems
- Global Track, Culture and Social Issues
- Global Track, Governance and Conflict Resolution

Regional Tracks

9 hours of coursework from a single track. This list is not comprehensive; students are strongly encouraged to review the International Studies Newsletter each semester to see what additional qualifying courses are currently being offered.

- Regional Tracks, Africa and the Middle East
- Regional Tracks, Asia
- Regional Tracks, Europe and the Former Soviet Union
- Regional Tracks, Latin America

Foreign Language

Students must complete a four semester sequence in a single foreign language or show an equivalent level of proficiency. Language courses must be conversational language courses. American Sign Language is not considered a foreign language.

Electives

Students must take 9 hours of elective courses from the international studies curriculum, 6 of which must be upper division. The following Gateway courses can count for the elective requirement:

- ANTH1200 - Introduction to Cultural Anthropology Credits: 3
- ECON1000 - Global Economic Issues Credits: 3
- INST1060 - World Regional Geography Credits: 3
OR
- GEOG1000 - World Regional Geography Credits: 3
- INST1200 - Non-Western Political Cultures Credits: 3
OR
- POLS1200 - Non-Western Political Cultures Credits: 3
- INST1330 - World History since 1750 Credits: 3

Journalism, B.A.

The journalism major is designed to prepare students for careers as reporters, editors and writers with newspapers, news services, magazines, public information, public relations, advertising, and many other fields.

Required Courses

- Departmental Core Courses Credits: 30
- COJO3530 - Multimedia Production Credits: 3
- COJO4500 - Mass Communication Law Credits: 3

- COJO3480 - Internship Credits: 1-12
- Departmental electives Credits: 15 (Includes 9 elective hours at the 3000-level or higher in journalism, plus 3 elective hours at the 3000-level or higher)

Additional Program Requirements

- Human Culture Credits: 6 (H)

Mathematics Quick Start BS/MS

Combined Program Leading to B.S./M.S. Degree in Mathematics (BS/MS-Math)

Overview

The combined BS/MS program in Mathematics is designed to afford highly qualified students in their junior or senior year the opportunity to work towards both the BS and MS degrees in Mathematics. The program allows for advanced students to jump-start the graduate portion of their education by applying credits for graduate courses to both their BS and MS requirements. The MS degree earned under the combined BS/MS program is not a new or separate category of degree. However, through careful planning and coordination, this program can result in a reduction of the time required to complete both the Mathematics, B.S. and Mathematics, M.S. degrees.

Qualification/Admission

Application for admission may be submitted to the department at any time after the student has completed 75 undergraduate credits. Graduate credits may be applied toward the MS under this program upon the completion of 90 undergraduate credits. Additional minimum requirements for admission are:

1. Minimum GPA of 3.25
2. Minimum GPA in undergraduate math courses of 3.5
3. Completion of two transition courses or their equivalents
4. Three letters of recommendation from UW faculty (at least 2 from UW-Math)

Credits

The BS/MS-Math program allows for students under the guidance of their academic advisor to take graduate courses as part of their BS degree. During their senior year, up to six graduate credits (5000+ level) can be counted simultaneously towards both the BS and MS degrees in Mathematics. In principle, this "double dipping" allows students to earn a MS after completing only 144 credits (120 to earn the BS, 6 of which are applied toward the 30 credits required to earn the MS) instead of 150 credits. In addition, students may reserve a further six credits of 5000 level credits for their MS degrees prior to earning their BS; however, these credits will not be counted toward the BS degree.

Satisfactory progress

The department's Foundation Exam must be passed by the beginning of their second semester of their 4th year. Students in the BS/MS program must have a faculty advisor, with whom they consult to complete a program of study. The Program of Study (POS) must be submitted to the Mathematics Graduate Committee for approval by the end of the midterm of the first semester in which the student has been admitted into the program. The POS must include all courses to be taken during their senior year to the end of the students MS program. Any of the tracks (plan A or B) available to our Masters students will be available to students in this program. The advisor will aid the student in determining which track is the best for completion of the Masters.

Regulations

Students in this program will be governed by the regulations applicable to any undergraduate student in Mathematics until the student has completed 120 credit hours applicable to the BS degree in Mathematics. Once those 120 credit hours have been completed, the student will be enrolled as a graduate student and be governed by graduate student regulations in the Mathematics graduate program. To the extent possible, once the student transitions to being a graduate student, the student should complete the MS degree in 12 months.

University of Wyoming requirements:

Students must have a minimum cumulative GPA of 2.0 to graduate. • Students must complete 42 hours of upper division (3000-level or above) coursework, 30 of which must be from the University of Wyoming. • Courses must be taken for a letter grade unless offered only for S/U. • University Studies Program (USP) Human Culture (H) and Physical & Natural World (PN) courses must be taken outside of the major subject, but can be cross-listed with the major.

College of Arts and Sciences requirements:

Students must take two "core" courses in addition to UW's University Studies Program requirements: Diversity in the United States (ASD) and Global Awareness (ASG). • No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation. • At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).

Mathematics, B.A.

The department offers both a B.S. and B.A. degree in Mathematics. A degree in mathematics should prepare students to enter either graduate studies or the workforce with a skill set that could only come from an intense study of both quantitative reasoning and rigorous proof.

This can be accomplished by focusing on the following goals for our undergraduate major:

1. Develop mathematical thinking and communication skills
2. Develop skills with a variety of technological tools
3. Provide a broad view of the mathematical sciences
4. Require study in depth

Required Lower Division Core Courses

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2800 - Mathematics Major Seminar Credits: 2

Upper Division

These courses, known as the transition courses, introduce students to the three main areas of mathematics research currently represented in the department.

At the upper division, all mathematics majors must take

- MATH3205 - Analysis I: Elementary Real Analysis Credits: 3
- MATH3500 - Algebra I: Introduction to Rings and Proofs Credits: 3

- MATH3340 - Introduction to Scientific Computing Credits: 3

Two-Course Sequence

Every mathematics major must select one two-course sequence that builds on the corresponding transition course. This sequence provides the student with an opportunity to study one of these areas in greater depth.

- MATH4200 - Analysis 2: Advanced Analysis Credits: 3
- MATH4205 - Analysis 3: Undergraduate Topics in Analysis Credits: 3
- OR
- MATH4510 - Algebra II: Introduction to Group Theory Credits: 3
- MATH4520 - Algebra III: Topics in Abstract Algebra Credits: 3
- OR
- MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3
- MATH4440 - Introduction to Partial Differential Equations I Credits: 3

Upper Division Math Courses

Finally, an additional 12 credits of upper division math courses (3000 and above) are required. It is recommended that these courses be selected to provide a broad view of mathematics.

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the major.

Mathematics, B.S.

The department offers both a B.S. and B.A. degree in Mathematics. A degree in mathematics should prepare students to enter either graduate studies or the workforce with a skill set that could only come from an intense study of both quantitative reasoning and rigorous proof. This can be accomplished by focusing on the following goals for our undergraduate major:

1. Develop mathematical thinking and communication skills
2. Develop skills with a variety of technological tools
3. Provide a broad view of the mathematical sciences
4. Require study in depth

Lower Division Core Courses

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2800 - Mathematics Major Seminar Credits: 2

Upper Division

These courses, known as the transition courses, introduce students to the three main areas of mathematics research currently represented in the department.

At the upper division, all mathematics majors must take

- MATH3205 - Analysis I: Elementary Real Analysis Credits: 3
- MATH3500 - Algebra I: Introduction to Rings and Proofs Credits: 3
- MATH3340 - Introduction to Scientific Computing Credits: 3

Two-Course Sequence

Every mathematics major must select one two-course sequence that builds on the corresponding transition course. This sequence provides the student with an opportunity to study one of these areas in greater depth.

- MATH4200 - Analysis 2: Advanced Analysis Credits: 3
- MATH4205 - Analysis 3: Undergraduate Topics in Analysis Credits: 3
- OR
- MATH4510 - Algebra II: Introduction to Group Theory Credits: 3
- MATH4520 - Algebra III: Topics in Abstract Algebra Credits: 3
- OR
- MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3
- MATH4440 - Introduction to Partial Differential Equations I Credits: 3

Upper Division Math Courses

Finally, an additional 12 credits of upper division math courses (3000 and above) are required. It is recommended that these courses be selected to provide a broad view of mathematics.

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the major.

Music Education, B.M.

All music majors must successfully complete MUSC0200 - Music Convocation (0 credit, S/U) each semester in residence and must enroll in lessons and one major ensemble per semester. Each ensemble course is deemed to be a unique course even though the course number is not unique. To fulfill this degree requirement students will be expected to enroll in ensembles at the lower and upper divisions a minimum of four times with a career maximum of 8. All music majors must pass the piano proficiency test during their sophomore year. Class Piano 1-4 is highly recommended for majors with little piano background. Consult your advisor and the Music Handbook for specific information.

University and College Requirements

In addition to the major requirements listed below, students must complete all university requirements listed elsewhere in this *Catalog*. A minimum of 42 hours of the total degree must be at the junior/senior level. Check with your adviser about music courses which fulfill University Studies Program requirements.

Brass, Woodwind, & Percussion Emphasis

Freshman Year: Fall

- MUSC0200 - Music Convocation Credits: 0
- MUSC1030 - Written Theory I Credits: 3
- MUSC1035 - Aural Theory I Credits: 1
- MUSC1290 - Class Piano I Credits: 1
- MUSC1370 - Marching Band Credits: 1
- MUSC 2000-level Applied Lessons II Credits: 1
- USP COM1 Course Credits: 3
- USP FYS Course Credits: 3
- USP H Course Credits: 3

Freshman Year: Spring

- MUSC0200 - Music Convocation Credits: 0
- MUSC1003 - Historical Perspectives in Music I Credits: 3
- MUSC1025 - Introduction to Music Education Credits: 2
- MUSC1040 - Written Theory II Credits: 3
- MUSC1045 - Aural Theory II Credits: 1
- MUSC1295 - Class Piano II Credits: 1
- MUSC 2000-level Applied Lessons II Credits: 1
- A 1000-level Ensemble Credits: 1
- USP Q Course Credits: 3

Sophomore Year: Fall

- MUSC0200 - Music Convocation Credits: 0
- MUSC1340 - Public School Methods: Voice I Credits: 1
- MUSC1352 - Public School Tech: Woodwinds Credits: 2
- MUSC1360 - Public School Methods: Guitar Credits: 1
- MUSC2030 - Written Theory III Credits: 3
- MUSC2035 - Aural Theory III Credits: 1
- MUSC2050 - Historical Perspectives in Music II Credits: 3
- MUSC2290 - Class Piano III Credits: 1
- MUSC 3000-level Applied Lessons III Credits: 1
- A 1000-level Ensemble Credits: 1
- USP COM2 Course Credits: 3

Sophomore Year: Spring

- MUSC0200 - Music Convocation Credits: 0
- MUSC1312 - Public School Tech: Brass Credits: 2
- MUSC1332 - Public School Tech: Strings Credits: 2
- MUSC2040 - Written Theory IV Credits: 3

- MUSC2045 - Aural Theory IV Credits: 1
- MUSC2055 - Historical Perspectives II Credits: 3
- MUSC2295 - Class Piano IV Credits: 1
- MUSC2395 - Piano Proficiency Credits: 0
- MUSC3255 - Sophomore Qualifying Performance Jury Credits: 0
- MUSC3265 - Music Education Proficiency Review Credits: 0
- MUSC 3000-level Applied Lessons III Credits: 1
- A 1000-level Ensemble Credits: 1
- USP V Course Credits: 3

Junior Year: Fall

- EDST2450 - Foundations of Development and Learning Credits: 3
- MUSC0200 - Music Convocation Credits: 0
- MUSC1322 - Public School Tech: Percussion Credits: 2
- MUSC4070 - Conducting Credits: 3
- MUSC4455 - Elem General Music Methods Credits: 3
- MUSC4705 - Elementary Music Ed Practicum Credits: 1
- MUSC4750 - Marching Band Techniques Credits: 1
- MUSC 4000-level Applied Lessons IV Credits: 1
- A 3000-level Ensemble Credits: 1

Junior Year: Spring

- EDEX2484 - Introduction to Special Education Credits: 3
- MUSC0200 - Music Convocation Credits: 0
- MUSC4380 - Jazz Techniques Credits: 2
- MUSC4460 - Choral Music Methods Credits: 3
- MUSC4620 - Practicum in Music Education Credits: 1
- MUSC4780 - Instrumental Conducting and Repertory Credits: 2
- MUSC 4000-level Applied Lessons IV Credits: 1
- A 3000-level Ensemble Credits: 1
- USP PN Course Credits: 3

Senior Year: Fall

- MUSC0200 - Music Convocation Credits: 0
- MUSC3015 - Introduction to the Music of the World's Peoples Credits: 3
- MUSC4155 - Senior Music Education Recital Credits: 0
- MUSC4465 - Instrumental Music Methods Credits: 3
- MUSC4715 - Secondary Music Ed Practicum Credits: 1
- MUSC 5000-level Applied Lessons V Credits: 2
- A 3000-level Ensemble Credits: 1
- USP PN Course Credits: 3

Senior Year: Spring

*No other coursework may be taken during residency; requires 2.750 UW GPA and 3.000 GPA in major content courses.

- MUSC4700 - Elementary Student Teaching in Music Credits: 8
- MUSC4710 - Secondary Student Teaching in Music Credits: 8

Degree Total: 121 Hours

String Emphasis

Freshman Year: Fall

- MUSC0200 - Music Convocation Credits: 0
- MUSC1030 - Written Theory I Credits: 3
- MUSC1035 - Aural Theory I Credits: 1
- MUSC1290 - Class Piano I Credits: 1

Degree Total: 124 Hours

Music, B.A.

All music majors must successfully complete MUSC0200 - Music Convocation (0 credit, S/U) each semester in residence and must enroll in lessons and one major ensemble per semester. Each ensemble course is deemed to be a unique course even though the course number is not unique. To fulfill this degree requirement students will be expected to enroll in ensembles at the lower and upper divisions a minimum of four times with a career maximum of 8. Consult your advisor and the Music Handbook for specific information.

University and College Requirements

In addition to the major requirements listed above, students must complete all university and College of Arts & Sciences requirements listed elsewhere in this *Catalog*. A minimum of 42 hours of the total degree must be at the junior/senior level. Check with your adviser about music courses which fulfill University Studies Program requirements.

Native American and Indigenous Studies, B.A.

In addition to the skills acquired by students who earn an undergraduate minor degree in Native American and Indigenous Studies, students working toward a B.A. in Native American and Indigenous Studies (NAIS) will study tribal governance, literature, history, environment and natural resource management, Native ways of knowing, and indigenous languages. Inherent in this degree's curriculum and related activities is the expectation that students and faculty will assume an active role in working with and for Indigenous communities. NAIS requires it majors to earn a grade of C or better in all courses taken to fulfill the major.

Major Requirements

Foundation Courses

9 credit hours of Foundation Courses Choose from the following:

- NAIS1001 - Foundations in American Indian Studies Credits: 3
- NAIS1350 - American Indians in Contemporary Society Credits: 3

- NAIS2210 - North American Indians Credits: 3
- NAIS2290 - History of North American Indians Credits: 3
- Core Courses

Elective Courses

- 6 credit hours of elective courses

Additional Courses

15 credit hours are required beyond the 9 credits of chosen Foundation Courses:

- NAIS3300 - Federal Indian Law Credits: 3
- NAIS4100 - Tribal Government Credits: 3
- NAIS2340 - Native American Culture and Literature Credits: 3
- NAIS2345 - American Indians in Hollywood Film Credits: 3

- NAIS3100 - Tribal Literatures of the Great Plains Credits: 3
OR
- NAIS4460 - American Indian Literature Credits: 3
- NAIS3000 - Plains Culture and History Credits: 3
- NAIS4000 - Indians of Wyoming Credits: 3
OR
- NAIS4466 - American Indian Ethnohistory Credits: 3
- NAIS3200 - Indigenous Peoples and the Environment Credits: 3
OR
- NAIS4340 - Natural Resource Management on Western Reservations Credits: 3
- NAIS3400 - Traditional Ecological Knowledge Credits: 3
- NAIS4110 - Educational Foundations in American Indian Education Credits: 3

- NAIS4200 - Indigenous Communities Abroad: International Travel Credits: 4
OR
- NAIS4740 - Native American Languages and Cultures Credits: 3

Capstone Internship Credits: 4 Hours

Internship active participation in and service to an Indigenous community in the U.S. or elsewhere. Internship guidelines.

- NAIS4020 - Internship Credits: 1-12

Indigenous Languages Credits: 8 Hours

- NAIS 1000
- NAIS2010 - Intermediate Indigenous Language Credits: 4
- NAIS3010 - Proficient Indigenous Language Credits: 4
- NAIS4020 - Internship Credits: 1-12

Total Credits: 42 Hours

Performance, B.M.

All music majors must successfully complete MUSC0200 - Music Convocation (0 credit, S/U) each semester in residence and must enroll in lessons and one major ensemble per semester. Each ensemble course is deemed to be a unique course even though the course number is not unique. To fulfill this degree requirements students will be expected to enroll in ensembles at the lower and upper divisions a minimum of four times with a career maximum of 8. All string and vocal emphases must pass the piano proficiency test during their sophomore year. Class Piano 1-4 is highly recommended for those with little piano background. All wind and percussion emphases must pass Class Piano 1-2 with a B or better or may substitute the Piano Literacy exam in their place. Consult your advisor and the Music Handbook for specific information.

University and College Requirements

In addition to the major requirements listed above, students must complete all university and College of Arts and Sciences requirements listed elsewhere in this Catalog. A minimum of 42 hours of the total degree must be at the junior/senior level. Check with your adviser about music courses which fulfill University Studies Program requirements.

Upper Division Music Electives

Upper division music electives vary per emphasis. Please see the Undergraduate Music Handbook for a full listing.

Degree Total: 120 Hours

Philosophy, B.A.

General Requirements:

- A major in philosophy requires a minimum of 33 hours (11 courses) of philosophy.
- At least 9 hours (3 courses) must be at or above the 4000-level.
- At least 15 additional hours (5 courses) must be at or above the 3000-level. The remaining nine hours (3 courses) may be at any level.
- **Only those courses in which a grade of C or better has been earned may count toward the 33-hour requirement.**

The department strongly recommends that prospective majors take PHIL1000 - Introduction to Philosophy, as their first course in philosophy.

Distribution Requirements

Students must choose three of the four distribution areas and take at least 6 hours (2 courses) in each of the chosen areas, including at least one core course in each chosen area.

Special topics courses (for example, PHIL 3000, PHIL 4000) are assigned to the appropriate distribution area on a case by case basis. And some of the courses listed above, especially the graduate seminars in area 4, might count in other distribution areas. To work out a suitable program, please consult with the department's undergraduate adviser.

The general level requirement and distribution requirement may be satisfied by the same courses. That is, a course may satisfy both of these requirements at the same time. No course may satisfy more than one distribution area, and no course may satisfy more than one general level requirement.

The department allows its majors to concentrate in a number of interdisciplinary areas, and we welcome double-majors in philosophy and another field. Please consult the department's undergraduate adviser to work out a suitable program.

The distribution areas are:

Metaphysics and Epistemology:

- PHIL2310 - Philosophy of Religion Credits: 3

- PHIL3440 - Philosophy of Mind Credits: 3
- PHIL3510 - Introduction to Epistemology Credits: 3
- PHIL3560 - Introduction to Metaphysics Credits: 3
- PHIL4040 - Kant Credits: 3
- PHIL4120 - Philosophy and the 20th Century Credits: 3
- PHIL4190 - Philosophy of Language Credits: 3-6
- PHIL4440 - Topics in Philosophy of the Mind Credits: 3-6
- PHIL4510 - Theory of Knowledge Credits: 3
- PHIL4560 - Metaphysics Credits: 3

Ethics and Philosophy of Value:

- PHIL 2200
- PHIL2300 - Ethics in Practice Credits: 1-3
- PHIL2330 - Environmental Ethics Credits: 3
- PHIL2345 - Natural Resource Ethics Credits: 3
- PHIL3250 - Global Justice Credits: 3
- PHIL3300 - Ethical Theory Credits: 3
- PHIL3350 - History of Moral Philosophy Credits: 3
- PHIL4300 - Topics in Ethics Credits: 3-6
- PHIL4340 - Issues in Environmental Ethics Credits: 3

Logic and Philosophy/History of Science:

- PHIL2420 - Critical Thinking Credits: 3
- PHIL3140 - Philosophy of Science Credits: 3
- PHIL3420 - Symbolic Logic Credits: 3
- PHIL3500 - History of Science Credits: 3
- PHIL4140 - Topics in Philosophy of Science Credits: 3
- PHIL4420 - Advanced Logic Credits: 3

History of Philosophy:

- PHIL2100 - The Greek Mind Credits: 3
- PHIL3100 - History of Modern Philosophy: The Rationalists Credits: 3
- PHIL3110 - History of Modern Philosophy: The Empiricists Credits: 3
- PHIL3120 - Ancient Greek Philosophy Credits: 3
- PHIL3220 - Existentialism and Phenomenology Credits: 3
- PHIL3320 - Eastern Thought Credits: 3
- PHIL4020 - Plato Credits: 3
- PHIL4030 - Aristotle Credits: 3
- PHIL4040 - Kant Credits: 3
- PHIL 4100
- PHIL4110 - Figures in Contemporary Philosophy Credits: 3-6

Physics, B.A.

Require Courses

Students in the Bachelor of Arts in physics major program are required to complete the following courses:

- PHYS1210 - Engineering Physics I Credits: 4
OR
- PHYS1310 - College Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
OR
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3
- PHYS3000 - Methods of Physics Credits: 4
- PHYS3650 - Advanced Lab in Modern Physics and Electronics Credits: 4
- PHYS4210 - Classical Mechanics I Credits: 3
- PHYS4310 - Quantum Mechanics Credits: 3
- PHYS4410 - Electricity and Magnetism I Credits: 3
- PHYS4510 - Thermodynamics and Statistical Mechanics Credits: 3
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3

Electives

- Students are required to take at least 3 hours of electives from any PHYS 4000- or 5000-level course.

Physics, B.S.

Required Courses

Students in the Bachelor of Science in Physics major program are required to complete the following courses:

- PHYS1210 - Engineering Physics I Credits: 4
OR
- PHYS1310 - College Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
OR
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3
- PHYS3000 - Methods of Physics Credits: 4
- PHYS3640 - Modern Electronics and Experimental Techniques Credits: 4
- PHYS3650 - Advanced Lab in Modern Physics and Electronics Credits: 4
- PHYS4210 - Classical Mechanics I Credits: 3
- PHYS4310 - Quantum Mechanics Credits: 3

- PHYS4410 - Electricity and Magnetism I Credits: 3
- PHYS4420 - Electricity and Magnetism II Credits: 3
- PHYS4510 - Thermodynamics and Statistical Mechanics Credits: 3
- PHYS4830 - Mathematical and Computational Physics I Credits: 3
- PHYS4840 - Mathematical and Computational Physics II Credits: 4
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2310 - Applied Differential Equations I Credits: 3

Electives

- Students are required to take at least 3 hours of electives from any PHYS 4000- or 5000-level course.

Physics, M.S.T.

The Master of Science in Physics with emphasis in teaching is designed for graduate students preparing to teach in secondary schools or in community colleges. It will include a small, carefully designed component in psychology and education, and includes a supervised teaching experience. This program will require a thesis project based on experience in the classroom.

Thesis planning, development, and production guided by the committee chair and graduate committee.

Requirements

Plan A (Thesis)

- 18 hours from PHYS/ASTR at the 5000-level
- 12 hours from PSYC or the College of Education at the 4000- or 5000-level

Physiology, B.S.

Physiology is the study of how animals work: how they breathe, feed, interact with their environment, and carry out many other activities and functions. Physiology is the knowledge that the health sciences are built on and so is especially important for students who may be thinking of becoming medical practitioners, veterinarians or health care professionals.

All courses in the major must be completed with a grade of "C" or better.

Foundation Courses:

(MATH 1450 may substituted for MATH 1400 and MATH 1405)

- MATH1400 - College Algebra Credits: 3
 - MATH1405 - Trigonometry Credits: 3
 - MATH2200 - Calculus I Credits: 4
 - STAT2050 - Fundamentals of Statistics Credits: 4
- OR**

- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- PHYS1110 - General Physics I Credits: 4
- PHYS1120 - General Physics II Credits: 4
- LIFE1010 - General Biology Credits: 4
- LIFE2022 - Animal Biology Credits: 4
- **OR**
- MICR2021 - General Microbiology Credits: 4
- **OR**
- MOLB2021 - General Microbiology Credits: 4
- LIFE3050 - Genetics Credits: 4

Two Additional CHEM Courses:

*MOLB 3610 may be used as a CHEM elective, but cannot also count as a PHSO Core Elective.

*CHEM 3550 may be used as a CHEM elective, but cannot also count as a PHSO Core Elective

- CHEM2230 - Quantitative Analysis Credits: 5
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM3020 - Environmental Chemistry Credits: 3
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3
- CHEM4050 - Solar Energy Conversion Credits: 3
- CHEM4230 - Instrumental Methods of Chemical Analysis Credits: 5
- CHEM4400 - Biological Chemistry Credits: 3
- MOLB3610 - Principles of Biochemistry Credits: 4 *

Physiology Core Required Courses

- ZOO3115 - Human Systems Physiology Credits: 4
- ZOO4125 - Integrative Physiology Credits: 5
- ZOO4100 - Scientific Communication Credits: 2 (or approved USP C3 substitute) **AND**
- ZOO4101 - Scientific Communication Lab Credits: 1 (or approved USP C3 substitute)

Physiology Core Electives

A minimum of 10 of the 18 Physiology Core Elective credits must be exclusive to the PHSO major.

At the end of this program students will have a thorough knowledge of physiology, will be well prepared to enter health sciences or graduate education, and will have a range of skills attractive to employers.

Choose a Total of 18 Credits From:

**cannot count towards PHSO electives if used as a CHEM requirement in the Foundational Courses

- ANSC4120 - Principles of Mammalian Reproduction Credits: 3
- ANSC4260 - Mammalian Endocrinology Credits: 3
- ANTH4210 - Human Osteology Credits: 3
- ANTH4230 - Forensic Anthropology Credits: 3
- KIN3021 - Physiology of Exercise Credits: 3
- KIN3038 - Exercise Psychology Credits: 3
- KIN3042 - Biomechanics of Human Movement Credits: 3
- KIN4042 - Advanced Biomechanics Credits: 3
- LIFE3600 - Cell Biology Credits: 4
- MICR4001 - Epidemiology (Diseases in Population) Credits: 3
- MOLB3610 - Principles of Biochemistry Credits: 4 **
- MOLB4670 - Advanced Molecular Cell Biology Credits: 3
- MOLB4100 - Clinical Biochemistry Credits: 4
- MOLB4400 - Immunology Credits: 4
- NEUR4295 - Neurodevelopment Credits: 3
- NEUR5100 - Structure and Function of the Nervous System Credits: 4
- NEUR5295 - Neurodevelopment Credits: 3
- NEUR5685 - Neurophysiology Credits: 3
- NEUR5887 - Molecular Neuropharmacology Credits: 3
- PATB4001 - Epidemiology (Diseases in Population) Credits: 3
- PATB4130 - Mammalian Pathobiology Credits: 3
- PATB4140 - Principles of Toxicology Credits: 3
- PATB4400 - Immunology Credits: 4
- PATB4710 - Medical Virology Credits: 3
- PHCY3450 - Foundational Pathophysiology Credits: 4
- PSYC3250 - Health Psychology Credits: 3
- PSYC4040 - Cognitive Neuroscience Credits: 4
- PSYC4080 - Physiological Psychology Credits: 4
- PSYC4250 - Psychological Aspects of Chronic Illness Credits: 3
- SOC3550 - Medical Sociology Credits: 3
- SOC4160 - Sociology of Aging Credits: 3
- ZOO3010 - Vertebrate Anatomy, Embryology, and Histology Credits: 4
- ZOO4100 - Scientific Communication Credits: 2
- ZOO4280 - Introduction to Neuroscience Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4
- ZOO 4670
- ZOO4735 - Advanced Topics in Physiology Credits: 1-4
- ZOO5100 - Structure and Function of the Nervous System Credits: 4
- ZOO5685 - Neurophysiology Credits: 3
- SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing Credits: 4
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3 **

Political Science, B.A./M.A.

The Political Science 5 Year B.A./M.A. Program offers highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor's degree (whether B.A. or B.S.) and thereby earn a graduate degree more efficiently.

Political science majors with a cumulative major GPA of 3.5 or higher may be invited to apply at the outset of the second semester of the junior year.

Interested students will submit an application and 2 letters of recommendation, at least one from a political science faculty to be reviewed, along with unofficial, current UW transcripts, by the M.A. Director and Committee. Upon provisional acceptance into the program in the junior year, students will be required to take the GRE. GRE scores will be considered for full and final acceptance to the M.A. program, which will be made once the student has completed the bachelor's degree.

Provisional acceptance to the 5 Year B.A./M.A. program in Political Science will allow students to apply up to six credit hours of 5000-level courses toward both the B.A./B.S. and M.A. degree programs. To earn graduatelevel credit, students must achieve at least a 3.000 in the course. By successfully completing up to six credit hours of graduate coursework during their senior year, these students will have demonstrated their ability to do graduatelevel coursework as undergraduates, easing their transition into the Master's Program in Political Science. Interested students may reserve up to six additional credits for graduate study that do not apply to the undergraduate degree by securing appropriate approvals as explained in the Registrar's "Request to Reserve Coursework for Graduate Credit" prior to taking the coursework.

Students will be granted the BA/BS upon completion of the credit hours required for the undergraduate degree in political science. Students must complete the BA/BS before formally entering the MA program. To remain in good standing in the program, students must maintain a cumulative and departmental GPA of 3.200 and earn at least a 3.000 in all 5000-level courses. Failure to meet the GPA requirements places a student on probation for one semester. If the GPA requirement is not met after that semester, the student will be suspended from the program. Students in the program are encouraged to take the Plan B option. Please see the Graduate Study section to find the degree requirements of the M.A. in Political Science.

Political Science, B.S.

In addition to the university and college requirements listed elsewhere in this bulletin, a major in political science requires 33 department hours.

A maximum of 6 hours of internship credit may be applied toward the 33 hours required for the political science major. Only those political science courses in which a grade of C or better has been earned may be used to satisfy departmental requirements.

Most university studies courses and lower division political science courses should be completed prior to the junior year. Additional information about the political science major may be obtained from the School of Politics, Public Affairs, and International Studies: www.uwyo.edu/sppais.

Introductory Courses

Students are required to complete the following four introductory courses:

- POLS1000 - American and Wyoming Government Credits: 3
- POLS1200 - Non-Western Political Cultures Credits: 3
- OR
- POLS1250 - Introduction to Comparative Government Credits: 3
- POLS2310 - Introduction to International Relations Credits: 3
- POLS2460 - Introduction to Political Philosophy Credits: 3
- OR
- POLS3600 - American Political Thought Credits: 3

Other Requirements

Students are also required to take

- at least one seminar in political science (and its prerequisites)
- 8 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
OR
- STAT2050 - Fundamentals of Statistics Credits: 4
- minimum of 9 hours of upper division credit in political science.

Psychology, B.S.

A major requires a minimum of 33 semester hours and may not exceed 60 hours in psychology. Of these, 18 hours must be at the 3000 level or above. These upper-division courses must also be taken from at least two different members of the psychology department faculty listed in this *Catalog*.

Students who have an established UW GPA and who wish to change their major to Psychology, or to add Psychology as a major, will be required to have a UW GPA of at least 2.500.

For graduation, students must receive a C or better grade in all courses taken to satisfy department requirements.

Psychology courses taken 15 or more years ago will not be used to satisfy degree requirements.

Students Must Complete the Following Courses:

- PSYC1000 - General Psychology Credits: 3
- PSYC2000 - Research Psychological Methods Credits: 4

Four of Five Cores:

Biological Core

- PSYC2210 - Drugs and Behavior Credits: 3
OR
- PSYC2080 - Biological Psychology Credits: 3

Social Core

- PSYC2380 - Social Psychology Credits: 3

Clinical Core

- PSYC2340 - Abnormal Psychology Credits: 3

Cognitive Core

- PSYC3120 - Cognitive Psychology Credits: 3

Developmental Core

- PSYC2300 - Developmental Psychology Credits: 3

One of the Following

Additionally **one** of the following restricted enrollment (seminar or writing intensive) courses is required:

- PSYC4150 - Cognitive Development Credits: 3
- PSYC4250 - Psychological Aspects of Chronic Illness Credits: 3
- PSYC4320 - Intellectual Disability Credits: 3
- PSYC4350 - Psychology of Adulthood Credits: 3
- PSYC4380 - Death and Dying Credits: 3
- PSYC4390 - Personality Science Credits: 3
- PSYC4400 - Principles of Psychological Testing Credits: 3
- PSYC4740 - Advanced Social Psychology Credits: 3
- PSYC4860 - Seminar Credits: 1-6
- PSYC4040 - Cognitive Neuroscience Credits: 4

Also Required

Also required are

- 6 hours of anthropology, communication/journalism, criminal justice, economics, political science, or sociology;
- 18 Hours Upper Division in Psychology at the 3000 level or higher
- LIFE1003 - Current Issues in Biology Credits: 4
- **OR**
- LIFE1010 - General Biology Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- **OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

STEM Course

One approved 3-4 credit hour STEM course:

- CHEM1000 - Introductory Chemistry Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- COSC1010 - Introduction to Computer Science I Credits: 4
- COSC1100 - Computer Science Principles and Practice Credits: 3
- KIN2040 - Human Anatomy Credits: 3
- ZOO 2040
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO 2041
- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- MATH1405 - Trigonometry Credits: 3

- MATH2200 - Calculus I Credits: 4
- MICR2021 - General Microbiology Credits: 4
- MOLB2021 - General Microbiology Credits: 4
- PHYS1050 - Concepts of Physics Credits: 4
- PHYS1110 - General Physics I Credits: 4
- STAT2000 - Statistics and the World Credits: 3
- STAT3050 - Statistical Methods Credits: 3
- ZOO3600 - Principles of Animal Behavior Credits: 3

Religious Studies, B.A.

A major in Religious Studies requires 33 hours (11 courses) plus a second major or minor in another discipline.

For students completing their degree under the 2015 University Studies Program:

Two Required Courses: 6 Hours

- RELI1000 - Introduction to Religion Credits: 3
- RELI4000 - Theories of Religion Credits: 3

Concurrent Concentration I: 9 Hours

Students should acquire a focused concentration by taking three courses (1) on a single religion, or (2) on the religions of a particular region or culture. Courses may be from a limited time period or spread across history. Students may choose from established concentrations or create their own concentration in consultation with their adviser. [Six hours must be above 3000-level.]

Concurrent Concentration II: 9 Hours

Students should take three courses in a religion, region, or culture differing significantly from that of the first concentration. [Six hours must be above 3000-level.]

Electives

Three courses in Religious Studies (see note 2 below) chosen in accordance with the student's interests. [Six hours must be above 3000-level.]

Language

Students should take three semesters of a single foreign language or demonstrate equivalent proficiency. See note 3 below.

Honors

If a student wishes to pursue an Honors designation in Religious Studies, two additional requirements must be fulfilled.

- A. A three-hour Thesis Seminar or Internship, during which a research paper is written, or other suitable research project is carried out.
- B. Demonstration of competency in a foreign language equivalent to a fourth-semester college-level course.

Notes:

1. If students majoring in Religious Studies can use its courses to satisfy requirements in a second major or minor, this is permitted.
2. Courses for the major should be drawn from those with a RELI prefix, or from a list of approved courses taught by other departments or programs. See the list of approved courses on the Religious Studies website. In each of the concentrations, only one course may be from outside RELI offerings. Two such courses may be used as electives. Occasionally, courses on religion are taught by outside departments as one-time opportunities. Students may propose these for inclusion in the major to the director of the Religious Studies department.
3. The language requirement may be satisfied with American Sign Language (ASL) or, with the approval of the department, coursework in another form of non- English communication (e.g. computer science, statistics, music composition).
4. All courses must be passed with a grade of C or better.

Sociology, B.A.

In addition to University and College requirements, the following are minimum requirements for the undergraduate major in sociology leading to the Bachelor of Arts degree.

Thirty-four credit hours are required to earn a major in sociology. These courses are listed below. This includes 13 hours of required Foundation Courses, 12 hours of Core Courses, and 9 hours of sociology elective courses. Grades of "C" or better must be earned in all 34 hours of coursework in order to be counted toward the major.

Foundation Courses

- SOC1000 - Sociological Principles Credits: 3
- SOC2070 - Introductory Statistics for the Social Sciences Credits: 4
- OR**
- STAT2050 - Fundamentals of Statistics Credits: 4
- SOC3180 - Sociological Research Methods Credits: 3
- SOC4715 - Sociological Theory Credits: 3

Total Foundation: 13 Hours

Core Courses:

Complete four courses from the following list:

- SOC2350 - Race and Ethnic Relations Credits: 3
- SOC3110 - Self and Society Credits: 3
- SOC3140 - Sociology of the Family Credits: 3
- SOC3200 - Sociology of Religion Credits: 3
- SOC3400 - Deviant Behavior Credits: 3
- OR**

- CRMJ3400 - Deviant Behavior Credits: 3
- SOC3500 - Sociology of Gender Credits: 3
- SOC3550 - Medical Sociology Credits: 3
- SOC3605 - Sociology of Education Credits: 3
- SOC3640 - Social Inequality Credits: 3
- SOC3880 - Political Sociology Credits: 3
- SOC3910 - Global Sociology Credits: 3
- OR**
- INST3910 - Global Sociology Credits: 3
- SOC4370 - Global Political Economy Credits: 3
- OR**
- INST4370 - Global Political Economy Credits: 3

Total Core: 12 Hours

Elective Courses

Complete 9 additional hours of sociology courses. Electives may be used either to develop additional expertise in an area of interest or to broaden the student's sociological training.

Spanish B.A.: Language-Linguistics Track

Requirements

- SPAN2040 - Second Year Spanish II Credits: 4
- SPAN3030 - Spanish for Heritage Speakers Credits: 3
- OR**
- SPAN3050 - Third Year Spanish I Credits: 3
- SPAN3060 - Third Year Spanish II Credits: 3
- SPAN3140 - Introduction to Literature Credits: 3
- SPAN3300 - Introduction to Hispanic Linguistics Credits: 3
- SPAN4080 - Spanish Advanced Grammar Credits: 3
- OR**
- SPAN4090 - Spanish Phonetics and Phonology Credits: 3
- additional 12 hours of electives above SPAN 2030.

Highly Recommended Electives

- SPAN3040 - Spanish Conversation Credits: 3
- SPAN3070 - Intensive Spanish Abroad Credits: 3
- SPAN3080 - Spanish Language in the USA Credits: 3
- SPAN4070 - Spanish Variation and Change Credits: 3
- SPAN4080 - Spanish Advanced Grammar Credits: 3
- SPAN4090 - Spanish Phonetics and Phonology Credits: 3
- SPAN4200 - Introduction to Research Credits: 3

It is Possible to Take

It is possible to take one class from the following:

- SPPA3160 - Speech and Language Development Credits: 4
- ANTH 4775 - Language and Gender
- ANTH4785 - Language and Racism Credits: 3
- ANTH4795 - Language Change Credits: 3

Total: 31 Hours

Spanish, B.A.

Tracks

Spanish offers two major tracks:

- Spanish B.A.: Culture, Literature, and Cinema Track
- Spanish B.A.: Language-Linguistics Track

Suggested Curriculum: Four Year Plan

(for students with no prior background in the language)

Freshman Year: Fall

- SPAN1010 - First Year Spanish I Credits: 4

Freshman Year: Spring

- SPAN1020 - First Year Spanish II Credits: 4

Sophomore Year: Fall

- SPAN2030 - Second Year Spanish I Credits: 4

Sophomore Year: Spring

- SPAN2040 - Second Year Spanish II Credits: 4
- SPAN2140 - Introduction to Reading Credits: 3

Junior Year: Fall

- SPAN3050 - Third Year Spanish I Credits: 3

- Spanish 3000-4000-level Credits: 3

Junior Year: Spring

- SPAN3140 - Introduction to Literature Credits: 3
- SPAN3300 - Introduction to Hispanic Linguistics Credits: 3

Senior Year: Fall

- SPAN4200 - Introduction to Research Credits: 3
- Spanish 3000-4000-level Credits: 3

Senior Year: Spring

- Spanish 4000-5000-level Credits: 6

Statistics Quick Start BS/MS

An advanced degree in Statistics is powerful in its own right; statistical methods are part of the core of data science, so stands as a useful foundation for that as well. The Program in Statistics at the University of Wyoming now offers a QuickStart ("4+1") MS program, within which qualified students can obtain a Statistics, B.S. and a Applied Statistics, M.S. degree in five years.

The program is intended for inspired, high-achieving students; the pace will be intense, as you will need to be taking courses at the graduate level in your undergraduate senior year.

The MS degree requires 30 credits; in order to make the 4+1 program work enrolled students can

1. Have two three-credit 4XXX/5XXX classes count towards both the BS and MS degrees. Enrollment must be for the 5XXX section of the course. Tuition is charged at the undergraduate rate.
2. Reserve two three-credit 4XXX/5XXX classes for graduate credit. Tuition is charged at the undergraduate rate, but these two classes *will only count towards the MS*.

With these four courses counting towards the MS, there remains 18 credits, which can be done in two semesters of three (three-credit) classes each.

Steps:

1. Apply (usually in the Spring of your Junior year) online to the QuickStart- Statistics BS/MS -College of Arts & Science program[1]. You will need (unofficial is fine) college transcripts, a statement of purpose, and three letters of recommendation[2].
2. Once you are enrolled in the program, the Admissions Office will work with you to put into play the double-dip and reserved courses mentioned above.

Acceptance is conditional until your undergraduate degree is awarded and results are in from your taking the GRE, which we recommend you take in your last undergraduate year.

[1] Instructions from the registrar: Apply at: <https://www.uwyo.edu/admissions/apply-online.html>

The log-in is different from WyoWeb. If you remember the log-in email/password form when you originally applied to UW, you can use the Returning Users option. Otherwise, use the First Time users option. When you get to the page where you select your

program of study, select **QuickStart- Statistics BS/MS -College of Arts & Science**. All the Quickstart program are under Q to (hopefully) reduce confusion for non-quickstart applicants. Any questions during the application process can be directed to admissions@uwyo.edu or 766-5160.

[2] These documents are standard for applying to our graduate program; we anticipate we will have a mix of QuickStart students and regular (i.e. 2-year) MS students who are applying from elsewhere.

Statistics, B.A.

Statistics (at Least 30 Hours)

- STAT2050 - Fundamentals of Statistics Credits: 4
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
OR
- STAT4220 - Basic Engineering Statistics Credits: 3
- STAT2110 - Statistical Methods for Business and Management Science Credits: 3
OR
- STAT3050 - Statistical Methods Credits: 3
OR
- STAT5050 - Statistical Methods for the Biological Science Credits: 3
OR
- STAT5080 - Statistical Methods for the Agricultural and Natural Resource Sciences Credits: 3
- STAT4015 - Regression Analysis Credits: 3
- STAT4025 - Design and Analysis of Experiments I Credits: 3
- STAT4255 - Mathematical Theory of Probability Credits: 3
- STAT4265 - Introduction to the Theory of Statistics Credits: 3
- STAT4870 - Senior Thesis Credits: 3
- STAT4270 - Applied Bayesian Statistics Credits: 3

Optional from (9 Hours)

- STAT4045 - Categorical Data Analysis Credits: 3
- STAT4070 - Causal Models Credits: 3
- STAT4115 - Time Series Analysis and Forecasting Credits: 3
- STAT4155 - Fundamentals of Sampling Credits: 3
- STAT4300 - Applied Multivariate Analysis Credits: 3
- STAT4350 - Survey Construction and Analysis Credits: 3
- STAT4360 - Spatial Statistics Credits: 3
- STAT4370 - Survival Analysis Credits: 3
- STAT4460 - Statistical Software Credits: 1
- STAT4880 - Problems in Statistics Credits: 1-4

Mathematics (15 Hours)

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3

Computer Science (6 Hours)

- COSC1010 - Introduction to Computer Science I Credits: 4
- COSC1030 - Computer Science I Credits: 4

Electives

Chosen so that at least 42 hours are at the 3000/4000/5000 level

Total Hours: at Least 120

Only grades of C or better will be accepted for the major.

Typical Freshman Year for Statics Majors

Note: For several entry level courses such as STAT 2010, STAT 2070 , STAT 2050 , and STAT 4220 , a student cannot receive credit for more than one of these courses. The same is true for the second courses STAT STAT 2110 , STAT STAT 3050 and STAT STAT 5050 , STAT 5060, STAT STAT 5070 , STAT STAT 5080 .

Studio Art, B.A.

B.A. IN STUDIO ART DEGREE

The B.A. in Studio Art degree is available to students who are preparing for further studies or careers in the arts and arts-related fields, such as art education, graphic design, art therapy, illustration, botanical illustration and forensic illustration. Students work with their academic advisers to select courses from the USP and elective offerings to complement art studies in their areas of interest. Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. In addition to the university requirement that degree candidates hold a minimum cumulative grade point average of 2.000, degree candidates for the B.A. in Studio Art degree in the Department of Visual and Literary Arts also must have a minimum 2.500 overall cumulative grade point average and a 2.500 grade point average within all major courses at the time of graduation.

Transfer Residency. A minimum of 26 hours of upper-division course work in the major is required to establish residency in the department for all transfer students. This applies to students in the B.F.A., B.A., and Art Education degree programs who transfer in 12 or more hours of art courses for the major. Students in all art programs must meet the university requirement of at least 42 hours of course work at the upper-division level (3000 and above).

Based on their goals and career plans, students in consultation with a faculty adviser select the appropriate degree plan. Students major in studio art with areas of study in one or more of the following:

- Drawing
- Painting
- Photography
- Printmaking
- Ceramics
- Sculpture
- Metalsmithing
- Visual Communication Design

Minimum Course Requirements for Art Majors

In addition to the university and college requirements listed in this *Catalog*, all students majoring in art must complete the following:

Foundation Core: 15 Hours

- ART1005 - Drawing I Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3

- ART1115 - Digital Media Credits: 1
- ART1120 - Foundation: Three Dimensional Credits: 3
- ART1130 - Foundation: Color Theory Credits: 3
- ART2000 - Portfolio Review Credits: 1
- ART2305 - Techniques: Wood/Art Preparation Credits: 1

Art History Core: 6 Hours

- ART2010 - Art History I Credits: 3
- ART2020 - Art History II Credits: 3

Studio Core (Minimum): 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

- ART2005 - Drawing II Credits: 3
- ART2210 - Painting I Credits: 3
- ART2112 - VCD I Visual Thinking Credits: 3
- ART2255 - Introduction to Photography, Digital Credits: 3
- OR**
- ART2265 - Introduction to Photography, Black and White Credits: 3
- ART3510 - Printmaking I Credits: 3

3D Studio

Note: only one Ceramic class can count in the Studio Core

- ART2310 - Sculptural Practices I Credits: 3
- ART2350 - Metalsmithing I Credits: 3

- ART2410 - Ceramics I Credits: 3
- OR**
- ART2420 - Ceramics II Credits: 3

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Foreign Language: 8 Hours

8 Hours of any Foreign Language:

- LANG1010 - First Semester in (TOPIC) Credits: 1-4

- LANG1020 - Second Semester in (TOPIC) Credits: 1-4

Art History Electives: 6 Hours

6 credits beyond ART 2010 and ART 2020, with at least 3 units at upper division level

Studio Art, B.F.A.

B.F.A. IN STUDIO ART DEGREE

The B.F.A. in Studio Art degree is offered to outstanding students who are prepared for art studies, careers and professional activity beyond the undergraduate level. The B.F.A. degree requires 122 hours of credits with up to seventy-eight (78) semester hours focused in studio and art history course work. All B.F.A. in Studio Art students are required to participate in the B.F.A. exhibition upon graduation.

Application

Formal application is made to the program for acceptance into the B.F.A. in Studio Art degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Studio Art degree. Applicants must have achieved the following at the time of application to the B.F.A. in Studio Art:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Studio Art candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Studio Art program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Studio Art after one semester in Art and Art History Program.

Foundation Core: 15 Hours

- ART1005 - Drawing I Credits: 3
required
- ART1110 - Foundation: Two Dimensional Credits: 3
required
- ART1115 - Digital Media Credits: 1
required
- ART1120 - Foundation: Three Dimensional Credits: 3
required
- ART1130 - Foundation: Color Theory Credits: 3
required
- ART2000 - Portfolio Review Credits: 1

required

- ART2305 - Techniques: Wood/Art Preparation Credits: 1
required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

- ART2005 - Drawing II Credits: 3
- ART2210 - Painting I Credits: 3
- ART2112 - VCD I Visual Thinking Credits: 3

- ART2255 - Introduction to Photography, Digital Credits: 3
OR
- ART2265 - Introduction to Photography, Black and White Credits: 3

- ART3510 - Printmaking I Credits: 3

3D Studio

Note: only one Ceramic class can count in the Studio Core

- ART2310 - Sculptural Practices I Credits: 3
- ART2350 - Metalsmithing I Credits: 3

- ART2410 - Ceramics I Credits: 3
OR
- ART2420 - Ceramics II Credits: 3

Art History Core: 6 Hours

- ART2010 - Art History I Credits: 3
required
- ART2020 - Art History II Credits: 3
required

Upper Division Studio Electives: 21 Hours

21 credits of any upper division studio art classes

Art and Art History Electives: 3 Hours

3 credits of any art or art history course at any level

BFA Core: 12 Hours

- ART4010 - Contemporary Art: Theory/Practice Credits: 3
required
- ART4600 - Professional Practices and Strategies Credits: 3
required
- ART4800 - BFA Capstone I Credits: 3
required, offered only fall semester
- ART4840 - BFA Capstone Credits: 3
required, offered only spring semester

Upper Division Art History Electives: 9 Hours

9 credits of any upper division art history classes

Foreign Language: 8 Hours

8 hours in any Foreign Language:

- LANG1010 - First Semester in (TOPIC) Credits: 1-4
- LANG1020 - Second Semester in (TOPIC) Credits: 1-4

Outside Major Requirement: 9 Hours

9 hours at any level outside of the Art and Art History Program (ART)

Theatre and Dance, Acting Concentration, B.F.A.

This degree program permits a total of 60-70 credits in the major. It is designed primarily for those desiring to pursue additional pre-professional training in theatre and dance or for those preparing to enter M.F.A. graduate programs.

Required Courses

These are the required courses for a B.F.A. with Acting Concentration: *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

- THEA1040 - Production Crew I Credits: 0.5
- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA1300 - Musical Theatre Workshop Credits: 1
- THEA2010 - Theatrical Backgrounds Drama I Credits: 3

- THEA2020 - Theatrical Backgrounds Drama II Credits: 3
- THEA2040 - Production Crew II Credits: 0.5
- THEA2160 - Stage Makeup Credits: 2
- THEA2170 - Speech for the Actor Credits: 3
- THEA2220 - Stagecraft Credits: 3
- THEA2720 - Intro to Stage Combat Credits: 2
- THEA2790 - Stage Management Credits: 3
- THEA3730 - Intermediate Acting Credits: 3
- THEA3740 - Acting Styles Credits: 3
- THEA3750 - Acting for the Camera Credits: 3
- THEA3910 - 20th Century Theatre Diversity Credits: 3
- THEA3950 - Dialects for the Actor Credits: 3
- THEA4710 - Advanced Scene Study Credits: 3
- THEA4720 - Auditioning and Professional Issues Credits: 3
- THEA4730 - Movement for Actors Credits: 2
- THEA4820 - Directing I Credits: 3
- THEA4930 - Theatre History I Credits: 3
- THEA4940 - Theatre History II Credits: 3
- Foreign Language Credits: 8

Three Hours From the Following:

- THEA1410 - Beginning Ballet I Credits: 1
- THEA1430 - Beginning Modern I Credits: 1
- THEA1450 - Beginning Tap Dance I Credits: 1
- THEA1480 - Beginning Jazz Dance I Credits: 1

Theatre and Dance, B.A.

Tracks:

- Theatre and Dance, Theatre Track, B.A.
- Theatre and Dance, Dance Track, B.A.

Theatre and Dance, Dance Performance Concentration, B.F.A.

This program permits a total of 71-74 credits in the major. It is designed primarily for students in dance who wish to pursue additional preprofessional training in theatre and dance or for those preparing to enter M.F.A. graduate programs.

The BFA in Dance Performance is a professionally oriented degree for students interested in a career of performing or choreographing. In addition to specific course work, BFA students complete a senior project which provides summation and synthesis to their training. Admission to the BFA is by application only. Students will be required to submit an application no sooner than spring of their freshman year and interview during the end of the spring semester. All students admitted to the BFA program are considered on provisional status in their first year in the program, and are evaluated on a yearly basis on maintaining a 3.000 GPA in dance required courses, demonstrating appropriate progress in artistic and technical growth and active participation in the Department of Theatre and Dance productions and research. Students wishing to apply for the BFA in Dance Performance do so the second semester of their freshman year.

Required Courses

These are the required courses for a B.F.A. with Dance Performance Concentration. *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

- THEA1021 - Academic and Professional Issues in Dance Credits: 1
- THEA1040 - Production Crew I Credits: 0.5
- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA1405 - Introduction to Pilates Training Credits: 1
- THEA1450 - Beginning Tap Dance I Credits: 1
- THEA2040 - Production Crew II Credits: 0.5
- THEA2050 - Theatre Practice Credits: 1-2
- THEA2160 - Stage Makeup Credits: 2
- **OR**

Theatre and Dance, Dance Science Concentration, B.F.A.

This program permits a total of 78 credits in the major. It is designed primarily for students in dance who wish to pursue additional preprofessional training in theatre and dance or for those preparing to enter M.F.A. graduate programs.

The BFA in Dance Science is a professionally oriented degree for students interested in a career of dance research and wish to pursue some aspect of the science field in relation to dance. In addition to specific course work, BFA students complete a senior project which provides summation and synthesis to their training. Admission to the BFA is by application only. Students will be required to submit an application no sooner than spring of their freshman year and interview during the end of the spring semester. All students admitted to the BFA program are considered on provisional status in their first year in the program, and are evaluated on a yearly basis on maintaining a 3.000 GPA in dance required courses, demonstrating appropriate progress in artistic and technical growth and active participation in the Department of Theatre and Dance productions and research. Students wishing to apply for the BFA in Dance Science do so the second semester of their freshman year.

Theatre and Dance, Design Tech Management Concentration, B.F.A.

Students in the B.F.A. degree program who are completing the Design Tech Management concentration will have the option of petitioning for permission to serve on the production staff of a departmental production as a designer or technician. Ordinarily, the petition would be submitted to the departmental faculty during the student's junior year and the project would be completed during the student's senior year. This project would be done under THEA 4880 or THEA 4990 for 1 to 3 hours of credit.

Required Courses

These are the required courses for a B.F.A. with Design Tech Management Concentration. *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

- THEA1040 - Production Crew I Credits: 0.5
- THEA1050 - Beginning Drawing and Painting Credits: 3
- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA2010 - Theatrical Backgrounds Drama I Credits: 3

- ART2020 - Art History II Credits: 3

Theatre and Dance, Musical Theatre Performance Concentration, B.F.A.

Required Courses

The following are the required courses for a Bachelor of Fine Arts in Performance (Musical Theatre):

- THEA1040 - Production Crew I Credits: 0.5

- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA1300 - Musical Theatre Workshop Credits: 1
- THEA1360 - Fundamentals of Music for Theatre Majors Credits: 3
- THEA1700 - Voice for the Actor Credits: 2
- THEA2010 - Theatrical Backgrounds Drama I Credits: 3
- THEA2020 - Theatrical Backgrounds Drama II Credits: 3
- THEA2040 - Production Crew II Credits: 0.5
- THEA2160 - Stage Makeup Credits: 2
- THEA2170 - Speech for the Actor Credits: 3
- THEA2220 - Stagecraft Credits: 3
- THEA2340 - Musical Theatre Voice Lesson Credits: 1
- THEA2720 - Intro to Stage Combat Credits: 2
- OR**
- THEA4730 - Movement for Actors Credits: 2
- THEA2790 - Stage Management Credits: 3
- THEA3730 - Intermediate Acting Credits: 3
- THEA3740 - Acting Styles Credits: 3
- THEA3910 - 20th Century Theatre Diversity Credits: 3
- THEA3950 - Dialects for the Actor Credits: 3
- THEA4330 - History of American Musical Theatre Credits: 3
- THEA4710 - Advanced Scene Study Credits: 3
- THEA4720 - Auditioning and Professional Issues Credits: 3
- THEA4820 - Directing I Credits: 3
- THEA4930 - Theatre History I Credits: 3
- Foreign Language Credits: 8
- Plus two additional dance courses in an area of choice.

Plus 3 Hours From the Following:

- THEA1410 - Beginning Ballet I Credits: 1
- THEA1430 - Beginning Modern I Credits: 1
- THEA1450 - Beginning Tap Dance I Credits: 1
- THEA1480 - Beginning Jazz Dance I Credits: 1

Theatre and Dance, Theatre/English Concentration, B.F.A.

This degree program in theatre and dance permits 60-70 credits in the major field. It is designed primarily for students who seek additional professional training in theatre and dance or who wish to enter M.F.A. graduate programs.

Students seeking the professional degree will be expected to meet degree requirements as specified by the College of Arts and Sciences. Students may substitute advanced theatre and dance courses for university electives.

For other requirements consult with the Department of Theatre and Dance.

This degree program permits a total of 60- 70 credits in the major. It is designed primarily for those desiring to pursue professional education courses and certification to programs.

Required Courses

- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA2010 - Theatrical Backgrounds Drama I Credits: 3
- THEA2020 - Theatrical Backgrounds Drama II Credits: 3
- THEA2040 - Production Crew II Credits: 0.5
- THEA2150 - Drafting for Design Credits: 3
- THEA2220 - Stagecraft Credits: 3
- THEA2800 - Stage Lighting I Credits: 3
- THEA3730 - Intermediate Acting Credits: 3
- THEA3740 - Acting Styles Credits: 3
- THEA3810 - Scene Design I Credits: 3
- THEA3820 - Stage Costuming I Credits: 3
- THEA3910 - 20th Century Theatre Diversity Credits: 3
- THEA4820 - Directing I Credits: 3
- THEA4830 - Directing II Credits: 3
- THEA4930 - Theatre History I Credits: 3
- THEA4940 - Theatre History II Credits: 3
- ENGL 2000 Credits 6
- ENGL 4000 Credits: 9
- ENGL 4110 Credits: 3
- **OR**
- ENGL 4120 Credits: 3

- Foreign Language Credits: 8

Visual Communication Design, B.F.A.

Designers explore a variety of visual communication design topics dealing with diverse messages and audiences. Students interested in pursuing a career in design, including visual communication design, graphic design, motion graphics, animation, digital media, etc. may apply into the B.F.A. in Visual Communication Design. Students planning to graduate in four years with a B.F.A. in Visual Communication Design should complete their Foundation Core in their Freshman year and take the appropriate Studio Core classes in their sophomore year.

Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. To obtain a B.F.A. in Visual Communication Design degree in the Department of Visual and Literary Arts students must have a minimum 3.00 overall UW-total institutional GPA, and a 3.25 GPA in all major courses at the time of graduation.

The Visual Communication Design degree provides students with a human-centered approach to making and thinking as designers. Students learn through digital and hand's-on-making design challenges to develop critical narrative skills and refine their ability to think conceptually. Individual projects and research prepare each student to think flexibly in an international community that is continually being influenced by new ideas, tools, and technologies. The Visual Arts Building, design computer classroom, and design and fabrication studio facilities offer undergraduate students ample research, design, and production space and access to cutting-edge technology, and open-source and industry standard software and tools for design exploration.

Application

Formal application is made to the program for acceptance into the B.F.A. in Visual Communication Design degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Visual Communication Design degree. Applicants must have achieved the following at the time of application to the B.F.A. in Visual Communication Design:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Visual Communication Design candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Visual Communication Design program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Visual Communication Design after one semester in the Art and Art History Program.

Foundation Core: 15 Hours

- ART1005 - Drawing I Credits: 3
required
- ART1110 - Foundation: Two Dimensional Credits: 3
required
- ART1120 - Foundation: Three Dimensional Credits: 3
required
- ART1130 - Foundation: Color Theory Credits: 3
required
- ART2000 - Portfolio Review Credits: 1
required
- ART1115 - Digital Media Credits: 1
required
- ART2305 - Techniques: Wood/Art Preparation Credits: 1
required

Studio Core: 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

- ART2005 - Drawing II Credits: 3

- ART2210 - Painting I Credits: 3
- ART2112 - VCD I Visual Thinking Credits: 3

- ART2255 - Introduction to Photography, Digital Credits: 3
OR
- ART2265 - Introduction to Photography, Black and White Credits: 3

- ART3510 - Printmaking I Credits: 3

3D Studio

Note: only one Ceramics class can count in the Studio Core

- ART2310 - Sculptural Practices I Credits: 3
- ART2350 - Metalsmithing I Credits: 3

- ART2410 - Ceramics I Credits: 3
OR
- ART2420 - Ceramics II Credits: 3

Art History and Design Theory Core: 9 Hours

- ART2010 - Art History I Credits: 3
required
- ART2020 - Art History II Credits: 3
required
- ART2030 - History of Graphic Design Credits: 3
required

Upper Division Art History: 6 Hours

* six hours of any upper division Art History courses

VCD Core: 12 Hours

- ART2110 - Type I: Thinking with Type Credits: 3
required
- ART2112 - VCD I Visual Thinking Credits: 3
required
- ART2122 - VCD II Visual Programming Credits: 3
required

- ART2255 - Introduction to Photography, Digital Credits: 3
OR
- ART2265 - Introduction to Photography, Black and White Credits: 3

Upper Division VCD: 15 Hours

- ART3112 - Type: Type, Images, and Narrative Credits: 3
required
- ART3120 - VCD III: Visual Making Credits: 3
required
- ART3150 - VCD IV: Visual Imaging in Time Credits: 3
required
- ART4120 - VCD VI: Senior Design Studio Credits: 3
required

- ART4400 - Internship Credits: 1-3
OR
- ART4425 - Graphics Internship Credits: 3

BFA Core: 12 Hours

- ART4010 - Contemporary Art: Theory/Practice Credits: 3
required
- ART4600 - Professional Practices and Strategies Credits: 3
required
- ART4800 - BFA Capstone I Credits: 3
required, offered only fall semester
- ART4840 - BFA Capstone Credits: 3
required, offered only spring semester

Upper Division Studio Electives: 9 Hours

9 credits of any upper division studio art classes

Foreign Language: 8 Hours

* 8 credits in any foreign language:

- LANG1010 - First Semester in (TOPIC) Credits: 1-4
- LANG1020 - Second Semester in (TOPIC) Credits: 1-4

Wildlife and Fisheries Biology and Management, B.S.

Wildlife and Fisheries Biology and Management is a professional degree designed to prepare students for state, federal, and other positions in resource management and conservation biology. The degree provides students with knowledge of the natural world, understanding of processes governing dynamics of wildlife and fish populations, as well as an appreciation of human-mediated effects on wildlife and fish populations. A student graduating with this degree will be familiar with the theory of resource management as well as with methods used to determine population status, habitat quality, and conservation. In Wyoming the abundance of wild animals and pristine habitats provide a unique natural laboratory for studying the responses of wildlife and fish populations to changing climates and habitats.

A student graduating with a degree in WFBM will have comprehensive knowledge of wildlife and fisheries biology and management, will have earned a degree that is compatible with the requirements for professional certification with the American Fisheries Society or the Wildlife Society, and will have a range of knowledge and skills that are valuable to potential employers.

Foundation Courses

(MATH 1450 may substitute for MATH 1400 and MATH 1405)

- MATH1400 - College Algebra Credits: 3
- MATH1405 - Trigonometry Credits: 3
- MATH2200 - Calculus I Credits: 4 (may substitute MATH 2350)
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- OR**
- LIFE2100 - Intro Research and Analysis Credits: 4

- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4

- GEOL1100 - Physical Geology Credits: 4
- OR**
- PHYS1110 - General Physics I Credits: 4
- OR**
- SOIL2010 - Introduction to Soil Science Credits: 4

- LIFE1010 - General Biology Credits: 4
- LIFE2022 - Animal Biology Credits: 4

Data Science course

Choose ONE course from the following:

- COSC1010 - Introduction to Computer Science I Credits: 4
- COSC1015 - Introduction to Programming for Data Science Credits: 3
- COSC1100 - Computer Science Principles and Practice Credits: 3
- COSC1200 - Computer Information Systems Credits: 3
- GIST1200 - Geospatial Foundations Credits: 3
- GIST2140 - Survey of Remote Sensing Applications Credits: 3
- GIST2190 - Intro to Programming Credits: 3
- GIST2200 - Spatial Data Visualization Credits: 3
- GIST2310 - Intro to Geographic Information Systems Credits: 4
- GIST3140 - Introduction to Remote Sensing Credits: 3
- GIST4211 - Advanced Remote Sensing Credits: 3

Core Required Courses

- LIFE3050 - Genetics Credits: 4

- LIFE3400 - General Ecology Credits: 3
- LIFE3410 - Introduction to Field Ecology Credits: 2
- ZOO2450 - Fish and Wildlife Management in the Anthropocene Credits: 4
- ZOO4190 - Comparative Environmental Physiology Credits: 4
- ZOO4400 - Population Ecology Credits: 3
- ZOO4970 - Internship in Wildlife Management Credits: 1
- ZOO4100 - Scientific Communication Credits: 2 (or approved USP C3 substitute) **AND**
- ZOO4101 - Scientific Communication Lab Credits: 1 (or approved USP C3 substitute)

Options

Complete Terrestrial OR Aquatic Option

Aquatic Option

A minimum of 10 of the AQUATIC OPTION requirements listed below (ZOO 4330 and ZOO 4440 and ZOO 4430 and Restricted Electives) must be exclusive to the WFBM major.

REQUIRED COURSES

- ZOO4330 - Ichthyology Credits: 3
- ZOO4440 - Limnology Credits: 3
- ZOO4430 - Limnology Laboratory Credits: 2

Restricted Electives

15 Credits of Electives from the following list:

- ZOO3600 - Principles of Animal Behavior Credits: 3
- ZOO4235 - Marine Biology Credits: 3
- ZOO4300 - Wildlife Ecology and Management Credits: 5
- ZOO4310 - Fisheries Management Credits: 3
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4420 - Conservation Biology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- SOC3950 - Environmental Sociology Credits: 3
- AGEC3750 - Natural Resource Planning and Economics Credits: 3
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- BOT 0000:5999
- ENR 0000:5999
- REWM 0000:5999

Terrestrial Option

A minimum of 10 of the TERRESTRIAL OPTION requirements listed below (BOT 4700 and ZOO 4300 and Restricted Electives) must be exclusive to the WFBM major.

REQUIRED COURSES

- BOT4700 - Vegetation Ecology Credits: 4
- ZOO4300 - Wildlife Ecology and Management Credits: 5

Restricted Electives

14 Credits of Electives from the following list:

- ZOO3600 - Principles of Animal Behavior Credits: 3
- ZOO4235 - Marine Biology Credits: 3
- ZOO4310 - Fisheries Management Credits: 3
- ZOO4330 - Ichthyology Credits: 3
- ZOO4350 - Ornithology Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4420 - Conservation Biology Credits: 3
- ZOO4430 - Limnology Laboratory Credits: 2
- ZOO4440 - Limnology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4
- SOC3950 - Environmental Sociology Credits: 3
- CHEM2230 - Quantitative Analysis Credits: 5
- AGE3750 - Natural Resource Planning and Economics Credits: 3
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- BOT 0000:5999
- ENR 0000:5999
- REWM 0000:5999

Zoology, B.S.

Zoology is the study of animals: their structure, physiology, development and evolution. One of the enduring fascinations of zoology is that we can learn so much about ourselves and our environment by studying what our fellow creatures do.

At the end of this program students will have a comprehensive knowledge of zoology, will be well prepared for graduate education, and will be equipped to enter any of the many employment opportunities that are available.

Foundation Courses

(MATH 1450 may substitute for MATH 1400 and MATH 1405)

- MATH1400 - College Algebra Credits: 3
- MATH1405 - Trigonometry Credits: 3
- MATH2200 - Calculus I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- OR**
- LIFE2100 - Intro Research and Analysis Credits: 4

- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2230 - Quantitative Analysis Credits: 5
- OR**

- CHEM2300 - Introductory Organic Chemistry Credits: 4
OR
- CHEM2420 - Organic Chemistry I Credits: 4
OR
- CHEM2440 - Organic Chemistry II Credits: 4
OR
- CHEM3020 - Environmental Chemistry Credits: 3
OR
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3
OR
- CHEM4050 - Solar Energy Conversion Credits: 3
OR
- CHEM4230 - Instrumental Methods of Chemical Analysis Credits: 5
OR
- CHEM4400 - Biological Chemistry Credits: 3
- PHYS1110 - General Physics I Credits: 4
- PHYS1120 - General Physics II Credits: 4
- LIFE1010 - General Biology Credits: 4
- LIFE2022 - Animal Biology Credits: 4
- LIFE3050 - Genetics Credits: 4
- LIFE3400 - General Ecology Credits: 3
- LIFE3500 - Evolutionary Biology Credits: 3
- ZOO4100 - Scientific Communication Credits: 2 (or approved USP C3 substitute) **AND**
- ZOO4101 - Scientific Communication Lab Credits: 1 (or approved USP C3 substitute)

Advanced Zoology Course

* if more than one of the required courses is completed, additional courses can count towards the Zoology Approved Core Electives below.

One of:

- ZOO4330 - Ichthyology Credits: 3
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4

Zoology Approved Core Electives

A minimum of 10 of 18 Zoology Approved Core Electives must be exclusive to the ZOOL major.

Choose a total of 18 credits from:

- ZOO3115 - Human Systems Physiology Credits: 4
- ZOO3600 - Principles of Animal Behavior Credits: 3
- ZOO4190 - Comparative Environmental Physiology Credits: 4
- ZOO4235 - Marine Biology Credits: 3
- ZOO4300 - Wildlife Ecology and Management Credits: 5

- ZOO4310 - Fisheries Management Credits: 3
- ZOO4330 - Ichthyology Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4
- ZOO4400 - Population Ecology Credits: 3
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4420 - Conservation Biology Credits: 3
- ZOO4430 - Limnology Laboratory Credits: 2
- ZOO4440 - Limnology Credits: 3
- ZOO4735 - Advanced Topics in Physiology Credits: 1-4
- ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals Credits: 4
- ANSC3100 - Principles of Animal Nutrition Credits: 3
- ANSC3150 - Equine Nutrition and Physiology Credits: 3
- MOLB3000 - Introduction to Molecular Biology Credits: 3
- BOT4235 - Marine Biology Credits: 3
- BOT4550 - Computational Biology Credits: 4
- BOT4664 - Special Topics in Evolution Credits: 1-4
- BOT4790 - Special Topics in Ecology Credits: 1-3
- GEOG 3150
- GEOG3480 - Environmental Change Credits: 3
- GIST3140 - Introduction to Remote Sensing Credits: 3
- ENTO4300 - Insect Ecology Credits: 3
- ENTO4682 - Insect Anatomy and Physiology Credits: 5
- ENTO4678 - Aquatic Entomology Credits: 3
- ENTO4684 - Classification of Insects Credits: 4
- PATB4170 - Diseases of Wildlife Credits: 3
- PATB 4310
- PATB 4360
- PATB4710 - Medical Virology Credits: 3

Minor

African American and Diaspora Studies Minor

Thematic tracks in the major or minor are optional:

- History
- Culture & Aesthetics
- Politics & Law
- Rhetoric & English
- Religion & Philosophy
- Media Studies

Minor Requirements

The minor in African American and Diaspora Studies consists of 21 credit hours:

- 9 credit hours of core course requirements
- 9 credit hours of electives (excludes core courses)
- 3 credit hours of senior thesis seminar (AAST 4975, Capstone)

Aging Studies Minor

Background Check

Students seeking the minor in Aging Studies will be required to obtain a background check as specified by College of Health Sciences policy. Please contact us for specific information.

Program Plan

Complete the Program Plan of Study with both your major academic advisor and your minor advisor.

A minor in aging studies requires 18 credit hours. These must include the following:

Core Courses

- NURS2240 - Medical Terminology Credits: 3
- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- HLSC4985 - Health Sciences Internship Credits: 1-6

Elective Courses - 9 Credits

- 6 credits must be outside student major

Academic Standards

At least 12 credit hours in a minor must be from courses that are not being counted toward the student's major. No grade below a C is acceptable for courses applied to the minor.

American Politics Minor

Requirements

A minor in American Politics requires

- POLS1000 - American and Wyoming Government Credits: 3
- POLS4850 - Seminar in American Politics and Institutions Credits: 3
OR

- POLS4840 - Seminar in Public Law Credits: 3
- 12 hours from an approved list of courses, with a minimum of 9 hours at the 3000-level or above.

Approved American Politics Minor Courses

- POLS2000 - Current Issues in American Government Credits: 3
- POLS2070 - Politics of State and Local Government Credits: 3
- POLS2410 - Introduction to Public Administration Credits: 3
- POLS2430 - Parties, Interest Groups and Elections Credits: 3
- POLS2450 - Politics and Media Credits: 3
- POLS2490 - Topics In: Credits: 1-3 (dept. approval required) (Max. 6)
- POLS3100 - Politics and the Judicial Process Credits: 3
- POLS3520 - Voting and Participation in America Credits: 3
- POLS3550 - Political Communication Credits: 3
- POLS3600 - American Political Thought Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- POLS4052 - Federal Land Politics Credits: 3
- POLS4100 - Constitutional Law: Institutional Powers Credits: 3
- POLS4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- POLS4330 - American Foreign Relations Credits: 3
- POLS4420 - Seminar in Public Administration Credits: 3 (Max. 6)
- POLS4430 - United States Presidency Credits: 3
- POLS4435 - Presidential Elections Credits: 3
- POLS4520 - Public Opinion Credits: 3
- POLS4530 - U.S. Congress Credits: 3
- POLS4550 - Internship in Government Credits: 1-6 (dept. approval required)(1-6)
- POLS4560 - Washington Semester Program Credits: 15 (Max. 6)
- POLS4710 - Topics in Credits: 1-3 (dept. approval required)(Max. 9)
- POLS4720 - Workshop in Practical Politics Credits: 1-3 (Max. 6)
- POLS4840 - Seminar in Public Law Credits: 3 (Max. 6)
- POLS4850 - Seminar in American Politics and Institutions Credits: 3 (Max. 6)

American Studies Minor

Students may minor in American Studies through a program of 24 credit hours of study, with credit hours evenly distributed between lower and upper division courses, which include at least 3 courses in American Studies (with the AMST course prefix), at any level (except AMST 1101), in consultation with and depending on approval by a faculty advisor in American Studies. Coursework for the minor may be matched with a student's major requirements in related disciplines and fields.

Anthropology Minor

See the anthropology web site for more details.

Introductory Courses

The minor for non-anthropology majors requires two of the introductory courses:

- ANTH1100 - Introduction to Biological Anthropology Credits: 4
- ANTH1200 - Introduction to Cultural Anthropology Credits: 3
- ANTH1300 - Introduction to Archaeology Credits: 3
- ANTH2000 - Introduction to Linguistic Anthropology Credits: 3

Electives

- 11-12 hours of electives from 2000, 3000, or 4000-level anthropology courses with no more than 3 hours at the 2000-level.

Art History Minor

Art History Sequence: 6 Hours

- ART2010 - Art History I Credits: 3
- ART2020 - Art History II Credits: 3

Lower Division Requirement: 3 Hours

- ART2700 - Introduction to Museology Credits: 3
OR
- ART2030 - History of Graphic Design Credits: 3

Other Traditions: 3 Hours

Including but not limited to Art & Architecture of Medieval Islam, Japanese Art History, Meso-American Art History

- ART3720 - Art and Architecture of Medieval Islam Credits: 3

Art History Electives at the 3000/4000-level: 9 Hours

Art History Electives at the 3000/4000-level (including additional Other Traditions) Credits: 9

Total Credits: 21 Hours

Asian Studies Minor

The Asian Studies Minor offers students the opportunity to engage in an interdisciplinary program of study of an Asian region or a single country. The program emphasizes a social science approach to the study of Asian history, politics, society, and culture with options to include foreign language and study abroad components towards completion of the Minor. For the purposes of this minor, Asia is defined first and foremost as a geographic entity to include Western, Northern, Central, South and East Asian areas. Thus, for example, countries such as modern Turkey and areas such as the 'Middle East' can rightly be included in 'Asia' alongside areas more traditionally understood as part of Asia such as China and India.

Course Requirements (18 Credits)

If your primary major is in the College of Arts and Sciences, at least twelve (12) credit hours must be exclusive to the minor and not counted towards fulfilling major requirements. To count towards the minor, all courses must be completed with a grade of 'C' or better.

Gateway Course (3 Credit Hours)

All Asian Studies Minor students must complete one of two required Gateway courses depending on their primary area of interest within Asia.

- INST2230 - Introduction to Asian Studies Credits: 3 (G/COM2)
- OR**
- POLS3270 - Governments and Politics of the Middle East Credits: 3

Asian Studies Area Courses (15 Credit Hours)

Asian Studies Minor students must complete a minimum of fifteen (15) additional credit hours from the following list of approved Asian Studies Area Courses. A minimum of nine (9) of these credit hours must be taken at the upper-division (3000+) level. In addition to the approved courses on this list, topics courses, Honors courses, or other special course offerings may count towards fulfilling Asian Studies Area Course requirements based on the approval of the student's designated minor advisor. Students are strongly encouraged to review the International Studies Newsletter each semester to see what Asian Studies Area courses are currently being offered.

Approved Asian Studies Area Courses

- ART 2720 - Introduction to the Art and Culture of Islam
- ART4650 - International Study of Art Credits: 3
- CHIN1101 - First-Year Seminar Credits: 3
- CHIN2041 - Contemporary and Traditional Chinese Culture Credits: 3
- CHIN3160 - See Movies, Touch China Credits: 3
- ENR3300 - Environmental Policy, Conservation and Development in India Credits: 3
- HIST2040 - Imperial China Credits: 3
- HIST2041 - Modern China Credits: 3
- HIST2320 - History of Islam Credits: 3
- OR**
- RELI2320 - History of Islam Credits: 3
- HIST2460 - Traditional Japan Credits: 3
- HIST2461 - Modern Japan Credits: 3
- HIST2470 - Civilization of India Credits: 3-4
- HIST 3210 - The Islamic World in the Premodern Era
- HIST3220 - History of the Modern Middle East Credits: 3
- HIST3400 - Mongol Empire Credits: 3
- GWST4335 - Women and Islam Credits: 3
- HIST 4520 - Modern Far East: China, Japan and India
- INST2230 - Introduction to Asian Studies Credits: 3
- INST3100 - Chinese Society Credits: 3
- OR**

- SOC3100 - Chinese Society Credits: 3
- INST3400 - Politics and Society of Turkey Credits: 3
- INST4200 - China and Globalization Credits: 3
- INST4250 - East Asia Society and Economy Credits: 3
- INST4560 - Global Cities Credits: 3
- INST4590 - Sustainable Business Practices Credits: 3
- OR**
- LANG2150 - Manga: History and Culture Credits: 3
- LANG3105 - Major Themes in Chinese and Japanese Literature Credits: 3
- LANG3140 - Anime: History and Culture Credits: 3
- LANG4800 - Advanced Instruction In: (TOPIC) Credits: 1-3
- POLS3270 - Governments and Politics of the Middle East Credits: 3
- POLS4230 - Governments and Politics of Asia Credits: 3
- RELI2040 - Religions of the Middle East: Judaism, Christianity and Islam Credits: 3
- RELI2050 - Religions of Asia Credits: 3
- RELI2315 - History of Non-Western Religions Credits: 3
- RELI3320 - Eastern Thought Credits: 3
- OR**
- PHIL3320 - Eastern Thought Credits: 3
- RELI3340 - Mysticism, Yoga, and Enlightenment in the East Credits: 3
- RELI 3344 - Gods, Avatars, Heroes, and Mystics
- SOC 3050 - Japanese Society

Optional Asian Study Abroad Component

Asian Studies Minor students are also strongly encouraged to participate in a relevant study abroad program in the region of Asia to supplement their coursework at UW. Accordingly, up to six (6) hours of relevant study abroad credit may be counted towards fulfillment of the Asian Studies Area Course requirement on the approval of the student's designated minor advisor. Optional Asian Foreign Language Component Asian Studies Minor students are also strongly encouraged to learn an Asian foreign language as part of their progression towards completion of the Minor. Accordingly, up to eight (8) lower-division (1000-2000) credit hours of an Asian foreign language may be counted towards fulfillment of the Asian Studies Area Course requirement. 'Asian' languages at UW include Japanese, Chinese and Arabic. However, Asian Studies Minor, students need not necessarily be limited to the three languages currently taught at UW. On the approval of the student's designated minor advisor these optional language credit hours may be fulfilled by other Asian language instruction at UW, other relevant in-country summer intensive programs, or language-focused study abroad programs.

Astronomy Minor

Complete

- PHYS1210 - Engineering Physics I Credits: 4
- OR**
- PHYS1310 - College Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
- OR**
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3

- ASTR2310 - General Astronomy I Credits: 4
- ASTR2320 - General Astronomy II Credits: 4

Biology, Minor

Students who are majoring in Biology may not declare a Minor in Biology. Elective credit hours used towards the BIOL minor must be in courses not being counted towards a student's major. A grade of "C" or better is required in all courses. At least 25% of credit hours for the BIOL minor must be earned in upper division courses.

Credit in other courses with different prefixes in the biological sciences area may be applied to the minor in Biology at the discretion of a student's minor advisor.

Required Courses:

(12 credit hours)

- LIFE1010 - General Biology Credits: 4

Select Two of the Following:

- LIFE 2021
- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4

Elective Courses:

(9-12 credit hours)

Select one different course from each of three of the following subject areas. One of the three courses must have a laboratory component.

Molecular/Genetics/Cell Biology:

- LIFE3050 - Genetics Credits: 4
- LIFE3600 - Cell Biology Credits: 4
- MOLB3000 - Introduction to Molecular Biology Credits: 3
- ZOO 4425

Morphology/Physiology:

- BOT3000 - Plant Ecophysiology/Plant Form and Function Credits: 4
- BOT4395 - Symbiosis Credits: 3
- BOT4730 - Plant Physiological Ecology Credits: 4
- ZOO4190 - Comparative Environmental Physiology Credits: 4
- ZOO4330 - Ichthyology Credits: 3
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3

- ZOO4540 - Invertebrate Zoology Credits: 4
- ZOO4380 - Herpetology Credits: 3

Evolution:

- LIFE3500 - Evolutionary Biology Credits: 3
- LIFE3600 - Cell Biology Credits: 4
- BOT4280 - Paleobotany Credits: 4

Ecology:

- LIFE 3400
- BOT4280 - Paleobotany Credits: 4
- BOT4700 - Vegetation Ecology Credits: 4
- BOT4730 - Plant Physiological Ecology Credits: 4
- BOT4745 - Terrestrial Ecosystem Ecology Credits: 3
- BOT4775 - Forest Ecology Credits: 4
- MOLB4540 - Microbial Diversity and Ecology Credits: 4
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4420 - Conservation Biology Credits: 3
- ZOO4440 - Limnology Credits: 3
- ZOO4400 - Population Ecology Credits: 3

Botany, Minor

Required Courses Credits: 11-12 Hours

- BOT3000 - Plant Ecophysiology/Plant Form and Function Credits: 4
- BOT4640 - Flora of the Rocky Mountains Credits: 3
OR
- BOT4680 - Taxonomy of Vascular Plants Credits: 4
- BOT4700 - Vegetation Ecology Credits: 4
OR
- BOT4775 - Forest Ecology Credits: 4

Elective Courses Credits: 7 Hours (Minimum)

(minimum 7 credit hours).

Choose from the following:

- BOT3100 - Plants and Civilization Credits: 3
- BOT 3150
- BOT 4111
- BOT 4130

- BOT 4330
- BOT4420 - Conservation Biology Credits: 3
- BOT4550 - Computational Biology Credits: 4
- BOT4730 - Plant Physiological Ecology Credits: 4
- BOT4745 - Terrestrial Ecosystem Ecology Credits: 3
- BOT4780 - Biogeochemistry Credits: 3

Total Credits for Botany Minor: 18 Hours

Ceramics Minor

Required Courses: 9 Hours

- ART1005 - Drawing I Credits: 3
- ART1120 - Foundation: Three Dimensional Credits: 3

- ART2350 - Metalsmithing I Credits: 3
OR
- ART2310 - Sculptural Practices I Credits: 3

Studio Elective Courses in Ceramics: 12 Hours

- ART2410 - Ceramics I Credits: 3
- ART2420 - Ceramics II Credits: 3
- ART3410 - Ceramics III/I Credits: 3
- ART3420 - Ceramics III/II Credits: 3

Art History Survey Elective: 3 Hours

Choose one from

- ART2010 - Art History I Credits: 3
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Chinese Minor

Requirements

- CHIN2040 - Second Year Chinese II Credits: 4
- CHIN2041 - Contemporary and Traditional Chinese Culture Credits: 3
- CHIN3050 - Intermediate Composition and Conversation Credits: 3
- CHIN3065 - Intermediate Composition and Conversation II Credits: 3

- CHIN3055 - Business Chinese Credits: 3
 - CHIN4070 - Business Chinese II Credits: 3
- OR**
- CHIN3160 - See Movies, Touch China Credits: 3

Total: 19 Hours

Note: Study abroad is required for completion of 12 credit hours of coursework for this minor.

Classical Civilizations Minor

Requirements

- CLAS2020 - Classical Greek Civilization Credits: 3
- OR**
- HIST2120 - Ancient Greece and the Near East Credits: 3
 - CLAS2040 - Classical Roman Civilization Credits: 3
- OR**
- HIST2130 - Ancient Rome Credits: 3

Electives

- 12 hours chosen from Classics 3000-level or above.
- Up to 6 hours of Latin at the 3000-level or above may be counted as electives.
- Other courses about ancient Mediterranean cultures that are not taught under Classics may be submitted for approval as electives to the advisor for the minor.

Total: 18 Hours

Communication Minor

Required: 12 Hours

- COJO1040 - Introduction to Human Communication Credits: 3
- COJO2010 - Public Speaking Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3040 - Advanced Communication Theory Credits: 3

Electives: 6 Hours

- COJO3160 - Theory of Language and Society Credits: 3
- COJO3190 - Cross-Cultural Communication Credits: 3
- COJO3480 - Internship Credits: 1-12 (limited to 3 credits)
- COJO3520 - Communication Technology and Society Credits: 3

- COJO3550 - Political Communication Credits: 3
- COJO3900 - Family Communication Credits: 3
- COJO4020 - Mass Media and Society Credits: 3
- COJO4030 - Advanced Interpersonal Communication Credits: 3
- COJO4050 - Communication and Conflict Credits: 3
- COJO4061 - Rhetorical Theory and Criticism Credits: 3
- COJO4140 - Nonverbal Communication Studies Credits: 3
- COJO4250 - Advanced Organizational Communication Credits: 3
- COJO4260 - Rhetoric and Social Justice Credits: 3
- COJO4620 - Intergroup Communication Credits: 3
- COJO4640 - Communication Apprehension/ Competence Credits: 3
- COJO4210 - Special Topics in Communication Credits: 1-3 (no more than one)

Total: 18 Hours

Creative Writing Minor

Minor in Creative Writing. The creative writing minor consists of six courses (18 hours) in creative writing and literature. Four of these courses will be in creative writing (12 hours) and must adhere to the following sequence: CW 1040 Intro to Creative Writing, two Lower Division Creative Writing courses (at the 2000-level), and an Upper Division course (4050). In addition, two courses will be in literature (6 hours). All courses must be completed with grades of C or better.

This minor is intended to be used with any major and must be designed in conjunction with a creative writing advisor. Each course must be passed with a grade of C or better.

Criminal Justice Minor

A minor in criminal justice requires 18 semester hours in criminal justice. All courses must be completed with a grade of C or better.

Required Courses

- CRMJ1001 - Introduction to Criminal Justice Credits: 3
- CRMJ2210 - Criminal Law Credits: 3
- CRMJ2400 - Criminology Credits: 3
- OR
- SOC2400 - Criminology Credits: 3
- CRMJ3110 - Criminal Courts and Processes Credits: 3
- CRMJ3350 - Correctional Theory and Practice Credits: 3
- CRMJ3490 - Issues in Policing Credits: 3

Dance Minor

Required Courses

- THEA1021 - Academic and Professional Issues in Dance Credits: 1
- THEA1040 - Production Crew I Credits: 0.5
- THEA2200 - Backgrounds of Dance Credits: 3
- THEA4250 - Beginning Dance Composition Credits: 2 **

Ballet Technique: 5-6 Credit Hours

Four (4) Consecutive Classes in Ballet Technique.* Choose From:

- THEA1410 - Beginning Ballet I Credits: 1
- THEA1420 - Beginning Ballet II Credits: 1
- THEA2410 - Intermediate Ballet I Credits: 1.5
- THEA2430 - Intermediate Modern I Credits: 1
- THEA3410 - Classical Ballet III/I Credits: 1.5
- THEA3420 - Classical Ballet III/II Credits: 1.5
- THEA4010 - Advanced Ballet Credits: 1-3

Modern Technique: 5-6 Credit Hours

Four (4) Consecutive Classes in Modern Technique.* Choose from:

- THEA1430 - Beginning Modern I Credits: 1
- THEA1440 - Beginning Modern II Credits: 1
- THEA2430 - Intermediate Modern I Credits: 1
- THEA2440 - Intermediate Modern II Credits: 1
- THEA3430 - Modern Dance III/I Credits: 1.5
- THEA3440 - Modern Dance III/II Credits: 1
- THEA4030 - Advanced Modern Dance Credits: 1-3

Jazz or a Mix of Jazz and Tap Class: 2 Credit Hours

Two (2) Consecutive Classes in Jazz or a Mix of Jazz and Tap Classes.* Choose from: 2

- THEA1450 - Beginning Tap Dance I Credits: 1
- THEA1480 - Beginning Jazz Dance I Credits: 1
- THEA2450 - Intermediate Tap II Credits: 1
- THEA2480 - Intermediate Jazz I Credits: 1
- THEA3480 - Jazz III/I Credits: 1
- THEA3490 - Jazz III/II Credits: 1

Elective at 3000-4000 level: 2-3 Credit Hours

Suggested:

- THEA4010 - Advanced Ballet Credits: 1-3
 - THEA4030 - Advanced Modern Dance Credits: 1-3
 - THEA4001 - Historical Dance Credits: 2
- OR**

- THEA4200 - 20th Century Dance Credits: 3 (COM3)

Minor Total 17.5-22.5

Digital Media Minor

Required Courses: 22 Hours

ART 2110: Type 1: Thinking with Type - 3 credits

- ART1005 - Drawing I Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3
OR
- ART1130 - Foundation: Color Theory Credits: 3
- ART1115 - Digital Media Credits: 1
- ART2030 - History of Graphic Design Credits: 3
- ART2112 - VCD I Visual Thinking Credits: 3
- ART2122 - VCD II Visual Programming Credits: 3
- ART3112 - Type: Type, Images, and Narrative Credits: 3
OR
- ART3150 - VCD IV: Visual Imaging in Time Credits: 3

Art History Survey Elective: 3 Hours

Choose one from

- ART2010 - Art History I Credits: 3
OR
- ART2020 - Art History II Credits: 3

Total Credits: 25 Hours

Drawing Minor

Required Courses: 12 Hours

- ART1005 - Drawing I Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3
- ART2005 - Drawing II Credits: 3
- ART3052 - Life Drawing I Credits: 3

Studio Elective Courses in Drawing: 6 Hours

*6 credits chosen from the following...

- ART3005 - Drawing III Credits: 3
- ART4005 - Drawing IV Credits: 3
- ART4052 - Life Drawing II Credits: 3
- ART3250 - Watercolor Painting I Credits: 3
- ART3260 - Illustration I Credits: 3
- ART4250 - Watercolor Painting II Credits: 3
- ART4260 - Illustration II Credits: 3
- ART4975 - Independent Study and Research Credits: 1-3

Art History Survey Elective: 3 Hours

Choose one from

- ART2010 - Art History I Credits: 3
- ART2020 - Art History II Credits: 3

Total Credits: 21 Hours

Environmental Values Minor

The minor in Environmental Values may be added to any bachelor's program at UW. This minor creates a vital link among the natural sciences, humanities, and social sciences through exploration of aesthetics, culture, ethics, and policy.

The minor requires a total of 18 credit hours, including at least one course within each of four areas of concentration. At least 12 of these credits must be outside the primary major, and nine of these credits must be at or above the 3000-level.

Core Course

A three-hour, core course is required of all students.

- PHIL2330 - Environmental Ethics Credits: 3
- OR**
- PHIL 2340 - Natural Resources Ethics Credits: 3

Areas of Concentration:

(note: the courses listed below are provided as examples of the type of courses that meet the various areas of concentration. Other courses may be approved on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor.)

Aesthetics

Expressing ourselves through the performing, visual and literary arts:

- ART 4640
- ENGL 4050

- ENGL 4240
- GEOG4500 - The American Landscape Credits: 3
- GEOG 4530
- THEA2400 - Vertical Dance I Credits: 1
- THEA3400 - Vertical Dance II Credits: 1

Culture

Viewing human meaning and purpose in historical and contemporary terms:

- NAIS3000 - Plains Culture and History Credits: 3
- AMST 3000
- ANTH4310 - Environmental Anthropology Credits: 3
- ENGL3400 - Topics in: Eighteenth-Century Literature Credits: 3
- ENGL4480 - Regional Literature of the US: The West Credits: 3
- ENR2000 - Environment and Society Credits: 3
- ENR3050 - Cultures of Nature in the United States Credits: 3
- GEOG 1050
- HIST4475 - American Environmental History Credits: 3
- PHCY 4380

Ethics

Considering right and wrong via critical and systematic thinking and doing:

- PHIL2330 - Environmental Ethics Credits: 3
- PHIL2345 - Natural Resource Ethics Credits: 3
- PHIL3250 - Global Justice Credits: 3
- PHIL3300 - Ethical Theory Credits: 3
- PHIL3350 - History of Moral Philosophy Credits: 3
- PHIL4340 - Issues in Environmental Ethics Credits: 3
- RELI 2060

Policy

Exploring laws, regulations, and public discourse in American society:

- AGE4710 - Natural Resource Law and Policy Credits: 3
- NAIS4340 - Natural Resource Management on Western Reservations Credits: 3
- ECON2400 - Economics of the Environment Credits: 3
- ENR4900 - ENR Policy in Practice Credits: 3
- GEOG4040 - Conservation of Natural Resources Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- POLS4052 - Federal Land Politics Credits: 3

Ethics Minor

Ethical questions and problems arise in all aspects of life. A minor in ethics can complement and enrich any major field of study. The minor in ethics consists of six courses, four at the 3000 level or above.

The capstone course is an independent study normally taken during a student's senior year. The course integrates the student's different areas of study in the ethics minor into a project or thesis. Any professor in any college can sponsor this independent study. Capstone topics must be approved by the ethics minor advisor.

The minor in ethics is sponsored by the College of Arts and Sciences and administered through the Philosophy Department. Any undergraduate student at the university can minor in ethics.

A Student Takes One Course in Each of These Areas:

Ethical Theory

- PHIL3300 - Ethical Theory Credits: 3
- PHIL3350 - History of Moral Philosophy Credits: 3
- PHIL3250 - Global Justice Credits: 3

Applications

(determined on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor)

Scientific, Historical and Social Analysis

(determined on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor)

Capstone Course

(determined in consultation with the Philosophy Department Undergraduate Advisor)

Electives

The other two courses are approved electives, (2 courses from Areas 1, 2 or 3 -- each from a different area).

European Studies Minor

The European Studies Minor offers students the opportunity to engage in an interdisciplinary program of study of a European region or a single country. The program emphasizes a social science approach to the study of modern European history, politics, society, and culture with options to include foreign language and study abroad components towards completion of the Minor. For the purposes of this minor, Europe is defined first and foremost as a geographic entity running from the Atlantic to the Urals and from Scandinavia to the Mediterranean and the Caucasus Mountains. Courses that transcend these boundaries should include the study of Europe in a prominent way to count toward the minor.

All required courses for the major must be passed with a grade of C or better. A course cannot simultaneously fulfill more than one major requirement.

Course Requirements (18 Hours)

If your primary major is in the College of Arts and Sciences, at least twelve (12) credit hours must be exclusive to the minor and not counted towards fulfilling major requirements. To count towards the minor, all courses must be completed with a grade of 'C' or better.

Gateway Course (3 Credit Hours)

All European Studies Minor students must complete one of two required Gateway courses, either:

- INST2280 - Introduction to European Studies Credits: 3 (COM2)
- OR**
- POLS2200 - Politics of Europe and the European Union Credits: 3 (COM2)

European Studies Area Courses (15 Credit Hours)

European Studies Minor students must complete a minimum of fifteen (15) additional credit hours from the following list of approved European Studies Area Courses. A minimum of nine (9) of these credit hours must be taken at the upper-division (3000+) level. In addition to the approved courses on this list, topics courses, Honors courses, or other special course offerings may count towards fulfilling Area Course requirements based on the approval of the student's designated minor advisor. Students are strongly encouraged to review the International Studies Newsletter each semester to see what European Studies Area courses are currently being offered.

Approved European Studies Area Courses

- A&S 2200 - British Life and Culture
- FREN2130 - Contemporary French Culture Credits: 3
- FREN3110 - Contemporary French Civilization Credits: 3
- FREN 4085 - Studies in French Culture
- GERM3006 - 20th Century German Culture and Civilization Credits: 3
- GERM3150 - German History and Culture Credits: 3
- GERM 4265 - Divided Nation: Politics and Culture in Germany 1945 - 1990
- GERM4285 - 20th/21st Century German Film Credits: 3
- HIST2080 - Holocaust Credits: 3
- HIST2240 - The History of Russia Since 1855 Credits: 3
- HIST3110 - Modern Germany Credits: 3
- HIST4170 - Europe in the Nineteenth Century Credits: 3
- HIST4180 - Europe in the 20th Century Credits: 3
- HIST 4190 - Europe: 1930 - Present
- HIST 4195 - European Economic History
- HIST4270 - France: Old Regime and Revolution Credits: 3
- HIST 4280 - France Since 1814
- HIST4290 - History of the Soviet Union Credits: 3
- HIST4310 - World War II in Europe Credits: 3
- HIST4315 - History, Politics and Memory of the Holocaust in Europe Credits: 3
- HIST4320 - Memory and National Identity in Twentieth Century Europe Credits: 3
- INST2280 - Introduction to European Studies Credits: 3
- INST4330 - American Foreign Relations Credits: 3
- OR**
- POLS4330 - American Foreign Relations Credits: 3

OR

- SOC 4330 - The World System

- INST4380 - International History of Human Rights Credits: 3
- INST4881 - International Social Welfare and Social Development Credits: 3
- POLS2200 - Politics of Europe and the European Union Credits: 3
- POLS3220 - Government and Politics of Russia and FSU Credits: 3
- POLS4215 - European Union Credits: 3
- RELI 4150 - Christianity, Jews and Muslims in Iberia
- SPAN3220 - Spanish-American Cultures in Context Credits: 3

Optional European Study Abroad Component

European Studies Minor students are also strongly encouraged to participate in a relevant study abroad program in the region of Europe to supplement their coursework at UW. Accordingly, up to six (6) hours of relevant study abroad credit may be counted towards fulfillment of the European Studies Area Course requirement on the approval of the student's designated minor advisor.

Optional European Foreign Language Component

European Studies Minor students are also strongly encouraged to learn an European foreign language (other than English) as part of their progression towards completion of the Minor. Accordingly, up to eight (8) lower division (1000-2000) credit hours of an European foreign language may be counted towards fulfillment of the European Studies Area Course requirement. 'European' languages at UW include French, German, and Spanish. However, European Studies Minor students need not necessarily be limited to the three languages currently taught at UW. On the approval of the student's designated minor advisor these optional language credit hours may be fulfilled by other European language instruction at UW, other relevant in-country summer intensive programs, or language-focused study abroad programs.

French Minor

Requirements

- FREN2040 - Second Year French II Credits: 3
- FREN2140 - Introduction to Reading Credits: 3
- FREN3050 - Third Year French I Credits: 3

Electives

- 9 hours chosen from French at the 3000 or 4000 level.

Total: 18 Hours

Gender and Women's Studies Graduate Minor

A total of 12 hours of course work is required, including nine hours at the 5000-level and including GWST5710 - Feminist Theoretical Perspectives. When practical, students should include a GWST faculty member on their thesis, dissertation or Plan B

committees. Students in professional programs without a culminating research project (or those whose graduate work is outside of GWST) can meet this requirement through alternative means.

Gender and Women's Studies Minor

A minimum of 12 hours of credit in the minor must be exclusive of hours earned in the student's major. Nine of the required hours must be 3000-level or above. All classes for the minor must be completed with a grade of "C" or better.

For the Gender and Women's Studies minor, students must complete 18 hours of WMST course work including one of the following core courses:

Choose One of the Following

- GWST1080 - Introduction to Women's Studies Credits: 3
- GWST1900 - Women and Leadership Credits: 3
- GWST2000 - Introduction to LGBTQ/NS Studies Credits: 2
- WMST 3500
- GWST3710 - Gender and Humanities Credits: 3
- GWST4210 - Feminist Research Methods Credits: 3
- GWST4700 - Feminist Theories Credits: 3

Geology Minor

A minor in geology requires 18 hours of coursework in the Department of Geology and Geophysics. A grade of C or better is required in each of these courses.

Required Courses

Students are required to take

- GEOL1005 - Earth History Credits: 4
- OR another 1000-level GEOL course
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4

OR another 2000-level GEOL course

AND fulfill remaining credits with 2000-level or higher GEOL courses in consultation with their adviser.

German Minor

Requirements

- GERM2040 - Second Year German II Credits: 3
- GERM3050 - Third Year German I Credits: 3
- GERM3060 - Introduction to German Literature Credits: 3

Electives

- 9 hours chosen from German at the 3000 or 4000 level.

Total: 18 Hours

History Minor

The history minor requires at least 18 credit hours of HIST courses, 9 hours of which must be at the 3000-4000 level. These courses must be taken for letter grades with a minimum earned grade of C. For assistance in tailoring the minor content, contact the department office.

Human and Animal Physiology Minor

Requirements for the minor in human and animal physiology (AHPY) include a minimum of 18 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Courses

- ZOO3115 - Human Systems Physiology Credits: 4

At Least One of These Three:

* if more than one of the three required courses is completed, additional courses can count towards Physiology Core elective courses requirement below.

- ZOO4125 - Integrative Physiology Credits: 5
- ZOO4190 - Comparative Environmental Physiology Credits: 4
- PHCY3450 - Foundational Pathophysiology Credits: 4

Elective Courses

Physiology Core Electives. At least three courses from:

- ANSC4120 - Principles of Mammalian Reproduction Credits: 3
- ANSC4260 - Mammalian Endocrinology Credits: 3
- ANTH4210 - Human Osteology Credits: 3
- ANTH4230 - Forensic Anthropology Credits: 3
- KIN3021 - Physiology of Exercise Credits: 3
- KIN3038 - Exercise Psychology Credits: 3
- KIN3042 - Biomechanics of Human Movement Credits: 3
- KIN4042 - Advanced Biomechanics Credits: 3
- LIFE3600 - Cell Biology Credits: 4
- MOLB3610 - Principles of Biochemistry Credits: 4
- MOLB4100 - Clinical Biochemistry Credits: 4
- MOLB4400 - Immunology Credits: 4
- MOLB4670 - Advanced Molecular Cell Biology Credits: 3

- NEUR4295 - Neurodevelopment Credits: 3
- NEUR5100 - Structure and Function of the Nervous System Credits: 4
- NEUR5295 - Neurodevelopment Credits: 3
- NEUR5685 - Neurophysiology Credits: 3
- NEUR5887 - Molecular Neuropharmacology Credits: 3
- PATB4130 - Mammalian Pathobiology Credits: 3
- PATB4140 - Principles of Toxicology Credits: 3
- PATB4400 - Immunology Credits: 4
- PATB4710 - Medical Virology Credits: 3
- PSYC3250 - Health Psychology Credits: 3
- PSYC4040 - Cognitive Neuroscience Credits: 4
- PSYC4080 - Physiological Psychology Credits: 4
- PSYC4250 - Psychological Aspects of Chronic Illness Credits: 3
- SOC3550 - Medical Sociology Credits: 3
- SOC4160 - Sociology of Aging Credits: 3
- ZOO3010 - Vertebrate Anatomy, Embryology, and Histology Credits: 4
- OR**
- ZOO4110 - HIV/AIDS: The Disease and the Dilemma Credits: 3
- ZOO4280 - Introduction to Neuroscience Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4
- ZOO 4670
- ZOO4735 - Advanced Topics in Physiology Credits: 1-4
- ZOO5100 - Structure and Function of the Nervous System Credits: 4
- ZOO5685 - Neurophysiology Credits: 3
- SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing Credits: 4
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3

Interdisciplinary Computational Science Graduate Minor

In recognition of the importance of modeling and simulation in an increasing number of applications, the Graduate Interdisciplinary Computational Science Minor is intended to help prepare science, math, and engineering students for leading roles in their professions.

Requirements

- The student must earn 15 credit hours in specified courses.
- Within the 15 credits, the student must earn at least 12 credits in graduate level classes (5000).
- Within the 15 credits, the student must earn 6 credits outside of her/his department.
- Only grades of B or better will be accepted for a course counting towards the minor.
- For all students, the 15 hours of coursework will be divided into 9 credit hours of core courses and 6 credit hours of electives.

Core Courses

- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- OR**
- COSC5310 - Computational Methods in Applied Sciences I Credits: 3

- COSC5010 - Graduate Topics in Computer Science Credits: 1-6
- MATH5340 - Computational Methods II Credits: 3
- OR**
- COSC 5340 - Computational Methods II Credits: 3

- BOT4550 - Computational Biology Credits: 4
- OR**
- BOT5550 - Computational Biology Credits: 4
- GEOL4030 - Groundwater Flow and Solute Transport Modeling Credits: 3
- OR**
- GEOL5030 - Groundwater Flow and Solute Transport Modeling Credits: 3
- ME5461 - Computational Fluid Dynamics I Credits: 3
- ME5462 - Computational Fluid Dynamics II Credits: 3
- STAT5660 - Computationally Intensive Methods in Statistics Credits: 3

Electives

- COSC5110 - Analysis Of Algorithms Credits: 3
- STAT5680 - Advanced Bayesian Statistics Credits: 3
- STAT5380 - Bayesian Data Analysis Credits: 3
- High-Performance Computing in Geosciences, 2 hrs
- MATH 5320 - Mathematics Modeling of Processes Credits: 3

- CHEM4560 - Molecular Modeling Credits: 3
- OR**
- CHEM5560 - Molecular Modeling Credits: 3
- PHYS4840 - Mathematical and Computational Physics II Credits: 4
- MATH4300 - Introduction to Mathematical Modeling Credits: 3

Interdisciplinary Computational Science Minor

In recognition of the importance of modeling and simulation in an increasing number of applications, the Undergraduate Interdisciplinary Computational Science Minor is intended to help prepare science, math, and engineering students for leading roles in their professions.

The Undergraduate Minor in Computational Science is based on the following requirements:

1. The student must earn 15 credit hours in specified courses.
2. Within the 15 credits, the student must earn 9 credits at the upper-division level (3000 or above).
3. Within the 15 credits, the student must earn 6 credits outside of her/his major.
4. Within the 15 credits, the student must earn at least 6 credits in core courses.
5. Only grades of C or better will be accepted for the minor.

The 15 hours of coursework are divided between core and elective courses as listed below.

Core Courses

- MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3
- OR**
- COSC4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3

- High-Performance Computing (Offered as a topics course).
- MATH3340 - Introduction to Scientific Computing Credits: 3
OR
- COSC3340 - Introduction to Scientific Computing Credits: 3
- STAT4460 - Statistical Software Credits: 1

Elective Courses

- BOT4550 - Computational Biology Credits: 4
OR
- BOT5550 - Computational Biology Credits: 4
- COSC3020 - Algorithms and Data Structures Credits: 4
- PHYS4840 - Mathematical and Computational Physics II Credits: 4
- CHEM4560 - Molecular Modeling Credits: 3
OR
- CHEM5560 - Molecular Modeling Credits: 3
- ES 3070 - C with Numerical Methods for Engineers
- MATH4300 - Introduction to Mathematical Modeling Credits: 3
- ME4040 - Introduction to Finite Elements Credits: 3
- COSC4820 - Database Systems Credits: 3

Interdisciplinary Pre-Law Minor

The minor requires 18 hours to be completed from among the following courses. Of these 18 hours, 12 must be upper division (3000 or 4000 level). In addition, 12 of the 18 hours must be outside the student's primary major, and none of these courses may be credited toward both the minor and the USP requirement. Complete one course from each of the following categories. All coursework must be completed with a grade of C or better to be counted toward the minor.

Language Comprehension & Expression: 3 Hours

- COMM1030 - Interpersonal Communication Credits: 3
OR
- COJO 1030 - Interpersonal Communication Credits: 3
- COJO2095 - Persuasive Argumentation Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3160 - Theory of Language and Society Credits: 3
- COJO4061 - Rhetorical Theory and Criticism Credits: 3
OR
- ENGL4061 - Rhetorical Theory and Criticism Credits: 3
- AGE4450 - Negotiation Credits: 3
- ANTH4795 - Language Change Credits: 3

Written Comprehension & Expression: 3 Hours

Any course with a USP designation of C3 may be counted in this area. However, no C3 course may be counted twice toward fulfilling this category and the USP C3 requirement or another category within the prelaw minor.

Critical Understanding of Human Institutions & Values: 3 Hours

- POLS2460 - Introduction to Political Philosophy Credits: 3
- MGT3110 - Business Ethics Credits: 3
- PHIL3300 - Ethical Theory Credits: 3
- PHIL3350 - History of Moral Philosophy Credits: 3
- PHIL3500 - History of Science Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- OR**
- AMST4051 - Environmental Politics Credits: 3
- OR**
- ENR4051 - Environmental Politics Credits: 3
- OR**
- GEOG4051 - Environmental Politics Credits: 3
- OR**
- REWM4051 - Environmental Politics Credits: 3
- POLS4090 - Anglo-American Jurisprudence Credits: 3
- FCSC4113 - Consumer Issues Credits: 3
- AAST4260 - Rhetoric and Social Justice Credits: 3
- OR**
- COJO4260 - Rhetoric and Social Justice Credits: 3
- PHIL4300 - Topics in Ethics Credits: 3-6
- PHIL4340 - Issues in Environmental Ethics Credits: 3

Creative & Analytical Thinking: 3 Hours

- CW2050 - Introduction to Fiction Credits: 3
- CW2060 - Introduction to Nonfiction Credits: 3
- CW2080 - Introduction to Poetry Credits: 3
- PHIL2420 - Critical Thinking Credits: 3
- PHIL3140 - Philosophy of Science Credits: 3
- PHIL3220 - Existentialism and Phenomenology Credits: 3
- PHIL3420 - Symbolic Logic Credits: 3
- PHIL3440 - Philosophy of Mind Credits: 3
- PHIL3510 - Introduction to Epistemology Credits: 3
- ANTH4230 - Forensic Anthropology Credits: 3
- OR**
- CRMJ4230 - Forensic Anthropology Credits: 3
- OR**
- PHIL4420 - Advanced Logic Credits: 3
- AGE4550 - Negotiation Analysis Credits: 3
- OR**
- ENR4550 - Negotiation Analysis Credits: 3

World Cultures & International Institutions: 3 Hours

- HIST1330 - World History since 1500 Credits: 3
- ANTH2200 - World Culture Credits: 3
- PHIL3250 - Global Justice Credits: 3
- PHIL3320 - Eastern Thought Credits: 3
- ANTH3420 - The Anthropology of Global Issues Credits: 3
- OR**
- INST3420 - The Anthropology of Global Issues Credits: 3
- INST3910 - Global Sociology Credits: 3
- OR**
- SOC3910 - Global Sociology Credits: 3
- CRMJ4280 - Comparative Criminal Justice Credits: 3

- INST4340 - International Organizations Credits: 3
- OR**
- POLS4340 - International Organizations Credits: 3

Law: 3 Hours

- MGT1040 - Legal Environment of Business Credits: 3
- CRMJ2210 - Criminal Law Credits: 3
- POLS3100 - Politics and the Judicial Process Credits: 3
- CRMJ3110 - Criminal Courts and Processes Credits: 3
- NAIS3300 - Federal Indian Law Credits: 3
- AGE3400 - Agricultural Law Credits: 3
- POLS4100 - Constitutional Law: Institutional Powers Credits: 3
- CRMJ4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- OR**
- POLS4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- CRMJ4140 - Criminal Legal Procedure Credits: 3
- MGT4340 - Law for Managers Credits: 3
- MGT4350 - Commercial Law Credits: 3
- MGT4360 - Business Law for Entrepreneurs Credits: 3
- COJO4500 - Mass Communication Law Credits: 3
- HIST4515 - American Legal History Credits: 3
- CRMJ4540 - Gender and Crime Credits: 3
- OR**
- GWST4540 - Gender and Crime Credits: 3
- AGE4710 - Natural Resource Law and Policy Credits: 3
- CRMJ4730 - Psychology and Law Credits: 3
- OR**
- PSYC4730 - Psychology and Law Credits: 3
- ENR4750 - ENR Law and Policy Credits: 3
- POLS4840 - Seminar in Public Law Credits: 3

International Relations and Comparative Politics Minor

Requirements

A minor in International Relations and Comparative Politics requires

- POLS2310 - Introduction to International Relations Credits: 3
- POLS1200 - Non-Western Political Cultures Credits: 3
OR
- POLS1250 - Introduction to Comparative Government Credits: 3
- POLS4870 - Seminar in International Relations Credits: 3
OR
- POLS4890 - Seminar in Comparative Government and Politics Credits: 3
- 9 hours from an approved list of courses, with a minimum of 6 hours at the 3000-level or above.

Approved International Relations and Comparative Politics Minor Courses

- POLS2200 - Politics of Europe and the European Union Credits: 3
- POLS2290 - Governments and Politics of Latin America Credits: 3
- POLS2490 - Topics In: Credits: 1-3 (dept. approval required) (Max. 6)
- POLS3200 - Comparative Political Cultures Credits: 3
- POLS3220 - Government and Politics of Russia and FSU Credits: 3
- POLS3270 - Governments and Politics of the Middle East Credits: 3
- POLS3300 - Model United Nations Credits: 1-3 (Max. 6)
- POLS4013 - Political Geography Credits: 3
- POLS4215 - European Union Credits: 3
- POLS4230 - Governments and Politics of Asia Credits: 3
- POLS4255 - Politics of Developing Nations Credits: 3
- POLS4260 - Democratization and Regime Change Credits: 3
- POLS4290 - Inter-American Relations Credits: 3
- POLS4330 - American Foreign Relations Credits: 3
- POLS4340 - International Organizations Credits: 3
- POLS4350 - Sustainable Development and Global Policy Credits: 3
- POLS4360 - International Peace and Conflict Credits: 3
- POLS4375 - Transitional Justice Credits: 3
- POLS4445 - Drug War Geopolitics in the Americas Credits: 3
- POLS4475 - Politics of Natural Resources in Latin America Credits: 3
- POLS4600 - Political Violence Credits: 3
- POLS4710 - Topics in Credits: 1-3 (dept. approval required)(Max. 6)
- POLS4870 - Seminar in International Relations Credits: 3 (Max. 6)
- POLS4890 - Seminar in Comparative Government and Politics Credits: 3 (Max. 6)

International Studies Graduate Minor

A graduate minor in international studies provides students in graduate programs other than international studies with the opportunity to acquire a basic graduate-level familiarity with international relations, global processes and cultural diversity around the world. Students acquire a foundation in intergovernmental relations and research methodology. Beyond this, students work closely with a graduate director to fashion a program of study appropriate for their interests and post-graduate plans. The minor complements several other graduate degree programs.

Prerequisites for Admission

Declaration of an international studies minor is contingent on admission to a master's or doctoral degree program. Application is in the form of a letter of interest to the director of the program, including the background, anticipated course of study, and reason for seeking the minor. An interview with the director is also required. All prerequisites for entering the graduate program in international studies as a major apply to the minor with the exception of proficiency in a second language. Students must be prepared for coursework in international studies at the graduate level and be willing to take prerequisite courses if necessary.

Course and Committee Requirements

Graduate students minoring in international studies must satisfy the requirements of their graduate major and take twelve credits of guided graduate coursework in international studies. With the approval of the department of the graduate major, these twelve hours may also count toward the major. Students are required to take at least one advanced theory course (INST 5200) and one advanced research methods course. All courses will be determined in consultation with the program director.

International Studies Minor

A minor in international studies requires 12 hours of a single foreign language and 15 hours of international studies curriculum, with a minimum of 9 hours at the 3000-level or above.

Japanese Minor

Requirements

- JAPN2040 - Second Year Japanese II Credits: 4
- JAPN3050 - Third Year Japanese I Credits: 3

Electives

12 hours chosen from:

- LANG2150 - Manga: History and Culture Credits: 3
- LANG3105 - Major Themes in Chinese and Japanese Literature Credits: 3
- LANG3140 - Anime: History and Culture Credits: 3
- HP2151 - Honors Non-Western Perspectives Credits: 3
- **OR**
- HP4151 - Senior Honor Seminar Credits: 3
- HIST2460 - Traditional Japan Credits: 3
- HIST2461 - Modern Japan Credits: 3
- JAPN3060 - Third Year Japanese II Credits: 3
- JAPN4070 - Fourth Year Japanese I Credits: 3
- JAPN4990 - Advanced Independent Study Credits: 1-3

Total: 19 Hours

Journalism Minor

Required Courses: 9 Hours

- COJO1000 - Introduction to Mass Media Credits: 3
- COJO2100 - Media Writing Credits: 3
- COJO4500 - Mass Communication Law Credits: 3

Elective Courses: 9 Hours

- COJO2400 - Introduction to Photography Credits: 3
- COJO3000 - History of American Journalism Credits: 3
- COJO3100 - Public Affairs Reporting Credits: 3
- COJO3200 - Graphics of Communication Credits: 3
- COJO3480 - Internship Credits: 1-12 (limited to 3 credits)
- COJO3530 - Multimedia Production Credits: 3
- COJO3550 - Political Communication Credits: 3
- COJO4020 - Mass Media and Society Credits: 3
- COJO4040 - Digital Video Production Credits: 3
- COJO4200 - Visual Communication Credits: 3
- COJO4230 - Special Topics in Mass Media Credits: 1-3 (no more than one)
- COJO4233 - Race, Gender, Ethnicity in the Media Credits: 3
- COJO4400 - Photojournalism Credits: 3 (COMM 2400 prerequisite)
- COJO4530 - Web Design Credits: 3
- COJO4700 - Media, Science, and Society Credits: 3

Total: 18 Hours

Latin Minor

Requirements

- LATN3110 - Vergil, The Aeneid I Credits: 3
- LATN3140 - Caesar Credits: 2
- LATN4120 - Catullus and the Elegiac Poets Credits: 3
- LATN4130 - Cicero Credits: 3

Electives

- 7 hours chosen from Latin at the 3000-level or above.

Total: 18 Hours

Latina/o Studies Minor

Latina/o Studies offers an undergraduate minor. The minor in Latina/o Studies requires 18 credit hours. Two of those courses (6 hours) must include the required foundation courses, and the remaining courses (12 hours) can be selected from the other areas of studies listed below.

Minor Requirements

3 Hours of Foundation Course

- LTST1300 - Introduction to Latina/o Studies Credits: 3

3 Hours of History or Social Science

- LTST2370 - Chicano History : Origins to 1900 Credits: 3
- LTST2385 - Chicano History: 1900 to Present Credits: 3
- LTST3800 - Chicanas/os in Contemporary Society Credits: 3

3 Hours of Culture, Arts, and Humanities

- LTST2360 - Mexican American Literature Credits: 3
- LTST3560 - Chicano Community Organizations Credits: 3
- LTST4100 - U.S. Latina/o Theater Credits: 3
- LTST4470 - Studies in Chicano Folklore Credits: 3

3 Hours of Gender, Race, Class, and Sexuality

- LTST1030 - Social Justice in the 21st Century Credits: 3
- LTST3200 - Perspectives in Chicana Studies Credits: 3
- LTST4650 - Women, Gender & Migration Credits: 3
- LTST4675 - U.S. Women of Color Credits: 3

6 Hours of Electives

(or any courses listed above not yet taken)

- LTST2060 - Special Topics in: Credits: 3
- LTST3080 - Spanish Language in the USA Credits: 3
- LTST4485 - USLatino Diaspora Credits: 3
- LTST 4495 Credits: 3
- LTST4496 - History of Mexico Credits: 3
- LTST 4525 Credits: 3
- LTST4975 - Independent Studies Credits: 1-3
- LTST4990 - Topics in Chicano Studies Credits: 1-3

Literacy Studies Minor

To minor in literary studies, a student must complete the following 18-credit sequence of courses:

Requirements

- ENGL2025 - Introduction to English Studies Credits: 3

Historical Period Classes: 6 Hours

Take any 2 of the following historical period courses:

- ENGL2425 - Literatures in English I Credits: 3 (Survey I: Literatures written in English through 1750)
- ENGL2430 - Literatures in English II Credits: 3 (Survey II: Literatures written in English, 1750-1865)
- ENGL2435 - Literatures in English III Credits: 3 (Survey III: Literatures written in English, 1865-present)
- ENGL2340 - Native American Culture and Literature Credits: 3 (Intro to African-American Literature)
- ENGL2350 - Introduction to African American Literature Credits: 3 (Intro to Native American Literature)
- ENGL2360 - Mexican American Literature Credits: 3 (Intro to Mexican-American Literature)
- ENGL3200 - Topics in: Medieval Literature Credits: 3
- ENGL3300 - Topics in: Renaissance Literature Credits: 3
- ENGL3400 - Topics in: Eighteenth-Century Literature Credits: 3
- ENGL3500 - Topics in: Nineteenth-Century Literature Credits: 3
- ENGL3600 - Topics in: 20th Century Literature Credits: 3

4000-level Literature Courses: 9 Hours

Take any additional 3 upper-division literature courses. Please consult with department for options in this category.

Marketing Communication Minor

The marketing communication minor is designed for College of Business and communication and journalism majors. Other majors are not recommended for this minor. For questions regarding this, please contact the minor supervisor.

Required for all Minors

- MKT3210 - Introduction to Marketing Credits: 3
- MGT3210 - Management and Organization Credits: 3
- COJO3300 - Advertising in the Media Credits: 3
- COJO3310 - Public Relations Credits: 3

Emphasis

COJO Emphasis

(to be taken by non-COJO majors):

Choose Three Courses from the Following: 9 Hours

- COJO2100 - Media Writing Credits: 3
- COJO2400 - Introduction to Photography Credits: 3
- COJO3200 - Graphics of Communication Credits: 3
- COJO3480 - Internship Credits: 1-12 (Prerequisite 9 hours of COJO)
- COJO3530 - Multimedia Production Credits: 3
- COJO4040 - Digital Video Production Credits: 3 (Prerequisite 9 hours of COJO)
- COJO4310 - Public Relations Techniques Credits: 3 (Prerequisite COJO 3310)

Marketing Emphasis

(to be taken by non-College of Business majors):

Choose Three Courses from the Following: 9 Hours

- MKT4240 - Consumer Behavior Credits: 3 (Required in this emphasis)
- MKT4230 - Integrated Marketing Communication Credits: 3
- MKT4520 - Marketing Research and Analysis Credits: 3
- MKT4540 - International Marketing Credits: 3
- MKT4590 - Sustainable Business Practices Credits: 3
- MKT4910 - Selected Topics in Marketing Credits: 3
- SELL3310 - Professional and Technical Selling Credits: 3

Total: 21 Hours

Mathematics Minor

The minor in mathematics focuses on fundamental aspects of mathematics that are essential for further study in mathematics and are also useful in a variety of other disciplines. Students minoring in mathematics may customize the minor by choosing the appropriate transition course and upper-division electives to match their needs.

Lower Division Core Courses

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3

- MATH2250 - Elementary Linear Algebra Credits: 3 **AND**
- MATH2800 - Mathematics Major Seminar Credits: 2

Upper Division

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the minor.

At the upper division, all mathematics minors must take ONE of

- MATH3205 - Analysis I: Elementary Real Analysis Credits: 3
OR
- MATH3500 - Algebra I: Introduction to Rings and Proofs Credits: 3
OR
- MATH3340 - Introduction to Scientific Computing Credits: 3
- as well as 6 additional credits of upper division math courses (3000 and above)

Metalsmithing Minor

Required Courses: 15 Hours

- ART1110 - Foundation: Two Dimensional Credits: 3
- ART1130 - Foundation: Color Theory Credits: 3
OR
- ART1005 - Drawing I Credits: 3
- ART1120 - Foundation: Three Dimensional Credits: 3
- ART2350 - Metalsmithing I Credits: 3
- ART3350 - Metalsmithing II Credits: 3

Studio Elective Courses in Metalsmithing: 6 Hours

- ART4355 - Metalsmithing III Credits: 3
required
- ART4360 - Metalsmithing: Special Topics Credits: 3
required

Art History Survey Elective: 3 Hours

Choose one from:

- ART2010 - Art History I Credits: 3
OR
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Museum Studies Minor

Museum Studies Core: 9 Hours

- ART2700 - Introduction to Museology Credits: 3

Choose One of the Following

- ENGL4075 - Writing for Non-Profits Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- FCSC4117 - Understanding Community Leadership Credits: 3

Internship

- ART4400 - Internship Credits: 1-3
 - ANTH4970 - Internship Credits: 1-12
 - HIST4400 - Internship Credits: 1-12
- OR**
- Corresponding number in student's major department

Methods Core: 6 Hours

To be chosen from the following:

- AMST2400 - Introduction to Historic Preservation Credits: 3
- AMST4300 - American Culture and the Public Sector Credits: 3
- AMST4900 - Field Studies in Historic Preservation Credits: 1-4
- ANTH3300 - Ethnographic Methods in Anthropology Credits: 3
- ANTH3310 - Introduction to Anthropology Research Methods Credits: 3
- ANTH4020 - Seminar Credits: 3-6
- ANTH4190 - Public Archaeology Credits: 3
- ART4790 - Art Seminar Credits: 1-3
- ENTO4684 - Classification of Insects Credits: 4
- GEOL2080 - General Field Geology Credits: 3
- GEOL4717 - Field Course in Geology Credits: 1-8
- GEOL4113 - Geological Remote Sensing Credits: 4
- HIST2050 - Introduction to Public History Credits: 3
- HIST3020 - Historical Methods Credits: 3
- HIST4030 - Senior Capstone Seminar Credits: 3
- HIST 4050
- HIST4055 - Archival Research Methods Credits: 3

Elective Courses: 6 Hours

Students will choose course from the elective list in conjunction with their advisor, based on their area(s) of interest. Additional courses listed in the museum studies and methods cores can be chosen as electives. For a list of electives, go to www.uwyo.edu/museumstudies.

Cultural Experience

Choose one of the following:

- Study Abroad/International Field School - students may enroll or participate in an approved study abroad course or program (credit hours vary),
OR
- Foreign or Indigenous Language - students may enroll in 12 hours
OR
- A foreign language. 8 of the 12 hours must be in the same language. American Sign Language does qualify.

Native American and Indigenous Studies Graduate Minor

A graduate minor in Native American and Indigenous Studies is comprised of 12 hours with at least 6 hours at the 5000 level. It is expected that each graduate minor student and his/her graduate committee, at least one member of whom will be from NAIS, will determine the specific courses to be taken. It is recommended that one of the four classes selected be a 3 credit NAIS 5000 Independent Study. This class will provide a research experience in the discipline of Native American and Indigenous studies that may support a master's thesis or doctoral dissertation. The research expectation in NAIS can be satisfied by the 3 credit hour Independent Study and/or by the thesis or doctoral dissertation.

Students graduating with a graduate minor degree in Native American and Indigenous studies will be able to: 1) Make apparent in masters'-level research the interdisciplinary connections between Native American and Indigenous studies and the primary field of graduate study; 2) Integrate American Indian studies research methods with the research methods used in the primary field of graduate study; and 3) Demonstrate in writing the ability to understand a variety of subjects from a tribal perspective.

Native American and Indigenous Studies Minor

Students graduating with an undergraduate minor degree in NAIS will be able to: 1) Explain the concept of tribal sovereignty and how tribal sovereignty is both restricted and acknowledged by the federal trust relationship and by relationships with states; 2) Understand the development of modern tribal governments and their functions and importance in contemporary society; 3) Understand and appreciate the roles of history, culture, and politics in the development of tribal world views, world views that relate to modern life and contemporary issues of concern for Native American and Indigenous peoples; 4) Identify historical, cultural, and political diversity and significance in Native oral traditions and written literatures; 5) Recognize stereotypes about Native American and Indigenous peoples and explain why these stereotypes were created and why they are sustained in modern society; and 6) Understand from the perspective of American Indian peoples, historical experiences and contemporary issues in North America.

Minor Requirements

The minor in Native American and Indigenous Studies requires 18 credit hours. Twelve credit hours must come from the following courses, three credit hours must be in either NAIS 1001 or NAIS 1350.

- NAIS1001 - Foundations in American Indian Studies Credits: 3
- NAIS1350 - American Indians in Contemporary Society Credits: 3
- NAIS2210 - North American Indians Credits: 3
- NAIS2290 - History of North American Indians Credits: 3
- NAIS2340 - Native American Culture and Literature Credits: 3
- Plus six hours of NAIS elective courses

Painting Minor

Required Courses: 12 Hours

- ART1005 - Drawing I Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3
- ART1130 - Foundation: Color Theory Credits: 3
- ART2210 - Painting I Credits: 3

Studio Elective Courses in Painting: 9 Hours

Choose from 3000/4000-level painting courses including but not limited to:

- ART3210 - Painting II Credits: 3
- ART4210 - Painting III Credits: 3
- ART4220 - Painting Topics Credits: 6
- ART3250 - Watercolor Painting I Credits: 3
- ART4250 - Watercolor Painting II Credits: 3
- ART4655 - Outdoor Studio Credits: 3

- ART3260 - Illustration I Credits: 3
- **OR**
- ART4260 - Illustration II Credits: 3

Art History Survey Elective: 3 Hours

Choose one from:

- ART2010 - Art History I Credits: 3
- **OR**
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Philosophy Minor

The minor in philosophy affords students the benefits, both personal and professional, of studying philosophy.

A student minoring in philosophy must earn a C or better in six philosophy courses, including four at the 3000-level or higher. No specific courses (other than the four courses at the 3000-level or higher) are required, allowing students to take the courses that most align with their interests.

Photography Minor

Required Courses: 15 Hours

- ART1110 - Foundation: Two Dimensional Credits: 3
- ART1130 - Foundation: Color Theory Credits: 3
- ART3510 - Printmaking I Credits: 3
- **OR**
- ART2112 - VCD I Visual Thinking Credits: 3

- ART2265 - Introduction to Photography, Black and White Credits: 3
- ART2255 - Introduction to Photography, Digital Credits: 3

Studio Elective Courses in Photography: 6 Hours

- Choose from 3000/4000-level photography courses

Art History Survey Elective: 3 Hours

Choose one from:

- ART2010 - Art History I Credits: 3
OR
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Physics Minor

Complete

- PHYS1210 - Engineering Physics I Credits: 4
OR
- PHYS1310 - College Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
OR
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3

At Least Two of the Following:

- PHYS4210 - Classical Mechanics I Credits: 3
- PHYS4310 - Quantum Mechanics Credits: 3
- PHYS4410 - Electricity and Magnetism I Credits: 3
- PHYS4510 - Thermodynamics and Statistical Mechanics Credits: 3

Political Theory Minor

A minor in Political Theory offers an opportunity for interdisciplinary study.

Requirements

- POLS2460 - Introduction to Political Philosophy Credits: 3
- POLS3600 - American Political Thought Credits: 3

- POLS4810 - Seminar in Political Philosophy Credits: 3
- 9 hours from an approved list of courses in political science and other disciplines, with a minimum of 6 hours at the 3000-level or above.

Approved Political Theory Minor Courses

- POLS2330 - Environmental Ethics Credits: 3
- POLS2490 - Topics In: Credits: 1-3 (dept. approval required) (Max. 6)
- POLS3050 - Athenian Democracy Credits: 3
- POLS3610 - Classics in Environmental Thought Credits: 3
- POLS3620 - Environmental Justice Credits: 3
- POLS4090 - Anglo-American Jurisprudence Credits: 3
- POLS4160 - Legal Philosophy Credits: 3
- POLS4640 - Political Philosophy: Ancient and Medieval Credits: 3
- POLS4650 - Political Philosophy: Modern Credits: 3
- POLS4660 - Political Philosophy: Contemporary Credits: 3
- POLS4710 - Topics in Credits: 1-3 (dept. approval required) (Max. 6)
- POLS2200 - Politics of Europe and the European Union Credits: 3 (Max. 6)
- SOC 3900 - Social Theory

Printmaking Minor

Required Courses: 12 Hours

- ART1005 - Drawing I Credits: 3
- ART1110 - Foundation: Two Dimensional Credits: 3
- **OR**
- ART1130 - Foundation: Color Theory Credits: 3
- An upper division drawing course beyond ART 1005
- ART3510 - Printmaking I Credits: 3

Studio Elective Courses in Printmaking: 9 Hours

- Choose from 3000/4000-level printmaking courses Credits: 9

Art History Survey Elective: 3 Hours

Choose one from:

- ART2010 - Art History I Credits: 3
- **OR**
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Professional Writing Minor

To minor in professional writing, a student must complete the following 18-credit sequence of courses:

Requirements

Foundations Course: 3 Hours

- ENGL2035 - Writing for Public Forums Credits: 3
OR
- ENGL2005 - Writing in Technology and the Sciences Credits: 3 (COM2)

Program Electives: 6 Hours

Take any 2 of the following courses:

- ENGL4010 - Technical Writing in the Professions Credits: 3 (COM3)
- ENGL4020 - Editing for Publication Credits: 3
- ENGL 4025 - Writing for the Web (COM3)
- ENGL 4050 - Writer's Workshop in:
- ENGL4075 - Writing for Non-Profits Credits: 3 (COM3)
- ENGL4970 - Writing Internship Credits: 3

Other Electives: 6 Hours

Courses from any discipline that relates to professional writing; consult with a Professional Writing Minor advisor.

Professional Writing Minor Capstone: 3 Hours

- ENGL 4000

Psychology Minor

A minor in psychology requires 18 semester hours in psychology. These must include PSYC 1000 or equivalent and 9 hours at the 3000- level or above. A grade of C or better is required in all minor courses.

Students seeking a minor must have 12 hours exclusive to the minor and not used in the major.

Psychology, Minor in Aging Studies

Academic Standards:

At least 12 credit hours in a minor must be from courses that are not being counted toward the student's major. No grade below a C is acceptable for courses applied to the minor.

Background Check:

Students seeking the minor in Aging Studies will be required to obtain a background check. Please contact us for specific information.

Core Courses

- FCSC2110 - Fundamentals of Aging and Human Development Credits: 3
- PSYC3400 - Community Resources for Older Adults Credits: 3
- PSYC4970 - Aging Minor Internship Credits: 1-6

Electives

(9 credits hours - 6 credits must be outside student major)

An interdisciplinary program, current approved courses are offered through the College of Agriculture, College of Arts and Sciences, and College of Health Sciences.

Public Law Minor

A minor in Public Law offers an opportunity for interdisciplinary study.

Requirements

- POLS4100 - Constitutional Law: Institutional Powers Credits: 3
- POLS4110 - Constitutional Law: Civil Liberties and Rights Credits: 3
- POLS4840 - Seminar in Public Law Credits: 3
- 9 hours from an approved list of courses in political science and other disciplines, with a minimum of 3 hours at the 3000-level or above.

Approved Public Law Minor Courses

- POLS2490 - Topics In: Credits: 1-3 (dept. approval required) (Max. 6)
- POLS3100 - Politics and the Judicial Process Credits: 3
- POLS4090 - Anglo-American Jurisprudence Credits: 3
- POLS4160 - Legal Philosophy Credits: 3
- POLS4710 - Topics in Credits: 1-3 (dept. approval required) (Max. 6)
- AGE3400 - Agricultural Law Credits: 3
- COJO4500 - Mass Communication Law Credits: 3
- CRMJ2210 - Criminal Law Credits: 3
- CRMJ3110 - Criminal Courts and Processes Credits: 3
- CRMJ4140 - Criminal Legal Procedure Credits: 3

- CRMJ4350 - Sociology of Law Credits: 3
- OR**
- SOC4350 - Sociology of Law Credits: 3
- CRMJ4540 - Gender and Crime Credits: 3
- OR**
- GWST4540 - Gender and Crime Credits: 3

- CRMJ4730 - Psychology and Law Credits: 3
- OR**
- PSYC4730 - Psychology and Law Credits: 3
- HIST4515 - American Legal History Credits: 3
- MGT1040 - Legal Environment of Business Credits: 3

Public Relations Minor

Required: 12 Hours

- COMM1000 - Intro to Mass Media Credits: 3
- COMM2100 - Media Writing Credits: 3
- COJO3310 - Public Relations Credits: 3
- COJO4310 - Public Relations Techniques Credits: 3

Three of the Following: 9 Hours

- COMM2400 - Introduction to Photography Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- COJO3300 - Advertising in the Media Credits: 3
- COJO3480 - Internship Credits: 1-12 (limited to 3 credits)
- COJO3530 - Multimedia Production Credits: 3
- COJO4040 - Digital Video Production Credits: 3
- COJO4200 - Visual Communication Credits: 3
- COJO4230 - Special Topics in Mass Media Credits: 1-3 (no more than one)
- COJO4250 - Advanced Organizational Communication Credits: 3
- COJO4530 - Web Design Credits: 3

Total: 21 Hours

Queer Studies Graduate Minor

A graduate minor in Queer Studies requires the completion of 12 hours, including AMST5430 - Queer Theory/ GWST5430 - Queer Theory, a minimum of 6 hours at the 5000+ level, and a capstone experience or independent study. For committee-based degree programs with QS content it is expected that the student will include one committee member from QS.

Queer Studies Minor

The Queer Studies minor requires the completion of 18 hours of classes, including GWST2000 - Introduction to LGBTQ/NS Studies and nine or more credits at the 3000-level or above. Each semester, students, in consultation with a queer studies advisor, will choose elective courses. A capstone project or internship is required but can be variable and determined in consultation with an advisor.

An interdisciplinary, independent Queer Studies advisory committee advises the program on curriculum, scheduling and coordination. A faculty advisor is assigned to the student on declaration of the minor.

The advisory board for the minor includes:

Rachel Watson, Director Queer Studies, Chemistry

Ulrich Adelt, American Studies, African American & Diaspora Studies

Ruth Olga Bjorkenwall, Politics, Public Affairs & International Studies

Christine Boggs, Ellbogen Center for Teaching & Learning

Catherine R. Connolly, Gender & Women's Studies

Danielle Renee Cover, Law

Michelle Jarman, Disability Studies (WIND)

Barbara Ellen Logan, History

Jamie Snyder, Criminal Justice & Sociology

Lilia Soto, American Studies, Latino/a Studies

Jennifer Tabler, Criminal Justice & Sociology

Religious Studies Minor

The Minor in Religious Studies requires eighteen hours of relevant courses, all with a grade of "C" or higher. These should consist of courses as set out below:

Relevant Courses: 18 Hours

- RELI1000 - Introduction to Religion Credits: 3
- RELI4000 - Theories of Religion Credits: 3 (a capstone course)
- Twelve hours of courses focusing on issues in the study of religions, nine of which should be at the 3000 level or higher. See note 2.

Sculpture Minor

Required Courses: 12 Hours

- ART1005 - Drawing I Credits: 3
- ART1120 - Foundation: Three Dimensional Credits: 3
- ART1130 - Foundation: Color Theory Credits: 3
- ART2310 - Sculptural Practices I Credits: 3

Studio Elective Courses in Sculpture: 9 Hours

Choose from the following:

- ART3310 - Sculptural Practices: Cast Form I Credits: 3

0245

- ART3320 - Sculptural Practices: Mixed Media I Credits: 3
- ART3330 - Sculptural Practices: Assembled Form I Credits: 3
- ART3345 - Sculptural Practices: Special Topics Credits: 3

Art History Survey Elective: 3 Hours

Choose one from:

- ART2010 - Art History I Credits: 3
OR
- ART2020 - Art History II Credits: 3

Total Credits: 24 Hours

Sociology Minor

The sociology minor requires a total of 18 sociology credits including SOC 1000. At least 9 of these 18 hours must be upper-division sociology credits.

Only grades of C or better can be counted toward the minor. Also, students seeking a minor must have 12 credit hours exclusive to the minor and not counted toward their major.

Spanish Minor

Electives

- 18 hours of electives in Spanish at the 2000-level or above (excluding SPAN 2030).

Total: 18 Hours

Statistics Minor

Only grades of C or better will be accepted for the minor.

Requirements

The following courses are required for a statistics minor:

- MATH1400 - College Algebra Credits: 3
- STAT 2010 - Credits: 3-4
OR
- STAT2050 - Fundamentals of Statistics Credits: 4
OR
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
OR
- STAT4220 - Basic Engineering Statistics Credits: 3

- STAT3050 - Statistical Methods Credits: 3

9 Additional Hours from the Following:

- STAT4015 - Regression Analysis Credits: 3
- STAT4025 - Design and Analysis of Experiments I Credits: 3
- STAT4045 - Categorical Data Analysis Credits: 3
- STAT4070 - Causal Models Credits: 3
- STAT4115 - Time Series Analysis and Forecasting Credits: 3
- STAT4155 - Fundamentals of Sampling Credits: 3
- STAT4255 - Mathematical Theory of Probability Credits: 3
- STAT4265 - Introduction to the Theory of Statistics Credits: 3
- STAT4350 - Survey Construction and Analysis Credits: 3
- STAT4360 - Spatial Statistics Credits: 3
- STAT4370 - Survival Analysis Credits: 3
- STAT4300 - Applied Multivariate Analysis Credits: 3
- STAT4270 - Applied Bayesian Statistics Credits: 3

Total: 18-19 Hours

Theatre Minor

Required Courses

*THEA 2150 is a prerequisite for THEA 3810

- THEA1040 - Production Crew I Credits: 0.5
- THEA1100 - Beginning Acting Credits: 3
- THEA1200 - Introduction to Design Credits: 3
- THEA2010 - Theatrical Backgrounds Drama I Credits: 3
- THEA2020 - Theatrical Backgrounds Drama II Credits: 3
- THEA2040 - Production Crew II Credits: 0.5
- THEA2220 - Stagecraft Credits: 3
- THEA2800 - Stage Lighting I Credits: 3
- OR
- THEA3810 - Scene Design I Credits: 3 *
- OR
- THEA3820 - Stage Costuming I Credits: 3
- Plus 3 hours of electives in Theatre and Dance (must be 4000 level or above)

Wildlife Fisheries Biology Management Minor

Requirements for the minor in wildlife fisheries biology management (WFBM) include a total of 18-22 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Courses

9 or 11 credit hours required from the following:

- LIFE3400 - General Ecology Credits: 3
- ZOO2450 - Fish and Wildlife Management in the Anthropocene Credits: 4

One (1) Course From:

- ZOO4300 - Wildlife Ecology and Management Credits: 5
- OR**
- ZOO4310 - Fisheries Management Credits: 3

Elective Courses

Select three (3) of the following courses, one of which must have a laboratory component:

- LIFE3050 - Genetics Credits: 4
- ZOO3600 - Principles of Animal Behavior Credits: 3
- ZOO4190 - Comparative Environmental Physiology Credits: 4
- ZOO4330 - Ichthyology Credits: 3
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4400 - Population Ecology Credits: 3
- ZOO4415 - Behavioral Ecology Credits: 3
- ZOO4420 - Conservation Biology Credits: 3
- ZOO4440 - Limnology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4

Zoology Minor

Requirements for the minor in zoology (ZOOL) include 17-20 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Course

- LIFE3050 - Genetics Credits: 4

Elective Courses

Select four (4) of the following courses, one of which must have a laboratory component:

- LIFE3400 - General Ecology Credits: 3
- LIFE3500 - Evolutionary Biology Credits: 3
- ZOO3115 - Human Systems Physiology Credits: 4
- ZOO3600 - Principles of Animal Behavior Credits: 3
- ZOO4190 - Comparative Environmental Physiology Credits: 4

- ZOO4235 - Marine Biology Credits: 3
- ZOO4330 - Ichthyology Credits: 3
- ZOO4340 - Developmental Biology and Embryology Credits: 4
- ZOO4350 - Ornithology Credits: 3
- ZOO4370 - Mammalogy Credits: 3
- ZOO4380 - Herpetology Credits: 3
- ZOO4540 - Invertebrate Zoology Credits: 4
- BOT4235 - Marine Biology Credits: 3

Graduate

American Studies, M.A.

Graduate Study

The American Studies M.A. is an interdisciplinary professional development degree in a committed learning community that builds on students' research interests, accomplishments, experiences, and career goals working with American cultural contexts past and present. After the M.A., our alums seek further professional specialization in law, education, writing, library and information science, and other fields; pursue Ph.D.'s in academic careers in American Studies and other scholarly areas including ethnic studies, cultural geography, literature, religious studies, anthropology, history, ethnomusicology, among others; and work professionally in public settings, including historic preservation organizations, historic sites, museums, collections, and other non-profit, community or governmental organizations.

The M.A. is a 2-year program for students enrolled full-time, culminating in a major research project, either a "Plan A" thesis, or a "Plan B" non-thesis portfolio of work. We work frequently with part-time M.A. students to accommodate other demands on students' time. We encourage the development of emergent, innovative formats and project types as valuable contributions to contemporary American studies practice, relevant to a student's professional development plans.

Because American Studies is an international field with scholars all over the world, and the U.S. has significant impacts transnationally, M.A. Students from outside the U.S. are a regular part of our M.A. cohort, and we encourage our M.A. students to consider semester exchanges abroad. The Program also supports American Studies M.A. student and faculty participation in the annual biennial international conferences.

All M.A. students complete at least 15 credit hours in American Studies courses: 2 required theory and methods courses in the Program (AMST 5500 and AMST 5510), and 3 graduate seminars in American Studies. The remainder of coursework - 12 credits for those completing a thesis, or 15 credits for those completing non-thesis portfolios - can be drawn from graduate-level coursework in any area of study. Most of our M.A. students complete 1-3 credit internships as part of their coursework, in public or organizational sites in Laramie, elsewhere in Wyoming or the U.S., and occasionally abroad as well. M.A. students' paths through their programs of study are as varied as our students.

Program Learning Outcomes

Students graduating with an M.A. in American Studies integrate their educational backgrounds, research and professional interests, and coursework at the M.A. level inside and outside American Studies, in individual programs of study, to professionally engage American cultural production and communities in preparation for professional work or advanced graduate study. Students earning the M.A. in American Studies, either completing a thesis or pursuing the non-thesis Plan B project, are prepared to:

- Interpret a variety of objects significant to the study of American cultures, including words, narratives, images, material objects, communities, built environments, identities, cross-cultural and/or international perspectives, continuities and discontinuities with the past in a range of cultural settings.
- Demonstrate professional competence in writing and speaking in error-free expository prose, authoritative oral presentation, insightful use of relevant source material reflecting critical reading skill, prose style commensurate with professional responsibility, and prose content commensurate with professional responsibility.
- Produce professional research for a well-defined community (scholarly, public, or an appropriate combination), by identifying and using primary sources, building approaches from a relevant matrix of secondary sources, and understanding scholarly traditions within the field of American Studies that supports, expands, and connects research to professional goals.
- Make effective plans for advanced graduate study or professional employment by developing competencies listed above, including the opportunity to complete appropriate internship or field course work in an area of the student's professional plans.

Program Specific Admission Requirements

Those interested in graduate study are encouraged to contact the American Studies Program (307-766-3898 or amst@uwyo.edu) for more information.

Applicants to the M.A. program do not have to have prior majors in American Studies. The American Studies program does not require the GRE in applications to our M.A. program.

The application deadline for fall enrollment is March 1. A minimum of a 3.0 undergraduate cumulative GPA is required for admission. In addition to an application, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>):

1. Statement of Purpose
2. A significant writing sample (usually a seminar paper or, for those coming from technical fields, a major report) that demonstrates potential for graduate study
3. Three letters of recommendation that assess the student's academic and research abilities
3. Transcripts from all undergraduate institutions and graduate programs

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Financial Aid

The American Studies M.A. is generously supported by endowment funds that allow us to award significant financial aid to M.A. students enrolled full time, through teaching, research, or community organization assistantship placements, as well as scholarship support as appropriate for students' own M.A. research.

Program Specific Degree Requirements

Graduate student must successfully complete 30 hours (for Plan B non-thesis) or 31 hours (for Plan A thesis) of graduate credit including the following:

Required Courses

(3 credit hours) AMST 5500 with a grade of B or better

(3 credit hours) AMST 5510 with a grade of B or better

(9 credit hours) graduate (5000) level AMST courses

Additional Requirements

Plan A thesis:

(12 credit hours) of graduate (5000) level courses in any field

(4 credit hours) of AMST5960 - Thesis Research

Completion of a Master's Thesis

OR

Plan B non-thesis:

(15 credit hours) of graduate (5000) level courses in any field

Completion of a non-thesis project

Completion of exam

Anthropology, M.A.

See university minimum requirements.

Plan A (Thesis)

Any M.A. student receiving a grade of C or less in two core classes will be expelled from the program.

If not completed prior to admission; three semesters of a single foreign language and one statistics course must be completed.

Core-Course Sequence

Completion, with a grade of "B" or better of a four core-course sequence. This sequence will consist of

- ANTH5010 - 20th Century Anthropology Theory Credits: 3
- ANTH5015 - Archaeological Theory and Method Credits: 3

- ANTH5020 - Biological Anthropology Credits: 3
- ANTH5030 - Linguistic Anthropology Credits: 3

First semester (Fall):

Students will submit form to the graduate advisor and department head identifying their thesis advisor BEFORE the graduate assistant allocation meeting (mid-late November).

Second semester (Spring):

Students will work with their advisor to select their committee, which must be formed and on-file in the department office by the end of the semester. During the core classes' final exam periods, students give a presentation to departmental faculty which outlines the general ideas for their proposed thesis.

Second semester research presentations are assessed by all department faculty in attendance at the presentation and evaluations will be given to the student's advisors. It is expected that students will work closely with their advisors to rectify any problems before they complete their thesis prospectus in the third semester.

Third semester (Fall):

Working closely with their advisor and committee, students complete a detailed prospectus and gain approval from thesis committee for MA thesis topic.

Fourth semester (Spring):

Thesis is completed and is approved by thesis committee.

Plan B (Non-Thesis)

All requirements for a Plan A except thesis, if not completed prior to admission; three semesters of a single foreign language and one statistics course must be completed.

Anthropology, Ph.D.

See university minimum requirements.

After completion of an M.A. program in anthropology.

Program Requirements

Student maintains a portfolio which documents teaching, internship, and research experience.

Students are encouraged to present papers at professional conferences and submit articles for publication throughout their tenure as a student. After admission to candidacy, the student is expected to research, write, and defend a dissertation based on original research (up to 48 credit hours). Students may either submit a single dissertation or a series of integrated publishable articles (30-40 pages each). The student's committee must approve this choice and decide on the number, length and content of the articles at the same time, usually at the committee hearing prior to the preliminary exams. For the final submission of the dissertation, the student must also complete an introduction and conclusion to contextualize and synthesize the integrated articles.

A Minimum of Six Content Courses: 18 Hours

A minimum of six content courses (18 hours) chosen by the student in conjunction with the student's committee. These courses are normally completed in the first two years of the Ph.D. program. In addition to anthropology courses, the other 4000/5000-level courses outside of the department may be required by the committee or chosen by the student in consultation with their committee.

First or Second Year:

Two additional courses in their first or second year

- ANTH5880 - Professionalism Credits: 3
- ANTH5890 - Teaching Anthropology Credits: 3 (two-semester sequence)

Teaching Experience

Teaching experience, including standalone courses, after completion of the first semester of ANTH5890 - Teaching Anthropology, as well as teaching assistance to UW faculty members.

Internship Experience Credits: 6-24 Hours

Participation in an approved internship experience (6-24 credit hours). Students pursue internships in state and federal agencies, museums, contract archaeology organizations, and other organizations that offer potential career experience.

Dissertation Proposal

Committee meeting and successful completion of a dissertation proposal.

Preliminary Exams

Preliminary exams take place after the completion of 18 hours of content courses. ANTH 5880, and Teaching and Learning in Anthropology (ANTH 5890, or other as designated), normally before the end of the second year. If a student does not receive a passing grade on the preliminary exam, it can be repeated once. Failure to pass the preliminary examination the second time results in termination from the anthropology program.

Highly Recommended

International experience is highly recommended but not required, e.g. pre-dissertation summer fieldwork.

Applied Statistics, M.S.

Profile

The Master's Program in Applied Statistics will give the student an extensive and broad background in statistical methods, data analysis, and written and oral presentation skills. This degree is a terminal experience in graduate statistical education and should

not be viewed as preparatory for entrance into a Ph.D. program in statistics. Graduates will have the necessary background to work as data management specialists, statistical analysts, and as project managers within a wide range of research organizations.

Plan B (Option 1)

Coursework

In addition to the general requirements of the university all candidates for the MS (Plan B - Option 1) degree must successfully take and complete:

Required: 15 Credit Hours

- STAT5210 - Advanced Regression Credits: 3
- STAT5220 - Advanced Design Credits: 3
- STAT5470 - Data Analysis Credits: 3
- STAT5380 - Bayesian Data Analysis Credits: 3
- STAT 53XX - Computational Methods

Electives

a minimum of 15 credit hours in other acceptable graduate courses. Acceptable courses include statistics courses numbered 5000 or higher, excepting

- STAT 5000
- STAT5050 - Statistical Methods for the Biological Science Credits: 3
- STAT 5060
- STAT5070 - Statistical Methods for the Social Sciences Credits: 3
- STAT5080 - Statistical Methods for the Agricultural and Natural Resource Sciences Credits: 3
- STAT5185 - Analysis of Data Credits: 3

No More Than 6 Credits Can Come From

- STAT5255 - Mathematical Theory of Probability Credits: 3
- STAT5265 - Introduction to the Theory of Statistics Credits: 3
- STAT5155 - Fundamentals of Sampling Credits: 3
- STAT5025 - Design and Analysis of Experiments I Credits: 3

Total Credits: 30 Hours

Graduation Requirements: (1) successful completion of coursework and (2) a data analysis project (Plan B paper).

Botany, M.S.

Requirements for this degree are 26 semester hours of courses approved by the student's committee plus four hours of BOT5960 - Thesis Research.

Botany, Ph.D.

In addition to the minimum requirements set forth in this Catalog, the Department of Botany may require that a student demonstrate skills in two peripheral areas. This decision is made for individual cases by the major professor and graduate committee. These could include foreign languages, statistics, or computer science. In some cases, additional skills may be required.

Chemistry, M.S.

Plan A (Thesis)

In addition to fulfilling the minimum university requirements, a student must take one 3 hour course in each of three of the four areas (inorganic, analytical, organic, and physical), excluding special topics and research courses. These courses must be graduate courses, 5000 and above.

One departmental seminar is required to be presented on the thesis research.

Take 9 Credits

A student may also take 9 credits of any combination of

- CHEM5190 - Research in Inorganic Chemistry Credits: 1-3
- CHEM5290 - Research in Analytical Chemistry Credits: 1-3
- CHEM5390 - Research in Organic Chemistry Credits: 1-3
- CHEM5590 - Research in Physical Chemistry Credits: 1-3
- CHEM5790 - Research in Biological Chemistry Credits: 1-3

Chemistry, Ph.D.

In addition to fulfilling the minimum university requirements, a student must take one 3 hour graduate course (5000 and above) in each of the four areas (inorganic, analytical, organic, and physical), excluding special topics, tool courses CHEM 5130, CHEM 5320, CHEM 5760, and research courses.

Students must obtain satisfactory performance on a series of written major field cumulative examinations, including special topics.

Students must obtain satisfactory performance on a preliminary examination, part written and part oral.

Students must present a seminar based on the dissertation research. Students must also obtain two additional credits of CHEM 5000 by presenting a divisional or departmental seminar or an oral presentation at a regional or national research meeting.

Students May Also Take

A student may also take 12 credits of any combination of

- CHEM5190 - Research in Inorganic Chemistry Credits: 1-3
- CHEM5290 - Research in Analytical Chemistry Credits: 1-3
- CHEM5390 - Research in Organic Chemistry Credits: 1-3

- CHEM5590 - Research in Physical Chemistry Credits: 1-3
- CHEM5790 - Research in Biological Chemistry Credits: 1-3

Area Selected as a Major

In the area selected as a major, the student will take the following as a minimum:

Analytical

- CHEM5250 - Advanced Chemical Instrumentation Credits: 3
- plus 9 hours of graduate level analytical courses

Inorganic

- 12 hours of graduate level inorganic courses

Organic

- CHEM5320 - Spectroscopic Methods of Structure Determination Credits: 3
- CHEM5330 - Advanced Organic Chemistry Credits: 3
- CHEM5340 - Synthetic Methods in Organic Chemistry Credits: 3
- CHEM 5350

Physical

- any three graduate level physical chemistry courses

Communication, M.A.

Administered by the Director of Graduate Studies, the programs are structured to facilitate completion of requirements for the M.A. degree in two years. Deficiency makeups may be required.

Research Thesis: 31 Hours

31 hour program.

Students must complete an accepted research thesis approved by the student's thesis committee.

Students must complete a minimum of 27 credit hours and 4 hours of thesis credit. A minimum of 24 hours must be within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 3 hours of 4000-level coursework.

Students Must Complete

- COJO5070 - Quantitative Research Methods Credits: 3
- COJO5080 - Qualitative Research Methods Credits: 3

- COJO5800 - Foundations of Communication and Journalism Credits: 3

One of the Following Theory Courses:

- COJO5061 - Rhetorical Theory and Criticism Credits: 3
- COJO5310 - Seminar in Mass Communications Credits: 3
- COJO5540 - Seminar in Communication Theory Credits: 3

Professional Project: 33 Hours

33 hour program.

Students must complete an accepted professional project (e.g., documentary film, public relations and marketing plan, website) approved by the student's graduate committee. Students who chose the project option will be required to take 30 credit hours plus 3 hours of Graduate Project credits (for a total of 33 credit hours). A minimum of 27 hours must be taken within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 6 hours of 4000-level coursework.

Students Must Complete

- COJO5070 - Quantitative Research Methods Credits: 3
- COJO5080 - Qualitative Research Methods Credits: 3
- COJO5800 - Foundations of Communication and Journalism Credits: 3

One of the Following Theory Courses:

- COJO5061 - Rhetorical Theory and Criticism Credits: 3
- COJO5310 - Seminar in Mass Communications Credits: 3
- COJO5540 - Seminar in Communication Theory Credits: 3

Creative Writing, M.F.A.

M.F.A. students follow the guidelines for a Plan A thesis. Only those courses in which a grade of B or better has been earned may be applied to the graduate program of study. All courses must be taken for a grade unless offered for S/U only. No graduate credit is allowed for grades S and U.

The cumulative GPA must be at least 3.000 to receive a degree. Courses below 4000-level will not count toward the degree nor will they be figured in the GPA, although they will appear on the transcript.

A minimum of four Workshops (CW 5560) and/or Creative Writing Seminars (CW 5540) must be taken. These may be in any combination to reach the four-course total, typically for a total of 12-16 credit hours. We require a cross-genre component in that mix of courses.

Requirements

- Elective courses (typically taken for a total of 18 credit hours)
- ENGL5900 - Practicum in College Teaching Credits: 1-3 taken in semesters teaching 1010, 1 credit per semester
- ENGL5010 - Rhetoric and Composition: History, Theory, Practice Credits: 1-4 taken in the first semester teaching 1010, 3-4 credits (can be waived if a student has taken a comparable graduatelevel course in a prior program)

- Other electives: free to be taken in any UW program or department across campus
- Thesis Hours (5960): 4 credit hours

Total Credits: 36 Hours (Minimum)

Total credit hours must be a minimum of 36.

Criminal Justice Concentration within the M.P.A.

Plan B (Non-Thesis)

A criminal justice concentration within the master of public administration program is offered by the Criminal Justice program. Students wishing to enroll in the M.P.A. with criminal justice concentration must first be admitted into the M.P.A program. See M.P.A. program admissions requirements for specific details.

The M.P.A. with criminal justice concentration curriculum consists of 39 credits including: core (7), option-core (2) and criminal justice (4) courses. Students may complete the degree within two years full-time or approximately three-four years part-time. Courses are offered through distance education, which allows students to complete their degree in their community while working full-time.

Required Core Courses

- POLS5000 - Survey of Public Administration Credits: 3
- POLS5400 - Public Personnel Management Credits: 3
- POLS5410 - Administrative Behavior and Theory of Organization Credits: 3
- POLS5440 - Principles and Processes of Government Budgeting Credits: 3
- POLS5510 - Public Policy and Program Management Credits: 3
- POLS5684 - Empirical Analysis for Public Administration Credits: 3
- POLS5690 - Capstone in Public Management Credits: 3

Option-Core Courses

All MPA students are required to choose two courses designated as option core credit, defined as courses relating to more specific focuses on public administration and taught by MPA faculty members.

Criminal Justice Concentration Courses

Required Criminal Justice Concentration Courses

- CRMJ5000 - Survey of Criminal Justice Credits: 3
- CRMJ5100 - Public Policy and Crime Credits: 3

Elective Criminal Justice Concentration Courses

*Students with little or no administration and/or criminal justice professional experience must enroll in CRMJ 5500 as one of their electives.

(students must select two of the following courses)

- CRMJ5151 - Crime Causation Credits: 3
- CRMJ5280 - Comparative Criminal Justice Credits: 3
- CRMJ5500 - Internship in Criminal Justice Credits: 3 *
- CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law Credits: 3

Additional Requirements

In addition to graduate coursework, M.P.A. students must complete a series of papers constituting the Plan B project. It is the purpose of POLS5690 - Capstone in Public Management to be a framework within which students initiate and substantially complete their Plan B projects.

Following the completion of all other requirements, the M.P.A. student is required to pass a comprehensive oral examination covering the information contained within his/her program of study as well as a defense of the Plan B projects. The oral examination is also conducted within the framework of the POLS 5690 Capstone course.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/ electronic class discussion.

Students must maintain a graduate GPA of 3.000.

Students must complete the CAPP program in lieu of a program of study.

English, M.A.

The Department of English offers three concentrations within the master of arts degree. A concentration consists of three courses chosen from among those designated by the department as belonging to that concentration, together with other courses to total 26 hours. The concentration insures coherence in each student's graduate program; breadth is insured by a distribution of courses. Much of each student's program is taken in courses outside the concentration. Seminars will usually include students from all concentrations.

Plan A (Thesis)

Literary Studies. Working from a variety of perspectives, this concentration focuses on the study of literature and of other culturally significant texts and materials, including, for example, film, oral materials, and political documents.

Rhetoric, Composition, and Writing Studies. This concentration emphasizes scholarship on the production of discourse, broadly conceived, and may include a focus on classical, contemporary, or cultural rhetoric; post-secondary writing pedagogy and program administration; community and adult literacy; or other subjects related to the field of writing studies.

Public Humanities. Designed for students who wish to pursue professions that may span beyond traditional academic work, this concentration prepares graduates for careers in civic, nonprofit, and community-based cultural organizations that engage the humanities, contribute to social reform, and promote the public good.

26 hours of coursework and a thesis for 4 additional hours (ENGL 5960 and ENGL 5965).

A reading exam and oral thesis defense. Students may write a traditional thesis, or they may assemble a public-facing thesis portfolio. See program website for more details about thesis options.

With approval of the graduate adviser, a student may take a maximum of three hours credit outside the department.

All coursework must be at the 5000-level.

For information on the Plan B, consult with the program director.

Geology, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

Geology, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

All graduate students in Geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geology/Water Resources, M.S.

The purpose of this program is to formalize and broaden strong department offerings at the master of science level in ground water geology, natural waters geochemistry, mathematical hydrology, and fluvial geomorphology.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

- GEOL5444 - Geohydrology Credits: 3
- GEOL5777 - Geochemistry of Natural Waters Credits: 3

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR
- GEOL5050 - Introduction to Isotope Geology Credits: 3
OR
- GEOL4880 - Earth Surface Processes Credits: 3

Technical/Water Quality Course

- GEOL5444 - Geohydrology Credits: 3 can be used to satisfy the 3 hour technical course requirement
OR

- GEOL5777 - Geochemistry of Natural Waters Credits: 3 can be used to satisfy the 3 hour water quality course requirement.

Geophysics, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

M.S. candidates in geophysics must complete 6 hours of mathematics and three hours of physics or engineering courses at the graduate level.

M.S. candidates must take at least 12 hours of 4000- and 5000-level courses in geophysics. Recommended graduate level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

Geophysics, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

Ph.D. candidates in geophysics must complete at least 6 additional hours of graduate level coursework: 3 in mathematics and 3 in physics or engineering. Recommended graduate-level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering, they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Ph.D. candidates are required to take at least 12 hours of 5000-level geophysics courses exclusive of GEOL 5854. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geophysics/Water Resources, M.S.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

- GEOL5444 - Geohydrology Credits: 3
- GEOL5777 - Geochemistry of Natural Waters Credits: 3

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR
- GEOL4880 - Earth Surface Processes Credits: 3
OR
- GEOL5050 - Introduction to Isotope Geology Credits: 3

Technical/Water Quality Course

- GEOL5444 - Geohydrology Credits: 3 can be used to satisfy the 3 hour technical course requirement
OR
- GEOL5777 - Geochemistry of Natural Waters Credits: 3 can be used to satisfy the 3 hour water quality course requirement.

History, M.A.

Graduate Study

The History Department offers a Master of Arts (MA) degree.

Program Specific Admission Requirements

General Regulations

The M.A. in History requires 18 hours of undergraduate history courses as minimum preparation for admission. The rules under which the student enters remain those governing the program for the duration of the student's continued enrollment. In accordance with university graduate regulations, students are responsible for meeting all deadlines and for fulfilling all requirements for the degree.

Application and Admissions

To be eligible for financial support in the form of a Graduate Assistantship, the Department of History must receive all materials by March 1. All other application materials must be received by the Department of History no later than May 1. The application process is now completely online. In addition to the application, applicants must upload the following documents via the UW Admissions website (www.uwyo.edu/admissions):

1. Three letters of recommendation that assess the student's academic and research abilities.
2. Transcripts from all undergraduate institutions and graduate programs.
3. A writing sample of 10-20 pages, typically either a portion of a senior thesis or an upper-level seminar paper.
4. A statement of purpose of 250-500 words, explaining the applicant's preparation, interests, and plans. Please indicate if you would like to be considered for a graduate assistantship.

Program Specific Graduate Assistantships

When applicants submit their materials to the program in History, they should indicate their wish to be considered for a Graduate Assistantship. Anyone receiving financial support must be registered as a full-time (9 hours per semester) student and must be making acceptable progress towards degree completion. Renewal of Graduate Assistantships is contingent on such progress. Support is not given for more than two academic years.

Requirements

Program Specific Degree Requirements for the History Master's Program are as follows:

Required Courses

Candidates for the Master of Arts degree are expected to complete the program in 2 years. Graduate Students are required to complete a minimum of 31 credit hours of graduate (5000) level courses. Students must complete 27 hours of coursework, of which at least 24 hours must be in History. Students will work with their advisor to plan the course of study that will include:

(3 credit hours) HIST5880 - History Theory

(12 credit hours) 5000-level, non-dual-listed courses in HIST (excluding HIST 5880)

(12 credit hours) Additional graduate-level course work, of which at least 9 credit hours must be in HIST courses.

(4 credit hours) HIST5960 - Thesis Research

Foreign Language

Students must demonstrate a reading knowledge of a foreign language appropriate to their research. In special cases, other relevant historical tools may substitute for the language requirement upon approval of the thesis adviser and the Graduate Coordinator. Generally, either of the following options may meet the language requirement:

- Passing a language exam administered by the Department of History. This must be completed by the end of the first year with the appropriate faculty.
- Completing the equivalent of the fourth semester of a language as offered at the University of Wyoming. All courses must be passed with a grade of C or better (may be taken pass/fail).

Thesis

- Graduate students will identify two "fields" of study, in consultation with their main advisor: one time/place field (such as Modern U.S. History), and one thematic field (such as Environmental History), both of which correspond to the student's thesis research.
- In the spring semester of the first year the student will publicly defend his/her thesis proposal, which must include a written research prospectus and bibliography.
- At the end of the second year the student will successfully defend the thesis before an approved Graduate Committee.

International Studies, M.A.

Students take the Plan A (thesis). Students must have a minimum of 26 hours of graded non-thesis coursework and 4 hours of thesis.

Program Specific Admission Requirements

Admission is open to all students holding a bachelor's degree in any major. Foreign students, who are non-native English speakers, must pass the Oral Proficiency Interview (OPI).

Program Specific Degree Requirements

Master's Program

Students must meet three requirements:

1. Each student must take INST 5400.
2. Each student must take INST 5200.
3. Each student must demonstrate proficiency in a foreign language, accomplished in the course of the program or from previous experience or coursework. Foreign language hours do not count toward the M.A. degree.

The program also offers a joint International Studies/Environment and Natural Resources degree. See www.uwyo.edu/sppais for specific degree requirements.

Plan A (Thesis)

Students are encouraged to construct, with the adviser's approval, a program that focuses their own intellectual interests and career plans. To promote that end, students should be prepared to file a plan of study with the graduate adviser during the second semester of coursework.

No later than the second semester in residence, each student shall select a graduate committee to oversee his or her academic work. The committee will be chaired by the student's major professor and must have at least one member from outside of The School of Politics, Public Affairs, and International Studies. Students also will prepare a thesis proposal and give a presentation of their preliminary project before the International Studies faculty and complete a thesis prospectus defense with their graduate committee by the end of their second semester.

Students must pass an oral examination at the completion of their program. Normally, examination will center on the thesis, but may also encompass coursework of the candidate.

Required Coursework

Advanced Theory Course

- INST5200 - Graduate Proseminar in International Studies Credits: 3-6

Research Methods Course

- INST5400 - International Social Science Research Methods Credits: 3

Mathematics, M.A.

The math department maintains 4 tracks by which students may obtain a Master of Arts (M.A.) or Master of Science (M.S.) degree in mathematics.

Common Requirements

The following requirements are common to all four tracks:

- The student must maintain a 3.000 cumulative GPA.

- The student must complete 30 hours of formal mathematics coursework at the 5000 level.
- The student must pass the department's Foundation Exam. This exam covers material from advanced vector calculus and linear algebra at the upper-division undergraduate level and is offered before the beginning of each semester.
- Take one hour of the seminar MATH 4970: Professional Development in Mathematics and one hour of the seminar MATH 4970: Professional Development in Teaching.

5000-level Mathematics Courses

As part of the 30 hours of formal 5000-level mathematics courses, the student must complete the following courses with a grade of B or better:

- MATH5200 - Real Variables I Credits: 3
- MATH5230 - Complex Variables I Credits: 3
- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- MATH5400 - Methods of Applied Mathematics I Credits: 3
- MATH5500 - Advanced Linear Algebra Credits: 3
- MATH5550 - Abstract Algebra I Credits: 3

Tracks:

In addition to the common elements above, students must select and complete one of the capstone experiences described in the tracks below.

Track #1: Master's Thesis (Plan A)

Within the 30 hours of 5000-level courses, the Plan A student must complete 4 hours of MATH5960 - Thesis Research. At least 26 hours of 5000-level coursework must be mathcontent courses (not thesis research).

The student must prepare a master's thesis (Plan A) and give an oral defense of the thesis. In the mathematics program, a Plan A thesis reports on the result(s) of independent and original research completed by the student under the direction of a faculty member. The thesis should describe the research and its results and be written to the standards of the appropriate area of mathematics.

Track #2: Master's Paper (Plan B)

The student must prepare a master's paper (Plan B) and give an oral defense.

To write a Plan B paper, the student must present an expository paper on a designated mathematical subject. Students are guided by their advisor in the subject matter and in the preparation of the paper. A successful paper and defense demonstrates that the student has mastered a substantial mathematical topic that is beyond those covered in formal foundational coursework.

Track #3: Coursework/Project (Plan B)

A second M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper, the student takes a sequence of three 5000-level courses that all address a common mathematical theme. The sequence must be approved by the student's advisor and the mathematics graduate committee. Two of the courses must be mathematics-department offerings, and the third may be either a mathematics course (including reading/topics courses) or a course from another department in a related field.

- The student must complete an additional 6 hours of courses at the 5000 level. Thus, Track #3 requires the completion of 36 hours of graduate-level coursework.

- Within the 36 hours, the student must propose and complete with a grade of B or better an appropriate 3-course sequence
- The student will write a short paper illustrating how the common mathematical theme of the sequence manifests itself in the content of each course and give a presentation/defense of the paper.

In approving the student's proposal for this option, the graduate committee and the advisor will consider how the writing and independent study spirit of the Plan B option are fulfilled within the recommended plan.

Track #4: Qualifying Exam (Plan B)

A third M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper or taking additional coursework, the student must take and pass the department's PhD Qualifying Examination in one of the three areas: Analysis, Algebra, or Applied Mathematics. These examinations focus on the material in the required courses.

These examinations are given twice a year at the beginning of the fall and spring semesters. This option is intended for students who will continue for a PhD at UW.

- The oral component of this Track will consist of a defense of the student's written answers to qualifying exam.
- Pass one of the department's qualifying exams in:

Analysis

- MATH5200 - Real Variables I Credits: 3
- MATH5230 - Complex Variables I Credits: 3

Algebra

- MATH5500 - Advanced Linear Algebra Credits: 3
- MATH5550 - Abstract Algebra I Credits: 3

Applied Mathematics

- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- MATH5400 - Methods of Applied Mathematics I Credits: 3

Mathematics, M.A.T.

Applicants are required to have:

- A valid teaching endorsement in any state or educational requirements satisfied for secondary teaching;
- courses equivalent to MATH 3205, MATH 3500, MATH 4000 and MATH 4600;
- a course in computer programming.

Students who enter the program with a deficiency in the courses listed in (b) must take them at UW, but these courses may not be counted toward the course requirements of the M.S.T./M.A.T. program.

Mathematics, M.S.

The math department maintains 4 tracks by which students may obtain a Master of Arts (M.A.) or Master of Science (M.S.) degree in mathematics.

Common Requirements

The following requirements are common to all four tracks:

- The student must maintain a 3.000 cumulative GPA.
- The student must complete 30 hours of formal mathematics coursework at the 5000 level.
- The student must pass the department's Foundation Exam. This exam covers material from advanced vector calculus and linear algebra at the upper-division undergraduate level and is offered before the beginning of each semester.
- Take one hour of the seminar MATH 4970: Professional Development in Mathematics and one hour of the seminar MATH 4970: Professional Development in Teaching.

5000-level Mathematics Courses

As part of the 30 hours of formal 5000-level mathematics courses, the student must complete the following courses with a grade of B or better:

- MATH5200 - Real Variables I Credits: 3
- MATH5230 - Complex Variables I Credits: 3
- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- MATH5400 - Methods of Applied Mathematics I Credits: 3
- MATH5500 - Advanced Linear Algebra Credits: 3
- MATH5550 - Abstract Algebra I Credits: 3

Tracks:

In addition to the common elements above, students must select and complete one of the capstone experiences described in the tracks below.

Track #1: Master's Thesis (Plan A)

Within the 30 hours of 5000-level courses, the Plan A student must complete 4 hours of MATH5960 - Thesis Research. At least 26 hours of 5000-level coursework must be mathcontent courses (not thesis research).

The student must prepare a master's thesis (Plan A) and give an oral defense of the thesis. In the mathematics program, a Plan A thesis reports on the result(s) of independent and original research completed by the student under the direction of a faculty member. The thesis should describe the research and its results and be written to the standards of the appropriate area of mathematics.

Track #2: Master's Paper (Plan B)

The student must prepare a master's paper (Plan B) and give an oral defense.

To write a Plan B paper, the student must present an expository paper on a designated mathematical subject. Students are guided by their advisor in the subject matter and in the preparation of the paper. A successful paper and defense demonstrates that the student has mastered a substantial mathematical topic that is beyond those covered in formal foundational coursework.

Track #3: Coursework/Project (Plan B)

A second M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper, the student takes a sequence of three 5000-level courses that all address a common mathematical theme. The sequence must be approved by the student's advisor and the mathematics graduate committee. Two of the courses must be mathematics-department offerings, and the third may be either a mathematics course (including reading/topics courses) or a course from another department in a related field.

- The student must complete an additional 6 hours of courses at the 5000 level. Thus, Track #3 requires the completion of 36 hours of graduate-level coursework.
- Within the 36 hours, the student must propose and complete with a grade of B or better an appropriate 3-course sequence
- The student will write a short paper illustrating how the common mathematical theme of the sequence manifests itself in the content of each course and give a presentation/defense of the paper.

In approving the student's proposal for this option, the graduate committee and the advisor will consider how the writing and independent study spirit of the Plan B option are fulfilled within the recommended plan.

Track #4: Qualifying Exam (Plan B)

A third M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper or taking additional coursework, the student must take and pass the department's PhD Qualifying Examination in one of the three areas: Analysis, Algebra, or Applied Mathematics. These examinations focus on the material in the required courses.

These examinations are given twice a year at the beginning of the fall and spring semesters. This option is intended for students who will continue for a PhD at UW.

- The oral component of this Track will consist of a defense of the student's written answers to qualifying exam.
- Pass one of the department's qualifying exams in:

Analysis

- MATH5200 - Real Variables I Credits: 3
- MATH5230 - Complex Variables I Credits: 3

Algebra

- MATH5500 - Advanced Linear Algebra Credits: 3
- MATH5550 - Abstract Algebra I Credits: 3

Applied Mathematics

- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- MATH5400 - Methods of Applied Mathematics I Credits: 3

Mathematics, M.S.T.

Applicants are required to have:

- A valid teaching endorsement in any state or educational requirements satisfied for secondary teaching;
- courses equivalent to MATH 3205, MATH 3500, MATH 4000 and MATH 4600;
- a course in computer programming.

Students who enter the program with a deficiency in the courses listed in (b) must take them at UW, but these courses may not be counted toward the course requirements of the M.S.T./M.A.T. program.

Mathematics, Ph.D.

The student must maintain a 3.0 cumulative GPA.

The student must teach two semesters of college mathematics.

The student must complete a combination of 72 hours of coursework and dissertation research. Within the 72 hours, a maximum of 12 hours can be at the 4000 level, and 42 hours must be formal courses at the 5000 level. The courses must be mathematics courses or courses with significant mathematical content, as approved by the department's graduate committee.

The Student Must Complete

Within the 42 hours of 5000-level courses, the student must:

- Complete the courses distributed in three areas: algebra, analysis, and applied mathematics. The student must take at least two courses in each of two categories and at least one course from the third category. The department maintains a list of course categories.
- MATH5200 - Real Variables I Credits: 3 with a grade of B or better
- MATH5230 - Complex Variables I Credits: 3 with a grade of B or better
- MATH5310 - Computational Methods in Applied Sciences I Credits: 3 with a grade of B or better
- MATH5400 - Methods of Applied Mathematics I Credits: 3 with a grade of B or better
- MATH5500 - Advanced Linear Algebra Credits: 3 with a grade of B or better
- MATH5550 - Abstract Algebra I Credits: 3 with a grade of B or better

Take Two Hours of

- MATH5800 - Seminar in Mathematics Credits: 1-3 -02, and Colloquia

In Addition

In addition, the student must:

- Pass the foundation exam, the qualifying exam in the student's research area, and the preliminary exam.
- Write a dissertation containing the student's original mathematical results and present an oral defense of the research.
- Take one hour of the seminar 4970: Professional Development in Mathematics and one hour of the seminar MATH4970 - Professional Development in Teaching.

Music Education, M.M.

Each of the degree programs consists of 30 semester hours of work composed of the following elements:

Plan A or Plan B

To earn a Master of Music Education, students must complete the following requirements:

Basic Music Core (11 Hours)

- MUSC5310 - Music Research Methods Credits: 2
- Upper-division music history Credits: 3-6
- Upper-division music theory Credits: 3-6

Major Area Courses (12-15 Hours)

- EDRE5530 - Introduction To Research Credits: 3
- MUSC5760 - Music Education Seminar Credits: 2
- MUSC5720 - Musical Supervision: Choral Credits: 2
- Music education electives Credits: 5-8

Thesis Requirement (0-4 Hours)

Plan A

Four hours (the thesis must be on a music education topic)

- MUSC5960 - Thesis Research Credits: 1-12

Plan B

The thesis requirement may be fulfilled under the Plan B paper/lecture-recital as appropriate to the specific degree program. A proposal for a thesis or Plan B paper must be submitted to and approved by the student's graduate committee chair.

- Plan B paper, plus extra courses Credits: 0

Electives (4 to 7 Hours)

Require successful completion of the written comprehensive exams, which cover theory, history, and the major area.

Music Performance, M.M.

Each of the degree programs consists of 30 semester hours of work composed of the following elements

Plan B

To earn a Master of Music in Performance, students must complete the following requirements:

Basic Music Core (11 Hours Minimum)

- MUSC5310 - Music Research Methods Credits: 2
- Upper-division music history Credits: 3-6
- Upper-division music theory Credits: 3-6

Major Area Courses (16 Hours Minimum)

- MUSC 5480 - MUSC 5670 Private Lessons in major instrument or voice Credits: 8 minimum
- MUSC 5700 - MUSC 5890 Ensembles Credits: 2
- MUSC5680 - Graduate Recital Credits: 2 A faculty jury must approve a recital given for credit one month prior to the performance. The faculty jury will determine the grade after the performance.
- MUSC5390 - Performance Practice and Interpretation Credits: 2
- MUSC5320 - Advanced Seminar Credits: 2-6
- MUSC 4*** - Pedagogy (instrument specific) Credits: 2

Requirement In Lieu of Thesis

Plan B paper, or 1-hour lecture-recital

Foreign Language Requirement

(voice majors only). Singers must demonstrate acceptable proficiency in singing in Italian, German, French, and English.

Electives (0 to 3 hours)

Require successful completion of the written comprehensive exams, which cover theory, history, and the major area.

Philosophy, M.A.

Program Specific Degree Requirements

Plan A (Thesis)

31 hours of graduate credit

27 hours of graduate coursework

4 hours of thesis research

Proof of proficiency in formal logic (through first-order predicate logic with identity) by either passing the department's course (3420) or some other course judged to be its equivalent with a grade B or better or by completing a test with a grade B or better at the end of the second semester.

First year paper at the beginning of the third semester.

Defense of a thesis prospectus by the end of the third semester.

In any cases of deficiency, the department may require remedial work before admission to M.A. candidacy.

Physics, M.S.

Thesis planning, development, and production guided by the committee chair and graduate committee.

Requirements

Plan A (Thesis)

- 26 hours of graduate coursework, 20 of which must be in PHYS/ASTR at the 5000-level
- 4 hours of PHYS 5960

Plan B (Non-Thesis)

- 30 hours of graduate coursework, 24 of which must be in PHYS/ASTR at the 5000-level

Physics, Ph.D.

During the first two years, students normally take physics and astronomy courses while working with faculty members on one or more research projects. Course work consists of several required courses plus a number of elective courses. Students participate in weekly research seminars and journal clubs to learn about a broad range of current research. By the third year, Ph.D. students begin research work in the area of their dissertation.

Ph.D. candidates demonstrate their competency in basic undergraduate physics and in required graduate courses through a written examination. After passing the written exam, students will take an oral preliminary exam based on a research project they have completed during the first two years. At the completion of the Ph.D. dissertation, a candidate makes a public presentation of his or her work and the committee conducts a final examination to award the degree.

Requirements

- 42 hours of graduate coursework
- 30 hours of PHYS 5980 or PHYS 5860. Dissertation planning, development, and production guided by the committee chair and graduate committee.

Tracks:

- Physics, Physics Track, Ph.D.
- Physics, Astronomy Track, Ph.D.

Political Science, M.A.

Plan A (Thesis)

Graduate Credit

At least 30 hours of graduate credit, to include:

- At least 6 additional hours of coursework in political science.
- A maximum of 9 hours of coursework in disciplines other than political science.
- A minimum of 4 hours thesis research.

- A master's thesis demonstrating independent research, written under the supervision of the major professor.
- An oral examination conducted by the graduate committee covering all coursework and the thesis.
- No more than 6 hours of grades lower than 3.000 may be counted toward the minimum number of hours required for the degree.
- Students must maintain a graduate GPA of 3.000.
- POLS5510 - Public Policy and Program Management Credits: 3
- POLS5680 - Research Methods for Political Science Credits: 3
- POLS5684 - Empirical Analysis for Public Administration Credits: 3
- POLS5810 - Seminar in Political Philosophy Credits: 3

Plan B (Non-Thesis)

Graduate Credit

At least 30 hours of graduate credit, to include:

- At least 6 additional hours of coursework in political science.
- A maximum of 12 hours of coursework in disciplines other than political science.
- Plan B paper that reflects the quality but not scope of a master's thesis, written under the supervision of the major professor.
- An oral examination conducted by the graduate committee covering all coursework and the Plan B paper.
- No more than 6 hours of grades lower than 3.000 may be counted toward the minimum number of hours required for the degree.
- Students must maintain a graduate GPA of 3.000.
- POLS5510 - Public Policy and Program Management Credits: 3
- POLS5680 - Research Methods for Political Science Credits: 3
- POLS5684 - Empirical Analysis for Public Administration Credits: 3
- POLS5810 - Seminar in Political Philosophy Credits: 3

Political Science, M.P.A.

Plan B (Non-thesis)

Thirty-nine hours of graduate credit, to include:

- 21 hours of core credit,
- 6 hours of option-core credit,
- 12 hours of approved elective credit.
- Significant administrative experience is required of all M.P.A. graduates. If the M.P.A. student has little or no administrative experience an internship is required and will be included as 3 hours of the required elective credits.
- Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/ electronic class discussion.
- Students must maintain a graduate GPA of 3.000.

Political Science, M.P.A.

See the M.P.A. Director and/or the College of Law for information.

Students must be accepted to both programs.

Psychology, M.S.

Plan A (Thesis)

A minimum of 30 semester hours is required (26 coursework hours and 4 thesis hours).

In addition to the general requirements specified in this *Catalog*, the following are required:

- successful completion and oral defense of a thesis
- PSYC5060 - Statistical Methods In Psychology Credits: 3
OR
- STAT5050 - Statistical Methods for the Biological Science Credits: 3
- PSYC5300 - Applied Multivariate Analysis Credits: 3
OR
- STAT5055 - Statistical Methods for the Biological Sciences II Credits: 3
- PSYC5520 - Introduction To Research Credits: 3
- At least 9 hours in 5000-level courses exclusive of those listed above and exclusive of research and thesis research credit.

Psychology, Ph.D.

Doctoral Programs

- Clinical Psychology
- Social Psychology, Cognition/Cognitive Development, or Psychology and Law

Spanish, M.A.

Program Specific Degree Requirements

A total of 27 graduate-level course hours are required.

Plus 4 thesis hours.

Required Courses

- SPAN4200 - Introduction to Research Credits: 3
- SPAN5900 - Practicum in College Teaching Credits: 3

One course in theory
One course in linguistics
One course in literature/culture
One course outside the department
Spanish elective credits at the graduate level

Total: 31 Hours

Statistics Graduate Minor

Requirements

Twelve hours at the 5000 level with the exception of

STAT 5185

- STAT4220 - Basic Engineering Statistics Credits: 3
- STAT 5000
- STAT5185 - Analysis of Data Credits: 3

Statistics, Ph.D.

Profile

The Ph.D. Program in Statistics will give the student a solid background in statistical theory and in statistical methods, in technical reading and writing skills, and in conducting independent research. Most graduates from our doctoral program have been employed as tenure-track faculty at other universities. They also have the necessary background to work as lead researchers in industrial and research organizations.

Graduation Requirements

1. At the end of the first year in the doctoral program each student must take a comprehensive qualifying examination. If needed a student may retake this examination. A passing grade on this examination is mandatory for continuance in the doctoral program.
2. After completing this examination a student with the assistance of her/his adviser will be expected to form a doctoral committee. This committee will determine which courses are to be included in the Graduate Level Statistics electives, and will set the conditions of and conduct the preliminary examination. A passing grade on this examination is mandatory for official admittance into the doctoral program.
3. The student must write and successfully defend a dissertation research project. The specific conditions of the dissertation project are to be determined by each student's doctoral committee, but should consist of original research suitable for publication.

Coursework

In addition to the general requirements of the Graduate School all candidates for the Ph.D. degree must successfully take and complete:

Prerequisites for the Required Courses

- STAT5255 - Mathematical Theory of Probability Credits: 3
- STAT5265 - Introduction to the Theory of Statistics Credits: 3
- MATH4200 - Analysis 2: Advanced Analysis Credits: 3 (or Analysis for Statisticians Topics Course)
- STAT5025 - Design and Analysis of Experiments I Credits: 3
- STAT5015 - Regression Analysis Credits: 3

Required: 45 Credit Hours

- STAT5210 - Advanced Regression Credits: 3
- STAT5220 - Advanced Design Credits: 3
- STAT5230 - Statistic Methods III Credits: 4
- STAT5380 - Bayesian Data Analysis Credits: 3
- STAT5470 - Data Analysis Credits: 3
- STAT5510 - Distribution Theory Credits: 4
- STAT5520 - Inference I Credits: 4
- STAT5530 - Inference II Credits: 3
- STAT5540 - Large Sample Theory Credits: 3
- STAT5620 - Theory of Linear Models Credits: 3
- STAT5660 - Computationally Intensive Methods in Statistics Credits: 3
- STAT5810 - Seminar Credits: 1-2 (3 hours; 3 presentations)

Methodological Topics

At least 2 of the following which are **required** when offered

- STAT5615 - Time Series Analysis II Credits: 3
- STAT5630 - Multivariate Analysis Credits: 3
- STAT5650 - Theory of Sampling Credits: 3
- STAT5670 - Mixed Models Credits: 3

Remaining Hours

The remaining hours of doctoral work are typically filled in part by other graduate level statistics/mathematics courses/Dissertation Research. Students who enter the program lacking a course in Mathematical Analysis or the equivalent should take MATH 4200 in their first year. MATH 4200 may be counted as part of the doctoral degree program.

Zoology and Physiology, M.S.

Plan A (Thesis)

Includes 26 hours of coursework and 4 hours of thesis research.

Applicants should have at least 20 semester hours of undergraduate work in zoology, physiology, or other areas of the biosciences and have completed introductory courses in mathematics, chemistry, and in at least one other natural or physical

science. Early in the second semester the student must file a program of study with the university and have a graduate committee appointed. Plan A candidates shall orally defend the thesis before the graduate committee.

All M.S. candidates will be required to complete credit in two graduate seminars. A student may enroll in more than one of these required seminars during one semester or academic year.

After two semesters in the department, a Plan A master's candidate may request permission from the department's graduate advisory board to proceed directly to the Ph.D. degree; however, such a bypass is granted only by the department head after considering recommendations from the graduate advisory board.

Zoology and physiology may be used as a field by a candidate working for the interdisciplinary master of science in natural science in the College of Arts and Sciences and the College of Education.

Plan B (Non-Thesis)

Includes 30 hours of coursework.

The program for the Plan B is established by the student and a faculty adviser and must be approved by the department head during the student's second semester or summer session.

The graduate committee will require the candidate to take a written examination. An oral examination may also be required. The final examination is comprehensive, covering all areas of zoology, but emphasizing one major area.

Zoology and Physiology, Ph.D.

This is a 72 hour program.

A Ph.D. applicant must have 20 hours of undergraduate work in zoology, physiology, or other areas of biology and also have completed substantial undergraduate work in other sciences. Under exceptional circumstances, a student with an undergraduate major in a scientific discipline other than biology may be admitted. After the Ph.D. student has completed two semesters of graduate work, s/he must be approved for continued work toward the doctorate by the graduate advisory board. This board can reconsider a candidate thereafter if it so desires.

A graduate committee shall be appointed for the individual student no later than the third semester. After consultation with the student, this committee will prescribe special requirements (courses, minors, research tools, etc.) that must be fulfilled. At this time, the graduate committee shall consult with the candidate on the proposed research and shall identify the subject matter areas to be included in the preliminary examination. The preliminary examination will consist of a written research proposal, its oral defense, and a written and oral preliminary examination. When training outside zoology and physiology is specified by the committee, certification of satisfactory completion of the requirement will be made by the appropriate department.

In addition to the general university requirements for the Ph.D. degree, the department requires the following:

The coursework program should include work in a discipline outside the department, generally in the sense of a minor, to be identified in consultation with the graduate committee.

The preliminary examination consisting of written and oral portions should be taken no later than midterm of the fourth semester in residence. The graduate committee will certify satisfactory performance for the preliminary examination.

The dissertation must be received by each member of the graduate committee three weeks before the final dissertation seminar. As oral defense of the dissertation, the candidate will deliver a formal 50 minute seminar on original research from the dissertation. The seminar will be followed by an examination by the graduate committee.

Some time during their degree program, all Ph.D. candidates will be required to complete credit in three graduate seminars. A student may enroll in more than one of these required seminars during one semester or academic year.

All candidates for the Ph.D. degree shall be required to teach for one semester during their program.

The dissertation may be written in a format suitable for publication in a journal and the usual extensive literature review, description of study sites, technical details, raw data, supporting figures, charts, and photographs should be included in a well-organized appendix. (See also format requirements by the university.)

Certificate

American Studies Certificate

The certificate program allows students to choose from undergraduate and graduate courses in American Studies, literature, geography, music, art, history, philosophy, sociology, folklore, anthropology, Native American and Indigenous studies, political science, environmental studies, and media studies.

The program encompasses two semesters of full time work: a total of at least 24 semester hours, or approximately 8 courses. Of these, 6 credit hours (2 courses) must be selected from the following list:

Requirements

- AMST2010 - Introduction to American Studies Credits: 3
- Any AMST course at the 4000- or 5000-level Credits: 3
- An additional 18 hours (6 courses) are chosen in consultation with an American Studies faculty adviser. The final 3 credit hours, completed during the summer months, are devoted to an internship (AMST 4970) or field experience in American culture (AMST 4900).

Teachers of American Indian Children (TIAC) (Teaching) Endorsement/UW Certification

Through Distance Education, a Teachers of American Indian Children (TAIC) Endorsement / Graduate Certificate can be earned. This non-degree graduate program certifies that those who complete its five specialized courses possess the attitudes, knowledge, and competence necessary to effectively teach American Indian Children. Upon completion, students receive official recognition of their achievement on their transcripts and an official certificate. Visit the Distance Education Degrees and Programs Website www.uwyo.edu/distance/ for more information. All courses are cross-listed with NAIS and EDCI.

An interdepartmental Native American and Indigenous Studies Advisory Committee guides the program's development. The director advises students selecting the NAIS studies major or minor.

Complete information about the Native American and Indigenous Studies undergraduate major, undergraduate minor, and graduate minor is available in the NAIS Program office and on the program Website.

Other Programs

Life Sciences

Life Sciences Program

107 Aven Nelson Building, 766-4158 Web site: www.uwyo.edu/lifescience

Program Director: Jonathan Prather

The Life Sciences Program consists of all LIFE prefix courses. These courses support a wide range of life science majors and several non-life science majors across campus. The number of LIFE courses taken by students in each major is determined by the departments that offer the majors. The curriculum intends to provide science majors with both breadth and depth in the basic life sciences, and nonscience majors with exposure to key concepts in biology and an understanding of the connections between science and society. The program courses also expose students to the fields of cell and molecular biology, genetics, ecology, and evolution, and they familiarize students with the diversity of life on the planet. Courses within the curriculum address four fundamental goals at a level appropriate for each course: 1. Acquisition, Application and Synthesis of Knowledge 2. Communication Skills 3. Critical Thinking and Problem Solving 4. Research Skills The Life Sciences courses listed below were previously offered under the BIOL prefix. All courses listed below are now offered through the LIFE prefix.

College of Business

310 Business Building

Website: <http://business.uwyo.edu>

Rob Godby, Interim Dean

Phone: (307)766-4194 **FAX:** (307)766-4028

Peter M. and Paula Green Johnson Student Success Center (307) 766-8249

The College of Business prepares students for careers by providing quality education in business disciplines, creating and disseminating knowledge, and assisting in Wyoming's economic development. The College of Business expects the highest level of integrity from our administration, faculty, staff, students, and alumni.

The College of Business grew from roots established in 1899 when the UW School of Commerce was founded. While the programs offered have changed over the years, the college remains firmly committed to academic excellence and positive student experiences.

The college has three academic departments: accounting and finance; economics; and management and marketing. The college also houses the College of Business Peter M. and Paula Green Johnson Student Success Center which is instrumental in maintaining the college's link with the business world.

These units are committed to preparing all College of Business students to enter our rapidly-changing world. Successful graduates are fully prepared to compete in their chosen professions or in graduate school. More importantly, they are well-educated individuals prepared to live fulfilling lives, and to meet the challenges presented by the complex ethical, moral and cultural contexts of our times.

College of Business Learning Outcomes

The College of Business expects that its graduates:

1. Will be competent in their field of study
2. Will be effective problem solvers
3. Will be ethical
4. Will be professional
5. Will be effective communicators

AACSB Accreditation

The business degree programs offered by the College of Business are accredited by AACSB-International. AACSB standards ensure that College of Business students are provided comprehensive, high-quality, well-rounded degree programs. The "Common Body of Knowledge" and the "Advanced Business Standing" (ABS) as described on the following pages have been developed to meet the AACSB accreditation standards.

Per accreditation guidelines, non-College of Business majors are limited to 30 hours of business courses.

A minimum of 50% of COB courses required for the major must be taken from the degree-awarding institution.

Programs of Study

Undergraduate Degrees

BSB - Bachelors of Science in Business

BSE - Bachelors of Science in Economics

The Majors are as follows:

- Accounting, B.S. (BSB-ACCT)
- Business Economics, B.S. (BSB - CBEC)
- Entrepreneurship, B.S. (BSB - ENTR)
- Finance, B.S. (BSB - FIN)
- Management of Human Resources, B.S. (BSB - HR)
- Marketing, B.S. (BSB - MKT)
- Professional Sales, B.S. (BSB - SELL)
- Economics, B.S. (BSE - ECON)
 - The BSE in Economics has two tracts 1) policy and 2) quantitative

The Minors are as follows:

- Banking and Financial Services Minor
- Blockchain Minor
- Data Analytics Minor
- Economics Minor
- Entrepreneurship Minor (for nonbusiness students only)
- Hospitality Business Management Minor
- International Business Minor
- Leadership Minor
- Professional and Technical Selling Minor
- Real Estate Minor

Graduate Degrees

Master of Science

Accounting, M.S.

Economics, M.S.

Finance, M.S.

Business Administration, M.B.A.**Business Administration, Online, M.B.A.****Doctor of Philosophy**

Economics, Ph.D.

Marketing, Ph.D.

Student Services

Academic Advising

All College of Business undergraduate students are advised by professional academic advisers in the College of Business Peter M. and Paula Green Johnson Student Success Center. Advising can be reached by e-mail (success@uwyo.edu) or by phone (307-766-8249).

Career Services

The Career Services unit connects students and employers in ways that lead to meaningful experiences and job opportunities. Business students are encouraged to explore career options and grow their career readiness by completing the Pokes Professionalism Badge and engaging in multiple internships. Students also have the option to apply for local, national, and international internships starting their first year and may be able to receive credit for their work. Networking with employers is highly encouraged and offered through a series of fairs, events, and in-class projects. One-on-one assistance and workshops are also available to students for things such as: internship or job searching; resume creation, review, or targeting; and career coaching or counseling. Individual appointments may be scheduled by email (success@uwyo.edu) or by phone, (307) 766-8249.

Student Responsibilities

College of Business students are responsible for knowing and meeting requirements for graduation. In addition to degree requirements, all College of Business students must complete the advanced business standing requirements prior to enrollment in most upper-division (3000/4000-level) College of Business courses (see Advanced Business Standing (ABS) Prerequisites section).

All students must have already completed any prerequisites listed (in addition to ABS for COB students), including having the appropriate class standing. Class standing means for a 2000-level course, the student has earned a minimum of 30 hours; 3000-/4000- level courses, the student has earned a minimum of 60 hours. Students not meeting the prerequisites are identified and administratively dropped from those courses each semester.

Requirements for the Bachelor of Science Degree

Candidates for the Bachelor of Science degree in the College of Business must meet university, college, and departmental requirements. Degree candidates for the B.S. degree in the College of Business also must have a minimum 2.500 cumulative University of Wyoming (UW) grade point average and a 2.500 grade point average in College of Business courses at the time of graduation. In addition, economics majors also must hold a minimum 2.500 grade point average for all economics courses. College of Business degree candidates must earn a minimum of 120 semester hours depending on major including:

I. University Studies Requirements:

All first year students who enter the University of Wyoming (UW) and students who enter a Wyoming Community College (CC) are required to meet the USP 2015 requirements for graduation. Wyoming CC students transferring to UW with an Associate of

Arts or Associate of Science degree will have course work evaluated per the General Education Articulation Agreement between the University of Wyoming and Wyoming Community Colleges. Non-resident transfer students and Wyoming CC transfer students without an associate's degree will have course work evaluated on a course-by-course basis, based on all approved USP courses. Academic advisers will help students select the appropriate courses to satisfy university studies requirements. Some College of Business requirements also meet university studies requirements.

A. Basic skills (USP 2015) Hrs.

1. First-year seminar (FYS) Choose from list of approved courses.....3
2. Writing
 - a. USP Communication 1 course3
 - b. USP Communication 2 course- Mid-level communication or 2000-4000-level communication intensive course-Choose from list of approved courses.....3
 - c. USP Communication 3 course- Upper-level communication or 3000-4000-level communication intensive course3
3. Physical and Natural World (PN) (Two courses required-choose from list of approved courses).....6
4. Human Culture (H) (Two courses required-choose from list of approved courses).....6
5. U.S. and Wyoming Constitutions (V).....3
6. Quantitative Reasoning (Q).....3

II. Electives

The number of hours of elective credit and upper-division (3000-/4000-level) credit varies by department. Economics majors will take 48-51 hours of free electives. A maximum of 6 credit hours each at the freshman/sophomore and junior/senior-level military science courses may be applied to degrees in the College of Business.

A. Non-Business electives Hrs

1. Non-Business electives. May include MATH 14003-9

B. Free electives Hrs.

1. Free electives from any college. May require upper-division (3000/4000-level) courses18-24

Students **may not** take courses for S/U (satisfactory/unsatisfactory) credit to satisfy university studies or college requirements, course requirements in the major, or courses outside the college required by the major department curriculum.

III. Advanced Business Standing: (excludes Economics majors)

College of Business majors must satisfy the following advanced business prerequisites prior to enrolling in most upper-division (3000- /4000- level) College of Business courses:

1. Achieve junior standing by completing a minimum of 60 earned semester hours;

2. Complete 10 specific courses with a grade of C (not C-) or better in each. These ten courses are: ECON 1010 and 1020, USP Communication 1 and 2 courses, ACCT 2010 and 2020, IMGT 1400, MATH 2200 and 2205 or MATH 2350 and 2355 and STAT 2050 or 2070.

3. Achieve a cumulative UW institution grade point average or transfer grade point average of at least 2.500. Note: Transfer grades are not counted in the UW GPA (see UW Catalog http://www.uwyo.edu/registrar/university_catalog/grade.html for additional information). Transfer students who have not attended the University of Wyoming, and therefore do not have an established UW institutional/cumulative GPA, and who have completed the required ten (10) courses with a C or better, have 60 earned credit hours, and have a 2.500 cumulative TRANSFER GPA will be awarded ABS.

IV. Common Body of Knowledge: (excludes Economics majors)

College of Business majors take a common set of courses that expose them to the basic concepts, processes and technical skills necessary to complete a well-rounded high quality business education. The common body of knowledge includes FIN 3250, MGT 1040, DSCI 3210, IMGT 1400, MGT 3210, 4800, MKT 3210, ECON 1010, ECON 1020, ACCT 2010, and ACCT 2020. Grades of C (not C-) or above required.

V. Minimum requirements:

Achieve a cumulative College of Business and UW institution grade point average of at least 2.500. Complete 50% of the business credit hours from UW. Earn grades of C (not C-) or above in common body of knowledge and major specific core courses. Earn a passing score on the Senior Exit Exam required for all College of Business majors.

Requirements for Non-College of Business Majors

Students in non-College of Business majors who wish to enroll in College of Business upper-division courses need not meet the advanced business standing prerequisites. However, they are required to meet individual course prerequisites listed in the University Catalog, including class standing. This means for 2000-level courses, they must have earned a minimum of 30 hours. For 3000-4000-level courses, they must have earned a minimum of 60 hours.

Acceptance of Transfer Credit

The College of Business complies with UW policies regarding transfer credit discussed in the front section of this bulletin. The college has special course transfer arrangements with Wyoming community colleges that allow some courses taken at community colleges at the lower-division (freshman-sophomore) level to transfer for upper-division (junior) credit. Wyoming community college transfer students should contact the GJSSC for details.

Students transferring from other AACSB accredited colleges and universities will have their courses reviewed for transfer on a course-by-course basis.

The College of Business does not accept transfer credits for COB courses with equivalents at UW when the grade earned was less than a C.

Students must have an established 2.500 UW grade point average to transfer into the College of Business from across campus.

Where appropriate, College of Business course equivalency will be granted for transfer courses at the 3000 and 4000 level if such coursework was completed at an AACSB or EQUIS institution only. Any coursework completed at an institution that does not meet that qualification will not be considered for upper division equivalency."

The UW College of Business is AACSB accredited and therefore follows AACSB's current guidelines* to maintain accreditation.

The primary goal of this transfer policy is to ensure coursework accepted from other institutions is comparable to coursework required by our college's degree programs and ensure that the majority of learning is completed at the institution awarding the degree while simultaneously allowing measured flexibility in acceptance of transfer credits as allowed by AACSB accreditation in support of student progress and degree completion.** For example, at the time of this policy's creation, the number of business credit hours for the College of Business's undergraduate majors is 54 credit hours (this includes the business common body of knowledge courses).

Therefore, to align with AACSB standards, a minimum of 27 credit hours of business coursework in the major must be earned in residence at the University of Wyoming. In addition to the transfer policies defined in the University of Wyoming catalog, the College of Business has established the following policies in support of AACSB Standards governing the transfer of credit for equivalent business courses. Courses will be considered for transfer according to the following additional criteria:

- Students may transfer up to eighteen (18) lower division (1000/2000 level) business credits to the Common Body of Knowledge.
- Lower division courses from regionally accredited institutions will be evaluated for equivalency and approved by the UW Office of the Registrar on an annual basis.
- Students may transfer up to nine (9) upper division (3000/4000 level) business credits according to the following guidelines:
 - Courses from AACSB/EQUIS accredited institutions will be evaluated for equivalency and approved by the College of Business.
 - Courses from regionally accredited, non-AACSB/EQUIS institutions will be accepted as upper division elective credit in accordance with the transfer policies defined in the University of Wyoming catalog.
 - The College of Business has collaborative provisions (detailed in separate articulation agreements) that allow students from Wyoming's community colleges to transfer up to 9 credit hours of 3000-level coursework that has been evaluated by the College of Business. These 3000-level courses will be evaluated annually for equivalency***.

* A requirement of the accreditation process (as reflected in Standard 6 of the 2020 Business Standards) is for accredited colleges to have clear policies regarding transfer coursework.

** As noted by AACSB: "transfer credit related to business disciplines is normally limited to no more than half of the program requirements" (2020 AACSB Standards, p. 13).

*** The 3 courses (9 credits) of 3000-level coursework will generally include: FIN 3250, MGT 3210, and/or MKT 3210 in the Common Body of Knowledge. Per college-specific articulation agreements, students may be able to use the following transfer courses: ACCT 3070, ACCT 3230, ACCT 3240, ACCT 3430, or MGT 3110.

Accounting and Management of Human Resources Online Programs

The College of Business offers students an accounting degree and a management of human resources degree accredited by *AACSB International* and delivered through distance education. The program is designed to help students maximize their flexibility in the business world and is delivered entirely online.

The online Accounting and Management of Human Resources degrees are completion programs designed to allow students with a particular set of courses and requirements to complete the remainder of their bachelors degree online at the University of Wyoming. Both online degrees require students to have completed Advanced Business Standing (ABS) prerequisite coursework, which can be taken from an accredited Wyoming community college, other university or on campus at UW, before completing upper division coursework from the University of Wyoming.

Students will be required to apply to UW, have a 2.500 cumulative grade point average, and advanced business standing before being considered for admission into the online accounting program or the online management of human resources program. Students must also attain a 2.500 GPA for graduation for both College of Business and UW courses, complete and submit an anticipated graduation date form, and must pass the Senior Exit Exam (BUSN 4990) to graduate.

To ensure you the availability of required courses in this program, enrollment into courses is managed and approved by the College of Business Peter M. and Paula Green Johnson Student Success Center.

College of Business Minors

Minors are available to on-campus students through the College of Business in the areas of banking and financial services, data analytics, economics, entrepreneurship (not available to College of Business majors), hospitality business management, leadership, international business, professional and technical selling, real estate. Minors requirements may often be met by simply focusing the elective credits available in a student's major.

The minors program consists of course requirements of 15 hours of study. A minimum grade of C (not C-) must be earned in each course. Certification of a successful minor program completion occurs as part of the DegreeWorks progress report, and the Office of the Registrar notes the completion of the minor on student transcripts. Minors must be approved by the Peter M. and Paula Green Johnson Student Success Center.

Students must have a minimum 2.500 cumulative UW GPA. Students must maintain a cumulative 2.500 GPA in the required College of Business courses for the minor to be awarded. Non-College of Business students must meet the individual course prerequisites listed in the catalog, although they need not meet the advanced business standing requirements. A minimum of 50% of COB courses must be taken from the degree-awarding institution.

Cooperative Undergraduate Programs

The Concentration in Environment and Natural Resources

College of Business majors may earn a cross major in Environment and Natural Resources (ENR) in cooperation with the UW School of Environment and Natural Resources. The appropriate use of natural resources and awareness of environmental consequences of decisions have become major issues for business. Exposure to ideas, skills and sensibilities in these areas is critical to future business people. Students majoring in economics may elect an environment and natural resources concentration in which an economics approach to problem solving is stressed. For more information call the ENR office at (307) 766-5089.

Graduate Study

The College of Business is comprised of three academic departments: accounting and finance, economics, and management and marketing. The faculty of these departments cooperate in the presentation of graduate work leading to the following degrees:

Master of Business Administration

Master of Science in Accounting

Master of Science in Economics

Master of Science in Finance

Doctor of Philosophy in Economics

Doctor of Philosophy in Marketing

The College of Business faculty is firmly committed to the excellence of its graduate programs. The graduate programs in the College of Business are accredited by AACSB International. The three academic departments coordinate course offerings to support all of the graduate degree programs; the M.B.A. program in particular is a college-wide effort.

Cooperative Graduate Programs

The Concentration in Environment and Natural Resources

College of Business graduate students may earn an interdisciplinary minor in environment and natural resources (ENR) in cooperation with the UW School of Environment and Natural Resources. The appropriate use of natural resources and awareness of environmental consequences of decisions have become major issues for all areas of business and economics. The School of Environment and Natural Resources is designed to move beyond the strictly disciplinary design and management of their long-term solutions. The school seeks to attract outstanding graduate students from a variety of disciplines, who are eager to pursue careers that engage other professionals, policymakers, and the public in finding innovative ways to resolve complex environmental and natural resource issues. To pursue a minor in ENR, students must first be admitted to another master's or doctoral degree program offered at the University of Wyoming. For more information call the ENR office at (307) 766-5080.

Major

Accounting, B.S.

The basic objectives of the accounting program are twofold: to provide students who do not intend to major in accounting with the basis for understanding the role accounting plays in business today; and to provide those students who desire to major in accounting with the educational background necessary for lifelong learning and a rewarding career in the accounting profession. The curriculum offered by the department attempts to blend the conceptual with the practical. Exposure to the underlying conceptual framework of accounting provides a basis for dealing with emerging accounting issues, while examination of technical pronouncements enables students to gain insight into practical issues encountered in an accounting environment.

Accounting majors may enter the professional world of accounting from a variety of directions. Choices available in the form of elective courses enable students to chart a course that leads them toward public accounting, private accounting, governmental or not-for-profit accounting, as well as other specialties that rely on a strong accounting background. Those students seeking professional certification, such as the CMA or CIA, are able to satisfy requirements to sit for these professional examinations by completing the undergraduate accounting degree. All accounting majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously.

All accounting courses for the major require a minimum grade of C (not C-). In addition to university and college requirements cited previously, requirements for accounting majors include:

Requirements - Total Credits: 120

USP Requirements - Credits: 39

See USP Requirements for full list of requirements.

Common Body of Knowledge - Credits: 33

- ACCT2010 - Principles of Accounting I Credits: 3
- ACCT2020 - Principles of Accounting II Credits: 3
- ECON1010 - Principles of Macroeconomics Credits: 3
- ECON1020 - Principles of Microeconomics Credits: 3
- MGT1040 - Legal Environment of Business Credits: 3
- IMGT1400 - Introduction to Business Analytics Credits: 3
- FIN3250 - Corporate Finance Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- DSCI3210 - Introduction to Operations and Supply Chain Management Credits: 3
- MGT4800 - Business Strategy and Policy Credits: 3
- BUSN4990 - Senior Exit Exam Credits: 0

Major Specific Courses - Credits: 30

Accounting Core: 21 Credits

- ACCT3070 - Tax I Credits: 3
- ACCT3230 - Intermediate Accounting I Credits: 3
- ACCT3240 - Cost Accounting I Credits: 3
- ACCT3430 - Intermediate Accounting II Credits: 3

Accounting Elective: 3 Credits

Choose 1 of the Following:

- ACCT3100 - Financial Statement Analysis Credits: 3
- ACCT4050 - Governmental and Nonprofit Accounting Credits: 3
- ACCT4960 - Volunteer Income Tax Assistance Credits: 1-3

Advanced Business Electives: 6 Credits

Any business courses at a 3000+ level that have not been used to meet any other primary major requirements.

Free Electives from Any College: 18 Credits

Courses from any college at any level that have not been used to meet any other primary major requirements.

A complete curriculum sheet is available from the College of Business Peter M. and Paula Green Johnson Student Success Center in the College of Business Building.

Please Note:

Students who anticipate preparing themselves for the CPA examination following completion of their degree should be aware of the Wyoming statute governing eligibility to sit for the exam. Please see the state board's web site for information: cpaboard.state.wy.us. The current combined curricula (B.S. and M.S.) enable students to satisfy the educational requirements to sit for the CPA exam in Wyoming and other jurisdictions.

Business Economics, B.S.

The science of efficient allocation, economics has much to offer students in the way of general and specialized preparation for positions in business, as well as government and the academic profession.

All Business Economics majors must comply with requirements of the advanced business standing prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously.

A complete curriculum sheet is available from the Academic Advising unit of the GJSSC in the College of Business Building.

Economics majors must hold a 2.500 cumulative grade point average in all economics courses at graduation, as well as a minimum 2.500 cumulative UW grade point average and a minimum 2.500 grade point average in all College of Business courses.

With approval of the department chair, students may substitute work in certain areas of accounting, agricultural economics, business administration, history, political science, finance, mathematics, statistics or law for 6 hours of 4000-level economics courses.

Students who intend to continue on to graduate work are urged to give special attention to courses in economics theory, statistics and mathematics. Those planning a career in econometrics or mathematical economics should consult the department head as to mathematics and statistics requirements in these fields of study.

In addition to university and college requirements cited previously, requirements for Business Economics majors include:

Requirements - Total Credits: 120

USP Requirements - Credits: 39

See USP Requirements for full list of requirements.

Common Body of Knowledge - Credits: 33

College of Business Common Body of Knowledge Courses

- ACCT2010 - Principles of Accounting I Credits: 3

Economics, B.S.

The Economics major in the College of Business must complete 30 semester hours in economics courses.

All Economics majors must comply with course specific prerequisites for enrollment in upper-division courses and must complete all university studies courses as listed above previously. Students must earn a minimum grade of C (not C-) in all Economics courses.

This program is designed to meet the requirements of AACSB International (the Association to Advance Collegiate Schools of Business), the University of Wyoming, and the College of Business.

Minimum requirements include:

Minimum of 42 semester hours of 3000+ level courses. 30 of the 42 hours must be earned from UW.

2.50 grade point average in all College of Business courses, Economics courses, and all institution (UW) courses.

50% of the business credit hours must be from the University of Wyoming.

Grade of C (C- not acceptable) or above required for University Studies Program: FY, CI, C2, and C3.

Grade of C (C- not acceptable) or above required for common body of knowledge and major specific core courses.

A maximum of 6 hours at the 1/2000 level and 3/4000 level military science may be applied to degrees in the College of Business.

A complete curriculum sheet is available from the College of Business Peter M. & Paula Green Johnson Student Success Center in the College of Business Building.

With approval of the department chair, students may substitute work in certain areas of accounting, agricultural economics, business administration, history, political science, finance, mathematics, statistics or law for 6 hours of the 4000-level economics electives.

This program allows considerable flexibility for the student to specialize in interdisciplinary study. For example, the student can be advised on selecting upper level division courses for pre-law study, political economy, environmental and natural resources, women's studies, and international studies.

Students who intend to continue in graduate work should give special attention to courses in economic theory, statistics and mathematics. Those planning a career in mathematical economics or econometrics should consult the department head regarding the mathematics and statistics requirements in these fields of study.

This program is designed to meet the requirements of AACSB International (the Association to Advance Collegiate Schools of Business), the University of Wyoming, and the College of Business.

A complete curriculum sheet is available from the College of Business Peter M. & Paula Green Johnson Student Success Center in the College of Business Building.

In addition to university and college requirements cited previously, requirements for economics majors include:

Entrepreneurship, B.S.

The Entrepreneurship major is designed to assist students who wish to start their own businesses by providing them with exposure to the development and testing of business concepts. Analyzing the potential success of their concepts using a variety of tools and techniques, being flexible in developing new businesses and innovative ideas, and formulating and implementing business plans that will assist in the establishment and growth of these new ventures. The major provides students with exposure to issues involving family firms such as governance, succession and interpersonal relationships in both new ventures and established firms and prepares students to 1) start new businesses, 2) innovate in their own family firms and/or 3) be entrepreneurial in an existing business.

- Courses from any college at a 3000+ level - Credits: 9

Finance, B.S.

Modern Business is characterized by its emphasis upon finance. The application of sound financial management principles often will be the difference between success and failure in business.

Courses prescribed for those who wish to major in finance are designed to provide a background for financial management of business concerns and, if students desire, to specialize in bank management, corporation finances and investment management. Since financial policies of business enterprises are subject to economic principles which make all businesses financially interdependent and sensitive to disturbances in the economic structure, students in this field should study the economic, as well as the technical, administrative aspects of finance and accounting. Prescribed work in this area attempts to emphasize all three phases of the subject.

All finance majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously. All finance courses for the major require a minimum grade of C.

In addition to university and college requirements cited previously, requirements for finance majors include:

Requirements - Total Credits: 120

Management of Human Resources, B.S.

The Management of Human Resources major is an experiential program designed to help students learn how to develop and manage the human capital of an organization. More organizations are moving toward an understanding that employees are a resource that can be developed into a distinct competitive advantage to ensure organizational success, sustainability, and reputation. Students will be prepared to create policies and practices for effective recruitment, socialization, training, development, compensation, performance management, career planning, and employee relations. Moreover, this major will help employees understand the core purposes of the area of human resource management, which are: (1) recognize the potential of individuals for and within an organization and (2) structure a positive, supportive, constructive work environment that will enable employees to work at their optimal capacity and achieve organizational goals. Students in this major will be prepared to work in a variety of human resource capacities and in other key positions related to employee management, and will understand principles for facilitating others success.

All management of Human Resources majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously. All management courses for the major require a minimum grade of C (not C-).

Marketing, B.S.

Marketing is a societal process and a set of organizational functions for creating, communicating, and delivering value to customers, and for managing relationships in ways to benefit local and global stakeholders. Marketing majors are employed in a wide variety of industries and governmental agencies where understanding and managing customer relationships are critical. Students find jobs in market research, advertising, public relations, professional selling, non-profit marketing, product management, retailing, digital marketing, and brand management.

Professional Sales, B.S.

The Professional Sales major prepares students to manage business clients of for-profit and nonprofit organizations. Specifically, this major provides business students with coursework and opportunities to equip themselves with essential knowledge and skills required to begin professional careers in sales. Careers in sales offer independence, ample financial reward, personal growth and opportunities for rapid advancement within organizations. Students that pursue a degree in professional sales will be challenged with industry engagement opportunities such as internships, and sales competitions. Students experience rigorous classroom experiences designed to develop the knowledge and practical skills needed to succeed during the first years of their sales careers including: oral and written communication skills, selling techniques and networking, the use of sales technology and customer information, and sales pipeline management.

All professional sales majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously. All professional selling courses for the major require a minimum grade of C.

Blockchain Minor

This minor lays the foundation for gaining a competitive advantage in the blockchain ecosystem by providing an understanding of the implications and business opportunities associated with how blockchain and digital assets are affecting global industries. Blockchain, most famous for its application for cryptocurrency, is changing the way we think about money, impacting traditional financial systems and supply chains, and transforming the landscape of legal contracts. The minor will prepare a range of students from different backgrounds to work in any industry that would likely be impacted by blockchain. The flexible nature of the minor allows the student to tailor the program to their primary program of study.

- MKT4590 - Sustainable Business Practices Credits: 3
- ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies Credits: 3

Hospitality Business Management Minor

The Hospitality Business Minor provides students an understanding of the operations of multiple domains of the hospitality industry including food and beverage, tourism and lodging, and entrepreneurship and consumer relations. Knowledge in these areas is critical for anyone desiring to work in the hospitality industry or for a business that services the hospitality industry.

Required Courses

- HOSP 2000 Credits: 3
- HOSP 3000 Credits: 3
- HOSP 4800 Credits: 3
- Any Approved Elective Course within One Core Area Credits: 3
- Any Approved Elective Course within Same Core Area Credits: 3

Minor Total Credits: 15

Approved Elective Courses

(choose any courses totaling 6 credits from one focal core)

* These courses are offered through Casper College via distance education.

- FCSC1141 - Principles of Nutrition Credits: 3
- FCSC1150 - Scientific Study of Food Credits: 3
- FCSC 4900 Credits: 3
- HOSP 2320 Credits: 3 *
- HOSP 2330 Credits: 3 *

- HOSP 2535 Credits: 3 *

- MKT4230 - Integrated Marketing Communication Credits: 3
- MKT4440 - Services Marketing Credits: 3
- SELL3310 - Professional and Technical Selling Credits: 3
- HOSP 1560 Credits: 3 *

Transferrable Electives

Note: FSHM classes are offered in person at Sheridan College in Sheridan, WY HRM classes are offered in person at Central Wyoming College in Jackson, WY.

The following courses are also acceptable transferrable electives but are only offered in person at community colleges around the state:

- FSHM 2520 Credits: 3
- FSHM 2540 Credits: 2
- FSHM 2600 Credits: 2
- FSHM 2610 Credits: 2
- FSHM 2700 Credits: 3
- HRM 1501 Credits: 3
- HRM 1505 Credits: 3
- HRM 1510 Credits: 3
- HRM 1515 Credits: 3
- HRM 2500 Credits: 3
- HRM 2525 Credits: 3
- HRM 2530 Credits: 3

International Business Minor

Required Courses

- INBU1040 - Introduction to International Business Credits: 3
- INBU3110 - Global Business Ethics Credits: 3
- MGT3460 - International Management Credits: 3
- OR**
- MKT4540 - International Marketing Credits: 3

- Any Approved Elective Course Credits: 6

Minor Total Credits: 15

IB Minor Students must participate in a for-credit Education Abroad program, approved through the Global Engagement Office (this may include Faculty-Directed programs, internships abroad, study abroad opportunities, etc.)" *International Students currently studying "abroad" at the University of Wyoming would also meet this requirement. Student must have applied as an international student and must report through the International Student Services Office.

Approved Elective Courses

- ECON1000 - Global Economic Issues Credits: 3
- INBU4900 - Problems in International Business Credits: 1-4
- INBU4910 - Selected Topics in International Business Credits: 3
- MGT3460 - International Management Credits: 3
- MKT4540 - International Marketing Credits: 3
- MGT4600 - Advanced Internship in Business Credits: 1-4
- Upper Division Business Elective Credit Taken Abroad Credits: 3-6
- ANTH2200 - World Culture Credits: 3
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4
- INST2350 - Introduction to Global Studies Credits: 3
- INST4100 - Global Public Health Credits: 3
- POLS2310 - Introduction to International Relations Credits: 3
- RELI1000 - Introduction to Religion Credits: 3
- One Semester in Any Language Credits: 4

Leadership Minor

The Leadership Minor is a unique curricular and co-curricular experience that prepares students to be leaders in every facet of their lives. Through an interdisciplinary curriculum, students acquire the knowledge necessary to develop leadership competencies. Students then test and refine those competencies by earning the Cowboy Leadership Certificate as part of the program.

Leadership Foundations

- LEAD 2110 Credits: 3
- MGT3110 - Business Ethics Credits: 3

Capstone Project

- LEAD 4110 Credits: 3

Leadership Electives

Complete a minimum of 6 credits with courses from the below list

- AGRI4600 - Developing Organizational Leadership Credits: 3
- AGRI4700 - Elements of Leadership Credits: 3
- AIR2010 - Team and Leadership Fundamentals I Credits: 1-0.5
- AIR2020 - Team and Leadership Fundamentals II Credits: 1-0.5
- AIR3010 - Leading People/Effective Communication I Credits: 3
- ARMY2010 - Leadership Skills and Management Credits: 2
- ARMY2020 - Leadership Skills and Small Unit Management Credits: 2
- ARMY2060 - Competent and Confident Leadership Credits: 2
- ARMY3010 - Leadership and Tactics I Credits: 3
- ARMY3020 - Leadership and Tactics II Credits: 3
- CNSL2200 - Introduction to Student Leadership Credits: 2
- CNSL3010 - Student Leadership Strategies Credits: 2
- CRMJ4130 - Leadership and Management in the Criminal Justice System Credits: 3
- ENR2800 - Introduction to Outdoor Leadership Credits: 3
- ERS2000 - Ethics & Leadership Credits: 3
- FCSC4117 - Understanding Community Leadership Credits: 3
- MGT3420 - Organizational Behavior and Leadership Credits: 3
- NURS4830 - Leadership in Healthcare Today Credits: 2
- NURS4835 - Leading Nursing Practice Credits: 2
- GWST1900 - Women and Leadership Credits: 3
- UWYO3000 - Student Leadership in Supplemental Instruction Credits: 2

Extra- and Co-curricular Leadership Experience

- Cowboy Leadership Certification

Minor Total Credits: 15

Professional and Technical Selling Minor

Professional and Technical Selling Requirement

- SELL3310 - Professional and Technical Selling Credits: 3
- SELL4310 - Advanced Selling Credits: 3
- SELL4320 - Sales Force Strategies Credits: 3

Advanced Business Electives

- Any Business Course (3000-level or higher) Credits: 3
- Any Business Course (3000-level or higher) Credits: 3

Minor Total Credits: 15

Real Estate Minor

The real estate market is larger than the stock market or the bond market and its performance has direct or indirect implications on the overall economy and on the financial wellbeing of almost every individual. The real estate minor enables students to gain broad understanding of this sizable and important market and as a result compete for jobs in many real estate related careers such as banking, insurance, real estate management, real estate investment, real estate development, real estate brokerage, real estate appraisal and more.

Real Estate Requirement

- FIN3100 - Real Estate Development Credits: 3
- FIN4800 - Real Estate Finance Credits: 3
- FIN4810 - Real Estate Investment Credits: 3

Real Estate Electives

Complete a minimum of 6 credits with courses from the below list:

- ACCT3100 - Financial Statement Analysis Credits: 3
 - FIN3310 - Investment Management Credits: 3
 - FIN3520 - Financial Markets Credits: 3
 - FIN4510 - Bank Management Credits: 3
 - FIN4540 - Banking Policy Credits: 3
 - FIN4710 - Risk Management Credits: 3
 - MGT4350 - Commercial Law Credits: 3
 - MGT4600 - Advanced Internship in Business Credits: 1-4
- Additional options for electives may be available. Consult your advisor for more options.

Minor Total Credits: 15

Graduate

Accounting, M.S.

The objectives of the master of science in accounting are:

To provide students with an advanced understanding of the field of accounting,

To provide students with specific advanced knowledge of the sub-topics within accounting,

To provide students with professional skills that will enable them to enjoy productive and rewarding careers in accounting and other accounting-related areas.

The program consists of a minimum of 30 semester hours of graduate coursework. Students must complete coursework in accounting and elective business and/or non-business areas. Eighty percent of the student's total coursework must consist of 5000-level courses; the remaining 20 percent may be 4000-level non-accounting courses (approximately six hours). Non-accounting courses should be selected in consultation with the student's graduate adviser. Non-accounting courses at the 4000-level may be taken during the senior year of undergraduate study and applied to the master's program, but they must be reserved for graduate credit and approved by the graduate program director, prior to the first day of such classes.

Core Accounting Courses

Students must take these 4 core accounting courses (minimum 12 credit hours):

- ACCT5030 - Advanced Financial Accounting Credits: 3
- ACCT5040 - Seminar in Managerial Accounting Credits: 3
- ACCT5060 - Auditing II Credits: 3
- ACCT5070 - Tax II Credits: 3

Accounting Elective

Choose 1 of the following:

- ACCT5065 - Fraud Examination Credits: 3
- ACCT5066 - Seminar on Management Fraud Credits: 3

Note(s):

NOTE: ACCT 4010 , 4020, 4050, 4060, 4100, ACCT 4600, ACCT 4900, and 5000 are not applicable for M.S. accounting students' programs of study.

The student must complete the required coursework (both graduate and prerequisite) with a minimum GPA of 3.000 (on a 4.000 scale).

Any student falling below a cumulative GPA of 3.000 is automatically placed on probation for the following semester and must raise their GPA to 3.000 to avoid dismissal.

Students must maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student will be immediately dismissed from the program.

Business Administration, M.B.A.

Degree Requirements

- Thirty-six (MBA-MBA) or fifty-seven (MBA-MBAF) credit hours of graduate coursework, including participation in all MBA Program activities (orientation, Jackson Leadership Summit, MBA Executive Speaker Series, Professional Development, Experiential Leadership Program, etc.). Please note that students enrolled in any dual degree MBA program are required to complete all MBA participation activities and the core coursework.
- This is a cohort based program and while the course sequence is highly structured, there may be the opportunity to extend the duration of the one-year program. Course sequence is subject to change at the discretion of the MBA Director.
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student may be immediately dismissed from the program.

Course of Study

MBA Core Requirements (27 Credit Hours)

Required of all MBA and MBAF students as well as all Dual Degree MBA students.

- MBAM5800 - MBA Topics Credits: 1-3
- MBAM5202 - Data and Decision Modeling Credits: 3
- MBAM5104 - Organization Behavior and Human Resource Management Credits: 3
- MBAM5208 - Managerial Accounting Credits: 3
- MBAM5204 - Financial Management Credits: 3
- MBAM5207 - Marketing Management Credits: 3
- MBAM5102 - Operations Management Credits: 3
- MBAM5330 - Global Business Environment Credits: 3
- MBAM5107 - Decision Making I Credits: 1
- MBAM5209 - Decision Making II Credits: 1
- MBAM5106 - Professional Development I Credits: 0
- MBAM5206 - Professional Development II Credits: 0
- MBAM5305 - Strategic Management Credits: 3

MBA Elective Requirements

- MBA-MBA students, including dual degree students, must take an additional 9 credit hours of 4000 or 5000 level College of Business courses (3 credit hours outside the College of Business may be approved on a case-by-case basis).
- MBA-MBAF students must take an additional 30 credit hours of 4000 or 5000 level Business courses with a minimum of 21 of those credits being Finance courses. Three (3) credit hours of graduate level courses outside of the College of Business may be considered on a case-by-case basis.

**Note: A maximum of 12 credit hours may be taken at the 4000 level for graduate credit.*

Business Administration, Online, M.B.A.

Degree Requirements

- 30 credit hours of graduate credit as outlined in the Course of Study.
- Concentration Available: Energy (EMN)
- This is a cohort based program. The course sequence is highly-structured and all course requirements must be completed in their prescribed manner. Course sequence is subject to change, in extremely rare circumstances, at the discretion of the MBA Director.
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, student will be immediately dismissed from the program.

Prerequisite Courses

Prerequisite coursework may be requested based on experience and undergraduate coursework at the discretion of the MBA Program Director. Please contact the MBA Program office for transcript analysis and resume evaluation prior to beginning any prerequisite course work.

Academic Requirements

Students must maintain a cumulative GPA of 3.000 in the MBA Program to remain in "good standing". If a student's GPA falls below 3.000, he or she is automatically placed on academic probation; the student must raise their cumulative GPA to 3.000 the following semester to avoid dismissal from the program. Other requirements involving program dismissal include:

- A student who earns a grade lower than a "C" in any course is dismissed from the program

Course of Study

MBA Core Requirements (21 Credit Hours)

Required of all MBAX students.

- MBAX5204 - Financial Management Credits: 3
- MBAX5207 - Marketing Management Credits: 3
- MBAX5202 - Data and Decision Modeling Credits: 3
- MBAX5104 - Organizational Behavior & Human Resource Management Credits: 3
- MBAX5330 - The Global Business Environment Credits: 3
- MBAX5208 - Managerial Accounting Credits: 3
- MBAX5305 - Strategic Management Credits: 3

MBA Elective/Concentration Requirements

- MBA-MBAX students must take an additional 9 credit hours of 5000 level College of Business courses.
- Energy Concentration students will complete the additional 9 credit hours of coursework as follows:
 - ACCT 5503 Fundamentals of Accounting in the Energy Industry. 3.
 - MGT 5504 Energy Industry Value Chain. 3.
 - FIN 5502 Energy Finance: Project Evaluation. 3.

Economics, M.S.

Program Specific Degree Requirements

A minimum of 18 hours in economics is required; at least 15 of these must be at the 5000 level. A basic core sequence of ECON 5010 (macro), ECON 5390 (math micro), ECON 5530 (computational), ECON 5230 (econometrics), and ECON 5300 (game theory) is required, which completes 15 hours of 5000-level courses, which is required.

The student must complete 26 hours of coursework and 4 hours of ECON5960 - Thesis Research for the Plan A option. The student must complete 30 hours of coursework and a shorter paper for the Plan B option.

Students may take 4000-level courses for graduate credit up to 6 hours.

A maximum of 6 semester hours of graduate coursework not used toward any other degree from another institution may be applied to the M.S. economics program subject to regulations regarding transfer of credit listed in this bulletin and with the approval of the director of graduate studies.

At the beginning of the third semester, the student selects a major professor who directs the Plan A or Plan B research. A graduate committee, nominated by the major professor, the student, and the department chair, conducts an oral examination of the student on the paper or thesis and area he/she has studied in the program. A favorable report by the committee and approval by the Office of the Registrar complete the degree requirements.

The majority of students complete the M.S. degree within two years.

QuickStart Master of Science in Economics

UW undergraduates can complete the M.S. degree in just one year after completing their B.S. degree if they apply to the QuickStart M.S. program in their junior year. To be eligible, students must have (and maintain) a cumulative GPA of 3.200 or better as well as an Economics GPA of 3.200 or better. They are also required to take the GRE by the fall of their senior year and score above 300 combined on the verbal and quantitative sections combined. Admission to the QuickStart program allows students to double-count 6 credits of courses taken as an undergraduate towards both the B.S. and M.S. degrees, and reserve an additional 6 credits of courses taken as an undergraduate towards the M.S. degree alone. This then leaves only 18 credits to be taken after completion of the B.S. degree, which is feasible in just one year.

Economics, Ph.D.

The doctor of philosophy degree in the field of economics at the University of Wyoming requires a minimum of 42 hours of coursework. All coursework must be at the graduate (5000) level.

The program is designed to give the student a strong foundation in economic theory and the basic quantitative tools necessary for professional research. If students receive a grade lower than a B+ during their first year, they must take a comprehensive exam in that field (microeconomics and/or econometrics) during the summer to continue to the second year of the PhD program. The program's qualifying exam takes the form of a research paper written during the second summer and defended to, and approved by, a faculty committee by early in the third year, with revisions and resubmission required by December. Students who pass the qualifying paper requirement receive an MS degree and move on in the PhD program, while students who fail this requirement receive the MS degree and fail out of the PhD program.

During the third year, or no later than the first few weeks of the fourth year, a graduate committee nominated by the student's major professor and the director of graduate studies conducts an oral examination of the student. The purpose of the oral examination is to determine whether the student has formulated a workable dissertation project and has the necessary skills to complete it.

Following successful completion of the dissertation, and completion of a departmental requirement of 30 hours of dissertation research, the student presents an oral defense to the graduate committee. The doctor of philosophy degree is granted on recommendation of the committee and approval by the Office of the Registrar, providing all other requirements have been satisfactorily fulfilled.

Finance, M.S.

The program consists of a minimum of 30 semester hours of graduate coursework. Students must complete coursework in finance and elective business and/or non-business areas. Eighty percent of the student's total coursework must consist of 5000-level courses; the remaining 20 percent may be 4000-level non-finance courses (approximately six hours). Non-finance courses should be selected in consultation with the student's graduate advisor. Non-finance courses at the 4000-level may be taken during the senior year of undergraduate study and applied to the master's program, but they must be reserved for graduate credit and approved by the graduate program director, prior to the first day of such class.

A maximum of six hours may come from 4000-level courses offered in the College of Business or in other colleges at the University of Wyoming.

The student must complete the required coursework with a minimum GPA of 3.000 (on a 4.000 scale).

Student must maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, student will be immediately dismissed from the program.

Any student falling below a cumulative GPA of 3.000 is automatically placed on probation for the following semester and must raise their GPA to 3.000 to avoid dismissal.

General Finance Track

- FIN5310 - Advanced Investment Analysis Credits: 3
- FIN5400 - Advanced Financial Modeling Credits: 3
- 15 credit hours Finance Electives
- 9 credit hours other business electives
Maximum of 6 credit hours can be at a 4000 level.

CFP Track

- FIN5070 - Tax Planning for Financial Planners Credits: 3
- FIN5310 - Advanced Investment Analysis Credits: 3
- FIN5400 - Advanced Financial Modeling Credits: 3
- FIN5720 - Insurance and Retirement Planning Credits: 3
- FIN5750 - Fundamentals of Financial Planning Credits: 3
- FIN5780 - Estate Planning Credits: 3
- FIN5800 - CFP Capstone Credits: 3
- 9 credit hours of finance electives (maximum of 6 credit hours at 4000 level)

Marketing, Ph.D.

The Department of Management and Marketing offers a program leading to a Doctor of Philosophy in Marketing. The program of study draws from extant marketing theory, primarily in consumer behavior, combined with studies in the basic sciences (e.g., anthropology, psychology, sociology) and other applied sciences (e.g., environmental sciences) to create a base of knowledge acceptable for marketing scholarship in higher education, and a depth of knowledge conducive to a stream of publishable research in a specific topic area. Theoretical development is supplemented with course work in the gathering and analysis of qualitative and quantitative data, which prepares the student for rigorous exploration of marketing phenomena. Students are required to complete 72 semester hours and a scholarly dissertation that contributes to the knowledge foundations in marketing and contributes to the basic sciences that informed the inquiry. Semester hours will include core marketing classes, outside elective courses in statistics, basic social sciences, and/or interdisciplinary studies in environmental and natural resources, and dissertation work. First and second year research projects are also required, aimed at the student having published articles in respected marketing and social science journals before program completion. Comprehensive exam is completed at the end of the second semester. All doctoral students are expected to teach while enrolled in the program. The program is designed to give students a strong research background and intensive teaching experience.

We begin accepting applications in October for the following fall semester. All completed applications must be submitted by February 1st. Admission requirements include:

- A Bachelor's Degree and (be working toward or have completed) a Master's Degree from an accredited institution, preferably in business or a core social science discipline
- Completed application (i.e., all required materials submitted) on the UW Graduate Programs Applications system
- Copies of all undergraduate and graduate program transcripts scanned and uploaded to the UW system, and official transcripts from each post-secondary institution attended submitted to the UW admissions office
- A valid GRE or GMAT score. A scanned copy of the unofficial results must be uploaded to the UW system, and official scores must be requested from the testing organization and sent to UW

- Three strong letters of recommendation from research-active academicians. The letters must be uploaded by the recommenders to the UW system in MS Word or .pdf format. Please use this form
- A personal statement summarizing your interest in pursuing doctoral studies and speaking to questions or issues you wish to research. This document must be uploaded to the UW system as an MS Word or .pdf document
- For international students, Test of Foreign Language (TOEFL) scores are required. A scanned copy of the unofficial results must be uploaded to the UW system, and official scores must be submitted to UW from the testing organization. A minimum TOEFL score of 76 (online) or 540 (paper) is required for admission
- \$50 application fee paid to University Admissions

Certificate

Certified Financial Planning Certificate (Graduate)

Program Overview, CFP Certificate

The Certificate in Certified Financial Planning is composed of 18-credits of masters-level graduate coursework in the College of Business, with the primary goal of providing students with the education, training, and skills necessary to be able to sit for the Certified Financial Planner (CFP) examination. The curriculum is aligned with the CFP® Board's Principal Knowledge Topics and covers principles and practices of essential areas of financial planning, including:

- Wealth Management
- Investment Management
- Tax Planning
- Estate Planning
- Insurance and Retirement Planning

CFP Certificate Requirements

- FIN5070 - Tax Planning for Financial Planners Credits: 3
- FIN5310 - Advanced Investment Analysis Credits: 3
- FIN5720 - Insurance and Retirement Planning Credits: 3
- FIN5750 - Fundamentals of Financial Planning Credits: 3
- FIN5780 - Estate Planning Credits: 3
- FIN5800 - CFP Capstone Credits: 3
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student will be immediately dismissed from the program.

Energy Business Certificate (Graduate)

Program Overview, Energy Business Certificate

The Certificate in Energy Business is composed of 9-credits of masters-level graduate coursework in the College of Business, with the primary goal of achieving mastery and professional skills common to functional business roles within the energy industry. Specifically:

- Develop a working understanding of the concepts and practices of Supply Chain Management to make strategic support decisions within the energy industry.
- Acquire the foundation necessary to work in the energy industry as a financial statement analyst, manager, auditor, or accountant.
- Utilize core capital budgeting, techno-economic cashflow modeling and other finance concepts to evaluate energy industry project investments.
- Demonstrate effective problem solving, written, and oral communication skills in the context of the energy industry.

Certificate Requirements

- FIN5502 - Energy Finance: Project Evaluation Credits: 3
- ACCT5503 - Fundamentals of Accounting in the Energy Industry Credits: 3
- MGT5504 - Energy Industry Value Chain Credits: 3
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student will be immediately dismissed from the program.

The College of Education prepares teachers, counselors, administrators and other service personnel for positions in public education in Wyoming, throughout the nation, and the world. The teacher education program incorporates content area courses from the various colleges on campus with experiences in educational methodology. Programs are designed to provide students with a maximum amount of experience in the classroom.

Graduates of the College of Education are prepared to deal with youth growing up in a rapidly changing world. Programs are experiential, collaborative, outcomes based, and technologically supported. Emphasis is placed on professional ethics, a commitment to lifelong learning, and respect for all individuals in our culturally diverse society.

Master of Science

Master of Science in Counseling

Master of Arts

Doctor of Philosophy

Doctor of Education

Doctor of Counselor Education and Supervision

Accreditation

The College of Education, a member of the American Association of Colleges of Teacher Education, is currently accredited by the National Council for the Accreditation of Educator Preparation (CAEP) and is moving toward the Association for Advancing Quality in Educator Preparation (AAQEP) in 2023-2024. The Wyoming Professional Teaching Standards Board (PTSB) and the North Central Association of Colleges and Schools approve the college as an accredited teacher-preparing institution. The Counseling programs are fully accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Organization of the College

The College of Education includes undergraduate teacher education and graduate studies in education. Schools offering undergraduate and graduate programs in the college include Teacher Education and Counseling, Leadership, Advocacy, and Design.

Undergraduate and graduate education are supported by several units. The Teacher Preparation and Advising Office, McWhinnie Hall room 100, coordinates activities dealing with academic advising, field experiences, and teacher licensure.

The Wellspring Counseling Clinic provides counseling services to students, staff, faculty of the university, as well as the community at-large.

The College of Education, College of Arts and Sciences, Wyoming community colleges, many Wyoming districts, the Wyoming Professional Teaching Standards Board, and the Wyoming Department of Education are part of the Wyoming School-University Partnership, which grounds collaborative efforts across the state related to K-12 preservice and inservice education.

The Laboratory School, an Albany County School District entity, serves the college, the university, the school district, and the state as an educational center for research, development, instructional advancement, and inservice education. The school enrolls students in pre-school through eighth grade.

Computer laboratories in the college feature a wide range of capabilities including Internet access. The laboratory equipment is frequently updated to serve the needs of students, faculty and staff.

The Learning Resource Center is a branch of the university library system. Educational materials are available to serve the needs of K-12 students, university students, university faculty and public school faculty in Wyoming

B.A. and B.S. degrees in the College of Education are housed in the School of Teacher Education and consist of increasingly demanding phases of professional preparation. Competencies based on professional standards, including those mandated by the Wyoming Professional Teaching Standards Board (PTSB), are addressed developmentally. A teacher candidate graduating from this program will have mastered competencies required by the PTSB and the education profession.

Freshman year (Preprofessional): Students concentrate on the University Studies Program requirements. EDST2450 - Foundations of Development and Learning, must be completed prior to moving on.

All incoming students pursuing teacher certification and/or teacher endorsement programs must undergo an initial criminal background check prior to full admission to the teacher education program. A second background check is included as part of the state application process for the Wyoming Substitute Teaching Permit, which is required for continuation in the B.A. and B.S. programs.

Sophomore students are introduced to teaching and learning through EDST3480 - Diversity & the Politics of Schooling . This course includes a field experience in a public school setting.

A junior-level experience extends student competence through EDST3100 - Teacher as Practitioner. The practicum experience is in a public school guided by practicing K-12 faculty.

A two-semester sequence in the final year consists of pedagogy course work and fieldwork in the first semester. The second semester consists of a 16-week, fulltime classroom experience. Field experiences are completed in districts that are members of the Wyoming School-University Partnership.

Graduate certificate teacher licensure program students must have a cumulative GPA of 2.750 or higher from UW or from another accredited college or university, in order to declare a major in Education. A valid Wyoming Substitute Teaching Permit will be required, which will also serve as an approved background check.

Teacher education programs in Music, Art, Physical Education and Health are offered in other colleges at UW.

Faculty in the College of Education

School of Counseling, Leadership, Advocacy, and Design

School Director: Peter Moran

Associate Professors:

KARA L. CARNES-HOLT, B.A. East Texas Baptist University 2000; M.S. Ed. Baylor University 2003; Ph.D. University of North Texas 2010; Associate Professor of Counselor Education 2016, 2010.

COURTNEY McKIM, B.S. Boise State University 2006; Ph.D. University of Nebraska 2011; Associate Professor of Educational Research 2020, 2011.

MICHAEL M. MORGAN, B.S. Brigham Young University 1993; M.S. Auburn University 1995; Ph.D. Purdue University 2003; Associate Professor of Counselor Education 2011, 2003.

LINDSEY NICHOLS, B.S. University of Connecticut 2002; M.A. University of Connecticut 2003; M.Ed. University of North Carolina at Chapel Hill 2006; Ph.D. Pennsylvania State University 2012; Associate Professor 2019.

W. REED SCULL, B.S. St. Louis University 1983; M.A. University of Nevada-Reno 1989; Ed.D. University of Arizona 1994; Associate Professor 2019.

Assistant Professors:

WILLIAM CAIN, B.A. University of Texas 1994; Ph.D. Michigan State University 2018; Assistant Professor 2018.

JONTHAN CARRIER, B.S. East Tennessee State University 1999; M.S.E. Portland State University 2002; Ph.D. University of the Cumberland 2017; Assistant Professor of Higher Education Administration, 2020.

RICHARD CARTER, B.S. Western Carolina University 2010; M.S.E. 2012; Ph.D. University of Kansas 2016; Assistant Professor of Special Education 2017.

AMANDA DeDIEGO, B.S. University of North Georgia 2009; M.S. 2012; Ph.D. University of Tennessee 2016; Assistant Professor of Counselor Education 2016.

BARBARA HICKMAN, B.A. University of Minnesota 1985; B.S. University of Minnesota 1986; M.A. Saint Mary's College 1997; Ed.D. Northern Arizona University 2017; Assistant Professor 2019.

JIHYUN LEE, B.A. Daegu University 2006; M.Ed. Korea National University 2012; M.S. University of Wisconsin-Madison 2014; Ph.D. University of Texas-Austin 2018; Assistant Professor 2019.

ROBERT MADDOX, B.S. Missouri State University 2005; M.A. Southeast Missouri State University 2009; Ed.S. Southeast Missouri State University 2011; Ph.D. University of Wyoming 2015; Assistant Professor 2019.

LAY-NAH BLUE MORRIS-HOWE, B.S. University of Wyoming 2004; M.S. 2007; Ph.D. 2011; Assistant Professor of Counselor Education 2015.

MARK PERKINS, B.A. Ft. Lewis College 2001; M.A. University of Colorado-Denver 2009; Ph.D. Colorado State University 2014; Assistant Professor of Educational Research, 2020.

MIA WILLIAMS, B.S. Northern Arizona University 1995; M.Ed., 1999 Ph.D 2008 Arizona State University Assistant Professor 2020.

Associate Professional Lecturer:

TIFFANY HUNT, B.S. University of Wyoming 2001; M.S. University of Northern Colorado 2006, Ph.D. 2017; Assistant Professional Lecturer of Special Education 2014.

Professors Emeritus

Martin Agran, Mary Alice Bruce, John Cochenour, Ace Cossairt, Kay Cowie, Michael Day, Deborah McGriff, Alan Moore, Kay Persichitte, Suzanne Young.

School of Teacher Education

School Director: Alan Buss

Professors:

STEVEN M. BIALOSTOK, B.A. University of the Pacific 1975; M.S.W. California State University - Sacramento 1986; Ph.D. University of Arizona 1999; Professor of Elementary and Early Childhood Education 2015, 2000.

TIMOTHY F. SLATER, B.S. Kansas State University 1989; B.S. Ed. 1989; M.S. Clemson University 1991; Ph.D. University of South Carolina 1993; Professor of Secondary Education 2008. Wyoming Excellence in Education Science Education Chair 2008.

ALLEN TRENT, B.A. Eastern Kentucky University 1986; M.S. University of Dayton 1992; Ph.D. The Ohio State University 2000; Professor of Elementary and Early Childhood Education 2012.

Associate Professors:

TAO HAN, B.A. Sungshin Women's University, Korea 1984; M.A. University of Arizona 1993; M.A. University of Nevada-Reno 2002; Ph.D. 2006; Associate Professor of Elementary and Early Childhood Education 2016, 2010.

ANA HOUSEAL, B.A. University of Iowa 1985; M.A. University of Northern Iowa 1998; Ph.D. University of Illinois 2010; Associate Professor of Elementary and Early Childhood Education 2017, 2011.

LINDA HUTCHISON, B.A. Humboldt State University 1978; M.A. Stanford University 1986; Ph.D. University of Washington 1992; Associate Professor of Secondary Education 2000, 1993.

TRICIA JOHNSON, B.S. Lehigh University 1991; M.Ed. 1993; Ed.S. George Washington University 1997; Ed.D. Columbia University 2004; Associate Professor of Elementary and Early Childhood Education 2012.

PATRICK MANYAK, B.A. Pepperdine University 1988; M.S. 1990; Ph.D. University of Southern California-Los Angeles 2001; Associate Professor of Elementary and Early Childhood Education 2007, 2001.

AMY ROBERTS, B.S. Indiana University 1986; M.A. Portland State University 1991; Ph.D. Indiana University 1996; Associate Professor of Elementary and Early Childhood Education 2004, 1998.

KATHERINE MUIR WELSH, B.A. University of California-Berkeley 1986; Single Subject Teaching Credential (Life Sciences) University of California-Santa Barbara 1990; Ph.D. University of California-Los Angeles 2002; Associate Professor of Elementary and Early Childhood Education 2008, 2002.

Assistant Professors:

ALI BICER, B.S. Celal Bayar University 2006; M.S. Texas A&M University 2012; Ph.D. 2016; Assistant Professor of Elementary and Early Childhood Education 2019.

TODD REYNOLDS, B.A. University of Northern Colorado 1998; M.A. 2004; Ed.S. 2008; Ph.D. University of Wyoming 2015; Assistant Professor of Secondary Education 2019.

ALISON MERCIER, B.S. North Carolina State University 2000; M.S. University of North Carolina 2020; Assistant Professor of Secondary Education 2020.

Senior Lecturers:

NIKKI BALDWIN, B.A. University of Wyoming 1994; M.A. 2005; Senior Lecturer of Elementary and Early Childhood Education 2020, 2009.

KIMBERLY GUSTAFSON, B.A. University of Wyoming 1998; M.A. 2003; Ed.D. 2010; Senior Lecturer of Elementary and Early Childhood Education 2019, 2007.

AMY SPIKER, B.A. University of Wyoming 1989; M.A. 2004; Senior Lecturer of Elementary and Early Childhood Education 2016, 2007.

Associate Lecturers:

JASON KATZMANN, B.S. Texas Women's University 1994; M.A. Colorado College 2000; Ph.D. University of Northern Colorado 2007; Assistant Professor of Educational Studies 2016, 2007.

ROD THOMPSON, B.A. University of Nebraska at Kearney 1991; M.A. University of Northern Iowa 1998; Associate Lecturer of Educational Studies 2019.

Assistant Lecturers:

LINDSEY FREEMAN, B.S. University of Wyoming 2011; M.A. 2018; Assistant Lecturer of Educational Studies 2019.

JENNIFER GERINGER, B.A. University of Texas - San Antonio 1991; M.S. University of Wyoming 1997; Ph.D. 2001; Assistant Lecturer of Elementary and Early Childhood Education 2015.

JANET LEAR, B.S. University of Wisconsin-Madison 1990; M.A. University of California, Berkeley 1998; Ph.D. University of Denver 2017; Assistant Lecturer of Educational Studies 2019.

ROCHELLE MCCOY, B.A. Western Governors University 2006; M.A. 2012; Assistant Lecturer of Elementary and Early Childhood Education 2019.

JOSEPH SCHROER, B.A. University of Cincinnati 2002; B.S. 2005; M.A. 2001; Ph.D. 2007; Assistant Lecturer of Educational Studies 2019.

Professors Emeritus:

Michelle Buchanan, Barbara A. Chatton, Margaret Cooney, Lydia Dambekalns, Judith Z. Ellsworth, Patricia McClurg, R. Timothy Rush

Admission to the B.A. and B.S. Programs in the College of Education

New first-time students who meet the University of Wyoming's standards for admission may declare their major in Elementary Education, Secondary Education in a specific content area, or Education Undecided (EDUD), provided that they have a minimum ACT Composite score of 21 and an ACT Math score of 21 or a minimum new SAT combined score of 1060 with a minimum SAT Math score of 530. A lower ACT/SAT Math score can be replaced by a Math Placement Examination (MPE) score of 2 or higher. Education Undecided majors should decide on a specific content area no later than the first semester of their sophomore year.

All incoming students pursuing teacher certification and/or teacher endorsement programs must undergo an initial criminal background check prior to full admission to the College of Education. A second background check is included as part of the state application process for the Wyoming Substitute Teaching Permit, which is required for continuation in the B.A. and B.S. programs.

For those students who do not meet the above admissions requirements, it is suggested that they major in exploratory studies (EXPL) so that they will receive more appropriate advising and access to support services through Advising, Career and Exploratory Studies until they have attained a minimum 2.750 UW grade point average (with at least 15 UW credits), and successfully complete an approved background check.

Current UW students who wish to change their major to Education but do not yet have a UW grade point average must wait until they meet the requirement of a minimum 2.750 UW grade point average, with at least 15 UW credits posted to their transcript. It is recommended that they complete a Program Change form and contact the Teacher Preparation and Advising Office in McWhinnie Hall, room 100 to initiate the background check process. Students' progression through the Education curriculum could be delayed until all requirements are fulfilled and their major officially changed to Education.

Transfer students from out of state institutions, as well as from Wyoming community colleges wishing to declare a major in Education must have completed a minimum of 15 transferable credits. Transfer students must have a minimum Transfer GPA of at least 2.750 and successfully complete an approved background check.

For transfer students not meeting these requirements, it is suggested that they major in exploratory studies (EXPL) so that they will receive more appropriate advising and access to support services through Advising, Career and Exploratory Studies until they meet requirement of a minimum 2.750 UW grade point average (with at least 15 UW credits), and successfully complete an approved background check.

Re-admitted students who return to UW after two or more semesters away, and wish to (re-)declare a major in Education, must have a minimum 2.750 UW GPA (with at least 15 UW credits) to do so and successfully complete an approved background check.

Academic Advising

Students are assigned an academic adviser who will assist in planning a program combining University Studies requirements, core content requirements, and professional education courses. Students are expected to consult with their adviser regularly. The Teacher Preparation and Advising Office coordinates advising and provides students and faculty with assistance in areas related to academic advising.

Degree Program Curricula

The following curricula summarize the programs offered by the College of Education. Students complete content courses in their major as well as professional education courses, some of which can also be counted toward their University Studies Program requirements. The University Studies Program requirements include:

- Communication I (COM1) Credits: 3
- Communication II (COM2) Credits: 3
- Communication III (COM3) Credits: 3
- First-Year Seminar (FYS) Credits: 3
- Human Culture (H) Credits: 6
- Physical and Natural World (PN) Credits: 6
- Quantitative Reasoning (Q) Credits: 3
- U.S. & Wyoming Constitutions (V) Credits: 3

The minimum total credit hours required to complete a degree in Education is 120. Of the minimum credit hours required to complete a program, 42 credit hours must be completed at the upper division level (3000-level or higher), with 30 of those credits being completed at UW. Additional College of Education requirements are:

1. 2.750 UW Total Institution grade point average
2. 2.500 grade point average in the content courses required for each specific major
3. A valid Wyoming substitute teaching certificate

Further information on each program is available in:

Teacher Preparation and Advising Office
 McWhinnie Hall room 100
 Dept. 3374, 1000 E. University Ave.
 Laramie, WY 82071
 (307) 766-2230

Acceptability of Coursework

Courses taken to satisfy professional education requirements and major content requirements must be taken for a conventional grade (A-F) unless offered for S/U grading only.

Professional education courses taken prior to the last 10 years will not be accepted in a degree and/or teacher certification program. The College of Education does not accept transfer credits for Professional Education or content area courses with equivalents at UW when the grade earned was less than a C. Please note that grades of C- will not satisfy this requirement.

The College of Education does not accept either teaching methodology or student teaching coursework or credits completed at other colleges or universities.

Student Responsibility

College of Education students are responsible for knowing and meeting graduation requirements. Students are expected to maintain a 2.750 UW Total Institution grade point average to continue in the professional education sequence and to graduate. Prior to enrolling in professional education courses, students are expected to have met the specific program and course prerequisites as listed in this publication. Students are expected to make reasonable academic progress toward completion of a degree.

Teaching Endorsements

A teaching endorsement is not a standalone teacher certification program. Endorsements are issued by the Wyoming Professional Teaching Standards Board (PTSB) to state-licensed Elementary (K-6) and Secondary (6-12) teachers qualified to teach in specific subject areas, in addition to their initial certification(s).

Endorsements to Teach Additional Science Subjects

By state statute, the University of Wyoming's College of Education is allowed to provide institutional recommendations for add-on endorsements in Biology, Chemistry, Earth Science, and Physics to those who have completed programs leading to licensure in secondary-level Science content areas.

Graduate Study

The two schools of the College of Education provide support for master's and doctoral degree programs as well as graduate certificates. Faculty and staff work to deliver these programs by providing campus-based courses, courses taught through video conferencing, courses taught on-site at different locations in Wyoming, courses taught online, and courses taught in hybrid formats.

The College of Education is dedicated to offering high quality graduate programs that will provide students with the necessary skills to become educational leaders within their areas of specialization and expertise. All graduate students in the College of Education are expected to become scholars, researchers, and practitioners. They must, therefore, be knowledgeable about the ever-changing literature and research in education, the characteristics and needs of learners, and methods for facilitating learning. They must also understand the process of change and how to facilitate changes in learning settings that reflect what is known about the teaching/learning process. These skills are important to all graduate students, regardless of their areas of specialization or major emphasis.

Degree Programs

College of Education programs fall under one of the following university approved graduate degree titles:

- Master of Arts
- Master of Science
- Master of Science in Counseling
- Doctor of Education (Ed.D)
- Ph.D. in Education
- Ph.D. in Counselor Education and Supervision
- Ph.D. in Curriculum and Instruction

Master's Programs

There are three master's programs in the College of Education and two of the three have additional specialization areas. They are designed to provide advanced study for educational professionals. Consult each school (School of Teacher Education and School of Counseling, Leadership, Advocacy, and Design) for program requirements and expectations.

Doctoral Programs

Doctor of Education (Ed.D.)

The College of Education Ed.D. program prepares students for scholarly inquiry and professional leadership in education. The program consists of (1) applied research, (2) courses and professional experiences in education and related fields designed to develop a comprehensive academic basis for leadership roles in education, and (3) applied professional experiences tailored to individual needs and career goals. Each student works closely with an adviser and a supervisory faculty committee to select courses, topics of research, and professional opportunities.

Preparation in the above areas combine to:

Convey deep scholarly knowledge of education and foster its application in practice;
 Promote a broad understanding of various methods of inquiry in education and foster its application in practice settings;
 Advocate practices that demonstrate a commitment to diversity in education;
 Foster ethical and professional research and practice in education;
 Promote excellence in applied professional practice.

The degree of Doctor of Education (Ed.D.) is offered to competent students who wish to pursue a program of study and to participate in appropriate activities in preparation for professional service and leadership in education. The program is designed to meet the needs of those for whom intensive research is not a practical prerequisite to professional goals. Doctoral students are expected to participate not only in organized coursework but also in other activities that will ensure breadth of outlook and technical competence.

Major: EDUCATION

CONCENTRATIONS in the Ed.D. of Education are:

Education, Ed.D., Concentration in Curriculum and Instruction

Education, Ed.D., Concentration in Educational Leadership

Education, Ed.D., Concentration in Higher Education Administration

Education, Ed.D., Concentration in Learning, Design, and Technology

Education, Ed.D., Concentration in Mathematics Education

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students

- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Ph.D. in Education and Ph.D. in Curriculum and Instruction

The College of Education Ph.D. program prepares students for careers of scholarly inquiry and teaching in higher education. The program consists of (1) continuous research or inquiry, (2) courses and professional experiences in education and related fields designed to develop a comprehensive academic basis for future work in research and teaching, and (3) teaching and other related experiences tailored to individual needs and career goals. Each student works closely with an adviser and a supervisory faculty committee to select courses, topics of research and inquiry, and teaching experiences.

All coursework in the Ph.D. in Education program addresses the following goals:

To convey deep scholarly knowledge of education and related fields

To promote a broad understanding of various methods of inquiry in education and develop competency in several of those methods

To advocate practices that demonstrate a commitment to diversity in education

To foster ethical and professional research and practice in education

To promote excellence as a college teacher

Effective preparation for the Ph.D. stems from collaborative research and inquiry into topics of mutual interest by students and faculty scholars/researchers. A major portion of the program consists of the individual student and selected faculty members(s) jointly engaged in research and inquiry. Successful Ph.D. applicants tend to have high aptitude for research and inquiry and express interest in general topics which the faculty of the college are actively inquiring and researching.

Major: EDUCATION

CONCENTRATIONS in the Ph.D. in Education are:

Education, Ph.D., Concentration Learning, Design, and Technology

Major: CURRICULUM and INSTRUCTION, Ph.D

CONCENTRATIONS in the Ph.D. in Curriculum and Instruction are:

Curriculum and Instruction, Ph.D., Concentration in Curriculum Studies_

Curriculum and Instruction, Ph.D., Concentration in Literacy Education

Curriculum and Instruction, Ph.D., Concentration in Mathematics Education _

Curriculum and Instruction, Ph.D., Concentration in Science Education

Counselor Education and Supervision, Ph.D.

The PhD program in Counselor Education and Supervision is CACREP accredited and prepares professionals for positions as faculty in Counselor Education departments through personalized, developmentally oriented coursework emphasizing the integration of theory and experiential learning. This doctoral program is ideal for self-initiating persons who thrive in an atmosphere supportive of faculty/student interactions, small class environments, intensive class discussions and opportunities for self-direction and scholarly activity. The doctoral program is built upon the basis of a strong Master's program and upholds the philosophical orientations, coherent principles, and applied knowledge and skills as counselors and supervisors.

The doctoral degree program is 60 credit hours for individuals who have completed a 60-hour CACREP master's program. Students with a 48-hour CACREP master's degree are required to complete an additional 12 semester credits. Students, through coursework, practica and faculty guidance, develop competencies in the areas of counseling, supervision, teaching, leadership, advocacy, research and scholarship.

Learner Outcomes

Doctoral Students in the Counselor Education and Supervision will demonstrate the following learner outcomes.

1. **Academic and Professional Goals:** Students will demonstrate a clear vision of their professional and academic goals and academic preparation by developing and completing an approved program of study that meets the standards set forth by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).
2. **Professional Licensure:** Students will obtain professional licensure as a Licensed Professional Counselor (LPC) in the state of Wyoming and/or develop a plan to obtain licensure for the state in which they intend to relocate upon graduation.

3. **Democratic Perspectives:** Students will demonstrate development as a culturally competent, creative, skilled & ethical counselor, supervisor and educator including the areas of advocacy, leadership, social justice, and promotion of caring communities.
4. **Research and Scholarship:** Students will develop a professional identity as an academic researcher by demonstrating a clear and active research agenda that includes a plan of action for professional presentations and manuscripts.
5. **Professional Development:** Students will develop a clear and diligent plan to becoming a skilled, ethically competent counselor educator.

Program Specific Admission Requirements

Applications for the Doctor of Philosophy (PhD) program in Curriculum and Instruction with a concentration in Curriculum Studies are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- Letter of intent;
- Recent GRE scores, current within the last five years;
- Three letters of recommendation;
- Academic Resume/Curriculum Vitae, including information about teaching experience;
- Transcripts;
- TOEFL scores (for international, nonnative English speaking applicants). *Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Applications for the Doctor of Philosophy (PhD) program in Curriculum and Instruction with a concentration in Literacy Education are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- Current resume or vita;
- A detailed letter that expresses why the applicant wishes to pursue a PhD in Literacy Education, including the applicant's career goals; the applicant's prior experiences in literacy or literacy education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to literacy; potential areas of focus in a literacy doctoral program; potential research interests; and any other information the applicant considers to be relevant to her or his admission;

- Three Letters of Recommendation from those who can speak to the applicant's intellect, scholarly abilities, teaching ability, or other qualifications for doctoral study. These letters typically would be former professors, supervisors, or administrators;
- An official report of the Graduate Record Examination (GRE) that was taken within the preceding 5 years;
- An academic writing sample is not required, but is preferred.
- Transcripts;
- TOEFL or IELTS score is required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Minimum 3.000 GPA on a 4.000 scale on the applicant's bachelor's from an accredited institution, plus transcripts from all other schools attended.
- Interview with Literacy Education Program faculty, either in person or via telephone
- Master's degree is preferred.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL scores of 540 (paper-based test), 76 (internet-based test), 197 (computer based test) or IELTS scores of 6.5 higher are required for international, non-native English speaking applicants. Minimum scores do not guarantee admission. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Applications for the Doctor of Philosophy (PhD) program in Curriculum and Instruction with a concentration in Mathematics Education are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- Writing sample (an article, master's thesis, or well-done project/course paper);
- An application letter, which discusses yourself, your experience, and your potential research interests;
- A resume or curriculum vita;
- Three letters of reference;
- Transcripts from all universities attended. Unofficial transcripts can be loaded to the online application system, but if admitted to the University, official transcripts will need to be sent prior to beginning the program
- Copy of GRE scores
- International, non-native English speaking students must submit scores for a language proficiency exam, such as TOEFL or IELTS. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Applications for the Doctor of Philosophy (PhD) program in Curriculum and Instruction with a concentration in Science Education are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- Letter of intent. In this letter, describe why you wish to pursue a PhD in Science Education, including your career goals; your prior experiences in science or science education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to science; potential areas of focus in a science doctoral program; potential research interests; and any other information you consider to be relevant to your admission.
- GRE scores.

- Transcripts.
- TOEFL or IELTS scores (for international, non-native English speaking applicants). Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Applicants need to contact a member of the Science Education PhD Program faculty, either in person or via telephone, to discuss career and research goals. This assists us in assigning a graduate advisor upon admission.
- Recommended: sample of professional writing.

In order to be considered for admission, applicants must meet the following minimum requirements:

- GRE Scores: The admissions committee will consider the Verbal Reasoning and Quantitative Reasoning scores in its determination. Effective July 1, 2016 applicants must have GRE scores of 153 Verbal and 144 Quantitative Reasoning or higher to be considered for admission. Minimum scores do not guarantee admission. Other criteria, as well as faculty capacity, will be considered in the admission process.
- TOEFL scores of 540 (paper-based test), 76 (internet-based test), 197 (computer based test) or IELTS scores of 6.5 higher are required for international, non-native English speaking applicants. Minimum scores do not guarantee admission. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Minimum GPA of 3.000 on bachelor's degree.

Applicants are evaluated on alignment of research interests with those of existing faculty, clarity of application letter and goals, prior teaching or work experience, letters of recommendation, transcripts (including GPA) and previous research experience with an accompanying sample of professional writing if available, according to the Science Education PhD Admissions Rubric.

Following the application review, the program faculty will make a recommendation regarding admission for Graduate Study at UW. Applicants will be notified of the decision by email. Applications will be considered at any time, but students who apply by January 15 will receive full consideration for graduate assistantships for the following academic year.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Program Specific Graduate Assistantships

Applicants interested in a Graduate Assistantship must submit a graduate assistantship application at the time of admission application process or communicate with their advisor and school director thereafter.

Graduate Certificates

Graduate Certificate programs in Teaching Elementary School (TES) and in Teaching Secondary Content (TSC) with an option to earn a master's degree in Curriculum and Instruction have been established to provide an alternative licensure route through Wyoming's Professional Teaching Standards Board for individuals who have already completed a bachelor's degree. This on-line graduate certificate program does not result in another degree; rather, it is an alternative avenue toward initial Wyoming teacher licensure, with the bonus that it provides up to 12 hours of graduate credit that can be applied to a master's degree in Curriculum and Instruction. Some programs highly recommend a few intensive weekends completed in Laramie, WY.

Graduate Credit Earned in Post-Baccalaureate Program (12 credit hours)

EDCI 5250 - Advanced Topics in Pedagogy (3)

EDCI 5550 - The Art & Science of Teaching (4)

EDCI 5560 - Seminar in Assessment (1)

EDCI 5990 - Internship (4)

Admission to both the Graduate Certificate in Teaching and the master's degree programs require separate applications. The actual licensure courses encompass three full-time semesters: one summer and the following fall and spring semesters, which includes student teaching. Previous coursework or a passed content area Praxis exam is required.

The Teaching Elementary School (TES) Graduate Certificate leads to initial teacher licensure in grades K-6. The Teaching Secondary Content (TSC) Graduate Certificate leads to initial teacher licensure in grades 6-12 in each of the following licensure areas: Agriculture, English, Mathematics, Modern Languages (French, German, Spanish), Science (Biology, Chemistry, Physics, Earth System Science, Geology), and Social Studies (History and Political Science).

Major

Elementary Education, B.A.

The Elementary Education program prepares students to teach in grades K-6. This program requires a minimum of 120 credit hours.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements. Students need to complete the following USP requirements that are not incorporated into the program.

- First Year Seminar (3 Credits)
- Communication 1 (recommend ENGL 1010 , 3 Credits)
- US/WY Constitution (3 Credits)

Professional Education Requirements

Foundations-24 Hours

All Professional Education requirements must be completed with a grade of C or higher.

- EDEC1020 - Introduction to Early Childhood Education Credits: 3
OR
- EDEL1200 - Introduction to Elementary Education Credits: 3
- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3 (3 Credits Required)
- EDEC2000 - Engaging Families in Early Childhood Settings Credits: 3
OR
- EDEX2000 - Collaboration and Professional Relationships Credits: 3

Completion of EDST 2450 is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3100 - Teacher as Practitioner Credits: 3
*A minimum of 2.75 UW cumulative GPA is required for registration in EDST 3100 .
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*
- EDST3200 - Foundations of ESL Learning Credits: 3

- EDST3480 - Diversity & the Politics of Schooling Credits: 3

Assessment-3 Hours

- EDST3550 - Educational Assessment Credits: 2

Practicum-4 Hours

An approved background check must be on file with the Teacher Preparation and Advising Office for registration and completion of these courses.

If EDEC 1020 is completed, EDST 1200 Practicum 1 is not required.

- EDST1200 - Practicum I Credits: 1
- EDST2475 - Independent Studies Credits: 1-3 (1 Credit Required) *Temporary placeholder for what will be EDST 2200 (I).*
- EDST3101 - Practicum 3 Credits: 2 *This requirement is typically completed concurrently with EDST 3100*

Methods-19 Hours

- EDEL 3000 Level or Above Elementary Science Methods Credits: 3
 - EDEC 4000 Level or Above Early Childhood Literacy Methods Credits: 3
- Completion of EDST 3100 and EDST 3101 is a prerequisite for enrollment in the following courses:**
- EDEL4109 - Elementary Humanities Education Credits: 5
 - EDEL4309 - Elementary Literacy Education Credits: 2-5 (3 Credits Required)
 - EDEL4409 - Elementary Math/ Science Education Credits: 5

Residency in Teaching-15 Hours

All methods courses must be completed prior to enrollment in EDEL 4500.

- EDEL4500 - Residency in Teaching Credits: 1-16 (15 Credits Required)

Elementary Core Content-minimum 29 Hours

Minimum 2.5 GPA required in major content. All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109, EDEL 4309 and EDEL 4409.

Literacy

- EDEL2140 - Teaching Literacy in the Elementary School Credits: 3
- EDEL2280 - Literature for Children Credits: 3
- EDEL3720 - Literacy Difficulties: Assessment and Instruction Credits: 3

Mathematics

- MATH1100 - Number and Operations for Elementary School Teachers Credits: 3
- MATH1105 - Data, Probability, and Algebra for Elementary School Teachers Credits: 3

Can be substituted with:

(MATH 1400 or MATH 1405 or MATH 1450) **AND** (STAT 2070 or STAT 2050), **OR** MATH 2200 or MATH 2350.

- MATH2120 - Geometry and Measurement for Elementary School Teachers Credits: 3

Science

Can be substituted with other approved PN sciences.

- GEOL1070 - The Earth: Its Physical Environment Credits: 4
OR
- ASTR1070 - The Earth: Its Physical Environment Credits: 4
- LIFE1020 - Life Science Credits: 4
- PHYS1090 - The Fundamentals of the Physical Universe Credits: 4

Social Sciences

- GEOG1000 - World Regional Geography Credits: 3
OR
- GEOG1020 - Introduction to Human Geography Credits: 3
- Additional Social Studies course (The course completed to meet the USP U.S. & WY Constitution (V) requirement can not be applied to this content requirement

Health

- HLED2006 - Health for Elementary Educators Credits: 1

Art

- EDEL2170 - Art in the Elementary School Credits: 3

Elementary Education Electives

Students need a minimum of 9 credits of electives to complete their degree program. Students are strongly encouraged to apply elective hours toward a minor or endorsement, such as those in Early Childhood Education, English as a Second Language, American Sign Language and Computer Science.

Elementary Education/Special Education, B.A.

The Elementary/Special Education program prepares students to seek licensure as a K-6 elementary teacher and K-12 special education endorsement. This program consists of a minimum of 120 total hours.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements. Students need to complete the following USP requirements that are not incorporated into the program.

- First Year Seminar (3 Credits)
- Communication 1 (recommend ENGL 1010 , 3 Credits)
- US/WY Constitution (3 Credits)

Professional Education Requirements

All Professional Education requirements must be completed with a grade of C or higher.

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3 (3 credits required)

Completion of EDST 2450 is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3
- EDST3100 - Teacher as Practitioner Credits: 3

A minimum of 2.75 UW cumulative GPA is required for registration in EDST 3100 .

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

- EDEX 4000 Level Special Education Assessment Credits: 3
- EDEL 3000 Level or Above Elementary Science Methods Credits: 3
- EDEC 4000 Level or Above Early Childhood Literacy Methods Credits: 3

Completion of EDST 3100 and EDST 3101 is a prerequisite for enrollment in the following courses:

- EDEL4109 - Elementary Humanities Education Credits: 5
- EDEL4309 - Elementary Literacy Education Credits: 2-5
- EDEL4409 - Elementary Math/ Science Education Credits: 5

Elementary Education Content

Minimum 2.5 GPA required in major content. All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109 , EDEL 4309 , and EDEL 4409.

Literacy

- EDEL2140 - Teaching Literacy in the Elementary School Credits: 3
- EDEL2280 - Literature for Children Credits: 3
- EDEL3720 - Literacy Difficulties: Assessment and Instruction Credits: 3

Science

- LIFE1020 - Life Science Credits: 4
- GEOL1070 - The Earth: Its Physical Environment Credits: 4
- ASTR1070 - The Earth: Its Physical Environment Credits: 4
- PHYS1090 - The Fundamentals of the Physical Universe Credits: 4

Mathematics

- MATH1100 - Number and Operations for Elementary School Teachers Credits: 3
- MATH1105 - Data, Probability, and Algebra for Elementary School Teachers Credits: 3

Can be substituted with:

(MATH 1400 or MATH 1405 or MATH 1450) **AND** (STAT 2070 or STAT 2050), **OR** MATH 2200 or MATH 2350.

- MATH2120 - Geometry and Measurement for Elementary School Teachers Credits: 3

Social Studies/Cultural Awareness

Take **ONE** of the following:

- AAST1030 - Social Justice in the 21st Century Credits: 3 (AMST/NAIS/WMST/LTST 1030)
- EDST3200 - Foundations of ESL Learning Credits: 3
- GEOG1020 - Introduction to Human Geography Credits: 3
- WIND2100 - Introduction to Disability Studies Credits: 3

Art

- EDEL2170 - Art in the Elementary School Credits: 3

Health

- HLED2006 - Health for Elementary Educators Credits: 1

Special Education Content: 36 (Minimum) Credit Hours

All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109, EDEL 4309, and EDEL 4409.

- EDEX2000 - Collaboration and Professional Relationships Credits: 3
- EDEX 3000 Level Understanding Students with High Incid Disabilities, 3 Credits
- EDEX 3000 Level Teaching Students with High Incid Disabilities, 3 Credits
- EDEX 3000 Level Understanding Students with Low Incid Disabilities, 3 Credits
- EDEX 3000 Level Teaching Students with Low Incid Disabilities, 3 Credits
- EDEX 3000 Level Behavior Supports & Intervention, 3 Credits
- EDEX 4000 Level Data Analysis & IEP Development, 3 Credits
- EDEX4720 - Law and Students with Disabilities Credits: 3
- WIND4020 - Disability Studies Theory and Practice Credits: 3

Practicum

An approved background check must be on file with the Teacher Preparation and Advising Office for registration and completion of these courses.

- EDST1200 - Practicum I Credits: 1
- EDST2475 - Independent Studies Credits: 1-3 (1 Credit required) *Temporary placeholder for what will be EDST 2200.*
- EDST3101 - Practicum 3 Credits: 2 *This requirement is typically completed concurrently with EDST 3100.*

Residency in Teaching

All methods courses must be completed prior to enrollment in Residency in Teaching.

- EDEL4500 - Residency in Teaching Credits: 1-16 (6 credits required)
- EDEX 4000 Level Residency in Student Teaching Special Education, Credits: 6

Higher Education

The Program

The Higher Education Administration program serves the formal academic leadership development needs of persons aspiring to become managers and leaders in higher education institutions. These managers and leaders include coordinators, directors, deans and executive leaders at community colleges and universities.

This concentration offers the following graduate degrees in education: community college leadership certificate, master of arts (M.A.), doctor of education (Ed.D.), and Philosophy of Education (Ph.D). The certificate program requires 15 credits beyond a master's degree. The master's program requires 33 credit hours beyond the bachelor's degree and is available online. The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The Ed.D. requires a minimum of 75 semester hours beyond the bachelor's degree. A bachelor's and master's degree is required of all students to be admitted to an Ed.D. program. Candidates may, with the approval of the faculty, transfer up to 30 semester hours from previous course work.

Graduate study addresses the challenges faced by institutions and agencies in the design and delivery of post secondary education and the preparation of educators to meet these challenges.

Career Options

Graduates are employed specifically as faculty and administrators in community colleges and universities, adult learning consultants, and continuing professional educators.

Options

- Education, M.A., Concentration in Higher Education Administration
- Education, Ed.D., Concentration in Higher Education Administration
- Education, Higher Education Administration Option, Ph.D.

Secondary Agricultural Education with Concurrent Major in Agricultural Business, B.S.

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Agricultural Business. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 127 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3
(3 credits required)

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education Credits: 3-6
(3 credits required)
- EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Agricultural Education Core Requirements

- EDAG3160 - Principles of Agricultural Education Credits: 3
- EDAG4170 - Principles of Agricultural Mechanics and Technology Credits: 3
- EDAG4180 - Techniques of Agricultural Mechanics and Technology Credits: 3

Concurrent Agriculture Major Core Requirements

- AECL1000 - Agroecology Credits: 4

Choose one:

- EDSE4279 - Subject Matter Specific Methods II: Biological Science Methods for Agricultural Education Majors Credits: 3

May be substituted with EDSE 3275 Subject Matter Specific Methods I: Secondary Science Education Credits: 3.

Secondary Agricultural Education, B.S.

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Agricultural Communications. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 127 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3 (3 credits required)
Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:
- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3
A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.
- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education Credits: 3-6 (3 credits required)
- EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education Credits: 3-6 (4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16 (12 credits required)

- EDSE4550 - Residency Applications and Synthesis Credits: 3

Concurrent Majors

Secondary Agricultural Education with Concurrent Major in Agricultural Business, B.S.

Secondary Agricultural Education with Concurrent Major in Agricultural Communications, B.S.

Secondary Agricultural Education with Concurrent Major in Animal and Veterinary Science, B.S.

Secondary Biological Science Education with Concurrent Major in Biology, B.A.

Graduates of this program earn a Bachelor's Degree in Biology Education and a concurrent major in Biology. It prepares students to teach Biology in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 120 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

(3 credits required)

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3
*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*
- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6
(3 credits required)
- EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16

(12 credits required)

- EDSE4550 - Residency Applications and Synthesis Credits: 3

Major Content

Required Biology Courses

- LIFE1010 - General Biology Credits: 4
- LIFE3400 - General Ecology Credits: 3
- LIFE3050 - Genetics Credits: 4
- LIFE3500 - Evolutionary Biology Credits: 3
- LIFE3600 - Cell Biology Credits: 4

Plus Choose Two:

- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- MICR2021 - General Microbiology Credits: 4 (can be substituted with MOLB 2021 - General Microbiology)

Required Additional Coursework

- CHEM1020 - General Chemistry I Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- MOLB3610 - Principles of Biochemistry Credits: 4
- PHYS1110 - General Physics I Credits: 4
- PHYS1120 - General Physics II Credits: 4
- MATH2200 - Calculus I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR
- LIFE2100 - Intro Research and Analysis Credits: 4

- COSC1010 - Introduction to Computer Science I Credits: 4
- OR
- COSC1030 - Computer Science I Credits: 4
- OR
- LIFE2100 - Intro Research and Analysis Credits: 4

Elective Courses

9 hours - minimum. (with 6 hours of 3000-level or above and at least one course with an environmental focus); courses must come from ANVS, BOT, ENTO, KIN, LIFE, MICR, MOLB, PLNT, RNEW, or ZOO.

Secondary Career & Technical Education, B.A.S.

This program consists of a minimum of 120 total hours. Minimum of 2.500 content GPA required.

This is a B.A.S. degree completion which requires students to transfer in specific CTE coursework to UW and then complete the professional education requirements.

The major will be advised through both the College of Education main campus and UW Casper.

Students are suggested to take STAT 2050 or STAT 2070 to complete the USP:Q and PHYS 1050, PHYS 1100, or PHYS 1210 to complete part of the USP:PN.

Online Access: The CTE program is a distance delivered program with the exception of a few intensive weekends to be held on the UW-Casper campus.

Professional Education Requirements

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3 (3 Credits Required)
Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:
- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3
*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*

- EDST3101 - Practicum 3 Credits: 2
- EDST3200 - Foundations of ESL Learning Credits: 3

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3020 - Facilities and Advisory Management Credits: 2-4 (3 Credits Required)
- EDSE3277 - Subject Matter Specific Methods I: Secondary Technology Education Credits: 3-6 (3 Credits Required)
- EDSE4277 - Subject Matter Specific Methods II: Secondary Technology Education Credits: 3-6 (4 Credits Required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16 (12 Credits Required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Major Content

Students must complete a minimum of 120 credits to graduate (Professional Education Requirements and Major Content transfer credit). The Major Content transfer credit must be from a block transfer agreement requiring students to complete at least one PTSB approved content area that students transfer into the B.A.S. program at UW. This coursework may be completed either prior to matriculating into the B.A.S. program or taken concurrently with the UW coursework.

Secondary Chemistry Education with Concurrent Major in Chemistry, B.A.

Graduates of this program earn a Bachelor's Degree in Chemistry Education and a concurrent major in Chemistry. It prepares students to teach Chemistry in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 121 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

- PHYS1120 - General Physics II Credits: 4

OR

- PHYS1220 - Engineering Physics II Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4

Upper Division Elective Courses

6-Hours - minimum (6 hours of 3000-level or above)

Courses must come from:

- CHEM, LIFE, or MOLB

*Note-CHEM 4230 is highly recommended

Secondary Earth Science Education with Concurrent Major in Environmental Systems Science, B.A.

Graduates of this program earn a Bachelor's Degree in Earth Science Education and a concurrent major in Environmental Systems Science. It prepares students to teach Earth Science in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 120 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

(3 credits required)

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3
*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*
- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6
(3 credits required)
- EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Required Geology Courses

- GEOL1100 - Physical Geology Credits: 4
- OR**
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- GEOL2010 - Mineralogy Credits: 3
- GEOL2020 - Introduction to Petrology Credits: 2
- GEOL2100 - Stratigraphy and Sedimentation Credits: 4
- GEOL2080 - General Field Geology Credits: 3
- OR**
- GEOL4717 - Field Course in Geology Credits: 1-8
- GEOL4820 - Capstone Credits: 3
(Spring only course, MUST have 26 GEOL hrs completed before enrolling)

Required Additional Courses

- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- PHYS1110 - General Physics I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- MATH1405 - Trigonometry Credits: 3
- OR**
- MATH1450 - Algebra and Trigonometry Credits: 5
- ASTR1050 - Survey of Astronomy Credits: 4

Elective Courses:

Choose 6-8 courses from the following recommended list to obtain the minimum required hours.

- ATSC2000 - Introduction to Meteorology Credits: 4
- GEOL2050 - Principles of Paleontology Credits: 3
- GEOL2070 - Introduction to Oceanography Credits: 4
- GEOL3005 - Principles of Geophysics Credits: 4
- GEOL3400 - Geologic Hazards: A Historical and Scientific Review Credits: 4
- GEOL3500 - Global Change: A Geological Perspective Credits: 4 (Highly Recommended)
- GEOL3600 - Earth and Mineral Resources Credits: 4
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4
- GEOL4444 - Geohydrology Credits: 4
- GEOL4490 - Geochemistry Credits: 4
- GEOL4610 - Structural Geology and Tectonics Credits: 4
- GEOL4835 - Applied/Exploration Geophysics Credits: 3
- ECON2400 - Economics of the Environment Credits: 3
- GEOG3010 - Geomorphology of Earth's Dynamic Landscapes Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- SOIL4120 - Genesis, Morphology and Classification of Soils Credits: 4
- ECON4400 - Environmental Economics Credits: 3
- ECON4410 - Natural Resource Economics Credits: 3

Secondary English Education with Concurrent Major in English, B.A.

Graduates of this program earn a Bachelor's Degree in English Education and a concurrent major in English. It prepares students to teach English in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 121 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

English Core

36 Total Hours. At least 21 of the 36 hours must be upper-division (3000-level or higher)

Gateway to the English Major

- ENGL2025 - Introduction to English Studies Credits: 3

Historical Period Classes

Take **ONE** of the following:

- ENGL2425 - Literatures in English I Credits: 3
- ENGL2430 - Literatures in English II Credits: 3
- ENGL2435 - Literatures in English III Credits: 3
- ENGL2340 - Native American Culture and Literature Credits: 3
- ENGL2350 - Introduction to African American Literature Credits: 3
- ENGL2360 - Mexican American Literature Credits: 3

Take **THREE** of the following:

- ENGL3200 - Topics in: Medieval Literature Credits: 3
- ENGL3300 - Topics in: Renaissance Literature Credits: 3
- ENGL3400 - Topics in: Eighteenth-Century Literature Credits: 3
- ENGL3500 - Topics in: Nineteenth-Century Literature Credits: 3
- ENGL3600 - Topics in: 20th Century Literature Credits: 3

Expanding the Canon-6 Hours

6 credits total examining diversity-related issues, 2000-level or above

• 2340/2350/2360 can be taken either as an Expanding the Canon course OR as an Historical Period course. A full list of courses that fulfill the Expanding the Canon requirements will be published each semester; generally speaking, these courses will cover topics related to racial diversity, global literatures, gender, sexuality, or disability studies. Examples: 3330, 3710, 4450, 4455, 4460, 4470, 4640: Postcolonial Literature, 4830.

Rhetoric, Composition Pedagogy, and Professional Writing

- ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing Credits: 3

6 Hours from the Following Rhetoric, Composition, and Professional Writing Courses Offered by English:

Take **TWO** of the Following:

- ENGL2005 - Writing in Technology and the Sciences Credits: 3
- ENGL2035 - Writing for Public Forums Credits: 3
- ENGL2125 - Writing Tutor Pedagogy/Practicum Credits: 3
- ENGL3020 - Culture, Communication, Work Credits: 3
- ENGL4010 - Technical Writing in the Professions Credits: 3
- ENGL4020 - Editing for Publication Credits: 3
- ENGL4030 - Writing for Magazines Credits: 3
- ENGL4061 - Rhetorical Theory and Criticism Credits: 3
- ENGL4075 - Writing for Non-Profits Credits: 3

Foundations of Language

3 Hours in the History of the English Language or Social Linguistics

Take **ONE** of the Following:

- EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers Credits: 3
- EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching Credits: 3
- ANTH2000 - Introduction to Linguistic Anthropology Credits: 3
- ENGL4780 - History of the English Language Credits: 3

Young Adult Literature-3 Hours

- EDCI4120 - Literature for Young Adults Credits: 3

World Language

12 hours of the same world language, including ASL

Electives

9 Hours of Electives

Capstone: Senior Seminar

- ENGL4999 - Senior Seminar Credits: 3

Secondary Mathematics Education with Concurrent Major in Mathematics, B.A.

Graduates of this program earn a Bachelor's Degree in Mathematics Education and a concurrent major in Mathematics. It prepares students to teach Mathematics in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 121 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3

(3 credits required)

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

- EDST3100 - Teacher as Practitioner Credits: 3

- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3271 - Subject Matter Specific Methods I: Secondary Mathematics Education Credits: 3-6
(3 credits required)
- EDSE4271 - Subject Matter Specific Methods II: Secondary Mathematics Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Major Content

It is necessary to complete a minimum of 50 hours in math coursework. Work must include 27 credit hours of upper-division mathematics. The grade in each course of this 50-hour requirement must be C or better. A minimum GPA of 2.500 in major content courses is required.

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2310 - Applied Differential Equations I Credits: 3
- MATH2800 - Mathematics Major Seminar Credits: 2
- MATH3500 - Algebra I: Introduction to Rings and Proofs Credits: 3
- MATH3340 - Introduction to Scientific Computing Credits: 3
- MATH3205 - Analysis I: Elementary Real Analysis Credits: 3
- MATH4000 - History of Mathematics Credits: 3
- MATH4600 - Foundations of Geometry Credits: 3

Major Related Statistics Courses

Take **ONE** of the Following (STAT 2050 and STAT 2070 are recommended):

- STAT2000 - Statistics and the World Credits: 3
- STAT2050 - Fundamentals of Statistics Credits: 4
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- STAT3050 - Statistical Methods Credits: 3

Depth & Sequence Courses

Take **ONE** of the Following Selected Pairs:

Pair 1

- MATH4200 - Analysis 2: Advanced Analysis Credits: 3
- AND
- MATH4205 - Analysis 3: Undergraduate Topics in Analysis Credits: 3

OR

Pair 2

- MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3
- AND
- MATH4440 - Introduction to Partial Differential Equations I Credits: 3

OR

Pair 3

- MATH4510 - Algebra II: Introduction to Group Theory Credits: 3
- AND
- MATH4520 - Algebra III: Topics in Abstract Algebra Credits: 3

Breadth Electives

Take **TWO** of the following courses:

- MATH3310 - Appl Diff Equations II Credits: 3
- MATH3700 - Combinatorics Credits: 3
- MATH4150 - Secondary School on Campus Credits: 1-4
- MATH4230 - Introduction to Complex Analysis Credits: 3
- MATH4255 - Mathematical Theory of Probability Credits: 3
- MATH4265 - Introduction to the Theory of Statistics Credits: 3
- MATH4300 - Introduction to Mathematical Modeling Credits: 3
- MATH4440 - Introduction to Partial Differential Equations I Credits: 3
- MATH4500 - Matrix Theory Credits: 3

Secondary Modern Languages Education with Concurrent Major in French, B.A.

Graduates of this program earn a Bachelor's Degree in Modern Language Education and a concurrent major in French (Formerly titled: Foreign Language). It prepares students to teach French in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 120 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

All Professional Education requirements must be completed with a grade of C or higher.

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3 (3 credits required)

Completion of EDST 2040 with a minimum grade of C or higher is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3

- EDST3480 - Diversity & the Politics of Schooling Credits: 3
*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*
- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Only)

- EDSE3276 - Subject Matter Specific Methods I: Secondary Modern Language Education Credits: 3-6
(3 credits required)
- EDSE4276 - Subject Matter Specific Methods II: Secondary Modern Language Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Concurrent Major Courses

57 hours minimum. At least 21 hours must be upper-division (3000-level or higher)

French Core

- FREN2040 - Second Year French II Credits: 3
- FREN2140 - Introduction to Reading Credits: 3
- FREN3005 - French Phonetics and Pronunciation Credits: 3
- FREN3050 - Third Year French I Credits: 3
- FREN3060 - Third Year French II Credits: 3
- FREN4100 - A Survey of French Literature I Credits: 3
- FREN4110 - A Survey of French Literature II Credits: 3

Take ONE of the following:

- FREN2130 - Contemporary French Culture Credits: 3
OR
- FREN3110 - Contemporary French Civilization Credits: 3

Major Related Courses

- EDCI4350 - Introduction to Second Language Acquisition Credits: 3
- EDCI4450 - Issues In Multicultural Education Credits: 3

Take ONE of the following:

- COJO2010 - Public Speaking Credits: 3
OR
- THEA1100 - Beginning Acting Credits: 3

Take ONE of the following:

- EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers Credits: 3
- OR
- EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching Credits: 3

Foundations of Language

12 credits of FREN or courses related to the history, art or political science of the francophone world (consult your advisor). For those completing the ESL endorsement, six of these hours can be earned with EDCI 5430 and EDCI 5440 or with a study abroad in a French-speaking country. Study abroad is strongly recommended.

Electives

- 3 Credits of FREN Elective above 2030
- 15 Credits of FREN Upper Division Electives at 3000+ Level

Language Proficiency Requirement

Completion of the OPI and WPT via the American Council on the Teaching of Foreign Languages (ACTFL) with a score of Advanced Low or better.

Secondary Modern Languages Education with Concurrent Major in German, B.A.

Graduates of this program earn a Bachelor's Degree in Modern Language Education and a concurrent major in German (Formerly titled: Foreign Language). It prepares students to teach German in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

This program requires a minimum of 120 total hours. All major courses must be passed with a grade of C or better. A minimum GPA of 2.500 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Professional Education Requirements

All Professional Education requirements must be completed with a grade of C or higher.

Foundations

- EDST2450 - Foundations of Development and Learning Credits: 3
- ITEC2360 - Teaching with Technology Credits: 1-3
(3 credits required)

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST3480 - Diversity & the Politics of Schooling Credits: 3

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

- EDST3100 - Teacher as Practitioner Credits: 3
- EDST3101 - Practicum 3 Credits: 2

Assessment

- EDST3550 - Educational Assessment Credits: 2

Methods (Offered Fall Semester Only)

- EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education Credits: 3-6
(3 credits required)
- EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education Credits: 3-6
(4 credits required)

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Concurrent Major Courses

At least 24 hours must be upper-division (3000-level or higher)

German Core

- GERM2040 - Second Year German II Credits: 3
- GERM3050 - Third Year German I Credits: 3
- GERM3060 - Introduction to German Literature Credits: 3
- GERM4100 - A Survey of German Literature I Credits: 3
- GERM4110 - A Survey of German Literature II Credits: 3

Major Related Courses

- EDCI4350 - Introduction to Second Language Acquisition Credits: 3

Residency (Offered Spring Semester Only)

- EDSE4500 - Residency in Teaching Credits: 1-16
(12 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3

Major Content

Concurrent majors in social studies education are offered in History (120 minimum credits total), and Political Science (120 minimum credits total).

Majors must maintain a G.P.A. of 2.500 in major content courses and earn a grade of C or better in all content classes.

Concurrent Majors

- Secondary Social Studies Education with Concurrent Major in History, B.A.
- Secondary Social Studies Education with Concurrent Major in Political Science, B.A.

Minor**Early Childhood Minor**

Students can complete this minor as part of their undergraduate studies. By completing this minor and the Internship in Early Childhood Education students will be qualified for either the Birth to Five or the Birth to Eight Endorsements.

The minor consists of 22 credit hours including 9 hours of upper division credit. It is recommended that students interested in obtaining the early childhood minor apply to the program by the freshman year or the beginning of the sophomore year by completing the Program Change form, which may be found at http://www.uwyo.edu/registrar/students/forms_and_petitions.html.

Required Courses: 22 Credits

- EDEC1020 - Introduction to Early Childhood Education Credits: 3
- FCSC2121 - Child Development Credits: 4
- OR**
- PSYC2300 - Developmental Psychology Credits: 3 **AND**
- FCSC2122 - Child Development Lab Credits: 1
- EDEC2000 - Engaging Families in Early Childhood Settings Credits: 3
- EDEC3000 - Observing Young Children Credits: 3
- EDEC3220 - Curriculum and Learning Environments in Early Childhood Education Credits: 3
- EDEC4320 - Oral and Written Language Acquisition Credits: 3

One approved elective (3 credits or more) from the list below:

- EDEC 1100/1105 Observation and Guidance (3 credits)
- EDEC 1300: Curriculum in Early Childhood Education (3 credits)
- EDEL 2275 Literature for Young Children Credits: 3
- EDEL 2280 Literature for Children Credits: 3 (This cannot be used for an elective if used for the major and H requirement)
 - FCSC 2131 Family Relations Credits: 3
 - FCSC 3119 Parent-Child Relationships Credits: 3
 - FCSC 3129 Social Development in Young Children Credits: 3

- FCSC 3220 Multicultural Influences on Children and Families Credits: 3
- FCSC 4124 Families of Young Children With Special Needs Credits: 3
- FCSC 4127 Directing Preschool and Daycare Programs Credits: 3
- EDCI 4140 Storytelling Credits: 3
- EDEC 4350 Health Management Issues in Early Education Credits: 3
- EDEC 5210: Seminar in Early Childhood Education (3 credits)
- EDEC 5220 Children with Disabilities Credits: 3
- SPPA 2110 AND SPPA 2120 : American Sign Language I & II (4 credits each)
- EDCI 5580 Supervised Internship in Early Childhood Education (6 credits)
- FCSC 4130 Internship in Child Development Credits: 6

Graduate

Counseling, M.S.

The UW Master of Science degree in Counseling program offers concentrations in school counseling and mental health counseling that will prepare you to help people across the lifespan. Ours is a broad-based program that prepares you to become certified as a school counselor or provides you with the training needed to become a provisionally licensed mental health counselor.

The UW counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and is offered on campus in Laramie, or as an intensive weekend program for working professionals at UW Casper.

The UW Mental Health Counseling Program

Through small classes and clinical experiences, UW's mental health program prepares you to serve in settings that include community agencies, integrated delivery systems, hospitals, addictions treatment centers and private practice.

The UW School Counseling Program

The school counseling program equips you with the knowledge and skills to become a school leader who works with students, teachers, administrators, parents and other community members to promote culturally relevant P-12 student growth. The school counseling program allows you to earn this degree with no previous P-12 experience.

About Counseling

In UW's highly regarded counseling program, you will acquire the theoretical foundation and practical experience necessary to work with a wide-range of clients, from P-12 students to adults, families and couples.

As a counseling graduate student, you will become part of a cohort community with whom you'll study, learn and grow. You will also work with an award-winning team of faculty, who will guide you toward developing your counseling identity as you progress through your practicum and supervised internship. By the time you graduate, you will be well-prepared to step into a counseling position in any organization.

Master of Science Curriculum Requirements

The master of science degree in counseling is a 61 credit hours program. Full-time students can complete their chosen specialty in a 2-year period if they begin courses during the summer of their initial year and complete between 6-9 credit hours each summer and 9-12 credit hours each spring and fall.

Course Descriptions

Course Schedule

Required Courses (49 Credit Hours)

- CNSL 5060 Counseling Ethics and Professional Issues (3 credit hours)
- CNSL 5110 Group Procedures (3 credit hours)
- 5140 Counseling and Addictions(3 credit hours)
- 5170 Career Across the Lifespan(3 credit hours)
- 5175 Human Growth and Development (3 credit hours)
- 5180 Assessment in Counseling (3 credit hours)
- 5200 Couples and Family Theory and Application (3 credit hours)
- 5210 Group Experience (1 credit hours)
- 5310 Pre-Practicum in Counseling (3 credit hours)
- 5320 Practicum in Counseling - *100 clock hours, 40 direct client hours* (3 credit hours)
- 5330 Counseling Children and Adolescents (3 credit hours)
- 5340 Play Therapy (3 credit hours)
- 5350 Multicultural Counseling (3 credit hours)
- 5630 Advanced Issues in Counselor Preparation (3 credit hours)
- 5640 Diagnosis, Psychopathology and Psychopharmacology (3 credit hours)
- 5650 Counseling Theories (3 credit hours)
- EDRE 5530 Introduction to Research (3 credit hours)

Specialization Area Courses (12 Credit Hours)

School Counseling

- CNSL 5120 School Counseling Strategies and Techniques (3 credit hours)
- CNSL 5125 School Counseling II (3 credit hours)
- CNSL 5580 Supervised Internship (600 clock hours, 240 direct clienthours) (6 credit hours)

Community Mental Health Counseling

- CNSL 5130 Mental Health Counseling (3 credit hours)
- CNSL 5150 Mental Health Counseling II (3 credit hours)

Options

- Counseling, M.S., Concentration in Mental Health Counseling
- Counseling, M.S., Concentration in School Counseling

Counseling, M.S., Concentration in Mental Health Counseling

Core Courses

- CNSL5060 - Counseling Ethics and Professional Issues Credits: 3
- CNSL5110 - Group Procedures Credits: 3
- CNSL5140 - Counseling & Addictions Credits: 3
- CNSL5170 - Counseling and Career Across the Lifespan Credits: 3

- CNSL5175 - Human Growth and Development Credits: 3
- CNSL5180 - Assessment in CNSL Credits: 3
- CNSL5200 - Couple and Family Theory Credits: 3
- CNSL5210 - Group Experience Credits: 1
- CNSL5310 - Pre-Practicum Credits: 3
- CNSL5320 - Practicum Credits: 3
- CNSL5330 - Counseling Children and Adolescents Credits: 3
- CNSL5340 - Play Therapy Credits: 3
- CNSL5350 - Multicultural Counseling Credits: 3
- CNSL5630 - Trauma-Informed Counseling Credits: 3
- CNSL5640 - Diagnosis, Psychopathology, and Psychopharmacology Credits: 3
- CNSL5650 - Counseling Theories Credits: 2-3
- EDRE5530 - Introduction To Research Credits: 3

Core Subtotal: 49 Credits

Mental Health Counseling

- CNSL5130 - Mental Health Counseling Credits: 3
- CNSL5150 - Mental Health Counseling II Credits: 3
- CNSL5580 - Supervised Internship Credits: 1-6

Subtotal: 12 Credits

Minimum Total: 61 Hours

Counselor Education and Supervision, Ph.D.

Doctoral students are required to have completed a minimum of a 48-hour Master's degree from a program of study equivalent to a CACREP accredited Masters program in Counselor Education. These requirements are based upon the 2015 CACREP Standards.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Learning Outcome Areas Advanced Foundations

Ph.D. students with a 48-hour CACREP equivalent Master's degree are required to complete 12 semester hours of courses beyond their Master's preparation (in consultation with their adviser and committee). Ph.D. students with a 60-hour CACREP equivalent Master's program can petition up to 12 hours of their Master's coursework to fulfill this requirement.

Counseling and Supervision

- CNSL5340 - Play Therapy Credits: 3
- CNSL5860 - Doctoral Practicum in Counselor Education Credits: 1-8
- CNSL5865 - Supervision Theory Credits: 3
- CNSL5875 - Doctoral Practicum in Supervision Credits: 1-6

Teaching, Leadership and Advocacy

- CNSL5871 - Doctoral Seminar I: Professional Identity and Ethics Credits: 3
- CNSL5872 - Doctoral Seminar II: Diversity and Social Change Credits: 3
- CNSL5873 - Doctoral Seminar III: Research, Assessment & Scholarship Credits: 3
- CNSL5874 - Doctoral Seminar IV: Leadership, Consultation and Advocacy Credits: 3
- PRST5070 - Introduction to College Teaching Credits: 3
- CNSL 5990 - Internship Credits: 6

Research and Scholarship

12 credits chosen from the following (or equivalent) in consultation with major adviser and graduate committee.

- EDRE5600 - Educational Research I: Descriptive Research Credits: 3
- EDRE5610 - Educational Research: Group Comparison Research Credits: 3
- EDRE5620 - Educational Research: Correlational Research Credits: 3
- EDRE5630 - Educational Research IV: Multivariate Research Credits: 3
- EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research Credits: 3
- EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research Credits: 3
- EDRE 5650 - Adv. Qual Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3

Dissertation

- PRST5890 - Directed Professional Study Credits: 1-9

Total: 72 Credits

Curriculum and Instruction, Ph.D., Concentration in Curriculum Studies

Application Process

Deadlines

Applications for the Doctor of Philosophy in Curriculum and Instruction, Curriculum Studies concentration are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.

International Applicants:

The Curriculum & Instruction programs gladly welcome international applicants. We recognize that the process and paperwork involved in coming to study at the University of Wyoming from outside of the United States requires additional time. Applications for the PhD in Curriculum Studies are only reviewed two times per year: immediately after September 1 and immediately after February 1. If you require an earlier decision, please apply for the deadline a year prior to ensure your application can be reviewed in time for planning international study.

Minimal Admissions Criteria for PhD Program

Applicants must meet the following criteria to be considered for admission; however, meeting minimal admissions criteria does not automatically ensure admission to the program.

- Master's degree from an accredited institute of higher education.
- It is highly recommended these courses are taken prior to admission, but can be taken within the first semesters of admission to the PhD Program. EDRE 5530 Intro to Research, EDCI 5000 Principles of Curriculum, EDCI 5450 Issues in Multicultural Education, and EDCI 5790 Advanced Instructional Strategies, or equivalent coursework.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample, an indicator of the applicant's proficiency in writing. For a full description of the letter of intent and scoring categories, see guideline below.
- Three (3) years of P-12 teaching experience or its equivalent.
- Copy of GRE scores, current within the last five years.
- Three letters of recommendation, completed by an individual familiar with the applicant's academic performance, a current or recent supervisor, and/or a selected colleague and/or community member.
- Transcript evaluation for undergraduate/graduate degree completion, reflecting a minimum 3.0 GPA on a 4.0 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- A TOEFL score of 525 (paper-based), 197 (computer-based) or above is required for international students. Students may occasionally be admitted provisionally with lower test scores.
- Submission of all required supplemental materials:

Required Supplemental Materials

- Three Letters of Recommendation
- Sample of academic writing
- Transcripts reflecting most recent degree (3.0 GPA on a 4.0 scale required) from an accredited institution plus transcripts from all other schools attended. Unofficial transcripts can be submitted through the online application. Official ones will be required if admitted.
- Copy of GRE scores
- Letter of Intent describing career goals and reasons for pursuing a graduate degree at the University of Wyoming
- Resume
- Demonstration of teaching experience
- A TOEFL score of 525 (paper-based), 197 (computer exam) or above is required for international students. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please note that meeting minimal admissions criteria does NOT automatically ensure admission to a program.

Guidelines for Letter of Intent

A letter of intent must be submitted with other required admissions materials. The letter of intent serves as a writing sample, an indicator of the applicant's proficiency in writing. The admissions committee will be examining both the quality of the written sample and the depth of its content. In the letter of intent please address the following questions:

- **Teaching Experiences:** Provide a detailed description of your teaching experiences including how many years you have taught as well as what grades and/or subjects you have taught. Describe crucial aspects of your teaching experience and how you have developed as a teacher as a result of these experiences. Finally explain how your teaching background will influence your graduate studies.
- **Personal Strengths:** Explain what you will bring to our program and your classes that may demonstrate your ability to be a successful graduate student and ability to contribute to the learning environment.
- **Academic Goals:** Describe in detail why you wish to pursue a Doctor of Education in Curriculum and Instruction, including why you want to do so at this time and how you are planning to use the degree in the future. Include a description of specific areas of study you are interested in and include your goals for graduate study and why these goals are important?
- **Potential Advisor(s):** If you have communicated with a professor(s) in your area of interest and/or she or he has indicated willingness to work with you on your doctorate degree program, please include her or his name in your letter.

The letter should be typed (double-spaced) on 8.5 by 11 inch paper. Letters of intent will be scored by a rubric that evaluates two areas:

- Ideas/Content Development; and,
- Organization/Structure/Mechanics/Format.

Each category is ranked as Outstanding, Proficient, Marginal, or Deficient. An overall score of Proficient is required for acceptance to the Doctor of Philosophy degree program.

Guidelines for Academic Resume

Include the following in your resume:

- **Personal Information:** Name and Contact Information (Address, Phone numbers, email)
- **Education:** Institution, City, State, Dates Attended, Major, and Degree
- **Work Experience:** Dates, Job Title, Employer, City, State
- **Professional experiences such as:** Publications, Presentations and Grants; Continuing Education Activities, Awards/Honors Received; Community and Volunteer Activities; Professional Memberships; other pertinent information

General Requirements for Curriculum & Instruction PhD in Curriculum Studies

Minimum of 81 total credits required. Students may transfer up to 30 credits from a master's degree program completed at an accredited institution.

Current program worksheet: PhD in Curriculum & Instruction Program Worksheet

Residency Information

Residency Information

PhD Program Requirements | College of Education

If you feel that you have met any degree requirements through a previously obtained master's degree or coursework at another institution, contact your advisor to determine the correct procedure. Note that the Introduction to Doctoral Studies course requirement may not be waived.

Minimum of 79 total credits required in the following areas:

Core courses (minimum of 9 credits)

All PhD option areas require PRST 5610 (Intro to Doctoral Studies). In addition, doctoral students, with direction from their committees, will choose a minimum of two additional courses from the remaining five core courses:

- PRST 5900 (Practicum in College Teaching)
 - EDCI 5600 (Diversity)
 - EDCI 5810 (Writing for Publication)
 - EDCI 5730 (Learning and Cognition)
 - EDAD 5720 (Leader as Change Agent)
 - EDRE 5660 (Dissertation/Thesis Prospectus Writing)
- Cognate courses and advanced courses (minimum of 18 credits)*

Advanced research courses (minimum of 12 credits)

Dissertation Hours

All PhD Students are required to have a minimum of 12 dissertation credit hours.

Other Requirements

- Preliminary exam (after coursework is completed): Guidelines determined by program, department, or committee
- Program Outcomes: Written demonstration is required to show PhD outcomes are met (determined by program, department, or committee)
- Dissertation (after preliminary exam): Guidelines determined by program, department, or committee
- Residency (check with program area for specific requirements)

Notes: These requirements for a PhD in Education are minimum requirements only. Refer to specific program options for additional requirements, including admissions criteria. Options approved prior to May 2009 may have different requirements.

Curriculum and Instruction, Ph.D., Concentration in Literacy Education

Graduate students in the Literacy Education program will study with professionally active, knowledgeable Literacy Education faculty members, who have diverse backgrounds, interests, and experiences in research, teaching, and service. In addition, there are Affiliated Faculty members in other departments, within and outside the College of Education, who provide coursework and advising for graduate students in areas such as Communication Disorders; Cultural and Linguistic Diversity; Communications; American Indian Studies; English as a Second Language; College Teaching; and Special, Foreign Language, Math, Science, and Counselor Education.

Graduate students will take advanced coursework in Literacy Education, collaborate with faculty on grants and research projects, and have the opportunity to teach and supervise students in undergraduate literacy education courses. In addition to acquiring a breadth of knowledge in foundational areas in literacy education, students will have an opportunity to focus on specific areas in literacy education, such as Emergent Literacy, Family Literacy, Early Childhood Literacy, Elementary Grade Literacy, Adolescent Literacy, Disciplinary Literacy, Children's and Young Adult Literature, English Education, Literacy Teacher Education, New Literacies, Evaluation and Instruction of Students with Reading Difficulties, Literacy Education for English Learners, and Literacy Education for Culturally Diverse Students.

Competitive graduate assistantships are available to support students throughout their studies, enabling them to be immersed in the academic and scholarly environment as they work with faculty on research projects, collaborate on papers for presentation and publication, and teach courses and supervise students in the undergraduate teacher education program.

To learn more about the Curriculum and Instruction PhD in Literacy Education, please visit our page links and program documents below:

- <http://www.uwyo.edu/ste/curriculum-instruction/phd-programs/literacy-ed/index.html>

Application Process

For students to be considered for admission to the PhD in Literacy Education program, they must:

- **Submit all application materials. Please note: Preference will be given to applicants who apply on or before February 1 each year for the following year.**

Deadlines

- Applications for program are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.

- Complete an online application to the Literacy Education PhD Program. Submit supporting materials with the online application (see below).

- Have a minimum cumulative GPA of 3.00 in prior undergraduate or graduate work
- Interview with Literacy Education Program faculty, either in person or via telephone
- Master's degree is preferred

Supporting materials include:

- A current resume or vita;
- A detailed letter that expresses why the applicant wishes to pursue a PhD in Literacy Education, including the applicant's career goals; the applicant's prior experiences in literacy or literacy education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to literacy; potential areas of focus in a literacy doctoral program; potential research interests; and any other information the applicant considers to be relevant to her or his admission;
- Three Letters of Recommendation from those who can speak to the applicant's intellect, scholarly abilities, teaching ability, or other qualifications for doctoral study. These letters typically would be former professors, supervisors, or administrators;
- An official report of the Graduate Record Examination (GRE) that was taken within the preceding 5 years;
- An Application for a Graduate Assistantship should the student wish to seek one;
- An academic writing sample is not required, but is preferred.
- TOEFL or IELTS test is required for international students. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Program Requirements

The PhD in Literacy Education requires that students comply with and satisfy all requirements specified in the UW Student Handbook/Thesis & Dissertation Format Guide. Additionally, PhD in Literacy Education doctoral candidates must satisfy the following program-specific requirements:

Coursework:

A minimum of 54 hours beyond the master's degree are required as follows:

- **Research:** A minimum of 12 hours of research methods in quantitative, qualitative, or other methodologies are required. The courses will be selected collaboratively by the doctoral student and her or his PhD advisor and committee such that the research methodology training is thorough, rigorous, and compatible with the student's dissertation research plans and anticipated career research focus.
- **Core:** Students must complete 9 hours of core courses. Students must enroll in PRST 5610, "Introduction to Doctoral Study," and two of the following courses selected collaboratively by the doctoral student and her or his PhD advisor and committee:
 - PRST 5900 Practicum in College Teaching
 - EDCI 5600 Diversity in Education
 - EDCI 5810 Writing for Professional Publication
 - EDCI 5730 Learning Theories: Research & Praxis
 - EDCI 5665 History & Philosophy of Education
- **Literacy Education:** A minimum of 21 hours of doctoral literacy coursework is required, which includes the following seven courses (i.e., LTED 5800, 5880, 5860, 5830, 5850, 5480, and 5810). Additional courses may be selected from existing and new advanced, graduate-level courses within the Literacy Program Area; from courses in other departments in the College of Education; and from other relevant academic departments at the University (e.g., Anthropology, Communication Disorders; English, Family and Consumer Sciences; African American, Chicano, American Indian, or Women's Studies; Psychology, Sociology). Course selection decisions will be made collaboratively by the doctoral student in consultation with the student's PhD advisor and committee based on the doctoral student's prior graduate work and post-doctorate career goals.
- **Dissertation Research:** Students must enroll for a minimum of 12 hours of dissertation research credit during the period they plan, implement, and defend their dissertation.
- **Preliminary Examination:** The Preliminary Examination (also called the Comprehensive Examination) for the PhD in Literacy Education is governed by policies specified in Chapter 1 of the UW Student Handbook/Thesis & Dissertation Format Guide. Program-specific procedures for the preliminary examination for the PhD in Literacy Education are as follows:
 - The comprehensive preliminary examination will consist of a written and oral component, and both exams must be passed to satisfy the Comprehensive Preliminary Examination requirement. The doctoral committee will be responsible for the format, content, and scope of the preliminary examination.
 - Whereas aspects of comprehensive exam requirements are addressed within and across various courses in a student's program, enrollment in, and passing courses in, a student's program does not guarantee that the student will pass the comprehensive examination. To pass the comprehensive examination, students must synthesize their learning within and across their courses, and they will need to study resources and references outside of course requirements. Successful completion of the comprehensive examination will require a minimum of several hundred hours of in-depth work. Thus, students should plan to complete their comprehensive examination when they can devote the better part of a semester to it with minimal distractions.
 - For the written component of the comprehensive exam, the student, in consultation with the student's advisor and doctoral committee, will engage in a take-home exam. For the take-home exam, the students will write three to four scholarly papers (which may later be submitted for presentation or publication) that synthesize the students' PhD coursework in Literacy Education at the University of Wyoming and other scholarly work up to this point in the program. Students must work independently on the written component of the comprehensive exam; students may not seek help from professors or other students.
 - For students who have completed the written examination and have passed it provisionally in the judgment of the advisory committee, an oral examination will be scheduled. During the first portion of the oral examination, the doctoral committee may pursue questions or concerns about the written examination. In the remainder of the oral examination, the doctoral committee may ask the student any questions germane to research and scholarship in the field of literacy education.
 - Once the Comprehensive/Preliminary examination is passed, the graduate student becomes a doctoral candidate.
 - In case of failure, the student may repeat the examination once only, after 120 days have passed but not more than four semesters have elapsed. Please note: A "Report on Preliminary Examination" form must be filed with the university whether the student successfully passes her or his preliminary.
 - See http://www.uwyo.edu/registrar/university_catalog/grad_students.html for more detailed information about the preliminary/comprehensive examination process.

[Link to course rotation](#)

Research Apprenticeship:

Doctoral students are required to participate in a research apprenticeship in which they work closely with a faculty member in order to gain experience and skills in conducting research. The apprenticeship may involve an ongoing faculty project or may be a project initiated by the student and faculty member. Examples of acceptable apprenticeships include:

- writing an IRB or grant proposal
- collecting and analyzing data (e.g., a qualitative analysis, a statistical analysis)
- writing a research report for publication independently or collaboratively with a faculty member
- presenting theoretical or empirical work at a professional conference independently or collaboratively with a faculty member
- a project that enhances the student's ability to conduct rigorous educational research.

The Research Apprenticeship must be approved in advance by the doctoral committee, and at the committee's discretion, students may enroll for independent study graduate credit as part of the Research Apprenticeship experience

Diversity:

Diversity is the adherence to the democratic value of mutual respect for, celebration of, and protection of the differences that make up the peoples of the world. It requires the development of a critical consciousness individually, institutionally, and societally about differences in all existing forms and levels of human experiences. Diversity includes, but is not limited to, gender, educational and socioeconomic status, race, ethnicity, language, religion, national origin, physical and mental health, and sexual orientation. Graduates of the University of Wyoming and the College of Education should acquire an understanding and respect of differences within and across cultures, including their own.

For this requirement, students must design, in consultation with their doctoral advisor and committee, a specific plan that enhances their knowledge of cultural diversity issues that address literacy education. This requirement can be met through curricular and extra-curricular experiences, including, but not limited to:

- enrolling in extant courses
- engaging in research or learning projects
- conducting lectures or workshops
- presenting papers at professional conference
- engaging in service at the community, state, national, or international level

Preliminary Examination:

The Preliminary Examination for the PhD in Literacy Education is governed by policies specified in Chapter 1 of the UW Student Handbook/Thesis & Dissertation Format Guide. Program-specific procedures for the preliminary examination for the PhD in Literacy Education are as follows:

- The preliminary examination will consist of a written and oral component, and both exams must be passed in order to satisfy the Preliminary Examination requirement. The doctoral committee will be responsible for the format, content, and scope of the preliminary examination.
- For the written component, the student, in consultation with the student's advisor and doctoral committee, may choose to take either a sit-down or a take-home exam. For the sit down exam option, the student will respond to 2 or 3 questions that synthesize the students' coursework and other scholarly work up to this point in the program. The questions will be prepared by the student's advisor and doctoral committee, with possible input from the student.
- For the take-home exam option, the students will write 2-3 scholarly papers (which may later be submitted for presentation or publication) that synthesize the students' coursework PhD in Literacy Education at the University of Wyoming and other

scholarly work up to this point in the program. The topics of the papers will be determined by the student's advisor and doctoral committee, with possible input from the student.

- For students who have completed the written examination and have passed it provisionally in the judgment of the advisory committee, an oral examination will be scheduled. During the first portion of the oral examination, the doctoral committee may pursue questions or concerns about the written examination. In the remainder of the oral examination, the doctoral committee may ask the student any questions germane to research and scholarship in the field of literacy education.

Dissertation and Oral Defense:

The dissertation and final oral defense of the dissertation will be governed by policies specified in Chapter 1 of the UW Student Handbook/Thesis & Dissertation Format Guide. The dissertation will be prepared and submitted as per procedures in Chapters 2 and 3 of this document.

The dissertation will be a scholarly, independent research effort that demonstrates that the doctoral candidate is able to plan, implement, and convey to an academic audience a novel, significant inquiry in literacy education.

Within the parameters of Graduate Study policies, the dissertation for PhD students in Literacy Education may take a variety of conventional or more contemporary forms. The form of the dissertation will be determined and approved by the doctoral committee in consultation with the candidate, and may include:

- a traditional print dissertation
- a dissertation consisting of a series of scholarly, empirically and/or theoretically focused, professional articles to be submitted for publication, already submitted for publication, or already published
- an electronic or multimedia (including print) format.

Residency:

Doctoral students are required to enroll full time for two consecutive terms (fall and spring semesters and/or summer sessions).

For detailed information on the PhD in Literacy Education at the University of Wyoming, please see the following:

- Ph.D. in Literacy Education Application Procedures & Program Requirements

Once complete, the application packet will be reviewed by faculty in the Literacy Education Program Area. Following the interview, the literacy education faculty will make a recommendation regarding admission for Graduate Study at UW.

Curriculum and Instruction, Ph.D., Concentration in Mathematics Education

Mathematics Education (EMAT) is a recently initiated content specialization in the UW College of Education Curriculum and Instruction (EDCI) doctoral program. The purposes for establishing this new program include the creation of innovative emphases and approaches in the preparation of solidly prepared scholar-leaders for the field of Mathematics Education worldwide.

How to Apply

All program applicants are required to complete an online application to the University of Wyoming and submit an application fee of \$50.

Deadlines

Applications for program are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.

Application Materials

All supporting materials should be submitted through the online application system.

Required materials for consideration into the Curriculum & Instruction PhD program in Mathematics Education include:

- Writing sample (an article, master's thesis, or well done project/course paper)
- An application letter, which discusses yourself, your experience, and your potential research interests
- A resume or curriculum vita
- Three letters of reference
- Transcripts from all universities attended. Unofficial transcripts can be loaded to the online application system, but if admitted to the University, official transcripts will need to be sent prior to beginning the program
- Copy of GRE scores
- International students must submit scores for a language proficiency exam, such as TOEFL or IELTS. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Master's degree in mathematics, mathematics education, or a related area is required
- A minimum of three years of teaching experience is required

Program Requirements

Overall, the doctoral program will require at least 81 semester hours completed within a coherent program of study developed and approved by the candidate's Major Professor and Doctoral Committee (which may include transferring up to 30 approved graduate semester hours from work completed toward a master's degree).

The overall structure includes:

Course Type	Hours Required
College-wide core	9 hours
Mathematics	9 hours
Mathematics Education	18 hours
Electives	21 hours
Research & dissertation	24 hours

Total **81 hours**

To satisfy Mathematics Education hours (18), the following EMAT courses (four required and two joint electives with Science Education) are offered:

Theory and Research for Mathematical Learning and Development
 Theory and Practice for Mathematics Teaching and Teacher Education
 Advanced Study of Mathematics Curriculum, Assessment and Evaluation
 Analysis and Critique of Research in Mathematics Education
 Quantitative Reasoning and Modeling in Mathematics and Science Education
 Principles and Methods for Integrated Teaching and Learning of Mathematics and Science

These advanced Mathematics Education courses along with graduate study in Mathematics and Statistics, and Quantitative and Qualitative Research Methodologies, collectively build knowledge of theoretical and empirical perspectives to lead to a solid competence for engaging in both scholarly and practical work in the field at all levels. One program goal is to stimulate and guide each student to develop their dissertation research as a first step within a well-defined research program that can encompass the initial years of their post-doctoral scholarship.

Annual Review of Progress/Program Timeline

The following provides a framework to specify general expectations and be suggestive of the scope and sequence of the program, while realizing that all specific courses will be selected in consultation with the Major Professor and approved by the Doctoral Committee to satisfy the individual goals and needs of the student. An overall GPA of 3.0 must be maintained.

Year 1 (minimum 18 hours)

- Complete two mathematics education courses, receiving at least a B in each.
- Complete at least one college-wide core course (e.g., EDCI 5870 Introduction to Doctoral Studies)
- Complete at least one appropriate graduate mathematics course
- Complete two research methodology courses
- Completion of electives as recommended
- Identify and establish the choice of Major Professor; in consultation develop a program of study; establish the Doctoral Committee
- At year-end, submit preliminary proposal of research interests and ideas, and an annual self-evaluation; begin development of Reading List

Year 2 (minimum 18 hours)

- Complete two mathematics education courses, receiving at least a B in each.
- Complete at least one college-wide core course
- Complete at least one appropriate graduate mathematics course
- Complete two research methodology courses
- Completion of electives as recommended
- In Fall, conduct initial Doctoral Committee meeting; discuss and approve program of study; preliminary discussion of research interests
- Maintain and extend the Reading List; by mid-Spring, share it with the Doctoral Committee for review and feedback
- At year-end, submit an updated proposal of potential dissertation research, and an annual self-evaluation
- Submit a proposal to write and present a scholarly paper to a recognized mathematics education research conference (typically in collaboration with other graduate students and/or one or more faculty members)

- Conduct Doctoral Committee meeting to finalize Reading List and to frame and plan for completion of the written comprehensive exams before the end of Fall term

Year 3 (minimum 18 hours)

- Complete all additional courses on the approved Program of Study
- Enroll in at least 6 hours of dissertation research to conceptualize and develop the dissertation research proposal (which may include a pilot or preliminary study)
- Complete oral exams, and the defense and approval of the dissertation research proposal; obtain IRB approvals as needed
- Begin dissertation research project: complete detailed plans, collect data, engage analyses, begin writing as appropriate
- Submit a scholarly manuscript to a recognized mathematics education research journal (typically in collaboration with other graduate students and/or one or more faculty members)
- Submit an annual status report and self-evaluation

Year 4/Year 5 (as needed)

- Enroll in at least 6 hours of dissertation research each semester
- Continue toward completion of the dissertation research
- Finish writing, and defend the dissertation research; present your research at a Mathematics Education colloquium
- As feasible, begin developing one or more scholarly manuscripts based upon the dissertation
- Conduct search and interviews for seeking a post-doctoral position

In the culture of our program, we seek to function as faculty and students in a dynamic community of active scholars. As such, we acknowledge that many significant developmental experiences for doctoral students must and will take place outside formal course venues. Therefore, all students and faculty are expected to be vitally involved in ongoing research, development, and outreach projects and activities in which continuous interaction and collaboration occurs, within Mathematics Education and other disciplines.

Required Courses

EMAT 5100: Theory & Research in Learning & Development (3) - Fall of Even Years

EMAT 5200: Advanced Math Curriculum, Assessment & Evaluation (3) - Spring of Even Years

EMAT 5300: Theory & Practice in Mathematics Teaching & Teacher Education (3)-Spring of Odd Years

EMAT 5400: Analysis & Critique of Research in Mathematics Education (3)-Fall of Odd Years

EMAT 5500: Colloquium in Mathematics Education (1-3)-Every Fall and Spring

EMAT 5980: Dissertation Research (1-12)-Every semester

Curriculum and Instruction, Ph.D., Concentration in Science Education

Program Overview

The Curriculum and Instruction PhD Program in Science Education prepares students for productive careers in scholarly inquiry at research & outreach centers and universities. In an apprenticeship model, students study with a cadre of professionally active

faculty to produce scholarly work, take advanced coursework in science education, collaborate with faculty on grants and research projects, and have opportunities to teach undergraduate courses in education and science.

Program Specific Requirements

- As part of the online application, provide a letter of intent. In this letter, describe why you wish to pursue a PhD in Science Education, including your career goals; your prior experiences in science or science education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to science; potential areas of focus in a science doctoral program; potential research interests; and any other information you consider to be relevant to your admission.

Additional Requirements and Important Information

- GRE scores are required. The admissions committee will consider the Verbal Reasoning and Quantitative Reasoning scores in its determination. Effective July 1, 2016 applicants must have GRE scores of 153 Verbal and 144 Quantitative Reasoning or higher to be considered for admission. Minimum scores do not guarantee admission. Other criteria, as well as faculty capacity, will be considered in the admission process.
- Applicants need to contact a member of the Science Education PhD Program faculty, either in person or via telephone, to discuss career and research goals. This assists us in assigning a graduate advisor upon admission.
- Following the application review, the program faculty will make a recommendation regarding admission for Graduate Study at UW. Applicants will be notified of the decision by email. Applications will be considered at any time, but students who apply by January 15 will receive full consideration for graduate assistantships for the following academic year.
- Applicants are evaluated on alignment of research interests with those of existing faculty, clarity of application letter and goals, prior teaching or work experience, letters of recommendation, transcripts (including GPA) and previous research experience with an accompanying sample of professional writing if available, according to the Science Education PhD Admissions Rubric.
- International students must have TOEFL scores of 540 (paper based test), 76 (internet based test), 197 (computer based test) or IELTS scores of 6.5 higher. Minimum scores do not guarantee admission. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Program Details

The Curriculum & Instruction PhD. Option in *Science Education* prepares students for productive careers in scholarly inquiry at research & outreach centers and universities. In an apprenticeship model, students study with a cadre of professionally active faculty to produce scholarly work, take advanced coursework in science education, collaborate with faculty on grants and research projects, and have opportunities to teach undergraduate courses in education and science.

Coursework

The Science Education PhD option requires a minimum of 81 semester credits of coursework and dissertation hours. As many as 30 credit hours from a Masters degree program may be applied to the PhD program, subject to committee approval.

Courses must be taken in the following areas:

- Doctoral Studies (3 courses)
- Science Education Core (3 courses)
- Research in Science Education (2 courses)
- Research methods/Graduate Science Content (6 courses)
- Science Education Research Colloquium (1-6 credits)

- Dissertation (minimum of 6 credits)

For more details, please view the Science Education Program of Study Worksheet.

Residency

The standard residency requirement is a minimum of one (1) semester. The purpose and intent of a residency requirement is to provide close, collaborative teaching, research, and writing opportunities with faculty members. Summer terms will count toward this requirement. If personal circumstances will not accommodate a semester on campus in Laramie, contact the Program Coordinator for possible options.

Additional Expectations

In order to be successful, students need to demonstrate throughout the program an understanding of research methodologies, data analysis, and academic writing.

Although not necessarily available for graduate credit, the following activities are expected to be completed, as approved, monitored, and assessed by a students' committee, prior to defense.

- Completed, supervised teaching internship during graduate program (e.g., GTA)
- A total of 18 graduate hours in science
- Submission of a scholarly manuscript, judged publishable by the committee
- Presentation at a professional conference on scholarly work

This program will allow students to focus on one of three areas of science education: Earth and Space, Energy, and Environment

Education, Ed.D., Concentration in Curriculum and Instruction

Doctor of Education (ED.D.) Online, Concentration in Curriculum and Instruction

How do students learn best? How can educators teach more effectively? Experienced educators with three years or more of classroom teaching experience and a master's degree who find themselves asking how those intrepid questions can further their inquiry at the University of Wyoming.

Implementing a successful curriculum provides a functional framework for teachers to deliver high-quality, and equitable education to all students. The Doctor of Education in Education with a concentration in Curriculum and Instruction program at UW College of Education will provide you the expertise to become a curriculum leader in your organization.

Instead of engaging in "traditional" research work, as an Ed.D candidate in the Curriculum and Instruction program you will work with either a school or other non-profit educational organization to identify a problem of practice to examine and solve. Through this research you will combine creativity, pedagogical theory and systematic inquiry to develop solutions to improve the quality of education within that organization.

Pursue your doctor of education studies in a program that is offered entirely online! Continue in your current role as you gain expertise to take your career to the next level. There are many benefits to earning your Ed.D. in Education from UW, learn more.

Interested in a doctoral program that culminates in an intensive independent research project, check out our Ph.D. programs!

The Doctor of Education in Education with a concentration in Curriculum and Instruction program is 80 credit hours and all courses are delivered entirely online. You must have three years of classroom teaching experience, a master's degree to apply to the program. Applicants must also complete EDRE 5530 - Introduction to Research or an equivalent course prior to entering the program.

Required Courses (80 credit hours)

Program Knowledge Base

Students must take all 15 credit hours listed below.

- EDCI 5600 - Diversity in Education (3 credit hours)
- EDCI 5730 - Learning and Cognition (3 credit hours)
- EDAD 5720 - Educational Leader as Change Agent (3 credit hours)
- EDAD 5650 - Educational Leader as Communicator (3 credit hours)
- EDRE 5660 - Proposal Writing (3 credit hours)

Advanced Research Courses

Select 9 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject doctoral committee approval.

- EDRE 5600 - Ed Research 1: Descriptive (3 credit hours)
- EDRE 5610 - Ed Research 2: Group Comparison (3 credit hours)
- EDRE 5620 - Ed Research 3: Correlational (3 credit hours)
- EDRE 5630 - Ed Research 4: Multivariate (3 credit hours)
- EDRE 5550 - Action Research (3 credit hours)
- EDRE 5640 - Intro to Qualitative Research (3 credit hours)
- EDRE 5650 - Advanced Qualitative Research Methods (3 credit hours)

Practicum/Internship

Two credit hours. Must be determined with doctoral committee.

- EDCI 5580 - Internship (2 credit hours)

Curriculum and Instruction Specialization

Students must take the required courses listed below and select an additional 12 credit hours of elective courses in the Curriculum and Instruction area. Course selection is subject doctoral committee approval.

- EDCI 5790 - Learning Theories & Instructional Principles (3 credit hours) *Required*
- EDCI 5800 - Curriculum Development (3 credit hours) *Required*

Final Project: Dissertation in Practice or Other Project Option

Students must take all 6 credit hours listed below.

- EDCI 5980 - Dissertation Research (6 credit hours)

Final (Applied) Project Options

Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)

- Scholarly, academic writing using APA style
 - Primary or secondary data
 - Authored by individual or small groups of students
 - Uploaded to ProQuest for dissertations of practice or other projects in a dissertation format, and uploaded to the Mountain Scholar Digital Collections for projects in a non-dissertation format
- Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Admission Requirements

Applications for the Doctor of Education (EdD) program with a concentration in Curriculum and Instruction are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following supplemental material:

- Letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Recent GRE scores.

- Three letters of recommendation, completed by an individual familiar with the applicant's academic performance, a current or recent supervisor, and/or a selected colleague and/or community member.
- Academic Resume/Curriculum Vitae
- Transcripts
- TOEFL/IELTS scores (for international, non-native English speaking applicants). Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's bachelor's degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Graduate Assistantships

Applicants interested in a Graduate Assistantship must submit a graduate assistantship application at the time of admission application process or consult student's advisor or school director thereafter.

Questions?

Reach out to the Curriculum & Instruction Program Coordinator, Dr. John Kambutu, John.Kambutu@uwyo.edu.

Education, Ed.D., Concentration in Educational Leadership

Doctor of Education (Ed.D.) Online, Concentration in Educational Leadership

About Educational Leadership

Offered entirely online, UW's educational leadership Ed.D. program will prepare you for top-level leadership positions in K-12 educational settings as assistant superintendents and superintendents.

Unlike the Ph.D. in Educational Leadership where the focus is on research, the Ed.D. program emphasizes applied research. UW offers a superintendency internship and dissertation through which you will acquire the skills to deploy best practices and the latest scholarship in your organization.

Admission Requirements

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Final Project Options

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Requirements

Core Educational Leadership Courses

- HIED5630 - Advanced Organizational Leadership Credits: 3
- EDAD5600 - Educational Leader as Manager of Human Resources Credits: 3
- EDAD5650 - Educational Leader as Communicator Credits: 3
- EDAD5700 - Educational Leader For Instruction Credits: 3
- EDCI5720 - Literacy Difficulties: Assessment and Instruction Credits: 3
- EDAD5750 - Educational Leader for the Board and Community Credits: 3
- EDAD5800 - Educational Leader as Resource Manager Credits: 3
- EDAD5815 - Advanced School Law Credits: 3
- EDAD5850 - Educational Leader as Direction Setter Credits: 3

Internship

- EDAD5580 - Supervised Internship in Educational Administration Credits: 1-8

Educational Research Courses

(at least 1 quantitative and 1 qualitative)

- EDRE5600 - Educational Research I: Descriptive Research Credits: 3
- EDRE5610 - Educational Research: Group Comparison Research Credits: 3
- EDRE5620 - Educational Research: Correlational Research Credits: 3
- EDRE5640 - Introduction to Qualitative Research Credits: 3
- EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research Credits: 3
- EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3
- EDRE5870 - Seminar Credits: 1-8

Additional Requirements:

- EDRE5660 - Dissertation/Thesis Prospectus Writing Credits: 3

- EDAD 5980 - Dissertation Research Credits: 6

Education, Ed.D., Concentration in Higher Education Administration

Program Specific Degree Requirements

The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The Ed.D. is delivered through distance delivery system and requires a minimum of 77 semester hours beyond the bachelor's degree, of which 41 hours must be taken in the student's chosen field, and 6 hours of dissertation. Candidates may, with the approval of the faculty, transfer up to 30 semester hours from previous graduate level coursework. A bachelor's degree and a master's degree are required of all students to be admitted to the Ed.D. program.

Required on-campus orientation during first fall semester.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Education, Ed.D., Concentration in Learning, Design, and Technology

About Learning, Design and Technology

As an online Ed.D. student in learning, design and technology, you will learn to use advanced research methods to study and identify educational opportunities in various settings while also developing and evaluating new ways to address those opportunities.

Unlike the Ph.D. in Learning, Design and Technology, the Ed.D. program emphasizes applied research, culminating in the completion of a problem-based dissertation or project. Rather than leading to an academic career, the Ed.D. is designed for educators who want to contribute to the educational technology field at the highest levels of practice.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.

- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Required on campus orientation during first fall semester.

The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The program moves beyond the foundations of distance education, instructional design, and technology integration to focus on advanced application and research. Students apply design, development, and evaluation principles to explore authentic challenges and develop real solutions in diverse settings (e.g., K-12 education, corporate and government centers, and higher education institutions). Through these experiences, students learn how to use advanced research methods to explore workplace problems, design and deliver solutions, and implement and evaluate change. Emphasis is placed on in-depth mentoring and collaboration, advanced research, development of real-world applications, and training solutions offered through distance delivery platforms.

Doctor of Education Curriculum Requirements

The EdD program is 75 credits. The theory, research, and resulting instructional principles are addressed in courses in the following areas: (a) instructional design, visual literacy, and change (b) media development and production; and (c) instructional management, implementation, and technology integration. Graduate students in the program can take all of their coursework online. The EdD uses a Dissertation in Practice format for dissertation research. UW is a member of the Carnegie Project on the Education Doctorate.

Required Courses (75 credits*)

Foundational Knowledge Base

Students may transfer up to 30 credits toward the total program from a related master's degree. Transfer credits need to be accepted by the program faculty. If a student lacks credits in this area, they may take courses available through the Learning, Design, and Technology MS Program.

Program Knowledge Base

Students must successfully complete all 27 credit hours listed below.

- HIED 5630 Advanced Organizational Leadership (3 credit hours)
- ITEC 5660 (LDTE 5660): Interactive Learning Systems (3 credit hours)
- ITEC 5870 (LDTE 5700): Issues, Practice, and Research in LDT (3 credit hours)
- LDTE 5710: Transformational Learning (3 credit hours)
- ITEC 5870 (LDTE 5720): Critical Perspectives and Applications of Technology Integration (3 credit hours)
- ITEC 5870 (LDTE 5730): Game Design and Development (3 credit hours)
- ITEC 5870 (LDTE 5740): Global and Cultural Perspectives in LDT (3 credit hours)
- ITEC 5870 (LDTE 5750): Technology Innovations: Past, Present, and Future (3 credit hours)
- ITEC 5760 (LDTE 5760): Instructional Design Applications (3 credit hours)
- ITEC 5070 (LDTE 5070): Trends (3 credit hours) [can be substituted for a relevant course]

** new LDTE prefix is in the process of phasing into the program beginning Fall 2022; ITEC is still active and counts in the program of study until transition is complete.*

- **Research Methods**

- Students must successfully complete 12 credit hours in educational research.
- Required: Research Courses
- EDRE 5600 Ed Research 1: Descriptive Research (3 credit hours)
- EDRE 5640 Intro to Qualitative Research (3 credit hours)
- EDRE 5660 Dissertation/Thesis Prospectus Writing (3 credit hours)

Select at least one additional research course:

Quantitative:

- EDRE 5610 Ed Research: Group Comparison (3 credit hours)
- EDRE 5620 Ed Research: Intro to Qualitative Research (3 credit hours)

Qualitative:

- EDRE 5645 Ed Research: Phenomenology, Case study, and Grounded Theory in Qualitative Research (3 credit hours)
- EDRE 5620 Ethnography and Narrative Inquiry in Qualitative Research (3 credit hours)

Dissertation or Approved Project

Students must successfully complete the exam and dissertation process. **A minimum of 6 credit hours of dissertation research** are required for the program of study.

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization. Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

The Ed.D. program requires a minimum of 81 credit hours beyond the bachelor's degree. Candidates may, with the approval of the committee, transfer up to 30 credit hours from previous graduate-level coursework in a closely related field. The program is delivered online with the exception of some the spring residencies.

- Program knowledge base: 48 credits
- Research: 9 credits
- Professional Writing: 6 credits
- Electives: 12 credits
- Dissertation: 6 credits

Education, Ed.D., Concentration in Mathematics Education

Doctor of Education (EDD) Online with Concentration in Mathematics Education -

The Doctor of Education in Education with a concentration in Mathematics Education (EMAT) at the University of Wyoming will shape practitioners, like math instructors, into leaders and innovators in mathematics education. Graduates of the program are equipped with cutting-edge applied research skills, mathematics pedagogy expertise, and a commitment to issues of equity, inclusion and social justice.

Explore the questions you have about contemporary educational issues within a research context. Combine theory with systematic inquiry to solve problems of practice and support meaningful learning experiences for all students, particularly those in historically marginalized groups.

Applicants to the EMAT Concentration will identify a preliminary problem of practice that they hope to examine and solve as a candidate in the program. You will work in cooperation with educational organizations to apply your creative and innovative solutions to address the problem of practice.

Offered entirely online, you can pursue the Ed.D. in mathematics education while you continue in your current position. Learn and bond with the same group of students during the course or your Ed.D. studies- our program is cohort-based. Learn more about the benefits of gaining your Ed.D. degree in education at UW.

Interested in degree with an intensive independent research focus? Take a look at our Ph.D in programs in education.

Admission Requirements

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Final Project Options

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Questions?

Reach out to the Mathematics Education Program Coordinator, Dr. Rick Kitchen rkitchen@uwyo.edu.

Required Courses

Program Knowledge Base

Select 15 credit hours from the below list. Students should consult their advisor before choosing to take either EMAT 5150 or EMAT 5160.

- EMAT 5150
- EMAT 5160
- EDCI5600 - Diversity in Education Credits: 3
- EDCI5730 - Learning and Cognition Credits: 3
- EDAD5720 - Educational Leader as Change Agent Credits: 3
- EDAD5650 - Educational Leader as Communicator Credits: 3
- EDRE5660 - Dissertation/Thesis Prospectus Writing Credits: 3

Mathematics Education Specialization

Students must take all 18 credit hours listed below.

- EMAT5100 - Theory and Research for Mathematical Learning Credits: 3
- EMAT5200 - Advanced Study of Mathematics Curriculum, Assessment, and Evaluation Credits: 3
- EMAT5300 - Theory and Practice for Mathematics Teaching and Teacher Education Credits: 3
- EMAT5400 - Analysis and Critique of Research in Mathematics Education Credits: 3
- EMAT5600 - Quantitative Reasoning & Modeling in Mathematics and Science Education Credits: 3
- EMAT5700 - Principles and Methods for Integrated Teaching & Learning Mathematics & Science Credits: 3
- EMAT Culture, Power and Identity in Mathematics Education, Credits: 3

Advanced Research Courses

Select 9 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject doctoral committee approval.

- EDRE5600 - Educational Research I: Descriptive Research Credits: 3
- EDRE5610 - Educational Research: Group Comparison Research Credits: 3
- EDRE5620 - Educational Research: Correlational Research Credits: 3
- EDRE5630 - Educational Research IV: Multivariate Research Credits: 3
- EDRE5550 - Action Research Credits: 3
- EDRE5640 - Introduction to Qualitative Research Credits: 3
- EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research Credits: 3
- EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3

Practicum/Internship

Two credit hours. Must be determined with doctoral committee.

- EDCI5580 - Internship1 Credits: 8

Dissertation in Practice

Students must take a minimum of 6 credit hours.

- EMAT5980 - Dissertation Research Credits: 1-12

Education, M.A., Concentration in Curriculum and Instruction

The UW Master of Arts in Education degree program with a concentration in curriculum and instruction will help you become that master teacher who advocates for students, mentors younger colleagues and a professional who thinks outside conventional wisdom to leverage best practices into innovative programs and practices that work.

The program is offered fully online making it possible for you to advance your career while also maintaining your current teaching schedule.

About Curriculum and Instruction

The UW Master of Arts in Education with the curriculum and instruction concentration is for educators with a minimum of one year teaching experience who are looking to gain a variety of pedagogical knowledge and research experience. The degree will give you the knowledge and research expertise to take your passion into a career of continuous exploration and improvement.

Offering a highly customizable program, UW's MA in curriculum and instruction allows you to pursue additional expertise in your content area, add endorsements such as literacy, ESL, early childhood special education or develop specialties in content or curriculum. You can even use your degree as a pathway to National Board Certification, which also meets your capstone project requirement.

Program Specific Admission Requirements

Applications for the Master of Arts degree in Education with an Area of Concentration in Curriculum and Instruction are reviewed for admission two times each year. To be considered for admission, applications must be completed and submitted by September 1st for spring semester admission, and February 1st for summer/fall admission. Incomplete applications will not be considered. International students are encouraged to apply a semester earlier to allow sufficient time for paperwork. All applications will be completed through the UW Admissions website: <http://www.uwo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- letter of intent;
- academic resume, including information about teaching experience;
- contact information for three references;

- TOEFL or IELTS scores (for international, non-native English speaking applicants); Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- college transcripts.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Score of 3 or 4 on a letter of intent. This letter serves as a writing sample, and takes the place of GRE scores in the admission process;
 - One year of P-12 teaching experience or its equivalent. This requirement may be waived for applicants who have been admitted to the Teaching Elementary School or the Teaching Secondary Content Graduate Certificate program. Such applicants will be considered for admission on a conditional basis, pending successful completion of the Teaching Elementary School or Teaching Secondary Content Graduate Certificate program;
 - Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent bachelor's degree from an accredited institution;
 - International, non-native English speaking applicants must have a TOEFL score of 525 (paper-based), 197 (computer exam) or above or an IELTS score of at least 6.5. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

MA Program Requirements

Curriculum & Instruction

The Master of Arts degree in Education is offered in two options:

- Plan A, which requires writing a thesis
- Plan B, which requires a written paper based on a scholarly project

A minimum of 32 semester hours beyond the Bachelor's degree is required. All course work and degree requirements must be approved by the student's graduate committee.

The Master of Arts degree in Education consists of a set of core courses and one of three emphases: Certificates/Endorsements, Content Studies, or Curriculum Studies. All students are required to complete the core courses and one of the three emphases. Specific courses are outlined below.

View the M.A. Degree Program Overview and Application Instructions packet for forms and details.

Core Courses: (17-20 credit hours) students are required to take core courses:

- Assessment (3 credit hours): EDCI 5500 - Classroom Assessment
- Curriculum (3): EDCI 5000 - Principles of Curriculum
- Diversity (3): EDCI 5450 - Issues in Multicultural Education
- Instruction (3): EDCI 5790 - Advanced Instructional Strategies (Learning Theories & Instructional Principles as of Fall 2017)
- Research (3): EDRE 5530 - Intro to Research or EDRE 5550 - Action Research
- Midpoint Review (1): EDCI 5400 - Portfolio Reflection (1) (EDCI 5400 represents a midpoint evaluation and must be taken no later than 2 semesters [may include a summer semester] before graduation).
- Capstone Experience (1-4): Plan A thesis (4) OR Plan B project (2) OR National Board Certification (1-3). Students, as guided by an academic advisor, may pursue a Plan A thesis or a Plan B non-thesis. Generally, one can think of the Plan A thesis as a

research project that emerges when a student finds that a problem of interest has not been addressed in the research literature. A Plan B non-thesis is a research project that emerges from practice, typically involving a problem of interest within a student's school, classroom, or work site.

Emphases (15-18 credit hours with approval from Committee)

Certificates/Endorsements

- Early Childhood/ECSE (25-26 hours required-18 may be applied to elective credit)
- English as a Second Language (15 credit hours)
- Literacy (18-21 credit hours)

Content Studies (15 to 18 hours)

This specialization is intended for those practicing teachers who are pursuing the "highly qualified" status. Coursework will primarily be taken in students' content areas (e.g., History, English, etc. 4000 and 5000 level courses).

Curriculum Studies (15 to 18 hours)

This specialization is intended for those who are interested in focusing on issues of curriculum and instruction.

- Potential coursework:
National Board Certification (See below for more information)
EDCI 5800 - Curriculum Development
Research Methods
Educational Leadership
Counseling
Instructional Technology
Special Education
Literacy
English as a Second Language (ESL)
Diversity
Teachers of American Indian Children
Graduate level content courses

Capstone Experience

- EDCI 5960 Thesis/Plan A (4 credit hours)
 - EDCI 5090 Plan B Research/Plan B project (2 credit hours) (EDCI 5890 Directed Professional Study prior to Summer 2017)
 - EDCI 5890 Directed Professional Study/National Board Certification (1 credit hour)
- TOTAL: 32 minimum semester hours**

Areas of Emphasis

Certificates/Endorsements Emphasis

The Certificates/Endorsements emphasis allows practicing teachers to take coursework toward eligibility for certificates/endorsement in Literacy, Early Childhood Education, English as a Second Language, or Teachers of American Indian Children through the state of Wyoming's Professional Teaching Standards Board. These endorsements are only available to teachers who hold valid teaching certification in the state of Wyoming.

Content Studies Emphasis

The Content Studies emphasis is designed to allow practicing teachers to pursue further education in a particular content area - such as history, English, math, etc. -- through 4000 and 5000-level courses in those content areas. This coursework may be helpful particularly in the case of practicing teachers who are pursuing "highly qualified" status in a content area. Please note that this option is based on availability of graduate courses in other departments that the student may be interested. There is no guarantee of outreach course availability.

Curriculum Studies Emphasis

The Curriculum Studies emphasis is designed for practicing educators who are interested in gaining knowledge and expertise related to curriculum and instruction.

National Board Certification (NBC)

FREQUENTLY ASKED QUESTIONS

Will there be classes offered to help me proceed through the National Board Certification process?

Yes, a series of seminars and workshops are offered through the Wyoming National Board Certification Initiative each semester. Information about these seminars and workshops is posted and updated on the Wyoming NBC website: <http://www.wnbc.org/>. Graduate level Curriculum and Instruction credit is available for these seminars (courses listed as EDCI 5515). These courses are designed to support teachers as they grow as professionals and simultaneously proceed through the Board Certification process and the UW Master's program.

Where will the classes be offered?

The classes are offered around the state of Wyoming to allow participation across the state. Dates and locations for upcoming seminars and workshops can be found on the Wyoming NBC website: <http://www.wnbc.org/>. Participants enroll in the courses through UW Outreach Credit Programs (toll free phone number: 1-800-448-7801). Up to 9 total credit hours of the seminars can be taken by enrolled graduate students. Up to 9 total seminar/workshop credit hours may be applied as electives in the Curriculum and Instruction Master's program.

Who will teach these classes?

The seminars are taught by Barbara Maguire, a Nationally Board Certified teacher and expert in the NBC process.

How many times can I take the NBC class?

Graduate students/National Board Candidates can enroll in the seminars as many times as necessary/desired. For those seeking graduate degrees, up to 9 credits can be applied to the Curriculum and Instruction Master's degree program as elective hours dependent upon the student's committee approval.

What about tuition?

Students will pay regular graduate tuition for the seminar classes. The current UW fee schedule can be found at the following website: http://www.uwyo.edu/sfa/cost_of_attendance/

Will I need to complete a Thesis or Plan B paper to finish my C&I degree? No, the NBC Portfolios will be accepted in Lieu of a Plan B Paper for teachers pursuing NBC Certification and a UW Master's degree simultaneously. This acceptance is dependent upon committee approval (not acceptance by the National Board). An agreement to utilize this procedure and maintain portfolio confidentiality has been reached between UW and the NBPTS (National Board for Professional Teaching Standards). The NBC portfolio must be submitted and defended (in a meeting with the student's graduate committee) prior to initial submission to the NBPTS. The committee's portfolio copies will be destroyed after the defense.

Note: The Rubric for Assessment of the presentation is provided below.

If I am already a National Board Certified teacher, can I apply my NBC work retroactively to a graduate degree?

No, the program is designed for those working on National Board Certification and a C&I Master's degree simultaneously.

How do I apply for a UW Curriculum and Instruction Graduate Program?

The graduate application and other information can be found here.

What if I have Additional Questions?

If you have additional questions, please contact the UW Department of Curriculum and Instruction (curriculum@uwyo.edu; 307-766-6371).

Assessment Checklist for National Board Certification (NBC)

Portfolio & Presentation

Committee members will evaluate the following areas and will determine if the student/NBC candidate accomplished each of these aims/activities at a level sufficient to warrant the substitution of the NBC portfolio and presentation for the Plan B requirement. S/U (Satisfactory/Unsatisfactory) will be assigned for each area, and an overall evaluation of "S" must be achieved for portfolio to serve in lieu of the Plan B paper.

_____ Overall evaluation of the portfolio and presentation as suitable substitutes for Plan B paper/project and defense

Presentation of NBC Portfolio to Master's Committee:

_____ Student provides a brief overview of National Board Certification process and portfolio

_____ Student describes process of working on the portfolio (including connections to C&I courses taken, time commitment, assessments and data analysis, and reflections)

_____ Student presents at least one explicit connection between the portfolio documentation and his/her C&I Master's Degree coursework (e.g. assessment strategy learned in literacy specific course was used to evaluate student work included in NBC portfolio), and explains ways processes informed each other

_____ Student describes challenges, pleasures, difficulties associated with the NBC process

_____ Student summarizes learning derived from portfolio process and completion

More information on National Board Certification:

- National Board Certification
- How to get started

Visit our Course Schedule page to view projected MA core and emphasis course offerings

Requirements

- Minimum of 32 hours of graduate credit
- Many courses delivered using distance technologies
- Core Courses: 16 hours of program area core graduate credits
- Concentration: 15+ hours in either a certificate or endorsement program, academic content area, or general curriculum and instruction area of interest (with direction and consent of faculty adviser)

Capstone Consisting of One of the Following:

Plan A (Thesis)

- EDCI5960 - Thesis Research Credits: 1-12 (4 graduate credits)

Plan B (Non-Thesis)

- EDCI5090 - Plan B Research Credits: 1-3 (2 graduate credits)

National Board Certificate

- EDCI5890 - Directed Professional Study Credits: 1-6 (1 graduate credit) **AND/OR**
- EDCI5515 - National Board Certification Seminar Credits: 1-3

C&I Program Core:

- EDCI5500 - Classroom Assessment Credits: 3
- EDCI5000 - Principles of Curriculum Credits: 3
- EDCI5450 - Issues in Multicultural Education Credits: 3
- EDCI5790 - Learning Theories and Instructional Principles Credits: 3

- EDRE5550 - Action Research Credits: 3
- **OR**
- EDRE5530 - Introduction To Research Credits: 3

- EDCI5400 - Midpoint Portfolio Reflection Credits: 1

Areas of Concentration

- Certificates or Endorsements
- Early Childhood Special Education (see www.uwyo.edu/ste/earlychildhood-education/earlychildhood-special-education.html)
- English as a Second Language (see www.uwyo.edu/ste/curriculum-instruction/english-second-language/)
- Literacy (see www.uwyo.edu/ste/elementary-education/endorsements/certificateof-literacy.html)
- Content Studies - Math, History, Art, Music, Science, Teachers of American Indian Children
- Curriculum and Instruction Studies - focus on special education, educational leadership, diversity studies, counseling, instructional technology, etc.

Education, M.A., Concentration in Educational Leadership

Educational Leadership-Master of Arts (MA) Online

As an educator, you're already making a difference. But what if you could influence what happens on the building-level? Could you be the person who helps teachers feel more empowered? Who knows how to bridge differences, build consensus and develop a school atmosphere where faculty, staff and families support one another in their common mission to nurture citizenship, critical thinking and a thirst for knowledge?

The University of Wyoming makes it possible for you to get the training you need to become a K-12 principal-conveniently and on your own terms through this 100 percent online program.

What is Educational Leadership?

Emphasizing courses in leadership issues specific to education such as instructional leadership, curriculum development and community relations, UW's online educational leadership program will also ground you in practice through an in-depth supervised internship in elementary, middle and high schools.

The UW educational leadership master's is a practice-forward program that qualifies you for Wyoming principal certification, readying you for building principalship.

Master of Arts Program Admission

Application Deadlines

February 1 - If applying for following fall, or spring semester.

September 1 - If applying for following spring, or fall semester.

Admission Requirements

Domestic Students^[1]_{SEP}

GPA: 3.0^[1]_{SEP}

GRE: no requirement

International Students^[1]_{SEP}

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

^[1]_{SEP}GRE: 147 min in each subtest and 4.0 minimum on analytical writing

Additional Requirements

Must have a minimum of 3 years teaching experience

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

- Access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)
- Agree to admissions terms and submit your application

Step 2: Submit official copies of transcripts to UW Admissions.

UW Office of Admissions

Knight Hall 150

Department 3435, 1000 E. University Avenue

Laramie, WY 82071

Phone: (307) 766-5160

Toll Free: (800) 342-5996

E-mail: admissions@uwyo.edu

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A letter of intent describing why you want to be an educational leader
- A current resume
- Copy of current teaching certificate
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)
- A completed principal program application
- A superintendent approval form signed by the superintendent of the district where you plan to perform your internship (scan and upload)
- Current recommendation letters addressing leadership skills from three different referees (the portal will send a request to each of them after you enter their email addresses):
 - two from referees who are familiar with your leadership skills
 - current principal

Core Courses

The master's is a 33 credit program which includes the four core classes, 3 credits each:

- EDAD5010 - Leadership for Curriculum Development Credits: 3
- EDAD5020 - Leadership for School Organization Credits: 3
- EDAD5030 - Leadership for School and Community Relations Credits: 3
- EDAD5040 - Leadership for Instruction Credits: 3

Other Courses

- EDRE5580 - Supervised Internship Credits: 1-8
- EDEX5720 - Special Education Law Credits: 3
- EDAD5050 - Leadership for Democratic Schools Credits: 3
- EDAD5150 - Assessment, Accountability, and Student Learning Credits: 3
- EDRE5530 - Introduction To Research Credits: 3
- EDAD5080 - Introduction to School Law Credits: 3

Education, M.A., Concentration in Higher Education Administration

Adult learning, rural access to continuing education, workforce training and institutional operations are just some of the issues you'll explore in UW's higher education administration master's program.

Plus, the online master's degree program in higher education administration at the University of Wyoming balances theory with practice to give you the knowledge and skills you need to enter the field or advance at your current institution.

Most importantly, you will gain an understanding of where you can make a difference as a leader in the vast field of post-secondary education.

About Higher Education Administration

At UW, the higher education administration master's is a broad-based program that will give you a strong foundation in the history and ideas underpinning America's system of higher learning. You will also gain expertise in learning theory, adult education and the functional areas of "business" in universities, community colleges and adult education agencies.

By the time you complete your program, you will be ready to level up your career and take your place as a skilled administrator in higher education, government or the nonprofit sector.

Master of Arts Program Admission

Application Deadlines:

January 15 - Fall/Summer

May 15- Fall

September 15 - Spring

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

- Click here to access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the \$50 application fee
- Submit ALL required documents to the online document portal (see below for details)

Step 2: Submit official copies of transcripts to UW Admissions.

*University of Wyoming Admissions
1000 E. University Ave.
Laramie, WY 82071*

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- • **A letter of application.** You should discuss your professional and academic goals as well as share your perceptions about how the MA in Higher Education Administration (MA-HIED) will help in achieving those goals. Any special issues that you think the admissions committee should know about (e.g., undergraduate GPA below 3.0, past graduate HIED courses taken under the "six-credit rule", etc.) should also be highlighted.
- **A professional resume or curriculum vitae.** No one format is "correct", but the information most important to include is work experience.
- **Three references provided.** Full contact information for three references who might speak to your academic potential and/or potential for a career in higher education, including an active email address, should be offered in a separate document clearly marked as "References". Once the Office of Admissions has this information, they will contact the references via email and request that they complete a questionnaire and upload a letter. It is a good idea to check with Admissions in advance of the admissions deadline regarding any reference letters that may still be outstanding, and follow up with any of those references.

Program Specific Degree Requirements Master's Program

The M.A. program is a professional degree program that does not require a Plan A (thesis) or Plan B.

Required Courses

- EDRE5530 - Introduction To Research Credits: 3
- HIED5000 - Community College Leadership Credits: 3
- HIED5020 - Higher Education Systems Credits: 3
- HIED5030 - Continuing and Professional Education Credits: 3
- HIED5040 - Higher Education Staffing Credits: 3
- HIED5050 - Workforce Training Credits: 3
- HIED5060 - Program Budgets and Instructions Credits: 3
- HIED5240 - Teaching Adults Credits: 3
- HIED5610 - Planning and Evaluation of Instructional Systems Credits: 3
- HIED5660 - Community College Credits: 3
- HIED5090 - Masters Capstone Credits: 3

Education, M.S., Concentration in Learning, Design, and Technology

Learning, Design and Technology-Master of Arts (MS) Online

It's hard to imagine a sector of the economy that isn't touched by the need for innovative thinking in digital learning. Corporate modules, military training, P-12 curricula, online and hybrid college classes, MOOCs, digital subscription courses and even e-learning in religious institutions-all benefit from the theory and processes underpinning learning, design and technology.

In this creative, important field, you can create a career path in almost any industry you choose, empowering everyone from small children to aging adults with tools to enhance their lives.

About Learning, Design and Technology

As a discipline, learning, design and technology translates teaching and learning theories into effective instruction across all ages and settings.

Offered entirely online, the UW master's degree program in learning, design and technology stresses rural access, distance delivery and diverse learning environments, making it possible for you to conveniently acquire the background and technology skills to become an instructional designer/technologist. Through hands-on learning and field work, you will not only develop instructional design proficiency, you will also create materials that demonstrate your abilities to produce dynamic, effective educational products.

Quick Facts

Degree Type: Master of Science (M.S.)

Major: Education

Concentration: Learning, Design and Technology

Resident Tuition: \$324/credit hour

Non-resident Tuition: \$516/credit hour

School of Counseling, Leadership, Advocacy and Design

Required

- EDRE5530 - Introduction To Research Credits: 3
- ITEC5000 - Intro to the Field of Instructional Technology Credits: 3
- ITEC5010 - Instructional Technology Credits: 3
- ITEC5020 - Technology and Distance Education Credits: 3
- ITEC5160 - Introduction to Instructional Design Credits: 3

- ITEC5350 - Multimedia Development Credits: 3
- ITEC5320 - Message Design Credits: 3
- ITEC5510 - Communication in Distance Education Credits: 3
- ITEC5550 - Theory of Change Credits: 3
- ITEC5560 - Design and Development of Instructional Systems Credits: 3
- ITEC5090 - Masters Capstone Credits: 3

Education, Ph.D., Concentration Learning, Design, and Technology

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
 - Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
 - Three (3) years of P-12 teaching experience or its equivalent.
 - Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
 - GRE minimum score of Verbal:153, Quantitative:144.
 - TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Residency requirement: Four consecutive full-time semesters on campus

The Ph.D. program prepares students for careers in academia. The program consists of: (1) systematic inquiry and research; (2) focused courses and professional experiences in education and related fields; and (3) teaching and other related activities tailored to individual career goals. Students work closely with an advisor and faculty committee to select courses, conduct research, and develop professional experiences.

Effective preparation for the Ph.D. stems from collaborative research and inquiry into topics of mutual interest by students and faculty. The program is structured around a cognitive apprenticeship model. Students spend a major portion of their program working with faculty members on shared research and scholarship.

The Ph.D. program requires a minimum of 81 credit hours beyond the bachelor's degree and includes the following requirements:

- Professional courses: 15 credits
- Program knowledge base: 30 credits
- Research: 15 credits
- Electives: 9 credits
- Dissertation: 12 credits

Candidates may, with the approval of the committee, transfer up to 30 credit hours from previous graduate-level coursework in a closely related field.

For additional information about specific required courses for graduate degrees in education with an option in instructional technology, please visit the program Web site.

Education, Play Therapy Certificate

Play Therapy - Graduate Certificate Online

Children can speak volumes through the language of play.

The University of Wyoming Play Therapy certificate program will ensure you will have the skills required to decode that language and help the youngest and most vulnerable regain their voice.

Those who have completed the program can apply to the Association for Play Therapy (APT) to become certified to provide their clients with additional services to help children better express what is troubling them when they do not have the verbal language to express their thoughts and feelings.

What is Play Therapy

Play allows children to examine their problems from a safe psychological distance and allows them to express thoughts and feelings that are appropriate to their development. Play therapy includes a variety of treatment methods that apply the therapeutic benefits of play to help children learn to communicate with others, better express feelings, modify behavior, develop problem-solving skills, and learn a variety of ways of relating to others. It can be a powerful tool to help children and families reconnect and heal after a traumatic experience.

About the Play Therapy Certificate Program

The online post-master's certificate program at UW was designed to meet the 150 clock training hours required by the Association for Play Therapy* to become a Registered Play Therapist or a School-Based Registered Play Therapist. The program is designed for completion in one academic year with cohort groups beginning annually in the fall semester.

**APT awards the certification and students must be responsible for meeting their additional requirements in order to gain the credential.*

Education, School Principal Certificate

School Principal - Graduate Certificate

It's been said that there are no good schools without good principals.

That's because principals set the tone for a building's learning and professional environment. Do teachers feel empowered and appreciated? Are policies consistent and fair? Is there a sense of community among staff, students, teachers and families? Are students thriving?

If you are ready for school building leadership and passionate about fostering a healthy school environment, you can prepare to become that kind of principal through UW's experiential school principal certificate program.

Offered online, UW's school principal graduate certificate program allows you to acquire the knowledge and experience necessary to earn a Wyoming's Professional Teaching Standards Board endorsement as a K-12 principal while maintaining your current teaching position.

About the School Principal Program

UW's 24-credit hour, online school principal certificate program is designed for licensed teachers who hold a master's degree in education or related area from an accredited college or university. Utilize your coursework towards further degrees in educational leadership.

Emphasizing the study of educational leadership and an in-depth principal internship, the program qualifies you for a Wyoming state K-12 principal endorsement, while also equipping you with skills you can use to drive positive change at the building level.

School Principal Certificate Program Admission

Application Deadlines

February 1 - If applying for following fall, or spring semester.

September 1 - If applying for following spring, or fall semester.

Admission Requirements

Domestic Students^{FALL}_{SEP}

GPA: 3.0^{FALL}_{SEP} in Master's

GRE: no requirement

International Students^{FALL}_{SEP}

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

^{FALL}_{SEP}GRE: 900/291 minimum

Additional Requirements

Must have a minimum of 3 years teaching experience

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

- Access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)
- Agree to admissions terms and submit your application

Step 2: Submit official copies of transcripts and test scores to UW Admissions.

- Official transcripts from all postsecondary institutions should be requested and sent to UW Admissions at the following address:

UW Office of Admissions

Knight Hall 150

Department 3435, 1000 E. University Avenue

Laramie, WY 82071

Phone: (307) 766-5160

Toll Free: (800) 342-5996

E-mail: admissions@uwyo.edu

- Official copies of GRE scores should be sent directly from GRE Reporting to UW Admissions

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A letter of intent describing why you want to be an educational leader
- A current resume
- Copy of current teaching certificate
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)
- A completed principal program application
- A superintendent approval form signed by the superintendent of the district where you plan to perform your internship (scan and upload)
- Current recommendation letters addressing leadership skills from three different referees (the portal will send a request to each of them after you enter their email addresses):
 - two from referees who are familiar with your leadership skills
 - current principal

• Required Courses (24 credit hours)

- EDAD 5010 Leadership for Curriculum Development (3 credit hours)
- EDAD 5020 Leadership for School Organization (3 credit hours)
- EDAD 5030 Leadership for School and Community Relations (3 credit hours)
- EDAD 5040 Leadership for Instruction (3 credit hours)
- EDAD 5580 Supervised Internship(6 credit hours)
- EDRE 5530 Introduction to Research (3 credit hours)
- EDAD 5080 Introduction to School Law (3 credit hours) *Please note: this course is NOT required for students who were admitted spring 2016 or earlier.*

Education, Teaching Elementary School (TES)/Teaching Secondary Content (TSC) Graduate Certificates

The College of Education provides two options for individuals with previously earned bachelor's degree to earn a teaching certification: Certificate for Teaching Elementary School (TES) and Certificate for Teaching Secondary Content (TSC). The TES Option prepares individuals to qualify for a Wyoming teaching certificate in grades K-6. The TSC Option prepares individuals to qualify for a Wyoming teaching certificate in the middle and high school grades (6-12). Twelve hours of graduate-level coursework in either option can be applied to a subsequent UW master's degree in Curriculum and Instruction.

Overall Course Offerings: It is noted that the graduate certificate program can be a distance program; however, that does not preclude synchronous meetings or some scheduled on-campus intensive weekends (e.g., attending two Saturdays in the fall as part of the methods classes). Courses are not guaranteed to be asynchronous, meaning that students may have to sign in to Zoom at specific times to attend.

Standard Course Sequence

Starting June, 2021 the standard sequence is a three-semester long slate of required classes, beginning in the summer, and continuing through the subsequent fall and spring semesters.

Summer Courses (BOTH TES & TSC)

- EDEX2484 - Introduction to Special Education Credits: 3
- EDST4000 - Foundations of Education for a Diverse Society Credits: 3
- EDCI5550 - The Art and Science of Teaching Credits: 4

Practicum

- EDCI5551 - Practicum Graduate Certificate Credits: 1
 - The practicum can be taken in the summer in conjunction with EDCI 5550, or in the fall as a stand-alone class.
 - The 30 practicum hours can be met any time between January and December of the calendar year in which the students applies for and is admitted to the graduate certificate program.
 - Students may use up to 24 hours in a classroom substitute teaching (3 full days).
 - Students must spend a minimum of 6 hours of observing a professional teacher in a classroom of the appropriate subject or grade for the student's program (e.g., a student in the English Education program would need to observe a secondary English classroom and teacher for a minimum of 6 hours).
 - Students must complete the practicum hours before the end of the methods classes, and prior to residency. Student teaching residency will not count for the practicum.
 - Students will document the time, and submit proof of practicum hours to the EDCI 5551 faculty when they register for the class.

Fall Courses-ELEMENTARY (TES) (18 Credit Hours)

- EDEL4109 - Elementary Humanities Education Credits: 5
- EDEL4309 - Elementary Literacy Education Credits: 2-5 (2 credits required)
This is taken in conjunction with EDEL 4309; the prefix is changed to meet graduate requirements.
- EDEL4409 - Elementary Math/ Science Education Credits: 5
- EDCI5250 - Advanced Topics in Pedagogy Credits: 3 This is taken in conjunction with EDEL 4309; the prefix is different to meet graduate requirements.
- EDST3550 - Educational Assessment Credits: 2
- EDCI5560 - Seminar in Assessment Credits: 1

Fall Courses - SECONDARY (TSC) (10 Credits)

- EDSE 4000 Level Course 4 Credits
- EDCI 5250 Advanced Topics in Pedagogy Credits: 3
- EDST 3550 Educational Assessment Credits: 2
- EDCI 5560 Seminar in Assessment Credits: 1

Spring Courses - ELEMENTARY (TES) (15 Credits)

These are all for Student Teaching.

- EDEL4500 - Residency in Teaching Credits: 1-16 (11 credits required)
- EDCI5580 - Internship1 Credits: 8 (4 credits required)

Spring Courses SECONDARY (TSC) (15 Credit Hours)

These are all for Student Teaching.

- EDSE4500 - Residency in Teaching Credits: 1-16 (8 credits required)
- EDSE4550 - Residency Applications and Synthesis Credits: 3
- EDCI 5580 Internship1 Credits: 4 required

Qualitative Research Methods Minor

The purpose of the minor is to provide graduate students access to a sequence of qualitative methods courses to enhance their understanding of research methods. This concentration of courses also provides our graduates a documented way to demonstrate to potential employers that they have academic preparation in qualitative research methods.

Required Courses

- EDRE5640 - Introduction to Qualitative Research Credits: 3
- EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research Credits: 3
- EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3
- EDRE5580 - Supervised Internship Credits: 1-8 (1 Credit Required)
- Three additional credit hours, which may include special topics qualitative methods seminars in or outside of education (i.e., Field Methods in Anthropology - ANTH 5390; Ethics in Research and Practice - FCSC 5121; Feminist Research Methods - WMST 5210); submit courses for approval to the coordinator of the Educational Research program.

Quantitative Research Methods Minor

The purpose of the minor is to provide graduate students an opportunity to demonstrate a comprehensive expertise in quantitative research methods. Students who are awarded this minor will leave UW with the experiences and knowledge base they need in order to teach research methods at the university level.

Required Courses

- EDRE5600 - Educational Research I: Descriptive Research Credits: 3
- EDRE5610 - Educational Research: Group Comparison Research Credits: 3
- EDRE5620 - Educational Research: Correlational Research Credits: 3
- EDRE5630 - Educational Research IV: Multivariate Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3
- EDRE5580 - Supervised Internship Credits: 1-8 (1 Credit Required)

Special Education, MA

Special Education-Master of Arts (MA) Online

All over the country, including Wyoming, school districts face serious shortages of special education teachers. Not only does this create job opportunities, but it also provides a tremendous opportunity for educators to build deeply meaningful, fulfilling careers. The online UW Master of Education with a concentration in special education is a generalist program that will prepare you to work with K-12 students across a range of special needs, qualifying you to apply for a teaching endorsement in K-12 special education from the Wyoming Professional Teaching Standards Board. UW's special education master's degree can also serve as a path to doctoral-level study.

Master of Arts Program Admission

Application Deadlines

June 15 - If applying for the fall semester.

September 15 - If applying for the spring semester.

Admission Requirements

Domestic Students

GPA: 3.25

GRE: no requirement

International Students

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

GRE: 900/291 minimum

Additional Requirements

Current teaching certificate from the United states and must be K-12 (any grade band or subject area)

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal. When filling out your application please refer to the following document: Guidelines and requirements for applications.

- Access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)
- Agree to admissions terms and submit your application

Step 2: Submit official copies of transcripts and test scores to UW Admissions.

- Official transcripts from all postsecondary institutions should be requested and sent to UW Admissions at the following address: *University of Wyoming Admissions, 1000 E. University Ave., Laramie, WY 82071*

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A 3-4 page, double-spaced professional writing sample (download scoring rubric), including:
- A description of your professional goals
- An explanation of your commitment to Special Education
- An explanation of your philosophy of education
- An explanation of how this Special Education program fits your goal
- A complete and current resume, including:
- Educational experiences
- Work experiences
- Activities/honors
- Other relevant information
- Program application. (download here)
- Copy of current teaching certificate
- Signed Memo of Understanding (see student handbook)
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)

Master of Arts Curriculum Requirements

All classes for the Master of Art in Special Education program are taught using distance delivery methods so you can enjoy the convenience of expanding your education while working full-time in your current position. Upon completion of this program, students will be eligible to apply to the Wyoming Professional Teaching Standards Board for an endorsement in K-12 Special Education.

Required Courses (35 credit hours)

Program Core

Students must take all courses listed below.

- EDEX 5071 Teaching Students with Mild/Moderate Disabilities (3 credit hours)
- EDEX 5080 Teaching Students with Severe to Low Incidence Disabilities (3 credit hours)
- EDEX 5720 Special Education Law (3 credit hours)
- EDEX 5355 Assessment (3 credit hours)
- EDEX 5100 Practicum I (3 credit hours)
- EDEX 5110 Positive Behavior Support and Management (3 credit hours)
- EDEX 5120 Academic Instruction in General Education for Students with Disabilities (3 credit hours)
- EDEX 5200 Practicum II (3 credit hours)
- EDEX 5000 Collaboration/Professional Interdisciplinary Relationships (3 credit hours)
- EDEX 5250 Assistive Technology (2 credit hours)
- EDEX 5260 Transition Planning (2 credit hours)

Research Courses

Students must choose 3 credit hours from courses listed below.

- EDEX 5150 Research Applications in the Classroom 3
- EDRE 5530 Introduction to Research 3
- EDRE 5550 Action Research 3

Other courses

Students must choose one credit hour from the below courses.

- PRST 5920 Continuing Registration on campus (1 credit hour)
- PRST 5940 Continuing Registration off campus (1 credit hour)

Certificate

Community College Leadership Certificate

Requirements

The Community College Leadership Certificate Program requires 15 credit hours to include the following three required courses:

- HIED5660 - Community College Credits: 3
- HIED5600 - Higher Education Finance Credits: 3
- HIED5650 - Law of Higher Education Credits: 3

Two Elective Courses Are Chosen From the Following:

- HIED5260 - Educational Issues Race, Class, and Gender Credits: 3
- HIED5630 - Advanced Organizational Leadership Credits: 3
- HIED5640 - Leadership Development Credits: 3
- HIED5670 - Community College Issues and Leadership Credits: 3
- HIED5680 - Issues in Higher Education Credits: 3

Education, Community College Leadership Certificate

Community College Leadership - Graduate Certificate

In many states, community colleges are the lifeblood of a regional higher education system. Not only do they provide local access to college-level courses, they also serve as a locus for workforce training and community development.

The UW Community College Leadership Certificate is an online, 15-credit program to help you advance into community college management and leadership roles.

About the Community College Leadership Program

Whether you are already employed by a community college or seeking a community college-related career, UW's online community college leadership program offers a strong background in leadership studies along with courses that address the pressing issues modern community colleges and students face.

Certificate Program Admission

Application Deadlines

September 15th - Spring Semester

January 15th - Fall/Summer Semester

May 15th - Fall Semester

Admission Requirements

Domestic Students

GPA: 3.0

GRE: no requirement

International Students

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

GRE: 151 in verbal, 153 quantitative; 4.0 in analytical writing

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

- Click here to access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)

Step 2: Submit official copies of transcripts to UW Admissions.

*University of Wyoming Admissions
1000 E. University Ave.
Laramie, WY 82071*

Community College Leadership Certificate Curriculum Requirements

The graduate certificate in Community College Leadership provides aspiring leaders at community colleges with a 15-credit hour, focused program of study that will prepare them for more effective and efficient leadership service at their institution. The program is a Post-Masters credential, supplementing a student's Master's degree in a discipline. Courses are all delivered in a distance format and are scheduled so the program may be completed part time over four semesters.

Required Courses (15 credit hours)

Core Curriculum

Students must take all 9 credit hours from the below list.

- HIED 5660 Community College (3 credit hours)
- HIED 5600 Higher Education Finance (3 credit hours)
- HIED 5650 Law of Higher Education (3 credit hours)

Electives

Students must choose 6 credit hours from the below list.

- HIED 5260 Educational Issues in Race, Class, & Gender (3 credit hours)
- HIED 5630 Advanced Organizational Leadership (3 credit hours)
- HIED 5640 Leadership Development (3 credit hours)
- HIED 5670 Community College Issues & Leadership (3 credit hours)
- HIED 5680 Issues in Higher Education (3 credit hours)

Online Instruction Certificate

Requirements

The Online Instruction Certificate Program is a post-baccalaureate, credit bearing program that helps learners from all fields acquire necessary knowledge and skills to effectively develop and teach online courses in K-12, higher education, and business

and industry settings. Courses familiarize learners with distance education and design theory to develop online materials that facilitate student access, engagement, communication, and information exchange. Emphasis is placed on tool use and the application of skills towards instructional development and implementation. Students who have been formally admitted to the Master of Science in Education with an emphasis in Instructional Technology may use certification courses to fulfill graduate degree requirements.

Coursework Credits: 12 Hours

The certificate program consists of 12 hours of coursework in four online courses:

- ITEC5020 - Technology and Distance Education Credits: 3
- ITEC5030 - Introduction to Online Teaching Credits: 3
- ITEC5160 - Introduction to Instructional Design Credits: 3 (with an emphasis on online learning environments)
- ITEC5510 - Communication in Distance Education Credits: 3

Principal Certificate

Requirements

The endorsement/certificate is 24 credits which includes the four core classes, 3 credits each:

- EDAD5010 - Leadership for Curriculum Development Credits: 3
- EDAD5020 - Leadership for School Organization Credits: 3
- EDAD5030 - Leadership for School and Community Relations Credits: 3
- EDAD5040 - Leadership for Instruction Credits: 3
- EDAD5580 - Supervised Internship in Educational Administration Credits: 1-8
- EDRE5530 - Introduction To Research Credits: 3
- EDAD5080 - Introduction to School Law Credits: 3

The Early Childhood Special Education Program (Birth to Five) Leading to Wyoming Certification

Post-baccalaureate students who have earned a BA/BS in Elementary Education, Family and Consumer Sciences/Child Development Option, or a related field in early childhood development are eligible for this program. This is a pre-k program and does not prepare candidates to work in kindergarten or primary grade classrooms.

For more information, visit the web page (www.uwyo.edu/ste/early-childhood-education/early-childhood-special-education.html)

Required Courses:

- EDEC5220 - Children with Disabilities Credits: 3
- EDEC5230 - Curriculum and Materials for Young Children with Disabilities Credits: 3
- EDEC5240 - Evaluation of Young Children with Disabilities Credits: 3
- EDEC5250 - Legal Issues in Early Childhood Special Education Credits: 2
- FCSC4124 - Families of Young Children With Special Needs Credits: 3
- EDEC4350 - Health Management Issues in Early Education Credits: 3
- EDEC4320 - Oral and Written Language Acquisition Credits: 3
- EDCI5580 - Internship1 Credits: 8

Endorsement

Early Childhood Endorsement

There are three early childhood endorsement programs available for students:

- The B-8 endorsement program for elementary education majors;
- The B-5 endorsement program for Family and Consumer Sciences/Child Development option majors (or majors in other fields related to early childhood);
- The Early Childhood Special Education Program (Birth to Five) Leading to Wyoming Certification for postbaccalaureate students with a degree in education or a field related to early childhood.

In addition, undergraduate elementary education majors may work toward the early childhood education endorsement as part of their elective requirements. Specific advising in each of the early childhood program options support students in their program development.

Secondary Biology Endorsement

Along with another science certification (such as Earth Science), earn a Biology teaching endorsement.

Requirements: 27 Hours (Minimum)

- LIFE1010 - General Biology Credits: 4

Choose One of the Following:

- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- LIFE3600 - Cell Biology Credits: 4
- Other BOT/ ZOO at the 3000/4000 level Credits: 3-4

- LIFE3400 - General Ecology Credits: 3

Choose One of the Following:

- LIFE3050 - Genetics Credits: 4
- LIFE3500 - Evolutionary Biology Credits: 3
- MICR2021 - General Microbiology Credits: 4 (can be substituted with MOLB 2021 - General Microbiology)
- BOT/LIFE/MOLB/MICR/SOIL/ZOO at the 3000/4000 level Credits: 3-4
- EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6 (3 credits required)
- EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6 (4 credits required)

Secondary Chemistry Endorsement

Along with another science certification (such as Earth Science), earn a Chemistry teaching endorsement.

Requirements: 27 Hours (Minimum)

- CHEM1020 - General Chemistry I Credits: 4
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM4110 - Introductory Inorganic Chemistry Credits: 3

Choose One of the Following:

- MOLB3610 - Principles of Biochemistry Credits: 4
 - MOLB4100 - Clinical Biochemistry Credits: 4
 - GEOL4777 - Geochemistry of Natural Waters Credits: 3
 - BOT4780 - Biogeochemistry Credits: 3
 - SOIL Upper Division Elective Credits: 3-4
- CHEM3550 - Physical Chemistry for the Life Sciences Credits: 3
- OR**
- CHEM4507 - Physical Chemistry I Credits: 3
 - CHEM2230 - Quantitative Analysis Credits: 5
- OR**
- CHEM4230 - Instrumental Methods of Chemical Analysis Credits: 5
 - EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6 (3 credits required)
 - EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6 (4 credits required)

Secondary Computer Science Endorsement

The College of Education offers courses that lead to an endorsement (grades 6-12) from the Wyoming Professional Teaching Standards Board in computer science. Students can also receive a minor in computer science; see information in the College of Engineering and Applied Science section of this catalog for more information about the computer science minor.

The endorsement consists of 15 Credits (novice/intermediate) or 16 (intermediate/advanced) with an option to take all 20 hours for a computer science minor. It is recommended that students interested in obtaining the computer science minor apply to the program by their freshman year or the beginning of the sophomore year. Students are encouraged to examine course prerequisites.

Required Courses:

(15 Credits for novice/intermediate track)

OR

(16 Credits for intermediate/advanced track)

- COSC1010 - Introduction to Computer Science I Credits: 4 (Both Tracks)
- COSC1030 - Computer Science I Credits: 4 (Both Tracks)
- COSC2030 - Computer Science II Credits: 4 (Both Tracks **OR** approved alternate course may be used for novice/intermediate track)
- COSC3050 - Ethics for the Computer Professional Credits: 1 (Both Tracks)
- COSC2150 - Computer Organization Credits: 3 (intermediate/advanced track)
- EDSE4280 - Subject Matter Specific Methods: Computer Science Credits: 2 (novice/intermediate track)

Secondary Earth Science Endorsement

Along with another science certification (such as Biology), earn an Earth Science teaching endorsement.

Requirements Credits: 27 Hours (Minimum)

- LIFE1010 - General Biology Credits: 4
- CHEM1020 - General Chemistry I Credits: 4
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- PHYS1110 - General Physics I Credits: 4
- LIFE2022 - Animal Biology Credits: 4
- OR**
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- Choose One of the Following:**
- ESS3480 - Environmental Change Credits: 3
- GEOG3480 - Environmental Change Credits: 3
- GEOL3500 - Global Change: A Geological Perspective Credits: 4
- BOT4780 - Biogeochemistry Credits: 3
- ESS4001 - Analysis of Nature's Data Credits: 3
- BOT4001 - Modeling the Earth System Credits: 4
- GEOL4001 - Modeling the Earth System Credits: 4

- EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6
(3 credits required)
- EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6
(4 credits required)

Secondary Physics Endorsement

Along with another science certification (such as Chemistry), earn a Physics teaching endorsement.

Requirements: 27 Hours (Minimum)

- PHYS1310 - College Physics I Credits: 4
- PHYS1320 - College Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4
- PHYS2320 - Physics IV: Modern Physics Credits: 3
- PHYS4410 - Electricity and Magnetism I Credits: 3
- PHYS4510 - Thermodynamics and Statistical Mechanics Credits: 3
- EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education Credits: 3-6
(3 credits required)
- EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education Credits: 3-6
(4 credits required)

Special Education Director Endorsement

Students who successfully complete a Wyoming Principal's Certificate in Education Leadership and a Master's Degree or endorsement in Education (Special Education) can apply for endorsement as a Director of Special Education through Wyoming Professional Teaching Standards Board. The program is restricted to Wyoming students or students who have a contractual agreement with the University of Wyoming.

Students expecting to obtain this endorsement must complete both the Special Education Master's courses and also the Educational Leadership Certification courses.

Program Details for Director Endorsement

The endorsement program requirements are available by completing both the Special Education Master's program and the Educational Leadership Principal Certificate program. The program is offered through the UW Outreach School using distance education technology such as video conferencing, online, intensive weekends, or combinations of delivery methods. Upon completion of this program students are eligible to apply to the Wyoming Professional Teaching Standards Board for endorsement as a Director of Special Education.

Endorsement/Certificate

English as a Second Language Certificate leading to a Wyoming English as a Second Language Endorsement

The University of Wyoming (UW), College of Education (COE) offers English as a Second Language (ESL)- Endorsement Program (Add-on, K-12) to meet a growing need of English language learners in the nation (generally) and the state of Wyoming (specifically). Eligibility for this endorsement requires an initial teaching certificate in the state of Wyoming. The candidates in the program are undergraduate students who are working toward Wyoming teacher certification and teachers who already possess the state of Wyoming teaching certificate. Upon completion of the ESL endorsement program, the candidates receive the Wyoming Professional Teaching Standards Board (PTSB) endorsement. The candidates in the program are also graduates students in different disciplines, earning graduate ESL graduate certificate but not ESL endorsement. In 2017, the UW- ESL endorsement program received **NATIONALLY RECONIZED** decision by meeting all the requirements and standards of the TESOL SPA (Teaching English to Speakers of Other Languages Specialized Professional Association). In 2021, the UW-ESL endorsement program received an approval from PTSB.

Required Courses:

- EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching Credits: 3
 - EDCI4350 - Introduction to Second Language Acquisition Credits: 3 (for undergraduate candidates)
- OR**
- EDCI5350 - Introduction to Second Language Acquisition Credits: 3 (for graduate candidates)
 - EDCI5430 - Theory and Methods of ESL I Credits: 3
 - EDCI5440 - Theory and Methods of ESL II Credits: 3
 - EDCI5580 - Internship1 Credits: 8 (Register for 3 credits only)

Literacy Certificate Leading to a Wyoming Reading Endorsement

The University of Wyoming offers the required courses in the graduate literacy program. The program is designed to serve graduate level K-12 teachers in Wyoming who wish to obtain the Wyoming Reading Endorsement, and those who choose to apply the course work toward a master's or doctoral degree in Curriculum & Instruction.

For more information, visit the web page (www.uwyo.edu/st/e/elementary-education/endorsements/certificate-of-literacy)

Required Courses:

- EDCI5580 - Internship1 Credits: 8
- EDCI5710 - Genre-based, Discipline-based Literacies Credits: 3
- EDCI5720 - Literacy Difficulties: Assessment and Instruction Credits: 3
- EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I Credits: 3-6
- EDCI5760 - Social Linguistics Literacies Credits: 3
- EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II Credits: 3
- EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12) Credits: 3
- EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12) Credits: 3

Endorsement K-6: 18 Hours

- EDCI5760 - Social Linguistics Literacies Credits: 3
- EDCI5710 - Genre-based, Discipline-based Literacies Credits: 3
- EDCI5720 - Literacy Difficulties: Assessment and Instruction Credits: 3
- EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I Credits: 3-6
- EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II Credits: 3
- plus one elective

Endorsement 6-12: 18 Hours

- EDCI5760 - Social Linguistics Literacies Credits: 3
- EDCI5710 - Genre-based, Discipline-based Literacies Credits: 3
- EDCI5720 - Literacy Difficulties: Assessment and Instruction Credits: 3
- EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12) Credits: 3
- EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12) Credits: 3
- plus one elective

Endorsement K-12: 21 Hours

- EDCI5580 - Internship1 Credits: 8
- EDCI5760 - Social Linguistics Literacies Credits: 3
- EDCI5710 - Genre-based, Discipline-based Literacies Credits: 3
- EDCI5720 - Literacy Difficulties: Assessment and Instruction Credits: 3
- EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I Credits: 3-6
- EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II Credits: 3
- EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12) Credits: 3
- EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12) Credits: 3

Electives

- EDCI5120 - Literature For Young Adults Credits: 3
- EDCI5160 - Recent Trends in Children's and Young Adult Literature Credits: 3

College of Engineering and Applied Science

2085 Engineering Building

Cameron Wright, Acting Dean

Phone: (307)766-4253 FAX: (307)766-4444

Web site: ceas.uwyo.edu

Engineering is a profession that truly makes a difference. Engineers constantly discover how to improve lives by creating new solutions to real world problems and needs. From small villages to large cities, engineers are involved in innovative improvements to all aspects of life from health care, to energy production, to protecting and rehabilitating the environment, to developing the newest technological device. The broad background of communication, mathematical, scientific, and problem solving skills provided at the University of Wyoming will prepare engineering graduates to pursue careers in engineering, construction, environmental policy, even medicine or law. The possibilities are endless! The creativity and innovative thinking developed in engineering enables students to lead rewarding lives, work with inspiring people, and give back to their communities. Computer science is a profession that is closely affiliated with engineering. At the University of Wyoming, degrees in computer science are awarded through the College of Engineering and Applied Science. The technology trends in this industry are also advancing at a tremendous rate. This requires that computer science education be at the forefront of new computing technologies, software languages, and networking.

Mission

The University of Wyoming's College of Engineering and Applied Science will provide excellent education, research, and service in chosen fields of engineering and applied science. The College emphasizes connectivity with society, life-long learning, and the essential problem-solving and collaborative skills needed to address the frontier challenges facing Wyoming, the nation and the world.

Design Experiences

In direct support of the goals of the individual departments within the College of Engineering and Applied Science, the design process is consistently developed and integrated throughout the curriculum from the freshman year through the senior year. Within the engineering science program, design elements such as basic analysis skills, communication skills, experimental skills, computational skills, problem solving skills, and design methodology are taught. At the departmental level, these skills are developed further and the concepts of design methodology are reinforced. The design process culminates in a comprehensive design experience within the student's major.

Accreditation

The following undergraduate programs are accredited by the Engineering Accreditation Commission of ABET: architectural engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, energy systems engineering, mechanical engineering, and petroleum engineering.

Various options within different engineering programs are accredited as part of the primary major. That is, the electrical engineering/ bioengineering option is accredited as an electrical engineering degree, and the chemical engineering/petroleum option is accredited as a chemical engineering degree.

The Bachelor of Science in Computer Science is accredited by the Computer Accreditation Commission of ABET.

Programs of Study

Undergraduate Degrees

- Bachelor of Science in Architectural Engineering
- Bachelor of Science in Chemical Engineering
- Bachelor of Science in Civil Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Computer Science
- Bachelor of Science in Computer Science (Computers and Business Option)
- Bachelor of Science in Computer Science (Big Data Option)
- Bachelor of Science in Construction Management
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Electrical Engineering (Francis M. Long bioengineering option)
- Bachelor of Science in Energy Systems Engineering
- Bachelor of Science in Mechanical Engineering
- Bachelor of Science in Petroleum Engineering

Graduate Degrees

Master of Science

- Architectural engineering
- Atmospheric science
- Chemical engineering
- Civil engineering
- Civil engineering/water resources
- Computer science
- Computer science professional
- Electrical engineering
- Environmental engineering
- Mechanical engineering
- Petroleum engineering

Doctor of Philosophy

- Atmospheric science
- Chemical engineering
- Civil engineering
- Computer science
- Electrical engineering
- Mechanical engineering
- Petroleum engineering

Candidates for the various master's degrees in engineering are required to do a full year's work in residence either under Plan A or Plan B.

Students should understand that a strong background in mathematics is necessary to actively pursue an engineering curriculum. Credit toward an engineering degree is not allowed for algebra and trigonometry.

Coursework in all four-year curricula stresses the mastery of subjects fundamental to all fields of engineering. The balance of the program is divided between cultural context and courses applying to the particular field selected. The aim is to provide the student with such groundwork that the general principles acquired may be used successfully in any one of the several specialized fields he or she may follow after graduation.

Depending on the major, a minimum of 120 to 132 semester hours of credit is required for the bachelor's degree from the College of Engineering and Applied Science. All course work must be selected with prior approval. Detailed outlines of curricula are presented later under headings of the various departments of the college. Since most engineering programs are similar during the first year, students may change an engineering major during this time with little or no loss in credit.

The electives in cultural context must be selected such that the student meets all university studies requirements not covered by specific courses in the detailed curriculum outlines.

Degree candidates must meet the academic requirements of the university and must have a grade point average of 2.000 (C) or above in all engineering courses attempted at this university.

Students may not take a course for S/U credit to satisfy any requirement for a degree from the College of Engineering and Applied Science, unless the course is offered for S/U credit only.

The College of Engineering and Applied Science adheres to prerequisite coursework being completed before moving forward to advanced coursework. If a student is found to be enrolled in a course without meeting the prerequisites, the student will be administratively dropped from the course.

All undergraduate engineering programs within the College of Engineering and Applied Science use the Fundamentals of Engineering Exam as one of their methods of outcomes assessment. As a graduation requirement, students must complete the exam, with a good faith effort, within one year prior to their expected graduation.

Preparation for the profession of engineering requires diligent work in the various curricula. The required credit hours can be completed in a four-year program, but because of the rigorous nature of some of the courses involved, some students may require additional time to complete degree requirements.

All engineering curricula are subject to minor program changes. The published curricula are general guides. Prospective students should consult the individual departments for current information.

International Engineering Minor

Students in the College of Engineering and Applied Science may earn a Minor in International Engineering. The Minor requires:

- a) a study abroad experience;
- b) 9 credits of lower-division coursework; and
- c) 9 credits of upper-division coursework.

More detailed requirements are available at: <http://www.uwyo.edu/ceas/academics/intleng.html>

Graduate Study

The College of Engineering and Applied Science offers coursework and research opportunities leading to the following master's degrees: master of science in atmospheric science, chemical engineering, civil engineering, computer science, electrical engineering, environmental engineering, mechanical engineering, and petroleum engineering. Candidates for the various master's degrees in engineering are required to do a full year's study in residence either under Plan A or Plan B.

Only graduates with satisfactory GPAs in programs accredited by ABET are granted full admission to graduate study. In addition, graduates with satisfactory GPAs in undergraduate disciplines of meteorology, physics, mathematics, or related fields can be granted full admission to graduate studies in atmospheric science. Other engineering graduates can be admitted on a provisional basis.

The College of Engineering and Applied Science offers coursework and research opportunities leading to the following doctoral degrees: doctorate in atmospheric science, chemical engineering, civil engineering, computer science, electrical engineering, mechanical engineering, and petroleum engineering. Interdisciplinary programs of study and research leading to one of the above disciplinary degrees can be developed.

Engineering Science

Program Director: David Mukai, Ph.D.
2076 Engineering Building,
(307) 766-6181
FAX: (307) 766-4444

Engineering Science offerings present the fundamental engineering concepts upon which most engineering analysis and design work is based. Faculty are drawn from all of the academic departments in the college. These core courses represent the majority of engineering offerings at the freshman and sophomore level.

Courses in engineering science have their roots in mathematics and physical science, extending knowledge toward creative application. Thus, students must take their courses in calculus, chemistry, physics, and engineering science in a timely manner. Details are given in the published curriculum for each program. **A grade of C or better must be earned in all courses that are prerequisite to any required engineering science course.**

Major

Architectural Engineering, B.S.

Curriculum

- ARE1000 - VISTA Studio I Credits: 1
- ARE2000 - VISTA Studio II Credits: 3
- ARE3000 - VISTA Studio III Credits: 3
- ARE1600 - Architectural Design Studio I Credits: 3
- ARE2410 - Fundamentals of Building Performance Credits: 3
- ARE2600 - Architectural Design Studio II Credits: 3
- ARE3200 - Structural Analysis I Credits: 3
- ARE3210 - Civil Engineering Materials Credits: 4
- ARE3300 - Building Electrical and Plumbing Systems Credits: 3
- ARE3400 - Heating, Ventilating and Air Conditioning of Buildings Credits: 3
- ARE3600 - Architectural Design Studio III Credits: 3
- ARE4600 - Architectural Design Studio IV Credits: 3
- ARE4740 - Mechanical Systems Design Project Credits: 3
- OR**
- ARE4720 - Structural Systems Design Project Credits: 3

- ART3030 - History of Architecture Credits: 3
- CHEM1020 - General Chemistry I Credits: 4

- ES2110 - Statics Credits: 3
- ES2120 - Dynamics Credits: 3
- ES2310 - Thermodynamics I Credits: 3
- ES2330 - Fluid Dynamics Credits: 3
- ES2410 - Mechanics of Material I Credits: 3

- GEOL1100 - Physical Geology Credits: 4
- OR**
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- OR**
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- Math/Science Elective Credits: 3
- PHYS1210 - Engineering Physics I Credits: 4
- OR**
- PHYS1220 - Engineering Physics II Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4

Required Credits: 126 Hours (Minimum)

Approved Electives

Option Electives

Must take six.

Structural Courses

- ARE4200 - Structural Analysis II Credits: 3
- ARE4250 - Structural Steel Design Credits: 3
- ARE4260 - Structural Concrete Design Credits: 3

- ARE4285 - Masonry Design Credits: 3
- OR**
- ARE5285 - Masonry Design Credits: 3

- ARE4295 - Structural Timber Design Credits: 3
- OR**
- ARE5295 - Structural Timber Design Credits: 3

- CE3600 - Soil Mechanics I Credits: 4

- CE4610 - Foundation Engineering Credits: 3
- OR**
- CE5610 - Foundation Engineering Credits: 3

- CE4620 - Soil and Rock Slope Engineering Credits: 3
- CE4630 - Ground Improvement, Reinforcement and Treatment Credits: 3
- **OR**
- CE5630 - Ground Improvement, Reinforcement and Treatment Credits: 3
- CE5010 - Advanced Mechanics of Materials Credits: 3
- CE5200 - Advanced Structural Analysis Credits: 3
- CE5220 - Structural Dynamics Credits: 3
- CE5255 - Advanced Steel Design Credits: 3
- CE5270 - Highway Bridge Engineering Credits: 3

Mechanical Courses

- ARE3360 - Fundamentals of Transport Phenomena Credits: 3
- ARE4330 - Building Electrical Systems Credits: 3
- ARE4390 - Building Safety and Fire Protection Credits: 3
- ARE4430 - HVAC Systems Analysis and Design Credits: 3
- ARE4490 - Modeling and Optimization of Energy Systems Credits: 3
- ME3040 - Thermodynamics II Credits: 3
- ME3170 - Machine Design Credits: 3
- ME4460 - Solar and Geothermal Engineering Credits: 3
- **OR**
- ESE4460 - Solar and Geothermal Engineering Credits: 3
- ME4470 - Wind and Ocean Energy Engineering Credits: 3
- **OR**
- ESE4470 - Wind and Ocean Energy Engineering Credits: 3

Major Electives

Must Take Two.

- AMST4900 - Field Studies in Historic Preservation Credits: 1-4
- AMST5400 - American Built Environment Credits: 3
- ARE4050 - Modern Engineering Practice Credits: 3
- ARE4920 - Senior Architectural Engineering Problems Credits: 1-3
- ARE5600 - Collaborative BIM Design Credits: 3
- ARE5700 - Architectural Engineering Problems I Credits: 1-3
- CE2070 - Engineering Surveying Credits: 3
- CE3300 - Hydraulic Engineering Credits: 3
- CE3400 - Introduction to Environmental Engineering Credits: 3
- CE3500 - Transportation Engineering Credits: 4
- CE4965 - Undergraduate Research Credits: 1-3
- CE4970 - Wyoming DOT Design Squad Cooperative Experience Credits: 3
- CE4975 - Civil and Architectural Engineering Internship Credits: 1-3
- CM2000 - Introduction to Construction Management Credits: 3
- CM3100 - Construction Scheduling Credits: 3
- CM3210 - Construction Estimating Credits: 3
- ENR4560 - Conservation Entrepreneurship Credits: 3

Mathematics/Science Electives

Mathematics Electives

- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2300 - Discrete Structures Credits: 3
- MATH3340 - Introduction to Scientific Computing Credits: 3
- MATH3500 - Algebra I: Introduction to Rings and Proofs Credits: 3
- MATH4230 - Introduction to Complex Analysis Credits: 3
- MATH4255 - Mathematical Theory of Probability Credits: 3
- MATH4300 - Introduction to Mathematical Modeling Credits: 3
- MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations Credits: 3
- MATH4440 - Introduction to Partial Differential Equations I Credits: 3
- MATH4500 - Matrix Theory Credits: 3
- MATH5310 - Computational Methods in Applied Sciences I Credits: 3
- STAT3050 - Statistical Methods Credits: 3
- STAT4015 - Regression Analysis Credits: 3
- STAT4025 - Design and Analysis of Experiments I Credits: 3
- STAT4115 - Time Series Analysis and Forecasting Credits: 3
- STAT4155 - Fundamentals of Sampling Credits: 3
- STAT4265 - Introduction to the Theory of Statistics Credits: 3

Science Electives

- ASTR2310 - General Astronomy I Credits: 4
- ATSC2000 - Introduction to Meteorology Credits: 4
- ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate Credits: 3
- ATSC4320 - The Ocean Environment Credits: 3
- LIFE1010 - General Biology Credits: 4 (Plus all Biology, Botany, and Zoology courses that have LIFE 1010 as a prerequisite)
- CHEM1030 - General Chemistry II Credits: 4
- CHEM1060 - Advanced General Chemistry II Credits: 4 (Plus all Chemistry courses that have CHEM 1020, CHEM 1030, CHEM 1050, or CHEM 1060 as a prerequisite)
- ENR1200 - Environment Credits: 4
- GEOL1100 - Physical Geology Credits: 4
- GEOL1110 - Physical Geology for Engineers Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4
- GEOL3600 - Earth and Mineral Resources Credits: 4
- GEOL4113 - Geological Remote Sensing Credits: 4
- GEOL4444 - Geohydrology Credits: 4 (Plus all Geology courses that have GEOL 1100 or 1200 as a prerequisite)
- MOLB2021 - General Microbiology Credits: 4 (Plus all Molecular Biology courses that have MOLB 2021 as a prerequisite)
- PHYS1210 - Engineering Physics I Credits: 4 (only if taken before or concurrently with ES 2120)
- PHYS1220 - Engineering Physics II Credits: 4
- PHYS2310 - Physics III: Waves and Optics Credits: 4 (Plus all Physics courses that have PHYS 1210 or PHYS 1310 as a prerequisite)
- AECL2010 - Introduction to Soil Science Credits: 3
- AECL3030 - Ecological Web: Ecology of Plant Protection Credits: 3
- SOIL2010 - Introduction to Soil Science Credits: 4

- SOIL3130 - Environmental Quality Credits: 3
- SOIL4100 - Soil Physics Credits: 3
- SOIL4130 - Chemistry of the Soil Environment Credits: 3

A Minimum of 42 Credit Hours Must Be Upper Division (3000+) Level.

Transfer Coursework: The Architectural Engineering program accepts transfer course equivalents listed in the Wyoming Transfer Catalog. Other transfer courses will be considered by petition to the Department. The Department has a Policy on Transfer Courses for Continuing Students, which says continuing students should not plan to substitute "core" courses with transfer credits from other institutions, and that transfer credits for continuing students are evaluated on a case-by case basis. For upper-division coursework, no more than two upper division courses may be transferred and applied to the ARE degree. ARE 4720 and ARE 4740 cannot be transferred to UW.

Chemical Engineering Quick Start, B.S./M.S.

The BS/MS Quick Start program in Chemical Engineering (CHE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their Bachelor of Science (B.S.) degree in Chemical Engineering. These students may apply for admission to the Quick Start program during the second semester of their junior year or during their senior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and better-planned use of time should result in reduction of the time required for obtaining the Master of Science in Chemical Engineering (M.S. CHE) degree. Students who enter the Quick Start program must accept the primary responsibility for actively planning their programs of study to assure timely completion of their coursework and research programs.

The Quick Start program contains two essential elements:

Qualified students may receive provisional admission to the Chemical Engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.

Students in the program may apply up to 6 credit hours of 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to 6 credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level coursework as undergraduates, easing their transition to the Chemical Engineering graduate program.

For additional information and an application form, please contact the CHE graduate program coordinator at (307) 766-2500 or stop by 4055 Engineering Building.

Chemical Engineering, B.S.

Program Educational Objectives

Three to six years after graduation, graduates who choose to practice in Chemical Engineering should:

- Successfully practice the profession of Chemical Engineering;
- Demonstrate successful career growth

Chemical Engineering Program Outcomes

During the course of study in Chemical Engineering, the student should demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Curriculum

For students entering UW Fall 2018 or later.

- CHE1005 - Introduction to Chemical Engineering Credits: 1
- CHE2005 - Chemical Process Analysis Credits: 3
- CHE2060 - Chemical Engineering Computing Credits: 3
- CHE2070 - Chemical Thermodynamics Credits: 3
- CHE2080 - Chemical Engineering Fluid Mechanics Credits: 3
- CHE3015 - Chemical Thermodynamics II Credits: 3
- CHE3026 - Heat Transfer Credits: 3
- CHE3028 - Mass Transfer Credits: 3
- CHE3040 - Unit Operations Laboratory I Credits: 3
- CHE3070 - Process Simulation and Economics Credits: 3
- CHE4050 - Unit Operations Laboratory II Credits: 3
- CHE4060 - Reaction Engineering Credits: 3
- CHE4070 - Process Design I Credits: 4
- CHE4080 - Process Design II Credits: 4
- CHE4090 - Process Dynamics and Control Credits: 3
- CHEM1050 - Advanced General Chemistry I Credits: 4
- CHEM1060 - Advanced General Chemistry II Credits: 4
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- CHEM4507 - Physical Chemistry I Credits: 3
- LIFE1010 - General Biology Credits: 4
- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- PHYS1210 - Engineering Physics I Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4

Approved Electives

See CEAS Advising Center for a current list of approved technical electives

Transfer Coursework: All Wyoming Community College equivalent courses will be evaluated for acceptance into the CHE program. For upper-division coursework, no more than two CHE 3000+ courses can be transferred and applied to the CHE degree, however, CHE4070 - Process Design I and CHE4080 - Process Design II cannot be transferred to UW.

In addition, all CHE transfer courses must be completed with a grade of C- or better.

The upper-division rules may be waived for classes taken during Study Abroad and National Student Exchange Programs with pre-approval.

Civil and Architectural Engineering Quick Start, B.S./M.S.

MSCE Quick Start Program

The MSCE Quick Start program in Civil and Architectural Engineering (CAE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor of science (B.S.) degree in civil engineering or architectural engineering. These students must apply for admission to the Quick Start program no later than the second semester of their junior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and betterplanned use of time should result in reduction of the time required for obtaining the master of science in civil engineering (MSCE) degree. Students who enter the Quick Start program must accept the primary responsibility for actively planning their programs of study to assure timely completion of their coursework and research programs.

The Quick Start program contains two essential elements:

Qualified students may receive provisional admission to the civil engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.

Quick Start students are not required to submit GRE.

Students in the program may apply up to six credit hours of 4000 or 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to six credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level coursework as undergraduates, easing their transition to the civil engineering graduate program.

Quick Start applicants are not required to submit GRE scores, but are required to submit a complete application form. For additional information and an application form, please contact the CAE graduate program coordinator at (307) 766-2390 or stop by 3074 Engineering Building.

MSARE Quick Start Program

The MSARE Quick Start program in Civil and Architectural Engineering (CAE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor of science (B.S.) degree in civil engineering or architectural engineering. These students must apply for admission to the Quick Start program no later than the second semester of their junior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and betterplanned use of time should result in reduction of the time required for obtaining the master of science in architectural engineering (MSARE) degree. Students who

enter the Quick Start program must accept the primary responsibility for actively planning their programs of study to assure timely completion of their coursework and research programs.

The Quick Start program contains two essential elements:

Qualified students may receive provisional admission to the civil engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.

Students in the program may apply up to six credit hours of 4000 or 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to six credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level coursework as undergraduates, easing their transition to the civil engineering graduate program.

Civil Engineering, B.S.

Curriculum

- CE1000 - VISTA Studio I Credits: 1
 - CE1010 - Civil Engineering Tools Credits: 3
 - CE2000 - VISTA Studio II Credits: 3
 - CE2070 - Engineering Surveying Credits: 3
 - CE3000 - VISTA Studio III Credits: 3
 - CE3200 - Structural Analysis I Credits: 3
 - CE3210 - Civil Engineering Materials Credits: 4
 - CE3300 - Hydraulic Engineering Credits: 3
 - CE3400 - Introduction to Environmental Engineering Credits: 3
 - CE3500 - Transportation Engineering Credits: 4
 - CE3600 - Soil Mechanics I Credits: 4
 - CE4010 - Civil Engineering Design Credits: 3
 - CE4900 - Comprehensive Design Experience Credits: 3
 - CHEM1020 - General Chemistry I Credits: 4
 - ES2110 - Statics Credits: 3
 - ES2120 - Dynamics Credits: 3
 - ES2310 - Thermodynamics I Credits: 3
 - ES2330 - Fluid Dynamics Credits: 3
 - ES2410 - Mechanics of Material I Credits: 3
 - MATH2200 - Calculus I Credits: 4
 - MATH2205 - Calculus II Credits: 4
 - MATH2210 - Calculus III Credits: 4
 - MATH2310 - Applied Differential Equations I Credits: 3
 - MSTP Electives, 3 courses Credits: 9
 - PHYS1210 - Engineering Physics I Credits: 4
- OR**
- PHYS1220 - Engineering Physics II Credits: 4
 - Professional Development Electives, 5 courses, Credits: 15
 - Science Elective (Life, Earth, or Space Sciences Elective) Credits: 4
 - STAT2050 - Fundamentals of Statistics Credits: 4

Approved Electives

Math/Science/Technical Electives

To be selected from approved department list.

Science Electives

To be selected from approved department list.

Professional Development Elective (PDE) Guidelines

15 hours of structured Professional Development Electives (PDE) are required. One Structural PDE is required. Electives are to be selected from at least three (3) areas of emphasis:

- Environmental Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering
- Water Resources Engineering

PDE Courses

Environmental Engineering

- CE4400 - Design of Water Treatment Facilities Credits: 3
- CE4410 - Design of Wastewater Treatment Facilities Credits: 3

- CE4430 - Green Chemistry and Global Environmental Problems Credits: 3
- OR**
- CHE4430 - Green Chemistry and Global Environmental Problems Credits: 3
- OR**
- ENR4430 - Green Chemistry and Global Environmental Problems Credits: 3
- CE4441 - Solid Waste Engineering Credits: 3
- OR**
- ENVE 4441

- CE5400 - Water Treatment Credits: 3
- CE5410 - Advanced Biological Wastewater Treatment Credits: 3
- OR**
- CHE 5410

- CE 5425

- CE 5430
- OR**
- ENVE5430 - Environmental Engineering Chemistry Credits: 3
- OR**
- CHE 5430

- CE5435 - Environmental Transport Processes Credits: 3

OR

- ENVE 5435

OR

- CHE 5435

- CE5445 - Hazardous Waste Site Remediation Credits: 3

OR

- ENVE 5445

OR

- CHE 5445

- CE5450 - Advanced Physical-Chemical Treatment Credits: 3

Geotechnical Engineering

If a Geotechnical course is selected, the first PDE must be one of the following:

- CE4610 - Foundation Engineering Credits: 3

OR

- CE5610 - Foundation Engineering Credits: 3

- CE4620 - Soil and Rock Slope Engineering Credits: 3

OR

- CE5660 - Soil and Rock Slope Engineering Credits: 3

- CE4630 - Ground Improvement, Reinforcement and Treatment Credits: 3

OR

- CE5630 - Ground Improvement, Reinforcement and Treatment Credits: 3

- CE5640 - Geotechnical Earthquake Engineering Credits: 3

Structural Engineering

One of the Following is Required:

- CE4250 - Structural Steel Design Credits: 3

- CE4260 - Structural Concrete Design Credits: 3

Beyond the Requirement, Any of the Following:

- CE4200 - Structural Analysis II Credits: 3

- CE4265 - Prestressed Concrete Design Credits: 3

OR

- CE5265 - Prestressed Concrete Design Credits: 3

- CE4285 - Masonry Design Credits: 3

OR

- CE5285 - Masonry Design Credits: 3

- CE4295 - Structural Timber Design Credits: 3

OR

- CE5295 - Structural Timber Design Credits: 3
- CE5010 - Advanced Mechanics of Materials Credits: 3
- CE5200 - Advanced Structural Analysis Credits: 3
- CE5220 - Structural Dynamics Credits: 3
- CE5255 - Advanced Steel Design Credits: 3
- CE5270 - Highway Bridge Engineering Credits: 3
- CE5280 - Behavior of Reinforced Concrete Credits: 3
- CE5290 - Earthquake Engineering Credits: 3

Transportation Engineering

If a Transportation course is selected, the first PDE must be one of the following:

- CE4510 - Pavement Design for Airports and Highways Credits: 3
- **OR**
- CE5510 - Pavement Design for Airports and Highways Credits: 3
- CE4555 - Geometric Design of Highways Credits: 3
- **OR**
- CE5555 - Geometric Design of Highways Credits: 3
- CE4530 - Traffic Engineering: Operations Credits: 3
- **OR**
- CE5530 - Traffic Engineering: Operations Credits: 3

Beyond The Requirement, Any of the Following:

(Traffic Flow, Traffic Simulation, or Public Transportation)

- CE4970 - Wyoming DOT Design Squad Cooperative Experience Credits: 3
- CE5540 - Traffic Control Credits: 3
- CE5560 - Traffic Safety Credits: 3
- CE5570 - Transportation Planning Credits: 3
- CE5575 - Intelligent Transportation Systems Credits: 3
- CE5585 - Pavement Management Systems Credits: 3
- CE5590 - Pavement Materials Credits: 3
- CE5700 - Civil Engineering Problems I Credits: 1-3

Water Resources Engineering

- CE4800 - Hydrology Credits: 3
- CE4810 - Groundwater Hydrology Credits: 3
- **OR**
- CE5810 - Groundwater Hydrology Credits: 3
- CE4870 - Water Resource Engineering Credits: 3
- CE5300 - Open-Channel Hydraulics Credits: 3
- CE5321 - Engineering and Environment Geophysics Credits: 3
- CE5700 - Civil Engineering Problems I Credits: 1-3

- CE5830 - Flow in Porous Media Credits: 3
- CE5850 - Advanced Subsurface Hydrology Credits: 3
- CE5865 - Deterministic Hydrology Credits: 3
- CE5880 - Advanced Hydrology Credits: 3
- CE5885 - Hydrometeorology Credits: 3

A Minimum of 42 Credit Hours Must Be Upper Division (3000+) Level.

Transfer Coursework: The Civil Engineering program accepts transfer course equivalents listed in the Wyoming Transfer Catalog. Other transfer courses will be considered by petition to the Department. The Department has a Policy on Transfer Courses for Continuing Students, which says continuing students should not plan to substitute "core" courses with transfer credits from other institutions, and that transfer credits for continuing students are evaluated on a case-by case basis. For upper-division coursework, no more than two upper division courses may be transferred and applied to the CE degree. CE 4010 and CE 4900 cannot be transferred to UW.

Civil Engineering/Water Resources

The purpose of this program is to broaden the students' master of science program in the water resource area in civil engineering.

Plan A Thesis Requirement

Only students with a M.S. Plan A thesis option are eligible. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Coursework and Thesis

Each student must complete a minimum of 28 hours of graduate level coursework and a thesis under Plan A (4 credit hours) to qualify for the master of science in civil engineering/ water resources.

The student must obtain at least 18 credit hours of graduate level coursework in engineering, emphasizing a concentration of core courses in a particular area of emphasis in civil engineering. The core course areas of emphasis for this program are hydrologic and hydraulic engineering. The particular set of courses for a given area of emphasis will be designated by the faculty in the water resources area for these areas of emphasis with the approval of the Civil Engineering Graduate Committee.

Interdisciplinary Component

9 hours

Technical Hydrology (3 Hours)

- GEOL5444 - Geohydrology Credits: 3
- GEOL5550 - Numerical Methods in Ground Water Geology I Credits: 3
- GEOL5570 - Advanced Geohydrology Credits: 3
- REWM5285 - Wildland Hydrology Credits: 3
- REWM 5280 - Stream Habitat Management Credits: 3

Law/Natural Resource Economics (3 Hours)

(please refer to the general degree requirements for a list of courses)

Water Quality (3 Hours)

- GEOL5450 - Geochemical Modeling Credits: 3
- GEOL5777 - Geochemistry of Natural Waters Credits: 3
- MOLB 4410 Water Microbiology Credits: 3
- MOLB 4500 Microbial Ecology Credits: 3
- ZOO4440 - Limnology Credits: 3

Computer Engineering, B.S.

Suggested Course Sequence

¹ Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation. GPA of 2.000 or higher is required for all prerequisite courses. Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

Freshman Year: Fall

- CHEM1020 - General Chemistry I Credits: 4
- COSC1010 - Introduction to Computer Science I Credits: 4
- FYS 1101² Credits: 3
- ENGL1010 - College Composition and Rhetoric Credits: 3
- MATH2200 - Calculus I Credits: 4

Total Credits: 18 Hours

Freshman Year: Spring

- COSC1030 - Computer Science I Credits: 4
- ES 2110³ - Statics ES2110 - Statics Credits: 3
- MATH2205 - Calculus II Credits: 4
- PHYS1210 - Engineering Physics I Credits: 4⁴

Total Credits: 15 Hours

Sophomore Year: Fall

- COSC2030 - Computer Science II Credits: 4
- ES2120 - Dynamics Credits: 3³
- ES2210 - Electric Circuit Analysis Credits: 3
- MATH2210 - Calculus III Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4

0440

Total Credits: 18 Hours

Sophomore Year: Spring

- COSC2150 - Computer Organization Credits: 3
- EE2220 - Circuits and Signals Credits: 4
- EE2390 - Digital Systems Design Credits: 4
- MATH2300 - Discrete Structures Credits: 3
- MATH2310 - Applied Differential Equations I Credits: 3

Total Credits: 17 Hours

Junior Year: Fall

- EE3220 - Signals And Systems Credits: 3
- EE3310 - Electronics I Credits: 4
- EE4490 - Hardware Descriptive Language (HDL) Digital Design Credits: 3
- Communication II Credits: 3 (COM2)
- Human Culture Credits: 3 (H)

Total Credits: 16 Hours

Junior Year: Spring

- EE3330 - Electronics II Credits: 4
- EE4220 - Probabilistic Signals and Systems Credits: 3
- EE4390 - Microprocessors Credits: 3
- Math/Science Elective Credits: 3 ⁴
- Human Culture Credits: 3 (H)

Total Credits: 16 Hours

Senior Year: Fall

- COSC4760 - Computer Networks Credits: 3
- OR
- EE4870 - Computer Network Hardware Credits: 4

- EE3150 - Electromagnetics Credits: 3
- EE4820 - Senior Design I Credits: 2 ⁷
- EE or BE Elective Credits: 3 or 4 ⁶
- U.S. & WY Constitutions Credits: 3 (V)

Total Credits: 14 Hours

Senior Year: Spring

- EE4830 - Senior Design II Credits: 2 ⁷
- CPEN Elective Credits: 3 ⁶
- CPEN Elective Credits: 3 ⁶
- CPEN Elective Credits: 3 ⁶
- CPEN Elective Credits: 3 ⁶

Total Credits: 14 Hours

Total Credits: 128 Hours

² EE 1101 is recommended for EE and CPEN majors

³ Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

⁴ PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

⁵ No technical elective in the Computer Engineering curriculum.

⁶ CPEN Option Courses: Allowed Computer Engineering Electives (as of Fall2020): Electrical Engineering Courses: EE 4245 Digital Signal Processing EE 4340 Semiconductor Materials and Devices EE 4345 Hardware Digital Signal Processing EE 4360 VLSI Design

EE 4440 Communication Theory EE 4590 Real Time Embedded Systems EE 4870 Computer Network Hardware EE 4990 Advanced Microprocessors EE 5390 Computer Architecture EE 5410 Neural and Fuzzy Systems EE 5430 3-D Computer Vision

EE 5620 Digital Image Processing EE 5630 Advanced Image Processing EE 5650 Object and Pattern Recognition Multicore Programming Network Programming and Congestion Control EE 4800 Autonomous Cyber-Physical Systems

EE 5885 Deep Reinforcement Learning EE 5885 Haptic Robotics

Computer Science Courses: COSC 3020 Algorithms and Data Structures COSC 4210 Web Application Development COSC 4220 Design and Implementation of Emerging Environments COSC 4450 Computer Graphics COSC 4550 Introduction to Artificial Intelligence

COSC 4555 Machine Learning COSC 4560 Modern Robots and Softbots COSC 4730 Mobile Applications Programming COSC 4735 Advanced Mobile Programming COSC 4740 Operating Systems Design COSC 4760 Computer Networks

COSC 4765

Computer Security Bioengineering Courses: BE 5410 Rehabilitation Engineering

Math Courses: Math 4500 Matrix Theory

For the latest updates to this list, please visit

http://www.uwyo.edu/electrical/undergraduate/cpen_electives_updated_nov_2020.pdf

⁷ To meet the COM3 requirement with EE 4820 and EE 4830 the COM2 course must be taken before EE 4820.

Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

⁸ Network Congestion Control can also be taken to fulfill the CPEN network course requirement.

⁹ ES 4920 will be allowed for technical elective credit.

¹⁰ Online courses taken outside of the Wyoming system, will not be considered for preapproved transfer.

Computer Science, B.S.

This major consists of a core set of required and elective courses as seen below. Students may also pursue one of a number of concentrations, which may further constrain the elective courses: Computers and Business, or Big Data. In addition to these courses, Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours. See the front sections of this catalog for specifics on the USP and university graduation requirements. Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements. All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

Computer Science Undergraduate Major

Computer Science Core

These courses, along with the USP requirements, provide a basic set of skills that all Computer Science majors should master. The courses in this program concentrate on the creation and understanding of computer software. The curriculum focuses first on programming and then on the central processes that support programming: operating systems, programming languages, and computational theory. Computer Science Core (required for all concentrations) Hrs.

Computer Science Courses

Introductory Programming Course 3/4

Choose one of:

- COSC1010 - Introduction to Computer Science I Credits: 4
- OR**
- COSC1015 - Introduction to Programming for Data Science Credits: 3

- COSC1030 - Computer Science I Credits: 4
- COSC2030 - Computer Science II Credits: 4
- COSC2150 - Computer Organization Credits: 3
- COSC3011 - Introduction to Software Design Credits: 3
- COSC3015 - Functional Programming Credits: 3
- COSC3020 - Algorithms and Data Structures Credits: 4
- COSC3050 - Ethics for the Computer Professional Credits: 1
- COSC4765 - Computer Security Credits: 3
- COSC4950 - Senior Design I Credits: 1
- COSC4955 - Senior Design II Credits: 2

Operating Systems Course 3/4

Choose One Of:

- COSC3750 - Linux Programming for System Applications Credits: 3
- OR**
- COSC4740 - Operating Systems Design Credits: 4

0443

Systems Course Credits: 3

Choose One Of:

- COSC4760 - Computer Networks Credits: 3
OR
- EE4870 - Computer Network Hardware Credits: 4
OR
- COSC4820 - Database Systems Credits: 3

Programming Language Course Credits: 3

Choose One Of:

- COSC4780 - Principles of Programming Languages Credits: 3
OR
- COSC4785 - Compiler Construction Credits: 1

Theory Course Credits: 3

Choose One Of:

- COSC4100 - Foundations of Computing Credits: 3
OR
- COSC4200 - Computability and Complexity Credits: 3

Mathematics and Science Courses

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3

- COSC2300 - Discrete Structures Credits: 3
OR
- MATH2300 - Discrete Structures Credits: 3

Statistics Course

One of

- STAT2050 - Fundamentals of Statistics Credits: 4
OR
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Science Courses

- Must take two, 4 hour science courses outside of Computer Science. See NOTE below Credits: 8

Math/Science Electives

- Elective or electives needed to meet ABET minimum Math/ Science requirement of 30 credit hours. See NOTE below for courses meeting the math or science elective Credits: 4

NOTE:

Math/Stat electives means any MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, STAT 4220 or any variable credit courses toward this requirement.

Courses meeting the Science requirement must have a lab component and be for science or engineering majors. See Department web pages for a current list of approved courses.

Computer Science Major

Degree Requirement in addition to completion of the core and USP requirement include three COSC Electives and five General Electives.

Computer Science Courses:

(see NOTE below)

- COSC Elective #1 Credits: 3
- COSC Elective #2 Credits: 3
- COSC Elective #3 Credits: 3

General Electives:

(see NOTE below)

- General Elective #1 Credits: 3
- General Elective #2 Credits: 3
- General Elective #3 Credits: 3
- General Elective #4 Credits: 3
- General Elective #5 Credits: 3

NOTE:

COSC electives: include any COSC 3000+ course which is not used to complete any other requirement.

Approved EE courses may also be taken as COSC electives. The list of approved courses is kept in the COSC website.

A total of 3 credits of COSC 3970 can be used.

General electives include any course at or above the 1000 level. They can be used to reach minimum number of upper division hours required for graduation. MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000 or any variable credit courses toward this requirement. Electives need to be selected that will meet the 42 hour requirement for Upper Division credits.

Computer Science, Big Data Concentration, B.S.

This major consists of a core set of required and elective courses as seen below. Students may also pursue one of a number of concentrations, which may further constrain the elective courses: Computers and Business, or Big Data. In addition to these courses, Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours. See the front sections of this catalog for specifics on the USP and university graduation requirements. Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements. All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

Note:

COSC electives: include any COSC 3000+ course which is not used to complete any other requirement.

Approved EE courses may also be taken as COSC electives. The list of approved courses is kept in the COSC website

a total of 3 credits of COSC 3970 can be used.

General electives include any course at or above the 1000 level. They can be used to reach minimum number of upper division hours required for graduation. MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, or any variable credit courses toward this requirement. Electives need to be selected that will meet the 42 hour requirement for Upper Division credits.

Concentration Requirements

Big data is high volume, high velocity, and/or high variety assets that require new forms of processing to enable enhanced decision making, insight discovery and process optimization. The Big Data Concentration directs the students toward data handling (AI, visualization, data mining, and machine learning) courses and data analysis (statistics) courses.

Students who wish to pursue the Big Data concentration should take the following courses to fulfill the Big Data Concentration in addition to the COSC core and USP requirements. In addition, students who wish to pursue a Big Data concentration are required to minor in Statistics.

Computer Science Courses

- COSC4450 - Computer Graphics Credits: 3
- COSC4550 - Introduction to Artificial Intelligence Credits: 3
- COSC4555 - Machine Learning Credits: 3
- COSC4570 - Data Mining Credits: 3
- General Elective (see NOTE below) Credits: 3
- Stat Minor Elective #1 Credits: 3
- Stat Minor Elective #2 Credits: 3
- Stat Minor Elective #3 Credits: 3

Note:

General electives include any course at or above the 1000 level. They can be used to reach minimum number of upper division hours required for graduation. MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, or any variable credit courses toward this requirement. Electives need to be selected that will meet the 42 hour requirement for Upper Division credits.

Computer Science, Computers and Business Concentration, B.S.

This major consists of a core set of required and elective courses as seen below. Students may also pursue one of a number of concentrations, which may further constrain the elective courses: Computers and Business, or Big Data. In addition to these courses, Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours. See the front sections of this catalog for specifics on the USP and university graduation requirements. Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements. All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

Computer Science Core

These courses, along with the USP requirements, provide a basic set of skills that all Computer Science majors should master. - COSC4200 - Computability and Complexity Credits: 3

Mathematics and Science Courses:

- MATH2200 - Calculus I Credits: 4
 - MATH2205 - Calculus II Credits: 4
 - MATH2250 - Elementary Linear Algebra Credits: 3
 - COSC2300 - Discrete Structures Credits: 3
- OR**
- MATH2300 - Discrete Structures Credits: 3

Statistics Course

0450

One of:

- STAT2050 - Fundamentals of Statistics Credits: 4
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Science Courses:

- Must take two, 4 hour science courses outside of Computer Science. See NOTE below

Math/Science Electives:

- Elective or electives needed to meet ABET minimum Math/Science requirement of 30 credit hours. See NOTE below for courses meeting the math or science elective Credits: 4

Note:

Math/Stat electives means any MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, STAT 4220 or any variable credit courses toward this requirement.

Courses meeting the Science requirement must have a lab component and be for science or engineering majors. See Department web pages for a current list of other approved courses.

Major Requirements

Degree Requirement in addition to completion of the core and USP requirement include three COSC Electives and five General Electives.

Computer Science Courses:

(see NOTE below)

- COSC Elective #1 Credits: 3
- COSC Elective #2 Credits: 3
- COSC Elective #3 Credits: 3

General Electives:

- General Elective #1 Credits: 3
- General Elective #2 Credits: 3
- General Elective #3 Credits: 3
- General Elective #4 Credits: 3
- General Elective #5 Credits: 3

Note:

COSC electives: include any COSC 3000+ course which is not used to complete any other requirement.

Approved EE courses may also be taken as COSC electives. The list of approved courses is kept in the COSC website.

a total of 3 credits of COSC 3970 can be used.

General electives include any course at or above the 1000 level. They can be used to reach minimum number of upper division hours required for graduation. MATH courses above Calculus II or STAT courses 3000 and up. Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, or any variable credit courses toward this requirement. Electives need to be selected that will meet the 42 hour requirement for Upper Division credits.

Concentration Requirements

An understanding of business fundamentals is essential for students planning a career in applied computer science in a business environment. Students who wish to pursue a Computers and Business concentration are required to complete one of the minors offered by the College of Business. Students should take COSC 4820 to satisfy the system course requirement. In addition, students should take the following courses as part of the Computer and Business Concentration:

Computer Science Courses:

(see NOTE below)

- COSC4210 - Web Application Development Credits: 3
- COSC4220 - Design and Implementation in Emerging Environments Credits: 3
- COSC Elective #1 Credits: 3
- College of Business Minor (see NOTE below)
- Business Minor #1 Credits: 3
- Business Minor #2 Credits: 3
- Business Minor #3 Credits: 3
- Business Minor #4 Credits: 3
- Business Minor #5 Credits: 3

Note:

COSC electives: include any COSC 3000+ course which is not used to complete any other requirement.

A total of 3 credits of COSC 3970 can be used.

Minimum Coursework Hours: A minimum of 120 hour is required. However, some Business Minors may require additional coursework in excess of 120 hours, dependent upon the minor selected by the student.

Construction Management, B.S.

CM

- ACCT2010 - Principles of Accounting I Credits: 3
- CE1000 - VISTA Studio I Credits: 1
 - USP H (Human Culture) Credits: 3
- CE2070 - Engineering Surveying Credits: 3
- CM2000 - Introduction to Construction Management Credits: 3
 - USP FYS (First Year Seminar) Credits: 3
 - USP V US & Wyoming Constitution Credits: 3
- CM2120 - Construction Materials and Methods Credits: 3

- CM2300 - Construction Safety Credits: 3
- CM2400 - MEP Systems Credits: 3
- CM2600 - Construction Documents Credits: 3
- CM3100 - Construction Scheduling Credits: 3
- CM3160 - Construction Law & Contracts Credits: 3
- CM3180 - Evolving Technologies in CM Credits: 3
- CM3200 - Structural Systems Credits: 4
- CM3210 - Construction Estimating Credits: 3
- CM3220 - Soils and Concrete Credits: 3

- CM4140 - Heavy CM Methods Credits: 3
- CM4600 - Building Info. Modeling Credits: 3
- CM4900 - Capstone Project Credits: 3
- CM Electives - 2 courses (choose from approved CM elective list), Credits: 6
- USP C1 (Communications), Credits 3
- COJO2010 - Public Speaking Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- ECON1010 - Principles of Macroeconomics Credits: 3
- General Elective: 4 courses Credits: 12
- GEOL1100 - Physical Geology Credits: 4
- MATH1405 - Trigonometry Credits: 3
- MATH2200 - Calculus I Credits: 4
- Math/Science Elective - 1 course, Credits: 3
- MGT1040 - Legal Environment of Business Credits: 3
- MGT3210 - Management and Organization Credits: 3
- PHYS1110 - General Physics I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4

Credits: 120 Hours (Minimum)

Electrical and Computer Engineering Quick Start, B.S./M.S.

The combined B.S./M.S. program in electrical and computer engineering enables especially well-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter towards both the B.S. and M.S. degrees. These students would earn the B.S. in either electrical engineering or computer engineering and the M.S. degree in electrical engineering following the current curricula.

This program allows for early planning of the M.S. portion of the student's education, taking graduate courses as part of the B.S. degree, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit hour load.

Degree Requirements

Up to 6 credit hours from UW, at the 5000-level or above, may be counted toward both the B.S. and M.S. degree programs.

For further information please visit our Web site at <http://www.uwyo.edu/electrical/graduate/prospective/ms/quickstart.html>.

Electrical Engineering, B.S.

Suggested Course Sequence

¹ Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation. GPA of 2.000 or higher is required for all prerequisite courses. Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

Freshman Year: Fall

- CHEM1020 - General Chemistry I Credits: 4
- FYS 1101² Credits: 3
- ENGL1010 - College Composition and Rhetoric Credits: 3
- ES1060 - Introduction to Engineering Problem Solving Credits: 3
- MATH2200 - Calculus I Credits: 4

Total Credits: 17 Hours

Freshman Year: Spring

- ES2110 - Statics Credits: 3 ³
- MATH2205 - Calculus II Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3
- PHYS1210 - Engineering Physics I Credits: 4 ⁴

Total Credits: 14 Hours

Sophomore Year: Fall

- ES2120 - Dynamics Credits: 3 ³
- ES2210 - Electric Circuit Analysis Credits: 3
- MATH2210 - Calculus III Credits: 4
- PHYS1220 - Engineering Physics II Credits: 4
- Human Culture Credits: 3 (H)

Total Credits: 17 Hours

Sophomore Year: Spring

- EE2220 - Circuits and Signals Credits: 4
- EE2390 - Digital Systems Design Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- U.S. & WY Constitutions Credits: 3 (V)
- Math/Science Elective Credits: 3 ⁵

Total Credits: 17 Hours

Junior Year: Fall

- EE3150 - Electromagnetics Credits: 3
- EE3220 - Signals And Systems Credits: 3
- EE3310 - Electronics I Credits: 4
- EE3510 - Electric Machines and Power Systems Credits: 4
- Communication II Credits: 3 (COM2)

Total Credits: 17 Hours

Junior Year: Spring

- EE3330 - Electronics II Credits: 4
- EE4075 - C++ with Numerical Methods for Engineers Credits: 4
- EE4220 - Probabilistic Signals and Systems Credits: 3
- EE4390 - Microprocessors Credits: 3
- EE4620 - Automatic Control Systems Credits: 3

Total Credits: 17 Hours

Senior Year: Fall

- EE4440 - Communication Theory Credits: 3
- EE4820 - Senior Design I Credits: 2⁸
- Technical Elective Credits: 4⁶
- BE or EE Elective Credits: 3⁷
- Human Culture Credits: 3 (H)

Total Credits: 15 Hours

Senior Year: Spring

- EE4830 - Senior Design II Credits: 2⁸
- BE or EE Elective Credits: 3⁷
- BE or EE Elective Credits: 3⁷
- BE or EE Elective Credits: 3⁷
- BE or EE Elective Credits: 3⁷

Total Credits: 14 Hours

Total Credits: 128 Hours

² EE 1101 is recommended for EE and CPEN majors

³ Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

⁴ PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

⁵ One course from the ECE Math/Science Elective List. ABET requires a minimum of 30 hours of Math/ Science Electives.

⁶ Any course marked as technical electives in the ECE. Credit can be earned for professional internships or CO-OPs.

⁷ A minimum of 15 hours of electives from BE or EE courses (4000-level or above) is required.

⁸ To meet the COM3 requirement with EE 4820 and EE 4830 the COM2 course must be taken before EE 4820.

Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

⁹ ES 4920 will be allowed for Technical Elective Credit

¹⁰ Internships for Credit must go through EE 4800

¹¹ Online courses taken outside of the Wyoming system, will not be considered for preapproved Transfer.

Energy Systems Engineering, B.S.

Energy Systems Engineering

Energy Systems Engineering is an ABET-accredited undergraduate degree offering by the Department of Mechanical Engineering. The ESE program was designed to train engineers to address one of this country's foremost challenges: to achieve energy independence and yet meet the growing demand for energy, while at the same time addressing critical environmental concerns. The program is intended to help meet these challenges by preparing students to be:

- technology leaders in energy conversion and environmental protection systems
- capable managers in the energy industry
- versatile overseers of energy development by the governmental sector
- technically-trained and environmentally-sensitive liaisons between the energy industry and the public.

ESE students will be trained in alternative and environmentally-friendly energy conversion systems, as well as more traditional technologies that will continue to play an important role for the foreseeable future.

Although the discipline of mechanical engineering has historically been responsible for the design of energy conversion cycles and equipment, issues outside the conventional realms of engineering are increasingly important to address as new and improved energy conversion systems are implemented. The engineer trained in Energy Systems will be better equipped than traditional mechanical engineers to deal with the environmental, legal, political, economic, and permitting aspects of new energy projects.

The ESE degree has many course work requirements in common with the Mechanical Engineering degree, particularly in the thermal, fluids, and energy conversion sciences. However, the ESE program emphasizes energy conversion aspects of Mechanical Engineering and requires course work from UW's School of Environment and Natural Resources (ENR), course work in environmental law, and two electives picked from a list of classes that focus attention on energy and the environment. The ENR courses expose students to issues related to permitting such as preparation of environmental impact studies, and related regulations such as the Endangered Species Act. In addition, there are five technical electives that allow students to choose more detailed study in personal areas of interest including, for example, courses in environmental engineering, wind engineering, solar engineering, and petroleum engineering.

Mechanical and Energy Systems Engineering degree candidates must meet the academic requirements of the department and in addition must have an average GPA of 2.000 (C) in Mechanical and/or Energy Systems engineering courses completed at this university. A grade of C or better must be earned in all engineering science (ES) and required mathematics courses.

Energy Systems Engineering Success Curriculum

All undergraduate students in the B.S. Mechanical Engineering and B.S. Energy Systems Engineering programs must successfully complete the Mechanical Engineering Success Curriculum prior to enrolling in any upper-division (3000-level or

above) courses taught by the Mechanical Engineering Department. The Mechanical Engineering Success Curriculum promotes successful completion of upper-division coursework by assuring a student that their foundational knowledge and skills are strong in mathematics and engineering fundamentals.

AP/iB courses are excluded from the GPA calculation, but grades transferred from other institutions will be used in evaluating the ME Success Curriculum GPA.

Successful Completion

To successfully complete the Mechanical Engineering Success Curriculum, a student must earn a minimum 3.000 GPA in the following 10 courses:

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- ES1060 - Introduction to Engineering Problem Solving Credits: 3
- ES2110 - Statics Credits: 3
- ES2120 - Dynamics Credits: 3
- ES2210 - Electric Circuit Analysis Credits: 3
- ES2310 - Thermodynamics I Credits: 3
- ES2330 - Fluid Dynamics Credits: 3
- ES2410 - Mechanics of Material I Credits: 3

Policy for Transfer Credit Towards Energy Systems Engineering (ESE) Core Coursework

In general, transfer of coursework toward an Energy Systems Engineering degree will follow University of Wyoming policy. Courses must be shown to be equivalent to its University of Wyoming course (latitude may be given for Energy Systems Engineering electives without a direct University of Wyoming equivalent). However, three courses are considered to be the core of the Energy Systems Engineering program, and therefore credit cannot be transferred from another institution. These courses are ESE 3020, ESE 3040, and ESE 3360. Exceptions may be made for courses from approved study abroad programs or in extreme circumstances. Please note that failing a prerequisite course resulting in a delay of graduation does not constitute an extreme circumstance. Any transfer of ESE courses requires explicit written approval from the Department.

Energy Systems Engineering

Atmospheric Science

- ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate Credits: 3

Chemistry

- CHEM1020 - General Chemistry I Credits: 4

Engineering Science

- ES1060 - Introduction to Engineering Problem Solving Credits: 3
- ES2110 - Statics Credits: 3

- ES2120 - Dynamics Credits: 3
- ES2210 - Electric Circuit Analysis Credits: 3
- ES2310 - Thermodynamics I Credits: 3
- ES2330 - Fluid Dynamics Credits: 3
- ES2410 - Mechanics of Material I Credits: 3

Environment and Natural Resources

- ENR3000 - Approaches to ENR Problem Solving Credits: 3
- ENR4750 - ENR Law and Policy Credits: 3
- ENR4900 - ENR Policy in Practice Credits: 3

Math

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3

Energy System Engineering

- ESE3005 - Engineering Experimentation Credits: 3
- ESE3020 - System Dynamics Credits: 3
- ESE3040 - Thermodynamics II Credits: 3
- ESE3060 - Numerical Methods for Engineers Credits: 3
- ESE3160 - Thermal/Fluid Science Lab Credits: 3
- ESE3360 - Fundamentals of Transport Phenomena Credits: 3
- ESE4060 - Energy Systems Design I Credits: 3
- ESE4070 - Energy Systems Design II Credits: 3

- LIFE1010 - General Biology Credits: 4

Physics

- PHYS1220 - Engineering Physics II Credits: 4

Electives

(See here for Math, Science and Business Elective options:

http://www.uwyo.edu/ceas/academics/advising/_files/advfiles/me_math_science_business_electives.pdf)

ESE Electives

Two ESE Electives (min 6 CH total {Applied GIS or Econ Nat Resource}), Choose 2 from:

- ECON1300 - Oil: Business, Culture, and Power Credits: 3
- ENR2000 - Environment and Society Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- POLS4350 - Sustainable Development and Global Policy Credits: 3
- GEOL3500 - Global Change: A Geological Perspective Credits: 4
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4
- PETE4000 - Environment, Technology and Society Credits: 3
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6

Math/Science Electives

One Math/Science Electives (min 3 CH total, select from department-approved list)

Business Elective

One Business Elective (min 3 CH, select from department-approved list)

Technical Electives

Five Technical Electives (min 15 CH, Choose 5 from:

- PETE2050 - Fundamentals of Petroleum Engineering Credits: 3
- GEOL4190 - Petroleum Geology Credits: 3
- CE3400 - Introduction to Environmental Engineering Credits: 3
- CE4430 - Green Chemistry and Global Environmental Problems Credits: 3
- ME3400 - Heating, Ventilating and Air Conditioning of Buildings Credits: 3
- ME3450 - Properties of Materials Credits: 3
- ME4470 - Wind and Ocean Energy Engineering Credits: 3
- ME4460 - Solar and Geothermal Engineering Credits: 3
- ESE4455 - Combustion Engineering Credits: 3
- EE2800 - Problems In: Credits: 1-3

Notes:

- Before enrolling in any upper division ESE or ME course, students must complete the ME Success Curriculum (3.000 GPA in MATH 2200, MATH 2250, MATH 2210, and the seven ES courses).
- Graduates must meet all college requirements and earn a minimum GPA of 2.000 in ME courses taken atUW. A minimum of 48 hours of upper division coursework are required, so ESE, business, and technical electives should be chosen appropriately.

F.M. Long Bioengineering, B.S.

Suggested Course Sequence

¹ Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation. GPA of 2.000 or higher is required for all prerequisite courses. Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

Freshman Year: Fall

0459

- CHEM1020 - General Chemistry I Credits: 4
- FYS 1101 Credits: 3²
- ENGL1010 - College Composition and Rhetoric Credits: 3
- ES1060 - Introduction to Engineering Problem Solving Credits: 3
- MATH2200 - Calculus I Credits: 4

Total Credits: 17 Hours

Freshman Year: Spring

- EE2220 - Circuits and Signals Credits: 4
- EE2390 - Digital Systems Design Credits: 4
- LIFE1010 - General Biology Credits: 4
- MATH2250 - Elementary Linear Algebra Credits: 3
- MATH2310 - Applied Differential Equations I Credits: 3

Total Credits: 18 Hours

Junior Year: Fall

- EE3220 - Signals And Systems Credits: 3
- EE3310 - Electronics I Credits: 4
- EE3510 - Electric Machines and Power Systems Credits: 4
- Communication II Credits: 3 (COM2)
- Human Culture Credits: 3 (H)

Total Credits: 17 Hours

Junior Year: Spring

- EE3330 - Electronics II Credits: 4
- EE4075 - C++ with Numerical Methods for Engineers Credits: 4
- EE4390 - Microprocessors Credits: 3
- MOLB2021 - General Microbiology Credits: 4

Total Credits: 15 Hours

Senior Year: Fall

- BE4810 - Bioinstrumentation Credits: 3
- EE3150 - Electromagnetics Credits: 3
- EE4820 - Senior Design I Credits: 2 ⁷
- US & WY Constitutions Credits: 3 (V)
- Technical Elective Credits: 3 ⁵

Total Credits: 14

Senior Year: Spring

- EE4620 - Automatic Control Systems Credits: 3
- OR**
- BE4820 - Biomedical Signal Processing Credits: 3

- EE4220 - Probabilistic Signals and Systems Credits: 3
- EE4830 - Senior Design II Credits: 2 ⁷
- MOLB3610 - Principles of Biochemistry Credits: 4
- BE or EE Elective Credits: 3 ⁶

Total Credits: 15 Hours

Total Credits: 128 Hours

² EE 1101 is recommended for EE and CPEN majors

³ Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

⁴ PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

⁵ One course from the ECE Math/Science Elective list. ABET requires a minimum of 30 hours of Math/Science Electives.

⁶ A minimum of 19 hours of EE/BE electives (4000-level or above) is required.

⁷ To meet the COM3 requirement with EE 4820 and EE 4830 the COM2 course must be taken before EE 4820.

Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

Mechanical Engineering Quick Start, B.S./M.S.

Through judicious choice of undergraduate electives, this program allows double-counting up to two 5000-level courses from the B.S. program toward M.S. degree requirements, thus reducing the time requirement for completing an M.S. degree. Students can apply for admission to the B.S./M.S. program by achieving junior status and meeting the following requirements for admission:

- completion of the four core ME courses (listed below)
- a minimum overall GPA of 3.250,
- a minimum GPA of 3.250 in ME courses, and
- a minimum of three letters of recommendation (at least two must be from ME faculty at UW).
- Contact Department for application process.

Students must maintain a GPA of at least 3.250 in their undergraduate and at least 3.000 in their graduate coursework in order to remain in good standing in the program. Not meeting the GPA requirement places a student on probation for one semester. If the GPA requirement is not met after that semester, the student will be dismissed from the Quick Start program. Transfer students must have taken courses equivalent to the ME core courses. Transfer students must have also completed at least 15 credit hours of courses at UW in order to be eligible for admission.

Until a student in this program has completed a total of 131 credit hours of courses applicable to the BS or MS degree in Mechanical Engineering, he/she will be governed by the regulations applicable to undergraduate students in the Department. After a student has accumulated a total of 131 applicable credit hours, he/she will be governed by the regulations applicable to any graduate student in the ME department. These regulations include the requirement that every student must take the GRE general examination. It is the intention of the department that, to the degree possible, a student in this program is treated on the same basis as any other student in the department at a comparable stage of his/her academic career.

With the recommendation of the student's academic advisor and the approval of the ME Graduate Affairs Committee, as many as 6 credit hours of ME department courses at the 5000 level may be counted towards both the undergraduate degree requirements and the requirements for the MS degree. In principle, therefore, the minimum number of course credit hours required for the BS/MS degrees will be 151 (for Plan A students + 4 additional hours of thesis research) or 156 (for Plan B students - non-thesis option).

Core ME Courses

- ME3010 - Intermediate Mechanics of Materials Credits: 3
- ME3020 - System Dynamics Credits: 3
- ME3040 - Thermodynamics II Credits: 3
- ME3360 - Fundamentals of Transport Phenomena Credits: 3

Mechanical Engineering, B.S.

Mechanical Engineering Success Curriculum

All undergraduate students in the B.S. Mechanical Engineering and B.S. Energy Systems Engineering programs must successfully complete the Mechanical Engineering Success Curriculum prior to enrolling in any upper-division (3000-level or above) courses taught by the Mechanical Engineering Department. The Mechanical Engineering Success Curriculum promotes successful completion of upper-division coursework by assuring a student that their foundational knowledge and skills are strong in mathematics and engineering fundamentals. AP/iB courses are excluded from the GPA calculation, but grades transferred from other institutions will be used in evaluating the ME Success Curriculum GPA.

To successfully complete the Mechanical Engineering Success Curriculum, a student must earn a minimum 3.000 GPA in the following 10 courses:

- MATH2200 - Calculus I Credits: 4
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- ES1060 - Introduction to Engineering Problem Solving Credits: 3
- ES2110 - Statics Credits: 3
- ES2120 - Dynamics Credits: 3
- ES2210 - Electric Circuit Analysis Credits: 3
- ES2310 - Thermodynamics I Credits: 3
- ES2330 - Fluid Dynamics Credits: 3
- ES2410 - Mechanics of Material I Credits: 3

Policy for Transfer Credit Towards Mechanical Engineering (ME) Core Coursework

In general, transfer of coursework towards a Mechanical Engineering degree will follow University of Wyoming policy. Courses must be shown to be equivalent to its University of Wyoming course (latitude may be given for Mechanical Engineering electives without a direct University of Wyoming equivalent). However, six courses are considered to be the core of the Mechanical Engineering program, and therefore credit cannot be transferred from another institution. These courses are ME 3010, ME 3020, ME 3040, ME 3170, ME 3360, and ME 3450. Exceptions may be made for courses from approved study abroad programs or in extreme circumstances. Please note that failing a prerequisite course resulting in a delay of graduation does not constitute an extreme circumstance. Any transfer of ME courses requires explicit written approval from the Department.

Curriculum

- One Technical Elective (min 3 CH, any engineering, math/science or business course approved by the ME Dept)

(See here for Math, Science and Business Elective options:

http://www.uwyo.edu/ceas/academics/advising/_files/advfiles/me_math_science_business_electives.pdf)

Notes:

- Before enrolling in any upper division ESE or ME course, students must complete the ME Success Curriculum (3.000 GPA in MATH 2200, MATH 2250, MATH 2210, and the seven ES courses).
- Graduates must meet all college requirements and earn a minimum GPA of 2.000 in ME courses taken at UW. A minimum of 48 hours of upper division coursework are required, so ME, business, and technical electives should be chosen appropriately.
- ES 2800 is NOT a part of MESC

Petroleum Engineering Quick Start, B.S./M.S.

The BS/MS Quick Start program in Petroleum Engineering (PETE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their Bachelor of Science (B.S.) degree in Petroleum Engineering. These students may apply for admission to the Quick Start program during the second semester of their junior year or during their senior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and better planned use of time should result in reduction of the time required for obtaining the Master of Science in Petroleum Engineering degree. Students who enter the

Quick Start program must accept primary responsibility for actively planning their Programs of Study to assure timely completion of their course work and research programs.

The Quick Start program contains two essential elements:

- Qualified students may receive provisional admission to the Petroleum Engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.
- Students in the program may apply up to 6 credit hours of 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to 6 credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level course work as undergraduates, easing their transition to the Petroleum Engineering graduate program.

For additional information, visit our website for admissions information <http://www.uwyo.edu/petroleum/undergraduate/current-students/quickstart.html> or contact our graduate admissions coordinator at pete-info@uwyo.edu.

Petroleum Engineering, B.S.

Undergraduate Curriculum

*Course meets USP requirement.

- CHEM1020 - General Chemistry I Credits: 4 *
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- ES2110 - Statics Credits: 3
- ES2120 - Dynamics Credits: 3
- ES2310 - Thermodynamics I Credits: 3
- ES2330 - Fluid Dynamics Credits: 3
- ES 2410 - Mechanics of Materials Credits: 3
- GEOL1100 - Physical Geology Credits: 4 *
- GEOL4190 - Petroleum Geology Credits: 3
- GEOL Technical Elective Credits: 3
- MATH2200 - Calculus I Credits: 4 *
- MATH2205 - Calculus II Credits: 4
- MATH2210 - Calculus III Credits: 4
- MATH2310 - Applied Differential Equations I Credits: 3
- PHYS1220 - Engineering Physics II Credits: 4
- PETE1060 - Introduction to Petroleum Engineering Problem Solving Credits: 1
- PETE2050 - Fundamentals of Petroleum Engineering Credits: 3
- PETE2060 - Introduction to Petroleum Engineering Computing Credits: 3
- PETE3025 - Heat and Mass Transfer Credits: 3
- PETE3100 - Rock and Fluids Lab Credits: 2
- PETE3255 - Basic Drilling Engineering Credits: 3
- PETE3015 - Multicomponent Thermodynamics Credits: 3
- PETE3200 - Reservoir Engineering Credits: 3
- PETE3265 - Drilling Fluids Laboratory Credits: 3
- PETE3715 - Production Engineering Credits: 3
- PETE3725 - Well Completions Credits: 3
- PETE4320 - Well Log Interpretation Credits: 3
- PETE4225 - Well Test Analysis Credits: 3
- PETE4340 - Petroleum Economics Credits: 3

- PETE4736 - Petroleum Engineering Design Credits: 4 *
- PETE Technical Electives Credits: 15

Technical Electives Policy

The technical electives in the PETE curriculum can be used to complete a curriculum emphasis option or a minor. The number of credits of upper division courses must be satisfied, therefore, 13 elective credits must be 3000-level courses or higher.

Notes: Technical Electives must be selected with your advisor's documented approval.

Minimum Grade Requirements

A grade of C or better is required for the following courses:

- USP designated courses: FYS, COM1, COM2, COM3
- All Engineering Science (ES) courses
- MATH courses that are prerequisites to ES & PETE courses
- PETE1060 - Introduction to Petroleum Engineering Problem Solving Credits: 1
- PETE2050 - Fundamentals of Petroleum Engineering Credits: 3
- PETE4736 - Petroleum Engineering Design Credits: 4

Total Upper Division Credits Required

48

Total Hours Required for B.S. Degree

129

Minor

Computer Engineering Minor

Minor Requirements:

You must have a minimum of 12 credits of courses that are not counted toward your major.

- COSC2150 - Computer Organization Credits: 3
- EE4490 - Hardware Descriptive Language (HDL) Digital Design Credits: 3
- 17 credits of electrical engineering (EE) or CPEN Elective courses.

COSC Courses

The following COSC courses can also be used:

- COSC1010 - Introduction to Computer Science I Credits: 4
- **OR**
- COSC1015 - Introduction to Programming for Data Science Credits: 3

- COSC1030 - Computer Science I Credits: 4
- COSC2030 - Computer Science II Credits: 4
- COSC4760 - Computer Networks Credits: 3

Computer Science Graduate Minor

Requirements:

All 12 credits must be completed with a grade of B or better. A grade of B- is not sufficient.

Requirements for a graduate minor in Computer Science are as follows:

- COSC5110 - Analysis Of Algorithms Credits: 3
- 9 additional credits of 5000-level computer science courses

Computer Science Minor

Requirements for a minor in Computer Science are as follows:

A total of 18 credits of computer science courses

All 18 credits must have a grade of C or better.

Computer Science Endorsement

In collaboration with the College of Education, the Department of Computer Science offers an endorsement in computer science for future or existing K-12 teachers. There are two options - a basic (15 hour) or advanced (16 hour) endorsement that can be combined with other courses for the computer science minor (20 hours). Students who earn this endorsement, as well as an elementary or secondary teaching certification, can teach computer science in K-12 schools. See information in the College of Education section of this catalog to learn more about this endorsement.

Electrical Engineering Minor

Electrical Engineering Minor Requirements:

You must have a minimum of 12 credits of EE/BE courses that are not counted toward your major.

- ES2210 - Electric Circuit Analysis Credits: 3
- plus a total of 20 credits of electrical engineering (EE) or bioengineering (BE) courses

International Engineering Minor

Students in the College of Engineering and Applied Science may earn a Minor in International Engineering. The Minor requires:

- a study abroad experience;
- 9 credits of lower-division coursework; and
- 9 credits of upper-division coursework.

More detailed requirements are available at: www.uwyo.edu/ceas/academics/intleng.html.

Land Surveying Minor

A minor in Land Surveying requires 31 hours of specific course work. This minor meets the Wyoming Board of Registration for Professional Engineers and Professional Land Surveyor's surveying education requirements for eligibility as a Land Surveyor in Training. The Land Surveying minor may be paired with any major. With the exception of CE 2070, all classes are offered distance learning through Distance Education Programs.

Curriculum Requirements:

- LS2110 - Real Property Law Credits: 3
- CE2070 - Engineering Surveying Credits: 3
- OR**
- LS2010 - Engineering Surveying Lecture Credits: 2 **AND**
- LS2015 - Engineering Surveying Laboratory Credits: 1
- LS3130 - Public Land Surveys Credits: 3
- LS3100 - Real Property Descriptions Credits: 2
- LS2400 - Basic Geodesy for Today's Land Surveyor Credits: 2
- LS2020 - GPS for Land Surveyors Credits: 4
- ENTK 2500 Credits: 3 ¹
- LS3200 - Route Surveying Credits: 3
- LS3210 - Advanced Surveying Credits: 4
- LS3120 - Boundary Principles Credits: 2
- LS3110 - Boundary Evidence Credits: 2

Total Credits: 31 Hours

¹ Computer Aided Drafting 1 offered through Sheridan College Outreach Programs.

Process Control and Instrumentation Minor

The goal of the Process Control and Instrumentation Minor is to provide students obtaining Bachelor of Science majors in the College of Engineering and Applied Science at the University of Wyoming with enhanced education to better meet industry's needs. This minor will be particularly useful for students majoring in Chemical Engineering, Electrical Engineering, Mechanical Engineering, and Petroleum Engineering.

Minor Requirements

The Minor in Process Control and Instrumentation will require a minimum of 18 hours of coursework. No more than 6 hours of coursework taken for the minor may also count as required (non-elective) coursework toward a student's major.

Required Courses

- CHE2005 - Chemical Process Analysis Credits: 3
- CHE2090 - Practical Fundamentals of Process Control Credits: 2
- CHE3090 - Applying Simulation to Dynamic Processes Credits: 1
- CHE4092 - Controlling Process Systems Credits: 3

One of the Following

- CHE4090 - Process Dynamics and Control Credits: 3
- EE4620 - Automatic Control Systems Credits: 3
- EE4621 - Honors Automatic Control Systems Credits: 3

Approved Elective Courses:

At least 6 hours of the following:

- ES2210 - Electric Circuit Analysis Credits: 3
- EE2220 - Circuits and Signals Credits: 4
- EE3220 - Signals And Systems Credits: 3
- ME4020 - Design of Mechanical/Electronic Systems Credits: 3
- COSC4450 - Computer Graphics Credits: 3
- COSC4765 - Computer Security Credits: 3
- CHE4972 - Internship in Process Control Engineering Credits: 1-6

Minor Total Credits: 18 Hours

Graduate

Architectural Engineering, M.S.

Areas of study in the master of science program include: building mechanical systems, building energy modeling, structural engineering, The master of science degree in each of these areas requires completion of 12 to 18 hours of engineering courses related to the particular program area.

Plan A (Thesis)

The degree of master of science, Plan A, requires a minimum of 26 hours of coursework and a minimum of 4 hours thesis research in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework for approval by the departmental graduate studies committee (AREGS), and the department head.

Plan A is required of all state or contract supported graduate assistants.

Plan B (Non-thesis)

Requires a minimum of 30 hours of coursework and a Plan B paper, in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework and the course number that the Plan B paper covers for approval by the AREGS and the department head.

Atmospheric Science, M.S.

The MS degree requires a total of 30 hours: 26 hours of coursework and a minimum of 4 thesis research hours. Coursework consists of core courses and electives. Up to 15 credits of coursework can be transferred from other universities. 15 in-residence credits are required.

Research Plan.

Annual meetings with graduate committee.

M.S. Thesis defense.

Master's Program

Approval of research plan by the graduate committee

Colloquium and oral defense of M.S. thesis Approval of M.S. thesis by the graduate committee

Requires a minimum of 26 hours of acceptable graduate coursework and four hours of thesis research and a thesis (final written project).

21 in-residence coursework hours

Required Courses

These courses are required for the master's program.

- ATSC5010 - Physical Meteorology I Credits: 4
- ATSC5011 - Physical Meteorology II Credits: 4
- ATSC5014 - Dynamic Meteorology Credits: 4
- ATSC5016 - Synoptic Meteorology Credits: 4
- ATSC5018 - Ethics and Research Methods Credits: 1
- UW Elective(s) to be determined by committee Credits: 9 minimum

Atmospheric Science, Ph.D.

Program Specific Degree Requirements

Approval of research plan by the graduate committee

At least one committee meeting per year

Preliminary exam

Oral defense of Ph.D. dissertation

Approval of Ph.D. dissertation by the graduate committee

Ph.D. requires a minimum of 72 graduate hours, with at least 42 hours in formal coursework. This may include appropriate coursework from a master's degree.

Additional credits toward the 72 credit hour requirement may include dissertation research hours, internship hours, or additional coursework.

24 in-residence coursework hours

Chemical Engineering, M.S.

Graduate Study Guidelines

All incoming M.S. Plan A and M.S. Plan B students must have an adviser. The student is responsible for contacting faculty members in order to find an adviser.

All Chemical Engineering graduate students must take the following Chemical Engineering Core courses:

- CHE5020 - Thermodynamics Credits: 3
- CHE5010 - Transport Phenomena Credits: 3
- CHE5030 - Reaction Kinetics Credits: 3
- CHE5355 - Mathematical Methods in Chemical Engineering Credits: 3

Credit Hours

- Total (from above) Credits: 12
- CHE 5960 - Thesis Research Credits: 4
- Electives Credits: 14
- Total Credits: 30

Plan B (Non-Thesis)

The coursework requirements are the same as the M.S. Plan A requirements except that Thesis Research (CHE 5960) is not required. Plan B students take an additional 4 hours of elective course credits (total of 30 hours required).

M.S. Plan B students must write a paper on a topic assigned by the adviser. This paper must be submitted to the student's graduate committee for approval. A final presentation is then required.

M.S. Seminar Requirements

All chemical engineering graduate students must enroll in CHE 5890, Chemical Engineering Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Registered off-campus graduate students can be exempt from having to enroll in CHE 5890.

M.S. Thesis (Dissertation Defense)

All M.S. Plan A students must orally defend their thesis or dissertation at a public final examination. If, for any reason, a student's M.S. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public thesis defense in oral presentation format. At least two weeks before the examination, the

student must provide each member of the graduate committee with a copy of the written M.S. thesis and provide the department an announcement of their defense for advertisement by bulletin board, e-mail, or other means. The results of the examination are reported on the Report of Final Examination form. Often, graduate committee members request changes in the thesis, and they may postpone signing the form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Graduate Student Resources web site. This copy will be rejected if the format standards specified by the Thesis and Dissertation Format Guide are not met. This guide allows for a publication-ready format. If required by the department and/or committee, additional printed copies should be delivered to the University Store for binding. Students should consult with the adviser to determine if the adviser wants a copy of the thesis, dissertation, or other research documentation.

Chemical Engineering, Ph.D.

The Department of Chemical Engineering offers graduate programs leading to the M.S. and Ph.D. degrees in chemical engineering. The M.S. degree is offered under Plan A and Plan B. In addition, an environmental engineering program, run jointly by the Department of Chemical Engineering, the Department of Petroleum Engineering, and the Department of Civil and Architectural Engineering, offers graduate programs leading to an M.S. in environmental engineering under either Plan A or Plan B.

All students in the Ph.D. program will learn the research techniques that individuals working in national laboratories, industrial positions and academia.

A M.S. degree is not required to enter a Ph.D. program.

Graduate Core Classes

All incoming Ph.D students must have an adviser. The student is responsible for contacting faculty members in order to find an adviser.

All Chemical Engineering graduate students must take the following Chemical Engineering Core courses:

- CHE5020 - Thermodynamics Credits: 3
- CHE5010 - Transport Phenomena Credits: 3
- CHE5030 - Reaction Kinetics Credits: 3
- CHE 5355 - Mathematical Methods in Chemical Engineering Credits: 3

Doctoral Program

Credit Hours

- CHE5090 - Graduate Teaching and Research: Theory and Methods Credits: 3
- CHE 5980 - Dissertation Research Credits: 30
- Electives - Credits: 27 (CHE 5980 will count toward your electives)
- Total Credits: 72

Ph.D. Seminar Requirements

All chemical engineering graduate students must enroll in CHE 5890, Chemical Engineering Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Registered off-campus graduate students can be exempt from having to enroll in CHE 5890.

Ph.D. Preliminary Examination

All Ph.D. students must pass a preliminary examination no later than the end of the student's fifth full semester in the graduate program and a least 15 weeks prior to the dissertation defense. Prior to attempting the Ph.D. preliminary examination, students must have completed all required core classes no later than the end of their fourth semester in the graduate program. Students must file a program of study prior to attempting the preliminary examination.

The goal of the preliminary exam is for the student to demonstrate his or her research progress to-date and present the research proposition that will be investigated and lead to his or her final dissertation. The preliminary exam consists of three components: a written document provided to each member of the student's graduate committee at least one week prior to the oral presentation; a public oral presentation; and a private examination by the student's graduate committee immediately following the oral presentation.

The written document may be in any format but must concisely provide a survey of the relevant literature, a summary of the student's progress to-date, and a clear, detailed plan for the successful completion of the proposed work. The preliminary exam oral presentation should be consistent with the written document. It should provide an appropriate literature background, demonstrate proficiency with proposed experimental/computational techniques, identify details of the experiments to be performed, and provide a timeline to final defense.

The student's committee will pass or fail the student on the strength of the preliminary examination, with an option to conditionally pass the student while requiring an interim committee meeting prior to the final Ph.D. examination. A form sent by the student's adviser to the Office of the Registrar reports the results of the examination.

Ph.D. Final Examination (Dissertation Defense)

All Ph.D. students must orally defend their thesis or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public thesis defense in oral presentation format. At least two weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis of Ph.D. dissertation and provide the department an announcement of their defense for advertisement by bulletin board, e-mail, or other means. The results of the examination are reported on the Report of Final Examination form. Often, graduate committee members request changes in the thesis or dissertation, and they may postpone signing the form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Graduate Student Resources web site. This copy will be rejected if the format standards specified by the Thesis and Dissertation Format Guide are not met. This guide allows for a publication-ready format. If required by the department and/or committee, additional printed copies should be delivered to the University Store for binding. Students should consult with the adviser to determine if the adviser wants a copy of the thesis, dissertation, or other research documentation.

Civil Engineering, M.S.

Program Specific Degree Requirements

Master's Program

Areas of study in the master of science program include: building mechanical systems engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. The master of science degree in each of these areas requires completion of 12 to 18 hours of engineering courses related to the particular program area.

Plan A (Thesis)

The degree of master of science, Plan A, requires a minimum of 26 hours of coursework and a minimum of 4 hours thesis research in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework for approval by the departmental graduate studies committee (CEGS), and the department head.

Plan A is required of all state or contract supported graduate assistants.

Plan B (Non-Thesis)

Requires a minimum of 30 hours of coursework and a Plan B paper, in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework and the course number that the Plan B paper covers for approval by the CEGS and the department head.

Civil Engineering, Ph.D.

Areas of study in the doctor of philosophy program include: building mechanical systems engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering.

Minimum of 42 hours of coursework beyond the baccalaureate, 36 hours of which must be 5000-level (graduate-level) courses or the equivalent, and concentrated independent research leading to an acceptable dissertation.

In addition to expertise in the specific dissertation topic, the candidate must demonstrate competence in two or more research areas that will help to insure a high-quality dissertation acceptable to the student's graduate committee.

Subject to department and university requirements, the student's coursework is arranged by consultation between the student, his or her adviser, and his or her committee, and must also be approved by the CEGS and by the department head.

Coursework is defined in a program of study that should be filed by the end of the second semester of the Ph.D. program.

At a time near the completion of formal coursework, the student is required to take and pass a preliminary examination on the Ph.D. coursework and, as a part of the examination, is required to present a written and oral dissertation proposal to his or her committee for approval.

Finally, the student must demonstrate research competence in an oral defense of the dissertation and must submit an acceptable written version of the dissertation to his or her graduate committee in a timely manner to meet deadlines. In addition, the student is to meet the minimum requirements set forth in this bulletin.

Computer Science, M.S.

Each M.S. student will have a supervising committee of at least three members appointed. The committee will consist of at least two members of the computer science faculty and at least one non-COSC faculty member.

Program Specific Degree Requirements

Plan A (Thesis)

A total of at least 31 credit hours must be completed. The student must complete a minimum of 27 hours of courses, including the CORE and BREADTH REQUIREMENTS. At least 19 credit hours must be COSC courses. All COSC courses must be at the 5000 level. Courses from other departments, including no more than 6 hours of 4000-level courses, may be included with the approval of the supervising M.S. committee.

Plan A students are required to formally defend their theses before their supervising committees. All defenses must be open and announced at least two weeks in advance. The thesis must be distributed to the committee at least two weeks in advance of the defense. If the student does not pass the defense, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Plan B (Non-Thesis)

The student must complete a minimum of 33 hours of courses, including the CORE and BREADTH REQUIREMENTS. At least 22 credit hours must be COSC courses. All COSC courses must be at the 5000 level. Courses from other departments, including no more than 6 hours of 4000-level courses, may be included with the approval of the supervising M.S. committee.

UW Coursework Requirements for M.S. Transfer Students:

M.S. transfer students must complete at least 21 credit hours at the University of Wyoming. At least 12 credits of the CORE & BREADTH REQUIREMENTS must be taken at the University of Wyoming. No more than one class per category of breadth may be counted towards this 12-credit total. The algorithms course credits may be counted toward this 12-credit total.

Summary of Credit Requirements

Plan A

- COSC5110 - Analysis Of Algorithms Credits: 3
- Breadth: theory course, AI course, two systems courses Credits: 12
- Additional courses Credits: 12

- COSC5960 - Thesis Research Credits: 1-12
- OR**
- COSC5980 - Dissertation Research Credits: 1-12

Total Credits: 31 Hours

Plan B

- COSC5110 - Analysis Of Algorithms Credits: 3
- Breadth: theory course, AI course, two systems courses Credits: 12
- Additional courses Credits: 18

Total Credits: 33 Hours

Computer Science, Ph.D.

Each doctoral student will have a supervising committee of at least five members appointed. The primary functions of this committee are to suggest coursework, to administer the qualifying, preliminary, and final examinations, and to oversee and evaluate the research of the candidate. The committee will consist of at least three members of the computer science department faculty and at least one non-COSC faculty member. The standards that this committee should consider when recommending programs of study are outlined in the following sections.

Coursework Requirements:

A total of at least 72 credit hours must be completed. A minimum of 42 of these credit hours must be taken as coursework, including the CORE and BREADTH REQUIREMENTS. A minimum of 12 hours of COSC5980 - Dissertation Research must be taken. All COSC courses must be at the 5000 level. Courses from other departments, including no more than 12 hours of 4000-level courses, may be included with the approval of the supervising Ph.D. committee. All course requirements MUST be completed or enrolled with satisfactory midterm progress prior to scheduling the Ph.D. Final Examination.

UW Coursework Requirements for Ph.D. Transfer Students:

Ph.D. transfer students must complete at least 24 credit hours at the University of Wyoming. At least 12 credits of the CORE and BREADTH REQUIREMENTS must be taken at the University of Wyoming. No more than one class per category of breadth may be counted towards this 12-credit total. The algorithms course credits may be counted toward this 12-credit total.

Program:

A program of original and innovative research will be undertaken by the candidate. At the end of this program, the candidate will document this research in a dissertation. The dissertation will present the details and results of the candidate's research in addition to providing a critical comparison with relevant previously-published works.

Each successful doctoral student must pass three examinations. These include a qualifying examination, a preliminary examination, and a final (dissertation) defense.

Qualifying Exam Criteria:

The student must complete the CORE REQUIREMENT and pass a closed oral examination on a research area administered by the supervising committee. Although closed to the public, faculty members of the Department of Computer Science are welcome to attend. The exam must be announced to the faculty at least two weeks in advance. The research area will be chosen in consultation with the committee. The student must demonstrate background knowledge of the state of the art in the area and preliminary work. This will involve, but is not limited to, presenting material and answering questions covering the relevant area knowledge. The format of the exam will be defined by the committee prior to the exam to allow for sufficient preparation. This examination is intended to motivate the candidate to review relevant literature extensively prior to pursuing the original and innovative portions of the research. Qualifying exam criteria must be completed within the first two years of enrollment in the Ph.D program. If the student does not pass the qualifying exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass. The closed oral examination requirement may be waived for a student who has completed an M.S. degree in COSC at UW if their M.S. presentation was at a research level that demonstrated background knowledge of the state of the art in the area, at the discretion of the supervising Ph.D. committee.

Preliminary Exam Criteria:

Prior to scheduling the Preliminary Examination, the student must be making satisfactory progress towards completion of their course requirements, including the BREADTH REQUIREMENTS. A Preliminary Examination will consist of a presentation and defense of the already completed portion of the dissertation research and the research that is proposed to complete the dissertation. The Preliminary Examination must be open and announced at least two weeks in advance. The preliminary examination must be completed within two years of enrollment in the Ph.D program (within three years of enrollment for students who do not have an M.S. degree). This examination is intended to motivate the candidate to make significant progress on work towards their Ph.D. dissertation and propose milestones for completion. If the nature of the proposed continued research and methodology is deemed to be sufficiently original and innovative by the supervising committee, then the committee will approve the research direction after having administered this examination. If the student does not pass the preliminary exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Option for M.S. degree en route to Ph.D.:

After completing the Qualifying Exam and Preliminary Exam, a Ph.D. student may additionally earn an M.S. degree after completing the remaining M.S. course requirements, including the BREADTH REQUIREMENTS. COSC 5980 may be substituted for COSC 5960 in the M.S. requirements at the discretion of the supervising committee. The M.S. degree will be granted only after completion of the preliminary exam. For an M.S. degree to be granted prior to completion of the preliminary exam, the student should enroll in the M.S. degree program and complete the remaining M.S. requirements.

Final Exam Criteria:

Prior to scheduling the Ph.D. Final Examination (often referred to as a "defense"), all course requirements, including the BREADTH REQUIREMENTS, MUST be completed or enrolled with satisfactory midterm progress. The Final Examination (dissertation defense) will consist of an oral presentation by the candidate of his/her research and the results that were derived. At this examination, the candidate is expected to defend the research as being original and contributory to the discipline of computer science. The Final Examination must be open and announced at least two weeks in advance. The dissertation must be distributed to the supervising committee at least two weeks in advance of the Final Examination. If the student does not pass the final exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Time to degree for part-time students:

Exceptions to the completion deadlines for the Qualifying Exam and Preliminary Exam may be made for part-time students at the discretion of the supervising committee.

Computer Science Core Requirements

COSC5110 - Analysis Of Algorithms must be completed with a grade of B or better. A grade of B- is not sufficient. Students are strongly encouraged to take COSC 5110 the first time it is offered after enrollment.

Computer Science Breadth Requirements

Students must earn a grade of B or better in one class from the Theory category, one class from the Artificial Intelligence category, and two classes from the Systems category. A grade of B- is not sufficient. Thus there must be 12 credits taken to satisfy the breadth requirement. A list of courses in each category is available from the Department. Although some courses may be listed under multiple categories, a course may only count once towards the breadth requirement.

Program Specific Degree Requirements

Summary of Credit Requirements

- COSC5110 - Analysis Of Algorithms Credits: 3
- Breadth: theory course, AI course, two systems courses Credits:12
- Additional courses Credits: 27

- COSC5960 - Thesis Research Credits: 1-12
OR
- COSC5980 - Dissertation Research Credits: 1-12

- Other credits (may include courses or COSC 5960/COSC 5980) Credits: 18

Total Credits: 72 Hours

Electrical Engineering, M.S.

Plan A (Thesis)

This is a minimum 30 credit hour program, 26 hours coursework and 4 hours of thesis

- Minimum 16 Course Hours in Electrical and Computer Engineering Course Work
- Minimum 3 Course Hours in Formal Course Work outside the Electrical and Computer Engineering Department approved by the student's committee
- 7 Additional Formal Course Hours in or out of the Electrical and Computer Engineering Department
- 4 credits of MS thesis research
- No more than 12 credit hours can be at the 4000 level
- No more than 3 credit hours of independent study

Of the above credit hours in formal coursework, no more than 12 credit hours can be 4000 level

The candidate must meet the minimum requirements for the Master of Science degree and also complete and defend a master's thesis.

Plan B (with Paper)

This is a 30 hour program:

- Minimum 18 Course Hrs in Electrical and Computer Engineering Course Work
- Minimum 3 Course Hrs in Formal Course Work outside the Electrical and Computer Engineering Department
- 9 Additional Formal Course Hrs in or out of the Electrical and Computer Engineering Department
- No more than 12 credit hours can be at the 4000 level
- No more than 3 credit hours of independent study

Plan B (Coursework Only)

This is a 30 hour program:

- Minimum 18 Course Hrs in Electrical and Computer Engineering Course Work
 - Minimum 3 Course Hrs in Formal Course Work outside the Electrical and Computer Engineering Department
 - 9 Additional Formal Course Hrs in or out of the Electrical and Computer Engineering Department
 - No more than 12 credit hours can be at the 4000 level
 - No more than 3 credit hours of independent study
- Of the above credit hours in formal coursework, no more than 12 can be 4000 level.

Electrical Engineering, Ph.D.

Degree Requirements

Ph.D. Degree Requirements:

Ph.D. Credit Allocation (all at 4000 level minimum)

- 72 hours (minimum) of acceptable graduate coursework
 - 42 hours (minimum) from ECE and closely related formal course work (EE5980 - Dissertation Research not counting toward this minimum)
- Of those 42 hours, no more than 12 hours can be at the 4000 level

Courses required by the department bachelor of science degree may not be applied for graduate credit

- 6 hours (maximum) of EE4800 - Problems in _____ can be counted for program of study credit
- 6 hours (maximum) of EE 5880 - Problems in ... can be counted for program of study credit
- 9 hours (maximum) of EE5600 - Statistical Signal Processing in: can be counted for program of study credit.

In addition to the minimum requirements of the university, doctoral students must pass a written and oral comprehensive examination, part of which is a written proposal explaining their planned dissertation research. The student after completing successfully the oral comprehensive examination and before defending the completed dissertation must present their research work at an ECE department seminar. The student must also present and defend a completed dissertation. Programs of study, including coursework and any research tools, are arranged by consultation between the students and their graduate committee.

Environmental Engineering, M.S.

Early in the program, the student must submit a program of study listing coursework for approval by the departmental graduate studies committee, the department head, and subsequently, the Office of the Registrar.

Core Courses (9 Hours)

All Environmental Engineering M.S. students must take the following Core courses (9 hrs):

- ENVE 5425 - Environmental Engineering Microbiology
- ENVE5430 - Environmental Engineering Chemistry Credits: 3
- CE5435 - Environmental Transport Processes Credits: 3

Recommended Courses (3 Hours)

Students should also take at least one of the following Recommended courses (3 hrs):

- ENVE5410 - Advanced Biological Wastewater Treatment Credits: 3

- ENVE5450 - Advanced Physical Chemical Treatment Credits: 3

Approved Elective Coursework

Plan A (Thesis) students complete another 14 hours of Approved Elective coursework, at least 4 hours of ENVE5960 - Thesis Research, and write and defend their thesis. Plan B (Project) students complete another 18 hours of Approved Elective coursework and write and present their project.

ME/MBA Joint Program

The MS-ME component is typically a non-thesis option. An additional 21 credits in engineering, science or mathematics must be earned beyond the BS degree. At least 15 credits of graduate course work must be from ME. The following MBA courses will be counted towards the MS-ME degree and constitute 9 credit hours of the 30 hours MBA - MS/ME program:

- One course from MBAM 5103, 5202, 5504, 5506, 5501, 5503, or 5508 (3 credits)
- MBAM 5301: Summer Project (3 credits)
- MBAM 5305: Capstone Course (3 credits)

For a thesis option, students will only count the first course from the above list and are required to complete 4 credits of ME 5960 (Thesis Research) and 2 credits for ME 5478 similar to the Plan A option.

MBA Courses

The following MBA courses will be counted towards the MS-ME degree and constitute 9 credit hours of the 30 hours MBA

Choose one of the following Courses:

- MBAM5103 - Business Research Methods Credits: 3
- MBAM5202 - Data and Decision Modeling Credits: 3
- MGT5504 - Energy Industry Value Chain Credits: 3
- MBAM5506 - Energy Finance: Securities, Hedging, and Trading Credits: 3
- MBAM5501 - Energy Economics and Policy Credits: 3
- MBAM5503 - Fundamentals of Accounting in the Energy Industry Credits: 3
- MBAM5508 - Marketing and Sustainable Consumption Credits: 3

Required Courses:

- MBAM5301 - MBA Summer Project Credits: 3
- MBAM5305 - Strategic Management Credits: 3

ME Courses

21 Credits in engineering, science or mathematics must be earned beyond the BS degree. At least 15 credits of graduate course work must be from ME

Thesis Option

For a thesis option, students will only count the first course from the above list and are required to complete 4 credits of ME 5960 and 2 credits for ME 5478 similar to the Plan A option.

Mechanical Engineering, M.S.

Graduate Study

The Department of Mechanical Engineering offers graduate study leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering. Faculty in Mechanical Engineering conduct research in the areas of aerodynamics, biomaterials, composite materials, computational material science, computational fluid dynamics, combustion, continuum mechanics, heat transfer, materials reliability, mechanical behavior of materials, nanomechanics of surfaces and interfaces, and wind energy.

Department Specific Admission Requirements

Applicants should possess a Bachelor of Science (B.S.) degree or equivalent in Mechanical Engineering with a minimum GPA of 3.000 on a 4.000 grade scale or equivalent. Students that do not hold B.S.M.E. degrees may qualify as M.S. candidates by completing, without credit, certain prerequisite courses as specified by the Department. These prerequisites would depend upon the candidate's background and upon the area in which he/ she plans to specialize.

In order to apply, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>): resume, copy of academic transcript, copy of GRE scores, copies of TOFEL (or IELTS) scores for international non-native English speaking applicants, three letters of reference, and a Statement of Purpose indicating the applicants' technical area of interest, abilities, and objectives in completing a graduate degree in mechanical engineering. If you are applying for the BS/MS program, please chose "QuickStart - Mechanical Engineering BS/MS" as the program (no GRE score and Statement of Purpose are needed for the BS/MS application). Applicants to the joint MBA/MS-ME program should chose the MS degree program for the application. To be considered for Assistantships, applications must be submitted before March 15 for the Fall semester or October 15 for the Spring semester.

A minimum composite score of 294 (MS) or 307 (PhD) on the Verbal and Quantitative sections of the GRE is typically required for full admission to the Mechanical Engineering Department. For international students, a minimum TOEFL score of 577 on the written exam or 90 on the Internet-based test (iBT) TOEFL (or a minimum IELTS score of 6.5). If an international applicant wishes to be considered for Graduate Teaching Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/study-iep-esl/grad-ta-support/index.html>) if you have questions regarding the English proficiency requirements. Admittance to the graduate program is competitive, and the average applicant that is accepted will likely have well above the minimum qualifications.

Program Specific Degree Requirements

Plan A (Thesis)

A thesis project is chosen in consultation with an ME faculty member, and constitutes 4 credit hours of ME 5960 of the 30-hour Plan A program. ME 5478 (Seminar) is to be taken during the final semester when the thesis is presented and defended, and constitutes 2 credit hours of the 30-hour Plan A program. Classes must meet the following constraints:

- ME courses (5000-level): minimum of 15 hours
- A maximum of 9 credits at the 4000 level outside of ME may be taken
- Thesis research (ME 5960): 4 credit hours
- Seminar (ME 5478): 2 credit hours
- Total: minimum of 30 hour

Plan B (Non-Thesis)

The Plan B M.S. degree can be completed by earning a minimum of 31 credits beyond the baccalaureate degree. Classes must meet the following constraints:

- ME courses (5000-level); minimum of 15 hours
- A maximum of 9 credits at the 4000 level outside of ME may be taken
- Graduate Project (ME 5961); minimum of 1 hour
- Total: minimum of 31 hours

Courses outside of ME must be chosen with the approval of the academic adviser. They can be in mathematics, statistics, science, or other engineering disciplines. Up to two courses may be from the fields of business, ENR, or public policy. Special topic credits may be earned using ME 5475 (maximum of 6 credits). Research credits earned through ME 5960 as part of an unfinished M.S. Plan A program may not be counted. Although the Plan B M.S. degree is not research-oriented, the program must contain an "element of discovery," documented by completing ME 5961 (Graduate Project). This could be a special project performed as independent study or as part of a graduate course.

Mechanical Engineering, Ph.D.

Doctoral Program

For students of outstanding academic ability and with demonstrated capacity for undertaking independent research on advanced engineering problems, the Ph.D. program in mechanical engineering is offered. The Ph.D. requires a minimum of 72 graduate hours, at least 42 of which must be earned in formal coursework. A minimum of 24 in-resident coursework hours is required. No graduate credit is allowed for 4000-level mechanical engineering courses and a maximum of 9 credits at the 4000-level outside of ME may be taken. A minimum of 15 credit hours must be taken from ME courses (5000-level).

In addition to coursework requirements, graduate students pursuing a Ph.D. in Mechanical Engineering must complete three examinations: Qualifying, Preliminary, and Final. In consultation with their advisor, students are allowed to take the Qualifying Exam after declaring pursuit of a Ph.D. degree. Graduate students do not require a M.S. to take the Qualifying Exam. The format is a knowledge-based examination consisting of three subject areas, each with both a written and an oral component. The candidate will be evaluated for each subject area, based on the cumulative performance in both (written and oral) components. Should the student fail a single subject area, at the discretion of the committee, they may repeat the failed portion at the next available opportunity. A third attempt is not permitted. The successful completion of the Qualifying Exam is required before the Preliminary Exam. The purpose of the Preliminary Exam is to evaluate the aptitude of the Ph.D. candidate to perform research based on preliminary results, and to assess the student's plan for completing the research necessary for the Final Exam. The Preliminary Exam follows university regulations and, at a minimum, consists of a seminar attended by the student's committee members. The purpose of the Final Exam is to ensure the Ph.D. candidate has sufficient accomplishments to be awarded a Ph.D. The Final Exam consists of an oral defense of the dissertation in accordance with university policy.

All graduate students in Mechanical Engineering are expected to follow the graduate education policies of the College of Engineering and Applied Sciences.

Petroleum Engineering, M.B.A./M.S.

Students With a B.S. in Petroleum Engineering

All Dual Degree M.S. from an accredited program must take the following required courses:

Required Courses

- PETE5355 - Mathematical Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Core Courses

At least three Core Courses from the following:

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3

Total Credits: 14 Hours

Plan A Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 3
- M.B.A. approved electives, Credits: 9
- MBAM5301 - MBA Summer Project Credits: 3
- MBAM5305 - Strategic Management Credits: 3
- PETE5960 - Thesis Research Credits: 1-12

Total Credits: 30 Hours

Plan B Non-Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 5
 - M.B.A. approved electives, MBAM 5XXX Credits: 9
 - MBAM5301 - MBA Summer Project Credits: 3
 - MBAM5305 - Strategic Management Credits: 3

 - PETE5100 - Independent Study Credits: 1-3
- OR**
- PETE 5970 Credits: 2

Total Credits: 30 Hours

Students With a B.S. In Chemical or Mechanical Engineering

All Dual Degree students with a B.S. in Chemical or Mechanical Engineering from an accredited program must take the following required courses:

Required Courses:

- PETE 5340 Credits:3
- PETE 5055 Credits: 3
- PETE5715 - Production Engineering Credits: 3
- PETE5355 - Mathematical Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

At Least Four Core Courses from The Following:

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3

Total Credits: 26 Hours

Plan A Thesis Additional Course Requirements:

- GEOL4190 - Petroleum Geology Credits: 3
- M.B.A. approved electives, MBAM 5XXX Credits: 9
- MBAM5301 - MBA Summer Project Credits: 3
- MBAM5305 - Strategic Management Credits: 3
- PETE5960 - Thesis Research Credits: 1-12

Total Credits: 42 Hours

Plan B Non-Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 2
- GEOL4190 - Petroleum Geology Credits: 3
- M.B.A. approved electives, MBAM 5XXX Credits: 9
- MBAM5301 - MBA Summer Project Credits: 3
- MBAM5305 - Strategic Management Credits: 3

- PETE5100 - Independent Study Credits: 1-3
- OR**
- PETE 5970 Credits: 2

Total Credits: 42 Hours

Note: For a student with a B.S. in another discipline, upon acceptance into the M.S. program, the Graduate Program Committee will develop a plan of study with the consent of the advisor.

Graduate Seminar Requirements

All petroleum engineering graduate students must enroll in PETE5890 - Petroleum Engineering Graduate Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester.

Graduate Teaching Requirement

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by a faculty mentor will work with their mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

Petroleum Engineering, M.S.

Petroleum M.S. Students With a B.S. In Petroleum Engineering

All Petroleum M.S. students with a B.S. in Petroleum Engineering from an accredited program must take the following required courses:

Required Courses

- PETE5355 - Mathematical Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Core Courses

At least three Core Courses from the following:

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3

Total Credits: 14 Hours

Plan A Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 12
- PETE5960 - Thesis Research Credits: 1-12

Total Credits: 30 Hours

Plan B Non-Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 14
- PETE5100 - Independent Study Credits: 1-3
- **OR**
- PETE 5970 Credits: 2

Total Credits: 30 Hours

Petroleum M.S. Students With a B.S. In Chemical or Mechanical Engineering

All Petroleum M.S. students with a B.S. in Chemical or Mechanical Engineering from an accredited program must take the following required courses:

Required Courses:

- PETE 5340 Credits: 3
- PETE 5055 Credits: 3
- PETE5715 - Production Engineering Credits: 3

Core Courses

At least four Core Courses from the following:

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3

Total Credits: 26 Hours

Plan A Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 7
- GEOL4190 - Petroleum Geology Credits: 3
- PETE5960 - Thesis Research Credits: 1-12

Total Credits: 40 Hours

Plan B Non-Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 9
- GEOL4190 - Petroleum Geology Credits: 3

- PETE5100 - Independent Study Credits: 1-3
- OR**
- PETE 5970 Credits: 2

Total Credits: 40 Hours

Graduate Seminar Requirements

All petroleum engineering graduate students must enroll in PETE5890 - Petroleum Engineering Graduate Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester.

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by a faculty mentor will work with their mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

Petroleum Engineering, Ph.D.

Students with a B.S. in Petroleum Engineering

All Petroleum Ph.D. students with a B.S. in Petroleum Engineering must take the following required courses:

Required Courses

- PETE5090 - Research Methods Credits: 3
- PETE5355 - Mathematical Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Core Courses

At least three Core Courses from the following:

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3

Electives

- 4000-level or above approved electives Credits: 21

Research

- PETE5980 - Dissertation Research Credits: 1-12

Total Credits: 72

Students with an M.S. in Petroleum Engineering

All Petroleum Ph.D. students with an M.S. in Petroleum Engineering from UW must take the following required courses:

Plan A MS Courses Credits: 26

See Petroleum Engineering, M.S. program

Required Courses

- PETE5090 - Research Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Electives

- 4000-level or above approved electives Credits: 9

Research

- PETE5980 - Dissertation Research Credits: 1-12

Total Credits: 72

Students with an M.S. in Petroleum Engineering

All Petroleum Ph.D. students with an M.S. in Petroleum Engineering from another institution must take the following required courses:

Transferred MS Courses Approved by Student's Committee Credits: 14

Required Courses

- PETE5090 - Research Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Core Courses

At least four Core Courses from the following:*

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3
- PETE5355 - Mathematical Methods Credits: 3

Electives

- 4000-level or above approved electives Credits: 9

Research

- PETE5980 - Dissertation Research Credits: 1-12

Total Credits: 72 Hours

*Some or all of these credit hours can be transferred by petition, provided they are non-degree credits.

Students with an M.S. Degree in a Geoscience

All Petroleum Ph.D. students with an M.S. degree in a geoscience from another accredited institution must take the following required courses:

Transferred MS Courses Approved by Student's Committee Credits: 12

Required Courses

- PETE5090 - Research Methods Credits: 3
- PETE5890 - Petroleum Engineering Graduate Seminar Credits: 1

Core Courses

At least six Core Courses from the following:*

- PETE5010 - Transport Phenomena Credits: 3
- PETE5020 - Thermodynamics Credits: 3
- PETE5060 - Flow through Porous Media Credits: 3
- PETE5080 - Interfacial Phenomena Credits: 3
- PETE5310 - Fundamentals of EOR Credits: 3
- PETE5350 - Advanced Reservoir Engineering Credits: 3
- PETE5355 - Mathematical Methods Credits: 3

At Least Eight Additional Courses:

- Six (6) credits in advanced mathematics
- 18 credits in petroleum engineering

Petroleum Engineering Credits Include:

- PETE 5340
- PETE 5055
- PETE5715 - Production Engineering Credits: 3

Electives

- 4000-level or above approved electives Credits: 9

Research

- PETE5980 - Dissertation Research Credits: 1-12

Total Credits: 100 Hours

*Some or all of these credit hours can be transferred by petition, provided they are non-degree credits.

Graduate Seminar Requirements

All petroleum engineering graduate students must enroll in PETE5890 - Petroleum Engineering Graduate Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester.

Graduate Teaching Requirement

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by a faculty mentor will work with their mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

Ph.D. Preliminary Examination

Candidacy in the doctorate occurs upon certification of successful completion of the preliminary examination. The preliminary examination will be held at least 15 weeks prior to the final examination. The preliminary examination may not be given before: (a) the research tool requirements, if any, have been met and certification approved; (b) at least 30 hours of coursework have been completed; and (c) the doctoral program of study has been approved.

The goal of the preliminary exam is for the student to present the research proposition that is being investigated and will lead to the final dissertation, and demonstrate progress to-date. The preliminary exam consists of three components:

- a written document provided to each member of the student's graduate committee at least three weeks prior to the oral presentation;
- a public oral presentation; and
- a private examination by the student's graduate committee immediately following the oral presentation.

The written document may be in any format but must concisely provide a survey of the relevant literature, a summary of the student's progress to-date, and a clear, detailed plan for the successful completion of the proposed work. The preliminary exam oral presentation should be consistent with the written document. It should provide an appropriate literature background, demonstrate proficiency with proposed experimental/computational techniques, identify details of the experiments to be performed, and provide a timeline to final defense.

The student's committee will pass or fail the student on the strength of the preliminary examination, with an option to conditionally pass the student while requiring an interim committee meeting prior to the final Ph.D. examination. The Report on Preliminary Examination for Admission to Candidacy form sent to the Office of the Registrar reports the results of the examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

Certificate

Cybersecurity Certificate

Cybersecurity is the practice of ensuring the confidentiality, integrity, and availability of information within interconnected systems. Cybersecurity requires extending the typical design and trade-off space to include protection and resiliency to combat malicious actors. Thinking like an adversary becomes a core competency of students in the program, and enables certificate graduates to approach the design and (re)development of systems from a more strategic security-centric mindset. The Cybersecurity Certificate guides students through foundational computer science and statistics concepts necessary for analyzing threat potentials and attack surfaces, building on those with competencies in critical system infrastructure through databases and networks, and further specialized them through two cybersecurity intensive courses.

Requirements

- COSC2030 - Computer Science II Credits: 4
- COSC4010 - Special Topics in Computer Science Credits: 1-3
- COSC4760 - Computer Networks Credits: 3
- COSC4765 - Computer Security Credits: 3
- COSC4820 - Database Systems Credits: 3
- STAT 2010 Credits: 4
- OR**
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- OR**
- STAT4220 - Basic Engineering Statistics Credits: 3

Minimum Required: 20 Credits

Note: COSC 4760 can also be replaced by the ECE version ECE 4870 or a second COSC4010 - Special Topics in Computer Science.

College of Health Sciences

235 Health Sciences Center

David Jones, Dean

Phone: (307)766-6556 FAX: (307)766-6608

Web site: www.uwyo.edu/hs

The College of Health Sciences is the place for students interested in improving and maintaining the physical, mental, and social health of others. We offer challenging degree programs in the "helping professions" and serve as the gateway to schools of medicine, dentistry, physical and occupational therapy, physician's assistant study, and optometry.

Health sciences students receive not only a superior education from knowledgeable and caring faculty but also precise and personal guidance from conscientious advising personnel. Students benefit, too, from practicums and internships that help them refine and test the skills acquired in lectures and labs as well as opportunities to participate in dynamic, interdisciplinary research projects.

The college is also the home of the Wyoming Institute for Disabilities (WIND); two Family Medicine Residency Centers; and the WWAMI Medical Education Program.

We serve as the state certifying office for the Wyoming, Washington, Alaska, Montana, and Idaho (WWAMI) medical education contract program with the University of Washington School of Medicine; WYDENT, the dental education contract program with the University of Nebraska and Creighton University; and two programs for the Western Interstate Commission of Higher Education (WICHE): the Professional Student Exchange Program (PSEP) and the Western Regional Graduate Program (WRGP). Refer to the sections on WWAMI, WYDENT, and WICHE in the first part of this catalog for program descriptions or go to www.uwyo.edu/certwy.

Any student seeking admission to programs in the College of Health Sciences will be required to obtain a background check as specified by college policy. Please contact your school or division for specific information.

The College of Health Sciences retains the right to deny or revoke admission to any of its programs for academic, disciplinary, ethical, or professional standards reasons.

Programs of Study

Undergraduate Degrees

Bachelor of Science

Kinesiology and Health Promotion
 Medical Laboratory Science
 Physical Education Teacher Education K-12
 Speech, Language and Hearing Sciences

Bachelor of Science in Dental Hygiene

Bachelor of Science in Nursing

Bachelor of Social Work

Graduate Degrees

Master of Science

Health Services Administration
Nursing
Kinesiology and Health
Speech-Language Pathology

Master of Social Work

Professional Degrees

Doctor of Nursing Practice
Doctor of Pharmacy

Minor in the College of Health Sciences

Disability Studies

Disability studies is a diverse interdisciplinary field that investigates broad questions about the nature, meanings, and consequences of disability from interrelated social, historical, cultural, and political perspectives. Students will gain a broad understanding of disability issues for working with people with disabilities rather than specific disciplinary skills and techniques. The minor complements any major and consists of 18 credit hours. See www.uwyo.edu/hs/divisions-and-programs/minor-indisability-studies.html.

Undergraduate and Pre-professional Health Advising Office

Health Sciences Center, 110

The Undergraduate and Pre-professional Health Advising Office (UPHAO) in the College of Health Sciences (www.uwyo.edu/preprof/) provides pre-professional health advising to all UW students regardless of their academic majors, who are interested in pursuing future study in athletic training, chiropractic, dentistry, medicine, optometry, occupational therapy, physical therapy, physician assistant, or other health care careers such as public health. A bachelor's degree is usually required for admission to a professional school. The University of Wyoming does not offer degrees in pre-professional areas. Students may pursue any UW degree program in which they have an interest and at the same time complete the admission requirements for the professional schools they wish to attend. The UPHAO advises students for their professional program prerequisites as well as other aspects of becoming solid candidates. Each student will also have an advisor in his/her major for advising in the major.

Through this office, pre-health students can access current information about admission requirements, entrance examinations, application process, professional school curriculums, interviewing skills, and test preparation. Current admissions data and addresses for specific schools are also available. Specific schools may have additional requirements; students are urged to check with the schools they wish to attend.

Information and Wyoming state residency applications for the WICHE PSEP program, the WWAMI medical education program, and the WYDENT dental education program, may be found online at <http://www.uwyo.edu/certwy>.

Please view individual division and program pages list for full course and curriculum listings

Major

Dental Hygiene, B.S.

The University of Wyoming and Sheridan College offer a cooperative program of dental hygiene education which, when completed, results in two degrees. An Associate of Applied Science degree in dental hygiene is awarded by Sheridan College following completion of the prerequisites and dental hygiene prescribed study. An optional Bachelor of Science in Dental Hygiene degree is awarded by the University of Wyoming following completion of the Associate of Applied Science in dental hygiene, the University Studies Program, and other requirements of the University of Wyoming, for a total of 120 credit hours including 42 upper level hours, 30 of which must be from the University of Wyoming. See www.uwyo.edu/hs/divisions-and-programs/dental-hygiene-program.html.

The American Dental Association has awarded full accreditation to the Associate of Applied Science degree in dental hygiene at Sheridan College. Graduates are eligible to take the National Board of Dental Hygiene exam, as well as regional and state exams for licensure, as registered dental hygienists.

Applicants should visit www.sheridan.edu/academics/programs-a-z/dental-hygiene for specific prerequisites and application materials. Applications are due to Sheridan College prior to February 15 of the year they wish to enter the program. Class sizes are limited. Admission is contingent upon successful completion of a background check.

Learning Outcomes

The primary objective of the program is to assure that graduates have knowledge and abilities necessary to successfully practice dental hygiene.

All prerequisite coursework must be completed with a cumulative grade point of 2.750 (on a 4.000 point scale). Courses in anatomy, physiology, and microbiology must be current within five years at the time of application to the Dental Hygiene professional program. Completion of the prerequisite courses does not guarantee admission to the professional program. Students must also complete a minimum of 20 hours of dental hygiene observation prior to application.

Requirements

See <http://www.uwyo.edu/hs/divisions-and-programs/dental-hygiene-program.html> for a four year plan and a list of program prerequisites.

- Program prerequisites,
- A.A.S. in Dental Hygiene from Sheridan College,
- Completion of all University of Wyoming requirements,
- STAT 2050 or STAT 2070, and
- At least 120 credit hours.

Students interested in the bachelor's degree in dental hygiene should contact the Undergraduate and Preprofessional Health Advising Office in the Health Sciences Center, room 110, or phone (307)766-3878. E-mail: hsadvise@uwyo.edu or visit <http://www.uwyo.edu/hs/divisions-and-programs/dental-hygiene-program.html>.

See the 4-year degree plan at: <http://www.uwyo.edu/acadaffairs/degree-plans/uw-4-year-plans/health-sciences/index.html>

Prerequisite courses for admission into the Dental Hygiene program at Sheridan College includes a cumulative GPA of 2.750 or better in the courses listed below. These may be taken at any institution, but if taken at the University of Wyoming, the course numbering will be as follows:

- MATH1400 - College Algebra Credits: 3
- LIFE1010 - General Biology Credits: 4
- ENGL1010 - College Composition and Rhetoric Credits: 3
- ENGL2005 - Writing in Technology and the Sciences Credits: 3
- COMM2010 - Public Speaking Credits: 3
- PSYC1000 - General Psychology Credits: 3

- ANTH1200 - Introduction to Cultural Anthropology Credits: 3
- FCSC1141 - Principles of Nutrition Credits: 3
- CHEM1000 - Introductory Chemistry Credits: 4

- MICR2021 - General Microbiology Credits: 4
- OR**
- MOLB2021 - General Microbiology Credits: 4

- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO3115 - Human Systems Physiology Credits: 4

Take the Following Courses:

In order to receive a BSDH through the University of Wyoming, students must also take the following courses:

Courses that will fulfill all of UW's University Studies requirements.

- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Required Courses

Required courses after admission to the Dental Hygiene program at Sheridan College (NWCC-D):

Sheridan College Courses

Sheridan College courses, taught ONLY at Sheridan College in Sheridan, WY.

- DHYG 2100 - Dental Health Education Credits: 3
- DHYG 2300 - Preclinical Dental Hygiene Credits: 3
- DHYG 2305 - Clinical Dental Technology Credits: 1
- DHYG 2405 - Dental Anatomy Credits: 2
- DHYG 2450 - Oral Radiology Credits: 3
- DHYG 2451 - Oral Radiology Lab Credits: 1
- DHYG 2470 - Orientation to Dental Hygiene Credits: 3
- DHYG 2200 - Pharmacology Credits: 2
- DHYG 2210 - Dental Embryology & Histology Credits: 2
- DHYG 2350 - Clinical Dental Hygiene I Credits: 3
- DHYG 2400 - Head, Neck, and Oral Anatomy & Physiology Credits: 2
- DHYG 2420 - Clinical Seminar I Credits: 2
- DHYG 2455 - Dental Materials Credits: 2
- DHYG 2456 - Dental Materials Lab Credits: 1

University of Wyoming Courses

University of Wyoming courses (details below), taught ONLY at Sheridan College in Sheridan, WY.

- DHYG3230 - Clinical Seminar II Credits: 2
- DHYG3300 - Clinical Dental Hygiene II Credits: 5

- DHYG3400 - General and Oral Pathology Credits: 3
- DHYG3600 - Ethics and Law in Dental Hygiene Credits: 2
- DHYG3750 - Periodontology Credits: 3
- DHYG3770 - Pain Management Credits: 2
- DHYG3775 - Pain Management Lab Credits: 1
- DHYG3250 - Clinical Seminar III Credits: 2
- DHYG3350 - Clinical Dental Hygiene III Credits: 5
- DHYG3550 - Community Dental Health Credits: 3
- DHYG3720 - Office Practice Credits: 2
- DHYG3800 - Board Review Credits: 1

Kinesiology and Health Promotion, B.S.

Students must complete 48 credit hours of upper division coursework (3000- or 4000-level courses) to meet the Division's minimum 48 credit hour requirement for the B.S. degree in Kinesiology and Health Promotion.

NOTE: Students should complete CPR & first aid certification and the certification should remain current throughout the program. Cards can be presented to the division registrar in Corbett 119 to be cleared of the requirement on the degree evaluation.

See the 4-year degree plan at: <http://www.uwyo.edu/acadaffairs/degree-plans/uw-4-year-plans/health-sciences/index.html>.

Requirements to be Completed

*(with a minimum cumulative GPA of 2.750 (preferred 3.000) before taking KIN 3021**

- MATH1400 - College Algebra Credits: 3
- OR**
- MATH1405 - Trigonometry Credits: 3
- OR**
- MATH1450 - Algebra and Trigonometry Credits: 5

- LIFE1010 - General Biology Credits: 4
- CHEM1000 - Introductory Chemistry Credits: 4
- OR**
- CHEM1020 - General Chemistry I Credits: 4
- PSYC1000 - General Psychology Credits: 3
- FCSC1141 - Principles of Nutrition Credits: 3
- HLED1006 - Personal Health Credits: 3
- KIN1006 - Introduction to Kinesiology and Health Credits: 1 **
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- PHYS1050 - Concepts of Physics Credits: 4
- OR**
- PHYS1110 - General Physics I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- ZOO3115 - Human Systems Physiology Credits: 4

Required and Elective Upper-Division KIN/HLED Courses

- HLED3020 - Community and Public Health Credits: 3
- KIN3021 - Physiology of Exercise Credits: 3
- KIN3022 - Lab Exp in Exercise Physiology Credits: 1
- KIN3010 - Fundamentals of Health and Fitness Assessment Credits: 3
- KIN3034 - Lifespan Motor Development Credits: 3
- OR**
- KIN4020 - Motor Behavior Credits: 3
- KIN3037 - Sport Psychology Credits: 3
- OR**
- KIN3038 - Exercise Psychology Credits: 3
- KIN3042 - Biomechanics of Human Movement Credits: 3
- KIN/HLED Elective coursework Credits: 15 in consultation with advisor. ***

- KIN4015 - Internship Experience in Kinesiology Credits: 1-12
- OR**
- HLED4015 - Internship Experience in Health Credits: 1-12
- OR**
- KIN4016 - Research Experience in Kinesiology and Health Credits: 1-6
- OR**
- HLED4016 - Research Experience in Kinesiology and Health Credits: 3-6 (culminating experience in the final year of study)

- Additional elective coursework credits: 25. This elective course work (including any additional upper-division electives) must be discussed with your academic advisor. The 25 credits listed here reflects the need for completion of 120 credits total, 48 of which must be upper-division, with 6 credits of KIN/HLED 4015/4016 taken.

Note(s):

* Completion of all USP requirements is also necessary.

** Note: KIN 1006 is not required for students who have completed the KIN1101 - First-Year Seminar.

*** Please consult with your academic advisor regarding these courses. Possible KIN/HLED electives can be found in the Kinesiology and Health Promotion Worksheet at this site: <http://www.uwyo.edu/kandh/undergraduate-studies/undergraduate-programs.html>

Medical Laboratory Science, B.S.

The program requires 129 credit hours total, with 60 credit hours obtained in the junior/senior years to graduate. Students must complete a minimum of 42 upper division hours, 30 of which must be earned from the University of Wyoming.

Requirements

Lower-Division Requirements

MLTK and PEAC courses are available through an articulation agreement with Casper College **and can be taken only through Casper College**. Students are responsible for fulfilling all University Studies requirements. The articulation agreement, with a proposed semester-by-semester sequence, is available at: http://www.uwyo.edu/acadaffairs/degree-plans/_files/2p2/cc_uw_medical-laboratory-science_bs.pdf.

- MATH1400 - College Algebra Credits: 3
- LIFE1010 - General Biology Credits: 4 (Casper College equivalent: BIOL 1010)
- MICR2021 - General Microbiology Credits: 4
- **OR**
- MOLB2021 - General Microbiology Credits: 4 (Casper College equivalent: MOLB 2210)
- CHEM1020 - General Chemistry I Credits: 4 (Casper College equivalent: CHEM 1025 & CHEM 1028)
- CHEM1030 - General Chemistry II Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- PEAC xxxx: Online Activity Credits: 1
- MLTK 1500 - Hematology Credits: 3
- MLTK 1600 - Clinical Immunohematology Credits: 3
- MLTK 1700 - Microscopy: UA Body Fluids Credits: 2
- MLTK 2600 - Clinical Microbiology I Credits: 2
- MLTK 2500 - Clinical Chemistry Credits: 3
- MLTK 2650 - Clinical Microbiology II Credits: 2
- MLTK 2700 - Immunology Credits: 4
- MLTK 2971 - Clinical Practicum: Hematology Credits: 2
- MLTK 2972 - Clinical Practicum: Chemistry Credits: 2
- MLTK 2973 - Clinical Practicum: Immunohematology Credits: 2
- MLTK 2974 - Clinical Practicum: Microbiology Credits: 2
- MLTK 2976 - Clinical Practicum: Serology Credits: 1
- MLTK 2977 - Clinical Practicum: UA / Body Fluids Credits: 1
- MLTK 2978 - MLT Professionalism Credits: 1
- MLTK 2800 - Clinical Pathophysiology Credits: 4
- MLTK 1800 - Principles of Phlebotomy Credits: 3

One of the Following 3-Credit Options:

- SOC1000 - Sociological Principles Credits: 3
- PSYC1000 - General Psychology Credits: 3
- ANTH1200 - Introduction to Cultural Anthropology Credits: 3 (USP-H)

Upper-Division Requirements

Upper-division courses required to complete the Bachelor of Science in Medical Laboratory Science (**All MLSK courses are only available through UW-Casper.**):

- LIFE3050 - Genetics Credits: 4
- LIFE3600 - Cell Biology Credits: 4
- MOLB3000 - Introduction to Molecular Biology Credits: 3
- MOLB3610 - Principles of Biochemistry Credits: 4
- Upper-division electives Credits: 7 (consult your academic advisor)
- MLSK4840 - Laboratory Education Methodology Credits: 1
- MLSK4850 - Clinical Research Design Credits: 2
- MLSK4860 - Laboratory Management Credits: 3 (USP-COM3)
- MLSK4870 - Advanced Clinical Chemistry Credits: 4
- MLSK4880 - Advanced Hematology: Erythrocytes Credits: 2

- MLSK4981 - Advanced Clinical Practicum Credits: 3
- MLSK4982 - Advanced Clinical Practicum Credits: 3
- MLSK4983 - Advanced Clinical Practicum Credits: 3
- MLSK4984 - Advanced Clinical Practicum- Microbiology Credits: 3
- MLSK4890 - Professional Career Paths and Review Credits: 2

Upper Division Elective Credit Hours

Seven upper division elective credit hours must be completed in the student's junior or senior year. These credits must be 3000 and above, and achieved through online outreach or on campus courses. A list of courses that are acceptable to fulfil this requirement can be made available to the student. If a course is in question, it is highly suggested to the student to contact the UW-C advising department or the MLS program director for requirement fulfillment confirmation.

Enrichment Rotations and Laboratory Sessions

The final semester of the student's senior year is comprised of didactic material being delivered in an online hybrid manner, supplemented with on campus lab sessions at the UW-Casper campus. These lab sessions will be accompanied by an observational enrichment rotation at a clinical site. This enrichment rotation will allow for the observation of advanced methodologies in a practical environment. It will be the students' responsibility for all travel and housing costs associated with the advanced clinical practicum courses.

Probation

Students who do not meet the minimum grade requirements stated above for MLSK course work will be placed on probation. In this period of time, students will be allowed to continue in the program under supervision, but will submit a petition which is an individualized plan of study for the next semester that is developed by the student in agreement with and signed by an academic advisor. All completed MLSK courses that fail to meet minimum grade requirements (C or 2.000 or better) must be repeated by the student. Students shall not be allowed to progress to the final semester until all courses in the previous semesters are successfully completed and a GPA of 2.000 is obtained.

Nursing, B.S.N., Basic BSN Option

The Basic BSN option is a four-year on-campus BSN program option for students who are interested in becoming a registered nurse. Second baccalaureate degree seeking students have the choice of pursuing Basic BSN or BRAND (*see information under that heading*).

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

- Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
- Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
- Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
- Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.

- Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
- Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
- Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
- Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
- Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
- Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
- Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Basic BSN has two different admission entries: 1) Freshman Admission to the Nursing major and 2) Non-Freshman Admission to the Nursing major. Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Freshman Admission or Non-Freshman Admission under Admission to Basic BSN*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for Basic BSN. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Basic BSN Student Handbook - section 6 Scholastic Requirements*).

Curriculum

The minimum requirement to graduate with a BSN is 120 semester hours of credit. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, ZOO3115 - Human Systems Physiology, PHCY3450 - Foundational Pathophysiology [4450], and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability.

Nursing courses are offered fall and spring semesters of the university academic calendar. Students are required to have transportation to all clinical sites. A number of clinical sites are located in Cheyenne. The capstone practicum experience during spring of the senior year requires students to live in locations away from campus.

Program of Study

A detailed, semester sequenced Basic BSN Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Basic BSN Program of Study*). All required courses identified under Pre-Clinical Component and Clinical Component must be passed with a C or better (or S) except for CHEM 1000, which requires a B or better. In addition, a minimum cumulative NGPA of 3.0 based on all required courses in the program must be maintained.

Applicable for: Freshman/Non-Freshman Admission to the Nursing Major

Pre-Clinical Component

- ENGL1010 - College Composition and Rhetoric Credits: 3
- MATH1400 - College Algebra Credits: 3
- LIFE1010 - General Biology Credits: 4
- CHEM1000 - Introductory Chemistry Credits: 4
- OR**
- CHEM1020 - General Chemistry I Credits: 4
- FCSC1141 - Principles of Nutrition Credits: 3
- PSYC1000 - General Psychology Credits: 3
- MICR2240 - Medical Microbiology Credits: 4
- OR**
- MOLB2240 - Medical Microbiology Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- ZOO3115 - Human Systems Physiology Credits: 4
- First-Year Seminar (FYS) course Credits: 3
- Communication 2 (COM2) course Credits: 3
- Human Culture (H) course Credits: 3 (*not PSYC 1000*)
- U.S. & Wyoming Constitutions (V) course Credits: 3

Clinical Component

(Note: Course requirements/expectations are subject to change. Maintain contact with FWWSON for current expectations.)

- NURS2340 - Developmental Influences on Health Credits: 3
- NURS3445 - Fundamentals and Health Assessment in Professional Nursing Practice Credits: 4
- NURS3490 - Health Promotion in Professional Nursing Practice Credits: 4
- NURS3665 - Foundations of Professional Nursing Roles Credits: 3
- NURS3690 - Professional Nursing Acute/Chronic Illness Credits: 3
- NURS3695 - Professional Nursing Acute/Chronic Illness Practicum Credits: 4
- NURS3890 - Professional Nursing Care in Complex Illness Credits: 3
- NURS3891 - Professional Nursing Care of Older Adults Credits: 3
- NURS3892 - Professional Nursing Care in Mental Health and Illness Credits: 3
- NURS3895 - Professional Nursing Care in Complex Illness Practicum Credits: 4
- NURS4125 - Evidence-Based Nursing Credits: 3 (COM3)
- NURS4665 - Healthcare Informatics in Professional Nursing Practice Credits: 3
- NURS4690 - Professional Nursing Care of Populations Credits: 4
- NURS4691 - Professional Nursing Care of Children and Families Credits: 3

- NURS4695 - Professional Nursing Care of Populations Practicum Credits: 4
- NURS4865 - Professional Nursing Leadership Credits: 3
- NURS4895 - Professional Nursing Capstone Practicum Credits: 9-12
With approval from FWWSON, ARMY 3050 may be applied to this requirement and NURS 4895 taken for 9 credits.
- PHCY3450 - Foundational Pathophysiology Credits: 4
- PHCY4470 - Fundamentals of Pharmacology Credits: 4

Nursing, B.S.N., BRAND Option

The BRAND (Bachelors Reach for Accelerated Nursing Degree) option is for students who have a previous non-nursing baccalaureate degree, and who are seeking an accelerated option for obtaining the BSN.

Nursing theory and supporting courses are offered using a combination of online courses and hybrid courses with periodic intensive on-campus experiences. Clinical coursework is arranged at a Wyoming healthcare institution. This option is a 'summer to summer' format with a full-time schedule of courses.

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

- Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
- Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
- Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
- Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
- Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
- Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
- Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
- Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
- Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
- Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
- Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Students who meet university requirements are admitted to the university in the pre-nursing component of BRAND (*declared PNR major*). The number of students admitted to BRAND is limited, and admission is a competitive process. Applicants meeting minimum requirements are not guaranteed admission.

Criteria for admission to BRAND as well as application instructions and deadlines can be found on the nursing website, www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, Admission Criteria/Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for BRAND. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, BRAND Student Handbook - section 6, Scholastic Requirements*).

Curriculum

The minimum requirement for the second bachelor's (SB) degree candidate to graduate with a BSN is 50 semester hours of credit. This curriculum option totals 56 credit hours.

The minimum requirement for an SB degree is 30 additional semester hours earned from UW, 12 of which must be in upper division level courses. If prior baccalaureate degree was earned through UW, the 30 credit minimum is in addition to the credits earned for previous degree. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450] and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability. PHCY 3450 and PHCY 4470 must be completed within three years **before** the May start date.

Program of Study

A detailed, semester sequenced BRAND Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, BRAND Program of Study*). All required courses identified under Prerequisite Courses and Nursing Courses must be passed with a C or better (or S).

Prerequisite Courses

- PSYC1000 - General Psychology Credits: 3
- FCSC1141 - Principles of Nutrition Credits: 3

- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

- MICR2021 - General Microbiology Credits: 4
- OR**
- MOLB2021 - General Microbiology Credits: 4
- OR**

- MICR2240 - Medical Microbiology Credits: 4
- OR
- MOLB2240 - Medical Microbiology Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- ZOO3115 - Human Systems Physiology Credits: 4
- PHCY3450 - Foundational Pathophysiology Credits: 4
- PHCY4470 - Fundamentals of Pharmacology Credits: 4

Required Graduation Course

- U.S. & WY Constitutions (V) course Credits: 3

Nursing Courses

(Note: Course requirements/expectations are subject to change. Maintain contact with FWWSON for current expectations.)

- NURS2340 - Developmental Influences on Health Credits: 3
- NURS3730 - Introduction to Professional Nursing Credits: 2
- NURS3745 - Nursing Fundamentals and Health Assessment Credits: 4
- NURS3770 - Nursing Care in Acute and Chronic Illness Credits: 8
- NURS3771 - Nursing Care in Acute and Chronic Illness Practicum Credits: 6
- NURS3780 - Evidence-Based Practice in Nursing Credits: 4
- NURS3790 - Health Promotion of Individuals, Families, and Populations Credits: 3
- NURS4710 - Population Health Credits: 4
- NURS4735 - Vulnerable Populations and Mental Health Credits: 3

Nursing, B.S.N., BSN Completion - ReNEW Option

The BSN Completion - ReNEW (Revolutionizing Nursing Education in Wyoming) option is Wyoming's shared BSN nursing curriculum. Students and graduates of Wyoming community college ReNEW nursing programs have a direct path into upper-division coursework in pursuit of a BSN from FWWSON. Entry into the ReNEW option begins at a participating Wyoming community college ADN nursing program.

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

- Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
- Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.

- Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
- Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
- Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
- Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
- Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
- Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
- Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
- Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
- Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Students who apply to UW and meet university requirements are admitted to the university in the pre-nursing component of ReNEW BSN (*declared PNRN*). Criteria for UW admission can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for BSN Completion. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW or RN-BSN, BSN Completion Student Handbook - section 6, Scholastic Requirements*).

Curriculum

The minimum UW requirement to graduate with a BSN in 120 semester hours of credit. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450], and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability.

Program of Study

A detailed Program of Study for ReNEW ADN Entry can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW, Program of Study for ReNEW ADN Entry*). All required courses identified under Related Coursework and Nursing Courses must be passed with a C or better (or S).

Nursing, D.N.P., Family Nurse Practitioner Concentration

The Family Nurse Practitioner (FMY) concentration prepares advanced practice nurses to provide primary health care to diverse individuals and their families in a variety of outpatient settings, especially rural settings. Graduates are prepared to diagnose and treat common acute problems, such as infections and injuries, and common chronic illnesses, such as diabetes and hypertension. Graduates work in a variety of settings including independent nurse practitioner practices, physician offices, public health clinics, indigent clinics, emergency rooms, Indian Health Services, correctional facilities, and migrant clinics.

Expected Student Learning Outcomes

Graduates will:

- engage in evidence-based practice to optimize health outcomes; and
- engage in leadership activities to promote excellence in rural health care.

Admission

The University of Wyoming must receive complete application materials for the DNP Program by the application deadline to be considered for fall admission (*the entire DNP application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/ fees. The number of students admitted is limited. Admission is a competitive process and applicants meeting minimum requirements are not guaranteed admission to the program. Admission to the university does not guarantee admission to the DNP program in the School of Nursing.

Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, Admission Criteria & Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for the DNP Program. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP Program Student Handbook - section 6 Scholastic Requirements*).

Curriculum

All DNP students, regardless of concentration will take a set of core courses. In addition to the core courses a group of specialty courses are required for each NP concentration. Students earning the DNP degree will complete a final scholarly project which is integrated into the FMY and PSH curricula.

The DNP core and clinical courses will be delivered using a combination of online courses; synchronous video web-conferencing, and hybrid courses with periodic intensive on-campus experiences. Clinical placements will be arranged at health care facilities in Wyoming, north central Colorado, or southern Montana.

Program of Study

A detailed, semester sequenced DNP-FMY Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP-FMY Program of Study*).

DNP Core Courses

- NURS5140 - Pharmacotherapy for Primary Care Credits: 4
- NURS5165 - Advanced Pathophysiology for Primary Care Practitioners I Credits: 2
- NURS5601 - Theoretical Foundations Advanced Practice Nursing Credits: 3
- NURS5602 - Advanced Nursing Leadership Credits: 3
- NURS5603 - Evidence-Based Practice for Advanced Nursing Credits: 3
- NURS5604 - Population and Health Policies Credits: 3
- NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice Credits: 3
- NURS5820 - Health Behavior Change I: Primary Prevention and Wellness Credits: 3
- NURS5824 - Advanced Health Assessment and Clinical Decision-Making for Nurse Practitioners Credits: 2
- NURS5830 - Health Behavior Change II: Behavioral Skills for Secondary and Tertiary Prevention Credits: 3
- NURS5865 - DNP Seminar Credits: 1
- NURS5866 - DNP Seminar II Credits: 1
- NURS5891 - DNP Project I Credits: 3
- NURS5892 - DNP Project II Credits: 3
- NURS5893 - DNP Project III Credits: 1
- NURS5894 - DNP Project IV Credits: 2

Family Nurse Practitioner Specialty Courses

- NURS5825 - Advanced Health Assessment and Clinical Decision-Making for Family Nurse Practitioners Credits: 4
- NURS5827 - Skills for Family NP Credits: 3
- NURS5871 - Wellness for Adults in Primary Care Credits: 3
- NURS5872 - Practicum for Wellness in Primary Care Credits: 3

- NURS5873 - Primary Care for Children, Adolescents, and Families Credits: 3
- NURS5874 - Practicum for Primary Care for Children, Adolescents, and Families Credits: 3
- NURS5875 - Primary Care for Acute & Chronically Ill Adults Credits: 3
- NURS5876 - Practicum for Primary Care for Acute & Chronically Ill Adults Credits: 3
- NURS5877 - Primary Care for Acute & Chronically Ill Adults II Credits: 3

Nursing, D.N.P., Psychiatric Mental Health Nurse Practitioner Concentration

The Psychiatric Mental Health Nurse Practitioner (PSH) concentration prepares advanced practice nurses to provide a full range of psychiatric care. Graduates are prepared to assess, diagnose, and manage, to include prescribing psychotropic medications, for people with chronic and acute psychiatric disorders. Graduates work in a variety of settings including inpatient and outpatient facilities such as hospitals; community-based or home care centers; local, state, and federal mental health agencies; long-term care facilities; private practices; substance abuse and detoxification programs; emergency psychiatric service centers; primary care offices; correctional facilities, home health agencies; and behavioral health care companies.

Expected Student Learning Outcomes

Graduates will:

- engage in evidence-based practice to optimize health outcomes;
- engage in leadership activities to promote excellence in rural health care.

Admission

The University of Wyoming must receive complete application materials for the DNP Program by the application deadline to be considered for fall admission (*the entire DNP application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/ fees. The number of students admitted is limited. Admission is a competitive process and applicants meeting minimum requirements are not guaranteed admission to the program. Admission to the university does not guarantee admission to the DNP program in the School of Nursing.

- NURS5894 - DNP Project IV Credits: 2

Psychiatric Mental Health Nurse Practitioner Specialty Courses

- NURS5826 - Advanced Health Assessment for Psych NPs Credits: 2
- NURS5828 - Skills for Psych NP Credits: 2
- NURS5862 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP I Credits: 5
- NURS5863 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP II Credits: 5
- NURS5864 - Final PSH Practicum Credits: 6
- NURS5880 - Neurobiology & Psychopharm Credits: 3
- NURS5881 - Psychotherapy Models and Theories for Advanced Practice Mental Health Nursing Credits: 3
- NURS5882 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Adult, Older Adult, and Vulnerable Populations Credits: 4
- NURS5883 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Child and Adolescent Credits: 4

Nursing, M.S., Nurse Educator/Nurse Leader Concentrations

The MS program is a part-time, online degree open to registered nurses with a minimum of a baccalaureate degree in nursing from a program nationally accredited by CCNE or NLNAC. The MS program has two concentrations: 1) Nurse Educator (NE) and 2) Nurse Leader (NL).

The MS program of study is for nurses who desire to become nurse educators or nurse leaders in any academic or health-related setting. The program mission is to prepare transformational learners and leaders to advance nursing education and practice, thus, addressing the complexities in the 21st century healthcare system. Core curricular concepts woven through the curriculum include transformation, communication, interconnected global perspective, outcomes orientation, and rural population health.

Expected Student Learning Outcomes

M.S. Graduate are prepared to ensure better care, better health, and lower costs through their knowledge, skills, and abilities to:

- Lead change for quality care outcomes; implement safe, quality care to diverse patients in a variety of settings and roles;
- Apply teaching/learning principles to the design, implementation, and evaluation of growth in individuals or groups in a variety of settings;
- Build and lead interprofessional care teams;
- Design innovative nursing practices;
- Translate evidence into practice;
- Promote a healthy work environment for sustainability of the work force.

Admission

The University of Wyoming must receive complete application materials for the MS Program by the application deadline to be considered for fall admission (*the entire MS application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/fees.

Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, Admission Criteria/Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for the MS Program. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, MS Program Student Handbook - section 6 Scholastic Requirements*).

Curriculum

All MS students, regardless of concentration will take a set of core courses. In addition to the core courses, a group of specialty courses are required for each MS concentration.

Program of Study

A detailed, semester sequenced MS Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, MS Program of Study*).

MS Core Courses

- NURS5472 - Integrated Advanced Pathophysiology, Pharmacology, and Assessment Credits: 3

- NURS5473 - Advancing Healthcare Transformation through Academic-Practice Partnerships Credits: 3
- NURS5483 - Practicum: Rural Healthcare Leadership Credits: 3
- NURS5601 - Theoretical Foundations Advanced Practice Nursing Credits: 3
- NURS5602 - Advanced Nursing Leadership Credits: 3
- NURS5603 - Evidence-Based Practice for Advanced Nursing Credits: 3
- NURS5604 - Population and Health Policies Credits: 3
- NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice Credits: 3

Nurse Educator Specialty Courses

- NURS5452 - Curriculum Development Credits: 3
- NURS5462 - Teaching Methodologies and Evaluation Credits: 3

Nurse Leader Specialty Courses

- NURS5420 - Leadership Within Health Care Systems Credits: 3
- NURS5461 - Business of Healthcare Credits: 3

Physical Education Teacher Education K-12, B.S.

Students must complete 48 credit hours of upper-division coursework (3000- or 4000-level courses) to meet the Division's requirement for the B.S. in Physical Education Teacher Education. For any elective coursework, it is recommended that these courses are selected from Sections III or IV below.

In order to advance into the professional program, students must be admitted through a competitive application process. The entry course for admission to the Physical Education Teacher Education (PHET) program is KIN 3012, Teaching Lab 1. To be eligible for the PHET professional program, students must have completed all program course prerequisites and have a minimum cumulative grade point average of 2.750, preferred GPA of 3.000.

NOTE: Students should complete CPR certification and the certification should remain current throughout the program. Cards can be presented to the division registrar in Corbett 119 to be cleared of the requirement on the degree evaluation.

See the 4-year degree plan at: <http://www.uwyo.edu/acadaffairs/degree-plans/uw-4-year-plans/health-sciences/index.html>.

Prerequisites for Admission

Prerequisites for Admission into the Physical Education Teacher Education Program: * Completion of all USP requirements is also necessary.

- MATH1400 - College Algebra Credits: 3
- MATH1405 - Trigonometry Credits: 3
- OR**
- MATH1450 - Algebra and Trigonometry Credits: 5
- LIFE1010 - General Biology Credits: 4
- CHEM1000 - Introductory Chemistry Credits: 4

- EDSE3540 - Teaching Reading and Study Strategies in the Content Areas Credits: 2-4

Required Courses After Admission

Required Courses After Admission into The Professional Program: ** See the degree plan for the order in which these courses must be taken. Consult with your academic advisor if you have any questions.

- KIN3011 - Teaching Methods in Physical Education K-12 Credits: 3
- KIN3012 - Teaching Laboratory I Credits: 3
- KIN3015 - Teaching Laboratory II Credits: 3
- KIN3021 - Physiology of Exercise Credits: 3
- KIN3022 - Lab Exp in Exercise Physiology Credits: 1
- KIN3034 - Lifespan Motor Development Credits: 3
- KIN3037 - Sport Psychology Credits: 3

OR

- KIN3038 - Exercise Psychology Credits: 3
- KIN3042 - Biomechanics of Human Movement Credits: 3
- KIN3050 - Prevention and Care of Athletic Injuries Credits: 2
- KIN3060 - Understanding Skill Acquisition for Teaching Credits: 3
- KIN4012 - Curriculum Development in Physical Education Credits: 3
- KIN4013 - School Administration for the Health Sciences Credits: 2
- KIN4017 - Teaching Laboratory III Credits: 3
- KIN4055 - Adapted Physical Education Credits: 2
- KIN4080 - Assessment in Physical Education Credits: 3
- KIN4099 - Student Teaching in Physical Education Credits: 1-16 ***

Note(s):

*** Note: Students must be certified in first aid and CPR prior to enrollment in KIN 4099.

Affiliated Options

The Division of Kinesiology and Health offers two options for the general undergraduate population. They require course work beyond degree requirements.

Athletic Coaching Endorsement/Permit

Students who wish to qualify for an athletic coaching permit to coach in Wyoming public schools must complete four courses. Note: Endorsements are for current teachers. Permits are for those who are not a licensed educator.

- CPR Certification
- KIN3050 - Prevention and Care of Athletic Injuries Credits: 2
- KIN4090 - Foundations of Coaching Credits: 3
- Coaching in... Experience (completed at a community college or complete a coaching experience in a specific sport for one season or more with a letter written by your supervising coach to submit with your PTSB endorsement application form)
- KIN5090 - Foundations of Coaching Credits: 3

School Health Education K-12

In addition to completing a bachelor's degree in teaching at the secondary level from an approved university program, 25 credit hours are required to be endorsed to teach health education K-12 in the public schools of Wyoming.

- FCSC1141 - Principles of Nutrition Credits: 3
- HLED1006 - Personal Health Credits: 3
- CPR Certification
- HLED4120 - Assessment in Health Credits: 3
- HLED4025 - Teaching Sensitive Issues In Human Sexuality Credits: 3
- HLED4110 - Teaching Health in Schools K-12 Credits: 3
- HLED4130 - Management of Coordinated School Health Programs Credits: 3
- PSYC2210 - Drugs and Behavior Credits: 3
- OR**
- HLED4030 - Teaching About Alcohol and Substance Abuse Credits: 3

Social Work, B.S.W.

Social work is a professional degree program. Prior to admission to the professional degree program, students who are working to complete program prerequisites and most University Studies courses are "Social Work-Pre-Admit" majors. Students must be accepted into the BSW program as an admitted "Social Work" major in order to proceed in the program and enroll in professional degree courses beginning in the fall semester (usually of the junior year). Application for Admitted Major status are due in the middle of the Spring semester or in the middle of the Fall semester. Students should apply during the semester they are completing all social work prerequisite courses. Acceptance to Admitted Major (professional degree program) is competitive and requires an application. Please see application requirements on the Division of Social Work website. Students accepted into the professional degree program are expected to complete their degree in a timely manner. Students who have not completed social work classes for one year or more must reapply for Admitted Major and submit a plan for readiness to continue in the social work degree program. A plan may include, but is not limited to, repeating or auditing a course taken at an earlier point in the student's academic experience, completing an independent study that may provide updated social work content for the student, demonstrating knowledge or practice skills. Readmission is not guaranteed.

Criteria for Admission as an Admitted Major

The admissions process is competitive. Students must meet the following minimum criteria to be considered for Admitted Major status.

- Students must earn a minimum grade point average (GPA) of 2.500 on all UW course work as well as all course work transferred into the University of Wyoming from other academic institutions.
- Complete the following prerequisites:
 - SOC 1000
 - PSYC 1000
 - POLS 1000
 - SOWK 2000
 - Human Biology (KIN 2040/ZOO 2040 or PSYC 2080)
 - STAT 2070
 - ECON 1010
- Students must earn a grade of C or higher in all SOWK prerequisite classes.
- Students must adhere to the UW Student Code of Conduct and the NASW Code of Ethics.
- Students cannot exhibit behavior that will impinge on the student's present or future ability to fulfill professional responsibilities as a social work professional.
- All students seeking admission to programs in the College of Health Sciences are required to undergo a background check as specified by college policy. Criminal convictions may result in rejection of the candidate for admission to Admitted Major.
- Students must submit an application and an application fee. (See UW Fee Book)
- Applicants to the social work program cannot receive credit for life experience.

Requirements for Admitted Majors

Once admitted, social work students must:

- Achieve a C or better in all social work courses, including six hours of required social work electives.
- Social work classes are offered and must be completed in sequential order.
- Maintain a 2.500 or above GPA overall every semester after admittance to Admitted Major.
- Maintain a 2.500 or above GPA overall in all social work course work every semester after admittance to Admitted Major.
- Registration is restricted and students must meet with their advisor each semester for enrollment.
- Complete SOWK 4990 with a satisfactory grade.
- Students must adhere to the UW Student Code of Conduct and the NASW Code of Ethics.

Individuals failing to meet any of the above requirements will be reviewed by faculty and one of the following actions may be taken: remediation, probation, sanction, and/or dismissal from the program. Because many social work courses have prerequisite requirements, receiving a grade lower than a C in a social work course may prevent the individual from moving forward in the social work program.

BSW Field Practicum

All students complete a 450-hour (10 credit hours) field practicum experience in a community-based social agency or social program. Field practicum sites exist throughout the state of Wyoming and students may be placed outside Laramie. Students apply for this program the semester before their actual placement. Students must complete a Field Placement Application and meet with the Field Coordinator prior to determining a practicum site (please review Field Practicum Manual). Background checks and drug screenings may be required by some agencies even though the College of Health Sciences has received a background check during admission to the major.

For the practicum, a grade of U is interpreted as performing below expectations and will not be considered satisfactory completion of the practicum, hence of the BSW program. Based on input from the student, the field instructor, and the faculty liaison during the field evaluation, the field coordinator will determine what remediation would be required. The plan will clarify course objectives and professional skills upon which the student needs to improve. A student wishing to continue in the program would need to reapply for a field placement. Upon the field committee's approval of the request for placement, the student may then repeat the practicum experience. Consistent with University policy, the most recent grade would be the grade calculated into

the GPA. The grade of U is interpreted as not meeting minimal requirements of the course; failure to complete the minimum clock hours in the field placement; failure to complete written assignments in a satisfactory manner; violation of one or more of the tenets of the NASW Code of Ethics (see Appendix B and Termination of Practicum section in the practicum manual); and/or failure to withdraw formally or to terminate the course. A student receiving an U in the practicum will be automatically dismissed from the BSW program with no opportunity to reapply or re-enter. Grades and dismissals may be appealed. (See most current BSW Student Handbook for appeal procedures.)

Requirements for Graduation

The program requires 120 credit hours to graduate. Students must have completed all social work requirements, 42 upper-division hours, maintain a 2.500 GPA overall, a 2.500 GPA in social work coursework, and have achieved a grade of C or better in all social work courses. Courses must be taken for a letter grade unless offered for S/U only. USP H and PN courses must be taken outside the major subject, but can be cross listed with the major.

BSW Curriculum

See the 4-year degree plan at: <http://www.uwyo.edu/acadaffairs/degree-plans/uw-4-year-plans/health-sciences/index.html>.

Prerequisites for admission into the BSW program includes a C or higher in the following courses:

- SOC1000 - Sociological Principles Credits: 3
- PSYC1000 - General Psychology Credits: 3
- POLS1000 - American and Wyoming Government Credits: 3
- SOWK2000 - Introduction to Social Work Credits: 3
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- ECON1010 - Principles of Macroeconomics Credits: 3
- Human Biology. Credits: 3. (KIN 2040: Human Anatomy or PSYC 2080: Biological Psychology)*
 *This requires a prerequisite general biology course, usually LIFE 1003: Current Issues in Biology.

Suggested Lower-Division Electives

Below are suggested lower-division electives that can be taken before admission into the BSW program. Consult with your academic advisor to determine the best electives for your particular interests or needs. It may be worthwhile to add a minor to your degree.

- SPAN1010 - First Year Spanish I Credits: 4 (USP-H)
- SPAN1020 - First Year Spanish II Credits: 4
- RELI1000 - Introduction to Religion Credits: 3
- WIND2100 - Introduction to Disability Studies Credits: 3
- SOC2350 - Race and Ethnic Relations Credits: 3

Suggested Upper-Division Electives:

(Consult with Your Advisor)

- FCSC3110 - Personal Finance Credits: 3
- FCSC4112 - Family Decision-Making and Resource Management Credits: 3

Required Courses After Admission into The BSW Program:

- SOWK3530 - Human Behavior and the Social Environment I Credits: 3
- SOWK3630 - Generalist Social Work Practice I, Individual and Families Credits: 3
- SOWK3645 - Ethical Social Work Practice Credits: 3
- SOWK4060 - Diversity and Difference in Social Work Practice Credits: 3
- SOWK3540 - Human Behavior and Social Environment II Credits: 3
- SOWK3640 - Generalist Social Work Practice II, Groups Credits: 3
- SOWK3650 - Generalist Social Work Practice III; Communities and Organizations Credits: 3
- SOWK4850 - Human Rights, Social Justice and Social Policy Credits: 3
- SOWK4560 - Social Work Research Credits: 3
- SOWK4990 - Social Work Practicum Credits: 5-10 (5 credits each semester of final year)
- SOWK4991 - BSW Field Seminar I Credits: 2
- SOWK4570 - Research-Informed Practice Credits: 3 (USP-COM3)
- SOWK4992 - BSW Field Seminar II Credits: 2
- Social Work electives Credits: 6 (selected with advisor consultation)

Speech, Language and Hearing Science, B.S.

Curriculum

See the 4-year degree plan at <http://www.uwyo.edu/acadaffairs/degree-plans/uw-4-year-plans/health-sciences/index.html>.

Lower-Division Requirements

*Completion of all USP requirements is also necessary.

- MATH1400 - College Algebra Credits: 3
MATH 1405, 1450, OR 2200; a Math ACT score of 23 or above; or an MPE score of 3 or above will also fulfill this requirement.
- LIFE1010 - General Biology Credits: 4
- PSYC1000 - General Psychology Credits: 3
- FCSC2121 - Child Development Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- PHYS1050 - Concepts of Physics Credits: 4 (May substitute CHEM 1000/CHEM 1020/CHEM 1050)
- STAT2050 - Fundamentals of Statistics Credits: 4
- Lower-division electives to be determined in consultation with academic advisor.
- SPPA1010 - Introduction to Communication Disorders Credits: 3
- SPPA2110 - American Sign Language I Credits: 4
- SPPA2120 - American Sign Language II Credits: 4
- SPPA2210 - Phonetics and Phonological Development Credits: 3

Upper-Division Requirements

- SPPA3160 - Speech and Language Development Credits: 4
- SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing Credits: 4
- SPPA4240 - Speech and Language Disorders Across the Lifespan Credits: 3
- SPPA4340 - Basic Audiology Credits: 3
- SPPA4150 - Aural Rehabilitation Credits: 3
- SPPA4250 - Clinical Methods Credits: 4

0520

- SPPA4380 - Neurological Basis of Communication Credits: 3
- Upper-Division Electives in consultation with advisor Credits: 12

Upper-Division Social Behavior Credits (choose one)

Choose one from the list below, in consultation with advisor (students responsible for knowing prerequisites for these courses).

- CNSL4520 - Fundamentals of Counseling (B) Credits: 3
- PSYC4310 - Developmental Psychopathology Credits: 3
- PSYC4320 - Intellectual Disability Credits: 3

Notes:

A grade of C or better must be earned in all SPPA courses; courses in the major must be taken for a letter grade unless offered for S/U only. Also note that speech, language, and hearing topic courses from community colleges do not transfer or count as course equivalents.

WWAMI Medical Education

First Year: Fall

- HM6603 - Clinical Studies Credits: 2
- HM6610 - Molecular and Cellular Basis of Disease Credits: 8
- HM6615 - Ecology of Health and Medicine Foundations I Credits: 1
- HM6620 - Invaders and Defenders Credits: 7
- HM6700 - Research Methods Credits: 2

Total Hrs. 20

First Year: Spring

- HM6602 - Introductory Primary and Continuity Care Clerkship Credits: 2
- HM6603 - Clinical Studies Credits: 2
- HM6625 - Ecology of Health and Medicine Foundations II Credits: 1
- HM6630 - Circulatory System Credits: 11
- HM6635 - Ecology of Health and Medicine Foundations III Credits: 1
- HM6640 - Blood and Cancer Credits: 3
- HM6650 - Energetic and Homeostasis Credits: 7

Total Hrs. 27

Second Year: Fall

- HM6602 - Introductory Primary and Continuity Care Clerkship Credits: 2
- HM6603 - Clinical Studies Credits: 2

- HM6645 - Ecology of Health and Medicine Foundations IV Credits: 1
- HM6800 - Mind, Brain, Behavior Credits: 9
- HM6900 - Life Cycles and Reproduction Credits: 5

Total Hrs. 19

Minor

Disability Studies Minor

Disability Studies Program Goals:

These goals are conceptualized as the ultimate "ends" we hope to achieve in educating students and trainees in disability studies.

- Promote full social integration by providing knowledge, awareness, and experience of inclusion and integration of people with disabilities as a foundational ethical principle of disability studies.
- Position disability as a social justice issue by exposing students to historical and contemporary disability issues and providing learning opportunities to identify, articulate, and address inequities and injustices affecting the lives of people with disabilities.
- Position disability as diversity by providing theoretical and practical contexts for thinking about disability as a component of human diversity, and providing students with tools to critically examine social and cultural constructions of disability.

Requirements:

All students in the minor are required to complete three WIND core courses, one WIND elective, and two additional electives related to disability issues. Electives should be selected in consultation with a disability studies faculty advisor.

Required Core Courses: 9 Credits

- WIND2100 - Introduction to Disability Studies Credits: 3
- WIND4020 - Disability Studies Theory and Practice Credits: 3
- WIND4500 - Practicum Credits: 3

WIND Elective:

3 credits selected from other WIND offerings

- WIND2700 - Gender and Disability Credits: 3
- WIND2500 - Topics in Credits: 1-3
- WIND3150 - Literature and Medicine Credits: 3
- WIND4050 - Independent Study Credits: 1-3
- WIND4100 - Global Disability Studies Credits: 3
- WIND4200 - Diverse Minds Credits: 3
- WIND4990 - Topics in Credits: 1-3

Additional Electives:

6 Credits Selected from WIND or Other UW Courses Related to Disability Studies

As an interdisciplinary field investigating disability as human diversity, this program complements majors across the university. For more information, visit the website: www.uwyo.edu/wind/disabilitystudies/index.html, contact faculty director, Michelle Jarman at mjarman@uwyo.edu or by phone at 766-5060, or visit the WIND office located in the Health Sciences Building, room 147.

18 Credit Hours Total

Graduate

Health Services Administration, M.S.

The School of Pharmacy offers a Master of Science online degree in health services administration. This degree is geared toward new and mid-career practitioners including pharmacists, nurses, physicians, social workers, and other health care professionals who want to become department directors, patient safety coordinators and/or directors, regulatory compliance officers, clinical research associates, health outcomes researchers or take on leadership roles as advanced practice practitioners.

The program also benefits health care workers in fields such as management positions, pharmaceutical sales representatives, medical science liaisons and pharmacy technician educators as well as new clinical faculty at newly established pharmacy colleges.

Available nationwide the master's program is delivered via a mix of online self-study and online project-based coursework.

The program can be completed in two years of part-time study. Students must travel to the UW Laramie campus for two weekend seminars during the two-year program (based on travel restrictions during the pandemic this was held online). Graduates will be expected to complete 30 credit hours of coursework and pass a comprehensive final exam. Coursework will be completed over five consecutive semesters however students can take up to 6 years to complete the program.

A prospective student should have earned at least a bachelor's degree from a regionally accredited institution. To find out more about the application process please see the following website www.uwyo.edu/pharmacy/online-ms-program or contact the Student Services Office.

MS-HSA Curriculum

Required Coursework for all tracks

PHCY 5040 The Evolution of American Health

PHCY 5041 Health Services Administration Research Methods

PHCY 5042 Statistics for Health Services

PHCY 5043 Empirical Analysis for Health Services Administration

PHCY 5045 Health Services Administration Applied Research

PHCY 5046 Health Services Administration Seminar1 (Initial)

PHCY 5046 Health Services Administration Seminar1 (Final)

Recommended courses for Biopharmaceutical Regulation & Compliance Group tracks

PHCY 5241 Introduction to Biopharmaceutical Regulatory Compliance

PHCY 5242 The Food and Drug Administration

PHCY 5243 The Drug Enforcement Administration

PHCY 5244 State Regulations of Health Professions

PHCY 5245 Medicare and Medicaid

Biopharmaceutical Regulation & Compliance students choose specific tracks which have required courses as well as additional credits from other tracks for electives.

- Specialty Tracks through the Biopharmaceutical Regulatory Compliance Group
- Biopharmaceutical Regulatory Compliance
- Healthcare Risk Management
- Forensic Pharmacy
- Healthcare Policy Analysis
- Biopharmaceutical Product Representation
- Clinical Research Administration
- Patient Safety Systems
- Healthcare Security Systems
- Healthcare Ethics & Equity

Recommended courses for Health Institution Leadership Group

PHCY 5441 Introduction to Health Leadership

PHCY 5442 Healthcare Financial Planning

PHCY 5443 Healthcare Human Capital Plan

PHCY 5444 Healthcare Strategic Innovation

Healthcare

Health Institution Leadership students choose specific tracks which have required courses as well as 9 additional credits from other tracks or electives.

- Specialty Tracks through the Health Institution Leadership Group
- Health Institution Leadership
- Health Economics & Outcomes
- Healthcare Quality & Improvement
- Rural Healthcare Coordination
- Geriatric Care Systems
- Healthcare Entrepreneurism
- Healthcare Financing
- Health Information Technology
- Healthcare Writing and Reporting

Optional electives for all programs

(Students can also choose to take a required course from a different track as an elective) Other courses as approved by advisor. Students can choose from other tracks or electives to maximize their interests and knowledge .A total of 30 credits are required for graduation

PHCY 5044 Preventing Fraud/Waste/Abuse

PHCY 5145 PBM Decisions

PHCY 5148 Health Economics and Policy

PHCY 5160 Graduate Problems Course

PHCY 5245 Medicare and Medicaid

PHCY 5246 Prescription Drug Costs

PHCY 5342 Healthcare Risk and Quality

PHCY Healthcare Information Systems

PHCY Biomedical Ethics

PHCY Epidemiology

Kinesiology and Health Distance Education, M.S.

Plan B (Paper)

General Information

Health and physical education teachers and health professionals are busy people. Health professionals typically work at their job during the day and then volunteer their time to work with community health care agencies/ groups in the evening and weekends. Teachers of health and physical education typically teach throughout the day and coach during the evenings and weekends. Therefore, traditional Master's degree programs that require students to attend the University of Wyoming in Laramie are often simply impossible for teachers and other health professionals to fit into their busy schedule.

The Division of Kinesiology and Health offers the Master of Science degree in Kinesiology and Health as an off-campus, distance education program. This means that you can complete the 30-credit hour course requirements for a Master of Science degree from the comfort of your community as you continue working in your current profession. All courses are delivered to your home via a combination of teleconferencing, pre-developed videotapes, and/or online. The distance education program is designed such that you can complete the Master of Science degree in a three, four, or five year period of time.

This program involves a minimum of thirty (30) credit hours of coursework and a culminating paper or case study presentation (experiential learning option) that is developed on a topic selected by the student in conjunction with her or his graduate faculty advisor. The process for composing the culminating paper or case study includes the development of a prospectus and final presentation of the paper or case study; students who elect the experiential learning option will also be required to complete three (3) credits of KIN 5990 (Internship). At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the nine (9) hours of general required courses.

General Required Courses (9 Credits)

¹ May substitute EDRE 5530

- KIN5080 - Investigations in Kinesiology and Health Credits: 1-3
- KIN5085 - Research Methods Credits: 3 ¹
- EDRE5600 - Educational Research I: Descriptive Research Credits: 3

OR

- EDRE5640 - Introduction to Qualitative Research Credits: 3

Kinesiology and Health Electives (15 Credits)

Elective Courses (6 Credits)

At least one elective course (3 hours) must be taken from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Independent Study, Practicum/Internship, and 4000 Level Coursework to M.S. Degree Program

- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 21 credit hours from the Division of Kinesiology and Health.
- Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900/KIN 5900) or KIN5990 - Internship may contribute to the 21 credit hours from the Division of Kinesiology and Health.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 21 credit hours from the Division of Kinesiology and Health.

Kinesiology and Health, Exercise and Sport Science Emphasis, M.S.

Plan A (Thesis)

The Plan A option of the Master of Science degree in the area of ESS is designed to prepare student for careers in one of the subdisciplines within ESS (e.g., biomechanics, exercise and sport psychology, motor learning and control, physical activity and lifespan development, physical activity and nutrition, physical activity and obesity, etc.). All students complete a series of general required courses and a concentration of courses in their specific ESS subdiscipline.

The ESS area of emphasis involves a minimum of thirty (30) credit hours of coursework, a thesis, and a final oral examination. At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, STAT 5080; or EDRE 5600 or EDRE 5640. Decision made in conjunction with advisor.

- KIN5085 - Research Methods Credits: 3
- KIN5960 - Thesis Research Credits: 1-12
- STAT5050 - Statistical Methods for the Biological Science Credits: 3 ¹

Specialized Required Courses (9-15 Credits)

Area of specialization will include three to five courses (9-15 hours) within the student's chosen ESS subdiscipline. Your advisor will identify courses to be taken specific to the selected area of emphasis.

Elective Courses (Minimum 6 Credits)

Students are encouraged to complete at least one of their elective course selections from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Independent Study, Practicum/Internship, and 4000 Level Coursework to M.S. Degree Program

- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (KIN 5900) or Internship (KIN 5990) may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 25 credit hours from the Division of Kinesiology and Health.

Kinesiology and Health, Health Emphasis, M.S.

Plan A (Thesis)

The Plan A option of the Master of Science degree in the area of HLED is designed to prepare student for careers in public and community health settings. All students complete a series of general required courses and a concentration of courses in the area of HLED.

The HLED area of emphasis involves a minimum of thirty (30) credit hours of coursework, a thesis, and a final oral examination. At least twenty-one (21) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070 or STAT 5080; or EDRE 5640 or EDRE 5660. Decision made in conjunction with advisor.

- KIN5085 - Research Methods Credits: 3
- KIN5960 - Thesis Research Credits: 1-12
- STAT5050 - Statistical Methods for the Biological Science Credits: 3 ¹

Specialized Required Courses (9-15 Credits)

Coursework will include three to five courses (9-15 hours). Your advisor will identify courses to be taken.

Elective Courses (Minimum 6 Credits)

Students are encouraged to complete at least one of their elective course selections from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Independent Study, Practicum, and 4000 Level Coursework to M.S. Degree Program

- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 21 credit hours from the Division of Kinesiology and Health.
- Practicum Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900) may contribute to the 21 credit hours from the Division of Kinesiology and Health.

- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 21 credit hours from the Division of Kinesiology and Health.

Kinesiology and Health, M.S.

Plan B (Paper and Experiential Learning Option)

The Plan B option of the Master of Science degree in Kinesiology and Health is designed to prepare students who are seeking a terminal degree. This option is not designed for students seeking to pursue a doctoral degree at the completion of the Master of Science degree in Kinesiology and Health.

This program involves a minimum of thirty (30) credit hours of coursework and a culminating paper or case study presentation (experiential learning option) that is developed on a topic selected by the student in conjunction with her or his graduate faculty advisor. The process for composing the culminating paper or case study includes the development of a prospectus and final presentation of the paper or case study; students who elect the experiential learning option will also be required to complete three (3) credits of KIN5990 - Internship. At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the nine (9) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, or STAT 5080; or EDRE 5600 or EDRE 5640. Decision made in conjunction with advisor.

- KIN5080 - Investigations in Kinesiology and Health Credits: 1-3
- KIN5085 - Research Methods Credits: 3
- STAT5050 - Statistical Methods for the Biological Science Credits: 3 ¹

Elective Kinesiology and Health Courses (Minimum of 15 Credits)

Elective Courses (Minimum of 6 Credits)

At least one elective course (3 hours) must be taken from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Independent Study, Practicum/Internship, and 4000 Level Coursework to M.S. Degree Program

- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900/KIN 5900) or KIN5990 - Internship may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 25 credit hours from the Division of Kinesiology and Health.

Kinesiology and Health, Physical Education Teacher Education Emphasis, M.S.

Plan A (Thesis)

The Plan A option of the Master of Science degree in the area of PETE is designed to prepare student for careers in the science and practice of teaching human movement. All students complete a core of general required courses and a concentration of courses in the area of PETE.

The PETE program of studies involves a minimum of thirty (30) credit hours of coursework, a thesis, and a final oral examination. At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, STAT 5080; or EDRE 5600 or EDRE 5640. Decision made in conjunction with advisor.

- KIN5085 - Research Methods Credits: 3
- KIN5960 - Thesis Research Credits: 1-12
- STAT5050 - Statistical Methods for the Biological Science Credits: 3 ¹

Specialized Required Courses

(12 Credits Selected from The Following KIN Courses)

- KIN 5012 - Curriculum Design in Physical Education Credits: 3
- KIN5013 - Spectrum of Teaching Styles Credits: 3
- KIN5014 - Teaching Tactics in Sport-Based Physical Education Credits: 3
- KIN5016 - Analysis and Supervision of Teaching in Physical and Health Education Credits: 3
- KIN5018 - Psychology of Teaching Physical Education Credits: 3
- KIN 5019 - Instructional Models for Physical Education Credits: 3

Elective Courses (Minimum 8 Credits)

Students are encouraged to complete at least one course from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Independent Study, Practicum/Internship, and 4000 Level Coursework to M.S. Degree Program

- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- Practicum/Internship Coursework: Maximum of 3-credit hours of KIN5900 - Practicum in College Teaching or KIN5990 - Internship may contribute to the 25 credit hours from the Division of Kinesiology and Health.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 25 credit hours from the Division of Kinesiology and Health.

Pharmacy, M.B.A./Pharm.D.

The School of Pharmacy offers a M.B.A./ Pharm.D. program. This dual degree program is geared toward students who have already obtained a Bachelor's degree. This multidisciplinary graduate program provides pharmacy students with a complementary business degree to start their own business or to advance into management positions during their careers. Students acquire

management and leadership decision-making skills that will allow them to excel in their chosen field of practice. A dual M.B.A./Pharm.D. degree allows a student to diversify their skill set and enhance their value to prospective employers.

The Doctor of Pharmacy/Master of Business Administration takes five years to complete - four years of Pharmacy studies and one year of M.B.A. core courses. Students spend their first year (Fall, Spring, and Summer semesters) in the M.B.A. program taking core courses and completing a summer experiential project (30 credits). The next four years will encompass the traditional Pharm.D. curriculum, including the M.B.A. Capstone course in Year 2. Students completing this program will earn a Doctor of Pharmacy degree and a Master of Business Administration degree.

Pharmacy, Pharm.D.

The School of Pharmacy offers only the four-year curriculum leading to the Doctor of Pharmacy (Pharm.D.) degree.

In order to keep abreast with changes in pharmaceutical education, the following curriculum is subject to change or modification as required by the accrediting agency. Students should be aware that changes must be expected and they will be included in their academic program. The School of Pharmacy does not plan to change graduation requirements inadvertently, but does reserve the right to change any provisions or requirement deemed necessary at any time within the student's term of residence. Students should note that classes are usually scheduled Monday through Friday, but may include some evening and weekend coursework. Required coursework including exams, experiential activities, presentations, etc. may take place outside the scheduled class period.

Required Curriculum

- ZOO4125 - Integrative Physiology Credits: 5
- PHCY6100 - Dose Form Design Credits: 4
- PHCY6106 - Pharmaceutical Calculations Credits: 2
- PHCY6110 - Medicinal and Natural Products Chemistry I Credits: 3
- PHCY6140 - Introduction to Social Administrative Pharmacy Credits: 2
- PHCY6160 - Pharmacist Skills I Credits: 1
- PHCY6102 - Biopharmaceutics and Pharmacokinetics Credits: 4
- PHCY6111 - Medicinal and Natural Products Chemistry II Credits: 3
- PHCY6120 - Advanced Pathophysiology Credits: 3
- PHCY6151 - Pharmacy Practice Credits: 2
- PHCY6152 - Therapeutics I Credits: 3
- PHCY6161 - Pharmacist Skills II Credits: 1
- PHCY6170 - Introductory Pharmacy Practice Experience-IPPE1 Credits: 1
- PHCY6480 - Introduction to Community Pharmacy Practice Credits: 4
- PHCY6482 - Introduction to Hospital Pharmacy Practice Credits: 4
- PHCY6215 - Medicinal and Natural Products Chemistry III Credits: 3
- PHCY6230 - Pharmacology I Credits: 4
- PHCY 6230 - Pharmacology I Discussion Credits: 0
- PHCY6240 - Research and Evaluation Methods in Pharmacy Credits: 3
- PHCY6245 - Patient/Professional Interactions Credits: 3
- PHCY6260 - Pharmacist Skills III Credits: 1
- PHCY6231 - Pharmacology II Credits: 4
- PHCY 6231 - Pharmacology II Discussion Credits: 0
- PHCY6246 - Pharmacy Management, Marketing and Finance Credits: 3
- PHCY6251 - Therapeutics II Credits: 3
- PHCY6261 - Pharmacist Skills IV Credits: 2
- PHCY6270 - Intermediate Pharmacy Practice Experience-IPPE2 Credits: 1
- PHCY6312 - Clinical Toxicology Credits: 3

- PHCY6341 - Pharmacy Practice Law Credits: 3
- PHCY6344 - Pharmacy Ethics Credits: 1
- PHCY6350 - Therapeutics III Credits: 4
- PHCY6357 - Clinical Pharmacokinetics Credits: 2
- PHCY6360 - Pharmacist Skills V Credits: 1
- PHCY6300 - Sterile Products Credits: 2
- PHCY6301 - Sterile Products Laboratory Credits: 1
- PHCY6340 - Health Care Policy and Advocacy Credits: 2
- PHCY6351 - Therapeutics IV Credits: 4
- PHCY6353 - Drug Literature Application Credits: 2
- PHCY6361 - Pharmacist Skills VI Credits: 2
- PHCY6370 - Advanced Pharmacy Practice Experience-IPPE3 Credits: 2
- PHCY6485 - Reflective Learning in Pharmacy Credits: 1
- PHCY6470 - Internal Medicine I Credits: 4
- PHCY6473 - Ambulatory Pharmaceutical Care Credits: 4 (Students complete a second semester of either Internal Medicine or Ambulatory Care)
- PHCY6471 - Internal Medicine II Credits: 4
- PHCY6474 - Ambulatory Pharmacy Care II Credits: 4
- PHCY6481 - Advanced Community Pharmacy Credits: 4
- PHCY6483 - Advanced Institutional Pharmacy Credits: 4
- PHCY6465 - Elective Rotation In: Credits: 4
- PHCY 6485 - Reflective Learning in Pharmacy Credits: 3
- Students complete 7 hours of electives during the P1-P3 year.

Total Hours 146

Fourth Year [PH4]:

Consists of nine experiential rotations of four credit hours each and three reflective learning weeks. Rotations are considered full-time. Students may not enroll in any other coursework concurrent with rotations. Consequently, all other coursework (107 credits) must be satisfactorily completed before enrollment in P4 coursework. Note: Students will be required to live in locations other than Laramie when enrolled in experiential rotations. Responsibility for living cost and travel arrangements associated with experimental rotations rests with the student. Students participating in all experimental activities will be required to have a vehicle or an acceptable approved alternative.

Students must complete the following Core or Required Experiential Rotations (subject to change):

- PHCY6470 - Internal Medicine I Credits: 4
- PHCY6473 - Ambulatory Pharmaceutical Care Credits: 4
- PHCY6471 - Internal Medicine II Credits: 4
- PHCY6474 - Ambulatory Pharmacy Care II Credits: 4
- PHCY6481 - Advanced Community Pharmacy Credits: 4
- PHCY6483 - Advanced Institutional Pharmacy Credits: 4
- Plus 4 Elective Rotations (PHCY 6465)

Social Work, M.S.W.

Requirements for the Standard MSW Program

- A baccalaureate degree from a nationally accredited college or university that reflects a broad liberal arts preparation. This consists of having completed at least 21 credit hours in social and behavioral sciences and 6 credit hours each in natural sciences, humanities, visual and performing arts, and quantitative reasoning;
- A human biology course (beyond introductory biology), receiving a grade of C or better;
- A statistics course, receiving a grade of C or better;
- An undergraduate cumulative grade point average (GPA) of 3.000 or above on a 4-point scale.

Requirements for the Advanced Standing MSW Program

- A bachelor's degree in Social Work from a Council on Social Work Education accredited social work program;
- An undergraduate social work GPA of 3.250 or above;
- An overall undergraduate GPA of 3.000 or above;
- Received a B or better and/or a Satisfactory grade in BSW Field Education Practicum.

*International students have special requirements for admission to UW. All are encouraged to contact the International Students and Scholars Office for details before applying.

All Applicants

All applicants will be evaluated on:

- Intellectual and personal qualities essential to the successful practice of social work, such as sensitivity and responsiveness in relationships, concern for the needs of others, adaptability, good judgment, creativity and integrity;
- Commitment to social justice and equality;
- Written and verbal communication skills;
- Professional references; and
- Compatibility of career goals with the MSW program's advanced generalist perspective.

All applicants meeting minimum criteria will be considered for admission. Admitted applicants will be required to complete a criminal background check through the College of Health Sciences.

Program Specific Degree Requirements

All incoming students enter the MSW program in the summer semester of their first year, completing introductory and/or bridge courses as needed for their specific program phase. The MSW program is divided into two levels: generalist and advanced generalist. The generalist year of the MSW program prepares students without a BSW degree for the advanced generalist curriculum in the second year. Students who have already obtained their BSW degree may apply for Advanced Generalist in the MSW program. These students complete only the second-year courses.

Master of Social Work Field Practicum

All students, regardless of status, participate in a field practicum experience, starting in their first fall semester. New students submit an initial application for placement during their first summer of classes.

Foundation students will complete 900 hours in practicum over the course of their two years of study, 400 and 500 hours respectively. Advanced Standing students will complete 500 hours in their one year of study. All students in practicum will take a corresponding field seminar class each semester.

Grading is done as Satisfactory/Unsatisfactory. Receiving a grade of U is considered a failing grade and can result in termination from the practicum. If the practicum is terminated, the student may be offered a remediation plan to retake the required hours. This opportunity is only offered one time. The student may also be referred to the DOSW faculty for review according to the Student Academic and Professional Performance policy.

Specific information and procedures relating to all aspects of the field practicum experience can be found in the Field Practicum Manual located on the Division of Social Work's website.

Master of Social Work Plan A - Thesis

- Students complete all SOWK required courses except SOWK 5755.
- Plan A students register for SOWK5960 - Thesis Research.
- Students registering for the Plan A option are required to carry out original research.
- Thesis proposal defense, thesis implementation, and final defense are required.

Plan A students may write a monograph fully detailing their research or a publishable peer-refereed journal article, determined in consultation with the student's Research Chair and in accordance with the UW Thesis requirements. The thesis requires a minimum of 4 credit hours, usually taken as 2 credits in the fall semester and 2 credits in the spring of advanced year.

Plan B - Practice Evaluation

Students complete all SOWK required courses except SOWK 5960. Plan B students register for SOWK 5755. Students registering for the Plan B option complete a professional portfolio during their advanced year in consultation with their chair.

A proposal defense and a final written paper with oral defense is required.

The SOWK 5755 portfolio project requires a minimum of 2 credit hours, usually taken as 1 credit in the fall semester and 1 credit in the spring of the advanced year.

Speech-Language Pathology, M.S.

The Master of Science in Speech-Language Pathology is a professional degree program. The graduate program consists of a minimum of 55 credit hours of academic coursework, on-campus clinical practica, and external clinical practica. Students may pursue either a thesis or non-thesis track during their graduate studies. Both tracks lead to eligibility for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), granted by the Council for Clinical Certification in Audiology and Speech-Language-Pathology (CFCC), which is a council serving the American Speech-Language Hearing Association. Graduates are also eligible for the Wyoming license in speech-language pathology. A supervised Clinical Fellowship Year (CFY) is required beyond the graduate degree for certification. The Master of Science (M.S.) education program in speech-language pathology at the University of Wyoming is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Typical Programs of Study

There are two programs of study for the MS SLP program. The Plan A is the thesis option (64-credit hour program), and Plan B is the non-thesis option (61-credit hour program). The Plan B (non-thesis) option requires 35 credits of graduate academic work and 26 credits of graduate clinical practicum; the Plan A (thesis) option requires 3 additional credits of thesis work.

35 Hours of Graduate Academic Work Usually Includes:

- SPPA5020 - Phonological Assessment and Intervention Credits: 3

- SPPA5140 - EBP and Evaluation Procedures in Communication Disorders Credits: 4
- SPPA5280 - Early Language Intervention Credits: 3
- SPPA5220 - Voice Disorders Credits: 3
- SPPA5130 - Adult Neurogenic Disorders Credits: 4
- SPPA5330 - School-Age Language Intervention Credits: 3
- SPPA5120 - Stuttering Credits: 2
- SPPA5110 - Craniofacial Disorders Credits: 2
- SPPA5230 - Dysphagia Credits: 3
- SPPA5100 - Motor Speech Disorders Credits: 2
- SPPA5210 - Augmentative and Alternative Communication Credits: 2
- SPPA5380 - Professional Practice Credits: 3

26 Hours of Graduate Clinical Practicum Include:

- SPPA5030 - Clinical Practicum Credits: 1-4
- SPPA5270 - Educational Practicum Credits: 1-12
- SPPA5290 - Medical Practicum Credits: 1-12
- Plan A students complete 4 credits of SPPA5960 - Thesis Research Credits: 1-12
- Plan B students complete 1 credit of SPPA5961 - Graduate Projects Credits: 1-4

Note:

Note: Specific degree requirements (course name and content), may change based on departmental decisions or requirement changes from accreditation and licensure bodies.

Certificate

American Sign Language Studies Certificate

The American Sign Language Studies (ASL Studies) certificate program provides a foundation of American Sign Language skills and an introduction to Deaf sociocultural issues. The ASL Studies certificate program also prepares future professionals in health and education fields to communicate with and understand individuals who are Deaf. The certificate will be an asset to students who wish to pursue more education and employment in the fields of speech-language pathology, sign language interpreter, deaf educator, preschool and K-12 education, audiology, nursing, counseling and other areas. Students can obtain the ASL Studies certificate alone, or in combination with a bachelor's degree for a major they have selected.

The ASL Studies program has three learning outcomes:

- ASL Studies students will demonstrate foundational skills in American Sign Language.
- ASL Studies students will understand sociocultural considerations with Deaf communities.
- ASL Studies students will engage in teaching others how to use basic American Sign Language.

ASL Studies Certificate Requirements:

Students must have earned a grade of A for all three language courses (SPPA 2110, SPPA 2120, and SPPA 4130) in order to be eligible for the certificate. ASL coursework needs to have been completed within the last 5 years in order to pursue the ASL Studies Certificate, exceptions can be granted if the student demonstrated adequate skills during a structured interview with a UW ASL instructor.

Course sequence for the certificate, 16 credits total:

- SPPA2110 - American Sign Language I Credits: 4
- SPPA2120 - American Sign Language II Credits: 4
- SPPA4070 - Deaf Studies Credits: 3
- SPPA4130 - Advanced ASL Credits: 4
- SPPA4140 - Undergraduate Teaching Assistant Credits: 1

Endorsement

Adapted Physical Education K-12 Endorsement

In addition to completing the Bachelor of Science degree in physical education teacher education from the University of Wyoming, students can qualify for K-12 endorsements in adapted physical education and/or health education by completing the following course requirements:

Course Requirements

- EDEX2484 - Introduction to Special Education Credits: 3
- KIN4065 - Resources in Adapted Physical Education Credits: 2-3
- KIN4075 - Assessment in Adapted Physical Education Credits: 3

Athletic Coaching Endorsement/Permit

Students who wish to qualify for an athletic coaching permit to coach in Wyoming public schools must complete four courses. Note: Endorsements are for current teachers. Permits are for those who are not a licensed educator.

Course Requirements

- CPR Certification
- KIN3050 - Prevention and Care of Athletic Injuries Credits: 2
- KIN4090 - Foundations of Coaching Credits: 3
- Coaching in... Experience (completed at a community college or complete a coaching experience in a specific sport for one season or more with a letter written by your supervising coach to submit with your PTSB endorsement application form)
- KIN5090 - Foundations of Coaching Credits: 3

School Health Education K-12 Endorsement (For non-Physical Education Teacher Education Majors)

In addition to completing a bachelor's degree in teaching at the secondary level from an approved university program, 25 credit hours are required to be endorsed to teach health education K-12 in the public schools of Wyoming.

Course Requirements

- FCSC1141 - Principles of Nutrition Credits: 3
- HLED1006 - Personal Health Credits: 3

- CPR Certification
- HLED4120 - Assessment in Health Credits: 3
- HLED4025 - Teaching Sensitive Issues In Human Sexuality Credits: 3
- HLED4110 - Teaching Health in Schools K-12 Credits: 3
- HLED4130 - Management of Coordinated School Health Programs Credits: 3
- PSYC2210 - Drugs and Behavior Credits: 3

OR

- HLED4030 - Teaching About Alcohol and Substance Abuse Credits: 3

Interdisciplinary Programs

Biomedical Sciences, Ph.D. Program

Office of Graduate Education

Old Main 310

Phone: (307) 766-4128

Website <http://www.uwyo.edu/biomedphd/>

Email: bms@uwyo.edu

Program Director: Sreejayan Nair, Ph.D.

Degree Offered

Ph.D. in Biomedical Sciences

Biomedical sciences is the study of human biological processes; the complex interactions between physiological, genetic and environmental factors that influence disease and health. It spans the spectrum from fundamental discovery to innovation and application.

Areas of focus may include but not limited to cardiac health, nutrition, reproductive biology, toxicology, diagnostic & imaging and medical engineering.

The PhD program in biomedical sciences is designed to position graduates for long-term competitive success in the rapidly changing and multifaceted health-related arena in the 21st century. It is a comprehensive, interdisciplinary program, making connections between various disciplines to gain new insights, discover and apply new knowledge, and promote self-directed, life-long learning.

Biomedical Sciences is a research & discovery focused program balancing depth and breadth of content knowledge with "enabling" skills including problem solving, innovation, entrepreneurship, communication and leadership.

Program Specific Admission Requirements

1. Minimum requirements. Applicants who do not meet the minimum requirements may be conditionally accepted at the discretion of the BMS Admission Committee. Please submit the application packet comprising the following documents for pre-admission screening:

a. Faculty sponsor. Contact potential biomedical sciences graduate program faculty sponsor in your area of interest prior to submitting an application. NOTE: a letter indicating the sponsorship by a faculty is strongly recommended as the program does not have sufficient number of graduate assistantships to support all students.

b. Official academic transcripts. Successful completion of a bachelor's degree from an accredited institution with one or more semesters of biology, physics, anatomy, physiology, chemistry, biochemistry/molecular biology, math are recommended. All applicants should have at least a 3.0 cumulative GPA (scale of 4.0). While a master's degree is not required for admissions into the biomedical sciences Ph.D. program, a master's degree with a strong background in the research area of focus is a plus.

c. TOEFL/IELTS/Duoling: The minimum acceptable scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries may be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/ cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency, until further notice.

d. GRE: A composite minimum score of 291 on the verbal and quantitative sections of the GRE is recommended. The GRE may be waived at the discretion of the admission committee if the applicant already possesses a master's degree, and/or documented research accomplishment in the chosen discipline.

e. Three letters of recommendation.

f. Statement of research interests and career objectives. A letter stating research & career interests and goals, prior research experience and outcomes, reasons for interest in BMS program. Include your contact information in the letter.

g. Current professional resume

2. Application Process. The BMS admissions committee reviews the completed application.

a. Contact faculty in your area of interest and obtain their endorsement. Faculty may choose to interview the candidate on-campus or via zoom.

b. Submit your application materials (pdf files of cover letter/statement of purpose, letter of sponsorship from the faculty, three letters of reference, transcripts, TOEFL/GRE scores to the admissions office via the University's admission portal.

c. To ensure full application review for fall semester admission, applications should be received by **February 15**.

d. Review by BMS Admissions Committee.

e. Forward application packet with BMS recommendation to the faculty and host department.

f. Notification of decision to applicant by **May 1**.

Program of Study

Rationale: The program of study is designed according to student learning goals and research opportunities. It blends depth and breadth of preparation by providing broad core requirements with electives promoting specialization in a "parent" discipline. This is recognized on program documentation by a Doctorate in Biomedical Sciences/"specialization" area. For example, Doctorate in Biomedical Sciences/Reproductive Biology.

Student Learning Outcomes: The BMS program provides unique array of formal courses and informal discovery experiences focused on ensuring aptitudes, behaviors, and skills necessary for leadership and competitive success in the biomedical science arena.

Although the foundation enabling innovative, independent thinking and knowledge discovery is deep discipline knowledge, the BMS program is also designed to promote student competency in information assessment, synthesis and integration, communication and translation to the broader community, teamwork, leadership, and project management.

The BMS program trains graduates to be competent, skilled experimentalists, problem solvers, critical and independent thinkers, expert in their field, with both depth and breadth of knowledge.

In addition, the program aims to instill characteristics that are essential to long-term professional success, preparing scientists who are effective and dedicated mentors and teachers, organized administrators, exemplars of high ethical standards, and effective collaborators.

Upon completion of the program, graduates will demonstrate:

- Independent, critical thinking skills
- Ability to identify appropriate biographical resources
- Knowledge of recent advances in discipline and related areas
- Understanding of a broad spectrum of research methodologies and their applications
- Ability to critically analyze research findings
- Ability to design and independently execute research
- Ability to use appropriate information technology to record, manage, and disseminate information
- Understanding of issues related to researcher and subject rights
- Motivation and aptitude needed to acquire knowledge
- Communication skills that are appropriate for a range of audiences and purposes
- Ability to construct and articulate arguments to a wide range of audiences
- Ability to effectively support the acquisition of knowledge by others when teaching or mentoring students
- Willingness to assume responsibility for their work
- Ability to design and teach undergraduate or graduate courses
- Ability to publish single/first authored papers in peer-reviewed journals.

Program in Ecology, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/pie/>
Email: ecology@uwyo.edu

Program Director: Melanie Murphy, Ph.D.

Degree Offered

Ph.D. in Ecology

The Program in Ecology prepares doctoral students to lead the discipline of ecology during the coming decades. The program is grounded in the natural history of organisms in their environment, but incorporates tools and perspectives from across the biological, physical, mathematical, computational, and earth sciences. Students develop conceptual, historical, and philosophical perspectives spanning the entire range of subdisciplines in ecology, while receiving advanced training in the subdiscipline of their individual interest.

The program fosters long-term career development by exploring the linkages of ecology with other disciplines, and by scanning the ecological horizon for emerging questions, concepts, and approaches that will shape the field in years to come.

Faculty members from 11 departments and 3 colleges participate in the Program in Ecology. Their interests span the full range of topics covered in the field of ecology, and students in the program reflect this diversity.

Program Specific Admission Requirements

The Program in Ecology (PiE) is an interdisciplinary graduate program leading to the Doctor of Philosophy degree in Ecology. Students and faculty from multiple departments and colleges at the University of Wyoming participate in the Program. Graduate students admitted to the Program will have a home department, which will typically be the home department of the respective committee chair or co-chair. Those interested in graduate study in this program, are encouraged to contact individual faculty members in the potential student's area of interest (http://www.uwyo.edu/pie/who_we_are/faculty.html) and the Program in Ecology (307-766-4128; ecology@uwyo.edu) for more information and guidance regarding applying.

In order to apply: 1) **Contact:** Identify a faculty advisor (all PiE students **must** be sponsored by a faculty advisor (http://www.uwyo.edu/pie/who_we_are/faculty.html)). These contacts are generally made in the fall the year before submission, but successful contacts may be made later. 2) **Admission to home department:** Apply to the University of Wyoming via the online application system (<http://www.uwyo.edu/admissions/apply.html>): letter of intent, CV, transcripts, and three letters of recommendation. For department, please select the department of the potential advisor. A minimum of three letters of recommendation are required and up to two additional letters may be submitted. A suggested deadline for application is January 31 to be considered for fall admission, but applications will be continued to be considered. A minimum of a 3.0 undergraduate cumulative GPA is required for admission or MS degree. International applicants, who are not native English-speakers, must submit TOEFL (recommended minimum 525) or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements. 3) **Admission to PiE:** Submit a letter of interest to the Program in Ecology (ecology@uwyo.edu), stating explicitly why you would wish to be considered for PiE and identifying the faculty advisor immediately after completing your online application. Admission to PiE requires admission is predicated on admission to home department. All applications to the Program will be reviewed by the Graduate Affairs Committee, which has authority on admissions. Students applying to the Program who lack a Master's degree must show exceptional promise and commitment (e.g., through undergraduate or post-graduate research experiences, peer-reviewed publications, and/or success in competing for research fellowships). Such students are encouraged to consult with their prospective advisor on whether to apply directly to PiE or to Master's programs in individual home departments of PiE faculty.

Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the Program. Students who wish to transfer into the Program from department-based doctoral programs must submit a formal application and must satisfy all the admission requirements specified above. Such application will consist of copies of all the application materials originally submitted to the program in which the student is currently enrolled, as well as a letter of recommendation from their prospective PiE advisor. In addition, they must submit a letter stating their reasons for seeking this transfer. All applications will be reviewed by the Graduate Affairs Committee. In addition, the following apply to transfer students:

- Students enrolled in departmental programs who have not yet taken their preliminary examinations may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules before they take their preliminary examinations, and (b) fulfill the curricular requirements.
- Students who have been admitted to departmental programs, and who have already taken their preliminary examinations, may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules within one month of admission to the Program, and (b) fulfill the curricular requirements. The student's Advisory Committee has the option of requiring a new preliminary examination.

Program Specific Degree Requirements

Advisory Committee

Before the end of the second semester of study, the student should nominate a (minimum) five-member advisory committee to the Office of the Registrar. At least three members of the committee, including the committee chair (usually the student's adviser), will be members of the PiE faculty. One other member, who will serve as Graduate Faculty representative, must be from outside the home department of the major adviser, although (s)he can be a faculty member in a department that participates in the program and/or a faculty member of PiE. The committee will advise the student on his/her program of graduate study, execute and evaluate the student's preliminary examination, evaluate the student's dissertation proposal and dissertation, and conduct the student's dissertation defense.

Program of Study

All students are required to take ECOL 5100 or equivalent. This course should be taken during the first year of residency. Exceptions or substitutions of these requirements are subject to approval by the graduate affairs committee.

The program of study must include at least 6 credit hours aimed at developing a tool skill, which except for rare cases shall be in the quantitative/analytical domain (e.g., statistics, modeling, GIS, remote sensing, bioinformatics). Courses relating to research tools should be taken early in the student's residency to ensure that they can be used in thesis research and advanced studies. Specific coursework and tool-skill development for the student's program of study will be developed in consultation with and subject to approval by the student's advisory committee.

Admission to Candidacy

Admission to candidacy for the Ph.D. requires two steps: 1) providing evidence that the student is prepared to identify a research question, design an approach for investigating that question, and a plan for executing the approach, all in the format of an NSF-style research proposal, and 2) illustrating adequate proficiency in the subject matter of ecology through a process involving both written and oral exams.

Proposal

Students must submit a NSF-style proposal to their committee outlining their project, typically by the end of the fourth semester. Each committee member will provide feedback to the student on the proposed research and indicate approval of the proposal or request revision. The proposal must be approved by all committee members prior to starting the preliminary exams.

While this proposal should be a plan for actual dissertation research, unforeseen circumstances may require altering the student's dissertation work after the proposal has been approved by the committee. In the case of a major alteration, the student should reformulate a research plan and submit it to the committee in writing for committee approval.

Preliminary Exam

Passing the preliminary exam is the official admission to candidacy.

Written Portion of the Preliminary Exam. The student will take the written exam portion of the preliminary exam no fewer than two weeks following approval of the research proposal. The goal of this exam is to test breadth of knowledge in ecology. The design of this exam will be coordinated by the graduate committee under the leadership of the adviser. Each written exam will cover the following topics:

Ecological topics ranging from organismal/evolutionary to ecosystem-level perspectives, integrating concepts and perspectives from across the discipline, over a wide range of spatial and temporal scales.

The philosophical and historical development of ecology.

The conceptual background of the student's area of specialization.

The exam will consist of four to six questions developed collectively by the committee and organized by the student's major professor. The exam will be open book; however, the answers will be solely the work of the student. Answers should be fully cited and collectively should be no longer than 30 pages double-spaced exclusive of references cited. Students will have one full week (seven days) to complete the exam. Committee members will indicate pass/fail within one week following completion of written exams. Four of five passing votes are required.

Oral Portion of the Preliminary Exam. No sooner than two weeks after successfully passing the written exam, the student may proceed to an oral exam administered by his/her graduate committee. Oral exams center around three goals from which questions will be derived:

To verify that the student is prepared, conceptually and methodologically, to carry out successful dissertation research.

To evaluate the student's ability to conceptualize specific questions in a broad, integrative context.

To evaluate the student's ability to think spontaneously and creatively and to articulate responses about unexpected or novel questions.

The advisory committee will discuss and organize specific questions based on these goals in a short session at the beginning of the exam period before admitting the student to the examination room and starting the exam. Following the exam each committee member will provide non-binding paper votes of pass/ fail for each of the three goals of the oral exam. Following discussion of the student's performance, committee members will each assign a grade of pass/fail for the overall exam. Four of five committee members must vote for passing the overall oral exam.

Students whose performance is unsatisfactory will be given one opportunity for retaking the oral examination. This retake will occur no later than the academic-year semester following the first examination.

Public Seminars

Students are required to give two oral presentations on their research. The purposes of these presentations are to provide the student with practice in oral presentations and to keep the PiE community informed of the student's progress. The first will describe the student's dissertation research proposal. This presentation will be given before the student submits his/her thesis proposal. The second presentation will summarize the student's completed dissertation research, and will normally be given the same semester as the student's dissertation defense. Under extraordinary circumstances (subject to approval by the Graduate Affairs Committee), this presentation may be given at an earlier time. These presentations must be open to the public, and may comprise part of a departmental or Program in Ecology seminar or brown-bag series.

Hydrologic Sciences (WRESE), Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/wrese>
E-mail: wrese@uwyo.edu

Program Director: Scott N. Miller, Ph.D.

Degree Offered

Ph.D. in Hydrologic Sciences

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D. level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

The WRESE Program grants a PhD in Hydrological Sciences.

Program Specific Admission Requirements

The WRESE Program only admits students seeking a doctoral degree.

Minimum criteria for admission to the Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under exceptional circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the program.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

The written exam will consist of a series of questions as decided upon by the committee and should take no more than two weeks to complete.

Each committee member shall grade their portion of the exam as pass/fail. The student shall be viewed as passing the written exam if no more than one person grades their portion of the exam as failing.

The oral examination will be held no sooner than two weeks after the written exams, and only after the student has passed their written examinations. The oral exam should be no less than 90 minutes long and no longer than 3 hours.

Following the exam, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Dissertation

The student will prepare a dissertation and make the document available to the committee at least two weeks in advance of an oral defense of the document. The oral defense must be at least 15 weeks after the student has been advanced to candidacy. Students shall present a public defense to the university community that is expected to be approximately 45 minutes long, with a public question-and-answer period after the presentation. If the committee determines that the student has presented a suitable oral presentation of his/her research findings, a closed session meeting will be held in which the student defends their research to the committee. At the conclusion of the defense, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Other information:

Students in the WRESE Program may participate from any college, with the expectation that their program of study and dissertation will focus on quantitative issues of hydrology and water resources. The Program welcomes academic diversity, and students in WRESE have entered into the Program from a wide range of academic backgrounds and have hailed from numerous home departments, including Ecosystem Science and Management, Civil and Architectural Engineering, Botany, Zoology and Physiology, and Geology and Geophysics.

Molecular and Cellular Life Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/mcls/>
Email: mcls@uwyo.edu

Program Director: Daniel Levy, Ph.D.

Degree Offered

Ph.D. in Molecular and Cellular Life Sciences

This interdisciplinary program with more than 30 faculty participants spans a wide range of research topics, such as:

Biotechnology-bioengineering, biomaterials, pharmacology, cell biology and signaling, genetics and development, genomics, proteomics, computational biology, microbiology and infectious disease, structural biology, and biophysics.

Coursework focuses on core courses in biochemistry and molecular biology, with electives that include such diverse courses as:

Topics in Genomics, Biophysics, Microbial Physiology and Metabolism, Cell and Developmental Genetics, Mass Spectrometry and Analytical Chemistry, Biomedical Engineering, Mammalian Endocrinology, Cell Culture and Virology, Introduction to Bioinformatics, Protein Structure and Function, Microbial Genetics, Computational Biology, and Quantitative Microscopy.

Program Specific Admission Requirements

1. Applicants should apply through the online graduate application link. This process requires uploading a statement of purpose, a CV, academic transcripts, and test scores. The statement of purpose should include a brief narrative that describes the applicant's motivation to pursue graduate studies in the life sciences, relevant experiences, and specific reasons for applying to the MCLS program at the University of Wyoming. The program does not adhere to strict test score minimums, however, for international applicants minimum suggested scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS, respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries will be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency until further notice. More information for international applicants can be found on the University of Wyoming graduate admissions website. The application also requests that three reference letters be submitted in support of the candidate's application. Completed applications are due on January 1.

2. The MCLS admissions committee reviews completed applications starting in early January of each application cycle. Promising applications are selected based on research experience, grades, test scores, and reference letters. The most compelling statements of purpose convincingly describe why the applicant is interested in pursuing graduate studies in the life sciences, detailing relevant past research experience and how it has prepared the student for PhD studies. Reference letters that include specific details and anecdotes about the applicant are most useful. The committee generally looks for grades of B or better in life science and chemistry courses, although lower grades can be balanced by a sufficiently strong research background. Successful applicants will be notified of admission decisions by May 1 at the latest, although the majority of decisions will be made by March 15.

3. Following the initial reviews, selected applicants are invited for a Zoom interview. Applicants will be provided with a primary research paper that they should read in preparation for the interview.

4. Zoom interviews are conducted with at least two members of the admissions committee. Applicants are asked a variety of questions, including why they are interested in the MCLS program, how their previous research experience has prepared them for PhD studies, their perceived strengths and weaknesses as a scientist, and future career goals. The interviewers also ask questions about the research paper and more general molecular biology questions to determine if the applicants have a sufficiently strong background to succeed in the MCLS program.

5. Shortly after the interview sessions, the MCLS admissions committee discusses the results of the Zoom interviews and ranks applicants for offers of admission, conditional upon approval by the Office of Admissions.

Program Specific Degree Requirements

MCLS doctoral students must fulfill the minimum requirements outlined by the university. In addition, students must obtain a high level of proficiency in the core foundations of the molecular and cellular life sciences through required courses in biochemistry/ molecular biology, scientific literature analysis proficiency, and the MCLS cornerstone course. Because of the broad range of research interests pursued by MCLS faculty and students, considerable flexibility will be exercised regarding the specific nature of the graduate level elective courses that students may take. Students must successfully complete four eight-week rotations in MCLS laboratories of their choice during the first year. Additionally, students must pass a comprehensive assessment exam at the end of the first year. Near the end of their second year in the program, students will undertake a qualifying examination in order to be formally admitted to graduate degree candidacy. This exam will have both written and oral

components and will cover areas of science that are relevant to the students' proposed research. Annual meetings with a research-specific dissertation committee will facilitate and evaluate the research progress of MCLS students beginning in the second year. Students must also attend weekly outside seminars on topics in the molecular life sciences for the durations of their studies. For more information, please see the program's Website at: <http://www.uwyo.edu/MCLS/>.

Neuroscience, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/neuroscience/>
Email: neuroscience@uwyo.edu

Program Director: Kara Pratt, Ph.D. Degree Offered

Ph.D. in Neuroscience

The Graduate Neuroscience Program offers training leading to the Ph.D. degree in Neuroscience. The Neuroscience Program emphasizes systems and integrative approaches, and our goal is to provide the students with the necessary background to be broadly trained research neuroscientists and to carry out independent research in neuroscience. The Neuroscience Program emphasizes continuing interaction with faculty from several departments and we have a low student to faculty ratio. Advisors spend considerable time supervising and training each doctoral student. The educational philosophy of the Neuroscience Program is to encourage a problem-oriented rather than a strict discipline-bound approach to research. You will emerge from this program with the scientific and experimental training needed to comprehensively address a very wide range of research questions using a variety of techniques and analytic tools.

The Graduate Neuroscience Program is designed to enable graduate students to acquire competence in the various disciplines necessary for research and teaching careers in neuroscience. The current interests of the Neuroscience faculty include sensory neurophysiology, behavioral neuropharmacology, neurodevelopment, neurodegeneration, and synaptic plasticity.

Students and faculty have access to outstanding resources established by NIH Neuroscience and Sensory Biology Core grants. The Microscopy Core houses both light (Zeiss laser scanning, fluorescent) and electron (Transmission and Scanning) microscopes. Resources needed to conduct research ranging from molecular, cellular circuit level to behavior are readily available within the Neuroscience Center.

Program Specific Admission Requirements

Steps for applying to the Program in Neuroscience:

Step 1: Contact faculty whose research is of interest.

Although not mandatory, applicants are encouraged to read through the faculty research summaries to identify faculty that they are interested in training with. It is strongly recommended that prospective students contact individual faculty for more information regarding their research programs and openings in their laboratories before submitting an application. This initial step is recommended because, due to the limited availability of Graduate Assistantships (GA's), graduate students are oftentimes recruited directly into a laboratory and supported straight away by the advisor's NIH or NSF funding.

Step 2: Submit the online application packet via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>).

For full consideration for fall and spring admissions, applications should be submitted by January 1 and June 30, respectively. The application packet is comprised of the following items:

- **Application form**
- **Official academic transcripts:** Applicants should have at least a 3.0 cumulative GPA (scale of 4.0), and a bachelor's degree in a discipline that is related to neuroscience such as biology, psychology, physiology, chemistry, physics, or chemical or bioengineering. We encourage motivated applicants from degrees in diverse areas that are interested in transitioning to neuroscience. Students with an MS degree in neuroscience or related fields are also encouraged to apply.
- **GRE scores:** Accepted but not required
- **Three letters of recommendation**
- **TOEFL/IELTS:** For international students whose native language is not English. The minimum acceptable scores are 550 (79 iBT) and 6.5 for TOEFL and IELTS, respectively. (The University of Wyoming's school code for TOEFL = 4855.)
- **Personal statement:** A 1-3 page personal statement describing the student's motivation for pursuing a PhD in the field of neuroscience. Please describe areas of interest and any specific research topics or techniques with which you have experience. If your interests are still broad, indicate your general interests and graduate training goals.
- We are also interested in learning about your long-term career goals. What do you aspire to do after graduation? What are you specifically interested in the University of Wyoming? Finally, if you have established a potential faculty advisor (step 1), this should be clearly stated here in the personal statement.

Step 3: The interview

The graduate advisory committee reviews submitted application packets. Only complete packets are reviewed. Applicants deemed strong by the committee will be invited to participate in either an in-person or virtual (via zoom or phone) interview. The interview allows for the committee to learn more about the applicant, and, likewise, for the applicant to interview the committee.

Step 4: Verification of admittance by UW Admissions Office. Applicants that are chosen for admission to the Program in Neuroscience will then be requested to complete the application process through the University of Wyoming Admissions Department. Eligibility for enrollment will be verified by the UW Admissions Office, including the receipt of official transcripts and documents.

Program Specific Degree Requirements

Doctoral Program

All doctoral Neuroscience students are required to complete a program of core classwork that includes the following required courses: Introduction to Neuroscience, Structure and Function of the Nervous System and Neurophysiology. Students are required to take one course in Statistics (e.g. STAT 5050, STAT 5210) and the course that meets this requirement will be arranged with the student's committee. The Neuroscience Program is a research-oriented program and students are expected to take a minimum of 2 to 3 credit hours of research per semester. Students are also expected to enroll in an on-going Seminar in Neuroscience. The Neuroscience Seminar, which meets weekly and is attended by students and faculty members, provides an opportunity for intellectual and social exchange, as well as for the development of professional skills in critical thinking. The topic for seminar and the faculty member directing the seminar changes each semester. The remainder of the coursework for the doctor of philosophy degree is selected from designated courses in Neuroscience, physiology, pharmacology, and molecular biology. A grade of B or better is required for all Neuroscience courses.

A student is expected to have a graduate adviser at all times. The faculty adviser must be a participating member of the Neuroscience faculty. The adviser is responsible for directing the student's research and academic coursework. During the second year, the student will have an advisory committee. The advisory committee will consist of at least three neuroscience faculty members and an outside member. Normally, the student's adviser will chair the committee and help identify members of the committee who best match the student's area of interest. The role of the advisory committee is to oversee all aspects of the student's education after the first year.

Students give two public research presentations 6-12 months before the preliminary and final defense exams. In the student's second or third year, the advisory committee will set and evaluate the student's qualifying examination. After successful completion of the preliminary examination the student will profess to Ph.D. candidate status.

The dissertation is the single most important component of the graduate program. It reports the results and significance of the student's research. In addition to the written dissertation, the doctoral candidate will deliver a formal seminar based on their research. The seminar will be followed by an examination by the student's advisory committee.

Science and Mathematics Teaching Center Master's Degrees

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/smtc/>
Email: smtc@uwyo.edu

Program Director: Sylvia Parker

The Science and Mathematics Teaching Center (SMTC) was established in 1970 and is committed to excellence in science, mathematics, technology and STEM education. As part of the Office of Graduate Education in Academic Affairs, the SMTC, in cooperation with the Wyoming Department of Education (WDE) and the Professional Teaching Standards Board (PTSB), serves as a resource and professional development center for the state. The SMTC offers transdisciplinary graduate degree programs with multiple degree concentrations, certification options, and endorsement options. All of the programs emphasize both strong content knowledge and instructional practices. The affiliate faculty for the SMTC includes faculty from the Colleges of Agriculture and Natural Resources, Arts and Science, Education, and Engineering and Applied Science, and the Haub School of Environment and Natural Sciences.

The SMTC provides extensive off-campus professional development that serves teachers, students, administrators, school districts and communities throughout Wyoming and the region. SMTC in-service and extension courses, workshops, institutes, and conferences are designed collaboratively to improve science and mathematics teaching in Wyoming.

The SMTC administers and supports five master's degree programs:

- (1) the Master of Science degrees in Natural Science with concentrations in Middle Level Math (MMA) and
- (2) Middle Level Science (MSC); these programs are designed for Wyoming's in-service elementary, middle, and high school teachers. They focus on general science and mathematics content with an emphasis on teaching middle school level learners. The course work leads to middle level endorsement provided by the Wyoming PTSB. Teachers must have two years of teaching experience to participate in these programs.
- (3) Master of Science in Teaching - Natural Science (MST - Natural Science). This is a self-directed master's degree program working with the SMTC, SER, and the Haub School as well as other colleges. The program is developed individually with the guidance of a graduate committee based on the interests of the graduate student. This program may be used by teachers to take the 18 graduate-level credits often needed to teach Advanced Placement and community college courses.
- (4) Master of Science - Natural Science (MS - Natural Science). This is a self-directed master's degree program working with the SMTC, the College of Arts and Sciences, SER, and the Haub School and other colleges. The program is developed individually based on the interests of the graduate student and may emphasize formal or informal learning settings. Interdisciplinary study is encouraged.

(5) Master of Science in Natural Science with a concentration in Natural Science Education (NED). This Master's degree program is designed for students pursuing careers as environmental and natural science educators in non-public school or non-formal education settings. These students spend one year at the Teton Science Schools (TSS) in Jackson. A long-standing MOU between the SMTC and TSS allows students to use 15 graduate credit hours earned at TSS towards a master's degree if they are accepted into the second year at UW within the SMTC.

SMTC Student Learner Outcomes

Upon successful completion of the MS degree program in Natural Science, a student will be able to:

- Engage in teacher research to transform STEM instruction:
 - Design and implement a research project that asks and answers a question using appropriate materials, concepts and methods, and ethical practices, and
 - Effectively communicate all aspects of the research project in both oral and written forms.
- Use professional and academic standards to ensure high-quality interdisciplinary instruction (i.e., place-based, culturally relevant, and/or social justice pedagogy) to maximize learning for all students.
- Engage in mathematical and/or scientific discourse and scientific thinking as active participants in communities of practice.
- Use emerging technology and science investigations as tools to engage students.

Program Specific Admission Requirements

For the MSC, MMA, MST and MS-Natural Science Master's Degrees:

Two years of teaching experience and a valid teaching license (required for MSC and MMA; may be waived for MST and MS-Natural Science)

Application Fee, unless a UW Graduate

Official Transcripts from all Institutions attended and Bachelor Degree conferring institution

3.0 undergraduate grade point average; provisional admission with a lesser GPA only with consent from Academic Affairs

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence (These items are not required of applicants who hold a prior master's degree)

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from the teacher's principal and two other colleagues.

The NED Degree - First Year Application:

Official Transcripts from all institutions attended and Bachelor Degree conferring institution Application Fee, unless a UW Graduate

Acceptance and admission by the Graduate Program at the Teton Science Schools in Jackson, WY

The NED Degree - Second Year Application:

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from a TSS Graduate Program Faculty Member, one from another TSS employee such as a Classroom Instructor or Field Instructor, and one from the first year application

Applicants complete a UW graduate application and upload all of the information on the Admissions Office website (<http://www.uwyo.edu/admissions/apply.html>). Application packets are reviewed by SMTC Admissions Committees and recommendations for admissions are submitted to the University of Wyoming Admissions Office. Any of the above requirements plus the university's minimum 3.00 grade point average may be waived if proper documentation and reasoning are given by the SMTC and approved by the Associate Vice Provost of Graduate Education.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) for more information.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Application Due Dates for Master of Science - Natural Science with Concentrations in the following areas:

Middle-level Science (MSC): applications are accepted on an ongoing basis; new students may begin only in summer each year; final due date for admission in summer is April 1.

Middle-level Mathematics (MMA): applications are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Natural Science Education (NED): applications deadlines for Year 1 are established by Teton Science Schools (<https://www.tetonscience.org/programs/graduate-program/admissions/>); due date for admission to begin Year 2 in the fall at UW is February 1.

MST and the MS- Natural Science Masters Degree: applications for these self-designed programs are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Graduate Assistantships and Scholarships

The SMTC often has scholarships and graduate assistantships available for graduates accepted for the above Master's degree programs. More information upon admission and acceptance.

Graduate

Biomedical Sciences, Ph.D.

Biomedical sciences is the study of human biological processes; the complex interactions between physiological, genetic and environmental factors that influence disease and health. It spans the spectrum from fundamental discovery to innovation and application.

Areas of focus may include but not limited to cardiac health, nutrition, reproductive biology, toxicology, diagnostic & imaging and medical engineering.

The PhD program in biomedical sciences is designed to position graduates for long-term competitive success in the rapidly changing and multifaceted health-related arena in the 21st century. It is a comprehensive, interdisciplinary program, making connections between various disciplines to gain new insights, discover and apply new knowledge, and promote self-directed, life-long learning.

Biomedical Sciences is a research & discovery focused program balancing depth and breadth of content knowledge with "enabling" skills including problem solving, innovation, entrepreneurship, communication and leadership.

Admission to the Biomedical Sciences PhD Program

1. Minimum requirements. Applicants who do not meet the minimum requirements may be conditionally accepted at the discretion of the BMS Admission Committee. Please submit the application packet comprising the following documents for pre-admission screening:

a. Faculty sponsor. Contact potential biomedical sciences graduate program faculty sponsor in your area of interest prior to submitting an application. NOTE: a letter indicating the sponsorship by a faculty is strongly recommended as the program does not have sufficient number of graduate assistantships to support all students.

b. Official academic transcripts. Successful completion of a bachelor's degree from an accredited institution with one or more semesters of biology, physics, anatomy, physiology, chemistry, biochemistry/molecular biology, math are recommended. All applicants should have at least a 3.0 cumulative GPA (scale of 4.0). While a master's degree is not required for admissions into the biomedical sciences Ph.D. program, a master's degree with a strong background in the research area of focus is a plus.

c. TOEFL/IELTS/Duolingo: The minimum acceptable scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries may be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/ cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency, until further notice.

d. GRE: A composite minimum score of 291 on the verbal and quantitative sections of the GRE is recommended. The GRE may be waived at the discretion of the admission committee if the applicant already possesses a master's degree, and/or documented research accomplishment in the chosen discipline.

e. Three letters of recommendation.

f. Statement of research interests and career objectives. A letter stating research & career interests and goals, prior research experience and outcomes, reasons for interest in BMS program. Include your contact information in the letter.

g. Current professional resume

2. Application Process. The BMS admissions committee reviews the completed application.

- a. Contact faculty in your area of interest and obtain their endorsement. Faculty may choose to interview the candidate on-campus or via zoom.
- b. Submit your application materials (pdf files of cover letter/statement of purpose, letter of sponsorship from the faculty, three letters of reference, transcripts, TOEFL/GRE scores to the admissions office via the University's admission portal.
- c. To ensure full application review for fall semester admission, applications should be received by **February 15**.
- d. Review by BMS Admissions Committee.
- e. Forward application packet with BMS recommendation to the faculty and host department.
- f. Notification of decision to applicant by **May 1**.

Program of Study

Rationale: The program of study is designed according to student learning goals and research opportunities. It blends depth and breadth of preparation by providing broad core requirements with electives promoting specialization in a "parent" discipline. This is recognized on program documentation by a Doctorate in Biomedical Sciences/"specialization" area. For example, Doctorate in Biomedical Sciences/Reproductive Biology.

Student Learning Outcomes: The BMS program provides unique array of formal courses and informal discovery experiences focused on ensuring aptitudes, behaviors and skills necessary for leadership and competitive success in the biomedical science arena.

Although the foundation enabling innovative, independent thinking and knowledge discovery is deep discipline knowledge, the BMS program is also designed to promote student competency in information assessment, synthesis and integration, communication and translation to the broader community, teamwork, leadership and project management.

The BMS program trains graduates to be competent, skilled experimentalists, problem solvers, critical and independent thinkers, expert in their field, with both depth and breadth of knowledge.

In addition, the program aims to instill characteristics that are essential to long-term professional success, preparing scientists who are effective and dedicated mentors and teachers, organized administrators, exemplars of high ethical standards, and effective collaborators. Upon completion of the program, graduates will demonstrate:

- Independent, critical thinking skills
- Ability to identify appropriate biographical resources
- Knowledge of recent advances in discipline and related areas
- Understanding of a broad spectrum of research methodologies and their applications
- Ability to critically analyze research findings
- Ability to design and independently execute research
- Ability to use appropriate information technology to record, manage, and disseminate information
- Understanding of issues related to researcher and subject rights
- Motivation and aptitude needed to acquire knowledge
- Communication skills that are appropriate for a range of audiences and purposes
- Ability to construct and articulate arguments to a wide range of audiences
- Ability to effectively support the acquisition of knowledge by others when teaching or mentoring students
- Willingness to assume responsibility for their work
- Ability to design and teach undergraduate or graduate courses
- Ability to publish single/first authored papers in peer-reviewed journals

Courses

- BMS5880 - Biomedical Sciences Research Ethics Credits: 2
- BMS5920 - Continuing Registration: On Campus, Credits: 1-12
- BMS5940 - Continuing Registration: Off Campus, Credits: 1-24
- BMS5980 - Dissertation Research, Credits: 1-24
- BMS5985 - Seminar Credits: 1

Ecology, Ph.D.

The Program in Ecology prepares doctoral students to lead the discipline of ecology during the coming decades. The program is grounded in the natural history of organisms in their environment, but incorporates tools and perspectives from across the biological, physical, mathematical, computational, and earth sciences. Students develop conceptual, historical, and philosophical perspectives spanning the entire range of subdisciplines in ecology, while receiving advanced training in the subdiscipline of their individual interest.

The program fosters long-term career development by exploring the linkages of ecology with other disciplines, and by scanning the ecological horizon for emerging questions, concepts, and approaches that will shape the field in years to come.

Faculty members from several departments and colleges participate in the Program in Ecology. Their interests span the full range of topics covered in the field of ecology, and students in the program reflect this diversity.

Program Specific Admission Requirements

Only students seeking a doctoral degree will be admitted into the program. Minimum criteria for admission to the Program in Ecology are:

- Minimum undergraduate GPA of 3.000
- Agreement by a member of the PiE faculty to sponsor the student, or to co-sponsor the student together with a PiE affiliate
- Admission to a home department at the University of Wyoming

All applications to the program will be reviewed by the Graduate Affairs Committee, which has authority on admissions. Students applying to the program who lack a master's degree must show exceptional promise and commitment (e.g., through undergraduate or post-graduate research experiences, peer-reviewed publications, and/or success in competing for research fellowships). Such students are encouraged to consult with their prospective adviser on whether to apply directly to PiE or to master's programs in individual home departments of PiE faculty.

Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the program. Transfer is not pro forma. Transfer applications are subject to the same criteria as for entering students, and admission to the program for transfer students must be approved by the Graduate Affairs Committee.

Program Specific Degree Requirements

Advisory Committee

Before the end of the second semester of study, the student should nominate a five-member advisory committee to the Office of the Registrar. At least three members of the committee, including the committee chair (usually the student's adviser), will be members of the PiE faculty. One other member, who will serve as Graduate Faculty representative, must be from outside the home department of the major adviser, although (s)he can be a faculty member in a department that participates in the program.

The committee will advise the student on his/her program of graduate study, execute and evaluate the student's preliminary examination, evaluate the student's dissertation proposal and dissertation, and conduct the student's dissertation defense.

Program of Study

All students are required to take ECOL 5100 or equivalent. This course should be taken during the first year of residency. Exceptions or substitutions of these requirements are subject to approval by the graduate affairs committee.

The program of study must include at least 6 credit hours aimed at developing a tool skill, which except for rare cases shall be in the quantitative/analytical domain (e.g., statistics, modeling, GIS, remote sensing, bioinformatics). Courses relating to research tools should be taken early in the student's residency to ensure that they can be used in thesis research and advanced studies. Specific coursework and tool-skill development for the student's program of study will be developed in consultation with and subject to approval by the student's advisory committee.

Admission to Candidacy

Admission to candidacy for the Ph.D. requires two steps: 1) providing evidence that the student is prepared to identify a research question, design an approach for investigating that question, and a plan for executing the approach, all in the format of an NSF-style research proposal, and 2) illustrating adequate proficiency in the subject matter of ecology through a process involving both written and oral exams.

Proposal

Students must submit a NSF-style proposal to their committee outlining their project, typically by the end of the fourth semester. Each committee member will provide feedback to the student on the proposed research and indicate approval of the proposal or request revision. The proposal must be approved by all committee members prior to starting the preliminary exams.

While this proposal should be a plan for actual dissertation research, unforeseen circumstances may require altering the student's dissertation work after the proposal has been approved by the committee. In the case of a major alteration, the student should reformulate a research plan and submit it to the committee in writing for committee approval.

Preliminary Exam

Passing the preliminary exam is the official admission to candidacy.

Written portion of the preliminary exam. The student will take the written exam portion of the preliminary exam no fewer than two weeks following approval of the research proposal. The goal of this exam is to test breadth of knowledge in ecology. The design of this exam will be coordinated by the graduate committee under the leadership of the adviser. Each written exam will cover the following topics:

- Ecological topics ranging from organismal/evolutionary to ecosystem-level perspectives, integrating concepts and perspectives from across the discipline, over a wide range of spatial and temporal scales.
- The philosophical and historical development of ecology.
- The conceptual background of the student's area of specialization.

The exam will consist of four to six questions developed collectively by the committee and organized by the student's major professor. The exam will be open book; however, the answers will be solely the work of the student. Answers should be fully cited and collectively should be no longer than 30 pages double-spaced exclusive of references cited. Students will have one full

week (seven days) to complete the exam. Committee members will indicate pass/fail within one week following completion of written exams. Four of five passing votes are required.

Oral Portion of the Preliminary Exam. No sooner than two weeks after successfully passing the written exam, the student may proceed to an oral exam administered by his/her graduate committee. Oral exams center around three goals from which questions will be derived:

- To verify that the student is prepared, conceptually and methodologically, to carry out successful dissertation research.
- To evaluate the student's ability to conceptualize specific questions in a broad, integrative context.
- To evaluate the student's ability to think spontaneously and creatively and to articulate responses about unexpected or novel questions.

The advisory committee will discuss and organize specific questions based on these goals in a short session at the beginning of the exam period before admitting the student to the examination room and starting the exam. Following the exam each committee member will provide non-binding paper votes of pass/ fail for each of the three goals of the oral exam. Following discussion of the student's performance, committee members will each assign a grade of pass/fail for the overall exam. Four of five committee members must vote for passing the overall oral exam.

Students whose performance is unsatisfactory will be given one opportunity for retaking the oral examination. This retake will occur no later than the academic-year semester following the first examination.

Public Seminars

Students are required to give two oral presentations on their research. The purposes of these presentations are to provide the student with practice in oral presentations and to keep the PiE community informed of the student's progress. The first will describe the student's dissertation research proposal. This presentation will be given before the student submits his/her thesis proposal. The second presentation will summarize the student's completed dissertation research, and will normally be given the same semester as the student's dissertation defense. Under extraordinary circumstances (subject to approval by the Graduate Affairs Committee), this presentation may be given at an earlier time. These presentations must be open to the public, and may comprise part of a departmental or Program in Ecology seminar or brown-bag series.

Courses

- ECOL5050 - Techniques in Environmental Data Management Credits: 4
- ECOL5060 - Advanced Concepts in Evolution Credits: 3
- ECOL5100 - Ecology as a Discipline Credits: 3
- ECOL5400 - Community Ecology Credits: 3
- ECOL5500 - Quantitative Analysis of Field Data Credits: 3
- ECOL5520 - Habitat Selection Credits: 2
- ECOL5540 - Microbial Diversity and Ecology Credits: 4
- ECOL5550 - Ecology as a Scientific Profession Credits: 2
- ECOL5580 - Rangeland Restoration Ecology Credits: 3
- ECOL5610 - Quantitative Modeling in Landscape Ecology Credits: 3
- ECOL5620 - Advanced Topics in Ecology Credits: 1-4
- ECOL5650 - Tropical Field Ecology Ecuador Credits: 4
- ECOL5680 - Landscape Genetics Credits: 3-4
- ECOL5775 - Forest Ecology Credits: 4
- ECOL5780 - Research in Ecology Credits: 1-6
- ECOL5920 - Continuing Registration: On Campus, Credits: 1-2
- ECOL5940 - Continuing Registration: Off Campus, Credits: 1-12
- ECOL5980 - Dissertation Research Credits: 1-12

Hydrologic Sciences, Ph.D. (WRESE)

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D.-level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

Program Specific Admission Requirements

The WRESE Program only admits students seeking a doctoral degree.

Minimum criteria for admission to the Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under exceptional circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the program.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two

parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

Molecular and Cellular Life Sciences, Ph.D.

This interdisciplinary program with more than 30 faculty participants spans a wide range of research topics, such as:

- Biotechnology, bioengineering, biomaterials, and pharmacology
- Cell biology and signaling
- Genetics and development
- Genomics, proteomics, and computational biology
- Microbiology and infectious disease
- Structural biology and biophysics

Coursework focuses on core courses in biochemistry and molecular biology, with electives that include such diverse courses as:

- Topics in Genomics
- Biophysics
- Microbial Physiology and Metabolism
- Cell and Developmental Genetics
- Mass Spectrometry and Analytical Chemistry
- Biomedical Engineering
- Mammalian Endocrinology
- Cell Culture and Virology
- Introduction to Bioinformatics
- Protein Structure and Function
- Microbial Genetics
- Computational Biology
- Quantitative Microscopy

Program Specific Admission Requirements

Admission to MCLS is a two-step process. The first level of evaluation is carried out by the MCLS admissions committee. This step does not require any fee but does require that all requested materials be submitted as described on our website. After an initial review of all complete applications, a subset of qualified applicants will be selected for video conference interviews with members of the MCLS admissions committee. Applicants who are chosen for admission to the MCLS program will then complete the final application step through the University of Wyoming Admissions office. This latter step requires the completion of several additional forms. Students are then officially notified by the university of their acceptance into the MCLS program.

We encourage students to submit their completed applications at the very latest by January 15 of each calendar year. However, because our review of applications will begin in the late fall, early submissions are encouraged and may stand a greater likelihood of success. Also note that we will continue to review new applications received after January 15 in the event that additional slots are available.

Program Specific Degree Requirements

MCLS doctoral students must fulfill the minimum requirements outlined by the university. In addition, students must obtain a high level of proficiency in the core foundations of the molecular and cellular life sciences through required courses in biochemistry/ molecular biology, scientific literature analysis proficiency, and the MCLS cornerstone course. Because of the broad range of research interests pursued by MCLS faculty and students, considerable flexibility will be exercised regarding the specific nature of the graduate-level elective courses that students may take.

Students must successfully complete four eight-week rotations in MCLS laboratories of their choice during the first year.

Students must pass a comprehensive assessment exam at the end of the first year. Towards the end of the second year, students will undertake a qualifying examination in order to be formally admitted to graduate degree candidacy. This exam will have both written and oral components and will cover areas of science that are relevant to the students' research.

The research and coursework progress of MCLS students will also be monitored and evaluated every year by the MCLS curriculum committee. In addition, an annual meeting with a research-specific dissertation committee will facilitate and evaluate the research progress of MCLS students beginning in the second year.

Students must attend weekly outside seminars on topics in the molecular life sciences for the durations of their studies.

For more information, please see the program's Web site at: www.uwyo.edu/MCLS/.

Neuroscience, Ph.D.

The Graduate Neuroscience Program offers training leading to the Ph.D. degree in Neuroscience. The Neuroscience Program emphasizes systems and integrative approaches, and our goal is to provide the students with the necessary background to be broadly trained research neuroscientists and to carry out independent research in neuroscience. The Neuroscience Program emphasizes continuing interaction with faculty from several departments and we have a low student to faculty ratio. Advisors spend considerable time supervising and training each doctoral student. The educational philosophy of the Neuroscience Program is to encourage a problem-oriented rather than a strict discipline-bound approach to research. You will emerge from this program with the scientific and experimental training needed to comprehensively address a very wide range of research questions using a variety of techniques and analytic tools.

The Graduate Neuroscience Program is designed to enable graduate students to acquire competence in the various disciplines necessary for research and teaching careers in neuroscience. The current interests of the Neuroscience faculty include sensory neurophysiology, behavioral neuropharmacology, neurodevelopment, neurodegeneration, and synaptic plasticity.

Students and faculty have access to outstanding resources established by NIH Neuroscience and Sensory Biology Core grants. The Microscopy Core houses both light (Zeiss laser scanning, fluorescent) and electron (Transmission and Scanning) microscopes. Resources needed to conduct research ranging from molecular, cellular circuit level to behavior are readily available within the Neuroscience Center.

Doctoral Program Admission Minimum Requirements

- GRE: 153 on the verbal reasoning sections and a score of at least 144 on the quantitative reasoning section is required;
- GPA: 3.000 (4.000 scale);
- Three favorable letters of recommendation;
- Bachelor's degree in a biological science from an accredited institution;
- Statement of research interests and career objectives. We recommend that students study the Neuroscience faculty web sites and contact faculty regarding openings and shared research interests.

You will be best prepared for our program if you have successfully completed courses in neuroscience, chemistry, biology, physiology, and cell/molecular biology. Students may be admitted with deficiencies in some of the areas if they are strong in many or all others. If so, the student's advisory committee will determine what additional work is necessary during the first year to correct any deficiency.

Program Specific Degree Requirements

All doctoral Neuroscience students are required to complete a program of core classwork that includes the following required courses: Introduction to Neuroscience, Structure and Function of the Nervous System and Neurophysiology. Students are required to take one course in Statistics (e.g. STAT 5050, STAT 5210) and the course that meets this requirement will be arranged with the student's committee. The statistics requirement must be met by the end of the second year. The Neuroscience Program is a research-oriented program and students are expected to take a minimum of 2 to 3 credit hours of research per semester. Students are also expected to enroll in an on-going Seminar in Neuroscience. The Neuroscience Seminar, which meets weekly and is attended by students and faculty members, provides an opportunity for intellectual and social exchange, as well as for the development of professional skills in critical thinking. The topic for seminar and the faculty member directing the seminar changes each semester. The remainder of the coursework for the doctor of philosophy degree is selected from designated courses in Neuroscience, physiology, pharmacology, and molecular biology. A grade of B or better is required for all Neuroscience courses.

A student is expected to have a graduate adviser at all times. The faculty adviser must be a participating member of the Neuroscience faculty. The adviser is responsible for directing the student's research and academic coursework. During the second year, the student will have an advisory committee. The advisory committee will consist of at least three neuroscience faculty members and an outside member. Normally, the student's adviser will chair the committee and help identify members of the committee who best match the student's area of interest. The role of the advisory committee is to oversee all aspects of the student's education after the first year.

Students give two public research presentations 6-12 months before the preliminary and final defense exams. In the student's second or third year, the advisory committee will set and evaluate the student's qualifying examination. After successful completion of the preliminary examination the student will profess to Ph.D. candidate status.

The dissertation is the single most important component of the graduate program. It reports the results and significance of the student's research. In addition to the written dissertation, the doctoral candidate will deliver a formal seminar based on their research. The seminar will be followed by an examination by the student's advisory committee.

Courses

- NEUR4295 - Neurodevelopment Credits: 3
- NEUR4720 - Neuroscience Speaker Seminar Credits: 2
- NEUR5100 - Structure and Function of the Nervous System Credits: 4
- NEUR5280 - Introduction to Neuroscience Credits: 3
- NEUR5295 - Neurodevelopment Credits: 3
- NEUR5685 - Neurophysiology Credits: 3
- NEUR5715 - Seminar in Neuroscience Credits: 1-2
- NEUR5720 - Neuroscience Speaker Seminar Credits: 2
- NEUR5800 - Research in Neuroscience Credits: 1-16
- NEUR5887 - Molecular Neuropharmacology Credits: 3
- NEUR5920 - Continuing Registration: On Campus Credits: 1-2
- NEUR5940 - Continuing Registration: Off Campus Credits: 1-2
- NEUR5980 - Dissertation Research Credits: 1-12

Science & Mathematics Teaching Center Master's Degrees

Science and Mathematics Teaching Center

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/smtc/>
Email: smtc@uwyo.edu

Program Director: Sylvia Parker

The Science and Mathematics Teaching Center (SMTC) was established in 1970 and is committed to excellence in science, mathematics, technology and STEM education. As part of the Office of Graduate Education in Academic Affairs, the SMTC, in cooperation with the Wyoming Department of Education (WDE) and the Professional Teaching Standards Board (PTSB), serves as a resource and professional development center for the state. The SMTC offers transdisciplinary graduate degree programs with multiple degree concentrations, certification options, and endorsement options. All of the programs emphasize both strong content knowledge and instructional practices. The affiliate faculty for the SMTC includes faculty from the Colleges of Agriculture and Natural Resources, Arts and Science, Education, and Engineering and Applied Science, and the Haub School of Environment and Natural Sciences.

The SMTC provides extensive off-campus professional development that serves teachers, students, administrators, school districts and communities throughout Wyoming and the region. SMTC in-service and extension courses, workshops, institutes, and conferences are designed collaboratively to improve science and mathematics teaching in Wyoming.

The SMTC administers and supports five master's degree programs:

- (1) the Master of Science degrees in Natural Science with concentrations in Middle Level Math (MMA) and
- (2) Middle Level Science (MSC); these programs are designed for Wyoming's in-service elementary, middle, and high school teachers. They focus on general science and mathematics content with an emphasis on teaching middle school level learners. The course work leads to middle level endorsement provided by the Wyoming PTSB. Teachers must have two years of teaching experience to participate in these programs.
- (3) Master of Science in Teaching - Natural Science (MST - Natural Science). This is a self-directed master's degree program working with the SMTC, SER, and the Haub School as well as other colleges. The program is developed individually with the guidance of a graduate committee based on the interests of the graduate student. This program may be used by teachers to take the 18 graduate-level credits often needed to teach Advanced Placement and community college courses.
- (4) Master of Science - Natural Science (MS - Natural Science). This is a self-directed master's degree program working with the SMTC, the College of Arts and Sciences, SER, and the Haub School and other colleges. The program is developed individually based on the interests of the graduate student and may emphasize formal or informal learning settings. Interdisciplinary study is encouraged.
- (5) Master of Science in Natural Science with a concentration in Natural Science Education (NED). This Master's degree program is designed for students pursuing careers as environmental and natural science educators in non-public school or non-formal education settings. These students spend one year at the Teton Science Schools (TSS) in Jackson. A long-standing MOU between the SMTC and TSS allows students to use 15 graduate credit hours earned at TSS towards a master's degree if they are accepted into the second year at UW within the SMTC.

SMTC Student Learner Outcomes

Upon successful completion of the MS degree program in Natural Science, a student will be able to:

- Engage in teacher research to transform STEM instruction:
 - Design and implement a research project that asks and answers a question using appropriate materials, concepts and methods, and ethical practices, and
 - Effectively communicate all aspects of the research project in both oral and written forms.
- Use professional and academic standards to ensure high-quality interdisciplinary instruction (i.e., place-based, culturally relevant, and/or social justice pedagogy) to maximize learning for all students.
- Engage in mathematical and/or scientific discourse and scientific thinking as active participants in communities of practice.
- Use emerging technology and science investigations as tools to engage students.

Program Specific Admission Requirements

For the MSC, MMA, MST and MS-Natural Science Master's Degrees:

Two years of teaching experience and a valid teaching license (required for MSC and MMA; may be waived for MST and MS-Natural Science)

Application Fee, unless a UW Graduate

Official Transcripts from all Institutions attended and Bachelor Degree conferring institution

3.0 undergraduate grade point average; provisional admission with a lesser GPA only with consent from Academic Affairs

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence (These items are not required of applicants who hold a prior master's degree)

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from the teacher's principal and two other colleagues.

The NED Degree - First Year Application:

Official Transcripts from all institutions attended and Bachelor Degree conferring institution Application Fee, unless a UW Graduate

Acceptance and admission by the Graduate Program at the Teton Science Schools in Jackson, WY

The NED Degree - Second Year Application:

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from a TSS Graduate Program Faculty Member, one from another TSS employee such as a Classroom Instructor or Field Instructor, and one from the first year application

Applicants complete a UW graduate application and upload all of the information on the Admissions Office website (<http://www.uwyo.edu/admissions/apply.html>). Application packets are reviewed by SMTC Admissions Committees and recommendations for admissions are submitted to the University of Wyoming Admissions Office. Any of the above requirements plus the university's minimum 3.00 grade point average may be waived if proper documentation and reasoning are given by the SMTC and approved by the Associate Vice Provost of Graduate Education.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) for more information.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Application Due Dates for Master of Science - Natural Science with Concentrations in the following areas:

Middle-level Science (MSC): applications are accepted on an ongoing basis; new students may begin only in summer each year; final due date for admission in summer is April 1.

Middle-level Mathematics (MMA): applications are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Natural Science Education (NED): applications deadlines for Year 1 are established by Teton Science Schools (<https://www.tetonscience.org/programs/graduate-program/admissions/>); due date for admission to begin Year 2 in the fall at UW is February 1.

MST and the MS- Natural Science Masters Degree: applications for these self-designed programs are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Graduate Assistantships and Scholarships

The SMTC often has scholarships and graduate assistantships available for graduates accepted for the above Master's degree programs. More information upon admission and acceptance.

For the Master of Science in Natural Science Master's Degrees

Plan B (non-thesis)

- 30 Credit Hours of graduate-level coursework is required in all of the programs. This includes 24 credit hours in required coursework depending on the program plus 6 credit hours of additional coursework that may include a research class, Plan B independent research and an elective.
- The Middle Level Science (MSC) concentration is a 3-year program, for the required coursework, in the summers only on UW's main campus. Courses are offered on a 3-year rotation cycle; students may enter the program in any year.
- The Middle Level Math (MMA) concentration is a 2-year program with classes offered virtually in the fall and spring and in-person on the main campus in the summer, for the required courses. Students may enter the program in any semester.
- The Natural Science Education (NED) concentration is a 2-year program with classes offered in the graduate program at the Teton Science Schools in Jackson, WY, in year 1, and additional classes offered at the UW main campus in year 2.
- The MST (Master's of Science in Teaching) and the MS- Natural Science Master's Degrees are Main campus degrees. They are self-directed master's degree programs designed individually based on the student's interests and needs.
- All students must complete and defend a Plan B research project.
- A Plan A (thesis) may be completed with an extra year of research.

NOTE: Middle-Level Science & Middle-Level Mathematics; 24 credit hours in the core courses are required for institutional recommendation for WY middle-level endorsement from the Professional Teaching Standards Board, PTSB.

NOTE: *NASC 5810 Middle-Level Science and Mathematics 3 credit hour course Practica (required course for teachers without previous coursework or experience teaching middle-level students. Offered spring semester in even years only).

Other Degrees and their Requirements

The MST in Natural Science and the MS - Natural Science programs are self-directed master's degree programs designed individually based on the student's interests and needs. The programs require 30 graduate level credits plus a Plan B research project that is defended publicly. Requirements are based on the university minimum requirements.

For the NED Concentration - Year 1 (at Teton Science Schools)

These students spend their first year at the Teton Science Schools in Jackson, Wyoming. Students earn 15 credits that may be used towards the master's degree at the University of Wyoming in Year 2.

For the NED Concentration - Year 2 (at the University of Wyoming)

Plan B (non-thesis)

- This is a one-year program on the main campus.
- 30 credit hours of coursework is required for the master's degree, of which 15 credit hours of agreed upon courses are earned at TSS in year 1. The other 15 credit hours include two required courses: NASC 5650 (3 credits) and a graduate level research class (minimum 3 credits). Additional courses in environmental science and science pedagogy classes are chosen by the graduate student and their advisor.
- A concurrent major in Environmental and Natural Resources is an option with this Master's program.
- Students must complete and defend a Plan B research project.
- A Plan A (thesis) may be completed with an extra year of research.

Middle-Level Science Concentration and Master's Degree

Life Science Summer Core (2023, 2026, 2029, etc...)

- BOT5790 - Special Topics in Ecology Credits: 1-3
- ENTO5601 - Insects for Teachers: Collection and Identification of Insects Credits: 1
- NASC4790 - Topics in Natural Science Credits: 1-6
- NASC5130 - Life Science in Global Context, MSC Credits: 3
- NASC5660 - Standards, Pedagogy and Research Credits: 2

Physical Science Summer Core (2021, 2024, 2027, etc...)

- EE4800 - Problems in _____ Credits: 1-6
- NASC5110 - Physical Science in Global Context, MSC Credits: 3
- NASC5510 - Integrated Instructional Strategies, MSC Credits: 2
- NASC5600 - Mathematics and Statistics in Science Teaching, MSC Credits: 2

Earth Science Summer Core (2022, 2025, 2028, etc...)

- ASTR4000 - Astronomy for Teachers Credits: 1-5
- NASC5120 - Earth Science in Global Context, MSC Credits: 3
- NASC5300 - Classroom Assessment in Middle-level Science, MSC Credits: 2
- NASC5400 - Spatial Data Instructional Technology Credits: 1

Middle-Level Mathematics Concentration and Master's Degree (courses in this program are cross listed with other departments)

MMA Even Years (2022, 2024, 2026...)

- NASC5140 - Numbers, Operations, and Patterns for the Middle-Level Learner, MMA Credits: 3
- NASC5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner, MMA Credits: 3
- NASC5185 - Analysis of Data in the Media for the Middle-Level Learner, MMA Credits: 3
- NASC5215 - Using Technology for Middle-Level Mathematics Credits: 3

MMA Odd Years (2021, 2023, 2025...)

- NASC5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner, MMA Credits: 3
- NASC5190 - Mathematics of Change and the Middle-Level Learner, MMA Credits: 3
- NASC5205 - Methods of Teaching Middle-Level Mathematics, MMA Credits: 3
- NASC5225 - Assessment for Middle-Level Mathematics, MMA Credits: 3

Natural Science Education (NED)

Teton Science Schools Graduate Program - Year 1

- EDCI5790 - Learning Theories and Instructional Principles Credits: 3
- NASC5610 - Field Studies in Environmental Education, NED Credits: 4
- NASC5620 - Advanced Elements of Field Ecology Course Design, NED Credits: 5
- NASC5625 - Place-Based Education-Teton Science School Credits: 3
- NASC5630 - Teaching Practicum-Teton Science School Credits: 2-4
- NASC5640 - Introduction to Field Science Teaching Credits: 3
- ZOO5405 - Winter Ecology of the Yellowstone Ecosystem Credits: 2
- ZOO5420 - Ecological Inquiry Credits: 3
- ZOO5430 - Ecology of the Greater Yellowstone Ecosystem Credits: 3

Natural Science Education (NED) - Year 2

- NASC5650 - Place-Based Learning Credits: 3

Other Courses offered by SMTC available to Graduate Students in SMTC programs:

- NASC5670 - Research Methodology Credits: 4
- NASC5700 - Seminar in Science for Secondary School Teachers Credits: 1-6
- NASC5770 - Investigation in Natural Science for Secondary Teachers Credits: 1-5

- NASC5890 - Directed Professional Study Credits: 1-6
- NASC5900 - Practicum in College Teaching Credits: 1-3
- NASC5960 - Thesis Research Credits: 1-12
- NASC5961 - Plan B Project Credits: 1-4
- NASC5990 - Internship Credits: 1-12
- NASC5959 - Enrichment Studies Credits: 1-3

Courses

- NASC4790 - Topics in Natural Science Credits: 1-6
- NASC4800 - Field Studies in Natural Science Credits: 1-6
- NASC5110 - Physical Science in Global Context, MSC Credits: 3
- NASC5120 - Earth Science in Global Context, MSC Credits: 3
- NASC5130 - Life Science in Global Context, MSC Credits: 3
- NASC5140 - Numbers, Operations, and Patterns for the Middle-Level Learner, MMA Credits: 3
- NASC5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner, MMA Credits: 3
- NASC5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner, MMA Credits: 3
- NASC5185 - Analysis of Data in the Media for the Middle-Level Learner, MMA Credits: 3
- NASC5190 - Mathematics of Change and the Middle-Level Learner, MMA Credits: 3
- NASC5205 - Methods of Teaching Middle-Level Mathematics, MMA Credits: 3
- NASC5215 - Using Technology for Middle-Level Mathematics Credits: 3
- NASC5225 - Assessment for Middle-Level Mathematics, MMA Credits: 3
- NASC5300 - Classroom Assessment in Middle-level Science, MSC Credits: 2
- NASC5400 - Spatial Data Instructional Technology Credits: 1
- NASC5510 - Integrated Instructional Strategies, MSC Credits: 2
- NASC5600 - Mathematics and Statistics in Science Teaching, MSC Credits: 2
- NASC5610 - Field Studies in Environmental Education, NED Credits: 4
- NASC5620 - Advanced Elements of Field Ecology Course Design, NED Credits: 5
- NASC5625 - Place-Based Education-Teton Science School Credits: 3
- NASC5630 - Teaching Practicum-Teton Science School Credits: 2-4
- NASC5640 - Introduction to Field Science Teaching Credits: 3
- NASC5650 - Place-Based Learning Credits: 3
- NASC5660 - Standards, Pedagogy and Research Credits: 2
- NASC5670 - Research Methodology Credits: 4
- NASC5700 - Seminar in Science for Secondary School Teachers Credits: 1-6
- NASC5770 - Investigation in Natural Science for Secondary Teachers Credits: 1-5
- NASC5810 - ML Science & Math Practicum Credits: 3
- NASC5890 - Directed Professional Study Credits: 1-6
- NASC5900 - Practicum in College Teaching Credits: 1-3
- NASC5920 - Continuing Registration: On Campus Credits: 1-2
- NASC5940 - Continuing Registration: Off Campus Credits: 1-2
- NASC5959 - Enrichment Studies Credits: 1-3
- NASC5960 - Thesis Research Credits: 1-12
- NASC5961 - Plan B Project Credits: 1-4
- NASC5990 - Internship Credits: 1-12

College of Law

102 Law Building

Klint Alexander, Dean

Phone: (307)766-6416 FAX: (307)766-6417

Web site: www.uwyo.edu/law

Professors:

KLINT ALEXANDER, B.A. Yale University 1991; Ph.D./M.Phil. Cambridge University 1997; J.D. University of Virginia 1999; Dean & Professor of Law 2015.

MELISSA ALEXANDER, B.A. Yale University 1996; J.D. University of Virginia 1999; Professor of Law 2019, 2015.

JACQUELYN BRIDGEMAN, B.A. Stanford University 1996; J.D. University of Chicago 1999; Associate Dean for Academic Affairs and Professor of Law 2008, 2002.

KENNETH CHESTEK, B.A. Pennsylvania State University 1975; J.D. University of Pittsburg School of Law 1979; Professor of Law 2018, 2012.

DANIELLE R. COVER, B.A. University of Maryland 1994; J.D. Tulane University School of Law 1997; Professor of Law 2020, 2014; Director of Legal Services Clinic.

JAMES M. DELANEY, B.A. University of Washington 1985; J.D. Gonzaga University School of Law 1992; LL.M. in Taxation, University of Florida 1997; Professor of Law 2013.

MICHAEL DUFF, B.A. West Chester University 1991; J.D. Harvard University 1995; Professor of Law 2012.

STEPHEN M. FELDMAN, B.A. Hamilton College 1977; J.D. University of Oregon 1982; J.S.M. Stanford University 1986; Jerry W. House/ Carl F. Arnold Distinguished Professor of Law 2002.

MARK GLOVER, B.A. Washington University in St. Louis 2002; J.D. Boston University School of Law 2008; LL.M. Harvard Law School 2011; Professor of Law 2019, 2015.

DARRELL D. JACKSON, B.A. College of William and Mary 1987; J.D. George Mason University School of Law 1990; Ph.D. University of Colorado School of Education 2011; Professor of Law 2018, 2013.

TAWNIA PLUMB, B.A. University of Wyoming 1996; M.L.I.S. University of Texas at Austin 1998; Electronic Services and Assistant Librarian 2004.

Professors Emeritus

Debra L. Donahue, Harvey Gelb, Timothy Kearley, Jerry R. Parkinson, Dee Pridgen, Joel Selig, Elaine A. Welle

The College of Law was founded in 1920. The goal of the college is to provide a sound and thorough education in the law that will prepare the student to practice law in accordance with the highest standards of professional competence and responsibility. The emphasis in instruction is on analysis and understanding of legal principles and the development of skills necessary to the practice of the profession. The course of study will prepare a graduate to practice in any jurisdiction which has adopted the Anglo-American system of law.

The curriculum of the College of Law consists of three years of study within the college. Required courses necessary to basic legal knowledge make up the first two semesters of study, while courses in the final four semesters are largely elective. Students become eligible to receive the Juris Doctor (J.D.) degree upon successful completion of 90 semester credit hours of law courses with a grade point average of at least 2.000.

The college acts as a law center for Wyoming. It serves lawyers, judges, and government by a program of continuing legal education for attorneys and others interested in significant legal developments, by research projects aimed at improving state law, and by publishing the Wyoming Law Review.

Accreditation

The college is approved by the American Bar Association and its graduates are eligible for admission to the bar in every state. A student planning to practice in a particular state should check its rules for admission to the bar.

The college is also a member of the Association of American Law Schools. Membership is conditioned upon the maintenance of an adequate teaching staff and library, the offering of a sound educational program and adherence to prescribed standards for the admission and graduation of students.

Prelegal Curriculum

There is no prescribed or required set of courses for prelegal work. A student must usually have a B.A. or B.S. degree before beginning the professional study of law. There are no restrictions on the field in which the degree is earned.

The objective of prelegal study should be to acquire knowledge and skills useful in the study and practice of law. College study should prepare the student for law school by developing language comprehension and use, understanding of political, economic, social and cultural institutions, and the ability to think logically and creatively. Courses promoting these objectives are included in the basic requirements for most undergraduate degrees. The choice of a major should be determined by the student's academic interest and professional objective in law.

Valuable background may be acquired through the study of English, history, philosophy, economics, political science, psychology, sociology, business administration, mathematics and the natural sciences.

For additional information, see the College of Law web site, (www.uwyo.edu/law).

Admission Requirements and Procedures

Admission to the professional curriculum in law is granted by the admissions committee of the College of Law. The College of Law restricts the number of entering students to a class size consistent with its facilities and its educational objectives. In evaluating an application, the committee considers the applicant's undergraduate college scholastic record and score on the Law School Admission Test (LSAT).

Other criteria relevant to the probability of success in the study and practice of law will also be considered.

- Prior to beginning work in the College of Law, applicants must have a bachelor's degree from an accredited college or university, unless they have requested and been granted following exception:
- An applicant who needs not more than 6 semester hours of college credit to qualify for a bachelor's degree may be admitted in exceptional cases to law school if the committee determines that the applicant has sufficient education and preparation for the study of law; has an outstanding undergraduate scholastic record; and has an approved program signed by the appropriate undergraduate official indicating that the remaining requirements for the bachelor's degree may be met by summer school attendance or by other means that will not interfere with the study of law.
- Every applicant must take the Law School Admission Test. A packet giving information about the test, the dates on which it is given, and centers at which it can be taken, sample questions and an application form, may be obtained from Law School Admission Council, Box 2000, Newtown, PA 18940, by phone at (215) 968-1001, online at www.lsac.org.
- Every applicant must register with the Law School Admission Council Credential Assembly Service, CAS. Registration may be done through the LSAC website (www.lsac.org). The CAS will prepare a report that is transferred to the college.
- Every applicant must complete the electronic University of Wyoming College of Law Application through LSAC between September 1 and April 30. Applications received by December 15 will be considered for early admission.
- If admitted, official transcripts sent directly to the College of Law from each college attended must be on file in the Admissions Office at least 30 days before the student's registration date.

Application Deadline

An initial entering class will be selected from completed applications on file on April 30. Students who submit an application by December 15 will be considered for early admission. An application is complete only when the college has received the LSAT score, the CAS re

Admission With Advanced Standing

Transfer students are admitted only when the College of Law facilities and curriculum permit. A transfer student may transfer up to the number of credits the student could have earned had the student completed his or her first year at the University of

Wyoming College of Law. Transfer credit will be given only for courses in which the student earned a grade of C or higher. Applicants admitted must satisfy the requirements for graduation established by the College of Law, including such other requirements as may be imposed as a condition of admission. Students interested in transferring should contact the College of Law for information concerning application procedures.

Academic Regulations

The Juris Doctor (J.D.) degree is awarded by the College of Law faculty to candidates who meet the following requirements:

For students matriculating before the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of 'C' or better for courses taken elsewhere) 89 credit hours (required for graduation) in accordance with the official curriculum as adopted by the College of Law faculty. At least 58 of these credits must be completed at the University of Wyoming College of Law. For students matriculating in or after the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of "C" or better for courses taken elsewhere) 90 credit hours (required for graduation) in accordance with the official curriculum as adopted by the College of Law faculty. Curriculum is subject to change at the College of Law Faculty's discretion, which may cause the annually updated catalog to be out of date. At least 59 of these credits must be completed at the University of Wyoming College of Law. Regardless of the matriculation date, students must complete at least 76 credit hours through graded (A-F) courses. Courses taken for S/U grades count toward the hours required for the J.D. degree only if the course is offered for the S/U grade only.

The course of study must be completed no earlier than 24 months (2 years) and not later than 84 months (7 years) after a student has commenced law study. No student shall be permitted to enroll at any time in coursework that, if successfully completed, would exceed 20 percent (18 hours) of the total coursework required for graduation.

Second and third year students may take up to six of 90 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Those students enrolled in a joint degree program may take up to 9 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students must receive a letter grade of B or better for these non-law courses to count toward graduation requirements. Additionally, these courses will transfer in with a satisfactory grade of 'S' and will not impact their law school gpa. The College of Law automatically approves up to 9 hours of joint degree core courses that meet this grade requirement to transfer in toward their law degree (see Joint Degree section). If additional courses are needed outside of the core courses, these will be approved on a case-by-case basis. Students in a joint degree program who use 9 non-law credit hours toward their J.D. degree may reduce their required number of graded credits from 76 to 73 so that they can participate in other S/U offerings at the College of Law. To receive law school credit for the non-law course, a student will be required to earn a grade of B or better in the non-law course. The grade will not count, however, toward the student's law school GPA. The course will be counted as a "satisfactory" grade for purposes of the student's law school GPA. Students who wish to enroll in a non-law course on this basis must secure the prior approval of the course professor and the Associate Dean of Academic Affairs at the College of Law. Approval will be based on the student's submission of a brief written statement explaining how the proposed coursework relates to and enhances the student's legal education. Students should be aware that non-law courses completed on this basis will not count toward the 76 hours that students must complete in graded courses as a requirement for graduation. The non-law coursework will instead be counted as credits the law students are permitted to take on an S/U basis.

To graduate, all students must earn a cumulative grade point average of 2.000 for all courses taken at the College of Law. If a course is repeated, both grades shall be included in computing the average. The student, must have a baccalaureate degree. Candidates who meet these requirements are eligible for graduation at the end of any semester.

port, and the College of Law application form. Applications completed after April 30 will be considered in filling vacancies which occur in the entering class initially selected.

Academic Standing

The following requirements apply to any coursework at the College of Law. Courses that law students may complete outside of the College of Law do not count in calculation of the required College of Law grade point average (GPA).

In the first year, a student who fails to make a 1.800 GPA after the first semester, or fails to make a 1.900 cumulative GPA overall in the first year's work, shall be excluded from the College of Law. A student who at any time fails to make a passing grade in two of the courses for which the student is registered for any semester shall be excluded from the College of Law.

A student who enters the second year with a GPA lower than 2.000 but at 1.900 or above, or who fails to maintain a 2.000 cumulative GPA after the first year, shall be placed on probation. A student on probation who does not attain an overall grade point average of 2.000 within one semester shall be excluded.

A student excluded from the College of Law may petition the faculty for reinstatement. The faculty may, in its discretion, reinstate the student upon receipt of satisfactory evidence of extenuating circumstances or marked improvement in grades and study habits. Reinstatement may be subject to conditions, including, but not limited to, the repeating of any or all courses, as the faculty may decide. If a student's petition for reinstatement is denied, said students must wait 9-months before petitioning again for reinstatement. Also, all students are limited to two petitions for readmission. Students are strongly encouraged to include all information pertinent to the readmission decision in their initial petition. The entire faculty will automatically hear and consider a student's initial petition. In the event of a second petition for readmission, a committee selected by the Dean will hear and consider the petition. The committee will present a report and recommendation to the faculty for adoption. Denial of a second petition is final.

Advanced Writing Requirement

As a condition of graduation, all students must complete an upper-level writing requirement consisting of a research paper of a minimum length of 5,000 words, exclusive of footnotes. All students must follow a designated standard citation form. Students must submit a detailed outline of the paper to the supervising professor, then must rewrite the paper at least once after the professor reviews the first draft. With the professor's approval, the student can meet the advanced writing requirement in any law school elective course, including a seminar, as long as the above requirements are met. The supervising professor must certify that the writing requirement has been fulfilled.

All student articles written for law review, whether published or unpublished, must have a supervising faculty member and otherwise meet all other provisions of the College of Law Advanced Writing Requirement. A student may also fulfill the requirement through an independent study or by writing a case note or comment for the law review, under the supervision of a professor. It cannot be satisfied through participation in a clinic.

Experiential Learning Requirement

As a condition of graduation, each student must successfully complete no fewer than 6.0 credit hours in experiential learning courses. Experiential learning courses include a simulation course, a law clinic, or an externship field placement. Simulation courses provide substantial experience not involving legal representation of an actual client, that (1) is reasonably similar to the experience of a lawyer advising or representing a client or engaging in other lawyering tasks in a set of facts and circumstances devised or adopted by a faculty member; and (2) includes: direct supervision of the student's performance by the faculty member; opportunities for performance, feedback from a faculty member, and self-evaluation; and a classroom instructional component (ABA Standard 303).

Students may fulfill the experiential learning requirement by successfully completing 6.0 credit hours in any of the following upper- class elective courses:

- Advanced Appellate Advocacy (LAW 6520)
- Advanced Legal Research (LAW 6990)
- Advanced Oil & Gas Law (LAW 6992)
- Advanced Persuasive Writing (LAW 6925)
- Alternative Dispute Resolution (LAW 6915)
- Business Planning (LAW 6560)
- Civil Pretrial Practice (LAW 6565)

Clinic: Civil Legal Services (LAW 6930 or LAW 6931)
Clinic: Defender Aid (LAW 6932 or LAW 6930)
Clinic: Energy, Environ. & Natural Resources (LAW 6933 or LAW 6930)
Clinic: Family & Child Advocacy (LAW 6930 or LAW 6934)
Clinic: International Human Rights (LAW 6930)
Clinic: Prosecution Assistance (LAW 6930 or LAW 6936)
Contract Drafting (LAW 6935)
Estate Planning (LAW 6670)
Estate Planning Practicum (LAW 6937 or LAW 6930 or LAW 6915)
Externships (LAW 6960)
Interviewing, Counseling & Negotiation (LAW 6166 or LAW 6915)
Summer Trial Institute (LAW 6850)
Trial Practice (LAW 6850)

Note: classes may be removed from and/or added to this list each semester.

Curriculum

Required Courses: First (1L) Year Students (*Additional courses cannot be taken the first year without special permission from a dean*).

Fall Semester

Civil Procedure I (6240) - 3

Contracts I (6110) - 3

Legal Research (6165) - 1

Legal Writing I (6160) - 3

Property I (6120) - 3

Torts I (6130) - 4

Spring Semester

Civil Procedure II (6340) - 2

Constitutional Law I (6250) - 3

Contracts II (6210) - 2

Criminal Law (6140) - 3

Legal Writing II (6260) - 2

Property II (6220) - 2

Required Courses: Second (2L) Year Students (offered once per year)

Evidence (6410) - 3

Professional Responsibility (6420) - 3

Elective Courses: Second (2L) & Third (3L) Year Students (* subject to availability)

See Law Courses section

Graduation with Honors

The degree of Juris Doctor is awarded with honors if the student achieves a grade point average of 3.400 or better on all resident credit in the College of Law.

Honor Roll

Students enrolled in a minimum of 12.0 semester hours of law courses carrying A-F grades, and who have no semester grades of incomplete (I), are eligible for the President's Honor Roll and the Dean's Honor Roll. Students with a semester average of 4.000 will be named to the President's Honor Roll. First-year students with a semester average of 3.250 or better and second-year and third-year students with a semester average of 3.400 or better will be named to the Dean's Honor Roll.

Minimum Hours

The College of Law does not permit students to attend on a part-time basis. Students are required to take the full load of required courses during their first two semesters and to carry at least 9 credit hours in each of the remaining semesters of law study. Notwithstanding, if a student has less than 9 credits remaining in their final semester of study, then said student may register for only the number of remaining credits (e.g. if a student only has 4 credits left to graduate, that student will only be required to register for 4 credits). First year students will be allowed to take less than the full load of required courses only if they present exceptional circumstances, as determined by the Dean or his/her delegate.

Transfer Credits

The College of Law admits transfer students only in the fall of their second year. A student granted transfer admission may transfer credits earned in courses taken at another ABA-accredited law school toward a degree from the UW College of Law up to the number of credits that a traditional UW student would have earned during the student's first year at the University of Wyoming (32 credits as of the 2020-21 academic year). In addition, University of Wyoming law students who visit out for a semester or full year may also transfer credits from other ABA approved law schools, as long as 59 credits are completed at the University of Wyoming. The College of Law will also accept up to 15 hours of transfer credit from another ABA accredited school for an international student previously enrolled in an LL.M. or other post-J.D. program. To receive transfer credit from a course, a grade must be a "C" or better. Transfer credits are recorded on the JD transcript as an "S" (Satisfactory), instead of graded credits. All transfer credits must be approved by the Associate Dean of Academic Affairs in advance.

Joint Degree Programs

JD/MA in ENR Program

A joint Juris Doctor/Master of Arts of Environment and Natural Resources degree is available to all admitted law students upon application. Students in this joint degree program must take 18 credits outside the law school in ENR courses, and must take 12 law school credits from a menu of ENR related law courses to qualify for this joint degree. Students in the joint degree program must also complete a supervised research project. Additionally, nine (9) credits of approved MA coursework (see Academic Regulations) will be applied to the Juris Doctor degree.

Current core courses: ENR 5000, ENR 5900, ENR 5890.

JD/MBA Program

A joint Juris Doctor/Master of Business Administration program is available in the College of Law and the College of Business. This program will take approximately four years to complete. Students spend three years on-campus engaged in law studies. In either their second or third year, students will be enrolled full-time in the MBA Program, taking core Fall and Spring business courses followed by participation in an MBA Summer Project. The MBA Capstone course will be completed during the student's third year for a total of 38 MBA Program credits. Nine (9) credit hours of approved Law coursework will be transferred as elective hours to the MBA Program for a total of 47 credit hours. Additionally, nine (9) credits of approved MBA coursework (see Academic Regulations) will be applied to the Juris Doctor degree. Students successfully completing this lock-step program will earn dual Juris Doctor and Masters of Business Administration degrees.

Current core courses: MBAM 5102, MBAM 5103, MBAM 5104, MBAM, 5107, MBAM 5108, MBAM 5202, MBAM 5203, MBAM 5204, MBAM5206, MBAM 5207, MBAM 5208, MBAM 5309

JD/MPA Program

A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in specified courses in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.

Current core courses: POLS 5000, POLS 5400, POLS 5410, POLS 5440, POLS 5684, POLS 5510, POLS 5690, POLS 5080, POLS 5060, POLS 5450, POLS 5460, POLS 5480

Nonprofessional Degree Students

Graduate students from other colleges of the University of Wyoming may be permitted to take one or more law courses on an S/U basis for non-law credit when the following conditions are met: the law course taken is acceptable for their degree program and the prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean has been obtained. In order to obtain audit or visitor privileges, students must obtain prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean. For further information and requirements contact the Associate Dean of Academic Affairs, College of Law, Dept. 3035, 1000 E. University Ave., Laramie, WY 82071.

Course descriptions may be obtained online at www.uwyo.edu/law.

Graduate

Juris Doctor

Academic Regulations

The Juris Doctor (J.D.) degree is awarded by the College of Law faculty to candidates who meet the following requirements:

For students matriculating before the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of 'C' or better for courses taken elsewhere) 89 credit hours (required for graduation) in accordance with the official curriculum as adopted by the College of Law faculty. At least 58 of these credits must be completed at the University of Wyoming College of Law. For students matriculating in or after the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of "C" or better for courses taken elsewhere) 90 credit hours (required for graduation) in accordance with the official curriculum as adopted by the College of Law faculty. - MBAM5204 - Financial Management Credits: 3
- MBAM5206 - Professional Development II Credits: 0
- MBAM5207 - Marketing Management Credits: 3
- MBAM5208 - Managerial Accounting Credits: 3
- MBAM5309 - Managerial Economics Credits: 3

Juris Doctor/Master of Public Administration

A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in specified courses in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.

Current Core Courses:

- POLS5000 - Survey of Public Administration Credits: 3
- POLS5400 - Public Personnel Management Credits: 3
- POLS5410 - Administrative Behavior and Theory of Organization Credits: 3
- POLS5440 - Principles and Processes of Government Budgeting Credits: 3
- POLS5684 - Empirical Analysis for Public Administration Credits: 3
- POLS5510 - Public Policy and Program Management Credits: 3
- POLS5690 - Capstone in Public Management Credits: 3
- POLS5080 - Organizational Development Credits: 3
- POLS5060 - American Intergovernmental Relations Credits: 3
- POLS5450 - Administrative Regulation Credits: 3
- POLS5460 - Public Administration and Law Credits: 3
- POLS5480 - Ethics In Government Credits: 3

Armed Forces Services

LTC George R. Riggan, Commander, Army ROTC
 LtCol. Anthony Kusek, Commander, Air Force ROTC

It has been the consistent policy of the university in cooperation with the federal government to make courses in military science and aerospace studies available on a voluntary basis to all qualified students.

Academic credits for Army and Air Force Reserve Officers' Training Corps (ROTC) are applied toward baccalaureate and graduate degrees in varying amounts depending upon the degree plan of the student and as determined by the college concerned.

Minor

Aerospace Studies Minor

Air Force ROTC offers an Aerospace Studies minor.

The 24 credit hours required to accomplish the Aerospace Studies minor will effectively compliment many majors, provide a sound basis for future professional development, and increase the career opportunities of a UW graduate.

Minor Requirements

For the Aerospace Studies minor, the student must complete the core AFROTC program plus:

- 3 credit hours in any Management (MGT) course in the current UW catalog **AND**
 - 3 credit hours in one Political Science (POLS) course listed below
- OR**
- 6 credit hours of Political Science courses listed below.

Political Science

- POLS1200 - Non-Western Political Cultures Credits: 3
- POLS2200 - Politics of Europe and the European Union Credits: 3
- POLS2290 - Governments and Politics of Latin America Credits: 3
- POLS 2300
- POLS2310 - Introduction to International Relations Credits: 3
- POLS3220 - Government and Politics of Russia and FSU Credits: 3
- POLS3270 - Governments and Politics of the Middle East Credits: 3
- POLS3300 - Model United Nations Credits: 1-3
- POLS 4220
- POLS4230 - Governments and Politics of Asia Credits: 3
- POLS4255 - Politics of Developing Nations Credits: 3
- POLS 4300
- POLS4340 - International Organizations Credits: 3
- POLS4360 - International Peace and Conflict Credits: 3
- POLS4870 - Seminar in International Relations Credits: 3

Army ROTC Military Science Minor

The military science minor, encompassing 22 credit hours, will prepare selected students for commissioning and establish a sound basis for their future professional development.

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

Minor Requirements

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

- ARMY3010 - Leadership and Tactics I Credits: 3
 - ARMY3020 - Leadership and Tactics II Credits: 3
 - ARMY3025 - Conduct of Training Credits: 1
 - ARMY3026 - Assessment of Training Credits: 1
 - ARMY3030 - Practicum in Leadership Credits: 3
 - ARMY4010 - Dynamics of the Military Organization I Credits: 2
 - ARMY4020 - Dynamics of the Military Organization II Credits: 2
 - ARMY4015 - Staff Officer Practicum I Credits: 1
 - ARMY4016 - Staff Officer Practicum II Credits: 1
 - ARMY4025 - Principles of Training Management Credits: 1
 - ARMY4026 - Preparation of Training Credits: 1
 - HIST2020 - American Military History Credits: 3
- OR**
- HP 4900 Credits: 3

Total Credit Hours: 22

Haub School of Environment and Natural Resources

Helga Otto Haub School of Environment and Natural Resources

John Koprowski, Dean
Bim Kendall House, 804 E. Fremont St.

Phone: (307) 766-5080 FAX: (307) 766-5099
Web site: www.uwyo.edu/haub

Degrees Offered

The Haub School offers undergraduate and graduate degrees, concurrent majors and minors, certificates, and a graduate degree in partnership with the College of Law:

Bachelor of Science in Environmental Systems Science (for baccalaureate students)

Bachelor of Science in Environment & Natural Resources (for baccalaureate students, required concurrent major)

Environment & Natural Resources concurrent major (for baccalaureate or master's students earning a degree from UW)

Bachelor of Science in Outdoor Recreation & Tourism Management (for baccalaureate students)

Environment & Natural Resources minor (for baccalaureate, master's, and doctoral students)

Sustainability minor (for baccalaureate students)

Outdoor Leadership minor (for baccalaureate students)

Master of Science in Environment, Natural Resources & Society (for master's students)

Master of Arts in Environment & Natural Resources (J.D./M.A. for law students only)

Collaborative Practice minor (for master's and doctoral students)

Program Admission

Undergraduate students will apply for admission to the University of Wyoming, and then declare a major or minor within the Haub School at any point during their course of study. To declare a major or minor, students must meet with a Haub School academic advisor.

Graduate students interested in the concurrent major or minor in Environment & Natural Resources (ENR) will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR major or minor. During the Haub School admission process, students will select a Haub School faculty mentor and submit a one-page Statement of Purpose. Current application requirements available online.

Applicants to the M.S. in Environment, Natural Resources & Society must apply directly to the Haub School. Current application requirements are available online.

Applicants to the J.D./M.A. in ENR must apply to both the College of Law and the Haub School. Admission to the joint degree program is contingent on acceptance to the College of Law. Current application requirements are available online.

More information, including complete curricula for each academic offering, is available from the Haub School.

Haub School Requirements

(for undergraduate students earning their primary degree from the Haub School)

Undergraduate students earning a B.S. in Environmental Systems Science, a B.S. in Outdoor Recreation & Tourism Management, and/or a B.S. in Environment & Natural Resources (plus a concurrent major in another field) must fulfill two courses (totaling 6 credit hours) of Haub School Requirements. An undergraduate degree from the Haub School of Environment and Natural Resources indicates that students are liberally educated, with the foundational skills and knowledge to approach local and global contexts from multiple perspectives. The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

- U.S. Diversity (ASD). This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.
- Global Awareness (ASG). Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples of the world, including international systems of commerce, art, science, sustainability, technology, politics, communication, belief, and justice, among others.

Students must earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses. Students enrolled in multiple Haub School programs must earn 12

credits unique to each program. Students must also meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Bachelor of Science in Environmental Systems Science

Environmental Systems Science (ESS) is an interdisciplinary undergraduate degree in environmental science, focusing on the interactions between the various components of Earth and environmental systems, including the biosphere, lithosphere, atmosphere, and anthrosphere.

Students earning a B.S. in Environmental Systems Science will

1. demonstrate a knowledge of interdisciplinary perspective and integrative thinking,
 - a. understand physical and biological components of environmental systems, including the human component;
2. design, conduct, and interpret scientific investigations,
 - a. understand the ethics of scientific investigation,
 - b. demonstrate proficiency in data collection, statistical analysis, and use of information technology tools and modeling;
3. apply systems concepts to problems concerning environmental systems and their components, and construct conceptual and quantitative systems models;
4. examine spatial, temporal, and spatialtemporal patterns in environmental systems, and use information technology tools to depict, project, and communicate such patterns.

Students earning a B.S. degree in ESS complete coursework including:

23+ credit hours of Foundations courses:

1. Intro to Systems Science: ESS 1000
2. Foundation of Biological Sciences (choose one course): AECL 1000, ENR 1200, or LIFE 1010
3. Foundation of Earth Sciences (choose one course): ENR/GEOL 1500, GEOG 1010, or GEOL 1100
4. Foundation of Physical Sciences (complete all courses): CHEM 1020, PHYS 1110, and ESS/GEOL 2000

15+ credit hours of Spheres courses:

1. Anthrosphere (choose one course): ENR/AMST 4030, ENR/ANTH 4310, ENR/GEOG 4040, ENR/HIST 4412, ENR/SOC 3950, GEOG/NAIS 3400, GEOG 3550, or GEOL 3650
2. Atmosphere (choose one course): ATSC 2100, ATSC 2200, ERS 3010, ENR/GEOG 3450, or GEOG 4440
3. Biosphere (choose one course): ENR 4010, 4011, and 4012 (must complete all three courses), ENR/ZOO 2450, GEOG 4460, LIFE 2022, LIFE 2023, LIFE 3400, REWM 2000, REWM 4200, or REWM 4440
4. Lithosphere - Environmental Change (choose one course): ENR/SOIL 3130, ENR/CE 4430, ESS/GEOG 3480, or GEOL 3500
5. Lithosphere - Hydrology & Surface Processes (choose one course): ENR/REWM 4285, GEOG 3010, GEOL 3400, REWM 4700, or REWM 4710

14+ credit hours of Skills & Tools courses:

1. Statistics (choose one course): STAT 2050 or STAT 2070
2. Data Analysis (choose one course): ENR/GEOL 4525, ESS 4001, GEOL 3250, STAT 3050, or ZOO 4400
3. GIS/Remote Sensing (choose one course): GIST 1200, GIST 2140, GIST 2150, GIST 2310, GIST 3111, or GIST/RNEW 4130
4. Applied Experience (1 credit): ESS 4970
5. Capstone: ESS 4950

18+ credit hours in an approved minor* or concurrent major as an area of specialization: Agroecology, Anthropology, Astronomy, Biology, Botany, Chemistry, Environment & Natural Resources, Geography, Geology, Insect Biology, Land Surveying, Paleoenvironmental Studies, Physics, Rangeland Ecology & Watershed Management, Reclamation & Restoration Ecology, Soil Science, Statistics, Sustainability, Wildlife & Fisheries Biology & Management, or Zoology

6+ credit hours of Haub School Requirements courses:

1. U.S. Diversity (choose one)
2. Global Awareness (choose one)

Additional credit hours: Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

**other options available; subject to advisor approval*

Bachelor of Science in Environment & Natural Resources or Undergraduate Major in ENR

Environment & Natural Resources (ENR) students will gain depth and breadth across a range of interdisciplinary fields that engage with complex ENR ideas and challenges, with the goal of integrating across fields of study.

Students can choose to pursue:

- a concurrent major in ENR, earned alongside an approved baccalaureate degree in any other discipline, or
- B.S. in ENR, earned alongside an additional major in any other discipline.

The ENR curriculum is designed to prepare students to demonstrate learning in six key areas:

1. Specialization & Integration - Students will complement their disciplinary depth with broad exposure to ENR-related disciplines and approaches.
2. Spatial & Temporal Perspectives - Students will understand the temporal and spatial characteristics of ENR challenges.
3. Policy - Students will recognize the content and implications of past and current ENR policies.
4. Cultures & Values - Students will appreciate the diversity of ENR perspectives and experiences, including the role of personal and collective value systems and structural inequalities in shaping those systems.

5. Complexity, Risk, & Uncertainty - Students will understand that ENR problems inherently involve complexity, risk, and uncertainty.

6. Professional & Academic Skills - Students will acquire specific skills necessary to succeed in a range of ENR professions and/or graduate and professional school, especially proficiency in written and oral communication, applied problem solving, and collaboration.

All undergraduate students in ENR complete their coursework in conjunction with another major in any discipline.

Students must complete 36+ hours of coursework in ENR, including:

15+ credit hours of ENR Core courses:

1. Foundations of Environmental Science (choose one course): ENR 1200, ENR/GEOL 1500
2. Environment & Society: ENR 2000
3. Approaches to Problem Solving: ENR 3000
4. Environmental Assessment: ENR 4900
5. Applied Experience (2 credits): ENR 4970

21+ credit hours of ENR Disciplines courses:

1. Cultures & Values (choose one course): ENR/AMST 3050, ENR/AMST 4030, ENR/ANTH 4310, ENR/HIST 4412, ENR/HIST 4475, ENR/PHIL 2330, ENR/POLS 3620, ENR/SOC 3950, GEOG/NAIS 3400, GEOG 4570, HLED 4020, ORTM 4901, or GWST 4450
2. Economics (choose one course): AGECE 4720, ECON 2400, ENR/AGECE 3750, ENR 4560, ERS 3400, or GEOG 3050
3. Environmental Management (choose one course): ENR/AMST 4800, ENR/CE 4430, ENR/ZOO 2450, ERS 3010, ENR/GEOG 4040, GEOG 4080, GEOL 3400, GEOL 3650, REWM 2000, or REWM 4700
4. Data Analysis (choose one course): ENR/AGECE 4550, ENR/GEOL 4525, ESS 4001, GIST 2140, GIST 2150, GIST 2310, GIST 3111, GIST/RNEW 4130, or STAT 3050
5. Physical & Natural Science (choose one course): ATSC 2100, ATSC 2200, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/REWM 3100, ENR/REWM 4285, ENR/SOIL 3130, GEOG 4460, ENR/GEOG 3450, ESS/GEOG 3480, GEOG 4440, LIFE 3400, or REWM 4440
6. Policy (choose one course): ENR 3300, ENR 4750, ENR/GEOG/POLS 4051, ENR/GEOG/POLS 4052, INST/POLS 4455, or POLS 4475/INST 4990
7. ENR Electives (choose one course; three credits required): ENR 2300, ENR 2800, ENR 3900, ENR 4450, ENR 4600, ENR 4890, or ENR 4960

An approved major in any discipline

Haub School Requirements: Students earning a B.S. in ENR with their degree awarded from the Haub School must additionally complete 6+ credit hours of Haub School Requirements (U.S. Diversity and Global Awareness).

Additional credit hours: Students complete additional credit hours in consultation with advisor(s) if needed to meet minimum credits to earn a B.S. in ENR (minimum 120 credits, including 42 upper division credits) or to meet primary degree requirements.

Bachelor of Science in Outdoor Recreation & Tourism Management

A B.S. in Outdoor Recreation & Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, entrepreneurial and business management strategies, creating outstanding visitor experiences, and broad understanding of cultural and natural resources. Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership

- a. competency in leading and building diverse, collaborative teams;
- b. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.

2. Professional Practice

- a. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.

3. Communication

- a. ability to manage dynamic relationships and demonstrate best practices in communication.

4. Nimble and Creative Thinking

- a. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.

5. Trans-disciplinarity

- a. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
- b. tourism and outdoor recreation theories and best practices;
- c. entrepreneurial and business management strategies.

6. Place-based and Global Understanding

- a. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 credit hours of ORTM Core courses:

1. Recreation & Tourism: ORTM 1000
2. Natural & Cultural Resources: ORTM 1050
3. Customer Service & Hospitality: ORTM 2000
4. Program Planning, Design, & Delivery: ORTM 2050
5. Tourism Theory & Practice: ORTM 3000
6. Operations, Management & Env. Stewardship: ORTM 3050

20+ credit hours in ORTM Foundations courses:

1. Statistics: STAT 2050 or STAT 2070
2. Business Fundamentals (complete one course from each area):
 - Economics (choose one course): ECON 1010, ECON 1020, or ECON 1200
 - Accounting: ACCT 2010
 - Marketing: MKT 3210
3. Environment & Natural Resources
 - Environmental Science (choose one course): ENR 1200, ENR/GEOL 1500, GEOG 1010, or GEOL 1100
 - Conservation & Sustainability (choose one course): ENR 2300, ENR 4560, GEOL 1600, GEOG 4040, or RNEW 1000
4. People & Culture
 - Social Science (choose one course): GEOG 1000, GEOG 1020, PSYC 1000, or SOC 1000
 - Culture/Diversity (choose one course): AMST 2010, ENR/POLS 3620, ENR 2000, GEOG/NAIS 3400, HIST/NAIS 2290, NAIS 1001, NAIS 1030, or NAIS 1350

13+ credit hours in Synthesis & Applied Experience:

1. Professional Semester (complete all courses in the same semester): ORTM 4900, ORTM 4901, ORTM 4902, and ORTM 4903
2. Applied Experience (one credit minimum): ORTM 4970*

**students must complete a 400- hour internship experience prior to enrolling in ORTM 4970*

19+ credit-hour Concentration (choose one):**• Business & Hospitality Management**

1. Legal Environment of Business: MGT 1040
2. Management & Organization: MGT 3210
3. Hospitality Operations Management: HOSP 4800
4. Management (choose one course): MGT 3410, MGT 3420, or MKT 4590
5. Sales & Marketing (choose one course): SELL 3310, MKT 4230, MKT 4240, MKT 4440, or MKT 4520
6. Approved Electives (choose two courses): ECON 3010, ENTR 2700, ENTR 3700, FIN 3250, HOSP 3000, or MGT 3110

• Management of Recreation Resources

1. Environmental or Biological Science (choose one course): ENR 1200 or LIFE 1010
2. Resource Management (choose one course): ENR/ZOO 2450, ENR/ GEOG 4040, GEOG 4080, GEOL 3650, REWM 2000, or REWM 4700

3. Human Dimensions (choose one course): ENR 4960, ENR/AGEC 4450, ENR/AMST 3050, ENR/ ANTH 4310, ENR/HIST 4412, ENR/POLS 3620, ENR/SOC 3950, HIST 4475, or MKT 4240
4. Law & Policy (choose one course): ENR/GEOG/ POLS 4051, ENR/GEOG/POLS 4052, or ENR 4750
5. Planning (choose one course): AGECE 4660, AGECE 4720, ECON 2400, ENR/AGECE 3750, ENR 4560, or ERS 3400
6. Geographic Information Systems or Analytics (choose one course): ENR/AGECE 4550, ENR/GEOL 4525, ESS 4001, GIST 2140, GIST 2150, GIST 2310, GIST 3111, GIST/RNEW 4130, or STAT 3050

• **Cultural & International Tourism**

1. Global Tourism: ORTM 4050
2. International Experience: students must complete a faculty-led, semester-, or yearlong study abroad course or experience
3. Cultural Resources (choose one course): ENR/SOC 3950, GEOG/NAIS 3400, GEOG 4570, INST 3000, INST 3200, INST 4060, INST 4350, or POLS 4475
4. The American West (choose one course): GEOG 4500, GEOG 4502, HIST 2389, HIST 4020, HIST/NAIS 2290, HIST/NAIS 3000, HIST/NAIS 4000, or NAIS 3200
5. Language (complete two consecutive language or ASL courses): LANG 1010 and LANG 1020
6. Cultural/International Museum Studies (choose one course): ANTH 2200, ANTH 2600, ANTH 3410, ANTH/AMST 2700, INST 2230, INST 2240, INST 2250, INST 2280, INST 2350, or POLS 2200

• **Outdoor Recreation Leadership**

1. Outdoor Leadership: ENR/ORTM 2800
2. Management & Organization: MGT 3210
3. Wilderness First Responder and CPR certifications*: ENR 3900 Wilderness Medicine or provide proof of certification to advisor
4. Leadership (choose one course): AGRI 3000, AGRI 4700, CNSL 2200, CNSL 3010, ENR 4950, FCSC 4117, or GWST 1900
5. Business (choose one course): ENTR 2700, ENTR 3700, FIN 3250, MGT 1040, MGT 3110, MGT 4500, or MKT 4590
6. Law & Policy (choose one course): ENR/GEOG/POLS 4051, ENR/GEOG/POLS 4052, or ENR 4750
7. Human Dimensions (choose one course): ENR 4560, ENR 4960, ENR/AGECE 4450, ENR/AMST 3050, ENR/ANTH 4310, ENR/HIST 4412, HIST 4475, ENR/POLS 3620, ENR/SOC 3950, or MKT 4240
8. Natural History: BOT 3100, BOT 4280, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/AMST 3050, ENR/GEOG 3450, GEOG 4460, GEOG/NAIS 3400, or GEOG 4000

• **Creative Studies in Recreation & Tourism:**

self-designed program of study requires approval from advisor; 19+ credit hours

6+ credit hours of Haub School Requirements courses:

1. U.S. Diversity (choose one)

2. Global Awareness (choose one)

Additional credit hours: Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

**certifications must be current at time of graduation.*

Undergraduate Minor in ENR

An ENR minor may accompany any primary field of study. The ENR core, plus one elective course, fulfills the 18 credit hour requirement for the minor:

15+ credit hours of ENR Core courses:

1. Foundations of Environmental Science (choose one course): ENR 1200, ENR/GEOL 1500
2. Environment & Society: ENR 2000
3. Approaches to Problem Solving: ENR 3000
4. Environmental Assessment: ENR 4900
5. Applied Experience (2 credits): ENR 4970

3+ credit hours of ENR Electives

(choose one; three credits required): ENR 2300, ENR 2800, ENR 3900, ENR 4450, ENR 4600, ENR 4890, or ENR 4960

Undergraduate Minor in Sustainability

The sustainability minor is available to any undergraduate student at the University of Wyoming. The minor prioritizes systems thinking, civic engagement, and personal development rooted in sustainability for everyday challenges.

Students completing the sustainability minor will be expected to:

1. demonstrate a theoretical and historical understanding of sustainability;
2. develop a model of sustainability informed by personal values and integrated into student's worldview;
3. think holistically about consequences of actions and intellectually respond to perspectives of sustainability outside their own, as well as explore and evaluate the implications of sustainability values;
4. develop and implement sustainability solutions in their community and have the ability to apply sustainability principles to a range of disciplines and professional settings.

To fulfill the requirements for the minor, students must earn 18 credits hours:

9 credit hours of Sustainability Core courses:

1. Foundations of Sustainability: ENR 2300
2. Ethics & Justice (choose one): ENR/PHIL 2330, ENR/POLS 3620, HLED 4020, NAIS 1030, PHIL 3250, or GWST 4450
3. Campus Sustainability: ENR 4600

9+ credit hours of Sustainability Electives courses

(choose three courses from any of the following categories):

1. Culture & Society: AMST 3050, AMST 4030, AMST 4800, ENR/ANTH 4310, ENR/SOC 3950, GEOG/NAIS 3400, GEOG 4310, GEOG 3550, or GEOL 3650
2. Economics & Policy: AGECE/ENR 3750, AGECE 4720, ENR 4560, ENR 4750, ENR/GEOG/POLS 4051, ERS 3400, or INST/POLS 4455
3. Energy & Environment: ATSC 2100, ARE 2410, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/CE 4430, ENR/GEOG 3450, ENR/REWM 3100, ERS 3010, ERS 4050, ESS/GEOG 3480, GEOG 4440, GEOL 1600, GEOL 3600, ME 4470, REWM 4200, or SOIL 3130
4. Food Systems: AECL 1000, AGECE 3860, ANTH 4260, BOT 3100, FCSC 3147, HLED 4020, PLNT 4020, or PLNT 4120

Undergraduate Minor in Outdoor Leadership

The outdoor leadership minor is available to any undergraduate student at the University of Wyoming. Students earning the minor will study leadership, ethics, field ecology, outdoor recreation, and wilderness medicine.

Students earning a minor in outdoor leadership will:

1. develop an understanding of leadership theories, including leadership movements, qualities, styles, and models;
2. identify and evaluate the cultural and environmental dimensions of outdoor leadership, including moral and ethical responsibilities, the fundamentals of ecological systems, and the human impact on the natural world;
3. demonstrate and apply outdoor leadership competency in a practical leadership role;
4. plan, implement, supervise, and analyze a high-quality, safe outdoor adventure and/or educational program;
5. earn and maintain a professional certification of Wilderness First Responder.

To fulfill the requirements for the minor, students must complete the following, earning 17+ credits in specified categories:

6+ credit hours of Outdoor Leadership Foundations courses:

1. Intro to Outdoor Leadership: ENR/ORTM 2800
2. Environmental Science (choose one): ENR 1200, ENR/GEOL 1500, ENR/GEOG 4040, AECL 1000, GEOG 1010, GEOL 1100, or LIFE 3400

8+ credit hours of Concepts courses:

1. Field Ecology (choose one): ENR 1200, ENR 4010, 4011, and 4012 (must complete all three courses), or ENR 4960
2. Leadership (choose one): AGRI 3000, AGRI 4700, CNSL 2200, CNSL 3010, ENR 4560, ENR 4950, FCSC 4117, or GWST 1900
3. Ethics & Culture (choose one): ENR/AMST 3050, ENR/ANTH 4310, ENR/PHIL 2330, ENR/POLS 3620, ENR/SOC 3950, GEOG/NAIS 3400, ORTM 1050, or ORTM 4901

3+ credit hours of Applied Experience

(choose from the following; minimum three credits required): ENR 3700, ENR 4960, or ENR 4970

Wilderness First Responder and CPR certifications*: ENR 3900 Wilderness Medicine or provide proof of certification to advisor

**certifications must be current at time of graduation*

Master of Science in Environment, Natural Resources & Society

Students earning the master of science in Environment, Natural Resources & Society (ENRS) will consult a Haub School advisor to design a program of study tailored to meet their educational goals. Students take courses and complete a Plan A research thesis or Plan B research project focusing on issues pertinent to environmental or natural resources management or policy. Graduates of this program will:

- develop an interdisciplinary and collaborative mindset;
- experience critical engagement with community stakeholders and decision-makers;
- excel in team-based collaborative environments;
- gain experience in relevant and emergent research methods and practices;
- demonstrate excellent written, oral, and digital communication across a range of audiences and purposes, including developing expertise in public engagement;
- apply conceptual, critical, and creative thought to relevant environmental and natural resource issues; and,
- analyze and evaluate complex systems that contribute to inclusive, sound, and well-informed decisions.

Students must earn a minimum of 32 credit hours for the Plan A thesis option and 30 credit hours for the Plan B option:

8 credit hours in ENRS core courses:

1. Orientation to ENRS: ENR 5001 (2 credits)
2. Foundations of ENRS: ENR 5100 (3 credits)
3. Collaborative Practicum: ENR 5921 (3 credits; may be completed for 1+ credit hours over multiple semesters)

4 credit hours of Plan A thesis credit:

1. ENRS Thesis: ENR 5960

Or, 2 credit hours of Plan B thesis credit:

1. ENRS Plan B Thesis: ENR 5961

17 credit hours in ENRS Electives:

Students will consult with their Haub School advisor to choose electives that support their plan of study and Plan A or Plan B thesis. Choose from any of the following categories:

1. Social & Cultural Sciences: AGEC 4720, AGEC 5660, AMST 5030, ANTH 5260, ECON 5410, ENR 5560, ENR 5600, ENR 5920, ENR/ANTH 4310, ENR/GEOG 4040, GEOG 4340, GEOG 5310, GEOG 5570, GEOG 5590, GWST 5450, NASC 5650, or REWM 5103

2. Law & Policy: ENR 5750, ENR 5890, ENR/GEOG/POLS 4052, INST/POLS 5455, LAW 6660, LAW 6700, LAW 6800, LAW 6860, LAW 6865, POLS 5051, or POLS 5475

3. Natural & Physical Sciences: BOT 5280, BOT 5700, BOT 5775, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/REWM 5285, ENR/PATB 5240, GEOG 5440, GEOG 5450, PLNT 5120, REWM 5000, REWM 5400, REWM 5580, REWM 5710, REWM 5750, RNEW 5500, or SOIL 5150

4. Communication: ENR 5270, ENR/AGEC 5450, ENR 5870

5. Quantitative & Qualitative Methods: BOT 5550, COJO 5070, ENR/AGEC 5550, ENR/GEOL 5525, GIST 5050, GIST 5100, GIST 5150, GIST/ RNEW 5130, or STAT 5050

Plan A or Plan B Project Research:

1. Both Plan A and Plan B theses lead to original thought, synthesis, or integration of relevant elements of scholarship on issues pertinent to environmental and natural resources management or policy. The Plan A thesis will incorporate original research and data analysis on an applied environmental or natural resource management problem. The Plan B thesis project is somewhat more flexible and may take a variety of forms. Students will consult their major advisor and graduate committee on the form and content of the Plan A and Plan B thesis.

Graduate Major in ENR

The ENR major is completed in tandem with any UW graduate degree. Students earning the ENR graduate major will take classes and conduct research in such fields as cultural studies, ecology, economics, law and politics, and management to:

- be conversant across a range of field of environmental significance, spanning science and technology to human dimensions of natural resources;
- understand and evaluate the relationship of your primary discipline to other relevant ENR fields; and
- produce discourse, scholarship, and practical solutions that address the complexity of ENR challenges.

In addition to degree requirements of the student's home department, students must complete 15 credit hours:

6 credit hours in ENR Core courses:

1. Foundations of ENRS: ENR 5100
2. ENR Policy in Practice: ENR 5900

9+ credit hours in ENR Electives courses (choose three+ courses from any of the following categories):

1. Human Dimensions: AGECE 4720, AGECE 5660, AMST 5030, ANTH 5260, ECON 5410, ENGL 4075, ENR 5450, ENR 5560, ENR 5600, ENR/ ANTH 4310, ENR/GEOG 4040, GEOG 4340, GEOG 5310, GEOG 5570, GEOG 5590, NASC 5650, REWM 5103, or GWST 5450

2. Law & Policy: ENR 5750, ENR/GEOG/ POLS 4052, INST/POLS 5455, LAW 6660, LAW 6700, LAW 6800, LAW 6860, LAW 6865, POLS 5051, or POLS 5475

3. Natural & Physical Sciences: BOT 5280, BOT 5700, BOT 5775, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/REWM 5285, ENR/PATB 5240, GEOG 5440, GEOG 5450, PLNT 5120, REWM 5000, REWM 5580, REWM 5710, REWM 5750, REWM 5400, RNEW 5500, or SOIL 5150

4. Quantitative & Qualitative Methods: BOT 5550, ENR/AGECE 5550, ENR/GEOL 5525, GIST 5050, GIST 5100, GIST 5150, GIST/RNEW 5130, or STAT 5050

Additional Program Requirements:

1. Statement of Purpose: Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.
2. Cumulative Learning Analysis: Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
3. Program Completion Letter: Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Juris Doctor/Master of Arts in ENR

Students working toward the J.D./M.A. in ENR consult a Haub School advisor to design a program of study tailored to meet their educational goals. Students must earn a minimum of 30 credits for the master's degree:

9 credit hours in ENR Core courses:

1. Foundations of ENRS: ENR 5100
2. ENR Policy in Practice: ENR 5900
3. Plan B Writing Seminar (1 credit): ENR 5890 ENR Topics: Thesis
Typically completed in the second semester of the second year.
4. Plan B Thesis: JD/MA (2 credits): ENR 5961

9 credit hours in ENR Electives courses

(choose three+ courses in consultation with Haub School advisor):

1. Humanities: AMST 5030, ANTH 5620, ENGL 4075, ENR 5560, ENR 5600, ENR/GEOG 4040, GEOG 5310, NASC 5650, or GWST 5450
2. Environmental Science: BOT 5280, BOT 5700, BOT 5775, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/ZOO 5240, ENR/REWM 5285, GEOG 5440, GEOG 5450, GEOG 5880, PLNT 5120, REWM 5580, REWM 5710, RNEW 5400, RNEW 5500, or SOIL 5150
3. Social Science: AGEC 4720, AGEC 5660, ECON 5410, ENR 5750, ENR/AGEC 5450, ENR/AGEC 5550, ENR 5050, ENR/GEOL 5525, ENR/POLS 5051, GEOG 5325, GIST 5130, GIST 5211, INST/POLS 5445, INST/POLS 5455, INST/POLS 5475, POLS 5710, REWM 5000, REWM 5103, or STAT 5050

Students must take a minimum of 9 credits outside the College of Law. Courses familiarize students with non-law ENR perspectives and approaches. Students work with a Haub School advisor to select courses from an approved list.

12 credit hours in Environmental and Natural Resources Law Specialization courses:

Students will take 12 credits to gain depth in ENR law, selected from the following options in consultation with Haub School advisor. Special approval may be granted for special topics courses.

LAW 6510, LAW 6660, LAW 6700, LAW 6790, LAW 6800, LAW 6860, LAW 6890, LAW 6910, LAW 6991, LAW 6992, LAW 6915, LAW 6915, or LAW 6500

Plan B Project research:

1. Students must complete a cumulative work of scholarship known as the Plan B project. The Plan B offers more flexibility than a traditional thesis in content and format. Students will be required to choose a Haub School faculty committee chair and at least two additional committee members. Committee composition is subject to approval by the program chair and Dean of the Haub School. A public oral defense of the project is required. All members of the student's committee must be present at the defense. The student's committee has to give final approval of the student's Plan B thesis and defense via a report of final examination.

Graduate Minor in ENR

The ENR graduate minor is designed for doctoral students in any discipline who want to broaden their perspectives, experiences, and critical thinking skills to complex environmental problems. The minor is also available to master's students.

In addition to degree requirements of the student's home department, students must complete 12 credit hours:

6 credit hours in ENR Core courses:

1. Foundations of ENRS: ENR 5100
2. ENR Policy in Practice: ENR 5900

6+ credit hours in ENR Electives courses (choose three+ courses from any of the following categories):

1. Human Dimensions: AGEC 4720, AGEC 5660, AMST 5030, ANTH 5260, ECON 5410, ENGL 4075, ENR 5450, ENR 5560, ENR 5600, ENR/ ANTH 4310, ENR/GEOG 4040, GEOG 4340, GEOG 5310, GEOG 5570, GEOG 5590, NASC 5650, REWM 5103, or GWST 5450
2. Law & Policy: ENR 5750, ENR/GEOG/ POLS 4052, INST/POLS 5455, LAW 6660, LAW 6700, LAW 6800, LAW 6860, LAW 6865, POLS 5051, or POLS 5475
3. Natural & Physical Sciences: BOT 5280, BOT 5700, BOT 5775, ENR 4010, 4011, and 4012 (must complete all three courses), ENR/REWM 5285, ENR/PATB 5240, GEOG 5440, GEOG 5450, PLNT 5120, REWM 5000, REWM 5580, REWM 5710, REWM 5750, REWM 5400, RNEW 5500, or SOIL 5150
4. Quantitative & Qualitative Methods: BOT 5550, ENR/AGEC 5550, ENR/GEOL 5525, GIST 5050, GIST 5100, GIST 5150, GIST/RNEW 5130, or STAT 5050

Additional Program Requirements:

1. Statement of Purpose: Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.
2. Cumulative Learning Analysis: Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
3. Program Completion Letter: Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Graduate Minor in Collaborative Practice

The Collaborative Practice minor is designed to provide students with skills in designing, organizing, facilitating, and evaluating collaborative decision-making processes. Students pursuing the Collaborative Practice minor will:

- build process competencies in collaborative decision making and problem solving, and
- deepen their knowledge in the application of collaborative processes in specific contexts (natural resources, health, education, business, etc.).

Collaborative Practice minor students who are currently working towards an ENR graduate major may not count ENR 5290 or ENR 5291 towards their ENR major. ENR 5450 (Negotiation) and one elective (approved for both the Collaborative Practice minor and the ENR major) may count for both. In addition to degree requirements of the student's home department, students must complete 12 credit hours:

9 credit hours in Collaborative Practice Core courses:

1. Negotiation: ENR 5450 (3 credits)
2. Principles & Methods in Collaborative Practice: ENR 5920 (3 credits)
3. Collaborative Practicum: ENR 5921 (3 credits; may be completed for 1+ credit hours over multiple semesters)

3 credit hours in Collaborative Practice Electives

Students will consult with their Haub School advisor to choose an elective to deepen their process competencies or build knowledge for application of collaborative governance in specific contexts (natural resources, health, education, business, etc.). Context specific electives should focus on policy within that context.

Major

Environment & Natural Resources, B.S. or Concurrent Major

Environment & Natural Resources (ENR) students will gain depth and breadth across a range of interdisciplinary fields that engage with complex ENR ideas and challenges, with the goal of integrating across fields of study.

Students can choose to pursue:

- a concurrent major in ENR, earned alongside an approved baccalaureate degree in any other discipline, or
- B.S. in ENR, earned alongside an additional major in any other discipline.

The ENR curriculum is designed to prepare students to demonstrate learning in six key areas:

1. Specialization & Integration - Students will complement their disciplinary depth with broad exposure to ENR-related disciplines and approaches.
2. Spatial & Temporal Perspectives - Students will understand the temporal and spatial characteristics of ENR challenges.
3. Policy - Students will recognize the content and implications of past and current ENR policies.
4. Cultures & Values - Students will appreciate the diversity of ENR perspectives and experiences, including the role of personal and collective value systems and structural inequalities in shaping those systems.
5. Complexity, Risk, & Uncertainty - Students will understand that ENR problems inherently involve complexity, risk, and uncertainty.

6. Professional & Academic Skills - Students will acquire specific skills necessary to succeed in a range of ENR professions and/or graduate and professional school, especially proficiency in written and oral communication, applied problem solving, and collaboration.

All undergraduate students in ENR complete their coursework in conjunction with another major in any discipline.

Students must complete 36+ hours of coursework in ENR, including:

15+ Credit Hours of ENR Core Courses:

Foundations of Environmental Science

(Choose one course):

- ENR1200 - Environment Credits: 4
- ENR1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4

Environment & Society

- ENR2000 - Environment and Society Credits: 3

Approaches to Problem Solving

- ENR3000 - Approaches to ENR Problem Solving Credits: 3

Environmental Assessment

- ENR4900 - ENR Policy in Practice Credits: 3

Applied Experience (2 credits)

- ENR4970 - ENR Internship Credits: 1-6

21+ Credit Hours of ENR Disciplines Courses:

Cultures & Values

(Choose one course):

- ENR3050 - Cultures of Nature in the United States Credits: 3
- AMST3050 - Cultures of Nature in the United States Credits: 3
- ENR4030 - Ecology of Knowledge Credits: 3
- AMST4030 - Ecology of Knowledge Credits: 3
- ENR4310 - Environmental Anthropology Credits: 3
- ANTH4310 - Environmental Anthropology Credits: 3
- ENR4412 - Global Environment History Credits: 3

- HIST4412 - Global Environment History Credits: 3
- HIST4475 - American Environmental History Credits: 3
- ENR2330 - Environmental Ethics Credits: 3
- PHIL2330 - Environmental Ethics Credits: 3
- ENR3620 - Environmental Justice Credits: 3
- POLS3620 - Environmental Justice Credits: 3
- ENR3950 - Environmental Sociology Credits: 3
- SOC3950 - Environmental Sociology Credits: 3
- GEOG3400 - Traditional Ecological Knowledge Credits: 3
- NAIS3400 - Traditional Ecological Knowledge Credits: 3
- GEOG4570 - Cultural Geography Credits: 3
- HLED4020 - Food, Health, and Justice Credits: 3
- ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management Credits: 3
- GWST4450 - Ecofeminism Credits: 3

Economics

(Choose one course):

- AGE4720 - Water Resource Economics Credits: 3
- ECON2400 - Economics of the Environment Credits: 3
- ENR3750 - Natural Resource Planning and Economics Credits: 3
- AGE3750 - Natural Resource Planning and Economics Credits: 3
- ENR4560 - Conservation Entrepreneurship Credits: 3
- ERS3400 - Energy Markets & Policy Credits: 3
- GEOG3050 - Economic Geography Credits: 3

Environmental Management

(Choose one course):

- ENR4800 - Historic Preservation Credits: 3
- AMST4800 - Historic Preservation Credits: 3
- ENR4430 - Green Chemistry and Global Environmental Problems Credits: 3
- CE4430 - Green Chemistry and Global Environmental Problems Credits: 3
- ENR2450 - Fish and Wildlife Management in the Anthropocene Credits: 4
- ZOO2450 - Fish and Wildlife Management in the Anthropocene Credits: 4
- ERS3010 - Air Quality Management Credits: 3
- ENR4040 - Conservation of Natural Resources Credits: 3
- GEOG4040 - Conservation of Natural Resources Credits: 3
- GEOG4080 - Management of Major River Basins Credits: 3
- GEOL3400 - Geologic Hazards: A Historical and Scientific Review Credits: 4
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4
- REWM2000 - Principles of Rangeland Management Credits: 3
- REWM4700 - Wildland Watershed Management Credits: 3

Data Analysis

(Choose one course):

- ENR4550 - Negotiation Analysis Credits: 3
- AGE4550 - Negotiation Analysis Credits: 3
- ENR4525 - Environmental Data Analysis Credits: 4
- GEOL4525 - Environmental Data Analysis Credits: 4
- ESS4001 - Analysis of Nature's Data Credits: 3
- GIST2310 - Intro to Geographic Information Systems Credits: 4
- GIST2150 - Introduction to Programming in Geospatial Information Science and Technology Credits: 3
- GIST2140 - Survey of Remote Sensing Applications Credits: 3
- GIST4130 - Applied Remote Sensing for Agricultural Management Credits: 3
- RNEW4130 - Applied Remote Sensing for Agricultural Management Credits: 3
- STAT3050 - Statistical Methods Credits: 3

Physical & Natural Science

(Choose one course):

- ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate Credits: 3
- ATSC2200 - Severe and Unusual Weather Credits: 3
- ENR3100 - Principles of Wildland Water Quality Credits: 3
- REWM3100 - Principles of Wildland Water Quality Credits: 3
- ENR4285 - Wildland Hydrology Credits: 3
- REWM4285 - Wildland Hydrology Credits: 3
- ENR3130 - Environmental Quality Credits: 3
- SOIL3130 - Environmental Quality Credits: 3
- GEOG4460 - Biogeography Credits: 3
- ENR3450 - Weather and Climate Credits: 3
- GEOG3450 - Weather and Climate Credits: 3

- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
- AND**
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
- AND**
- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1

- ESS3480 - Environmental Change Credits: 3
- GEOG3480 - Environmental Change Credits: 3
- GEOG4440 - Advanced Global Climate Variability Credits: 3
- LIFE3400 - General Ecology Credits: 3
- REWM4440 - Applied Fire Ecology Credits: 3

Policy

(Choose one course):

- ENR3300 - Environmental Policy, Conservation and Development in India Credits: 3
- ENR4750 - ENR Law and Policy Credits: 3
- ENR4051 - Environmental Politics Credits: 3
- GEOG4051 - Environmental Politics Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- ENR4052 - Federal Land Politics Credits: 3

- GEOG4052 - Federal Land Politics Credits: 3
- POLS4052 - Federal Land Politics Credits: 3
- INST4455 - Energy Security Credits: 3
- POLS4455 - Energy Security Credits: 3
- POLS4475 - Politics of Natural Resources in Latin America Credits: 3
- INST4990 - Topics: Credits: 1-6

ENR Electives

(Choose one course; three credits required):

- ENR2300 - Foundations of Sustainability Credits: 3
- ENR2800 - Introduction to Outdoor Leadership Credits: 3
- ENR3900 - Seminar in Environment and Natural Resources Credits: 1-3
- ENR4450 - Negotiation Credits: 3
- ENR4600 - Campus Sustainability Credits: 3
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6
- ENR4960 - Field Studies in: Credits: 1-6

An Approved Major in Any Discipline

All undergraduate students in ENR complete their coursework in conjunction with another major in any discipline.

Students can choose to pursue:

- a concurrent major in ENR, earned alongside an approved baccalaureate degree in any other discipline, or
- B.S. in ENR, earned alongside an additional major in any other discipline.

Haub School Requirements (for B.S. ENR only)

Students earning a B.S. in ENR with their degree awarded from the Haub School must additionally complete 6 credit hours of Haub School Requirements:

1. U.S. Diversity (choose one)
2. Global Awareness (choose one)

Additional Requirements:

Students complete additional credit hours in consultation with advisor(s) if needed to meet minimum credits to earn a B.S. in ENR (minimum 120 credits, including 42 upper division credits) or to meet primary degree requirements.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Environmental Systems Science, B.S.

Environmental Systems Science (ESS) is an interdisciplinary undergraduate degree in environmental science, focusing on the interactions between the various components of Earth and environmental systems, including the biosphere, lithosphere, atmosphere, and anthrosphere.

Students earning a B.S. in Environmental Systems Science will

- demonstrate a knowledge of interdisciplinary perspective and integrative thinking,
- understand physical and biological components of environmental systems, including the human component;
- design, conduct, and interpret scientific investigations,
- understand the ethics of scientific investigation,
- demonstrate proficiency in data collection, statistical analysis, and use of information technology tools and modeling;
- apply systems concepts to problems concerning environmental systems and their components, and construct conceptual and quantitative systems models;
- examine spatial, temporal, and spatial-temporal patterns in environmental systems, and use information technology tools to depict, project, and communicate such patterns.

Students earning a B.S. degree in ESS complete coursework including:

23+ Credit Hours of Foundations Courses:

Intro to Systems Science

- ESS1000 - Wyoming in the Earth System Credits: 3

Foundation of Biological Sciences

(Choose one course):

- AECL1000 - Agroecology Credits: 4
- ENR1200 - Environment Credits: 4
- LIFE1010 - General Biology Credits: 4

Foundation of Earth Sciences

(Choose one course):

- ENR1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOG1010 - Introduction to Physical Geography Credits: 4
- GEOL1100 - Physical Geology Credits: 4

Foundation of Physical Sciences

(Complete all courses):

- CHEM1020 - General Chemistry I Credits: 4
- PHYS1110 - General Physics I Credits: 4

- ESS2000 - Geochemical Cycles and the Earth System Credits: 4
- OR**
- GEOL2000 - Geochemical Cycles and the Earth System Credits: 4

15+ Credit Hours of Spheres Courses:

Anthrosphere

(Choose one course):

- ENR4030 - Ecology of Knowledge Credits: 3
- AMST4030 - Ecology of Knowledge Credits: 3
- ENR4310 - Environmental Anthropology Credits: 3
- ANTH4310 - Environmental Anthropology Credits: 3
- ENR4040 - Conservation of Natural Resources Credits: 3
- GEOG4040 - Conservation of Natural Resources Credits: 3
- ENR4412 - Global Environment History Credits: 3
- HIST4412 - Global Environment History Credits: 3
- ENR3950 - Environmental Sociology Credits: 3
- SOC3950 - Environmental Sociology Credits: 3
- GEOG3400 - Traditional Ecological Knowledge Credits: 3
- NAIS3400 - Traditional Ecological Knowledge Credits: 3
- GEOG3550 - Natural Hazards and Society Credits: 3
- GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4

Atmosphere

(Choose one course):

- ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate Credits: 3
- ATSC2200 - Severe and Unusual Weather Credits: 3
- ERS3010 - Air Quality Management Credits: 3
- ENR3450 - Weather and Climate Credits: 3
- GEOG3450 - Weather and Climate Credits: 3
- GEOG4440 - Advanced Global Climate Variability Credits: 3

Biosphere

Must Complete all Three Courses

- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1

OR Choose One Course:

- ENR2450 - Fish and Wildlife Management in the Anthropocene Credits: 4
- ZOO2450 - Fish and Wildlife Management in the Anthropocene Credits: 4

- GEOG4460 - Biogeography Credits: 3
- LIFE2022 - Animal Biology Credits: 4
- LIFE2023 - Biology of Plants and Fungi Credits: 4
- LIFE3400 - General Ecology Credits: 3
- REWM2000 - Principles of Rangeland Management Credits: 3
- REWM4200 - Reclamation of Drastically Disturbed Lands Credits: 3
- REWM4440 - Applied Fire Ecology Credits: 3

Lithosphere - Environmental Change

(Choose one course):

- ENR3130 - Environmental Quality Credits: 3
- SOIL3130 - Environmental Quality Credits: 3
- ENR4430 - Green Chemistry and Global Environmental Problems Credits: 3

- ESS3480 - Environmental Change Credits: 3
- GEOG3480 - Environmental Change Credits: 3
- GEOL3500 - Global Change: A Geological Perspective Credits: 4

Lithosphere - Hydrology & Surface Processes

(Choose one course):

- ENR4285 - Wildland Hydrology Credits: 3
- REWM4285 - Wildland Hydrology Credits: 3
- GEOG3010 - Geomorphology of Earth's Dynamic Landscapes Credits: 3
- GEOL3400 - Geologic Hazards: A Historical and Scientific Review Credits: 4
- REWM4700 - Wildland Watershed Management Credits: 3
- REWM4710 - Watershed Water Quality Management Credits: 3

14+ Credit Hours of Skills & Tools Courses:

Statistics

(Choose one course):

- STAT2050 - Fundamentals of Statistics Credits: 4
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Data Analysis

(Choose one course):

- ENR4525 - Environmental Data Analysis Credits: 4
- GEOL4525 - Environmental Data Analysis Credits: 4
- ESS4001 - Analysis of Nature's Data Credits: 3
- GEOL3250 - Geosciences and Computers Credits: 4
- STAT3050 - Statistical Methods Credits: 3

- ZOO4400 - Population Ecology Credits: 3

GIS/Remote Sensing

(Choose one course):

- GIST1200 - Geospatial Foundations Credits: 3
- GIST2310 - Intro to Geographic Information Systems Credits: 4
- GIST2140 - Survey of Remote Sensing Applications Credits: 3
- GIST2150 - Introduction to Programming in Geospatial Information Science and Technology Credits: 3
- GIST4130 - Applied Remote Sensing for Agricultural Management Credits: 3
- RNEW4130 - Applied Remote Sensing for Agricultural Management Credits: 3

Applied Experience (1 credit)

- ESS4970 - Internship in Earth System Science Credits: 1-6

Capstone

- ESS4950 - Exploring the Earth System Credits: 3

18+ Credit Hours in an Approved Minor

18+ credit hours in an approved minor* or concurrent major as an area of specialization: Agroecology, Anthropology, Astronomy, Biology, Botany, Chemistry, Environment & Natural Resources, Geography, Geology, Insect Biology, Land Surveying, Paleoenvironmental Studies, Physics, Rangeland Ecology & Watershed Management, Reclamation & Restoration Ecology, Soil Science, Statistics, Sustainability, Wildlife & Fisheries Biology & Management, or Zoology

** other options available; subject to advisor approval*

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one)
- Global Awareness (choose one)

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Business & Hospitality Management Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, entrepreneurial and business management strategies, creating outstanding visitor experiences, and broad understanding of cultural and natural resources. Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

- Leadership
- competency in leading and building diverse, collaborative teams;
- application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
- Professional Practice
- ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
- Communication
- ability to manage dynamic relationships and demonstrate best practices in communication.
- Nimble and Creative Thinking
- ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
- Trans-disciplinarity
- synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
- tourism and outdoor recreation theories and best practices;
- entrepreneurial and business management strategies.
- Place-based and Global Understanding
- skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

- ORTM1000 - Foundations of Recreation and Tourism Credits: 3
- ORTM1050 - Natural and Cultural Resources of the West Credits: 3
- ORTM2000 - Foundations of Customer Service and Hospitality Credits: 3
- ORTM2050 - Program Planning, Design and Delivery Credits: 3
- ORTM3000 - Tourism Theory and Practice Credits: 3
- ORTM3050 - Operations, Management and Environmental Stewardship Credits: 3

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Business Fundamentals:

0600

- GIST4130 - Applied Remote Sensing for Agricultural Management Credits: 3
- RNEW4130 - Applied Remote Sensing for Agricultural Management Credits: 3
- STAT3050 - Statistical Methods Credits: 3

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one)
- Global Awareness (choose one)

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Outdoor Recreation Leadership Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, entrepreneurial and business management strategies, creating outstanding visitor experiences, and broad understanding of cultural and natural resources. Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

- Leadership
 - competency in leading and building diverse, collaborative teams;
 - application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
- Professional Practice
 - ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
- Communication
 - ability to manage dynamic relationships and demonstrate best practices in communication.
- Nimble and Creative Thinking
 - ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
- Trans-disciplinarity
 - synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 - tourism and outdoor recreation theories and best practices;
 - entrepreneurial and business management strategies.
- Place-based and Global Understanding
 - skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

- ORTM1000 - Foundations of Recreation and Tourism Credits: 3
- ORTM1050 - Natural and Cultural Resources of the West Credits: 3
- ORTM2000 - Foundations of Customer Service and Hospitality Credits: 3
- ORTM2050 - Program Planning, Design and Delivery Credits: 3

0616

- ORTM3000 - Tourism Theory and Practice Credits: 3
- ORTM3050 - Operations, Management and Environmental Stewardship Credits: 3

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

- STAT2050 - Fundamentals of Statistics Credits: 4
- OR**
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4

Business Fundamentals:

(Complete One Course from Each Area):

Economics:

(Choose One Course)

- ECON1010 - Principles of Macroeconomics Credits: 3
- ECON1020 - Principles of Microeconomics Credits: 3
- ECON1200 - Economics, Law and Government Credits: 3

Accounting:

- ACCT2010 - Principles of Accounting I Credits: 3

Marketing:

- MKT3210 - Introduction to Marketing Credits: 3

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

- ENR1200 - Environment Credits: 4
- ENR1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOG1010 - Introduction to Physical Geography Credits: 4
- GEOL1100 - Physical Geology Credits: 4

Conservation & Sustainability:

(Choose One Course)

- ENR2300 - Foundations of Sustainability Credits: 3
- ENR4560 - Conservation Entrepreneurship Credits: 3
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4
- GEOG4040 - Conservation of Natural Resources Credits: 3
- RNEW1000 - Wyoming Wildlands: Science and Stewardship Credits: 3

People & Culture:

Social Science:

(Choose One Course)

- GEOG1000 - World Regional Geography Credits: 3
- GEOG1020 - Introduction to Human Geography Credits: 3
- PSYC1000 - General Psychology Credits: 3
- SOC1000 - Sociological Principles Credits: 3

Culture/Diversity:

- AMST2010 - Introduction to American Studies Credits: 3
- ENR3620 - Environmental Justice Credits: 3
- POLS3620 - Environmental Justice Credits: 3
- ENR2000 - Environment and Society Credits: 3

- GEOG3450 - Weather and Climate Credits: 3
- GEOG4460 - Biogeography Credits: 3
- GEOG3400 - Traditional Ecological Knowledge Credits: 3
- NAIS3400 - Traditional Ecological Knowledge Credits: 3
- GEOG4000 - Terrain Analysis Credits: 3

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one)
- Global Awareness (choose one)

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Minor

Environment & Natural Resources Minor

An Environment & Natural Resources (ENR) minor may accompany any primary field of study. The ENR core, plus one elective course, fulfills the 18 credit hour requirement for the minor:

15+ Credit Hours of ENR Core Courses:

Foundations of Environmental Science:

(Choose one course):

- ENR1200 - Environment Credits: 4
- ENR1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4

Environment & Society:

- ENR2000 - Environment and Society Credits: 3

Approaches to Problem Solving:

- ENR3000 - Approaches to ENR Problem Solving Credits: 3

Environmental Assessment:

- ENR4900 - ENR Policy in Practice Credits: 3

Applied Experience (2 Credits):

- ENR4970 - ENR Internship Credits: 1-6

3+ Credit Hours of ENR Electives

(Choose one; three credits required):

- ENR2300 - Foundations of Sustainability Credits: 3
- ENR2800 - Introduction to Outdoor Leadership Credits: 3
- ENR3900 - Seminar in Environment and Natural Resources Credits: 1-3
- ENR4450 - Negotiation Credits: 3
- ENR4600 - Campus Sustainability Credits: 3
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6
- ENR4960 - Field Studies in: Credits: 1-6

Outdoor Leadership Minor

The outdoor leadership minor is available to any undergraduate student at the University of Wyoming. Students earning the minor will study leadership, ethics, field ecology, outdoor recreation, and wilderness medicine.

Students earning a minor in outdoor leadership will:

- develop an understanding of leadership theories, including leadership movements, qualities, styles, and models;
 - identify and evaluate the cultural and environmental dimensions of outdoor leadership, including moral and ethical responsibilities, the fundamentals of ecological systems, and the human impact on the natural world;
 - demonstrate and apply outdoor leadership competency in a practical leadership role;
 - plan, implement, supervise, and analyze a high-quality, safe outdoor adventure and/or educational program;
 - earn and maintain a professional certification of Wilderness First Responder.
- To fulfill the requirements for the minor, students must complete the following, earning 17+ credits in specified categories:

6+ Credit Hours of Outdoor Leadership Foundations Courses:

Introduction to Outdoor Leadership:

- ENR2800 - Introduction to Outdoor Leadership Credits: 3
- OR**
- ORTM2800 - Outdoor Leadership Credits: 3

Environmental Science:

(Choose one):

- ENR1200 - Environment Credits: 4
- ENR1500 - Water, Dirt, and Earth's Environment Credits: 4
- GEOL1500 - Water, Dirt, and Earth's Environment Credits: 4
- ENR4040 - Conservation of Natural Resources Credits: 3
- GEOG4040 - Conservation of Natural Resources Credits: 3

- AECL1000 - Agroecology Credits: 4
- GEOG1010 - Introduction to Physical Geography Credits: 4
- GEOL1100 - Physical Geology Credits: 4
- LIFE3400 - General Ecology Credits: 3

8+ Credit Hours of Concepts Courses:

Field Ecology:

Must Complete all Three Courses:

- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1

OR Choose One Course:

- ENR1200 - Environment Credits: 4
- ENR4960 - Field Studies in: Credits: 1-6

Leadership:

(Choose one):

- AGRI3000 - Discovering and Utilizing Ideas and Information Credits: 3
- AGRI4700 - Elements of Leadership Credits: 3
- CNSL2200 - Introduction to Student Leadership Credits: 2
- CNSL3010 - Student Leadership Strategies Credits: 2
- ENR4560 - Conservation Entrepreneurship Credits: 3
- ENR4950 - Leadership in Natural Resources Management Credits: 2
- FCSC4117 - Understanding Community Leadership Credits: 3
- GWST1900 - Women and Leadership Credits: 3

Ethics & Culture:

(Choose one):

- ENR3050 - Cultures of Nature in the United States Credits: 3
- AMST3050 - Cultures of Nature in the United States Credits: 3
- ENR4310 - Environmental Anthropology Credits: 3
- ANTH4310 - Environmental Anthropology Credits: 3
- ENR2330 - Environmental Ethics Credits: 3
- PHIL2330 - Environmental Ethics Credits: 3
- ENR3620 - Environmental Justice Credits: 3
- POLS3620 - Environmental Justice Credits: 3
- ENR3950 - Environmental Sociology Credits: 3
- SOC3950 - Environmental Sociology Credits: 3
- GEOG3400 - Traditional Ecological Knowledge Credits: 3

- NAIS3400 - Traditional Ecological Knowledge Credits: 3
- ORTM1050 - Natural and Cultural Resources of the West Credits: 3
- ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management Credits: 3

3+ Credit Hours of Applied Experience:

(Choose from the following; minimum three credits required):

- ENR3700 - Wyoming Conservation Corps Practicum Credits: 1
- ENR4960 - Field Studies in: Credits: 1-6
- ENR4970 - ENR Internship Credits: 1-6

Wilderness First Responder and CPR Certifications:

- ENR 3900 - Wilderness Medicine Credits: 1-3

OR

- provide proof of certification to advisor
**certifications must be current at time of graduation.*

Sustainability Minor

The sustainability minor is available to any undergraduate student at the University of Wyoming. The minor prioritizes systems thinking, civic engagement, and personal development rooted in sustainability for everyday challenges.

Students completing the sustainability minor will be expected to:

- demonstrate a theoretical and historical understanding of sustainability;
- develop a model of sustainability informed by personal values and integrated into student's worldview;
- think holistically about consequences of actions and intellectually respond to perspectives of sustainability outside their own, as well as explore and evaluate the implications of sustainability values;
- develop and implement sustainability solutions in their community and have the ability to apply sustainability principles to a range of disciplines and professional settings.

To fulfill the requirements for the minor, students must earn 18 credits hours:

9 Credit Hours of Sustainability Core Courses:

- ENR2300 - Foundations of Sustainability Credits: 3
- ENR4600 - Campus Sustainability Credits: 3

Ethics & Justice:

(Choose one course):

- ENR2330 - Environmental Ethics Credits: 3
- OR**
- PHIL2330 - Environmental Ethics Credits: 3
 - ENR3620 - Environmental Justice Credits: 3

OR

- POLS3620 - Environmental Justice Credits: 3
- GWST4450 - Ecofeminism Credits: 3
- HLED4020 - Food, Health, and Justice Credits: 3
- NAIS1030 - Social Justice in the 21st Century Credits: 3
- PHIL3250 - Global Justice Credits: 3

9+ Credit Hours of Sustainability Electives Courses:

(choose three courses from any of the following categories)

Culture & Society

- AMST3050 - Cultures of Nature in the United States Credits: 3
 - AMST4030 - Ecology of Knowledge Credits: 3
 - AMST4800 - Historic Preservation Credits: 3
 - ENR4310 - Environmental Anthropology Credits: 3
- OR**
- ANTH4310 - Environmental Anthropology Credits: 3
 - ENR3950 - Environmental Sociology Credits: 3
- OR**
- SOC3950 - Environmental Sociology Credits: 3
 - GEOG3400 - Traditional Ecological Knowledge Credits: 3
- OR**
- NAIS3400 - Traditional Ecological Knowledge Credits: 3
 - GEOG3550 - Natural Hazards and Society Credits: 3
 - GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge Credits: 4

Economics & Policy

- AGECE3750 - Natural Resource Planning and Economics Credits: 3
- OR**
- ENR3750 - Natural Resource Planning and Economics Credits: 3
 - AGECE4720 - Water Resource Economics Credits: 3
 - ENR4750 - ENR Law and Policy Credits: 3

AND

- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1

AND

- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1

- ERS3010 - Air Quality Management Credits: 3
- ERS4050 - Solar Energy Conversion Credits: 3
- ESS3480 - Environmental Change Credits: 3

OR

- GEOG3480 - Environmental Change Credits: 3

- GEOG4440 - Advanced Global Climate Variability Credits: 3
- GEOL1600 - Global Sustainability: Managing Earth's Resources Credits: 4
- GEOL3600 - Earth and Mineral Resources Credits: 4
- ME4470 - Wind and Ocean Energy Engineering Credits: 3
- REWM4200 - Reclamation of Drastically Disturbed Lands Credits: 3
- SOIL3130 - Environmental Quality Credits: 3

Food Systems

- AECL1000 - Agroecology Credits: 4
- AGE3860 - World Food, Ag, & Development Credits: 3
- ANTH4260 - Anthropology of Food, Culture, and Nutrition Credits: 3
- BOT3100 - Plants and Civilization Credits: 3
- FCSC3147 - Community Nutrition Credits: 3
- HLED4020 - Food, Health, and Justice Credits: 3
- PLNT4020 - Sustainable Agriculture Credits: 3
- PLNT4120 - Organic Food Production Credits: 3

Graduate

Collaborative Practice Graduate Minor

The Collaborative Practice minor is designed to provide students with skills in designing, organizing, facilitating, and evaluating collaborative decision-making processes. Students pursuing the Collaborative Practice minor will:

- build process competencies in collaborative decision making and problem solving, and
- deepen their knowledge in the application of collaborative processes in specific contexts (natural resources, health, education, business, etc.).

Collaborative Practice minor students who are currently working towards an ENR graduate major may not count ENR 5290 or ENR 5291 towards their ENR major. ENR5450 - Negotiation and one elective (approved for both the Collaborative Practice minor and the ENR major) may count for both. In addition to degree requirements of the student's home department, students must complete 12 credit hours:

9 Credit Hours in Collaborative Practice Core Courses:

- ENR5450 - Negotiation Credits: 3
- ENR5920 - Collaborative Practice Methods Credits: 3
- ENR5921 - Collaborative Practicum Credits: 1-3 (3 credits; may be completed for 1+ credit hours over multiple semesters)

3 Credit Hours in Collaborative Practice Electives:

Students will consult with their Haub School advisor to choose an elective to deepen their process competencies or build knowledge for application of collaborative governance in specific contexts (natural resources, health, education, business, etc). Context specific electives should focus on policy within that context.

Environment & Natural Resources Graduate Major

The Environment & Natural Resources (ENR) graduate major is completed in tandem with any UW graduate degree. Students earning the ENR graduate major will take classes and conduct research in such fields as cultural studies, ecology, economics, law and politics, and management to:

- be conversant across a range of field of environmental significance, spanning science and technology to human dimensions of natural resources;
- understand and evaluate the relationship of your primary discipline to other relevant ENR fields; and
- produce discourse, scholarship, and practical solutions that address the complexity of ENR challenges.

Graduate students interested in the concurrent major in ENR will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR major. During the Haub School admission process, students will select a Haub School faculty mentor and submit a one-page Statement of Purpose. Current application requirements are available online.

In addition to degree requirements of the student's home department, students must complete 15 credit hours:

6 Credit Hours in ENR Core Courses:

- ENR5100 - Foundations of ENRS Credits: 3
- ENR5900 - ENR Policy in Practice Credits: 3

9+ Credit Hours in ENR Electives Courses:

(Choose three+ courses from any of the following categories)

Human Dimensions

- AGEC4720 - Water Resource Economics Credits: 3
- AGEC5660 - Community and Economic Development Credits: 3
- AMST5030 - Ecology of Knowledge Credits: 3
- ANTH5260 - Anthropology of Food, Culture, and Nutrition Credits: 3
- ECON5410 - Seminar in Advanced Resource and Environmental Economics Credits: 1-3
- ENGL4075 - Writing for Non-Profits Credits: 3
- ENR5450 - Negotiation Credits: 3
- ENR5560 - Conservation Entrepreneurship Credits: 3
- ENR5600 - Campus Sustainability Credits: 3

- ENR4310 - Environmental Anthropology Credits: 3
- OR**
- ANTH4310 - Environmental Anthropology Credits: 3
- ENR4040 - Conservation of Natural Resources Credits: 3
- OR**
- GEOG4040 - Conservation of Natural Resources Credits: 3
- GEOG5570 - Cultural Geography Credits: 3
- GEOG5590 - Geography of Conflicts Credits: 3
- NASC5650 - Place-Based Learning Credits: 3
- REWM5103 - Range and Ranch Recreation Credits: 3
- GWST5450 - Ecofeminism Credits: 3

Law & Policy

- ENR5750 - ENR Law and Policy Credits: 3

- GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
- GIST5130 - Applied Remote Sensing for Agricultural Management Credits: 3
- STAT5050 - Statistical Methods for the Biological Science Credits: 3

Additional Program Requirements:

- Statement of Purpose: Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.

- Cumulative Learning Analysis: Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
- Program Completion Letter: Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Environment & Natural Resources Graduate Minor

The Environment & Natural Resources (ENR) graduate minor is designed for doctoral students in any discipline who want to broaden their perspectives, experiences, and critical thinking skills to complex environmental problems. The minor is also available to master's students.

Graduate students interested in the concurrent minor in ENR will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR minor. During the Haub School admission process, students will select a Haub School faculty mentor and submit a one-page Statement of Purpose. Current application requirements are available online.

In addition to degree requirements of the student's home department, students must complete 12 credit hours:

6 Credit Hours in ENR Core Courses:

- ENR5100 - Foundations of ENRS Credits: 3
- ENR5900 - ENR Policy in Practice Credits: 3

6+ Credit Hours in ENR Electives Courses:

(Choose three+ courses from any of the following categories)

Human Dimensions:

- AGEC4720 - Water Resource Economics Credits: 3
- AGEC5660 - Community and Economic Development Credits: 3
- AMST5030 - Ecology of Knowledge Credits: 3
- ANTH5260 - Anthropology of Food, Culture, and Nutrition Credits: 3
- ECON5410 - Seminar in Advanced Resource and Environmental Economics Credits: 1-3
- ENGL4075 - Writing for Non-Profits Credits: 3
- ENR5450 - Negotiation Credits: 3
- ENR5560 - Conservation Entrepreneurship Credits: 3
- ENR5600 - Campus Sustainability Credits: 3

- ENR4310 - Environmental Anthropology Credits: 3
- OR**
- ANTH4310 - Environmental Anthropology Credits: 3
- ENR4040 - Conservation of Natural Resources Credits: 3
- OR**
- GEOG4040 - Conservation of Natural Resources Credits: 3
- GEOG5570 - Cultural Geography Credits: 3
- GEOG5590 - Geography of Conflicts Credits: 3

- NASC5650 - Place-Based Learning Credits: 3
- REWM5103 - Range and Ranch Recreation Credits: 3
- GWST5450 - Ecofeminism Credits: 3

Law & Policy:

- ENR5750 - ENR Law and Policy Credits: 3
- ENR4052 - Federal Land Politics Credits: 3
- **OR**
- GEOG4052 - Federal Land Politics Credits: 3
- **OR**
- POLS4052 - Federal Land Politics Credits: 3
- INST5455 - Energy Security Credits: 3
- **OR**
- POLS5455 - Energy Security Credits: 3
- LAW6660 - Environmental Law Credits: 3
- LAW6700 - Indian Law Credits: 3
- LAW6800 - Public Lands Credits: 3
- LAW6860 - Water Law and Policy Credits: 3
- LAW6865 - Natural Resources Law Credits: 3
- POLS5051 - Environmental Politics Credits: 3
- POLS5475 - Politics of Natural Resources in Latin America Credits: 3

Natural & Physical Sciences:

- BOT5280 - Paleobotany Credits: 4
- BOT5700 - Vegetation Ecology Credits: 4
- BOT5775 - Forest Ecology Credits: 4

- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
- **AND**
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
- **AND**
- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1

- ENR5285 - Wildland Hydrology Credits: 3
- **OR**
- REWM5285 - Wildland Hydrology Credits: 3
- ENR5240 - Disease Ecology Credits: 3
- **OR**
- PATB5240 - Disease Ecology Credits: 3

- GEOG5440 - Advanced Global Climate Variability Credits: 3
- GEOG5450 - Fluvial Geomorphology Credits: 4
- PLNT5120 - Organic Food Production Credits: 3
- REWM5000 - Range Resource Management Credits: 3
- REWM5580 - Rangeland Restoration Ecology Credits: 3
- REWM5710 - Watershed Water Quality Management Credits: 3
- REWM5750 - Wildlife Habitat Restoration Ecology Credits: 3
- REWM5400 - Community Ecology Credits: 3

- RNEW5500 - Stable Isotope Ecology Credits: 3
- SOIL5150 - Forest and Range Soils Credits: 3

Quantitative & Qualitative Methods:

- BOT5550 - Computational Biology Credits: 4
 - ENR5550 - Negotiation Analysis Credits: 3
 - OR**
 - AGEC5550 - Negotiation Analysis Credits: 3
 - ENR5525 - Environmental Data Analysis Credits: 4
 - OR**
 - GEOL5525 - Environmental Data Analysis Credits: 4
 - GIST5100 - Foundations of Geospatial Information Science and Technology Credits: 3
 - GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
 - GIST5130 - Applied Remote Sensing for Agricultural Management Credits: 3
 - OR**
 - RNEW 5130
-
- STAT5050 - Statistical Methods for the Biological Science Credits: 3

Additional Program Requirements:

1. Statement of Purpose: Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.
2. Cumulative Learning Analysis: Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
3. Program Completion Letter: Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Environment & Natural Resources, J.D./M.A.

Applicants to the J.D./M.A. in Environment & Natural Resources (ENR) must apply to both the College of Law and the Haub School. Admission to the joint degree program is contingent on acceptance to the College of Law. Current application requirements are available online.

Students working toward the J.D./M.A. in ENR consult a Haub School advisor to design a program of study tailored to meet their educational goals.

Students must earn a minimum of 30 credits for the master's degree:

9 Credit Hours in ENR Core Courses:

Foundations of ENRS

- ENR5100 - Foundations of ENRS Credits: 3

ENR Policy in Practice

- ENR5900 - ENR Policy in Practice Credits: 3

Plan B Writing Seminar (1 credit)

Typically completed in the second semester of the second year. Students must select an advisor-approved ENR 5890 section to meet this requirement.

- ENR5890 - Topics in Environment and Natural Resources Credits: 1-6

Plan B Thesis: JD/MA (2 credits)

- ENR5961 - Plan B Projects Credits: 2

9 Credit Hours in ENR Electives Courses:

Students must take a minimum of 9 credits outside the College of Law. Courses familiarize students with non-law ENR perspectives and approaches. Students work with a Haub School advisor to select courses from an approved list.

(Choose three+ courses in consultation with Haub School advisor):

Humanities

- AMST5030 - Ecology of Knowledge Credits: 3
- ANTH 5620
- ENGL4075 - Writing for Non-Profits Credits: 3
- ENR5560 - Conservation Entrepreneurship Credits: 3
- ENR5600 - Campus Sustainability Credits: 3

- ENR4040 - Conservation of Natural Resources Credits: 3
- OR**
- GEOG4040 - Conservation of Natural Resources Credits: 3
- NASC5650 - Place-Based Learning Credits: 3
- GWST5450 - Ecofeminism Credits: 3

Environmental Science

- BOT5280 - Paleobotany Credits: 4
- BOT5700 - Vegetation Ecology Credits: 4
- BOT5775 - Forest Ecology Credits: 4

- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
- AND**
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
- AND**

- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1
- ENR5240 - Disease Ecology Credits: 3
- OR**
- PATB5240 - Disease Ecology Credits: 3
- ENR5285 - Wildland Hydrology Credits: 3
- OR**
- REWM5285 - Wildland Hydrology Credits: 3
- GEOG5440 - Advanced Global Climate Variability Credits: 3
- GEOG5450 - Fluvial Geomorphology Credits: 4
- PLNT5120 - Organic Food Production Credits: 3
- REWM5580 - Rangeland Restoration Ecology Credits: 3
- REWM5710 - Watershed Water Quality Management Credits: 3
- RNEW5400 - Invasive Plant Ecology Credits: 3
- RNEW5500 - Stable Isotope Ecology Credits: 3
- SOIL5150 - Forest and Range Soils Credits: 3

Social Science

- AGEC4720 - Water Resource Economics Credits: 3
- AGEC5660 - Community and Economic Development Credits: 3
- ECON5410 - Seminar in Advanced Resource and Environmental Economics Credits: 1-3
- ENR5750 - ENR Law and Policy Credits: 3
- ENR5450 - Negotiation Credits: 3
- OR**
- AGEC5450 - Negotiation Credits: 3
- ENR5550 - Negotiation Analysis Credits: 3
- OR**
- AGEC5550 - Negotiation Analysis Credits: 3
- ENR5050 - Techniques in Environmental Data Management Credits: 4
- OR**
- ECOL5050 - Techniques in Environmental Data Management Credits: 4
- ENR5525 - Environmental Data Analysis Credits: 4
- OR**
- GEOL5525 - Environmental Data Analysis Credits: 4
- POLS5051 - Environmental Politics Credits: 3
- GIST5130 - Applied Remote Sensing for Agricultural Management Credits: 3
- GIST5211 - Advanced Remote Sensing Credits: 3
- INST5445 - Drug War Geopolitics in the Americas Credits: 3
- OR**
- POLS5445 - Drug War Geopolitics in the Americas Credits: 3
- INST5455 - Energy Security Credits: 3
- OR**
- POLS5455 - Energy Security Credits: 3
- INST5475 - Politics of Natural Resources in Latin America Credits: 3
- OR**
- POLS5475 - Politics of Natural Resources in Latin America Credits: 3
- POLS5710 - Topics In Political Science Credits: 1-3
- REWM5000 - Range Resource Management Credits: 3

- REWM5103 - Range and Ranch Recreation Credits: 3
- STAT5050 - Statistical Methods for the Biological Science Credits: 3

12 Credit Hours in Environmental and Natural Resources Law Specialization Courses:

Students will take 12 credits to gain depth in ENR law, selected from the following options in consultation with Haub School advisor. Special approval may be granted for special topics courses.

- LAW6510 - Administrative Law Credits: 3
- LAW6660 - Environmental Law Credits: 3
- LAW6700 - Indian Law Credits: 3
- LAW6790 - Oil and Gas Credits: 3
- LAW6800 - Public Lands Credits: 3
- LAW6860 - Water Law and Policy Credits: 3
- LAW6890 - Land Use Law Credits: 3
- LAW6910 - Seminar Credits: 1-2
- LAW6991 - Advanced Water Law and Policy Credits: 3
- LAW6992 - Advanced Oil and Gas Law Credits: 3
- LAW6915 - Topics in Law Credits: 1-3
- LAW 6500 - Agricultural Law

Plan B Project Research

Students must complete a cumulative work of scholarship known as the Plan B project. The Plan B offers more flexibility than a traditional thesis in content and format. Students will be required to choose a Haub School faculty committee chair and at least two additional committee members. Committee composition is subject to approval by the program chair and Dean of the Haub School. A public oral defense of the project is required. All members of the student's committee must be present at the defense. The student's committee has to give final approval of the student's Plan B thesis and defense via a report of final examination.

Environment, Natural Resources & Society, M.S.

Students earning the master of science in Environment, Natural Resources & Society (ENRS) will consult a Haub School advisor to design a program of study tailored to meet their educational goals. Students take courses and complete a Plan A research thesis or Plan B research project focusing on issues pertinent to environmental or natural resources management or policy. Graduates of this program will:

- develop an interdisciplinary and collaborative mindset;
- experience critical engagement with community stakeholders and decision-makers;
- excel in team-based collaborative environments;
- gain experience in relevant and emergent research methods and practices;
- demonstrate excellent written, oral, and digital communication across a range of audiences and purposes, including developing expertise in public engagement;
- apply conceptual, critical, and creative thought to relevant environmental and natural resource issues; and,
- analyze and evaluate complex systems that contribute to inclusive, sound, and well-informed decisions.

Applicants to the M.S. in Environment, Natural Resources & Society must apply directly to the Haub School. Current application requirements are available online.

Students must earn a minimum of 32 credit hours for the Plan A thesis option and 30 credit hours for the Plan B option:

8 Credit Hours in ENRS Core Courses:

- ENR5001 - Orientation to ENRS Credits: 2
- ENR5100 - Foundations of ENRS Credits: 3
- ENR5921 - Collaborative Practicum Credits: 1-3 (3 credits; may be completed for 1+ credit hours over multiple semesters)

Plan A Thesis Credit (4 credit hours):

- ENR5960 - Thesis Research Credits: 1-12

Or Plan B Thesis Credit (2 credit hours):

- ENR5961 - Plan B Projects Credits: 2

17 Credit Hours in ENRS Electives:

Students will consult with their Haub School advisor to choose electives that support their plan of study and Plan A or Plan B thesis. Choose courses from any of the following categories:

Social & Cultural Sciences

- AGEC4720 - Water Resource Economics Credits: 3
- AGEC5660 - Community and Economic Development Credits: 3
- AMST5030 - Ecology of Knowledge Credits: 3
- ANTH5260 - Anthropology of Food, Culture, and Nutrition Credits: 3
- ECON5410 - Seminar in Advanced Resource and Environmental Economics Credits: 1-3
- ENR5560 - Conservation Entrepreneurship Credits: 3
- ENR5600 - Campus Sustainability Credits: 3
- ENR5920 - Collaborative Practice Methods Credits: 3

- ENR4310 - Environmental Anthropology Credits: 3
- OR**
- ANTH4310 - Environmental Anthropology Credits: 3

- ENR4040 - Conservation of Natural Resources Credits: 3
- OR**
- GEOG4040 - Conservation of Natural Resources Credits: 3

- GEOG5570 - Cultural Geography Credits: 3
- GEOG5590 - Geography of Conflicts Credits: 3
- GWST5450 - Ecofeminism Credits: 3
- NASC5650 - Place-Based Learning Credits: 3
- REWM5103 - Range and Ranch Recreation Credits: 3

Law & Policy

- ENR5750 - ENR Law and Policy Credits: 3

- ENR5890 - Topics in Environment and Natural Resources Credits: 1-6
- ENR4052 - Federal Land Politics Credits: 3
OR
- GEOG4052 - Federal Land Politics Credits: 3
OR
- POLS4052 - Federal Land Politics Credits: 3
- INST5455 - Energy Security Credits: 3
OR
- POLS5455 - Energy Security Credits: 3
- LAW6660 - Environmental Law Credits: 3
- LAW6700 - Indian Law Credits: 3
- LAW6800 - Public Lands Credits: 3
- LAW6860 - Water Law and Policy Credits: 3
- LAW6865 - Natural Resources Law Credits: 3
- POLS5051 - Environmental Politics Credits: 3
- POLS5475 - Politics of Natural Resources in Latin America Credits: 3

Natural & Physical Sciences

- BOT5280 - Paleobotany Credits: 4
- BOT5700 - Vegetation Ecology Credits: 4
- BOT5775 - Forest Ecology Credits: 4
- ENR4010 - Winter Ecology: Skills of the Winter Naturalist Credits: 1
AND
- ENR4011 - Winter Ecology: Snowpack Science and Dynamics Credits: 1
AND
- ENR4012 - Winter Ecology: Wildlife and Plant Adaptations Credits: 1
- ENR5285 - Wildland Hydrology Credits: 3
OR
- REWM5285 - Wildland Hydrology Credits: 3
- ENR5240 - Disease Ecology Credits: 3
OR
- PATB5240 - Disease Ecology Credits: 3
- GEOG5440 - Advanced Global Climate Variability Credits: 3
- GEOG5450 - Fluvial Geomorphology Credits: 4
- PLNT5120 - Organic Food Production Credits: 3
- REWM5000 - Range Resource Management Credits: 3
- REWM5400 - Community Ecology Credits: 3
- REWM5580 - Rangeland Restoration Ecology Credits: 3
- REWM5710 - Watershed Water Quality Management Credits: 3
- REWM5750 - Wildlife Habitat Restoration Ecology Credits: 3
- RNEW5500 - Stable Isotope Ecology Credits: 3
- SOIL5150 - Forest and Range Soils Credits: 3

Communication

- ENR5270 - Writing and Reviewing Science Credits: 4
- ENR5450 - Negotiation Credits: 3
- OR**
- AGECS450 - Negotiation Credits: 3
- ENR5870 - Graduate Seminar Credits: 1

Quantitative & Qualitative Methods

- BOT5550 - Computational Biology Credits: 4
- COJO5070 - Quantitative Research Methods Credits: 3
- ENR5550 - Negotiation Analysis Credits: 3
- OR**
- AGECS550 - Negotiation Analysis Credits: 3
- ENR5525 - Environmental Data Analysis Credits: 4
- OR**
- GEOL5525 - Environmental Data Analysis Credits: 4
- GIST5050 - Database Design and Management Credits: 3
- GIST5100 - Foundations of Geospatial Information Science and Technology Credits: 3
- GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
- GIST5130 - Applied Remote Sensing for Agricultural Management Credits: 3
- OR**
- RNEW 5130
- STAT5050 - Statistical Methods for the Biological Science Credits: 3

Plan A or Plan B Project Research:

Both Plan A and Plan B theses lead to original thought, synthesis, or integration of relevant elements of scholarship on issues pertinent to environmental and natural resources management or policy. The Plan A thesis will incorporate original research and data analysis on an applied environmental or natural resource management problem. The Plan B thesis project is somewhat more flexible and may take a variety of forms. Students will consult their major advisor and graduate committee on the form and content of the Plan A and Plan B thesis.

Other Programs

UW Credit Options for NOLS

UW recognizes the following credit options for taking a NOLS course:

Short Courses (less than 14 days)

Students may be eligible to complete 2 Hours of UW credits in the following course(s).

- ENR4960 - Field Studies in: Credits: 1-6 **

Quarter Length Courses (14-65 days)

Students may be eligible to complete up to 9 hours in the following courses.

- ENR2800 - Introduction to Outdoor Leadership Credits: 3 **
- ENR4960 - Field Studies in: Credits: 1-6 **
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6 **
- ENR4970 - ENR Internship Credits: 1-6 **

Semester & Year-long Courses (more than 65 days)

Students may be eligible to complete up to 12-24 hours in the following courses.

For year-long courses, independent study credits are also available.

- ENR2800 - Introduction to Outdoor Leadership Credits: 3 **
- ENR4960 - Field Studies in: Credits: 1-6 **
- ENR4970 - ENR Internship Credits: 1-6 **
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6 **
- ENR3900 - Seminar in Environment and Natural Resources Credits: 1-3 ***

Note:

**There are additional course requirements for 4000-level NOLS credit. Syllabi and course expectations will be shared upon enrollment.

***For courses with a Wilderness First Responder component only.

Information Literacy

Coe Library 304

Phone: (307)766-2070

The University Libraries offer research assistance and information literacy instruction to students and faculty. Librarians provide customized class orientations to information sources in various disciplines, as well as individual research consultations. Students needing research help may call, email, instant message, or visit any library branch.

The University of Wyoming addresses information competencies utilizing the [Framework for Information Literacy for Higher Education](#) as approved by the Association of College & Research Libraries (ACRL) and endorsed by the American Association for Higher Education. Librarians collaborate with teaching faculty in addressing these information competencies in course assignments or lectures. Information literacy is the ability to recognize and define the need for information, then locate, evaluate, and use that information effectively and ethically.

Information literacy learning outcomes are included in University Studies First Year Seminar (FYS) and communication courses.

The Libraries also offer credit courses to help students improve research skills and to meet the communications 2 requirement of the University Studies Program.

Learning Outcomes

We expect that students completing LBRY courses will become knowledgeable consumers of information through learning how to:

- Recognize and define the need for information;
- Efficiently locate information in the library or on the Internet;
- Evaluate the quality of information;
- Utilize information effectively, ethically, and legally.

Librarians

TAMSEN EMERSON HERT, B.A. Colorado State University 1979; M.L.S. Emporia State University 1984; M.A. 1988; Librarian, 2014, 1986.

DAVID D. KRUGER, B.S. South Dakota State University 1991; B.S.Ed. Minot State University 1994; M.A. Kansas State University 1996; M.L.S. University of Missouri at Columbia 1998; Librarian 2016, 1998.

LAWRENCE O. SCHMIDT, B.S. Montana State University 1987; M.S. 1995; M.L.S. Emporia State University 2002; Librarian 2020, 2008.

Associate Librarians

KAIJSA J. CALKINS, B.A. University of Washington, Bothell 2001, M.L.I.S. University of Washington, Seattle 2004; Associate Librarian 2012, 2006.

JUDITH E. PASEK, B.S. University of Michigan Ann Arbor 1977; M.S. University of Missouri 1980; Ph.D. University of Nebraska 1987; M.L.I.S. Wayne State University 2013; Associate Librarian 2020, 2013.

Assistant Librarians

KRISTINA A. CLEMENT, B.A. University of Kansas 2007; M.A. University of Notre Dame 2010; M.S.I.S. University of Tennessee 2018; Assistant Librarian 2018.

SAMANTHA PETER, B.A. University of Wyoming 2016; M.S.I.S. University of Texas at Austin 2018; Assistant Librarian 2018.

Geospatial Information Science and Technology

Wyoming Geographic Information Science Center
337 Agriculture C Building

Ramesh Sivanpillai, Program Director
(307)766-2532
Web site: www.uwyo.edu/WyGISC

The Wyoming Geographic Information Science Center (WyGISC) offers undergraduate and graduate courses, degrees, and certificates in Geospatial Information Science and Technology under the GIST prefix. These provide fundamental geospatial science education to undergraduate and graduate students from across disciplines at UW and are appropriate for science and non-science majors. They cover core and advanced geospatial concepts and subdisciplines including Geographic Information Systems (GIS), remote sensing, spatial data analysis, spatial visualization, spatial databases, cartography, programming, and other topics.

Faculty:

SHANNON E. ALBEKE, B.A. University of Colorado, Boulder 1997; Ph.D. University of Georgia 2010. Associate Research Scientist 2019, 2010.

KENNETH L. DRIESE, B.S. University of Virginia 1981; M.S. University of Wyoming 1992; Ph.D. 2004; Senior Lecturer in Geospatial Information Science and Technology 2019, 2002.

JEFFREY D. HAMERLINCK, B.S. University of North Dakota 1988; M.P. University of Wyoming 1992; Ph.D. University of Colorado - Boulder 2011; Senior Research Scientist 2004.

PADDINGTON HODZA, BSC, University of Zimbabwe, 1994; MSC, University of Zimbabwe, 1998; Ph.D. West Virginia University, 2007; Associate Research Scientist 2016, 2013.

AUSTIN MADSON, B.A. University of California, Los Angeles 2012; M.A. 2015; Ph.D. 2020; Assistant Professor of Geospatial Information Science and Technology 2021.

RAMESH SIVANPILLAI, B.Sc. Bharathiar University 1987; M.Sc. Cochin University of Science and Technology 1990; M.Phil. Bharathiar University 1992; M.S. University of Wisconsin, Green Bay 1995; Ph.D. Texas A&M University 2002; Senior Research Scientist 2012.

CHEN XU, B.S. Sichuan University, China 1999; M.S. Sam Houston State University 2005; Ph.D. Texas A&M University 2010; Associate Professor of Geospatial Information Science and Technology 2019.

DI YANG, B.S. Liaoning University of Petroleum and Chemical Technology 2011; M.S. Texas A&M 2013; Ph.D. University of Florida 2019; Assistant Professor of Geospatial Information Science and Technology 2020.

Geographic Information Science and Technology Degrees and Certificates

GIST degrees and certificates include a Bachelor of Science Degree in GIST (to launch Fall 2022 contingent on demonstration of student demand), undergraduate certificates in GIST and Remote Sensing, each of which can contribute to the B.S. degree; a Research Master's Degree (with thesis), an online Professional Master's Degree (no thesis), and three online graduate certificates, in GIST, Remote Sensing, and Unmanned Aerial Systems (UAS, a.k.a. drones).

Drawing on expertise from geography, computer science, mathematics, statistics, psychology, design, and others, geospatial information science refers to the multi-disciplinary research enterprise that addresses the nature of geospatial information and the application of geospatial technologies to scientific questions. Geospatial information technology is a specialized set of information and communication technologies that support the acquisition, management, analysis, and visualization of geo-referenced data. Examples include: geographic information systems; global navigation satellite systems; and satellite, airborne, drone-based, shipboard and ground-based remote sensing and image processing systems.

Successful students in Geospatial Information Science and Technology (GIST) combine proficiency in spatial thinking and geospatial data science analysis with fluency in geographic information systems, remote sensing, data analytics, and visualization. As professionals, graduates apply their knowledge and skills in a wide range of fields, from environmental management and public health, to civil engineering and urban planning, to economic analysis and marketing.

Any courses listed in degree plans that are not described in the GIST course list are under development and will be added in future catalogs as they are approved.

Undergraduate Certificates

Undergraduate certificates in GIS and Remote Sensing provide a means of adding credentials to your degree that reflect expertise in geospatial science.

Graduate Certificates

Graduate certificates provide a means for students and professionals to earn marketable credentials over the course of 1-2 semesters. These certificates require a combination of core and elective courses as outlined below and will be delivered primarily online.

Graduate

Geospatial Information Science with Thesis, Research M.S.

The Research Master of Science degree (with thesis) is delivered mainly on the UW campus but with many online courses. Students work with a graduate advisor who will guide their thesis research and chair their graduate committee. This degree requires a combination of core and elective courses that can be completed in 2 years.

Program Specific Admission Requirements

In addition to University of Wyoming graduate admission requirements, prospective students for the Research Master of Science Degree are required to submit a statement of purpose describing their background and interest in the degree, a CV or resume, and two letters of recommendation addressing their potential for success in this master's program. Students are encouraged to initiate correspondence with a faculty member who shares their research interests before applying.

Semester 1

- GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
- GIST5200 - Geographic Visualization Credits: 3
- GIST5050 - Database Design and Management Credits: 3

Semester 2

- GIST Elective Credits 6
- GIST5220 - Spatial Modeling & Data Analysis Credits: 3

Semester 3

- GIST Electives Credits: 9

Semester 4

- GIST5002 - Geospatial Forum Credits: 1
- GIST 5960 - Thesis Research Credits: 4-12

Geospatial Information Science without Thesis, Professional M.S.

The Professional Master of Science Degree (no thesis) is delivered online. It provides a pathway for traditional students and professionals to earn a graduate credential in 2 years, but students may choose to take longer depending on their professional or personal time constraints.

Program Specific Admission Requirements

In addition to University of Wyoming graduate admission requirements, prospective students for the Professional Master of Science Degree are required to submit a statement of purpose describing their background and interest in the degree and a CV or resume.

Course Sequence

Semester 1

- GIST5050 - Database Design and Management Credits: 3
- GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
- GIST5200 - Geographic Visualization Credits: 3
- GIST5280 - Navigating GIST Professions Credits: 1

Semester 2

- GIST Electives Credits: 6
- GIST5220 - Spatial Modeling & Data Analysis Credits: 3

Semester 3

- GIST Electives Credits: 3
- GIST5300 - Web Mapping and Internet GIS Credits: 3
- GIST5350 - Enterprise GIS Credits: 3
- GIST5002 - Geospatial Forum Credits: 1

Semester 4

- GIST 5780 Credits: 3
- GIST5002 - Geospatial Forum Credits: 1

Certificate

Geospatial Information Science and Technology Graduate Certificate

This 15-credit graduate certificate gives you a rigorous academic credential in GIS that includes exposure to fundamental and advanced concepts and the chance to pursue your own interests with generous elective opportunities.

Core (9 Credits)

- GIST5050 - Database Design and Management Credits: 3
- GIST5150 - Advanced Programming in Spatial Sciences Credits: 3
- GIST5220 - Spatial Modeling & Data Analysis Credits: 3

Electives (6 Credits)

- Choose from other GIST courses (see M.S. courses) or interdisciplinary courses

Total: 15 Credits

Remote Sensing Graduate Certificate

Remote sensing scientists use data collected by satellites, aircraft, and Unmanned Aerial Systems (drones) to address questions important for agriculture, natural resource and wildlife management, global change science, energy development and other applications. From Google Earth to complex spectral analysis, remote sensing is playing an increasingly important role in many fields. This 15-credit online graduate certificate teaches you the fundamentals of remote sensing and digital image processing, and the freedom to use elective courses to pursue your own interests in related topics.

Core (6 Credits)

- BOT 5111 - Introduction to Remote Sensing of the Environment Credits: 3
- OR**
- GIST5111 - Introduction to Remote Sensing Credits: 3
 - GIST5120 - Integration of RS and GIS Data Credits: 3

Electives (9 Credits)

- Choose from other remote sensing and UAS courses or interdisciplinary RS courses

Total: 15 Credits

Undergraduate Certificate in GIS

Undergraduate certificate in GIS provides a means of adding credentials to your degree that reflect expertise in geospatial science.

Core (10 credits)

- GIST2310 - Intro to Geographic Information Systems Credits: 4
- GIST2200 - Spatial Data Visualization Credits: 3
- GIST2190 - Intro to Programming Credits: 3

Undergraduate Certificate in Remote Sensing

Undergraduate certificate in Remote Sensing provides a means of adding credentials to your degree that reflect expertise in geospatial science.

Undergraduate Certificate in Remote Sensing Core (3 credits)

- GIST3140 - Introduction to Remote Sensing Credits: 3

Electives (6 credits)

Select any remote sensing or UAS courses (6 credits)

Total: (9 credits)

Unmanned Aerial Systems Graduate Certificate

In this certificate program, you will learn to safely use Unmanned Aerial Systems (drones) and to collect and process geospatial data acquired by them. Demand for professionals trained to operate drones and process drone imagery is growing rapidly in agriculture, natural resource management, construction, energy, transportation, business, and many other fields. A significant aspect of this 11-credit online graduate certificate (with a 2-credit, field-based flight school) is to prepare you to become an FAA certified pilot and to use industry-standard image processing techniques.

Core (8 Credits)

- GIST5410 - UAS Sensors and Platforms Credits: 1
- GIST5420 - UAS Mission Planning Credits: 1
- GIST5430 - UAS Regulations and Safety Credits: 1
- GIST5440 - UAS Ground School and Operations Credits: 2 *
- GIST5450 - UAS Photogrammetry and Imagery Process Credits: 3 *

Electives (3 Credits)

(may be optional for some graduate students, depending on their program of study)

- Choose from remote sensing courses or interdisciplinary UAS applications courses

Total: 8-11 Credits

School of Energy Resources

301 Energy Innovation Center

Phone: (307)766-6879 FAX (307)766-6701

Holly Krutka, Executive Director

Website: www.uwyo.edu/ser

The School of Energy Resources facilitates interdisciplinary academic and research programs in engineering and science, economics, and environment and natural resources policy to address critical energy-related issues faced by our society.

Our mission is to leverage and add to the already significant energy-related talent and resources in the University of Wyoming colleges to develop human resources, know-how, and technical solutions to ensure a secure and sustainable energy future for the state, region, and nation.

The University of Wyoming (UW) School of Energy Resources (SER) was created in 2006 by the Wyoming Legislature through State Statute 21-17-117. Our goal is to enhance the university's energy-related education, research, and engagement. SER directs and funds cutting-edge energy research and technology development, which integrates with the formulation and conduct of academic programs at UW and bridges academics and industry through targeted engagement efforts. The bridges formed between academics and industry ensure programs are relevant, current, and deliver impact and high value to stakeholders and the state. Since its inception in 2006, SER has maintained flexibility in its focus and structure to meet the changing needs of Wyoming's energy industries and the state's economy-which is now more critical than ever.

Professors:

TIMOTHY J. CONSIDINE, B.A. Loyola University 1975; M.S. Purdue University 1977; Ph.D. Cornell University 1981; SER Professor of Energy Economics 2008.

CRAIG C. DOUGLAS, A.B. Chicago University 1977; M.S. Yale University 1978; M.Phil. 1980; Ph.D. 1982; SER Professor of Mathematics 2008.

MAOHONG FAN, B.S. Wuhan University of Science and Engineering, 1984; M.S. Beijing University of Science and Technology, 1992; Ph.D. Chinese Academy of Sciences, 1997; Ph.D. Iowa State University, 2000; Ph.D. Osaka University 2003; SER Professor of Chemical Engineering 2015, 2008.

JOHN P. KASZUBA, B.S. Beloit College, 1982; M.S. Virginia Polytechnic Institute & State University 1986; Ph.D. Colorado School of Mines, 1997; SER Professor Geology & Geophysics, 2019, 2008.

SUBHASHIS MALLICK, B.Sc. Indian Institute of Technology 1976; M.Sc. 1978; Ph.D. University of Hawaii 1987; SER Professor of Geology & Geophysics 2008.

BRUCE A. PARKINSON, B.S. Iowa State University 1972; Ph.D. California Institute of Technology 1977; SER Professor of Chemistry 2008.

TARA RIGHETTI, B.A. University of Colorado Boulder 2005; J.D. 2007; SER Professor of Law 2020, 2017, 2014.

Associate Professors:

PO CHEN, B.S. Beijing University 2000; Ph.D. University of Southern California 2005; SER Associate Professor of Geology and Geophysics 2014, 2008.

DARIO GRANA, B.S. University of Pavia, 2003; M.S. 2005; M.S. University of Milano Bicocca, 2006; Ph.D. Stanford University, 2013; SER Associate Professor of Geology and Geophysics 2019, 2013.

Academic Professional:

KRISTOPHER KOSKI, B.S. Colorado School of Mines, 2005; J.D. University of Wyoming, 2008; Associate Lecturer 2017.

Accreditation

Both PLM and ELW concentrations are accredited by The Higher Learning Commission, a commission of the North Central Association of Colleges and Schools Commission on Institutions of Higher Education. In addition, the Professional Land Management Concentration is one of only twelve programs accredited nationally by the American Association of Professional Landmen.

Graduates in the program have the opportunity to sit for the Registered Landman exam. Individuals with certification can increase their salary by 20% on average. Visit landman.org to learn more.

SER Vision Statement

SER pursues the creation, sharing, and implementation of technology and knowledge for sustainable economic production of Wyoming's natural resources to generate additional employment and revenue opportunities for the state that include supply of clean energy and materials and products.

SER Mission Statement

SER develops and deploys expertise to solve critical energy challenges, add value to the Wyoming energy sector, and position UW as a primary provider for energy innovation at the national level. In pursuit of this mission, SER facilitates internal and external interdisciplinary coalitions and builds institutional capacity in energy education, research, and outreach. SER distinguishes its programs in areas of strategic importance to Wyoming's economy by focusing technology development and academic activities primarily in four strategic areas of concentration:

- Maximizing the economic recovery of fossil energy and mineral resources;
- Protecting existing markets for fossil fuels;
- Creating new markets - traditional and value-added - from Wyoming energy and mineral resources; and
- Educating the workforce and stakeholders to facilitate diversification of the energy sector through the addition of value-added activities.

We seek to develop and deploy new technologies and to educate the workforce and stakeholders in these areas to deliver broad and significant benefits to the state and the energy industry. Chief among these benefits are:

- Growth in energy-based revenue streams for Wyoming

- A hedge against boom and bust economic cycles
- A well-trained, homegrown workforce
- Enhanced competitiveness at UW for student and faculty recruiting, corporate partnerships, and funding
- Mutual gain for UW and industry from cooperative relationships
- Improved performance in monetizing Wyoming's most valuable energy assets

Program Admission

Undergraduate students will apply for admission to the University of Wyoming and then declare a major or minor within SER at any point during their course of study. To declare a major, students must meet with the SER academic advisor. Any student can add the SER minor without meeting with an SER advisor.

Minor

Students looking to create a focus for their coursework can add minors to the ERM&D program. Courses applying towards the minor must be completed with a grade of "C" or better.

Students not already majoring in BS-Energy Resource Management and Development may add the SER minor to their program of study.

School of Energy Resources

Energy Resource Management Minor (for baccalaureate students). More information can be found on our website: <http://www.uwyo.edu/ser/academic-programs/minor-erm.html>

Major

Energy Resource Management and Development, B.S.

One of the most important challenges of the 21st century will be to develop and manage energy resources in a sustainable manner. Projections show energy consumption worldwide will increase nearly 50 percent by 2035. And half of the leadership in the energy industries is expected to retire in the next five to ten years.

The future of energy will be characterized by increasing knowledge, relentless change, and technological innovation. As the global energy industry increases in complexity, demand will dramatically grow for professionals with a multidisciplinary, entrepreneurial skillset. Future leaders must understand complex technology within the context of business, legal, social, and public policy in order to create comprehensive and sustainable solutions.

The Energy Resource Management and Development (ERM&D) B.S. program is designed to fill this need through a combination of rigorous courses, real-world internships, and undergraduate research experiences. The degree program requires uniquely interdisciplinary coursework from classes throughout campus. This broad-based education will support graduates to have the skills necessary in an ever-evolving job market. The curriculum balances depth of learning with the breadth of understanding to train graduates for sustained competitive success in the energy workforce at the frontiers of knowledge and for self-directed, life-long learning. Students learn to focus on continuous improvement, constant assessment, and the importance of a sense of urgency and consideration of profit motive in the energy industry.

Our program emphasizes career planning and provides one-on-one guidance and assistance to ensure optimal workforce placement. Students are strongly encouraged to complete an industry internship (the minimum GPA requirement is typically 3.000). Opportunities are also available for undergraduate research, a study abroad experience, or a summer field trip. Multiple events during the year connect students to energy industry professionals.

Student Learning Outcomes

The Energy Resource Management and Development Program is designed to meet the demands of the energy workforce and enhance social literacy related to complex energy issues. Competency-based learning that integrates problem-solving, critical analysis of uncertain and complex issues, and constant improvement in performance are overarching components of our undergraduate program.

- Gain appreciation and understanding of fundamental concepts of energy systems.
- Acquire a foundational understanding of business fundamentals relative to energy companies, including organizational structure, management, entrepreneurship, and international commerce.
- Understand the legal, cultural, scientific, and technological dimensions of energy resources.
- Demonstrate the business and professional skills necessary to engage in meaningful conversation and dialogue across written, oral and digital platforms.
- Exhibit critical thinking and problem solving related to earth, energy, and environmental problems.
- Appreciate the demands and responsibilities of engaged citizenship and decision-making.
- Prepare for a lifetime of ethical service to the profession.
- Apply concepts and skills to real-world problems to gain practical understanding and experience.

Required Academic Performance

The student must earn a letter grade of C or better in each course and a cumulative GPA of 2.000 or better.

Concentrations

The Energy Resource Management and Development program offers two concentrations and students must declare at least one concentration. The two concentrations are Energy and Environmental Systems and Professional Land Management. The suggested course sequences for both concentrations are shown below.

Energy and Environmental Systems Concentration

Environmental scientists collect data samples for air, soil, water and other materials to identify environmental impacts for studies and surveys. These samples help to resolve environmental threats, develop plans and provide guidance to ensure quality regulation and manage natural resources.

Energy production is dependent upon the sustained stewardship of air, land, and water resources. Environmental scientists, consultants, and reclamation planners use their knowledge of our natural resources to protect the environment during energy development.

Suggested Course Sequence

Freshman Year: Fall

0649

- ENGL1010 - College Composition and Rhetoric Credits: 3 (C1)
- ENR1000 - Energy and Society Credits: 3 (PN)

OR

- ERS1000 - Energy and Society Credits: 3
First-Year Seminar (FYS)

- MATH2200 - Calculus I Credits: 4 (Q)

OR

- MATH2350 - Business Calculus Credits: 4
- ECON1300 - Oil: Business, Culture, and Power Credits: 3 (H)

OR

- ERS1300 - Oil: Business, Culture, and Power Credits: 3

Total Hours 16

Freshman Year: Spring

- AGE1020 - Principles of Microeconomics Credits: 3 (H)

OR

- ECON1020 - Principles of Microeconomics Credits: 3 (H)
US & Wyoming Constitution (V)

Communication 2 Elective (C2) (See footnote 1)

- LIFE1010 - General Biology Credits: 4 (PN)
General Elective (See footnote 2)

Total Hours 16

Sophomore Year: Fall

- LIFE2023 - Biology of Plants and Fungi Credits: 4
- REWM2000 - Principles of Rangeland Management Credits: 3
Chemistry Elective (See footnote 3)
- ACCT2010 - Principles of Accounting I Credits: 3

Total Hours 14

Sophomore Year: Spring

- SOIL2010 - Introduction to Soil Science Credits: 4
- LIFE3400 - General Ecology Credits: 3
- GIST1200 - Geospatial Foundations Credits: 3
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4 (QB;Q)

OR

- STAT2050 - Fundamentals of Statistics Credits: 4 (QB;Q)

Total Hours 14

Junior Year: Fall

0650

- REWM2400 - Range Ecosystems and Plants Credits: 4
- REWM3100 - Principles of Wildland Water Quality Credits: 3
- GIST2310 - Intro to Geographic Information Systems Credits: 4
- ERS4120 - Federal Public Land Law Credits: 3

Total Hours 14

Junior Year: Spring

- DSCI4260 - Project Management Credits: 3
Economics Elective (See footnote 4)
- FIN3250 - Corporate Finance Credits: 3
- ERS3010 - Air Quality Management Credits: 3
General Elective (See footnote 2)

Total Hours 15

Senior Year: Fall

- REWM4200 - Reclamation of Drastically Disturbed Lands Credits: 3
Data Analysis Elective (See footnote 5)
Negotiation Elective (See footnote 6)
- ENR4750 - ENR Law and Policy Credits: 3
General Elective (See footnote 2)

Total Hours 15

Senior Year: Spring

- REWM4700 - Wildland Watershed Management Credits: 3
OR
- REWM4710 - Watershed Water Quality Management Credits: 3
Communication 3 Elective (See footnote 7)
Upper-division General Elective (See footnote 2)
- REWM4580 - Rangeland Restoration Ecology Credits: 3
Technical Elective (See footnote 8)

Total Hours 16

Total Credit Hours 120

1 COM 2 Elective - Select one: COJO 2010, ECON 2400, ENGL 2005, ENR 2000, ENR 3300, ERS 2500, HP 2020, UWYO 1600

2 General Elective- Select four (one must be upper-division): ERS 1650, 4960, 4965, 4970, 4975, 4985, 4990; ECON 1010; ENR 1200, 2300, 3450, 3700, 3900, 4040, 4600, 4890, 4960, 4970; 4985 DSCI 3210; GEOG 3150, 3450, 3480, 3550, 4040, 4111, 4210, 4211; FIN 3310, 3520; LIFE 3410; GEOL 1600, 1650, 3600, 3650, 4210; GIST 2160; IMGT 1400, 2400; LS 2100; MGT 3210, 3410, 3420, 4340, 4350, 4360; MKT 3210, 4600; PLNT 1150; PHIL 2420; POLS 4051, 4052; REWM 4210, 4285, 4330, 4530, 4700, 4750, 4830, 4850; SOIL 4100, 4105, 4120, 4130, 4140, 4150, 4160

3 Chemistry Elective - Select one: CHEM 1000 Fall only, CHEM 1020 Fall, Spring or Summer, CHEM 1050. All courses listed here meet USP:PN

4 Economics Elective - Select one: ECON/ERS 3400 (preferred); AGEC 3750, 4600, 4700, 4720; ECON 4420

5 Data Analysis Elective - Select one: BOT 4211; ENR 4500, 4525; ES 1060; GEOG 4211; GEOL 2120, 4250, 4525; GIST 4211; IMGT 1400; STAT 3050; ZOO 4400

6 Negotiation Elective - Select one: AGEC 4450, 4550; ENR 4450, 4550

7 COM 3 Elective - Select one: ENR concurrent majors take ENR 4900; all other students select from ENGL 4010, 4025, 4075

8 Technical Elective - Select one: Any 3000/4000 ENR, GEOG, SOIL, REWM, or RNEW class except ENR 4750

Professional Land Management Concentration

Students of the Professional Land Management concentration develop a complex and nuanced understanding of the U.S. legal system relative to energy development, including administrative law, legislation and regulation, and the common law of property and contracts. This concentration is a particularly effective option for students who are interested in the legal profession and/or attending law school.

Suggested Course Sequence

Total Credit Hours 120

1 COM2 Elective - Select one: COJO 2010; ECON 2400; ENGL 2005; ENR 2000; ENR 3300; HP 2020; UWYO 1600

2 Ethics Elective - Select one: ERS 2000; MGT 3110; PHIL/ENR 2330

3 General Elective- Select seven (three must be upper-division): ERS 1650, 4960, 4965, 4970, 4975, 4985, 4990; ECON 1010; ENR 1200, 2300, 3450, 3700, 3900, 4040, 4600, 4890, 4960, 4970; 4985 DSCI 3210; GEOG 3150, 3450, 3480, 3550, 4040, 4111, 4210, 4211; FIN 3310, 3520; LIFE 3410; GEOL 1600, 1650, 3600, 3650, 4210; GIST 2160; IMGT 1400, 2400; LS 2100; MGT 3210, 3410, 3420, 4340, 4350, 4360; MKT 3210, 4600; PLNT 1150; PHIL 2420; POLS 4051, 4052; REWM 4210, 4285, 4330, 4530, 4700, 4750, 4830, 4850; SOIL 4100, 4105, 4120, 4130, 4140, 4150, 4160

4 Economics Elective - Select one: ECON/ERS 3400 (preferred); AGEC 3750, 4600, 4700, 4720; ECON 4420

5 Data Analysis Elective- Select one: BOT 4211;ENR 4500, 4525; ES 1060; GEOG 4211; GEOL 2120, 4250, 4525; GIST 4211; IMGT 1400; STAT 3050; ZOO 4400

6 Negotiation Elective - Select one: AGEC 4450, 4550; ENR 4450, 4550

Minor

Energy Resource Management Minor

The purpose of the Energy Resource Management minor is to provide students at the University of Wyoming the opportunity to learn about energy and expand their career opportunities. Students interested in business, economics, finance, engineering, sciences, political science, sociology, agriculture, and environment and natural resources should find this minor of interest.

Proposed Learning Outcomes

The Energy Resource Management minor will provide students with an understanding of the complex role energy plays by meeting the following learning outcomes.

1. Gain appreciation and understanding of fundamental concepts of energy systems.
2. Acquire a foundational understanding of the commercial aspects of energy industries.
3. Exhibit critical thinking and problem solving related to energy and environmental problems.

4. Apply knowledge of energy technology to societal problems requiring economic and policy analysis while working in a multidisciplinary environment.

General Policies

1. A minimum 2.00 UW GPA is required to apply for the minor.
2. It is the student's responsibility to monitor requirements for the minor, along with their advisor.
3. Additional courses may be required to meet individual course prerequisites.
4. All classes in the minor must be passed with a grade of "C" or better.

Core Courses- 6 credit hours needed

- ERS1000 - Energy and Society Credits: 3
- OR**
- ENR1000 - Energy and Society Credits: 3
- ERS3400 - Energy Markets & Policy Credits: 3
- OR**
- ECON3400 - Energy Markets & Policy Credits: 3

Elective Courses- 6 credit hours needed

- ECON1300 - Oil: Business, Culture, and Power Credits: 3
- OR**
- ERS1300 - Oil: Business, Culture, and Power Credits: 3
- AGE3750 - Natural Resource Planning and Economics Credits: 3
- OR**
- ENR3750 - Natural Resource Planning and Economics Credits: 3
- INST4455 - Energy Security Credits: 3
- OR**
- POLS4455 - Energy Security Credits: 3
- POLS4350 - Sustainable Development and Global Policy Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- SOC3950 - Environmental Sociology Credits: 3
- OR**
- ENR3950 - Environmental Sociology Credits: 3
- ERS2010 - Introduction to Land Management Credits: 2
- ERS4100 - Property I Credits: 3
- ERS4110 - Law of Contracts Credits: 3
- ERS4120 - Federal Public Land Law Credits: 3
- ERS4130 - Oil and Gas Law Credits: 3
- ERS3010 - Air Quality Management Credits: 3
- ERS4050 - Solar Energy Conversion Credits: 3
- OR**
- CHEM4050 - Solar Energy Conversion Credits: 3
- ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate Credits: 3

University Honors College

Guthrie House

Peter Parolin, Dean

Phone: (307) 766-4110

Web site: uwo.edu/honors

The Honors College provides academically ambitious students with a series of curricular and co-curricular opportunities. Through these opportunities, students gain the breadth of knowledge needed by citizens, professionals, and family members to be effective in a lifetime of stimulating and enriching pursuits. Honors students learn to write cogently for a variety of audiences in their academic disciplines and beyond. They learn to locate and use reliable information and trustworthy opinion. Through appropriate coursework, they learn how to become engaged citizens and to understand the ethnic and cultural diversity of America and the world. They learn the purposes and values of the arts, humanities, sciences and social sciences. The Capstone Project is a sustained research or creative activity through which students demonstrate what they have learned: to formulate a project independently, to develop the intellectual and creative means to complete it, and to write and speak effectively about their work. The Capstone Project is frequently used as evidence of critical thinking in graduate and career applications.

Learning Outcomes

Students graduating from the Honors College will be able to: (1) engage in problemsolving, research, and creative pursuits that utilize an interdisciplinary approach (2) articulate the value of international and diversity-focused perspectives (3) develop their own styles of leadership and service and identify meaningful opportunities for engagement in these areas and (4) create intentional pathways through career development, including utilizing internship opportunities.

Admission

The Honors College seeks well-rounded, ambitious, and curious learners and leaders. Students are invited to apply to the college prior to their first year. First year applicants should apply to the Honors College when submitting their general application to UW. The Honors College admissions committee considers academic performance and test scores holistically alongside an application essay and high school transcript.

Students admitted into the Honors College who are College of Engineering majors will automatically be accepted as Honors College Engineering students.

The Honors College reviews applications on a rolling basis. Students are admitted to the Honors College only after they have been accepted to UW.

The Honors College also welcomes application from new transfer students. Transfer students entering the Honors College typically have an overall college GPA of 3.25 or higher. The college also admits transfer students and current UW students with at least three semesters remaining prior to graduation.

To maintain good standing in the college, a student must achieve a 3.0 GPA at the conclusion of the student's first year of study. A 3.25 GPA at the conclusion of the student's second year of study is required, with this standard remaining throughout their academic career. Interested high school seniors and transfer students are encouraged to come by the Honors College or to write to the Dean, The Honors College, Dept. 3413, 1000 University Ave, Laramie, WY 82071. The email address is honors@uwyo.edu.

Scholarships

The Honors College supports UW in financial aid packages for students. In keeping with the vision of Honors to facilitate an international experience, Honors provides scholarships to assist with study abroad. To be scholarship eligible, students must have a minimum cumulative 3.250 GPA. Fellowships for supporting research or creative projects for the senior thesis may also be available.

Program Requirements

To earn a minor in Honors, Honors students must complete a total of five courses in Honors and a Capstone Project, and complete each level of the Honors SOAR badge requirements. They must also graduate with a 3.250 UW GPA. Students who transfer to UW or join Honors as continuing UW students may have some of their required Honors courses and SOAR requirements waived.

The Honors curriculum immerses students in multi-disciplinary inquiry. We begin with the First Year Colloquium, a two-semester course sequence that takes a complex topic - for example, *Dreams and Reality - or- What Does it Mean to be a Human* and explores it with readings based in the humanities, arts, sciences, and social sciences. We enrich the course with visits to the theatre, the Art Museum, and other UW resources, building community while learning about UW. Thereafter, students enroll in three additional courses: an Honors Non-Western Perspectives course and six hours of upper division coursework in Honors that emphasize interdisciplinarity. It is strongly recommended that students take on average one Honors course per year. Throughout their Honors academic track, students will complete each level of the Honors SOAR Badge.

The Honors experience concludes with a Capstone Project, either a paper or project, done under faculty mentorship and presented publicly. This requirement ensures that students gain creative or research experience in an area of their interest. These projects often lead to graduate studies or a special career path.

Honors College Minor Curriculum

Honors College Minor Curriculum

Honors SOAR Badge requirements

Students are required to complete each level of the Honors SOAR Badge program. Details are available from the Honors College.

Capstone Project (Creative or Research-based)

Students are not required to register for a specific course to complete the Capstone Project. There is no specific Capstone Project course; students complete the project independently in coordination with a faculty mentor.

- Honors does offer an optional independent study course if desired. Up to 6 hours of credit in the optional HP4976 - Independent Study are allowed.
- HP 4976 does not meet any specific Honors coursework requirements or USP requirements.
- Students may be pursuing a major that requires a senior or capstone project, and a major specific project may also meet the requirement for the Honors College Capstone Project. Please contact the Capstone Project Coordinator for details.

Honors Additional Requirements

Students must also graduate with a 3.25 cumulative UW GPA.

Successful completion of the program is indicated on transcripts and diplomas, and seniors are recognized at graduation ceremonies.

Priority registration for enrollment in Honors courses is given to Honors College students, although non-Honors students with a 3.25 GPA or with permission of the instructor are eligible and encouraged to enroll once the general registration period begins, if space is available. Requests for enrollment must be approved by the Honors College office.

Advising

The Honors College offers supplemental advising that supports the work that students do with their primary major advisors. Honors Advising instructs students on Honors curriculum requirements and helps students select their Honors courses. Students work with their primary major advisor to plan their courses each semester and to monitor progress towards degree completion. Students cannot register for Fall or Spring classes without meeting with their primary major advisor.

Other Programs

Honors College Minor Curriculum

Required Courses

Honors Colloquium I (3 Hours)

- HP1020 - Honors Colloquium I Credits: 3 (COM1)

Honors Colloquium II (3 Hours)

- HP2020 - Honors Colloquium II Credits: 3 (COM2)

Honors Non-Western Perspectives (3 Hours)

Must be three unique courses to meet these requirements; a single course cannot count as both the Non-Western and an Upper Division Interdisciplinary Honors Elective.

Upper Division Interdisciplinary Honors Electives (6 Hours)

Must be three unique courses to meet these requirements; a single course cannot count as both the Non-Western and an Upper Division Interdisciplinary Honors Elective.

- Any two upper division Honors courses excluding HP 4976

UWYO

UWYO courses are designed to help students acculturate to college life and coursework and learn key academic skills. Course content is combined with training in critical reading, academic writing, research, formal presentation, and many other emphases. UWYO courses have low student-teacher ratios in an effort to help students experience richer connection with the instructor and students in the course. Most UWYO courses imbed intellectual self-awareness within the course goals. Several UWYO courses are part of UW learning communities and provide additional opportunities for students to engage with and work together in their cohort.

STEP

USP Codes are listed in brackets by the 2003 USP code followed by the 2015 USP code (e.g. [QB><Q]).

STEP courses are housed within the Learning Resource Network (LeaRN) Program and comprise first-year and academic success courses aimed at supporting students in college research, written and professional communication, major and career exploration, and general transition strategies. STEP courses are often embedded in first-year programs including Fall Bridge, First-Year Experience, First-Year Interest Groups (FIGs), and First-Year Seminars.

English Language Center

Cheney International Center 28

Frederica Suess, Director

Phone: (307) 766-3630

Web site: www.uwyo.edu/geo/elc

Our Mission

The English Language Center serves the University of Wyoming and surrounding community by preparing non-native speakers of English linguistically, culturally, and academically to meet the requirements for success in U.S. higher education environments and to fully engage in campus life.

IEP Conditional Admission: Conditional admission is available for undergraduate applicants who are academically eligible but have low language proficiency scores. Students need to do 2 applications; one for IEP and one for a degree program for consideration. *Only one application fee is needed. Contact us directly if you are interested in this option: elc@uwyo.edu.

Other Programs

Intensive ESL Program

The Intensive ESL Program is a full-time English language study program. Students are in class 20 hours every week for one whole semester of 15 weeks. To study in the Intensive ESL Program, students must have an F-1 Student Visa. All instructors are experienced ESL professionals and qualified with a Masters Degree or higher in TESL or a relevant field of study.

Courses

Students take three classes daily, Monday through Thursday:

- Reading & Vocabulary: College vocabulary skills, reading strategies, and study skills.
- Listening & Speaking: Pronunciation/conversation, lecture listening, note-taking skills, and academic presentations.
- Integrated Skills: Grammar-focused reading, writing, and speaking class using top-ics from academic content areas.

University of Wyoming at Casper

University of Wyoming at Casper

Brent L. Pickett, Ph.D., Dean

125 College Drive, Casper WY 82601

(307) 268-2713

Web site: <https://www.uwyo.edu/uwcasper/>

Since 1976, the University of Wyoming at Casper (UWC), in partnership with Casper College, has offered on-site courses and a slate of university degree programs in Casper. UW-Casper is also the location in Natrona County for statewide degree programs and classes offered through Distance Credit Programs.

UW-Casper was established to meet the needs of students unable to move to Laramie. Some of these students are nontraditional students who may be older or have families, homes, or jobs in the Casper area. UW-Casper is designed to meet the academic needs of students in a setting that provides small class sizes, dedicated staff, and award-winning faculty. Courses are taught by resident and visiting faculty who are regular or part-time members of UW academic departments. A full-service student success office handles admission, registration, financial aid, and advising.

Classes are taught onsite on the Casper College campus. More than 4,000 students have received their UW degrees through UW at Casper support and programs.

UW-Casper also has the Bachelor's of Applied Science (BAS) program. This fully online program is designed to stack onto an associate's degree to help persons already in the job market further develop their skills and advance their career potential. There are two areas of concentration available in the BAS, one in Health Services Administration and the other in Organizational Leadership.

For more information, contact UW at Casper at 125 College Drive, Casper, WY 82601; (307) 268-2713, (877) 264-9930; or by e-mail at uwcasper@uwyo.edu.

Major

Health Services Administration, B.A.S.

Dr. Josh Valk, Director- Bachelor of Applied Science Program

jvalk@uwyo.edu

This program is available by distance delivery only. Entry into the program requires an application process. Students must apply for admission to UW first. Official transcripts from all institutions attended must be submitted to UW Admissions. Entry into this program requires an existing associate's degree. Transcripts will not be analyzed prior to application.

All students pursuing a bachelor's of applied science degree with a concentration in Health Services Administration are required to complete: a) University Studies Program (USP) requirements, b) 120 approved credits, 42 of which must be upper division (with 30 coming from UW), and c) courses within the program checklist. The program is designed to be completed in two years, but students may move at a pace that works for them.

The University Studies Program (USP) ensures that each student's program includes the elements essential to a lifetime of personal and professional growth: habits of mind, practices of active citizenship, and development of intellectual skills. The USP program requires students to develop skills that include the ability to express oneself in speech and writing; to locate, evaluate and effectively use information; and to examine problems from quantitative, qualitative, and scientific perspectives. The USP requirements will be approximately 30 credit hours of your overall degree program.

All courses within the Bachelor of Applied Science must be completed with a grade of C or better. If you do not pass the course with a grade of C or better after three attempts you will be dismissed from your organizational leadership major.

Each student is assigned an advisor, who can be reached at (bas@uwyo.edu), and will be advised each semester. It is important that you work closely with your advisor to plan your course schedule.

University Requirement - All degrees at the University of Wyoming require 42 upper division credit hours (3000+).

Residency Requirement - All degrees must include a minimum of 30 upper division credit hours from UW.

Major Requirements (9 Credits)

- AGRI3000 - Discovering and Utilizing Ideas and Information Credits: 3
- AGRI4600 - Developing Organizational Leadership Credits: 3
- COJO3010 - Business and Professional Communication Credits: 3
- OR**
- COJO3190 - Cross-Cultural Communication Credits: 3
- OR**
- ENGL4010 - Technical Writing in the Professions Credits: 3

Organizational Leadership Requirement (12 credits)

This area of emphasis guides students through an examination of how managers create value by understanding and developing employee and customer relationships. We **strongly suggest** that students complete AACT1010 and ECON 1010, both which are available from , and articulated with, the community colleges through Wyoming before taking these courses.

All four courses required:

- MGT3110 - Business Ethics Credits: 3
- MGT3210 - Management and Organization Credits: 3
- MKT3210 - Introduction to Marketing Credits: 3
- MGT3410 - Human Resources Management Credits: 3

Health Services Administration Requirement (14 credits)

The following 5000 level courses will be cross-listed at the 4000/5000 levels in Fall of 2022. PHCY 4160 will be the first course new majors will be placed in for this semester.

All five courses required:

- PHCY4160 - Problems in Pharmacy Credits: 1-4
- PHCY5040 - The Evolution of American Health Credits: 2
- PHCY5141 - Introduction to Health Economics and Outcomes Credits: 3
- PHCY5241 - Introduction to Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5341 - Introduction to Healthcare Quality Credits: 3

Contemporary Society requirement (2 courses, 6 credits)

Pick **two courses** from the following courses listed:

- COJO3160 - Theory of Language and Society Credits: 3
- CRMJ3500 - Drugs and the Criminal Justice System Credits: 3
- CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law Credits: 3
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6
- HIST4340 - The Social History of American Women Credits: 3
- HIST4490 - Modern America, 1960 to Present Credits: 3
- HIST4545 - The Multicultural West Credits: 3
- POLS3100 - Politics and the Judicial Process Credits: 3

- POLS3600 - American Political Thought Credits: 3
- POLS4051 - Environmental Politics Credits: 3
- SOC3150 - Collective Behavior and Social Movements Credits: 3
- SOC4370 - Global Political Economy Credits: 3

- SOC4370 - Global Political Economy Credits: 3

Career Electives (9 credits)

Students will work with their advisor to identify these career electives.

Course Offerings

Changes in Catalog Information

The course offerings and requirements of the University of Wyoming are under examination and revision continually. This catalog is not a contract; it merely presents the offerings and requirements in effect at the time of publication and in no way guarantees that the offerings and requirements will not change.

Not all courses are offered each term. The listing of courses does not imply a contractual obligation to offer the same during the year of publication of this catalog. The university reserves the right to offer, limit, or cancel course offerings for academic, funding, or facility considerations, and to cancel any offered course for which there is not sufficient enrollment.

The university reserves the right to change approved course listings at any time during a student's term of residence.

Preparatory Courses Taught at UW by Laramie County Community College

The University of Wyoming has contracted for Laramie County Community College to offer preparatory courses on the university campus. University students will register through the normal university registration process. Inclusion of these courses in a student's schedule will count as part of the credit load for determining full-time status; however, UW credit is not awarded. For further information, contact the LCCC coordinator, at (307) 766-2514 or go to Ross Hall, rooms 26 and 27.

Course Credits

The amount of credit offered for any course work published in this catalog is based on and governed by prior university faculty recommendation and institutional determinations.

A credit hour denotes a unit of academic work. Normally, one credit hour is earned in a course meeting one hour per week for a semester (15-16 weeks). Each credit hour unit requires an average of three hours of student-effort per week. In variable-credit courses, the efforts required of the students are proportional to the credit hours attempted.

Even if topics differ in separate sections, variable-credit courses have limits on the number of credits which can be earned in that course in a semester and/or a student's career.

Format of Course Listings

On the following pages, courses approved for offering are listed by college, program subject, and course level (number).

The heading which precedes the brief description of each course shows the current course identification number; former course number(s), if any, in brackets; course title; a designation in bold brackets (**[QB<>Q]**), e.g. **[USP 2003 designation<>USP 2015 designation]**, if any, concerning applicability of the course to the University Studies Program (see below for designation); the number of semester credit hours established for the course (fixed or variable with the semester); and the career maximum of credit for successive term enrollments in the identified course, if different from the established semester credit-hours limit. For example, "1-3 (Max.9)" means that a student may earn between 1 and 3 hours of credit for that course within one semester and a maximum of 9 hours within a degree career. The course description indicates any prerequisites for that course and if it is offered for satisfactory/unsatisfactory grading only.

Course Levels

University courses are distinguished by number indicating five levels of instruction as follows:

0000-0999	Preparatory courses (no credit)
1000-2999	Primarily for Freshmen and Sophomores
3000-4999	Primarily for Juniors and Seniors
5000-5999	Primarily for Graduate Students
6000-6999	Law courses, WWAMI courses, and Doctor of Pharmacy courses

A bracketed course number [] indicates a previous number of the same course. Double credit cannot be earned by repeating a course.

Prerequisites are the primary factor which normally govern whether a student may enroll for any particular course. However, individual departments and/or colleges may place additional restrictions on course enrollments (e.g. enrollment may be restricted by student classification).

Enrollment in engineering courses is generally limited to engineering students.

Law courses are normally open only to students approved for the program.

Graduate students may enroll in courses numbered 1000-3999 to satisfy undergraduate deficiencies but only courses numbered 4000 and above will be computed into the graduate GPA and allowed for graduate credit.

University Studies Program Designations

C1 = Communication 1

C2 = Communication 2

C3 = Communication 3

FY = First-Year Seminar

H = Human Culture

PN = Physical and Natural World

Q = Quantitative Reasoning

V = U.S. and Wyoming Constitutions

*Please note: Throughout the department pages and course descriptions in this catalog, a few of the USP 2015 designations will appear as such: C1 = COM1; C2 = COM2; C3 = COM3; FY = FYS.

Accounting

ACCT2010 - Principles of Accounting I

0667

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

ACCT2110 - Managerial Accounting

Credits: 3

An introductory course concerned with the use of accounting information by nonaccountants for planning, product costing, performance assessment and non-routine decision making. Not available for credit for accounting majors.

Former Course Number [3110]

Prerequisite: ACCT 2010 and ACCT 2020 (or equivalents); non-accounting majors.

ACCT3070 - Tax I

Credits: 3

This class covers a broad range of the tax concepts applicable to the taxation of individual taxpayers. Special emphasis will be placed on the role of taxation of the individual and the related decision-making process.

Prerequisite: ACCT 2010 and ACCT 2020, with grades of C or better in each, MATH 1400.

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010, ACCT 2020, and FIN 3250 (or equivalent) or concurrent enrollment, sophomore class standing.

ACCT3230 - Intermediate Accounting I

0668

Credits: 3

First of two courses studying financial reporting. Topics include recording and reporting events in the expenditure and revenue cycles.

Former Course Number [2230]

Prerequisite: ACCT 2010 , ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3240 - Cost Accounting I

Credits: 3

Organizational uses of information to plan, make decisions, and evaluate performance. Specific topics include job order and process costing, cost estimation and CVP analysis, budgeting and variance analysis.

Former Course Number [2240]

Prerequisite: ACCT 2010, ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3430 - Intermediate Accounting II

Credits: 3

Second of two courses studying financial reporting. Topics include debt, equity, revenue recognition, and special issues in expense and liability recognition.

Prerequisite: ACCT 3230 with grade of C or better; advanced business standing, or special permission of Department Head.

ACCT3610 - Accounting Information Systems

Credits: 3

Provides an understanding of accounting information systems and internal controls. Emphasis on the use of current accounting technology, accounting software and internal control systems.

Former Course Number [2040, 3010]

Prerequisite: ACCT 3230 with a grade of C or better; advanced business standing.

ACCT4050 - Governmental and Nonprofit Accounting

Credits: 3

Designed to introduce students to accounting for state and local governmental entities and nonprofit organizations. Students learn about the entity structure, accounting practice, accounting systems and reporting practices for these organizations.

Prerequisite: ACCT 3230 with a grade of C or better; advanced business standing.

ACCT4060 - Auditing I

Credits: 3

A study of the scope, activities, and responsibilities of professional auditors. Topics include assurance services by public accountants and professional judgment in the process of assessing risks, planning and performance audit procedures, and

reporting on financial fairness.

Prerequisite: ACCT 3230 with a grade of C or better; ACCT 3610 with a grade of C or better (or concurrent enrollment); advanced business standing.

ACCT4540 - Cost Accounting II

Credits: 3

Advanced topics in cost accounting concerning the organizational uses of information to plan, make decisions, and evaluate performance.

Prerequisite: ACCT 3240 with a grade of C or better and sophomore standing.

ACCT4600 - Professionalism and Ethics

Credits: 3

Examines professional ethics for accountants from both a philosophical and business perspective. Moral development, ethical reasoning, and ethical decision making provides a framework for examining the importance of ethics in the accounting profession. Professional guidance on ethics in accounting is also examined, including the AICPA Code of Professional Conduct, the Sarbanes-Oxley Act, and the codes for other professional accounting organizations.

Prerequisite: ACCT 3070, 3610, and ACCT 3430 (or equivalents) with grades of C or better in each; ACCT 4060 with a C or better or concurrent enrollment; advanced business standing.

ACCT4900 - Problems in Accounting

Credits: 1-4

An arrangement whereby students may investigate a particular problem area in accounting on an individual basis.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours in accounting; advanced business standing; junior standing; and written consent of instructor.

ACCT4960 - Volunteer Income Tax Assistance

Credits: 1-3

Max Credit 3

The Volunteer Income Tax Assistance (VITA) program is an IRS-sanctioned program designed to help low-income individuals and families file their federal and state taxes through trained volunteers. This course trains students to assist taxpayers in filing tax returns through the VITA program.

Prerequisite: ACCT 3070 (or concurrent).

ACCT5030 - Advanced Financial Accounting

0670

Credits: 3

Advanced topics in financial reporting for students planning careers as professional accountants. Topics may include: business combinations, consolidated financial reporting, segment and interim reporting, SEC reporting, multinational accounting and reporting, and other emerging topics.

Prerequisite: ACCT 3830 (or equivalent) with a grade of C or better; graduate standing.

ACCT5040 - Seminar in Managerial Accounting

Credits: 3

Organizational development of financial and nonfinancial budgets, interaction between performance measurement systems and human behavior, and advanced topics in uses of information for decision making.

Prerequisite: ACCT 3240 (or equivalent) with a grade of C or better; graduate standing.

ACCT5060 - Auditing II

Credits: 3

An in-depth study of the financial statement audit and the professional responsibilities of public accountants. The role of professional judgment and skepticism is emphasized in case studies and research involving current auditing issues, including financial statement fraud.

Prerequisite: ACCT 4060 (or equivalent) with a grade of C or better; graduate standing or instructor and program director permission.

ACCT5065 - Fraud Examination

Credits: 3

The study of fraud against organizations and individuals. Includes consideration of how and why fraud is committed, the basics of fraud investigation, and fraud prevention. Coverage may also include an in-depth study of specific fraud cases based on the above elements.

Prerequisite: ACCT 4060 (or equivalent) with a grade of C or better; graduate standing or instructor and program director permission.

ACCT5066 - Seminar on Management Fraud

Credits: 3

An in-depth study and analysis of the causes, methods, and consequences of financial statements fraud committed by top management in the organization. The course covers psychological and criminological theories of management fraud, as well as detailed analysis of high-profile managements frauds. Seminar format.

Cross Listed MBAM 5404.

Prerequisite: graduate standing or permission of instructor.

ACCT5070 - Tax II

0671

Credits: 3

Choice of entity and special tax subjects. Emphasis will be placed on the importance of ethical considerations, competent tax research, and thoughtful tax planning.

Prerequisite: ACCT 3070 (or equivalent) with a grade of C or better; graduate standing.

ACCT5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduces students to basic financial accounting and reporting issues related to energy producing activities. Specifically, the course will investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. The course will also cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Cross Listed MBAM 5503.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

ACCT5850 - Advanced Problems in Accounting

Credits: 1-8

Max Credit (Max. 8)

An arrangement whereby students may investigate a more advanced problem area in accounting on an individual basis.

Prerequisite: consent of instructor; graduate standing.

ACCT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ACCT5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Adult Education

ADED1008 - Eastern Thought Western Practice

Credits: 2

Major concepts of Eastern thought from Confucius and Osho are explored, examined, to understand eastern ways of perceiving reality, knowledge, and values. Hands-on activities are employed to experience and practice the applications of the concepts. Students are challenged to critically think, analyze, and compare with their own, increase their consciousness of diversity.

USP Code [I<>(none)]

ADED5050 - Learning Theories for Education

Credits: 3

Learning and development theories are essential for educators who are designing and implementing educational applications and opportunities. Topics covered include orientations toward learning, motivation, life transitions, cognition, learning how to learn, self-directed learning, and strategies for improving learning in educational contexts.

Prerequisite: graduate standing.

ADED5880 - Special Problems in Adult Education

Credits: 1-6

Max Credit (Max. 9)

Provides a broad perspective through selected reading material. Wherever possible, the student collects and uses original information from an adult education/instructional technology setting. All work is done independently under the direction of a faculty member.

Prerequisite: graduate standing.

ADED5890 - Seminar in Adult Education

Credits: 1-6

Max Credit (Max. 8)

Advanced students in education work together intensively on current issues and problems relevant to adult education and participate in systematic, critical interpersonal evaluation. Eight hours are permitted on a doctoral program.

Prerequisite: graduate standing.

Advising Career Exploratory Studies

ACES1105 - Academic Success Skills

Credits: 1-2

Designed to provide students the necessary skills to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation, and more.

Prerequisite: Students must obtain instructor approval to register.

ACES3000 - Peer Advising

Credits: 3

This course is designed to help you develop the skills, understanding, competencies, and dispositions needed to be an effective peer advisor at UW. Course content will cover student development theory, interpersonal skills, UW policies/procedures, UW academic requirements, and advising approaches.

Prerequisite: Sophomore standing, COM2, and

ACES3100 - Peer Advising Internship

Credits: 1-6

Max Credit (Max. 6)

Designed to help you apply the skills, competencies, and dispositions that were developed in ACES 3000. The course will allow you to apply and reflect upon student development theory, interpersonal skills, UW policies/procedures, UW academic requirements, and advising approaches. Each internship credit will require a minimum of 3 hours of work per week in the ACES office. Students and the peer advising supervisor will consult in establishing individual student hours.

Prerequisite: ACES 3000 and application to ACES Internship.

African and American Diaspora Studies

AAST1000 - Introduction to African American Studies

Credits: 3

Surveys African presence in America. Selected teachings are designed to give the student a concise understanding of the heritage of African people in America.

USP Code [D<>(none)]

AAST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed NAIS 1030 /AMST 1030 / WMST 1030/LTST 1030.

USP Code [L,D<>(none)]

Note: Enrollment preference will be given to We The People FIG students.

AAST1101 - First-Year Seminar

Credits: 3

USP Code [(none<>FYS)]

AAST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed INST 2240.

USP Code [WB<>COM2]

AAST2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed ENGL 2350.

USP Code [WB,D<>(none)]

Prerequisite: WA/COM1.

AAST2360 - African American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.

USP Code [CH,D<>COM2]

AAST2450 - Traditional African Religion

Credits: 3

Surveys traditional religions of Africa, both ancient and contemporary.

Cross Listed RELI 2450.

USP Code [CH,G<>COM2]

AAST2990 - Topics:

Credits: 1-3 or 3

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in African American & Diaspora Studies not covered by program courses.

AAST3000 - African American Studies in Music

0675

Credits: 3

Surveys African American music from its origins in Africa to current, popular jazz, rock, soul and rap forms.

USP Code [none<>H]

AAST3010 - The African American Aesthetic

Credits: 3

Examines interrelationship of the creative process with cultural and philosophical motifs, as well as the spiritual and the artistic amongst African people on the continent and Diaspora.

Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST3260 - African Spirits in the New World

Credits: 3

Begins with Yoruba roots in Africa travels with the African Diaspora focusing on spirit possession in Haitian Vodou, Cuban Santeria, Jamaican Revival Zion, Jamaican Rastafarianism, Brazilian Candomblé, and "Black Church" in the United States using ethnography and postcolonial theory of religious studies.

Cross Listed RELI 3260.

USP Code [CH,G<>H]

Prerequisite: AAST 1000 or any AAST 2000 level course or RELI 1000.

AAST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed HIST 3670.

USP Code [CS,G<>(none)]

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/ HIST 2360.

AAST3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed INST 3933 /PHIL 3933.

USP Code [(none)<>H]

Restricted Restricted to junior or senior class standing.

Prerequisite: A prior course in AAST, INST or PHIL.

AAST4000 - Black Freedom Movement, AAST 1955- Present

Credits: 3

Presents the struggle of African Americans for self-definition, self-development, and self-determination from the inception of the modern civil rights movements to the contemporary period.

USP Code [CH,D<>(none)]

Prerequisite: 3 hours of AAST courses.

AAST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed HIST 4020.

USP Code [CH,D<>(none)]

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

AAST4050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 4050.

Dual Listed AAST 5050.

Prerequisite: junior standing and instructor consultation.

AAST4100 - African American Religious Culture

Credits: 3

Mid-level writing-intensive seminar. Comparative study of African American religious celebration, primarily in the context of Afro-Christianity, but touching on Islam, Candomble, "Voodoo," Santeria, and Rastafarianism.

Cross Listed RELI 4100.

USP Code [WC,D<>COM3]

Prerequisite: WB and one of the following: AAST 1000 or any AAST 2000-level course or RELI 1000.

AAST4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 4160.

Dual Listed AAST 5160.

USP Code [CH,D<>COM3]

Prerequisite: 9 credit hours in AAST or COJO.

AAST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 4233 and GWST 4233; dual-listed with AAST 5233.

USP Code [WC,D<>COM3]

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

AAST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 5250.

USP Code [D<>(none)]

Former Course Number [AAST 4200]

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP Code [D<>COM3]

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

AAST4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed Cross list with ENGL 4450.

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

AAST4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 4455.

Dual Listed AAST 5455.

USP Code [D<>(none)]

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

AAST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed LTST 4675 /GWST 4675.

USP Code [D<>(none)]

Prerequisite: junior standing and/or a combination of

AAST4970 - Internship in AAST

Credits: 1-12

Designed for students to utilize the knowledge and skills obtained in their program of study to be applied at an organization or institution. Students will provide a job description, sign an internship contract, keep daily work journals, provide work samples, submit a paper, and include a final evaluation by their Internship supervisor.

Prerequisite: 9 hours in AAST courses.

AAST4975 - Independent Research

Credits: 1-3

Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.

AAST4990 - Topics:

Credits: 3

In-depth study of a topic not offered as regular course.

Prerequisite: COM1.

AAST5050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 5050.

Dual Listed AAST 4050.

Prerequisite: junior standing and instructor consultation.

AAST5060 - NGOs, Development, and Culture

Credits: 3

Non-governmental organizations (NGOs) have grown exponentially in number and are often viewed as the new and best vehicle for international development. By focusing on international non-governmental organizations (INGOs), in the contexts of Western aid to post-colonial societies and the role they play in the international aid system, the course explores INGOs from historical, global, and cultural perspectives.

Cross Listed INST 5060.

Prerequisite: junior standing and instructor permission.

AAST5160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the

philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 5160.

Dual Listed AAST 4160.

Prerequisite: 9 credit hours in AAST or COJO.

AAST5190 - Dimensions of Racism

Credits: 3

Explores the effects of racism on African people in America using an African centered framework. We will look at the ways racism intersects with sexism, classism, and heterosexism/ homophobia within the African community both in America and throughout the Diaspora.

Prerequisite: AAST 1000, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level COJO course.

AAST5233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 5233 and GWST 5233; dual-listed with AAST 4233.

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

AAST5250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 4250.

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AAST5260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti- Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 5260.

Dual Listed AAST 4260.

0681

When Offered (Offered spring semester of even-numbered years)

Former Course Number [AAST 5985]

Prerequisite: graduate standing.

AAST5455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 5455.

Dual Listed AAST 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

AAST5560 - Black Popular Culture

Credits: 3

Approaches African American popular culture from theoretical perspectives which include black feminist, postcolonial, and poststructuralist analyses.

Cross Listed AMST 5560.

Prerequisite: graduate standing; instructor consent for undergraduate students.

Agricultural Economics

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP Code [CS<>H]

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP Code [CS<>H]

AGEC1101 - First-Year Seminar

Credits: 3

USP Code [(none<>FYS)]

AGEC1499 - Ag Business Pathways for Success

Credits: 1

We explore student pathways to success in the Agribusiness degree program through college and into careers. This course will help students grow in three focus areas: 1) Skills for program success; 2) Career opportunities afforded by a BS in Agribusiness degree; and 3) Networking with peers, faculty, and alumni.

Prerequisite: Agribusiness major.

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC2040 - Excel Applications in Ag Business

Credits: 3

From production records to financial statements, agribusiness managers must be able to manage and analyze data. The purpose of this course is to teach students how to use Microsoft Excel for common agribusiness management activities.

AGEC3030 - Applied Economic Decisions

Credits: 3

The purpose of the class is twofold: 1) To practice applying concepts, tools, and models from principles of economics to real-world problems affecting agriculture and agribusiness; and, 2) To understand the role of individual behavior in economic outcomes that particularly affect agriculture.

Former Course Number [3020]

Restricted Restricted to AGEC majors.

Prerequisite: AGEC 1010/ECON 1010, AGEC 1020/ECON 1020, and MATH 1400.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP Code [WB<>(none)]

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC3420 - Applied Equity Investing

Credits: 3

Introduces the fundamentals of understanding how the stock market works, what types of investment products are available, how to purchase them and what to look out for in making investment decisions. Students will make investment decisions on a simulated portfolio and write justifications for their purchases.

When Offered (Normally offered spring semester)

Prerequisite: COM2 and MATH 1400.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed INST 3860.

When Offered (Normally offered spring semester)

USP Code [G<>H]

Former Course Number [4860]

Prerequisite: AGEC 1010/ECON 1010 or AGEC 1020.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or ECON 1020 and MATH 1400.

AGECE4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGECE 1020 and MATH 1400.

AGECE4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed GWST 4200.

Dual Listed AGECE 5200.

USP Code [D<>(none)]

Prerequisite: AGECE 1020 or equivalent, or SOC 1000, or GWST 1080, and WB/COM2.

AGECE4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 4230

Dual Listed AGECE 5230

When Offered (Normally offered spring semester)

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

AGECE4280 - International Food and Farm Cultures

Credits: 3

Study-tour course in western France of lectures, fieldtrips, and other cultural activities are integrated into a curriculum to study sustainable food cultures and farming systems. Students live with host families and learn about current policies, belief systems and cultural practices that guide food production, consumption and marketing in Europe.

USP Code [G<>(none)]

Prerequisite: completion of WA/COM1 and I/FYS.

AGECE4450 - Negotiation

0685

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4460 - Agriculture and Economic Development

Credits: 3

Examines the roles of agriculture in the transformation of the economics of underdeveloped countries. Examines development theories, case studies and analytical techniques.

Former Course Number [5460]

Prerequisite: AGEC 1010, AGEC 1020 and a G course.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP Code [(none)<>H]

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

AGEC4660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 5660.

Prerequisite: AGEC 1010/ ECON 1010, ECON 1020 , and junior standing.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGECE 1020 or equivalent; QB course, WB course; senior standing.

AGECE4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or equivalent.

AGECE4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGECE4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP Code [G<>(none)]

Prerequisite: ECON 3020 and junior or senior standing.

AGECE4890 - Special Topics in _____

Credits: 1-3

Accommodates seminar series or course offering by visiting faculty whose subject matter is not included in other courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing and/or consent of instructor.

AGECE4910 - Problems in Agricultural Economics

Credits: 1-3

Consists of supervised study and investigation on topics of current importance in agricultural economics.

Prerequisite: 12 hours in AGECE or ECON and consent of instructor.

AGEC4930 - Agricultural Economics Internship

Credits: 1-6

Provides practical agricultural business firm and/or agency experience. Develops working knowledge of how basic economic concepts are used by firms and agencies in policy and procedures development and decision making by the organization.

Prerequisite: 10 hours of AGECEC and approval of faculty supervisor.

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP Code [WC<>COM3]

Prerequisite: senior standing, WB/COM2 writing course and AGECEC 2020, or AGECEC 4500, or AGECEC 4060, or FIN 3250.

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP Code [(none)<>COM3]

AGEC5200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed WMST AGECEC 5200.

Dual Listed AGECEC 4200.

Prerequisite: AGECEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB/COM2.

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 5450.

Dual Listed AGEC 4450.

Prerequisite: completion of USP O/COM2 requirement; junior standing or consent of instructor.

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGEC 4550.

Prerequisite: QA/Q.

AGEC5600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development.

Provides training in regional economic theory, regional economic analysis, fiscal impact analysis and benefit cost analysis.

Prerequisite: consent of instructor.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

AGEC5650 - Communicating Research

Credits: 3

Focuses on the broad methods, and written and oral communication of research in applied economics. Topics include formulating a research question, organizing a manuscript, editing for clarity and conciseness, building effective figures and tables, finding and citing literature, developing and delivering effective presentations, and upholding research ethics.

Prerequisite: graduate standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 4660.

Prerequisite: AGEC 1020/ ECON 1020 or SOC 2090 and junior standing.

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

0691

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5880 - Advanced Seminar

Credits: 1-2

Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGEC and/or ECON.

AGEC5890 - Advanced Problems in Agricultural Economics

Credits: 1-3

Max Credit (Max. 6)

Supervised study and research on current problems in marketing, farm and ranch management, policy prices, land economics or finance.

Prerequisite: graduate standing in AGEC or ECON.

AGEC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

AGEC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AGEC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AGEC5960 - Thesis Research

0692

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

AGEC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Agricultural Education

EDAG3150 - Community Programs in Agricultural Education

Credits: 3
This course is designed to determine the resources and trends of local communities with respect to agricultural production and agribusiness. Emphasis will be placed on agricultural education program policies, FFA chapter advisement, planning and managing the instructional program, and the identification and completion of records and reports required of a teacher of agricultural education in Wyoming.

Prerequisite: Agricultural Education major.

EDAG3160 - Principles of Agricultural Education

Credits: 3
Explores the background, scope and content of agricultural education. Specific competencies required for teacher certification including history, philosophy and trends, successful program planning, applied sciences, organization/utilization of advisory groups, adult education, curriculum, career counseling computer applications, cooperative and SAE programs, facilities and advising the FFA.

Prerequisite: Prerequisites: junior standing.

EDAG4170 - Principles of Agricultural Mechanics and Technology

Credits: 3
Content will emphasize those skills commonly taught in Wyoming agricultural education in the secondary school system with an emphasis on advanced gas and plasma welding theory, small gas engines, and advanced electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4170, EDVE 4170]

Prerequisite: EDAG 4070 or approval of instructor.

EDAG4180 - Techniques of Agricultural Mechanics and Technology

Credits: 3

Techniques of agricultural mechanics and instruction. Content will emphasize those skills commonly taught in the Wyoming school system agricultural mechanics program with emphasis on woodworking, welding theory, agricultural plumbing, and electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4180, EDVE 4180]

Prerequisite: Junior standing or consent of instructor.

EDAG4970 - Individual Problems

Credits: 1-3

Provides flexible credit for seniors who may need credit for graduation, or for students who wish to undertake intensive study of a special problem identified in a regular class. Offered in areas of vocational education, vocational agriculture, family and consumer sciences, and trade and industrial education.

Former Course Number [EDAS 4970, EDVE 4970]

Prerequisite: 12 hours of education courses.

Agriculture

AGRI1520 - Field Practices: Extension

Credits: 1-2

Max Credit (Max. 2)

Project based work that includes practice applications of Extension programming. Directed by Extension faculty around matching topics of youth development, rangeland resources, food safety and nutrition, community development, or profitable and sustainable agriculture. Local issues are addressed in the context of applied research for public good.

AGRI2100 - International Experiences in Natural Resources

Credits: 1-3

Max Credit (Max. 3)

Cultural and environmental topics in another country through classroom sessions, self study, and a visit to the host country. Topics discussed include similarities and differences in natural resource and environmental issues, history, traditions, and cultural norms, focusing on the host country and the United States.

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3

Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP Code [L,L<>(none)]

Prerequisite: WA and junior status.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3

Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

AGRI4500 - International Experiences in Agriculture

Credits: 1

Learn about agricultural customs in another country through classroom lectures, written assignments, and a visit to the host country during the spring break period. Topics discussed include the influence of foreign agriculture on U. S. economies and agricultural practices, focusing on the host country.

Prerequisite: completion of WA course and junior standing.

AGRI4520 - Field Practicum: Extension Work

Credits: 1-4

Max Credit (Max. 8)

Provides practical experiences to those wanting to pursue a career with Cooperative Extension Service. Interns are matched with county-based personnel for hands-on learning experiences across the state. Develop working knowledge of CES's mission to provide the citizens of Wyoming with education and applied research.

Dual Listed AGRI 5520.

Prerequisite: must pass volunteer screening process.

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP Code [(none)<>COM3]

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

AGRI4700 - Elements of Leadership

0695

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 5700.

Prerequisite: Restricted enrollment. Prior approval required.

AGRI4960 - Bachelor of Applied Science Internship

Credits: 6

Provides Bachelor of Applied Science students academic credit for advanced work experiences in their area of specialization. Required to complete academic assignments such as a weekly journal, discussion and writing assignments in addition to their field-based responsibilities. Takes place in a mentored, supervised setting.

Prerequisite: Bachelor of Applied Science student, AGRI 3000, senior status, and consent of instructor.

AGRI4970 - Internship/Practicum

Credits: 1-8

Max Credit (Max. 8)

Internship or practicum experience in Agricultural Communications.

Prerequisite: COM2 or WB.

AGRI4975 - Agricultural Communications Senior Project

Credits: 1

A baccalaureate degree capstone experience incorporating self assessments of student learning, reflective writings, and an analysis, synthesis and evaluation of the agricultural communications curriculum. Students develop and present a personalized, comprehensive, professional portfolio.

Prerequisite: agricultural communication major with senior standing and WB.

AGRI4990 - Topics

Credits: 1-6

Max Credit (Max. 8)

Accommodates topics whose subject matter is not included in other College of Agriculture and Natural Resources and Natural Resources offerings. Please see the class schedule for current topic.

Prerequisite: WB.

AGRI5520 - Field Practicum: Extension Work

0696

Credits: 1-4

Max Credit (Max 9)

Organization, teaching, and promotion of county programs.

AGRI5700 - Elements of Leadership

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 4700.

Prerequisite: Restricted enrollment. Prior approval required.

AGRI5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

AGRI5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

AGRI5959 - Enrichment Studies:1

Credits: 3

Max Credit (Max 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: Credit in this course may not be included in a graduate program of study for degree purposes.

AGRI5960 - Thesis Research

Credits: 1

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Agroecology

AECL1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP Code [SB<>PN]

Former Course Number [CROP/BOT 2000]

AECL1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

AECL2010 - Introduction to Soil Science

Credits: 3

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wildland and agricultural ecosystems. Emphasis of the course is on plant response to soil conditions.

Cross Listed SOIL 2010.

USP Code [SE<>(none)]

Prerequisite: 4 hours of chemistry.

AECL3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and AECL AECL 1000.

AECL4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Cross Listed PLNT 4120.

Prerequisite: 8 hours of LIFE and/or CHEM.

AECL4130 - Applied Remote Sensing for Agricultural Management

0698

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing.

AECL4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400.

Dual Listed AECL 5400.

Prerequisite: LIFE 3400.

AECL4920 - Topics in Agroecology: Research Apprenticeship

Credits: 1-2

Max Credit (Max. 4)

Laboratory and/or field research apprenticeship. Emphasizes individual student-faculty interactions on current topics in agroecology.

Former Course Number [CROP 4600]

Prerequisite: AECL core courses.

AECL4930 - Internship in Agroecology

Credits: 1-3

Max Credit (Max. 6)

Provides students with realistic views of crop science, entomology or soil science through practical, as well as work-related, experiences. Provides positive educational experience to supplement formal academic course work.

Former Course Number [CROP/ENTO/SOIL 4903]

Prerequisite: sophomore standing or higher;

AECL4960 - Agroecology Field Studies

Credits: 2

Various facets of the agroecosystem are covered by visits to agricultural research stations, agri-businesses, private farms, national monuments, historical sites and Federal Parks. Students are exposed to ongoing sustainable research projects and innovative sustainable farming operations where a variety of cropping systems are utilized. Students are usually exposed to archaeological remains of ancient American Indian farming systems. An 8 day trip.

When Offered (Offered as needed)
Former Course Number [PLPA 4000]
Prerequisite: AECL 1000.

AECL4990 - Agroecology Seminar

Credits: 3
Capstone agroecology course for final integration of agroecology courses (AECL 2010, AECL 3030, and LIFE 2023). Provides overall synthesis of these academic subjects following completion of a prescribed senior experience course (AECL 4920 or AECL 4930).

When Offered (Offered spring semester)
USP Code [WC<>COM3]

AECL5400 - Invasive Plant Ecology

Credits: 3
Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 5400.
Dual Listed AECL 4400.
Prerequisite: LIFE 3400.

Air Force ROTC

AIR1000 - Leadership Laboratory

Credits: 0
The concept of leadership laboratory is to provide leadership training experiences which will improve a cadet's ability to perform as a USAF officer. Leadership laboratory is largely cadet planned and directed. All cadets must enroll in leadership laboratory.

Prerequisite: none.

AIR1010 - Heritage and Values of the Air Force I

Credits: 1-0.5
A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.

AIR1020 - Heritage and Values of the Air Force II

Credits: 1-0.5
Continues AIR 1010.

0700

Prerequisite: AIR 1010 or consent of instructor.

AIR2010 - Team and Leadership Fundamentals I

Credits: 1-0.5

Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

Prerequisite: AIR 1010 and AIR 1020 or consent of instructor.

AIR2020 - Team and Leadership Fundamentals II

Credits: 1-0.5

Continues AIR 2010.

Prerequisite: AIR 1010, AIR 1020, and AIR 2010 or consent of instructor.

AIR3010 - Leading People/Effective Communication I

Credits: 3

Teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

Former Course Number [4010]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, and AIR 2020 or consent of instructor.

AIR3020 - Leading People/Effective Communication II

Credits: 3

Continues AIR 3010.

USP Code [CS<>(none)]

Former Course Number [4020]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020, AIR 3010 or consent of instructor.

AIR4010 - National Security Affairs/Preparation for Active Duty I

Credits: 3

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty.

0701

USP Code [G<>(none)]

Former Course Number [4050]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020, AIR 3010, AIR 3020, or consent of instructor.

AIR4020 - National Security Affairs/ Preparation for Active Duty II

Credits: 3

Continues AIR 4010.

Former Course Number [4060]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020, AIR 3010, AIR 3020, AIR 4010 or consent of instructor.

American Studies

AMST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/NAIS 1030/ GWST 1030/LTST 1030.

USP Code [I,D<>(none)]

Note: Enrollment preference will be given to We The People FIG students.

AMST1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP Code [CH,WB<>H]

AMST2400 - Introduction to Historic Preservation

Credits: 3

Online course introduces students to historic preservation theory and philosophy, the history of the preservation movement and contemporary historic preservation as practiced in the public, nonprofit and private realms. Assignments include reading, research, online discussion and lectures (podcasts, videos or PowerPoint presentations), as well as directed field work.

AMST2700 - Introduction to Museology

Credits: 3

Explores the historical, cultural, and contemporary roles of museums and preservation institutions in society. Introduces students to the museum professions, collection and exhibition installation strategies, and ethical problems of governance and collection. Field trips to regional collections are included.

Cross Listed ART 2700/ANTH 2700/HIST 2700.

USP Code [CH<>(none)]

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

AMST3100 - Food in American Culture

Credits: 3

An interdisciplinary exploration of food as a medium of cultural expression, social interaction, and aesthetic experience in American life, both past and present. Examines food as, among other things, a symbolic system, a vehicle of social communication, and an arena for the performance of regional ethnic, gender, etc. identities.

USP Code [C<>(none)]

Prerequisite: any 2000-level course in American Studies, or ANTH 1200, or instructor approval.

AMST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both oppression and liberation.

Cross Listed GWST 3400.

USP Code [CH,D<>(none)]

Prerequisite: WA.

AMST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the U.S.

Cross Listed LTST 3800 /GWST 3800.

USP Code [CS,D< >(none)]

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

AMST4010 - Independent Study

Credits: 1-3

Max Credit 6

For upper division students in any major who can benefit from independent study in American Studies with minimal supervision.

Dual Listed AMST 5010.

Prerequisite: 3 hours in American Studies and approval of instructor.

AMST4020 - American Folklife

Credits: 3

Introduces materials and methods of folklife research, examining both verbal and nonverbal expressions of traditional cultures in America. Topics include material culture, belief systems, traditional events and celebrations, and folk performances of many kinds.

Dual Listed AMST 5020.

Prerequisite: Any six hours from among AMST 2010, ENGL 2400, NAIS 2340, AAST 2450, AAST 2730, AAST 3000, AAST 3010.

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

AMST4040 - Historic Preservation and Sustainability

Credits: 3

Explores the historic preservation and sustainability movements and contemporary practices in these inter-related fields. Through reading, lectures, discussions and site visits, students will study how the historic preservation and the building industry professions can address advanced issues in sustainability related to the environment, culture and economics.

Cross Listed ARE 4040.

Prerequisite: 6 hours in AMST or ARE.

AMST4051 - Environmental Politics

0704

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

Prerequisite: POLS 1000.

AMST4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052 / ENR 4052 / GEOG 4052 / REWM 4052.

Prerequisite: POLS 1000.

AMST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 4250.

Dual Listed AMST 5250.

USP Code [D<>(none)]

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST4300 - American Culture and the Public Sector

Credits: 3

Surveys American culture studies in the public sector. Topics include history and theory of public sector humanities and social sciences; types of public sector jobs and institutions where public humanists work; and public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 5300.

When Offered (Offered once a year)

Prerequisite: 12 credits in humanities or social science courses having to do with American culture.

AMST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed GWST 4430.

Dual Listed AMST 5430.

USP Code [(none)<>H]

Prerequisite: Consent of instructor.

AMST4500 - American Civilization

Credits: 1-8

Max Credit 8

Explores various interdisciplinary approaches to the American experience, past and present. May include topical, thematic, historical, literary and cultural integrations; for a given semester, the course's precise focus will be indicated in the class schedule.

AMST4640 - Art and Ecology

Credits: 3

Focuses on the intersection of contemporary art with ecological concerns. Readings present philosophical, historical and cultural aspects of the art/ecology relationship; students reflect and question their own beliefs. Examples of art/artists are reviewed as well as how ecological artwork is developed. Students propose solutions and/ or create art in, out of, or about the environment; local sites are encouraged.

Prerequisite: 6 hours of ART and/or AMST or consent of the instructor.

AMST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed LTST 4650/INST 4650/ GWST 4650.

Dual Listed AMST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

AMST4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 4800.

Dual Listed AMST 5800.

Prerequisite: ARE 3020 or AMST 5400.

AMST4900 - Field Studies in Historic Preservation

0706

Credits: 1-4

Max Credit (Max. 4)

Field Studies in American Culture: Gives students hands-on field-based training and experience in researching, documenting, and presenting aspects of American culture. Topics may include historic preservation, folklife, oral history or related fields.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 credits in American Studies or related field. May also be taken for graduate credit.

AMST4970 - Internship

Credits: 1-3

Max Credit (Max. 6)

Gives undergraduate students practical experience by working on a project at a public institution, agency or educational/cultural organization. Offered for S/U only.

Prerequisite: junior standing, completion of AMST 2010 and 12 hours in major and consent of instructor.

AMST4985 - Senior Seminar

Credits: 3

With AMST 4010 or AMST 4970, completes the capstone coursework in AMST. Identifies a broad intellectual tradition in American Studies as foundation for student's research interests; builds a specific scholarly context appropriate to student's research; culminates in a substantial piece of written research appropriate in an identified subfield of American Studies.

USP Code [WC<>(C3)]

Prerequisite: senior standing in American studies or consent of program director.

AMST5010 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

For graduate students in any graduate program who can benefit from independent research and writing in American Studies.

Dual Listed AMST 4010.

Prerequisite: 3 hours in American Studies and consent of instructor.

AMST5020 - American Folklife

Credits: 3

Introduces materials and methods of folklife research, examining both verbal and nonverbal expressions of traditional cultures in America. Topics include material culture, belief systems, traditional events and celebrations, and folk performances of many kinds.

Dual Listed AMST 4020.

0707

Prerequisite: any six hours from among: AMST 2010, ENGL 2400, NAIS 2340, AAST 2450, 2730, AAST 3000 or AAST 3010.

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.

Dual Listed AMST 4030.

Prerequisite: graduate status.

AMST5200 - Material Culture

Credits: 3

Designed to introduce advanced students to the theory, methods, and practice of material culture study. A significant portion of the course will be devoted to a studio exercise in which students collectively document and analyze a material culture form that has been designated by the instructors.

Prerequisite: graduate status or consent of instructor.

AMST5250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 5200.

Dual Listed AMST 4250.

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST5300 - American Culture and the Public Sector

Credits: 3

A survey of American culture studies in the public sector. Topics covered include the history and theory of public sector humanities and social sciences, types of public sector jobs and institutions where public humanists work, and public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 4300.

Prerequisite: graduate status.

AMST5400 - American Built Environment

Credits: 3

Examination of America's built environment from pre-Colonial times to the present day. Factors affecting the architecture and

0708

built form of a given period are discussed together with what the material legacy says about the culture of the period.

Prerequisite: ARE 3020.

AMST5430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed GWST 5430.

Dual Listed AMST 4430.

Prerequisite: Consent of instructor.

AMST5500 - Topics in American Studies

Credits: 3

Selected problems in the theory, practice, and bibliography of American studies. Required of graduate majors in the program and is recommended for students with an interdisciplinary interest in American Culture.

Prerequisite: survey knowledge of American literature and history; graduate standing or consent of instructor.

AMST5510 - Readings in American Studies

Credits: 3

Selected readings in the theory, practice, and bibliography of American Studies. Surveys scholarship in the field and is designed to help graduate students develop thesis topics.

Prerequisite: graduate standing in American studies or related field; consent of instructor.

AMST5550 - Varieties of Literary Evidence

Credits: 3

Selected problems in the use of literary evidence for American studies scholarship.

Prerequisite: graduate standing in American studies or a related field; consent of instructor.

AMST5560 - Black Popular Culture

Credits: 3

Approaches African American popular culture from theoretical perspectives which include black feminist, postcolonial, and poststructuralist analyses.

Cross Listed AAST 5560.

Prerequisite: graduate standing; instructor consent for undergraduate students.

AMST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed LTST 5650 /INST 5650 / GWST 5650.

Dual Listed AMST 4650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

AMST5800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 5800.

Dual Listed AMST 4800.

Prerequisite: ARE 3020 or AMST 5400.

AMST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

AMST5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AMST5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AMST5959 - Enrichment Studies

0710

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: Credit in this course may not be included in a graduate program of study for degree purposes.

AMST5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

AMST5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Animal Science

ANSC1009 - Introduction to Animal Science for 4-H/Youth

Credits: 4
Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses. Intended for high school undergraduates.

ANSC1010 - Introduction to Animal Science

Credits: 4
Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ANSC1030 - Equine Management

Credits: 3
An overview of the horse industry and proper way to manage horses.

When Offered (Normally offered spring semester)

ANSC1070 - Livestock Fitting and Showing

Credits: 1

Teaches fitting and showing techniques for domestic livestock. Students will have the opportunity to fit an animal of their choice and participate in the Little International Livestock Show at the Animal Science Livestock Center.

When Offered (Normally offered fall semester)

ANSC1101 - First-Year Seminar

Credits: 3

USP Code [(none<>FYS)]

ANSC2010 - Domestic Animal Metabolism

Credits: 3

Integrates cellular and whole-animal metabolism through introduction to metabolic regulation. Introduces students to the nomenclature, structures and functions of cellular metabolites and vitamins. Knowledge of chemical structure will be applied to cellular reactions in various tissues of domestic animals. Ruminants and non-ruminants will be contrasted.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC2035 - Companion Animal Nutrition

Credits: 3

Nutrition and biology of digestion of companion/ pet animals. Fundamentals of nutrition and the nutrients, as well as appropriate terminology will be covered, with direct application to companion animals.

When Offered (Normally offered spring semester)

ANSC2070 - Livestock Behavior and Handling

Credits: 2

Teaches basic behavior of livestock species including cattle, swine, sheep and goats. Apply knowledge to effectively learn humane handling techniques and facility design for low-stress management.

Prerequisite: ANSC 1010.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3250 - Equine Behavior and Welfare

Credits: 3

To familiarize students with an equine interest about behavior, learning, and welfare issues associated with management and training of equine.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC3535 - Introduction to Wool Evaluation

Credits: 2

Objectively evaluate raw wool characteristics and quality determining factors across various wool grades and breed types. Particular emphasis will be given to how quality determining factors influence replacement selection and the end product produced. Competitive wool judging format will be used to enhance organizational skills, wool judging terminology, oral articulation skills.

Prerequisite: ANSC 1010.

ANSC3540 - Collegiate Wool Judging

Credits: 1

Students representing the university in regional and national wool intercollegiate contests are selected from this course.

Prerequisite: ANSC 3535.

ANSC3545 - Introduction to Livestock Evaluation

Credits: 3

Objectively evaluate livestock species including cattle, sheep, swine, and goats for both market and breeding standards. Improve communication skills and terminology through oral and written reasons. Gain an understanding of expected progeny differences and how they relate to selection and livestock production.

Prerequisite: FDSC 2040 or instructor approval.

ANSC3550 - Advanced Livestock Evaluation

Credits: 1-2

Students representing the university in national and regional contests are selected from this course. Requires field trips.

Prerequisite: ANSC 3545.

ANSC3555 - Equine Evaluation and Selection

Credits: 3

Objectively evaluate equine for performance and breeding purposes according to breed standards and or discipline. Emphasis will be placed on learning how conformation relates to overall function and longevity of equine. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills.

Prerequisite: ANSC 1010 and ANSC 1030.

ANSC3560 - Advanced Equine Evaluation and Selection

Credits: 1-2

Max Credit (Max. 3)

Objectively evaluate equine for halter and performance according to breed standards and or discipline. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills. Students will compete as members of the Collegiate Horse Judging Team and represent University of Wyoming at national horse judging competitions.

Prerequisite: ANSC 3555.

ANSC3650 - Exploring Graduate Study in Animal Science

Credits: 1

Gives undergraduates the opportunity to explore graduate studies in Animal Science. Discussions center on graduate program searches, applications, and interviews as well as graduate student responsibilities and career possibilities. Undergraduates are paired with graduate student mentors, participate in data collection, and attend departmental seminars.

Prerequisite: consent of instructor, junior standing and

ANSC4050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 5050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

ANSC4061 - Cell Signaling

Credits: 3

Cell signaling pathways in animal growth and development. Defines how cells respond to external stimuli. Includes: G-protein couple signaling, calcium signaling, growth factor associated signaling, redox signaling, lipid related signaling, and apoptosis.

Dual Listed ANSC 5061.

When Offered (Normally offered fall semester of alternative years)

Prerequisite: MOLB 3610 or an equivalent biochemistry or cell biology course.

ANSC4100 - Nutritional Management

Credits: 3

Integration and application of the principles of nutrition. Addresses nutrient requirements, feed composition and nutritional value, in addition to feeding management strategies for various classes of farm animals. Provides practical nutritional experience through laboratory.

Dual Listed ANSC 5100.

Prerequisite: ANSC 3100.

ANSC4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 4111.

0715

Dual Listed ANSC 5111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 3

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 or similar course.

ANSC4130 - Management of Reproduction

Credits: 3

Lecture-laboratory course. Introduces methods of manipulating reproduction within livestock management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, induction of parturition, embryo transfer and control and prevention of diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120.

ANSC4132 - Equine Reproduction

Credits: 2

Introduces methods of manipulating reproduction within equine management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, parturition, embryo transfer, and control and prevention of equine reproductive diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120 and ANSC 3150.

ANSC4150 - Physiology of Ruminant Digestion

Credits: 3

Anatomical structure, function and symbiotic relationship of ruminant digestive system.

Dual Listed ANSC 5150.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3100.

ANSC4210 - Wool Structures and Properties

Credits: 2

Chemical structure and reactions of wool fiber, as well as physical properties as related to structure.

Prerequisite: CHEM 2300 or equivalent.

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

ANSC4240 - Advanced Swine Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in swine production management schemes. Consists of two hours of lecture and two hours of lab, with at least one-half of labs meeting at Animal Science Livestock Center.

Former Course Number [3330]

Prerequisite: ANSC 3100, ANSC 4120, or ANSC 4540.

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

ANSC4260 - Mammalian Endocrinology

Credits: 3

Introduces principles of endocrinology, role of endocrine systems in regulating metabolism, growth, reproduction and lactation in mammals.

0717

Dual Listed ANSC 5260.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010, ZOO 3115, or equivalent.

ANSC4500 - Problems in Animal Science

Credits: 1-3

Provides opportunity for students to conduct supervised research in breeding, genetics, management, nutrition and physiology.

Prerequisite: 6 hours in animal science and consent of instructor.

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

ANSC4550 - Internship in Animal Science

Credits: 2

Provides opportunities to acquire experience in a field of interest to the student. Offers learning experiences that are difficult, if not impossible, to realize in classroom settings. Following off-campus educational experience, students are more able to evaluate potential career opportunities and select additional classes on-campus to complement career direction.

Prerequisite: sophomore standing;

ANSC4630 - Topics and Issues in Animal Science

Credits: 3

Writing-intensive course that focuses on writing projects related to current topics and issues in animal science. Emphasizes writing skills, strategies, information gathering and critical judgment. Assignments include short and long papers, resumes, letters of transmittal, and oral presentations.

USP Code [WC<>COM3]

Prerequisite: senior standing and COM2.

ANSC4900 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Participation of undergraduates in the teaching of ANSC or FDSC courses under the supervision of ANSC faculty/staff.

Prerequisite: junior standing and consent of instructor.

ANSC5050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 4050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

ANSC5061 - Cell Signaling

Credits: 3

Cell signaling pathways in animal growth and development. Defines how cells respond to external stimuli. Includes: G-protein couple signaling, calcium signaling, growth factor associated signaling, redox signaling, lipid related signaling, and apoptosis.

Dual Listed ANSC 4061.

When Offered (Normally offered fall semester of alternative years)

Prerequisite: MOLB 3610 or an equivalent biochemistry or cell biology course.

ANSC5100 - Nutritional Management

Credits: 3

Integration and application of the principles of nutrition. Addresses nutrient requirements, feed composition and nutritional value, in addition to feeding management strategies for various classes of farm animals. Provides practical nutritional experience through laboratory.

Dual Listed ANSC 4100.

Prerequisite: ANSC 3100.

ANSC5111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 5111.

Dual Listed ANSC 4111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC5120 - Principles of Mammalian Reproduction

0719

Credits: 4

In addition to attendance in the lecture component of this course, graduate students will be expected to participate in in-depth weekly discussions of the scientific literature and to prepare a research grant proposal on a specific topic.

Dual Listed ANSC 4120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 or similar course.

ANSC5150 - Physiology of Ruminant Digestion

Credits: 3

The anatomical structure, function, and symbiotic relationship of the ruminant digestive system.

Dual Listed ANSC 4150.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3100.

ANSC5180 - SAS Applications in Agriculture

Credits: 2

Use of PC Statistical Analysis (SAS) software for analysis of data generated using experimental designs common to the agricultural sciences. Course will emphasize applied programming and interpretation of results.

Prerequisite: STAT 5080 or equivalent.

ANSC5260 - Mammalian Endocrinology

Credits: 3

Introduction to the principles of endocrinology. The role of endocrine systems in regulating metabolism, growth, reproduction, and lactation in mammals are discussed.

Dual Listed ANSC 4260.

When Offered (Normally offered fall semester)

Prerequisite: graduate standing.

ANSC5510 - Mineral Metabolism

Credits: 3

Lectures on current mineral nutrition topics with student reports on recent journal articles.

Prerequisite: ANSC 3100.

ANSC5540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating;

0720

and selection.

Dual Listed ANSC 4540.

When Offered (Normally offered fall semester)

ANSC5550 - Investigations in Animal Nutrition

Credits: 2-3

Max Credit (Max. 6)

Special problems involving nutritional research with domestic or laboratory animals.

Prerequisite: ANSC 3100 and consent of instructor.

ANSC5620 - Wool Measurement Methods

Credits: 3

Theory and practice relating to routine and standard analytical fiber measurements.

Prerequisite: ANSC 3040 and STAT 2050 or consent of instructor.

ANSC5680 - Wool Problems Analysis

Credits: 1-5

Max Credit (Max. 10)

Scientific papers on assigned topics.

Prerequisite: STAT 2050.

ANSC5770 - Lipid Metabolism

Credits: 3

An in-depth study of lipid metabolism and regulation of genes and enzymes involved in transport, synthesis, mobilization, and oxidation of lipids with application to ruminant and non-ruminant species as well as to humans.

Cross Listed FDSC 5770.

Prerequisite: ANSC 3100 or MOLB 3610 or FCSC 4145.

ANSC5780 - Investigations in Animal Breeding

Credits: 1-3

Max Credit (Max. 6)

Assigned problems involving genetic and physiological research with domestic or laboratory animals.

0721

Prerequisite: ANSC 4550.

ANSC5865 - Advanced Seminar in Nutrition

Credits: 1-2

Max Credit (Max. 2)

Preparation and presentation of seminars on a variety of topics relating to animal nutrition, metabolism, and livestock production.

Prerequisite: graduate standing.

ANSC5870 - Reproductive Biology Seminar

Credits: 1

A graduate seminar designed to examine a variety of topics relating to the physiological processes of reproduction in mammals.

Prerequisite: graduate standing.

ANSC5880 - Advanced Topics

Credits: 1-3

Max Credit (Max. 6)

Special topics will be offered based on interest of students and faculty. Credit hours are variable

Prerequisite: graduate standing.

ANSC5890 - Advanced Seminar

Credits: 1-2

Max Credit (Max. 6)

Preparation, presentation, and discussion of assigned reports. Invitational lectures by visiting guests.

ANSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ANSC5920 - Continuing Registration: On Campus

0722

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANSC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANSC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Credit in this course may not be included in a graduate program of study for degree purposes.

ANSC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ANSC5961 - Graduate Project

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of the Plan B project.

Prerequisite: must be enrolled in Plan B program and have departmental approval.

ANSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

ANSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Anthropology

ANTH1100 - Introduction to Biological Anthropology

Credits: 4
Basic concepts relating to the origin, evolution and biological nature of the human species.

USP Code [SB<>PN]

ANTH1101 - First-Year Seminar

Credits: 3
USP Code [(none)<>FYS]

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3
Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP Code [CS,G<>H]

ANTH1300 - Introduction to Archaeology

Credits: 3
Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP Code [CS,G<>PN]

ANTH1325 - Wyoming Archaeology

Credits: 3
Max Credit 3

Wyoming's archaeological record spans 13,000 years, from stone tools left by Ice Age mammoth hunters to the wooden

dwellings of native Shoshone Indians to the nation's first trans-continental railroad. Through the tools of archaeology, students learn chronology, modes of subsistence, and material remains left by human cultures in Wyoming.

USP Code [(none)< >H]

ANTH1450 - World Archaeology

Credits: 3

World Prehistory. Recommended for non-majors. A survey of the archaeology of Africa, Asia, Europe, Australia, and the Americas from the evolution of humans to the origins of agriculture to the rise of civilizations such as that of Egypt, China, and Mexico.

USP Code [CS,G< >H]

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP Code [L< >COM2]

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

ANTH2200 - World Culture

Credits: 3

Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)

USP Code [CS,G< >(none)]

ANTH2210 - North American Indians

Credits: 3

Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed NAIS 2210.

When Offered (Offered based on sufficient demand and resources)

USP Code [CS,D< >(none)]

ANTH2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's

vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed HIST 2600.

USP Code [(none)<>H]

ANTH2700 - Introduction to Museology

Credits: 3

Explores the historical, cultural, and contemporary roles of museums and preservation institutions in society. Introduces students to the museum professions, collection and exhibition installation strategies, and ethical problems of governance and collection. Field trips to regional collections are included.

Cross Listed AMST 2700/ART 2700/HIST 2700.

USP Code [CH<>(none)]

ANTH3015 - Introduction to the Music of the World's Peoples

Credits: 3

Introduces music of the world's peoples. Students actively study and document living musical traditions and hear, research and study music from a wide variety of geographical areas of the world.

Cross Listed MUSC 3015.

USP Code [WB,G<>(none)]

Former Course Number [2015]

Prerequisite: MUSC 1000.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP Code [WB<>COM3]

Prerequisite: ANTH 1200.

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

ANTH3410 - Maya, Aztec, and Inca Cultures

Credits: 3

An exploration of the early states and empires of the New World through the archaeological record. Compares and contrasts the Aztec, Maya, and Inca cultures with emphasis placed on origins, political and social organization, ritual beliefs, and reasons for collapse.

Prerequisite: ANTH 1300.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.

Prerequisite: ANTH 1200.

ANTH3900 - Historical Anthropology

Credits: 3

Max Credit 3

Introduces the field of historical archaeology, the archaeological and archival study of literate societies. Introduces the history of the discipline, a survey of contemporary historical archaeological practice, major theoretical debates, and multidisciplinary methods.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH4000 - Conference

Credits: 1-4

Guided independent study.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: senior standing and 15 hours in anthropology.

ANTH4010 - History of Anthropological Thought

Credits: 3

Designed as the capstone course for senior majors. Surveys anthropological theory development. Explores major trends and their relationships. (Normally taken in student's final semester)

USP Code [WC<>(none)]

Prerequisite: ANTH 1100, ANTH 1200, ANTH 1300, ANTH 3300, and ANTH 3310.

ANTH4015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of significant topics. Addresses questions, such as: How do archaeologists identify and solve problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 5015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

ANTH4021 - Seminar in Archaeology

Credits: 3

Considers current topics of archaeological interest.

Prerequisite: ANTH 1300.

ANTH4022 - Seminar in Biological Anthropology

Credits: 3

Considers current topics of interest within biological anthropology.

Prerequisite: ANTH 1100.

ANTH4023 - Seminar in Cultural Anthropology

Credits: 3

Considers current topics of interest within cultural anthropology.

Prerequisite: ANTH 1200.

ANTH4024 - Seminar in Linguistic Anthropology

Credits: 3

Considers current topics of interest within linguistic anthropology.

Prerequisite: ANTH 2000.

ANTH4110 - Zooarchaeology I

Credits: 3

Introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological relationships and problem-oriented taphonomic research.

Dual Listed ANTH 5110.

Prerequisite: ANTH 1300.

ANTH4115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

Dual Listed ANTH 5115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH4120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historic times.

Dual Listed ANTH 5120.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4125 - Northwestern Plains Prehistory

Credits: 3

Northwestern Plains archaeology from the Paleoindian period to historic contact. A review of important sites and artifact types, ongoing UW research projects, regional and other expressions of ideology, Native American ethnohistory and contemporary perspectives, and historic preservation issues.

Dual Listed ANTH 5125.

When Offered (Normally offered every third semester)

Former Course Number [4100]

Prerequisite: ANTH 1300.

ANTH4130 - Old World Archaeology

0729

Credits: 3

Surveys major archaeological sequences of the Old World.

Dual Listed ANTH 5130.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4135 - Quantitative Methods in Anthropology

Credits: 3

A consideration of the use of quantitative methods in anthropological research, including descriptive and inferential statistics, pattern search, mathematical modeling and computer simulation.

Dual Listed ANTH 5135.

Prerequisite: STAT 2070 or equivalent.

ANTH4140 - Archeological Field School

Credits: 2-6

Summarizes a regional prehistory and gives practical and theoretical training in archaeological field methods. Field projects are located specific areas of the world (e. g. , Wyoming, Croatia, Peru).

When Offered (Normally offered summer session)

Prerequisite: ANTH 1300 or ANTH 4120 or ANTH 4125 or ANTH 4130 or ANTH 4150.

ANTH4145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 5145.

Prerequisite: ANTH 1300.

ANTH4150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max. 9)

Covers the prehistory of a specified region or time period within that region. Emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 5150.

Prerequisite: ANTH 1300.

ANTH4155 - Computer Programming for Archaeologists

Credits: 3

Introduces the application of computer programming to the collection, management, and analysis (hypothesis testing) of archaeological data. Develop models and simulations of complex prehistoric systems. Begins with an introduction to Microsoft Excel (Visual Basic for Applications), programming structure, and applications to archaeology. Specific assignments in writing programs relevant to typical archaeological problems.

Dual Listed ANTH 5155.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH4160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) hands-on-experience with GIS applications in archaeology through demonstrations, lectures, and structured inquiries.

Dual Listed ANTH 5160.

Prerequisite: ANTH 1200, or ANTH 1300.

ANTH4170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphical processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 5170.

Prerequisite: ANTH 1300.

ANTH4175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 5175.

Prerequisite: ANTH 1300.

ANTH4190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies and regulations; compliance, heritage, and avocational archaeology, cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 5190

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 5215.

When Offered (Normally offered every third semester)

Former Course Number [4200]

Prerequisite: ANTH 1100.

ANTH4220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 5220.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1100.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

ANTH4240 - Forensic Anthropology Laboratory

Credits: 2

Studies details of advanced osteometric procedures, particularly as applied to problems of human skeletal identification.

Dual Listed ANTH 5240.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 4210.

ANTH4255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 5255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH4260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 5260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH4300 - Anthropology of Religion

Credits: 3

Provides a comparative anthropological study of religious systems, emphasizing analysis of symbolism, myth and ritual.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

Dual Listed ANTH 5320.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4325 - Symbolic Anthropology

Credits: 3

Teaches several anthropological approaches to symbolic and cultural analysis, while reading ethnographic examples of how symbolic analysis can be used to understand different cultures. Coursework assumes a basic knowledge of social science concepts.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4330 - Social Organization

Credits: 3

Provides theories of social organization, interrelations of social institutions, and current anthropological methods of interpretation.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, global politics of AIDS and other pandemics.

0734

Dual Listed ANTH 5350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4380 - Visual Anthropology

Credits: 3

Offers anthropological interpretation of visual representations and media, including analysis of the development of ethnographic films and their contemporary use. Visual representations of many cultures as well as mainstream United States examples are analyzed.

Prerequisite: ANTH 1200.

ANTH4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 5740.

Prerequisite: ANTH 2000 or consent of instructor.

ANTH4765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 5765.

Prerequisite: ANTH 2000 or consent of the instructor.

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing,

and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

ANTH4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Allows students to gain hands-on experience, bridging the gap between anthropology as an academic discipline and anthropology as practiced in museums, public archaeology agencies, non-governmental organizations, and private consulting companies. Involves a required academic component in addition to work experience. Internship credit cannot fulfill requirements of the major.

Prerequisite: anthropology major of junior/senior standing and consent of internship director and/or department head.

ANTH4975 - Undergraduate Practicum in Anthropology

Credits: 1-4

Max Credit (Max. 6)

Affords students the opportunity to extend research projects in field or lab locations and receive additional credit for their work. Students sign up for these hours only in conjunction with another course and with the instructor's consent.

Prerequisite: 9 hours in anthropology, consent of instructor.

ANTH5000 - Special Problems

Credits: 1-4

Max Credit (Max. 12)

Conference course to allow graduate students opportunity for both guided and independent research.

Prerequisite: graduate standing and consent of instructor.

ANTH5005 - Graduate Seminar in Anthropology

Credits: 3

Prerequisite: graduate standing or consent of instructor.

ANTH5010 - 20th Century Anthropology Theory

Credits: 3

Examines major thinkers and schools of thought in anthropology of the 20th century. Emphasis is on cultural theory within the context of the four-field approach.

Prerequisite: graduate standing in anthropology.

ANTH5015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of most significant topics. Addresses questions, such as: How do archaeologists go about identifying and solving problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 4015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH5020 - Biological Anthropology

Credits: 3

Offers a graduate level overview of biological anthropology. Beginning with the history of relevant areas of human biology, provides extensive discussion of such areas as paleoanthropology, primatology, and human variation. Also includes detailed theoretical examinations of topics within hominid evolution, the concept of race and sociobiology.

Prerequisite: first year anthropology graduate student standing.

ANTH5030 - Linguistic Anthropology

Credits: 3

Demonstrates interrelationships between language, human biology, and culture. In particular, the relevance of the study of language to biological anthropology, archaeology, and cultural anthropology is emphasized. Examines classic approaches in anthropological linguistics and recent controversies such as the origin of language in human evolution.

ANTH5110 - Zooarchaeology I

Credits: 3

An introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on the identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological relationships and problem-oriented taphonomic research.

Dual Listed ANTH 4110.

Prerequisite: ANTH 1300.

ANTH5115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

0737

Dual Listed ANTH 4115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH5120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historical times.

Dual Listed ANTH 4120.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5125 - Northwestern Plains Prehistory

Credits: 3

Covers the Northwestern Plains from the Paleo-Indian to historic contact, including relationships to surrounding areas.

Dual Listed ANTH 4125.

Prerequisite: ANTH 1300.

ANTH5130 - Old World Archaeology

Credits: 3

Survey of the major archaeological sequences of the Old World.

Dual Listed ANTH 4130.

Prerequisite: ANTH 1300.

ANTH5135 - Quantitative Methods in Anthropology

Credits: 3

A consideration of the use of quantitative methods in anthropological research, including descriptive and inferential statistics, pattern search, mathematical modeling and computer simulation.

Dual Listed ANTH 4135.

Prerequisite: STAT 2070 or comparable course.

ANTH5145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 4145.

Prerequisite: ANTH 1300.

ANTH5150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max 9)

Covers the prehistory of a specified region or time period within that region. emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 4150.

Prerequisite: ANTH 1300.

ANTH5155 - Computer Programming for Archaeologists

Credits: 3

Introduces the application of computer programming to the collection, management, and analysis (hypothesis testing) of archaeological data. Develop models and simulations of complex prehistoric systems. Begins with an introduction to Microsoft Excel (Visual Basic for Applications), programming structure, and applications to archaeology. Specific assignments in writing programs relevant to typical archaeological problems.

Dual Listed ANTH 4155.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) Background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) Hands-on experience with GIS applications in archaeology through demonstrations, lectures, and structured inquires.

Dual Listed ANTH 4160.

Prerequisite: ANTH 1200 or ANTH 1300.

ANTH5165 - Advanced Archaeological Research

Credits: 3-6

Max Credit (Max. 6)

Intended for graduate students in archeology which will cover a wide range of topics in advanced research techniques.

Prerequisite: graduate standing.

ANTH5170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphological processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 4170.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 4175.

Prerequisite: ANTH 1300.

ANTH5180 - Advanced Archaeological Field Studies

Credits: 6

Covers the entire archaeological process from project planning and budgeting to professional presentation of the results with an emphasis on field methods. Up to date field techniques with electronic data collection and analysis are introduced. Interdisciplinary philosophy is emphasized with lectures, demonstrations and hand-on experience.

Prerequisite: graduate level students or upper level undergraduates with field school experience and consent of instructor.

ANTH5190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies, and regulations; compliance, heritage, and avocational archaeology; cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 4190.

Prerequisite: ANTH 1300.

ANTH5210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 4210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH5215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 4215.

When Offered (Normally offered every third semester)

Former Course Number [ANTH 5200]

Prerequisite: ANTH 1100.

ANTH5220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 4220.

Prerequisite: ANTH 1100.

ANTH5240 - Forensic Anthropology Laboratory

Credits: 2

Studies details of advanced osteometric procedures, particularly as applied to problems of human skeletal identification.

Dual Listed ANTH 4240.

Prerequisite: ANTH 4210.

ANTH5255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 4255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH5260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 4260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH5310 - Environmental Anthropology

0741

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 5310.

Dual Listed ANTH 4310.

Prerequisite: ANTH 1200.

ANTH5320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

ANTH5340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 4340.

Prerequisite: ANTH 1200.

ANTH5350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, this class examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, and the global politics of AIDS and other pandemics.

Dual Listed ANTH 4350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH5730 - Field Techniques

Credits: 3

Students work directly with the speaker of an unwritten non- Indo-European language to learn techniques for eliciting the data requisite to begin a description of the language's structure. Identical to LANG 5310.

Prerequisite: ANTH 5100 or LANG 5300.

ANTH5740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological

and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 4740.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 4765.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5775 - Language and Gender

Credits: 3

Investigates the relationship between language use, linguistic categories, and gender categories. Examines the linguistic practices involved in the formulation, discussion, and performance of gender categories in a number of different cultures.

Dual Listed ANTH 4775.

Prerequisite: ANTH 5010, ANTH 5030, or consent of instructor.

ANTH5785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 4785.

Prerequisite: ANTH 5030 or consent of the instructor.

ANTH5795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change will be discussed. The use of linguistic data for questions of migration and cultural contact also will be explored.

Dual Listed ANTH 4795.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5875 - Graduate Practicum

Credits: 1-4
Max Credit (Max. 6)

Affords graduate students the opportunity to extend research projects in field or lab locations and receive additional credit for their work. Students sign up for these hours only in conjunction with another course and with the instructor's consent.

Prerequisite: graduate standing and consent of instructor.

ANTH5880 - Professionalism

Credits: 3
Provides an opportunity for the integration of graduate training and career choice. Examines issues of professionalism in the discipline ranging from ethical conduct to the research process and publication.

Prerequisite: admission to the doctoral program in anthropology.

ANTH5890 - Teaching Anthropology

Credits: 3
Anthropology is increasingly relevant to many audiences. Provides practical insight and examination of controversial anthropological concepts

Prerequisite: admission to the doctoral program in anthropology.

ANTH5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ANTH5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANTH5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

0744

Prerequisite: advanced degree candidacy.

ANTH5959 - Enrichment Studies:

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: Credit in this course may not be included in a graduate program of study for degree purposes.

ANTH5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ANTH5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

ANTH5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Arabic

ARBC1010 - First Year Arabic I

Credits: 4

Introduces beginning language learners to the Arabic writing system and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) at word, phrase and sentence levels.

USP Code [(none)< >H]

ARBC1020 - First Year Arabic II

Credits: 4

Introduces beginning language learners to the fundamentals of Modern Standard Arabic and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) and practicing them in a variety of academic contexts.

USP Code [(none)< >H]

Prerequisite: ARBC 1010 or LANG 1010.

ARBC2030 - Second Year Arabic I

Credits: 4

Aims to help students attain an elementary level of communication in Modern Standard Arabic through emphasis on listening, speaking, reading and writing. Students expand their vocabulary pool, gain a deeper understanding of Arabic language system, and develop their knowledge of Arab culture.

Prerequisite: ARBC 1020 or LANG 1020.

ARBC2040 - Second Year Arabic II

Credits: 3

Aims to help students attain a lower intermediate level of communication in Modern Standard Arabic with an emphasis on listening, speaking, reading, and writing. Students develop a wider vocabulary pool, gain a deeper understanding of Arabic morphological and grammatical rules, and get acquainted with different aspects of Arab culture.

Prerequisite: ARBC 2030 or LANG 2030.

ARBC3050 - Modern Arabic and its Dialects

Credits: 3

This course exposes students to a range of Arabic dialects and explores their relationship with the Standard and each other. Additionally, this course provides students with opportunities to systematically practice and simulate a variety of dialectal excerpts.

Prerequisite: ARBC 2030 or LANG 2030.

ARBC3060 - Arabic Writing

Credits: 3

This intensive, lower intermediate, Arabic writing course helps students develop the skills acquired during the second year through analyzing and producing different text genres ranging from 200 to 500 words. It will move the student from writing letters, dialogues, reports, and summaries to longer narratives, descriptions, and opinion pieces.

0746

USP Code [WB<>COM2]

Prerequisite: ARBC 2040 or equivalent.

ARBC4990 - Topics in Arabic

Credits: 3

Max Credit (Max 9)

Accommodates seminar series and/or course offerings including those not provided by permanent course offerings.

Prerequisite: ARBC 2040 and consent of instructor.

Architectural Engineering

ARE1000 - VISTA Studio I

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globaliztion, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed CE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2000 - VISTA Studio II

Credits: 3

Students work on a real-world project throughout the semester. Professional topics introduced include project management, engineering economic analysis methods, project estimating, professional ethics, engineering business practices common to the civil and architectural engineering professions, and professional leadership.

Cross Listed CE 2000.

Prerequisite/Corequisite: ARE 1600 or CE 1010 and MATH 2205.

ARE2410 - Fundamentals of Building Performance

0747

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and constructions methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

ARE3000 - VISTA Studio III

Credits: 3

Students will apply professional skills such as project management, engineering economics, professional ethics, and sustainability to an integrated design project. The role of permitting, regulations, and professional codes to design problems will also be explored.

Cross Listed CE 3000.

Prerequisite: ARE 2000 or CE 2000, and ES 2410.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP Code [CH,G<>H]

Prerequisite: WA or COM1.

ARE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed CE 3200.

Prerequisite: ES 2410.

ARE3210 - Civil Engineering Materials

0748

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Non-destructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed CE 3210.

USP Code [WB<>COM3]

Prerequisite: COM2 and ES 2410.

ARE3300 - Building Electrical and Plumbing Systems

Credits: 3

Introduction to National Electrical Code. The topics include basic circuits, AC and DC single phase, three phase power, transients, capacitance and inductance, branch circuits. Study of plumbing systems and fixtures including wastewater, water supply, storm water, and venting systems. Study of International Plumbing Code.

Prerequisite: ARE 1600 or CE 1010, and ES 2330 or concurrent enrollment.

ARE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ESE 3360/ME 3360.

Former Course Number [ARE 3430, ARE 4420]

Prerequisite: MATH 2310, ES 2310 and ES 2330.

ARE3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ME 3400.

Former Course Number [ARE 3800]

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ARE3600 - Architectural Design Studio III

Credits: 3

Junior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). This course builds upon skills learned in ARE 2600, with a new emphasis on the complexities that accompany mid-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 2410 and ARE 2600.

ARE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ARE4040 - Historic Preservation and Sustainability

Credits: 3

Explores the historic preservation and sustainability movements and contemporary practices in these inter-related fields. Through reading, lectures, discussions and site visits, students will study how the historic preservation and the building industry professions can address advanced issues in sustainability related to the environment, culture and economics.

Cross Listed AMST 4040.

Prerequisite: 6 hours in AMST or ARE.

ARE4050 - Modern Engineering Practice

Credits: 3

Study of current professional practices in Architectural Engineering. Students will learn about leading-edge practices through guest speakers, office visits, site visits and research projects focusing on modern building innovation. May be offered as Study Abroad in London, Paris, and Barcelona, or on-campus.

Prerequisite: ARE 2000.

ARE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed CE 4200

Prerequisite: ARE 3200/CE 3200.

ARE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

Cross Listed CE 4250.

Prerequisite: ARE 3200/CE 3200.

0750

ARE4260 - Structural Concrete Design

Credits: 3

Design of structural components and systems using reinforced concrete.

Cross Listed CE 4260.

Prerequisite: ARE 3200/CE 3200.

ARE4265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed CE 4265.

Dual Listed ARE 5265.

Prerequisite: ARE 4260/CE 4260.

ARE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed CE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [ARE 4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

ARE4295 - Structural Timber Design

Credits: 3

Design of structural components and systems utilizing timber.

Cross Listed CE 4295.

Dual Listed ARE 5295.

Former Course Number [ARE 4290]

Prerequisite: CE 3200 or equivalent.

ARE4330 - Building Electrical Systems

Credits: 3

Analysis and design of electrical systems in buildings using the National Electrical Code. The topics include panel boards, motors, system sizing, electrical distribution in buildings, methodology of reducing the available short circuit current, transformers, capacitors in buildings, and power systems harmonics. Students will perform an electrical building design project.

0751

Prerequisite: ARE 3300.

ARE4390 - Building Safety and Fire Protection

Credits: 3

Fundamentals of building design for fire and life safety. Emphasis is on a systematic design approach. Basic considerations of building codes, fire loading, fire resistance, means of egress design, introduction to protective systems including fire protection systems, and fundamentals of fire and smoke control.

Prerequisite: ARE 3300.

ARE4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ME 4430.

When Offered (Normally offered alternate spring semesters)

Former Course Number [ARE 3420, ARE 4810]

Prerequisite: Completion of the ME Success Curriculum, ARE 3400 and ARE 3360/ME 3360 or concurrent.

ARE4490 - Modeling and Optimization of Energy Systems

Credits: 3

Application of principles of thermodynamics, fluids, and heat and mass transfer in the component and system-level design of energy/thermal systems, including modeling, simulation and optimization techniques. Examples are drawn from building environmental control, energy conversion and thermal industrial processes. Students work on projects for integration of these components in the design of energy/thermal systems. Requires enrollment in associated laboratory session.

Cross Listed ME 4490.

Prerequisite: ARE 3400.

ARE4600 - Architectural Design Studio IV

Credits: 3

Senior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 3600, with a new emphasis on the complexities that accompany high-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 3600.

ARE4720 - Structural Systems Design Project

0752

Credits: 3

Final course in the building structural systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's structural systems.

Prerequisite: ARE 4200, ARE 4250, and ARE 4260 or concurrent enrollment.

ARE4740 - Mechanical Systems Design Project

Credits: 3

Final course in the building mechanical systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's mechanical systems.

Prerequisite: ARE 3400 and concurrent enrollment in ARE 4430 or ARE 4490.

ARE4920 - Senior Architectural Engineering Problems

Credits: 1-3

Max Credit (Max. 6)

A study of current engineering design problems that are applicable to architectural engineering either on an individual basis or for small seminar type groups. Not for graduate credit.

Prerequisite: senior standing or consent of department head.

ARE4975 - Civil and Architectural Engineering Internship

Credits: 1-3

Max Credit (Max. 3)

Students may apply for credit for extended work experience (>10 weeks; full-time) at a professional engineering or architectural firm, supervised by a licensed professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

Cross Listed CE 4975.

When Offered (Offered summer only).

Prerequisite: consent of department head.

ARE5265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed CE 5265.

Dual Listed ARE 4265.

Prerequisite: ARE 4260/CE 4260.

ARE5285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed CE 5285.

Dual Listed ARE 4285 and CE 4285.

ARE5295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed CE 5295.

Dual Listed ARE 4295.

Prerequisite: CE 3200 or equivalent.

ARE5600 - Collaborative BIM Design

Credits: 3

An advanced comprehensive building design course integrating architectural and engineering skills, where design decisions are supported by performance simulation and analysis. Students will use Building Information Modeling (BIM) software and simulate a professional Integrated Project Delivery (IPD) experience by collaborating with a practicing architect on a real-world project.

Prerequisite: ARE 3600.

ARE5700 - Architectural Engineering Problems I

Credits: 1-3

Max Credit (Max. 6)

A special course, designed to make possible the study and investigation of problems or phases of architectural engineering selected to fit the needs of the students.

Prerequisite: consent of instructor.

Army ROTC/Military Science

ARMY1010 - Introduction to Military Science

Credits: 2

Encompasses dynamics of leadership applicable to all careers through instruction in Rifle Marksmanship; Land Navigation; Leadership Laboratory; Field Training Exercises; U. S. Army Customs, Courtesies and Career Opportunities and various leadership dimensions.

ARMY1011 - Basic Military Conditioning Level I

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY1020 - Dynamics of Leadership II

Credits: 2

Second semester of a one-year series. Continues ARMY 1010.

ARMY1021 - Advanced Military Conditioning Level I

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2010 - Leadership Skills and Management

Credits: 2

Studies principles and theories of leadership and team dynamics. Develops student leadership potential through the study of the values and attributes of effective leaders. Students gain self-confidence through the application of principles and techniques of leadership in a military environment.

Former Course Number [2030]

Prerequisite: ARMY 1010, ARMY 1020 or consent of instructor.

ARMY2011 - Basic Military Conditioning Level II

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2020 - Leadership Skills and Small Unit Management

Credits: 2

Studies principles in small-unit management, tactics, operations and leadership. Develops students' self-confidence in their

leadership ability through progressive application of knowledge, decision making, communication and control.

Former Course Number [2040]

Prerequisite: ARMY 2010 or consent of instructor.

ARMY2021 - Advanced Military Conditioning Level II

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2050 - Internship: Leader's Training Course

Credits: 3

A four week leadership practicum which orients students to U. S. Army, trains them in basic military skills, develops and evaluates their officer leadership potential, and qualifies them for enrollment in the ROTC Advanced Course Program. Increases confidence, self-discipline and decisiveness through physical and academic challenges.

Prerequisite: sophomore standing or above.

ARMY2060 - Competent and Confident Leadership

Credits: 2

Interdisciplinary course whose aim is to encourage assessment of our obligations, commitments, and roles in society by inquiring into the nature of leadership and the responsibilities of both leaders and followers. Examines leadership traits that transcend the military aspect of leadership.

ARMY3010 - Leadership and Tactics I

Credits: 3

Studies leadership techniques and tactical operations at the small-unit level. Instruction covers the decision-making process, troop leading procedures, land navigation and operation orders. In-depth analysis of team/squad tactical procedures and techniques. Numerous student oral presentations and practical exercises.

USP Code [O<>(none)]

Prerequisite: ARMY 2010, ARMY 2020, basic camp or consent of department head.

ARMY3011 - Basic Military Conditioning Level III

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their

physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY3015 - Junior Staff Office Practicum I

Credits: 1

This course provides a basic introduction to Army staff processes and the many diverse systems and processes within the Army that impact an officer's ability to successfully lead his/her unit.

Prerequisite: This course requires concurrent enrollment in ARMY 3010.

ARMY3016 - Junior Staff Office Practicum I

Credits: 1

This course provides a basic introduction to Army staff processes and the many diverse systems and processes within the Army that impact an officer's ability to successfully lead his/her unit.

Prerequisite: This course requires concurrent enrollment in ARMY 3020.

ARMY3020 - Leadership and Tactics II

Credits: 3

Studies platoon-level tactics and leadership techniques. Instruction covers the solving of complex tactical problems. Illustrates techniques for properly managing personnel, resources and time to accomplish organizational goals. Introduces Army staff functions and prepares students for successful completion of ARMY 3030.

Prerequisite: ARMY 3010.

ARMY3021 - Advanced Military Conditioning Level III

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY3025 - Conduct of Training

Credits: 1

Introduces the Army's system of conducting training exercises. Covers prerequisite training, pre-execution checks, officer/NCO responsibilities, training presentation techniques, sustainment training and training assessment.

Prerequisite: consent of instructor.

ARMY3026 - Assessment of Training

Credits: 1

Introduces the Army's system of training assessment. Covers formal and informal after-action reviews (AARs); preparation for, conduct of, and goals of an AAR; and writing of Army after-action reports.

Prerequisite: consent of instructor.

ARMY3030 - Practicum in Leadership

Credits: 3

Encompasses Leadership Development and Assessment Course, a five week test of the cadet's leadership ability. Each cadet is evaluated in ten different positions. Positions include both garrison and tactical situations. Each position requires the cadet to plan, implement and execute a wide variety of tasks. The cadet must control all personnel under this command. The cadet is extensively evaluated by cadre Tactical Officer/Non-commissioned Officer on twelve leadership dimensions. Successful completion of the Leadership Development and Assessment course is required for commissioning.

Prerequisite: successful completion of ARMY 3010 and ARMY 3020.

ARMY3050 - Army ROTC Nurse Summer Training Program

Credits: 3

Allows Army ROTC nursing cadets to obtain college credit for nursing experience gained in an army hospital during nurse summer training program. Students practice military skills, leadership, clinical nursing, administrative and interpersonal skills.

Prerequisite: ARMY 3010, ARMY 3020.

ARMY3060 - Military Skills Practicum: Ranger Challenge

Credits: 1-4

Max Credit (Max. 4)

Encompasses training and intercollegiate competition in fundamental military skills. Students learn and compete in areas of physical conditioning training, land navigation, rifle marksmanship, rope bridging and other skills practiced during small-unit military operations.

Prerequisite: consent of department or instructor.

ARMY3070 - Cadet Professional Development Practicum

Credits: 2

Consists of attendance as an Army ROTC cadet at an Army specialty producing school including Airborne, Air Assault, Northern Warfare School or Mountain Warfare School.

Prerequisite: ARMY 1010, ARMY 1020, ARMY 2010 and ARMY 2020 and/or consent of department head.

ARMY4010 - Dynamics of the Military Organization I

Credits: 2

Studies and analyzes organization, resources and functions of military staff. Reviews formal staff problem-solving procedures, including student effective writing and briefing presentations. Introduces ethics and the military profession.

Former Course Number [4030]

Prerequisite: ARMY 3010, ARMY 3020 or consent of department head.

ARMY4011 - Basic Military Conditioning Level IV

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4012 - Basic Military Conditioning Level V

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4015 - Staff Officer Practicum I

Credits: 1

Gives students practical experience in serving on an Army staff. Under supervision of an Army ROTC cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4010.

ARMY4016 - Staff Officer Practicum II

Credits: 1

Gives students experience in serving on an Army staff. Under the supervision of an Army ROTC Cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4020.

ARMY4020 - Dynamics of the Military Organization II

Credits: 2

Introduces military law; planning and management of personal affairs; Army transportation, logistics and personnel management systems. Studies officer/NCO relations. Includes student writing and briefing presentations on assigned topics.

Former Course Number [4040]

Prerequisite: ARMY 4010 or consent of department head.

ARMY4021 - Advanced Military Conditioning Level IV

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4022 - Advanced Military Conditioning Level V

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4025 - Principles of Training Management

Credits: 1

Introduces students to the Army's system of training management. Covers principles and philosophy of training, training guidance, training cycles, soldiers/leader tasks, techniques for collective and multi-echelon training, as well as procedures for short-term planning.

Prerequisite: consent of instructor.

ARMY4026 - Preparation of Training

Credits: 1

Introduces the Army's system of training preparation. Covers short-range training plans, training meetings, development of timelines, publishing of training schedules, training and evaluation outlines, as well as rehearsals.

Prerequisite: consent of instructor.

ARMY4050 - Management Internship: Cadet Troop Leadership Training

Credits: 2

Conducted at an active Army installation. Students (under supervision) assume duties of and function as a junior commissioned

0760

officer for three-week period. Written evaluation of student's performance is returned.

Prerequisite: ARMY 3010, ARMY 3020 and consent of department head.

ARMY4975 - Military Science Independent Study

Credits: 1

Max Credit (Max. 2)

A continuation of ARMY 4010 and ARMY 4020. Projects and events are set at the discretion of the professor and subject to change.

Prerequisite: ARMY 4010 and ARMY 4020.

ARMY4976 - Advanced Military Science Independent Study

Credits: 1

The purpose of this course is to instill leadership ability, technical and tactical skills, and professional values necessary for your completion of the UW Military Science program. Introducing students to small unit tactics, leadership positions, and developing the student's ability to make informed decisions in any military environment.

Art

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP Code [CA<>(none)]

ART1101 - First-Year Seminar

Credits: 3

USP Code [(none<>FYS)]

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

0761

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

ART2002 - Special Topics In:

Credits: 3

Max Credit (Max. 6)

Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter.

Prerequisite: ART 1005; ART 1130; sophomore standing.

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP Code [CA<>H]

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP Code [CA<>H]

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

ART2110 - Type I: Thinking with Type

Credits: 3

Max Credit 3

Examines history and structure of type as a form of communication and art. Students will reference type as visual expression, data visualization, messaging, and representative of power, political, and socio-economic movements. Explorations in type as a concept and critical expression will explore the fields of graphic design and computer visualization.

Prerequisite: ART 1115

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that

engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful conceiving, strategic wire frame development and creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular unites, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

ART2700 - Introduction to Museology

Credits: 3

Explores the historical, cultural, and contemporary roles of museums and preservation institutions in society. Introduces students to the museum professions, collection and exhibition installation strategies, and ethical problems of governance and collection.

Field trips to regional collections are included.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.
USP Code [CH< >(none)]

ART3002 - Special Topics In:

Credits: 3
Max Credit (Max. 9)

Courses of broad general appeal will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See current class schedule for topics.

Prerequisite: ART2010 - Art History I, and ART2020 - Art History II.

ART3005 - Drawing III

Credits: 3
An advanced drawing course applying the fundamentals of drawing to creative individual problems in figure, still life, and/or landscape composition. Structured yet open assignments, lectures and critiques develop formal, conceptual, expressive, and technical understanding. Course may be repeated for a maximum of 6 credit hours.

When Offered (Offered spring semester).
Prerequisite: ART 2000 and ART 2005.

ART3030 - History of Architecture

Credits: 3
A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ARE 3030.
USP Code [(none)< >H]
Prerequisite: WA or COM1.

ART3052 - Life Drawing I

Credits: 3
An advanced drawing course working from a life model with an emphasis on composition, monochromatic media, drawing techniques and the skeletal and muscular construction as related to action and proportion in the human figure. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding.

When Offered (Normally offered fall semester)
Prerequisite: ART 2000 and ART 2005.

ART3112 - Type: Type, Images, and Narrative

0766

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)

Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.

ART3120 - VCD III: Visual Making

Credits: 3

Studies advanced graphic design preparation, idea generation, conceptualization, and critical thinking. Sustainable design problems include print and package design and an exploration of historical impact of design for reproduction through analog and digital means. Contemporary socio-cultural issues will be emphasized along with design as an agent for positive change.

When Offered (Offered fall semester)

Prerequisite: ART 2000 and ART 2112.

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.

ART3180 - Graphic Design III

Credits: 3

Studies specialized and advanced graphic design preparation, idea generation, conceptualization, collaboration and critical thinking, from paste-up through production. All work is executed both on and off the computer. Design problems include print and packaging design. History of graphic design and advanced production methods are discussed.

Prerequisite: ART 2000, ART 2112, and ART 3120.

ART3210 - Painting II

Credits: 3

Max Credit (Max. 6)

Investigates various painting techniques to create individual work. Emphasizes contemporary and classical treatment of formal, aesthetic and conceptual creative expression.

0767

Prerequisite: ART 2000 and ART 2210.

ART3250 - Watercolor Painting I

Credits: 3

Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

ART3265 - Intermediate Photography

Credits: 3

Focuses on the production of a fully realized portfolio of images. Students will be guided with a set of conceptual projects towards exploring technical boundaries and potential of photography. Research and readings will lead towards the production of a finished and installed body of work.

Prerequisite: ART 2255 and ART 2265.

ART3310 - Sculptural Practices: Cast Form I

Credits: 3

Max Credit (Max. 6)

This intermediate sculptural practices course explores a wide variety of mold-making and processes including cold-casting (paper/fabric/resin casting) and both non-ferrous (bronze and aluminum) and ferrous metal (cast iron) casting techniques. Assigned projects will allow students to engage in the production of finished cast sculpture. Extensive sketchbook, artist research, and critique participation is required.

When Offered (Offered fall semester)

Prerequisite: ART 2310 and 2000.

ART3320 - Sculptural Practices: Mixed Media I

Credits: 3

Max Credit (Max. 6)

This intermediate course explores mixed media processes in sculptural practices including soft sculpture fabrication with fabric and fiber, found object manipulation, and digital processes involving 3D printing and laser cutting. Assigned projects will engage students in the production of artwork related to the topic. Extensive sketchbook, artist research, and critique participation is expected.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2310 and ART 2000.

ART3330 - Sculptural Practices: Assembled Form I

Credits: 3

Max Credit (Max. 6)

Investigates constructed and assembled form as an essential means of sculptural expression. Emphasizes wood construction, assembled metals and mixed media. Utilizes general carpentry techniques, a variety of welding methods (oxyacetylene, arc, M. I. G. and T. I. G.) and other means of assembling materials. Includes investigation of concepts in assemblage and exposure to classic and contemporary forms of assembled sculpture.

When Offered (Offered spring semester)

Prerequisite: ART 2310 and ART 2000.

ART3345 - Sculptural Practices: Special Topics

Credits: 3

Max Credit (Max. 9)

This course addresses specific areas of contemporary sculptural practices such as: Installation, Video/Sound manipulation, kinetic sculpture, and figure modeling. Assigned projects will engage the students in production of artwork related to the topic. Extensive sketchbook work, artist research, and critique participation is expected.

Prerequisite: ART 2310 and ART 2000.

ART3350 - Metalsmithing II

Credits: 3

Introduces intermediate approaches to fabricating small scale, non-ferrous metals through hammer-raised forming, lost-wax casting, enameling and hardware fabrication. Historical and innovative contemporary applications are fostered through sculptural objects and jewelry-based pieces. Individual studio projects, critical discussion and presentations address aesthetic, conceptual, and technical aspects of metalsmithing.

Prerequisite: ART 2000 and ART 2350.

ART3410 - Ceramics III/I

Credits: 3

Studies development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning class. Glaze exploration and development are introduced.

Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420 and consent of instructor based on portfolio review.

ART3420 - Ceramics III/II

Credits: 3

A second semester continuation of the development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning classes. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420, and consent of instructor based on portfolio review.

ART3430 - Methods I

Credits: 3

Students investigate ways to translate art making practices and media into K-12 arts curricula and develop effective approaches to teaching these to the K-12 learner. Students create and teach lesson plans based on what they learn through their explorations; they also create their own artwork inspired by their studio investigations.

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.

ART3490 - Philosophy, Theory and Issues

Credits: 3

Students explore the foundational elements involved in the history and philosophies of Art Education and the key issues that shape contemporary approaches to teaching in the field. These investigations are undertaken to support students' developing teaching philosophies and inform the connections between their teaching and creative practices.

USP Code [(none)<>COM3]

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.

ART3500 - Book Arts

Credits: 3

Introduction to the history of the book as an object and the traditional crafts associated with book construction through the exploration of the book as a vehicle for artistic expression. A basic knowledge of technical processes pertaining to book construction, a general familiarity with the history of the book and a conceptual exploration of image making will be gained through demonstrations, hands-on studio work, slide lectures, visits to the museum and archives and through assigned readings.

Prerequisite: ART 2000 and completion of WB or junior standing.

0770

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

ART3550 - Art Education Practicum

Credits: 1-3

Max Credit (Max. 3)

Practicums are integral to an art education student's development as a teacher. They offer opportunities for immersion and hands-on teaching experiences in art classrooms guided by experienced teachers in the field and the UW faculty. Students develop skills and teaching strategies that complement classroom learning and strengthen their teaching practices.

Prerequisite: ART 3430 and ART 3490.

ART3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/GWST 3710.

When Offered (Offered once a year)

USP Code [CH< > COM2]

Prerequisite: GWST 1080 or ENGL 1010.

ART3720 - Art and Architecture of Medieval Islam

Credits: 3

Studies the art and architecture produced by Islamic societies from the time of the Prophet Mohammed to the time of the Crusades (7th-14th centuries CE), and the geographic scope surrounds the Mediterranean Sea, including the Near Middle East, northern Africa, and Spain.

Former Course Number [2720]

Prerequisite: USP WA and WB courses.

ART3760 - American Art History

Credits: 3

Addresses American art within the continental United States from first European encounters with the New World to 1900. Will investigate painting, sculpture, and architecture, but will also include some photography, prints, and the decorative arts.

0771

Prerequisite: ART 2020.

ART4000 - Post Baccalaureate Seminar

Credits: 1

Enhance and formalize the Post Baccalaureate experience while creating a creative community across artistic disciplines. Students will read and respond to relevant text, discuss pedagogical concerns, critique their creative research, and develop a professional dossier in support of their future career goals.

Prerequisite: Completion of all BA/BFA degree requirements and acceptance into the Department of Art Post Baccalaureate program.

ART4005 - Drawing IV

Credits: 3

An advanced drawing course exploring conceptual, expressive, personal and technical limits of process and media. Individually proposed projects lead to a coherent body of work. Open discussion and structured critiques develop personal and technical understanding. Repeatable for a maximum of 9 credit hours.

Prerequisite: ART 2000 and ART 3005.

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

Prerequisite: ART 2000 , and junior standing.

ART4052 - Life Drawing II

Credits: 3

An advanced drawing course building upon figure construction fundamentals with heavy emphasis on composition, personal expression, wet and dry media, and color with pastels. Lectures, drawing sessions and critiques develop formal, conceptual, expressive and technical understanding. May be repeated for a maximum 9 credit hours.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3052

ART4060 - VCD V: Visual Interactivity

Credits: 3

Explores digital art in 3D - 4D spaces, through the experimental use of digital design tools and techniques. Students develop and

0772

build digital projects in AR/VR/MR spaces. Projects include explorations in graphic design, 3D modeling and motion graphics design, multi-media manipulation and image manipulation.

Prerequisite: ART 2000 and ART 2112 or ART 2122.

ART4110 - Computer Graphics II

Credits: 3

Advanced work on current computer graphic design software. Presents graphic design problems to augment working knowledge of the programs. Lab/lecture. Second course in a two semester sequence.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3120.

ART4120 - VCD VI: Senior Design Studio

Credits: 3

Specialized research for the advanced design student who will develop a mature voice and sense of design. Individual projects are determined by student interest with the instructor in order to best prepare students for industry careers and graduate school. Students are encouraged to explore new to them, and emerging approaches.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000, ART 2112, ART 2122.

ART4210 - Painting III

Credits: 3

Prerequisite: ART 2000 and ART 3210.

ART4220 - Painting Topics

Credits: 6

This is an advanced painting course that will cover specific painting approaches for an entire semester. Examples of topics can include Abstraction and color field, figuration, narrative painting, experimental painting media and surfaces, etc. This course will enable students to experience a more comprehensive and targeted set of painting problems for the semester. Topics will vary based on the instructor.

Prerequisite: ART 2000, ART 2210, ART 3210.

ART4250 - Watercolor Painting II

Credits: 3

Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

Prerequisite: ART 2000 and ART 3260.

ART4265 - Photography III

Credits: 3

An advanced photography class focusing on the production of a fully realized portfolio of images. Students interests will help shape a course dedicated to providing them with additional technical tools (traditional printing techniques, high level photoshop tools) and readings and discussions designed to push them beyond the comfortable boundaries of their photographic world.

Prerequisite: ART 2000.

ART4310 - Sculptural Practices: Cast Form II

Credits: 3

This course is an advanced investigation in mold making, cold casting, and metal casting as an essential means of sculptural expression. Emphasis is placed on personal expression and portfolio building at this level. Extensive sketchbook work, artist research, and critique participation is required.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [5310]

Prerequisite: ART 2000, ART 2310, ART 3310, and portfolio review by instructor.

ART4330 - Sculptural Practices: Assembled Form II

Credits: 3

This course is an advanced investigation in assemblage including wood and metal fabrication as an essential means of sculptural expression. Emphasis is placed on personal expression and portfolio building as this level. Extensive sketchbook work, artis research, and critique participation is expected.

Prerequisite: ART 2000, ART 2310, ART 3310, and portfolio review by instructor.

ART4355 - Metalsmithing III

Credits: 3

Introduces advanced fabrication and surface techniques which build on skills developed in Metalsmithing I and II. Students propose a body of work for the semester based on individual aesthetic, conceptual and technical interests. Professional practices

including resume writing, documenting, presenting and exhibiting artwork are addressed at this advanced level.

Prerequisite: ART 2000 and ART 3350.

ART4360 - Metalsmithing: Special Topics

Credits: 3

Focuses on a specific technique in the field of Metalsmithing for an in-depth exploration into topics such as lost-wax casting, chasing and repoussé, enameling, etc. Individual projects and critical discussion will address the special topic aesthetically, technically and conceptually.

Prerequisite: ART 2000 and ART 2350.

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

ART4410 - Ceramics IV/I

Credits: 3

Studies and develops traditional and experimental forms. Applies wide range of three-dimensional decorative and conceptual approaches. Continuation of technical and glaze research and professional practices. Introduces kiln operation. Given studio problems accompany individually directed exploration.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000, ART 3320, ART 3410, and consent of instructor based on portfolio review.

ART4420 - Ceramics IV/II

Credits: 3

A second semester continuation of the development of traditional and experimental forms. Applies wide range of three-dimensional formal and conceptual approaches. Continuation of technical and glaze research. Introduces kiln operation. Given studio problems accompany individual directed exploration.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000, ART 3320, ART 3410, and consent of instructor based on portfolio review.

ART4425 - Graphics Internship

0775

Credits: 3

This course allows graphic design students to better understand real-world design practices, learn about industry standards, and discuss career opportunities and preparedness. Students will be expected to secure internships and meet with an intern advisor regularly, to gain a strong understanding of the graphic design industry.

Prerequisite: ART 2000, ART 2112, and ART 2122.

ART4440 - Methods II

Credits: 3

Students incorporate their understanding of the stages of artistic development with essential components of curriculum design to create lesson plans that engage the K-12 student in student-directed, holistic learning in the visual arts. Another component of the course is professional practice that includes classroom management and preparing professional portfolios.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

ART4460 - Curriculum Design

Credits: 3

Students develop a thorough knowledge of all the components of curriculum design in Art Education and will create a unit of instruction that includes a focus on enduring understandings, clarity of learning objective, assessment for the visual arts, instructional strategies, differentiation, and alignment with standards.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

ART4510 - Printmaking II

Credits: 3

Continues development of printmaking skills gained in introductory printmaking and focuses in particular on the relationship between process and image. Through demonstrations and studio work, slide lectures, visits to the museum and archives, and readings and discussions, technical processes will be refined, print history will be further explored and image making will continue to be developed.

Prerequisite: completion of Foundation Core, ART 2000 and ART 3510.

ART4520 - Advanced Printmaking II : Exhibition and Professional Preparation

Credits: 3

Preparation to continue as exhibiting artists. Students further develop their work as artist-printmakers in preparation for a solo or two-person exhibition at the completion of the semester. Presentation and execution of slides, resume, artist statement, locating opportunities and correspondence will be developed throughout the term.

Prerequisite: ART 2000, ART 4510 and portfolio approval from instructor.

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

Prerequisite: ART 2000, junior or senior standing.

ART4620 - Problems in Art

Credits: 1-3

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and 6 hours in art.

ART4635 - Preparation for International Study in Art

Credits: 1

An introductory course to international study in art. Specifically focusing on various issues of culture, language, history, art and archeology the student may encounter while traveling abroad. Also provides time for the coordination of practical issues of travel, necessary documentation and insurance. Issues specific to the country of travel will also be addressed.

Prerequisite: 6 hours in Art, WA, junior standing.

ART4650 - International Study of Art

Credits: 3

Students will respond creatively to the historical, cultural and aesthetic experience in the country of travel and will use journaling, drawing, and collection of visual material to continue a more in-depth response upon return. Course sections will vary regarding structure/context. All sections will include studio and/or art historical curriculum.

USP Code [G<>(none)]

Prerequisite: ART 4635.

ART4655 - Outdoor Studio

Credits: 3

The emphasis in this course will be on the expressive nature of outdoor creative work. Students will need to be responsive to the natural environment through a variety of media, including watercolor, oil sticks, drawing, sculpture, photography, video, etc. This course involves travel and day trips to a variety of sites throughout the county and state.

Prerequisite: ART 2000.

ART4670 - Completion International Study in Art

0777

Credits: 1

A completion course to international study in art. Students will compile and complete their response to their experiences encountered in the culture, language, history, art and archeology while traveling abroad. Concise structured critiques will provide time for discussion and digestion of their individual and shared experiences. When possible an exhibition of creative work will be included as a culmination of the program.

Prerequisite: ART 4650.

ART4720 - 15th Century Renaissance Art

Credits: 3

Explores artistic developments of the 15th century, primarily in Italy, in order to appreciate the relationships between artistic production and innovation and other aspects of the social and cultural environment.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010, ART 2020.

ART4730 - 19th Century European Art

Credits: 3

Studies 19th-century European painting, prints, and literature, covering Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Artists include Elisabeth Vigee-Lebrun, court portraitist; Mary Cassatt and Edgar Degas, famed Impressionists; Edouard Manet, controversial and troubled; Honore Daumier, jailed for incendiary political cartooning; and the eccentric Paul Gauguin and Vincent Van Gogh.

When Offered (Normally offered fall semester)

Prerequisite: ART 2020.

ART4740 - 20th Century European Art

Credits: 3

Studies 20th-century European art from 1900 to 1945. Covers the 2-D and 3-D art of Expressionism, Cubism, the Bauhaus, Dada and Surrealism, and other important movements in the first half of the 20th century.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010 and ART 2020.

ART4770 - Contemporary Arts Seminar

Credits: 3

Studies the major movements in the visual arts from 1945 to the present. Investigate major theories, stylistic movements, and key artists since WWII with a special focus on the increasing globalization of art during this era.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2010 and ART 2020.

ART4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the 20th century.

Cross Listed GWST 4780.

When Offered (Normally offered fall semester)

Prerequisite: ART 2010 or ART 2020 or 3 hours of WMST courses; and WB.

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours in art history.

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: Art 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.

ART4810 - Residency for Elementary

Credits: 6

This is an eight-week residency for teaching art full time at the elementary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4820, students are certified in Wyoming to teach K-12 Art.

Prerequisite: ART 4440 and ART 4460.

ART4820 - Residency for Secondary

Credits: 6

This is an eight-week residency for teaching art full time at the secondary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4810, students are certified in Wyoming to teach K-12 Art.

Prerequisite: ART 4440 and ART 4460.

ART4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

Interdisciplinary approach to study of women's issues in art. Uses literary/cultural texts to reinforce/contradict and/or expand/enlarge the art historical basis. Topics include domestic goddess, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 4830/GWST 4830.

When Offered (Normally offered every sixth semester)

USP Code [CA<>(none)]

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

ART4840 - BFA Capstone

Credits: 3

Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the artwork is completed.

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.

ART4975 - Independent Study and Research

Credits: 1-3

Research options in all creative areas. Students work independently and provide demonstrated ability and background knowledge to carry out self-directed research or creative activity in the research area. Arrangements regarding curricular obligations and meeting times are made with the instructor in advance.

Prerequisite: ART 2000 and 12 hours of art in research area and prior consent of instructor.

ART5430 - Lo-Tech Ceramics

Credits: 3

Exploration of elementary forming, decorating, firing processes developed by various pottery cultures. Examination of basic geology, clay prospecting, kiln design and construction. Includes historical overview and contemporary survey.

Prerequisite: 12 hours of humanities/ GED/USP.

ART5650 - Art and Ideas

Credits: 3

Students in this seminar explore the literatures of art. Each seminar has a reading list and a thematic structure. Major critical papers are written during the course of the seminar. Required for M. A. and M. A. T. program Plan B option.

0780

Prerequisite: 30 hours in art.

ART5670 - Term Creative Project

Credits: 1-5

Max Credit (Max. 15)

For M. F. A. candidates only; professional creative achievement in painting, drawing, printmaking, ceramics, or sculpture, leading to presentation of graduate exhibition. Typically, student will consult a single professor in major area for crediting this course.

Prerequisite: admission to candidacy for M. F. A. degree and consent of instructor.

ART5710 - Medieval Art

Credits: 3

Studies the unique qualities of art of this intriguing era of transition between classical and renaissance times.

Prerequisite: ART 1010, ART 2010.

ART5740 - 20th Century European Art

Credits: 3

Studies European art from 1900 to present.

Dual Listed ART 4740.

Prerequisite: ART 2010 and ART 2020, consent of instructor.

ART5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ART5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ART5959 - Enrichment Studies

0781

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

ART5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

Arts and Sciences/ Special Courses

AS2000 - Study Abroad

Credits: 1-18
Max Credit (Max. 18)

Students may register through the University of Wyoming for up to two semesters of academic work abroad with the approval of the academic adviser, head of the major department and coordinator of the Study Abroad Program.

Former Course Number [ENGL 2110]

AS2400 - Lower-Division Internship in ____

Credits: 1-12
Max Credit (Max. 12)

Allows students to gain hands-on experience that will help to bridge the gap between the theory of academia and the practicality of the work world. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Planning will involve the internship agency, the student's academic adviser and the associate dean of the college.

Prerequisite: sophomore standing and the approval of the adviser, head of the major department and an associate dean of A&S.

AS2490 - Special Topics in__

Credits: 1-3
Max Credit (Max. 6)

Courses of broad general appeal and an interdepartmental flavor will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See

0782

current class schedule for topics.

Prerequisite: sophomore standing.

AS4400 - Upper-Division Internship in ____

Credits: 1-12
Max Credit (Max. 12)

Permits students to contribute in the areas of their expertise and gain hands-on experience that will help to bridge the gap between academia and the real world of work. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will involve the internship agency, the student's academic adviser and the associate dean of the college.

Prerequisite: approval of adviser, head of the major department and the college advising coordinator.

AS4900 - Special Topics in _____

Credits: 1-3
Max Credit (Max. 6)

Courses of broad general appeal and an interdepartmental flavor will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See current class schedule for topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing.

AS4975 - Independent Study

Credits: 1-3
Max Credit (Max. 6)

Offers the advanced student the opportunity to pursue an individualized topic of interest with the assistance and direction of an instructor.

Prerequisite: junior/senior standing and consent of instructor.

Astronomy

ASTR1000 - Descriptive Astronomy

Credits: 3
Covers essential features of the solar system, stellar astronomy and time measurement.

USP Code [(none)<>PN]

Note: Students who have taken ASTR 2310 may not earn credit in ASTR 1000, and not more than 4 credit hours may be earned by taking both ASTR 1000 and ASTR 1050.

ASTR1050 - Survey of Astronomy

Credits: 4

Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP Code [SE<>PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level

ASTR1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed GEOL 1070.

USP Code [SE<>PN]

Prerequisite: Math Level 3 or equivalent courses; consent of instructor; enrollment reserved for elementary education majors; EDCI 2000 must be selected concurrently.

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR2320 - General Astronomy II

Credits: 4

[(none)<>PN] Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR4000 - Astronomy for Teachers

Credits: 1-5

Specifically designed for elementary school teachers. Presents basic concepts (time, seasons, light and its properties); planetary

systems of the sun; the sun and stars; the Milky Way and galaxies; and cosmology and relativity. Emphasizes presenting these concepts to elementary school children. Half the class is devoted to laboratory and workshop activities to develop techniques for presenting these concepts through visual aides, demonstrations and films. Students may receive a maximum of 5 credits in a combination of ASTR 4000 and ASTR 4100.

When Offered (Offered summer session)

Prerequisite: 6 hours of physical or biological science, junior standing in education.

ASTR4100 - Astrophysics for Secondary Teachers

Credits: 1-3

Discusses modern physics, emphasizing obtaining and analyzing real data. Adaptable to junior and senior high school science classrooms. Special projects include analysis of planetary positions and images; direct observations of the sun; predictions of eclipses and tides; analyses of basic astronomical data of stars, star clusters, galaxies and clusters of galaxies; and cosmological modeling. Students may receive a maximum of 5 credits in a combination of ASTR 4000 and 4100.

When Offered (Offered summer session)

Prerequisite: junior standing in secondary science education.

ASTR4610 - Introduction to Astrophysics

Credits: 3

Includes astrophysical sources of radiation, radiation transport, nonequilibrium processes, stellar atmospheres, stellar interiors and the interstellar medium.

Prerequisite: ASTR 2310, PHYS 2310 and concurrent registration in PHYS 4210 and PHYS 4410.

ASTR4620 - Modern Research in Astrophysics

Credits: 3

Taught jointly by astrophysics faculty and others. Includes several topics of current research in astrophysics.

Prerequisite: ASTR 4610.

ASTR4860 - Problems in (TOPIC)

Credits: 1-4

Independent, in-depth study of selected problems in astronomy and astrophysics. Entirely laboratory-oriented investigations of astronomical objects.

Prerequisite: ASTR 2310 and PHYS 2310.

ASTR5150 - Astronomical Techniques

Credits: 4

Discusses selected topics in observational astronomy such as applications of the Fourier transform, design of optical instruments,

properties of various detectors of electromagnetic radiation, sources of uncertainty in astronomical data, reduction techniques for these data, and techniques of image processing.

Prerequisite: graduate standing in astrophysics.

ASTR5160 - Data Mining in Large Astronomical Surveys

Credits: 4

Aimed at an understanding of how to manipulate and analyze catalog-level data from large astronomical surveys. Students will address realistic problems in data mining large astronomical surveys using one or more programming languages.

Prerequisite: graduate standing.

ASTR5420 - Stellar Evolution and Structure

Credits: 4

The life cycle of stars forms the basis for this course, including formation and early evolution, hydrostatic structure, and late stages of evolution. In addition, energy generation and transport are presented.

Prerequisite: graduate standing in astrophysics.

ASTR5460 - Galactic Structure and Evolution: Cosmology

Credits: 4

Presents material describing current cosmological models and their application to areas of extragalactic astronomy. Topics include cosmic dynamics, introduction to relativistic models, measuring parameters, dark matter, dark energy, the cosmic microwave background radiation, big bang nucleosynthesis.

Prerequisite: Graduate standing in astrophysics.

ASTR5465 - Galaxies

Credits: 4

Presents material necessary for study of the Milky Way, galaxies, active galaxies, and the large-scale structure of the universe. Topics include stellar populations, kinematics and dynamics in the Milky Way and other galaxies, galaxy classification and properties, and active nuclei and quasars.

Prerequisite: graduate standing in astrophysics.

ASTR5470 - Interstellar Medium and Diffuse Matter

Credits: 4

The material between stars is the primary topic, including the chemistry, energetics, and evolution of interstellar matter. The formation of molecules and dust grains, and their composition, are also discussed. Emission processes characteristic of the ISM are described.

0786

Prerequisite: ASTR 5460.

ASTR5490 - Planets and Their Stars

Credits: 4

Reviews recent and current research in planets and exoplanets. Topics may include planet formation, known properties of exoplanets, comparisons to Solar System planets, properties of planet-hosting stars, and evolution of planetary systems.

Prerequisite: graduate standing or permission of the instructor.

ASTR5630 - General Relativity and Cosmology I

Credits: 3

Presents a detailed study of Einstein's theory of the gravitational field with emphasis on the geometric structure of space-time, and selected topics in general relativity.

Prerequisite: PHYS 5320, PHYS 5420.

ASTR5860 - Independent Study

Credits: 1-4

Max Credit (Max. 24)

Investigations on the level of original graduate research in astrophysics.

Prerequisite: ASTR 4860 or equivalent.

ASTR5870 - Special Topics in Astronomy

Credits: 1-4

Max Credit (Max. 20)

Prerequisite: graduate standing

ASTR5960 - Thesis Research

Credits: 1-9

Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ASTR5980 - Dissertation Research

0787

Credits: 1-9

Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate degree program.

Atmospheric Science

ATSC1101 - First-Year Seminar

Credits: 3

USP Code [(none<>FYS)]

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP Code [SE<>PN]

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP Code [(none<>PN)]

ATSC2200 - Severe and Unusual Weather

Credits: 3

A nontechnical course on severe and unusual weather events that occur around the globe. The focus of the course is on a wide range of weather events that have profound impacts on societies, economics, and cultures, and the material is presented in a qualitative manner such that is highly accessible by students coming from all backgrounds.

USP Code [(none<>PN)]

ATSC3890 - Engineering Honors Program Research Methods

0788

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ATSC4320 - The Ocean Environment

Credits: 3

Focuses on the ocean as a system. Objective is the development of interdisciplinary understanding of marine processes, especially those processes occurring along coastal margins. Emphasis is on the development of quantitative models and their use in understanding anthropogenic impact on ocean resources.

Dual Listed ATSC 5320.

Prerequisite: MATH 2310, PHYS 1310, CHEM 1030, ES 3060 (or ES 3070), LIFE 1010, senior standing or higher.

ATSC4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed BE 4580/CE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

ATSC4650 - Undergraduate Research in Atmospheric Science

Credits: 2-6

Max Credit (max 9)

Course Description and

Prerequisite: Independent research in atmospheric science under supervision of an atmospheric science faculty member. Projects are possible in the fields of cloud and aerosol physics, radar meteorology, mesoscale dynamics, and stratospheric chemistry. Participation in field work, involving the UW aviation or stratospheric ballooning facilities, is a possibility. Research results are summarized in a report.

ATSC4900 - Problems in Atmospheric Science

Credits: 1-3

Max Credit (Max. 10)

Independent study of a particular problem or phrase of atmospheric science, or presentation of reviews and discussion of current

advances in atmospheric science investigations.

Prerequisite: ATSC 4010 , 4031, and 4035.

ATSC5008 - Mesoscale Meteorology

Credits: 3

Fundamental dynamics of mesoscale motions including departures from hydrostatic balance. Mesoscale energy sources. Boundary layer circulations. Convective initiation. Structure and dynamics of deep convection and mesoscale organized convection. Atmospheric waves. Thermally and dynamically forced flow over mountains.

Prerequisite: permission of the instructor.

ATSC5009 - Objective Analysis in Geoscience

Credits: 3

Techniques for extracting information from geophysical data directly, such as compositing, time series analysis, singular value decomposition, principal component analysis, and filtering as well as some specialized topics such as wavelet analysis.

Prerequisite: Calculus III (such as MATH 2210) and Differential Equations (such as MATH 2310), or consent of the instructor.

ATSC5010 - Physical Meteorology I

Credits: 4

First and second law of thermodynamics applied to energy transformations in the atmosphere, including dry, moist, and saturated processes and atmospheric stability. Fundamentals of radiation including blackbody, planetary budget, and propagation and how these drive the thermodynamics of the earth's atmosphere.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5011 - Physical Meteorology II

Credits: 4

Quantitative description of cloud particle nucleation, growth by condensation, and growth by deposition and collection. Ties to other atmospheric processes, e. g. , radiation budgets and cloud dynamics, are also emphasized. Course material is presented in lecture and computer-based laboratory settings. A numerical cloud model is developed and analyzed in the laboratory.

Prerequisite: ATSC 5010.

ATSC5014 - Dynamic Meteorology

Credits: 4

Development and interpretation of the atmospheric equations of motion, scales of motion, horizontal atmospheric winds, thermal wind equation, circulation and vorticity, mesoscale motions. Introduction to planetary boundary layer flows. Data visualization software is also introduced and used to develop understanding of dynamical processes.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5016 - Synoptic Meteorology

Credits: 4

Large-scale vertical motion as viewed from quasigeostrophic and isentropic potential vorticity perspectives. Baroclinic instability, and the structure and evolution of extratropical cyclones. Identification and development of fronts, jet streams and associated weather features. Role of topography on large-scale circulations.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5018 - Ethics and Research Methods

Credits: 1

Ethics and ethical dilemmas in research and academia and how to address them are discussed. This course also covers general research methodology and describes processes for research funding and disseminating research findings and the peer-review process.

Prerequisite: graduate standing.

ATSC5040 - Climate Science and Climate Change

Credits: 3

Global climate system components, and their interactions. Radiative, dynamic, thermodynamic, chemical, and feedback processes affecting the climate system. Natural and anthropogenic drivers of climate change. Past and present climate variability and sensitivity, and its simulation. Structure of climate models, their components, parameterizations, and attributes. Current climate modeling results and predictions of future climate.

Prerequisite: ATSC 5001, ATSC 5016.

ATSC5210 - Cloud and Precipitation Systems

Credits: 3

Types of clouds and precipitation systems, and the precipitation mechanisms in those systems; structure of convective, orographic, and frontal systems and severe storms. Schematic and numerical models of clouds and storms with emphasis on hailstorms.

Prerequisite: ATSC 5011 and ATSC 5014.

ATSC5310 - Atmospheric Dynamics II

Credits: 3

Introduction to the dynamic energetics of the atmosphere, wave motions, atmospheric instabilities. Introduction to numerical modeling, applications.

Prerequisite: ATSC 5014.

ATSC5320 - The Ocean Environment

Credits: 3

Focuses on the ocean as a system. Objective is the development of interdisciplinary understanding of marine processes, especially those processes occurring along coastal margins. Emphasis is on the development of quantitative models and their use in understanding anthropogenic impact on ocean resources.

Dual Listed ATSC 4320.

Prerequisite: MATH 2310, PHYS 1310, CHEM 1030, ES 3060 (or ES 3070), LIFE 1010, senior standing or higher.

ATSC5330 - Boundary Layer Meteorology

Credits: 3

A quantitative and descriptive study of the thermodynamics and dynamics of the planetary boundary layer, including budgets (heat, moisture, momentum, turbulent kinetic energy, radiation), stability, turbulence and turbulent fluxes, convection, terrain effects, phenomenology, and measurement and analysis techniques.

Prerequisite: ATSC 5010, ATSC 5014.

ATSC5340 - Radar Meteorology

Credits: 3

The theory of radar and the application of radars to studies of the atmosphere, including basic radar design, distributed targets, attenuation, polarization, Doppler velocities, analysis techniques, and examples of radar studies of clear air, clouds, and precipitation.

Prerequisite: ATSC 5010, ATSC 5011.

ATSC5350 - Atmospheric Chemistry

Credits: 3

Origin and composition of the atmosphere. Sources, lifetimes, transport of gases and aerosols. Cycles of C, S, N and trace elements. Removal processes: precipitation, and dry deposition. Homogenous and Heterogeneous kinetics. Anthropogenic influences: effect of air pollution on radiation balance and cloud processes.

Prerequisite: graduate standing in a physical science or engineering.

ATSC5360 - Aircraft Instrumentation

Credits: 3

An introduction to instrumentation used on research aircraft to measure properties of the atmosphere. Topics include measuring atmospheric state, atmospheric particles, and other constituents (i. e. trace gases) from aircraft. Principles of measurement techniques are described, complexities due to clouds are presented, and resulting uncertainties and limitations are explored.

Prerequisite: Graduate student in Atmospheric Science or consent of instructor.

ATSC5370 - Satellite Remote Sensing

Credits: 3

Physical principles of atmospheric remote sensing, with a breadth of applications in passive and active remote sensing of the atmosphere. Offers a solid understanding of remote sensing instrumentation and retrieval approaches for a variety of atmospheric parameters.

Prerequisite: graduate student in Atmospheric Science or consent of instructor.

ATSC5600 - Advanced Cloud Microphysics

Credits: 3

Analysis of the processes involved in cloud and precipitation formation. Detailed treatments of the condensation, ice nucleation, vapor growth, and collection processes. Emphasis is on reviewing the current state of knowledge in the field and on surveying directions of research.

Prerequisite: ATSC 5010 and ATSC 5011.

ATSC5700 - Numerical Modeling of Atmosphere

Credits: 3

Governing equations and assumptions, finite differencing, subgrid-scale processes, cloud processes, aerosol and atmospheric chemistry, boundary layer processes, radiative transfer, cumulus parameterizations, parcel models, kinematic models, large-eddy simulating (LES) models, cloud-resolving models (CRMs), large-scale regional and global climate models (GCMs).

Prerequisite: ATSC 5010 or ATSC 5011 or ATSC 5014 or consent of instructor.

ATSC5880 - Atmospheric Science Problems

Credits: 1-3

Max Credit (Max. 6)

A special course for graduate students in atmospheric science only, designed to make possible the study and investigation of problems or phases of atmospheric science selected to fit the needs of students.

ATSC5890 - Atmospheric Science Seminar

Credits: 1-3

Max Credit (Max. 6)

A seminar-type class furnishing motivation for advanced study of current problems by means of library research, study of current literature, and carefully guided class discussions.

Prerequisite: consent of department head.

ATSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ATSC5920 - Continuing Registration: On Campus

Credits: 1-12

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ATSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ATSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

ATSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ATSC5980 - Dissertation Research

0794

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

ATSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Bioengineering

BE4580 - Honors Undergraduate Research

Credits: 3
An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/CE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

BE4810 - Bioinstrumentation

Credits: 3
Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 5810.

Prerequisite: EE 2210 or similar electric circuit course.

BE4820 - Biomedical Signal Processing

Credits: 3
Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

0795

Dual Listed BE 5810.

Prerequisite: EE 3220, basic course, or equivalent.

BE5410 - Rehabilitation Engineering

Credits: 3

This course covers the engineering principles of multiple rehabilitation technologies, including rehabilitation robots, exoskeletons, wearable sensors, electrical stimulators, implants, and virtual reality. Students will learn the technical and biological principles of all of these technologies via lectures, projects, and literature reviews.

Prerequisite: graduate standing.

BE5810 - Bioinstrumentation

Credits: 3

Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 4810.

Prerequisite: EE 2210 or similar electric circuit course.

BE5820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

Dual Listed BE 4820.

Prerequisite: EE 3220, basic course, or equivalent.

BE5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics. Note: credit in this course may not be included in a graduate program of study for degree purposes.

Biomedical Science

BMS5880 - Biomedical Sciences Research Ethics

Credits: 2

Introduction to the field of bioethics, including major ethical theories and principles, with an emphasis on understanding the ethical issues that may arise while conducting biomedical research and potential strategies for properly addressing these ethical

issues.

BMS5920 - Continuing Registration: On Campus,

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5940 - Continuing Registration: Off Campus,

Credits: 1-24
Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5960 - Thesis Research,

Credits: 1-24
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

BMS5980 - Dissertation Research,

Credits: 1-24
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

BMS5985 - Seminar

Credits: 1
Max Credit (Max. 3)

A series of weekly seminars presented by faculty from other universities, private or public sector health industries or by Biomedical Science Program faculty and students. Examines current topics and research in biomedical sciences through oral presentations and discussion.

Prerequisite: graduate standing and consent of instructor.

Botany

BOT1101 - First-Year Seminar

Credits: 3

USP Code [(none)>FYS]

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP Code [L<>(none)]

Prerequisite: COM1 or equivalent writing course.

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed ATSC/ESS 4001/GEOL 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

BOT4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040/GEOG 4040.

USP Code [CS<>(none)]

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP Code [WC,L<>COM3]

Note: Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4101.

Note: Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

BOT4235 - Marine Biology

0799

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

0800

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

0802

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

BOT4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Provides undergraduate students with academic credit for approved work experiences in the fields of botany and biology. Must be arranged in consultation with a botany faculty member and the work supervisor.

Prerequisite: junior or senior standing,

BOT5000 - Graduate Seminar

Credits: 1-3

Max Credit (Max. 6)

Selected topics on current research in the botanical sciences.

Prerequisite: 15 hours of botany or biology.

BOT5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

BOT5150 - Research in Remote Sensing

Credits: 1-6

Max Credit (Max. 6)

Independent research into problems on the remote sensing of vegetation using satellite technology.

Prerequisite: graduate standing and consent of instructor.

BOT5200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 4200.

BOT5235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 5235.

Dual Listed BOT 4235.

Prerequisite: graduate standing.

BOT5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.

Dual Listed BOT 4280.

Prerequisite: graduate standing.

BOT5320 - Research in Mycology

Credits: 1-3

Max Credit (Max. 6)

Prerequisite: graduate standing or consent of instructor.

BOT5395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 4395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT5420 - Research in Physiology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5480 - Spatial Information Sciences Seminar

Credits: 1

There are many earth science technologies, remote sensing, GIS and GPS. Synergism among these technologies increase the range of solutions for research and management. This course is a forum for presentation of these solutions or questions requiring solutions.

Cross Listed GEOL 5480.

Prerequisite: a course in remote sensing, GIS, GPS, and graduate standing.

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT5555 - Computational Biol Practicum

Credits: 3

Students will perform computational analysis of data to address contemporary biology questions for clients. Teams of students will work together, with consultation and direction from the instructor, to perform analyses, answer scientific questions, and report findings to a client, using best practices in report generation and reproducible research.

0805

Prerequisite: BOT 4550/BOT 5550.

BOT5600 - Ecological Modeling

Credits: 3

Course will immerse students in the most important and fundamental statistical modeling techniques for data analysis. Each class will include theoretical content delivered through a brief lecture and the immediate application of the theory through activities using R software.

Prerequisite: STAT 2050, STAT 3050, or an equivalent course.

BOT5610 - Research in the Taxonomy of Vascular Plants

Credits: 1-6

Max Credit (Max. 6)

The University of Wyoming is especially well equipped for research on the classification of native plants. The Rocky Mountain Herbarium offers an abundance of material for study and the library is especially rich in taxonomic literature. Monographic work may be done on an assigned genus or on the plants of a limited area. Cytological, anatomical, and biochemical techniques may be employed in the solution of certain problems.

Prerequisite: graduate standing and consent of instructor.

BOT5650 - Readings in Plant Systematics

Credits: 1

Max Credit (Max. 6)

Centered on readings involving selected topics in the current plant systematics literature.

Prerequisite: BOT 4680.

BOT5664 - Topics: Evolution

Credits: 1-4

Max Credit (Max. 12)

Advanced topics in evolutionary biology are engaged by studying primary research and topical syntheses in the current literature.

Dual Listed BOT 4664.

Prerequisite: LIFE 3500 or equivalent.

BOT5665 - Research in Evolutionary Biology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5690 - Special Topics in Systematics

Credits: 1-4

Max Credit (Max. 12)

Designed to acquaint students with various topics not covered in regular courses. Emphasis is placed on recent developments in the journal literature.

Prerequisite: BOT 4680 or 5680 or equivalent.

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5710 - Research in Ecology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5720 - Research in Physiological Ecology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms. Lecture with inclusive hands-on laboratory.

Cross Listed RNEW 5730.

Dual Listed BOT 4730.

Prerequisite: one course in ecology and one in physiology.

BOT5745 - Terrestrial Ecosystem Ecology

0807

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. Study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Dual Listed BOT 4745.

Prerequisite: one course in ecology.

BOT5750 - Seminar in Ecophysiology

Credits: 1-3

Max Credit (Max. 8)

Prerequisite: 1 course in physiology and 1 course in ecology.

BOT5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

BOT5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 5780.

Dual Listed BOT 4780.

Prerequisite: Consent of instructor.

BOT5790 - Special Topics in Ecology

Credits: 1-3

Max Credit (Max. 6)

Designed to acquaint advanced students with various topics not covered in other courses. Emphasis is placed on recent developments appearing in the journal literature.

Dual Listed BOT 4790.

Prerequisite: two courses in ecology.

0808

BOT5900 - Practicum in College Teaching1

Credits: 3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

BOT5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

BOT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

BOT5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

BOT5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Business

BKCH3021 - Fundamentals of Blockchain

0809

Credits: 3

The purpose of this course is to provide a fundamental understanding of blockchain technologies and their implications. Topics will focus on understanding how blockchain may change the way we think about money, disrupt traditional financial institutions and eliminate costly intermediaries.

Prerequisite: Requires Junior Class Standing.

BKCH4021 - Business Applications of Blockchain

Credits: 3

This course provides advanced concepts underpinning the applications of global blockchain technologies for business and their use cases. Students will learn about the underlying technologies to be well-prepared to develop blockchain applications in the business world.

Prerequisite: BKCH 3021.

BKCH4121 - Case Studies in Block Chain

Credits: 3

This experiential learning focused course is targeted toward understanding the creation and development of blockchain ventures. Besides course lecture materials, students will study and support new blockchain ventures in a real-world setting.

Prerequisite: BKCH 3021.

BUSN1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Chemical Engineering

CHE1005 - Introduction to Chemical Engineering

Credits: 1

Provides an overview of chemical engineering and its role in the current technological importance: energy, biotechnology, production of chemicals, and materials processing. Introduces strategies for solving engineering problems, including ethical considerations and teamwork, discusses process variables, units, mass balance, and data analysis, and incorporates active learning exercises using spreadsheet to solve chemical engineering problems.

Prerequisite: concurrent enrollment in MATH 2200.

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)

Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHE2060 - Chemical Engineering Computing

Credits: 3

Introduces fundamental concepts in linear algebra, numerical methods and applied statistics needed to solve engineering problems. In this context, this course also introduces and reinforces computational tools that will be useful for other CHE classes.

Prerequisite: C or better in CHE 1005 or ES 1060; C or better in CHE 2005; concurrent enrollment in MATH 2310.

CHE2070 - Chemical Thermodynamics

Credits: 3

Discusses first and second laws of thermodynamics applied to chemical processes, production of power from heat, refrigeration, and liquefaction processes, develops thermodynamic relations for calculating thermodynamic properties of fluids, including the use of equations of state, and introduces heat effects, Gibbs-energy change of reaction, and chemical-reaction equilibria.

Prerequisite: C- or better in CHE 2005, PHYS 1210; C or better in MATH 2210.

CHE2080 - Chemical Engineering Fluid Mechanics

Credits: 3

Introduces the fundamental aspects of macroscopic fluid mechanics, including physical properties, fluid statics, mass, energy, and momentum balances, momentum transport, and flow through pumps, pipes, and other chemical engineering equipment for both incompressible and compressible fluids, and of microscopic fluid mechanics, including differential mass and momentum balances.

Prerequisite: C- or better in CHE 2005, PHYS 1210, and C or better in MATH 2210.

CHE2090 - Practical Fundamentals of Process Control

0811

Credits: 2

Introduces students to sensors, valves, actuators and the assembly of process control components. Provide hands-on practical experience with level control, flow control, temperature control and pressure control processes. This course consists of one (1) hour of lecture and two (2) hours of laboratory per week.

Prerequisite: C or better in MATH 2205.

CHE3015 - Chemical Thermodynamics II

Credits: 3

Introduces mixture properties, such as chemical potentials, excess properties, partial molar properties, heats of mixing, fugacities, and practical tools for estimating them from solution theories and equations of state. These tools and concepts are applied to phase and chemical equilibria.

When Offered (Normally offered fall semester)

Former Course Number [3010]

Prerequisite: C or better in CHE 2060, and CHE 2070 or ES 2310.

CHE3026 - Heat Transfer

Credits: 3

Introduces the theory and application of energy transport (e. g. conduction, convection, radiation), discusses in depth fundamentals of microscopic energy transport, and applies the knowledge to macroscopic chemical engineering processes and systems.

Prerequisite: C- or better in CHE 2060, and CHE 2080 or ES 2330.

CHE3028 - Mass Transfer

Credits: 3

Introduces mass transfer concepts, including molecular diffusion, convective mass transfer, and mass transfer between phases, and the development of mathematical models of these physical phenomena, applicable to the analysis and design of chemical processes.

Prerequisite: C- or better in CHE 2005, CHE 2060, and CHE 2080 or ES 2330.

CHE3035 - Separation Processes

Credits: 3

Applies transport and equilibrium concepts and models to the analysis and design of separation processes, such as distillation, absorption, extraction, leaching, adsorption, crystallization, and membrane separation processes.

Prerequisite: C or better in CHE 2060, and CHE 2070 or ES 2310.

CHE3040 - Unit Operations Laboratory I

Credits: 3

Laboratory experiments examining settling, pump performance, heat transfer, adsorption, gas transfer, and distillation. Introduces topics in statistics including: probability distributions, mean, median, mode, variance and standard deviation, systematic and random error, confidence intervals, and t-tests, F-tests and ANOVA. Emphasizes the preparation of formal laboratory reports including experimental error analysis.

When Offered (Normally offered fall semester)

USP Code [WB< >(none)]

Prerequisite: C- or better in CHE 3026 and CHE 3028 and CHE 4060. (Normally offered fall semester)

CHE3070 - Process Simulation and Economics

Credits: 3

Introduces the process simulation software used in the chemical industry and its applications, including examples of heat and material balances, physical properties, phase and chemical equilibria, equilibrium-stage separations and costs and profitability analysis.

Prerequisite: C- or better in CHE 2005, CHE 3015, and CHE 3026 and concurrent enrollment in CHE 3028.

CHE3090 - Applying Simulation to Dynamic Processes

Credits: 1

Introduces students to dynamic simulation software for controlling individual chemical engineering processes. This course consists of two (2) hours of laboratory per week.

Prerequisite: C or better in CHE 2005.

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/ARE 3890/CE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

CHE3900 - Undergraduate Research

Credits: 1-6

Students carry out research appropriate to undergraduates, under faculty supervision. May be taken more than once.

When Offered (Normally offered each semester)

Prerequisite: junior standing in chemical engineering.

CHE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Examines social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed PETE 4000.

Prerequisite: junior standing and completion of two lab sciences.

CHE4050 - Unit Operations Laboratory II

Credits: 3

Laboratory experiments examining heat transfer and process control. Also requires students to design, conduct and analyze 'open-ended' experiments. Introduces LabView and covers factorial experimental design and linear and non-linear data regression approaches. Emphasizes the preparation of a formal report describing all aspects of the experiments.

When Offered (Normally offered spring semester)

Prerequisite: C- or better in CHE 3040. (Normally offered spring semester)

CHE4060 - Reaction Engineering

Credits: 3

Introduces chemical process kinetics, catalysis and reactor design. Includes homogeneous and heterogeneous reaction kinetics; design of batch, stirred-tank and tubular reactors; and nonisothermal operation.

When Offered (Normally offered spring semester)

Prerequisite: C- or better in CHE 3015 and CHE 3026 and concurrent enrollment in CHE 3028.

CHE4070 - Process Design I

Credits: 4

Encompasses engineering design of chemical processes. Introduces engineering economics, process safety management and environmental management.

When Offered (Normally offered fall semester)

Prerequisite: C- or better in CHE 3028 and CHE 3070 and CHE 4060.

CHE4080 - Process Design II

0814

Credits: 4

Intended for the last semester of the senior year. Applies all previous courses to the design of safe, economical and environmentally benign chemical processes.

USP Code [WC<>COM3]

Prerequisite: C- or better in CHE 4070, and COM-2.

CHE4090 - Process Dynamics and Control

Credits: 3

Encompasses analysis and design control systems for the chemical process industry including steady-state approximation, types of controllers, simple unsteady-state analysis, use of mathematical models and process dynamics under control.

Prerequisite: C- or better in CHE 3028 and CHE 4060.

CHE4092 - Controlling Process Systems

Credits: 3

Capstone process control course. Students will design process control for systems of linked processes including sensing and transmission, final control elements, and controller. This course consists of two (2) hours of lecture and three (3) hours of laboratory per week.

Prerequisite: C or better in CHE 3090 and concurrent enrollment in either CHE 4090, EE 4620, or EE 4621.

CHE4100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 5100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

0815

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

CHE4200 - Industrial Chemical Production

Credits: 3

Integration of chemical engineering and chemistry as practiced in modern industry. Engineering of chemical reactions and processes for commodity chemicals, petroleum-based fuels, petrochemicals, intermediates, specialty chemicals, pharmaceuticals, and engineered materials. Environmental strategies for waste minimization and pollution prevention.

Prerequisite: CHEM 2420 and CHE 3015 (may be taken concurrently).

CHE4210 - Natural Gas Processes and Modeling

Credits: 3

After a quick introduction to the Hysys simulation program, the main chemical processes used to convert well-head gas to products will be reviewed and modeled (fractionation train, sulfur recovery, tail gas clean-up, dehydration, refrigeration, nitrogen rejection) in high detail, including appropriate property models to use.

Prerequisite: CHE 3070.

CHE4220 - Metabolic and Protein Engineering

Credits: 3

An introduction to the design of biological systems for conversion of a feedstock to product, with emphasis on synthetic biology and directed evolution design principles, evolutionary mechanisms and tradeoffs. Metabolic pathways and molecules of industrial importance will be discussed, as well as ethics as applied to synthetic biology and bioengineering.

Dual Listed CHE 5220.

Prerequisite: MOLB 2021 or concurrent enrollment in CHE 3100.

CHE4270 - Advanced Process Simulation

Credits: 3

Advanced topics for a commercial process simulation software that is routinely used in industry will be covered. Topics will include: electrolyte systems, physical property methods and regression of parameters, petroleum industry component selection and distillation, solids handling capabilities including coal processing, advanced recycle stream convergence techniques, and equation-oriented solution methods.

Prerequisite: CHE 3070.

CHE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430 /ENR 4430.

Prerequisite: CHEM 1020.

CHE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

CHE4970 - Internship in Chemical Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students in appropriate engineering activities while serving as interns in an industrial, government, or other setting.

Prerequisite: must be involved in a chemical engineering co-op/internship experience.

CHE4972 - Internship in Process Control Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students serving as interns with an approved organization that provides process control and instrumentation experience.

Prerequisite: Be enrolled in the Process Control and Instrumentation minor.

CHE4990 - Topics in Chemical Engineering

Credits: 1-6

Max Credit (Max. 6)

Features topics not included in regularly offered classes. Section I is individual study. Other sections are group study by seminar or in class format.

Prerequisite: CHE 3000 or concurrent enrollment.

CHE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed PETE 5010.

Prerequisite: ES 2330, MATH 2310, and graduate standing in Chemical or Petroleum Engineering.

CHE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed PETE 5020.

Prerequisite: graduate standing.

CHE5030 - Reaction Kinetics

Credits: 3

An analysis of reactions involving phase boundaries, heterogeneous catalysis, gas-solid systems, and gas-liquid systems.

Prerequisite: CHE 4060.

CHE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate Solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up faulted systems, interference, drillstem tests, and isochronal test analysis.

Dual Listed PETE 5060.

Prerequisite: graduate standing.

CHE5090 - Graduate Teaching and Research: Theory and Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, careers with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific methods, developing hypotheses, grant proposal, and paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

CHE5100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 4100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE5150 - Topic in Chemical Engineering

Credits: 1-3

Max Credit 12

Selected topics in chemical engineering.

Prerequisite: Consent of instructor

CHE5160 - Biomedical Engineering - Transport Processes

Max Credit 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. This will involve topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Dual Listed CHE 4160

Prerequisite: Consent of instructor and grade of C or better in at least 3 courses counting no more than 2 from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2020, MATH 2200, KIN 2040, MOLB 2240, CHE 3000, ES 2310, graduate standing.

CHE5165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastin, and silk.

Dual Listed CHE 4165

Prerequisite: LIFE 1010 and CHEM 2420 or permission of instructor.

CHE5190 - Polymeric Chemistry Engineering

0819

Credits: 3

This course discusses basic methods in the synthesis of polymers (polymerization) as well as their applications toward to common and new promising polymer products. In addition, the kinetics of these methods, the synthetic processing techniques and the end products will be addressed together with applications and characterization of various polymers

Prerequisite: CHE 3015, CHE 4060, and CHEM 2440.

CHE5220 - Metabolic and Protein Engineering

Credits: 3

An introduction to the design of biological systems for conversion of a feedstock to product, with emphasis on synthetic biology and directed evolution design principles, evolutionary mechanisms and tradeoffs. Metabolic pathways and molecules of industrial importance will be discussed, as well as ethics as applied to synthetic biology and bioengineering.

Prerequisite: MOLB 2021 or concurrent enrollment in CHE 3100.

CHE5230 - Advanced Catalysis and Characterization

Credits: 3

Focus on modern ideas and techniques used to describe gas-solid interactions, including adsorption and chemical reactions. The usefulness of photon and electron spectroscopies for evaluating the structure of real catalysts will be discussed. Catalysis of important classes of chemical reactions will be related to results obtained by various materials characterization methods.

Prerequisite/Corequisite: CHE 5030.

CHE5355 - Mathematical Methods in Chemical Engineering

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Dual Listed PETE 5355

Prerequisite: MATH 2210, CHE/PETE 3025 or equivalent.

CHE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems

Cross Listed CE/ENVE 5410

Prerequisite: Consent of instructor.

0820

CHE5440 - Fluid Mechanics

Credits: 3

Lagrangian and Eulerian descriptions, conservation laws, stress and rate-of-stress tensors, Navier-Stokes equations, energy equations, vorticity and circulation inviscid and potential flows, laminar flows, turbulent flows, boundary-layer theory.

Cross Listed ME 5440

CHE5600 - Research Data Management

Credits: 3

A general approach to research data management for graduate students and researchers. Topics include: the case for data management, data management planning, meeting grant requirements, formatting and organizing, storing and transferring, legal and ethical issues, strategies for research teams, sharing data, and publishing, citing, and rights to research data.

Cross Listed ES/GRAD/LBRY/PETE 5600

CHE5700 - Fundamentals of Coal Utilization

Credits: 3

Following introduction to coal structure, constituents and classification, fundamental principles of coal utilization technologies will be examined. The topics to be covered include behavior of coal stockpiles, drying, pyrolysis, combustion/gasification of coal. Reactor models for utilization of coal will be discussed with reference to current environmental issues and remediation.

Prerequisite: Graduate standing

CHE5880 - Problems in Chemical Engineering

Credits: 1-6

Max Credit 6

A special course designed to make possible the study and investigation of problems or phases of chemical engineering selected to fit the needs of the student.

Prerequisite: Graduate standing in engineering

CHE5890 - Chemical Engineering Seminar

Credits: 1

Max Credit 9

Departmental seminar on current research with formal training for student presentation of technical papers.

Cross Listed PETE 5890

Prerequisite: Graduate standing

0821

CHE5900 - Practicum in College Teaching

Credits: 1-3
Max Credit 3

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience

Prerequisite: Graduate Status

CHE5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit 16

Prerequisite: Advanced Degree Candidacy

CHE5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit 16

Prerequisite: Advanced degree candidacy

CHE5960 - Thesis Research

Credits: 1-12
Max Credit 24

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis

Prerequisite: Enrolled in a graduate degree program.

CHE5980 - Dissertation Research

Credits: 1-12
Max Credit 48

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: Enrolled in a graduate level degree program.

CHE5990 - Internship

Credits: 1-12
Max Credit 48

Prerequisite: Graduate standing

Chemistry

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP Code [SP<>PN]

Note: Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

CHEM1001 - The Chemical Community

Credits: 1

A survey of chemistry both as a major and a discipline. Chemistry's historical role, the scientific method, scientific ethics, as well as current challenges in the major fields of chemistry are discussed. Information literacy is strongly emphasized, both by familiarization with university resources as well as specialized chemical databases.

When Offered (Normally offered fall semester)

USP Code [I,L<>(none)]

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP Code [SP<>PN]

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP Code [SP<>PN]

Prerequisite: CHEM 1020.

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP Code [SP<>PN]

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP Code [SP<>PN]

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

CHEM2000 - Special Topics in the Laboratory

Credits: 1

Max Credit (Max. 4)

Introduces students to laboratory experience in chemistry.

Prerequisite: special permission from the chemistry department.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420.

When Offered (Normally offered spring semester)

Note: This course is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Note: Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

CHEM4000 - Career Skills

Credits: 1

Designed to develop skills needed for success in the chemical profession or in graduate school. Topics include information on graduate programs, resume preparation, scientific writing, oral presentation, technical seminars, and laboratory note keeping.

When Offered (Normally offered fall semester)

Prerequisite: chemistry major, CHEM 4110 or concurrent enrollment.

CHEM4040 - Chemical Literature

Credits: 1-2

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 4507 or CHEM 3550 or concurrent enrollment.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4515 - Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. This includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software and mathematical analysis of physical chemistry problems.

Dual Listed CHEM 5515.

Prerequisite: MATH 2200 and MATH 2205, CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

CHEM4516 - Applied Mathematics in Physical Chemistry II

Credits: 3

Covers the advanced mathematical techniques in physical and theoretical chemistry. This includes introduction into probability and stochastic processes, infinite series, vector and tensor calculus, Fourier transforms and partial differential equations. Includes

practical numerical problem solutions using MatLab software and applications of the mathematical analysis to specific physical chemistry problems.

Dual Listed CHEM 5516.

Prerequisite: CHEM 4515.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

CHEM4560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical, density functional, semi-empirical and molecular mechanics methods.

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 5560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

CHEM4920 - Special Problems in Chemistry

Credits: 1-3

Probes deeply into special areas of chemistry through library or laboratory work. Taken under supervision of faculty in the area of the investigation.

When Offered (Offered every semester)

Prerequisite: consent of instructor.

CHEM4930 - Undergraduate Research

0828

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

CHEM5000 - Seminar in Chemistry

Credits: 1

Max Credit (Max. 3)

Prerequisite: graduate standing in chemistry or biochemistry.

CHEM5100 - Special Topics in Advanced Inorganics

Credits: 1-9

Max Credit (Max. 12)

A course designed for students with an interest in contemporary inorganic chemistry. Recent problems in the literature and techniques for their solution will be addressed.

When Offered (Normally offered during Summer Session)

CHEM5111 - Advanced Inorganic Chemistry

Credits: 3

A graduate-level course on theoretical and descriptive inorganic chemistry. Topics will include molecular symmetry, spectroscopy, electronic structure/bonding, magnetism, electron transfer, and catalysis.

Former Course Number [5110]

Prerequisite: CHEM 2420, CHEM 4110 and CHEM 3550 or CHEM 4507.

CHEM5115 - Descriptive Inorganic Chemistry

Credits: 3

Advanced survey of inorganic chemistry, emphasizing the synthesis, structural, and reactivity properties of inorganic compounds. Emphasis will be placed on the application of bonding theory and periodic principles to the chemistry of main-group, d-block, and f-block elements.

Prerequisite: CHEM 4110, CHEM 5110 or CHEM 5111.

CHEM5140 - Organometallic Chemistry

Credits: 3

A survey of bonding and synthetic reactions of transition metal organometallic chemistry.

Prerequisite: CHEM 4110/5110.

CHEM5150 - Inorganic Group Seminar

Credits: 1

Max Credit (Max. 9)

Course designed for students with an interest in contemporary inorganic chemistry. Recent problems in the literature and techniques for their solution are addressed.

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5200 - Special Topics in Analytical Chemistry

Credits: 1-6

Max Credit (Max. 12)

Material selected from chromatography, electroanalytical chemistry, ion exchange, chemical separations, optical methods of analysis, polarography and other areas.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 4230, CHEM 4507.

CHEM5220 - Modern Electroanalytical Methods

Credits: 3

An advanced survey of electroanalytical chemistry including ion selective potentiometry, electrolysis, coulometry, polarography and voltammetry.

CHEM5240 - Optical Methods of Chemical Analysis

Credits: 3

An advanced survey of the theory, instrumentation and applications of optical methods of chemical analysis.

Prerequisite: CHEM 4230, CHEM 4507.

CHEM5250 - Advanced Chemical Instrumentation

Credits: 3

Introduces chemistry students to the basic elements of electronics. Specific topics include networks, passive and active filters, digital electronics, logic gates, counters, flip-flops, and converters. Second half of course introduces students to experimental

0830

design, pattern recognition, factorial analysis, and multivariate statistical methods.

Prerequisite: CHEM 4230 or its equivalent.

CHEM5260 - Separation Methods

Credits: 3

A detailed survey of the theoretical and practical aspects of modern separation methods with emphasis on chromatography.

Prerequisite: CHEM 2230, CHEM 2440, and CHEM 4508.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5300 - Special Topics Synthetic

Credits: 1-6

Max Credit (Max. 9)

Material will be selected from one of the following areas: heterocycles, organometallics, natural products, physical and chemical methods of structure elucidation, organic photochemistry, and other special areas of organic chemistry.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 5330.

CHEM5310 - Organic Group Seminar

Credits: 1

Max Credit (Max. 9)

Designed for students with an interest in organic reaction mechanisms. A problem solving approach using electron pushing techniques will be emphasized.

Prerequisite: CHEM 5340.

CHEM5320 - Spectroscopic Methods of Structure Determination

Credits: 3

Provides theoretical and practical treatment of spectroscopic methods for application in research. Topics include ultraviolet, infrared, and nuclear magnetic resonance spectroscopy and mass spectrometry.

Prerequisite: CHEM 2440, CHEM 4507.

0831

CHEM5330 - Advanced Organic Chemistry

Credits: 3

Treatment of organic chemistry from the viewpoints of structure and mechanism with emphasis on structural theory of bonding, stereochemistry and the general classes of organic reactions.

Prerequisite: CHEM 2440 and CHEM 4507.

CHEM5340 - Synthetic Methods in Organic Chemistry

Credits: 3

Surveys and applies the important synthetic methods of organic chemistry with particular attention to recent developments.

Prerequisite: CHEM 5330.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 4400.

Prerequisite: CHEM 2440 or consent of instructor.

CHEM5500 - Special Topics in Physical Chemistry

Credits: 1-6

Max Credit (Max. 9)

Material will be selected from one of the following fields: electrochemistry, surface chemistry, catalysis, colloids, photochemistry, and other special fields of physical chemistry.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 4507 and 5510.

CHEM5501 - Physical Group Seminar

Credits: 1-9

Max Credit (Max. 9)

Designed for students with an interest in theoretical and experimental physical chemistry. Students are required to give presentations on current literature and research topics.

Prerequisite: graduate standing.

CHEM5515 - Methods of Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. Includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software, and mathematical analysis of physical chemistry problems.

Dual Listed CHEM 4515.

Prerequisite: MATH 2200 and MATH 2205, 1 yr. CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

CHEM5516 - Applied Mathematics in Physical Chemistry II

Credits: 3

Covers the advanced mathematical techniques in physical and theoretical chemistry. This includes an introduction into probability and stochastic processes, infinite series, vector and tensor calculus, Fourier transforms and partial differential equations. Includes practical numerical problem solutions using Matlab software and applications of the mathematical analysis to specific physical chemistry problems.

Dual Listed CHEM 4516.

Prerequisite: CHEM 4515/CHEM 5515.

CHEM5530 - Quantum Chemistry

Credits: 3

The quantum mechanical description of time-dependent and independent processes, including discussions of the Schrodinger equation, wave packets, approximate methods, and interaction of matter with radiation.

Prerequisite: two semesters of undergraduate physical chemistry.

CHEM5540 - Molecular Spectroscopy

Credits: 3

Introduction to the relationships among quantum mechanical formulations, experimentally determinable quantities obtained via spectroscopic methods, and physical parameters related to the structure of molecular systems.

Prerequisite: CHEM 5530.

CHEM5560 - Molecular Modeling

0833

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical,

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 4560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: consent of instructor.

CHEM5820 - Advanced Problems in Chemistry

Credits: 1-3

Max Credit (Max. 3)

A graduate level course for students desiring to probe more deeply into a special area of chemistry. Taken under the supervision of a faculty member in the field of investigation.

Prerequisite: consent of instructor.

CHEM5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

CHEM5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

0834

CHEM5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CHEM5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

CHEM5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

CHEM5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

CHEM5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Chinese

CHIN1010 - First Year Chinese I

0835

Credits: 4

Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP Code [(none)<>H]

CHIN1020 - First Year Chinese II

Credits: 4

Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP Code [(none)<>H]

Prerequisite: CHIN 1010 or equivalent.

CHIN1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

CHIN2030 - Second Year Chinese I

Credits: 4

Grammar, composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 1020 or equivalent.

CHIN2040 - Second Year Chinese II

Credits: 4

Further studies in grammar composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 2030 or CHIN equivalent.

CHIN2041 - Contemporary and Traditional Chinese Culture

Credits: 3

Designed to provide those with a serious interest in China and Chinese language with a cultural context for learning Chinese language. Incorporates economic and social material to give students a clear view of Chinese culture with an emphasis on Chinese language instruction.

Prerequisite: CHIN 2030.

CHIN3050 - Intermediate Composition and Conversation

Credits: 3

Develop abilities to read and write complex Chinese texts with an intermediate level of understanding, including texts in both conversational and narrative styles. Reading and writing skills will build considerably on the skills learned in two years of

0836

university study in Chinese language.

Prerequisite: CHIN 2040 or equivalent.

CHIN3055 - Business Chinese

Credits: 3

Comprehensive course on business language skills. For students with proficiency in Mandarin at the Intermediate Mid level or higher. Focus is on language functions for the workplace. Productive skills, both spoken and written, will include the composition of extended frequently-used business documents

USP Code [G<>COM2]

Prerequisite: CHIN 3050 or equivalent.

CHIN3065 - Intermediate Composition and Conversation II

Credits: 3

Students will not only understand and construct complex speech and writing but will gain the ability to do so effectively to persuade, discuss and communicate accurately with native Chinese speakers. Students will be able to relate topics such as personal experience, daily routine, reports, opinions and judgment in well-written Chinese paragraphs.

Prerequisite: CHIN 3050 or equivalent.

CHIN3160 - See Movies, Touch China

Credits: 3

This course combines exploration of classical and contemporary Chinese cultures through prominent Chinese films. The audio-video materials selected will be discussed in their historical context. Students will explore the transformations China has undergone, and will seek to understand the Chinese mindset.

USP Code [(none)<>H]

Prerequisite: COM1.

CHIN4070 - Business Chinese II

Credits: 3

Apply previously acquired skills in complex Chinese language and business topics to the thorough analysis of case studies in Chinese business scenarios. Students will be able to read, discuss, and reach conclusions based on case studies of international companies in China and Chinese companies in international markets.

Prerequisite: CHIN 3055.

Civil Engineering

CE1000 - VISTA Studio I

0837

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globalizability, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed ARE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE1010 - Civil Engineering Tools

Credits: 3

This course is an introduction to computing tools commonly used in civil engineering practice including 3-D Computer Aided Drafting, Spreadsheets and Presentation Software. Tools will be introduced through design work on typical civil engineering design projects.

Prerequisite/Corequisite: of MATH 2200.

CE2000 - VISTA Studio II

Credits: 3

Students work on a real-world project throughout the semester. Professional topics introduced include project management, engineering economic analysis methods, project estimating, professional ethics, engineering business practices common to the civil and architectural engineering professions, and professional leadership.

Cross Listed ARE 2000.

Prerequisite/Corequisite: ARE 1600 or CE 1010 and MATH 2205.

CE2070 - Engineering Surveying

Credits: 3

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Traverse field techniques and office calculations. Basic principles of surveying and map making.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE3000 - VISTA Studio III

Credits: 3

Students will apply professional skills such as project management, engineering economics, professional ethics, and sustainability to an integrated design project. The role of permitting, regulations, and professional codes to design problems will also be explored.

Cross Listed ARE 3000.

Prerequisite: ARE 2000 or CE 2000, and ES 2410.

CE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in loads on building, stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed ARE 3200.

USP Code [WB<>(none)]

Prerequisite: ES 2410.

CE3210 - Civil Engineering Materials

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Nondestructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed ARE 3210.

USP Code [WB<>COM3]

Former Course Number [2210]

Prerequisite: COM2 and ES 2410.

CE3300 - Hydraulic Engineering

Credits: 3

Develops analysis, design and modeling techniques for incompressible pipe flow, steady uniform and gradually varied open channel flow, and hydraulic structures.

Former Course Number [4320]

Prerequisite: ES 2330.

CE3400 - Introduction to Environmental Engineering

Credits: 3

An introduction to the major topics in environmental engineering. Focus areas include water supply, wastewater treatment, air pollution control and solid and hazardous waste management. Quantitative aspects and engineering solutions to problems are emphasized.

Prerequisite: MATH 2205 and CHEM 1020 or equivalent.

CE3500 - Transportation Engineering

Credits: 4

Introduction to the major topics in Transportation Engineering. Focus areas include roadway and non-motorized facility design, traffic operations, transportation planning, and pavement materials and design.

0839

Former Course Number [4500]

Prerequisite: CE 1010.

CE3600 - Soil Mechanics I

Credits: 4

A study of soil and the properties which influence its usefulness as an engineering material. Principles governing movement of soil, water and propagation of stresses through soil masses are studied.

Former Course Number [4600]

Prerequisite: ES 2410.

CE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/ARE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

CE4010 - Civil Engineering Design

Credits: 3

Students will prepare final civil engineering documents including construction plans, specifications, and engineering estimates for a civil engineering project. Concepts of standard specifications and sustainability measures will also be applied to the design.

Former Course Number [3010]

Prerequisite: ARE 3000 or CE 3000, and STAT 2050.

CE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed ARE 4200

Prerequisite: ARE 3200/CE 3200.

CE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

0840

Cross Listed ARE 4250.

Prerequisite: ARE 3200/CE 3200.

CE4260 - Structural Concrete Design

Credits: 3

Design of structural components and applications utilizing reinforced concrete.

Cross Listed ARE 4260.

Prerequisite: ARE 3200/CE 3200.

CE4265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in RE/CE 4260.

Cross Listed ARE 4265.

Dual Listed CE 5265.

Prerequisite: ARE 4260/CE 4260.

CE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed ARE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

CE4295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed ARE 4295.

Dual Listed CE 5295.

Former Course Number [4290]

Prerequisite: CE 3200 or equivalent.

CE4400 - Design of Water Treatment Facilities

0841

Credits: 3

A theoretical and practical design course for municipal potable water treatment systems. Major emphasis includes health criteria, operational control procedures, primary and secondary drinking water regulations, as well as the latest treatment design standards for production of drinking water.

Prerequisite: CE 3400.

CE4410 - Design of Wastewater Treatment Facilities

Credits: 3

A theoretical and practical design course for treatment of municipal wastewaters. Major areas of emphasis include waste characterization and physical, chemical and biological unit processes.

Prerequisite: CE 3400.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

CE4441 - Solid Waste Engineering

Credits: 3

Municipal solid waste characteristics and quantities, collection, landfills, processing of municipal solid waste, materials separation, combustion and energy recovery, and biochemical processes with an emphasis on materials flow. Integrated solid waste management principles are also discussed.

Former Course Number [4440]

Prerequisite: CE 3400.

CE4510 - Pavement Design for Airports and Highways

Credits: 3

Designing flexible and rigid pavements for highways and airports. Topics include pavement materials and common uses, soil stabilization, quality control of materials, pavement design procedures.

Dual Listed CE 5510.

Former Course Number [5510]

Prerequisite: CE 3500 or CE 3600.

CE4530 - Traffic Engineering: Operations

0842

Credits: 3

Basic characteristics of traffic, such as drivers, vehicles, volumes, speeds, delay, origins and destinations, intersection performance, capacity, termination and accidents; techniques for making traffic engineering investigations; traffic laws and ordinances, regulations, design and application of signal systems; curb parking control; enforcement and traffic administration; and public relations.

Dual Listed CE 5530.

Prerequisite: CE 3500.

CE4555 - Geometric Design of Highways

Credits: 3

Criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity design standards for different highway types; design of sight distance, alignment, grade; cross-section design; access control, frontage roads; intersection design elements, and design of intersections and interchanges.

Dual Listed CE 5555.

Former Course Number [4520]

Note: Students may not receive credit for both CE 4555 and CE 5555.

Prerequisite: CE 3500.

CE4565 - Traffic Simulation

Credits: 3

Traffic modeling and simulation study development; definition, construction, calibration, validation of traffic simulation models; traffic flow dynamics in transportation networks; mathematical optimization of transportation networks; traffic simulation software.

Dual Listed CE 5565.

Prerequisite: CE 3500.

CE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

CE4610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 5610.

Prerequisite: CE 3600.

CE4620 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 5660.

Prerequisite: CE 3600.

CE4630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

Dual Listed CE 5630.

Prerequisite: CE 3600.

CE4650 - Instrumentation in Civil Engineering

Credits: 3

This lab based course will provide hands on learning to students to install instruments, collect data, analyze results, and use civil engineering judgment to make decisions.

Dual Listed CE 5650.

Prerequisite: ES 2410.

CE4695 - Undergraduate Research

Credits: 1-3

Max Credit (Max. 3)

Research activities on a relevant project of limited scope or as part of a laboratory project of greater scope under the advisement of a faculty member or mentor. The normal workload for 3 credits is considered to be 9 hours per week. Students will present at Undergraduate Research Day.

Prerequisite: CE 1000/ARE 1000.

CE4800 - Hydrology

0844

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

CE4810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 5810.

Prerequisite: ES 2330.

CE4840 - Groundwater Contamination

Credits: 3

Develop principles and fundamental parameters that control groundwater flow and solute transport in groundwater systems. Introduce basic geochemical processes and contaminant chemistry and site monitoring techniques relevant to groundwater problems.

Dual Listed CE 5840.

Prerequisite: CE 4810 or equivalent.

CE4870 - Water Resource Engineering

Credits: 3

Study in water resource planning and design and problem solving applying engineering principles and procedures. Western United States water problems are emphasized, including user completion, reallocation, consumptive use, water development, conservation, conveyance losses, and return flows.

Dual Listed CE 5870.

Prerequisite: CE 3300.

CE4900 - Comprehensive Design Experience

Credits: 3

Team comprehensive project design experience considering the sub-disciplines of civil engineering.

Prerequisite: 3 of CE 3200, CE 3300, CE 3400, CE 3500, CE 3600, and two of CE 4250, CE 4260, CE 4610, CE 4555, CE 4510, CE 4400, CE 4410, or CE 4800, or instructor consent.

CE4920 - Senior Civil Engineering Problems

0845

Credits: 1-3

Max Credit (Max. 6)

A study of current engineering problems that are applicable to civil engineering either on an individual basis or for small seminar type groups.

Prerequisite: senior standing or approval of department head.

CE4959 - Enrichment Studies

Credits: 1-4

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may NOT be included in an undergraduate or graduate program of study for a degree or for credit towards a certificate program.

Prerequisite: consent of instructor.

CE4965 - Undergraduate Research

Credits: 1-3

Max Credit 3

Research activities on a relevant project of limited scope or as part of a laboratory project of greater scope under the advisement of a faculty member or mentor. The normal workload for 3 credits is considered to be 9 hours per week. Students will present at Undergraduate Research Day.

Prerequisite: CE 1000 or ARE 1000, consent of the department head.

CE4970 - Wyoming DOT Design Squad Cooperative Experience

Credits: 3

Experience with Wyoming Department of Transportation design procedures and fundamentals. Participation in development of design documents used to construct actual projects.

Prerequisite: selection for Laramie Design Squad employment and consent of department head.

CE4975 - Civil and Architectural Engineering Internship

Credits: 1-3

Max Credit (Max. 3)

Students may apply for credit for extended work experience (>10 weeks; full-time) at a professional engineering or architectural firm, supervised by a licensed professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

Cross Listed ARE 4975.

When Offered Offered summer only.

Prerequisite: consent of department head.

CE5010 - Advanced Mechanics of Materials

Credits: 3

Elements of elasticity, unified approach to strength of structural members design and failure criteria; basic concepts of fracture mechanics; stress concentration factors; treatment of torsion, bending, axial and shear in structural members including plastic effects; bending of flat plates.

Prerequisite: ME 3010 or CE 3200, MATH 2310.

CE5040 - Introduction to Finite Element Analysis

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. Includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Cross Listed ME 5040.

Former Course Number [5020]

Prerequisite: MATH 2310 and (CE 4200 or ARE 4200 or ME 3010).

CE5045 - Advanced Finite Element Analysis

Credits: 3

Advanced topics in finite element analysis with emphasis on mathematical foundations of the method, numerical algorithms for software implementation, and analysis of problems with material and geometric nonlinear behavior.

Cross Listed ME 5045.

Prerequisite: ME 4040 or ME 5040 or CE 5040.

CE5200 - Advanced Structural Analysis

Credits: 3

Analysis of framed structures with stiffness-based matrix methods including plane trusses, frames, and grid systems and space trusses and frames. Column, beam, beam-column and frame stability. Geometric and material nonlinearities of framed structures. Plastic analysis and moment-curvature relationships. Computer applications are emphasized.

Prerequisite: CE 4200 or equivalent.

CE5220 - Structural Dynamics

Credits: 3

Introduction to general structural dynamics, general dynamic loading, generalized coordinated and nonlinear structural response,

0847

linear and nonlinear response spectra, multiple degree of freedom systems, continuous systems, and discretization of continuous systems. Introduction to seismic load specifications.

Prerequisite: CE 4200 or equivalent and MATH 2310.

CE5230 - Advanced Materials

Credits: 3

The objective of this course is to introduce the graduate student to the behavior of various materials found in typical structural engineering applications and to the mechanics of obtaining materials properties and structural response.

Prerequisite: CE 4260.

CE5240 - Structural Systems Design

Credits: 1-5

Max Credit (Max. 6)

A comprehensive design course for steel and reinforced concrete building structures. Topics include preliminary design, selection of framing systems, braced and unbraced frames, stability effects and nonlinear behavior. Students use case studies to develop design alternatives.

Prerequisite: CE 4200, CE 4250, CE 4260.

CE5255 - Advanced Steel Design

Credits: 3

A comprehensive design course for steel building structures. Topics include preliminary design, selection of framing systems, braced and unbraced frames, stability effects and nonlinear behavior. Includes building design project for seismic regions.

Prerequisite: grade of C or better in CE 4250 or ARE 4250.

CE5265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed ARE 5265.

Dual Listed CE 4265.

Prerequisite: ARE/CE 4260.

CE5270 - Highway Bridge Engineering

0848

Credits: 3

A study of the analysis, design and rating of highway bridges, including consideration of dead and vehicular loads, analysis of typical systems, service, fatigue and ultimate strength behavior, rating of existing bridge design, and bridge operations. Composite and non-composite steel and concrete bridges are considered. Includes investigations that require field trips outside the scheduled class times. Contemporary issues are routinely discussed.

Prerequisite: CE 4250 and CE 4260.

CE5280 - Behavior of Reinforced Concrete

Credits: 3

Broad-based coverage of the behavior of concrete, both at the member and structure level. The course will have no assigned text, although students will be expected to have an undergraduate concrete design textbook and a current ACI Code. Readings will include a number of technical papers in each area covered. Emphasis will be on the background of the code, code development, and investigative techniques.

Prerequisite: CE 4200 and CE 4260.

CE5285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed ARE 5285.

Dual Listed ARE 4285 and CE 4285.

When Offered Offered on a three semester rotation.

CE5290 - Earthquake Engineering

Credits: 3

Second course in a series to design earthquake resistant structures. Topics include interpreting code requirements, calculating design forces on structures, evaluating inelastic behavior of structures, understanding how materials behave and advances in earthquake engineering.

Prerequisite: CE 5220.

CE5295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed ARE 5295.

Dual Listed CE 4295.

Prerequisite: CE 3200 or equivalent.

CE5300 - Open-Channel Hydraulics

Credits: 3

Analysis and design of steady, uniform, gradually varied and spatially varied flow in open channels. Emphasis on basic fluid flow equations associated with natural and man-made open channels.

Prerequisite: CE 3300.

CE5321 - Engineering and Environment Geophysics

Credits: 3

Theoretical background for electrical, electromagnetic, georadar, and other near-surface geophysical measurements. Practical exercises focused on modeling, inversion, data analysis and experimental design. Discussion of applications to engineering and environmental problems. Basic knowledge of MATLAB programming language is helpful, but not required.

Cross Listed GEOL 5321.

Prerequisite: MATH 2250 or MATH 2200.

CE5400 - Water Treatment

Credits: 3

Advanced theory and practice of collection, purification, and distribution of potable water; special emphasis on purification techniques, and plant requirements and design.

Prerequisite: CE 4400.

CE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems.

Cross Listed CHE/ENVE 5410.

Prerequisite: consent of instructor.

CE5435 - Environmental Transport Processes

Credits: 3

Designed for graduate students and engineering seniors interested in the principles of mass transport and their application to environmental systems. Deals with the hydrodynamics of mixing and transport, as well as the interaction of mixing and various reaction rate processes. Applications include water and wastewater treatment, groundwater pollution, and transport and mixing in rivers, lakes and reservoirs.

Cross Listed ENVE 5435 and CHE 5435.

Prerequisite: MATH 2310 and ES 2330.

0850

CE5445 - Hazardous Waste Site Remediation

Credits: 3

The contamination of soil, air, and groundwater by improper disposal of hazardous wastes is covered. Control and cleanup of contaminated groundwater plumes, treatment of polluted soils and soil gases is emphasized. Case studies are extensively used.

Cross Listed ENVE 5445 and CHE 5445.

Prerequisite: CE 3400.

CE5450 - Advanced Physical-Chemical Treatment

Credits: 3

A study of physical and chemical processes for treatment of water and waste water.

Cross Listed ENVE 5450.

Prerequisite: CE 4400.

CE5510 - Pavement Design for Airports and Highways

Credits: 3

Designing flexible and rigid pavements for highways and airports. Topics include pavement materials and common uses, soil stabilization, quality control of materials and pavement design procedures.

Dual Listed CE 4510.

Prerequisite: CE 3500 or CE 3600.

CE5530 - Traffic Engineering: Operations

Credits: 3

Basic characteristics of traffic, such as drivers, vehicles, volumes, speeds, delay, origins and destinations, intersection performance, capacity, termination and accidents; techniques for making traffic engineering investigations; traffic laws and ordinances, regulations, design and application of signal systems; curb parking control; enforcement and traffic administration; and public relations.

Dual Listed CE 4530.

Former Course Number [5520]

Prerequisite: CE 3500.

CE5540 - Traffic Control

Credits: 3

Planning, designing, and operating transportation facilities to optimum efficiency using traffic control devices. Topics included are traffic flow theory; pavement markings, signing, and signal design; computer design of signal systems using linear and network models; traffic control in construction areas.

Prerequisite: CE 3500 and ES 2110.

CE5545 - Transport Network Analysis

Credits: 3

Traffic assignment and network modeling techniques; deterministic and stochastic user equilibrium assignment; mathematical programming formulations and solution algorithms; extensions to basic models; and applications to roadway pricing and other planning scenarios.

Prerequisite: graduate standing in civil engineering.

CE5555 - Geometric Design of Highways

Credits: 3

Criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity design standards for different highway types; design of sight distance, alignment, grade; cross-section design; access control, frontage roads; intersection design elements; and design of intersections and interchanges. CE 5555 students are required to do an additional integrated design term project using design software.

Dual Listed CE 4555.

Note: Students may not receive credit for both CE 4555 and CE 5555.

Prerequisite: CE 3500.

CE5560 - Traffic Safety

Credits: 3

Safety design and operational practices for streets and highways including safety improvement programs, design of barrier systems, bicycle and pedestrian consideration; access control; safety evaluation; and measures of effectiveness.

Prerequisite: CE 3500 and STAT 4220.

CE5565 - Traffic Simulation

Credits: 3

Traffic modeling and simulation study development; definition, construction, calibration, validation of traffic simulation models; traffic flow dynamics in transportation networks; mathematical optimization of transportation networks; traffic simulation software.

Dual Listed CE 4565.

Prerequisite: graduate standing.

CE5570 - Transportation Planning

Credits: 3

Short and long-range transportation planning; land-use planning, travel behavior and transportation studies including demand forecasting; parking and transit studies; highway and street planning; and freight transportation and multi-model planning.

Prerequisite: CE 3500.

CE5575 - Intelligent Transportation Systems

Credits: 3

The use of Intelligent Transportation Systems (ITS) to improve the safety, efficiency, reliability, and/or security of transportation systems. Covers ITS applications, technologies, deployment issues, and system performance in both urban and rural environments.

Prerequisite: CE 3500.

CE5585 - Pavement Management Systems

Credits: 3

A study of the systems that a transportation agency may utilize to manage the pavement in their road network. History and purpose of pavement management are studied as well as how to make objective pavement management decisions. The distinction between project-level and network-level management concerns is explored and the implementation of a pavement management system is studied. Finally, methods for utilizing the information from the management system is studied.

Prerequisite: CE 3500.

CE5590 - Pavement Materials

Credits: 3

Selecting materials for highway construction, testing aggregates and bituminous materials, designing and testing asphalt mixtures; and recommending maintenance and rehabilitation strategies for deteriorated pavements.

Prerequisite: CE 3500.

CE5610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 4610.

Prerequisite: CE 3600.

CE5630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

0853

Dual Listed CE 4630.

Prerequisite: CE 3600.

CE5640 - Geotechnical Earthquake Engineering

Credits: 3

The purpose of this course is to familiarize students with the field of geotechnical earthquake engineering and soil dynamics. Lectures will focus on stress wave propagation in soil and rock; characterization of earthquakes and ground motions; influence of soil conditions on seismic ground motion characteristics; and liquefaction of soils.

Prerequisite: CE 3600 or graduate standing.

CE5650 - Instrumentation in Civil Engineering

Credits: 3

This lab based course will provide hands on learning to students to install instruments, collect data, analyze results, and use civil engineering judgment to make decisions.

Dual Listed CE 4650.

Prerequisite: ES 2410.

CE5660 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 4620.

Prerequisite: graduate standing.

CE5700 - Civil Engineering Problems I

Credits: 1-3

Max Credit (Max. 6)

A special course, designed to make possible the study and investigation of problems or phases of civil engineering selected to fit the needs of the students.

Prerequisite: consent of instructor.

CE5710 - Civil Engineering Seminar I

Credits: 1-3

Max Credit (Max. 6)

A seminar type class furnishing motivation for advanced study of current problems in broad field of civil engineering by means

0854

of library research, study of current literature, and carefully guided class discussion.

Prerequisite: consent of instructor.

CE5720 - Civil Engineering Problems II

Credits: 1-3

Max Credit (Max. 6)

A special course designed to make possible the study and investigation of problems or phases of civil engineering selected to fit the needs of the student.

Prerequisite: consent of instructor.

CE5730 - Civil Engineering Seminar II

Credits: 1-3

Max Credit (Max. 6)

A seminar-type class furnishing motivation for advanced study of current problems in the broad field of engineering by means of library research, study of current literature, and carefully guided class discussions.

Prerequisite: consent of instructor.

CE5785 - HT Person Seminar

Credits: 3

Special topics in engineering as presented by the H.T. Person distinguished professor.

Prerequisite: graduate standing.

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

CE5820 - Design of Small Earth Dams

Credits: 3

Develop understanding, analysis, design and construction techniques for all components considered in small earth dam design. Integration of hydrology, hydraulics and soil mechanics into a sound dam design. Dam design will be emphasized from

0855

foundation through embankment.

Prerequisite: CE 3300, CE 3600 and CE 4800 or concurrent enrollment.

CE5830 - Flow in Porous Media

Credits: 3

Examines fluid (liquid, gas, vapor) and heat flow in porous media and its effects specifically in soil. Near surface effects (impibation, infiltration and evaporation) is emphasized. Analytic and numerical solution techniques will be developed.

Prerequisite: CE 5810 or consent of instructor.

CE5840 - Groundwater Contamination

Credits: 3

Develop principles and fundamental parameters that control groundwater flow and solute transport in groundwater systems. Introduce basic geochemical processes and contaminant chemistry and site monitoring techniques relevant to groundwater problems.

Dual Listed CE 4840.

Prerequisite: CE 5810 or equivalent.

CE5850 - Advanced Subsurface Hydrology

Credits: 3

This course introduces recent advances in dealing with uncertainty issues in subsurface hydrology. Covered topics include reviewing basic statistics required for the course and subsurface flow and transport, uncertainty analysis using Monte Carlo simulations, sensitivity analysis in flow and contaminant transport, heterogeneity of hydrological processes in subsurface, and Bayesian updating.

Prerequisite: CE 5810 or CE 4800.

CE5865 - Deterministic Hydrology

Credits: 3

Philosophy of modeling, hydrologic model formulation and design; lumped, semi-distributed, and physics-based hydrologic models for watershed- and landscape-scale predictions; process-level mathematical and numerical descriptions and coupling; model calibration, testing, and validation; parameterization, numerical approximations of flow equations; scale effects, modeling ethics.

Prerequisite: CE 4800.

CE5870 - Water Resource Engineering

Credits: 3

Study in water resource planning and design and problem solving applying engineering principles and procedures. Western

0856

United States water problems are emphasized, including user completion, reallocation, consumptive use, water development, conservation, conveyance losses, and return flows.

Dual Listed CE 4870.

CE5875 - Probabilistic Hydrology

Credits: 3

Introduction to the language, methods and tools in systems analysis in stochastic hydrologic modeling; parameter estimation; sensitivity analysis; optimization schemes; uncertainty analysis; probabilistic forecasting; state-space modeling with Kalman filtering, and data assimilation.

Prerequisite: CE 4800.

CE5880 - Advanced Hydrology

Credits: 3

Advanced hydrologic analysis for the Mountain States, principles of hydrological system, and numerical models.

Prerequisite: MATH 2310.

CE5885 - Hydrometeorology

Credits: 3

Global radiation budget, global hydrologic cycle, precipitation formation, occurrence and remote sensing, snow melt, evapotranspiration, interception, infiltration and runoff generation mechanisms, overland flow, land surface modeling, stream routing.

Prerequisite: CE 3300.

CE5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CE5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CE5959 - Enrichment Studies

0857

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

CE5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrolled in a graduate degree program.

CE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Classics

CLAS2020 - Classical Greek Civilization

Credits: 3
Examines some of the most important developments of ancient Greek culture. Includes development of government in the city-states, with particular attention to Athenian democracy; tragedies of Aeschylus, Sophocles and Euripides; comedies of Aristophanes; crisis of values of the Peloponnesian War; and philosophy of Plato.

USP Code [WB,C<>H]
Prerequisite: WA or COM1.

CLAS2040 - Classical Roman Civilization

Credits: 3
Examines some of the most interesting political, legal, artistic, literary, and engineering developments of the Republic and Principate (510 BC-AD 212) These include representational government, citizens' rights, sanctioned violence, Rome's infrastructure, and major literary works of oratory, comedy, history, epic, and philosophy.

USP Code [WB,CH<>(none)]

Prerequisite: WA or COM1.

CLAS3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed HIST 3050/POLS 3050.

Prerequisite: WB or COM2.

CLAS3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed HIST 3160/PHIL 3160.

Prerequisite: WB or COM2.

CLAS4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed ENGL 4230/THEA 4230.

Prerequisite: WB or COM2.

CLAS4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed ENGL 4270.

Prerequisite: WB or COM2.

CLAS4975 - Independent Study

Credits: 1-4

Max Credit (max. 12)

Specialized study in aspects of Greek or Roman civilization of interest to the student, with topic and plan of work to be worked out by the student and the instructor together.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of instructor.

CLAS4990 - Topics in Classical Civilization

Credits: 1-4

Max Credit (max. 12)

Study in depth of special areas in ancient civilization that are not covered in regularly offered courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of the instructor.

Communication and Journalism

COJO1000 - Introduction to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

COJO1040 - Introduction to Human Communication

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

COJO2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

Corequisite: Prerequisite: Successful completion of a COM1 course.

COJO2095 - Persuasive Argumentation

Credits: 3

Develops student competencies in persuasive argument in its written, oral, and digital dimensions. Students participate in a series

of debate exercises that draw upon digital research, written speech and message composition, and extemporaneous oral speaking. The ethics of persuasion and critical research literacy in a digital environment are also featured

Prerequisite: COM 1

COJO2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

Prerequisite: Prerequisite: WA or COM1

COJO2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

COJO3000 - History of American Journalism

Credits: 3

Presents history and development of American journalism from colonial times to present, emphasizing 20th century.

Prerequisite: COMM 1000.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP Code [(none)<>COM3]

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

COJO3070 - Communication Research

Credits: 3

Focuses on problems in communication and mass communication research. Specifically studies and applies language of science, basic concepts of communication, mass communication research, types and limitations of empirical research, as well as measurement procedures and analysis.

Prerequisite: COMM 1000 or COMM 1040 and STAT 2050 or STAT 2070.

COJO3100 - Public Affairs Reporting

Credits: 3

Practices in public affairs reporting, emphasizing local and state political organization as foundation for such reporting. Specialized reporting fields. News analysis.

Prerequisite: COMM 2100.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP Code [WC<>(none)]

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP Code [D<>COM3]

Prerequisite: COMM 1040 and junior standing.

COJO3195 - Cultural Encounters in China

Credits: 3

This course is designed to study the relationship between cultures and communication through a 3-week stay in China. We will explore how cultures and communication interact, interrelate, and influence each other as well as investigating how and why cross-cultural communication is filled with both challenges and opportunities through our daily interactions with Chinese people.

USP Code [(none)<>H]

Prerequisite: COMM 1040.

COJO3200 - Graphics of Communication

0862

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP Code [CA<>(none)]

Prerequisite: COMM 1000.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3520 - Communication Technology and Society

Credits: 3

Studies role of communication technology in functioning of society. Examines history of effects on personal growth, self-concept, world view, creative thinking, personal relationships and social processes.

Prerequisite: COMM 1000 or COMM 1040.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations,

marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO3900 - Family Communication

Credits: 3

This course will assist students in a study of the concept of family from a communication perspective. The goals of the course include:

Prerequisite: COMM 1040.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4030 - Advanced Interpersonal Communication

Credits: 3

Studies research and theory in interpersonal relationships; formation and maintenance of friendships; marriages; and group relationships.

Prerequisite: COMM 1040 and 6 hours in the department.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4050 - Communication and Conflict

Credits: 3

Studies research and theory concerning communication in conflict development and management. Examines forms of conflict, including occurrences in interpersonal, group, organizational and cultural contexts.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

Prerequisite: COMM 1040 and junior standing.

COJO4100 - Investigative Reporting

Credits: 3

Practices developing and writing articles of depth and substance in areas of public concern. Emphasizes careful research, weighing conflicting viewpoints, interpreting complex issues and critical evaluation.

USP Code [WC<>(none)]

Prerequisite: COMM 2100.

COJO4110 - Feature Writing Seminar

Credits: 3

This course critically examines how to produce content for a magazine and how to write feature stories. Among the topics covered are how to develop a good idea, analyze a target audience, gather information using interviews and research, write a feature article, edit your writing, and market a feature story.

USP Code [WC<>COM3]

Prerequisite: COMM 2100.

COJO4120 - News Editing

Credits: 3

Students develop skills in editing copy for newspapers and magazines. Focus is on copy editing for grammar, syntax, style, clarity, spelling, word usage, fairness and balance, conciseness, and accuracy. Students also learn to write effective headlines and cutlines, do effective design and layout of tabloid and broadcast pages, and create effective information graphics and photo

0865

features.

Prerequisite: COMM 2100.

COJO4140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the area of nonverbal communication. Students are required to complete an independent study of some aspect of nonverbal communication relevant to interests.

Dual Listed COJO 5140.

Prerequisite: junior standing.

COJO4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed AAST 4160.

Dual Listed COJO 5160.

USP Code [CH,D<>COM3]

Prerequisite: 9 credit hours in AAST or COJO.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4210 - Special Topics in Communication

Credits: 1-3

Intensive study of such special problems and topics in human communication processes as gender relations, power dynamics, family and political communication. Content varies.

Dual Listed COJO 5210.

Prerequisite: COMM 1040 and 9 hours in the department.

COJO4230 - Special Topics in Mass Media

0866

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed AAST 4233 and GWST 4233.

Dual Listed COJO 5233.

USP Code [WC,D<>COM3]

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP Code [D<>COM3]

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

0867

Prerequisite: COJO 3310.

COJO4400 - Photojournalism

Credits: 3

Studies and intensively practices reporting news and features photographically, plus essentials of advertising photography. Includes advanced camera and darkroom techniques and photo editing. Two one-hour lectures and one two-hour laboratory weekly.

Prerequisite: COMM 2400.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4600 - Mass Media Ethics

Credits: 3

Studies ethical theory, emphasizing how it can be applied to problem solving in the media. Examines major ethical perspectives and requires application to actual case studies.

Dual Listed COJO 5600.

Prerequisite: 6 hours at 3000-level in the department.

COJO4620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 5620.

Prerequisite: COMM 1000 or COJO 1400.

COJO4640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 5640.

Prerequisite: COMM 1000 or COMM 1040.

COJO4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed ENR 4700.

Dual Listed COJO 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

COJO4990 - Independent Study in Communication

Credits: 1-3

Prerequisite: 15 hours in the department and consent of department chair.

COJO5010 - Texts of Mass Media

Credits: 3

Intensive critical examination of the history, theory, social responsibility and empirical research in the production and consumption of mediated messages.

Prerequisite: graduate standing.

COJO5030 - Seminar in Interpersonal Communication

Credits: 3

Intensive examination of contemporary theoretical perspectives and empirical research on interpersonal communication, including the role of communication in self-concept formation, social relationship development, and the structure and function of ordinary discourse in human interaction.

Dual Listed COJO 4030.

Prerequisite: graduate standing.

COJO5040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 4040.

Prerequisite: graduate standing.

COJO5061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 5061.

Dual Listed COJO 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

COJO5080 - Qualitative Research Methods

Credits: 3

Students study principles and issues associated with qualitative methods used in communication and media research. The class explores methods that use interpersonal communication and observation as tools for data collection and explores methods that analyze media content from a critical and qualitative perspective.

Prerequisite: graduate standing.

COJO5140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the areas of nonverbal communication. Students are required to complete an independent study of some aspects of nonverbal communication relevant to interests.

0870

Dual Listed COJO 4140.

Prerequisite: COMM 1040 or COMM 1000.

COJO5160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed AAST 5160.

Dual Listed COJO 4160.

Prerequisite: 9 credit hours in AAST or COJO.

COJO5200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 4200.

Prerequisite: graduate standing.

COJO5210 - Special Topics in Communication

Credits: 1-3

Max Credit (Max. 6)

Intensive examination of current theoretical issues in communication. Course content varies. Graduate students are expected to follow a rigorous reading schedule and submit a major paper or research project.

Dual Listed COJO 4210.

Prerequisite: graduate standing.

COJO5230 - Special Topics in Mass Media

Credits: 1-3

Max Credit (Max. 6)

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations and the internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic and theoretical perspectives. Graduate students are expected to follow a rigorous reading schedule and submit a major paper or research project.

Dual Listed May dual list with COJO 4230.

Prerequisite: graduate standing.

COJO5233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in in contemporary United States society. Cross-listed with AAST 5233 and GWST 5233; dual-listed with COJO 4233.

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO5250 - Seminar in Organizational Communication

Credits: 3

Intensive examination of the historical and contemporary theoretical approaches and empirical research in organizational dynamics. Attention primarily focuses on how the institutionalized collective affects and is affected by other social systems.

Dual Listed COJO 4250.

Prerequisite: graduate standing.

COJO5260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. Attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 5260.

Dual Listed COJO 4260.

Former Course Number [5985]

Prerequisite: graduate standing.

COJO5310 - Seminar in Mass Communications

Credits: 3

The study of contemporary, historical, critical and behavioral theories of mass communication processes. Attention primarily on the social functions performed by mediated messages.

Prerequisite: graduate standing.

COJO5530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

0872

Dual Listed COJO 4530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO5540 - Seminar in Communication Theory

Credits: 3

An intensive examination of various metatheoretical assumptions and theoretical models used in the study of communicative dynamics.

Prerequisite: graduate standing.

COJO5600 - Mass Media Ethics

Credits: 3

The study of ethical theory with special emphasis on how that theory can be applied to problem solving in the media. Examines major ethical perspectives and requires the application of those perspectives to actual case studies. Graduate students are expected to follow a rigorous project.

Dual Listed COJO 4600.

Prerequisite: graduate standing.

COJO5620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 4620.

Prerequisite: graduate standing.

COJO5640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 4640.

Prerequisite: graduate standing.

COJO5700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

0873

Cross Listed ENR 5700.

Dual Listed COJO 4700.

Prerequisite: graduate standing.

COJO5800 - Foundations of Communication and Journalism

Credits: 3

Examines current issues and trends in the various areas of communication and journalism that are represented within the department. Students analyze the historical roots of these issues and trends as a way of understanding the present context and future evolution of communication and journalism scholarship.

Prerequisite: first year of graduate study and acceptance into the COJO graduate program.

COJO5890 - Problems: Communication

Credits: 1-4

Max Credit (Max. 6)

Prerequisite: 18 hours at the 5000 level in the department.

COJO5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

COJO5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COJO5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COJO5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

0874

Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: Designed to provide an enrichment experience in a variety of topics.

COJO5960 - Thesis Research

Credits: 1-12
Max Credit (Max 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

COJO5961 - Graduate Projects

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: enrollment in Plan B program and departmental approval.

COJO5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Introduction to the practice and principles of construction management as it relates to both vertical and horizontal construction projects. . Construction Materials and Methods.

COMM1000 - Intro to Mass Media

Credits: 3
An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP Code [CS<>H]

COMM1030 - Interpersonal Communication

Credits: 3
Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

0875

USP Code [(none)<>H]

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP Code [CS<>H]

COMM1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and writing communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/ nonverbal behavior and various speaking formats.

USP Code [O<>COM2]

Former Course Number [1010]

Prerequisite: Successful completion of a COM1 course.

COMM2095 - Persuasive Argumentation

Credits: 3

Develops student competencies in persuasive argument in its written, oral, and digital dimensions. Students participate in a series of debate exercises that draw upon digital research, written speech and message composition, and extemporaneous oral speaking. The ethics of persuasion and critical research literacy in a digital environment are also featured.

USP Code [(none)<> COM2]

Former Course Number [2090]

Prerequisite: Successful completion of a COM1 course.

COMM2099 - Special Topics in Debate

Credits: 1-3

Max Credit (Max. 12)

Explores the argumentative and rhetorical facets of the annual intercollegiate policy debate topic. Participation on the University's debate team is required for enrollment.

Former Course Number [2060]

Prerequisite: Instructor permission required.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP Code [WB<>(none)]

Prerequisite: WA or COM1 writing course.

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP Code [CA<>(none)]

Computer Science

COSC1010 - Introduction to Computer Science I

Credits: 4

Introduces the fundamental concepts of programming from an object-oriented perspective. Topics include simple data types, control structures, array and string data structures, algorithm development, and debugging techniques. Emphasizes good software engineering principles and developing fundamental programming skills in the context of a language that supports the object-oriented paradigm.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP Code [(none)<>Q]

Note: Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1030 - Computer Science I

0877

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

COSC1101 - First-Year Seminar

Credits: 3

USP Code [(none) < >FYS]

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

COSC2000 - Undergraduate Topics: Computer Science

Credits: 1-3

Elementary topics current in computer science.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Prerequisite: COSC 1030.

COSC2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed MATH 2300.

Prerequisite: COSC 1030, MATH 2200 or MATH 2350.

COSC3011 - Introduction to Software Design

Credits: 3

Introduces the principles and practice of software design, including UML and design patterns. Uses case studies to illustrate design in action.

Prerequisite: COSC 2030.

COSC3015 - Functional Programming

Credits: 3

Studies programming in the context of a functional language that emphasizes algorithmic strategies over syntactic detail.

Prerequisite: COSC 2030 and COSC 2300.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to automata theory and its application to language translation.

Prerequisite: COSC 2030 and COSC 2300.

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC3100 - Computer Science Education Seminar

Credits: 2

Provides an overview of the current social and research issues, technical trends and challenges facing computer science educators.

Prerequisite: COSC 1030 and Education major only.

COSC3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed MATH 3340.

Prerequisite: grade of C or better in MATH 2210.

COSC3750 - Linux Programming for System Applications

Credits: 3

Provide the necessary tools and skills to begin programming effectively on UNIX and Linux operating systems. Topics will include, shells and basic shell scripting, Linux utilities, editors, compilation, I/O and the file system, sockets and interprocess communication, and time permitting, threads.

Prerequisite: COSC 2150 and COSC 2030.

COSC3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

COSC3900 - Upper Division Topics in Computer Science

0880

Credits: 1-3

Max Credit (Max. 9)

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of topics of interest within industry.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

COSC3970 - Internship in Computing

Credits: 1-3

Max Credit (Max. 3)

Allows students to gain practical experience in computing. A signed contract with a supervisor and departmental adviser must be completed before enrolling for the internship.

Prerequisite: COSC 3020.

COSC4000 - Topics in Computer Science for Educators

Credits: 1-6

Current computer science topics appropriate for K-12 teachers.

When Offered (Offered based on sufficient demand and resources)

Note: Credit may not be applied to major requirements in computer science or management information systems.

Prerequisite: graduate standing.

COSC4010 - Special Topics in Computer Science

Credits: 1-3

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of advanced topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: COSC 3020 concurrently and consent of instructor.

COSC4100 - Foundations of Computing

Credits: 3

Introduces several theoretical areas which are the basis of computer science. Languages and automata, computability, complexity, analysis of algorithms, logic, and the specification and correctness of programs.

Prerequisite: COSC 3020.

COSC4200 - Computability and Complexity

0881

Credits: 3

Introduction to theoretical study of computability and efficient computation. Finite-state and pushdown automata; turing machines and the Church-Turing thesis; undecidability, computational complexity; NP-completeness.

Prerequisite: COSC 3020.

COSC4210 - Web Application Development

Credits: 3

The course covers the basics of developing data driven web applications. Topics include using responsive design for user interfaces, architectural patterns and frameworks, object-relational mapping, language-integrated queries, authentication, authorization, unit testing, using source control for code management, publishing web applications and cloud computing.

Prerequisite: COSC 3011.

COSC4220 - Design and Implementation in Emerging Environments

Credits: 3

Students who have completed the analysis and design course extend their knowledge by implementing an information system in an emerging systems environment. Teams use project management principles to implement the system.

Prerequisite: COSC 4210.

COSC4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed MATH 4340.

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

COSC4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed MATH 4420/PHIL 4420.

Dual Listed COSC 5420.

Prerequisite: PHIL 3420 or equivalent.

COSC4450 - Computer Graphics

0882

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the World Wide Web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 5450.

Prerequisite: COSC 3020 and MATH 2250.

COSC4550 - Introduction to Artificial Intelligence

Credits: 3

A computational study of intelligent behavior. Focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 5550.

Prerequisite: COSC 3020.

COSC4555 - Machine Learning

Credits: 3

Goal is to program machines to learn and improve their performance on their own, based on experience and/or data. First half covers machine learning techniques; second half covers applications.

Dual Listed COSC 5555.

Prerequisite: COSC 3020.

COSC4560 - Modern Robots and Softbots

Credits: 3

Popular agent designs: logic-based, biomimetic, and physicomimetic. Foundational issues on internal robot and softbot knowledge representations. Planning and control, followed by issues of how agents can reason and plan under real-world conditions of environmental uncertainty. Concludes with discussions about papers on modern robot and softbot applications, as well as invited lectures by graduate students and faculty.

Dual Listed COSC 5560.

COSC4570 - Data Mining

Credits: 3

Examine methods that have emerged from artificial intelligence and statistics and proven to be of value in recognizing patterns and making predictions with large data sets. Will include both theory and practice while developing several projects.

Prerequisite: COSC 4550.

COSC4580 - Honors Undergraduate Research

0883

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CE 4580/CHE 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

COSC4730 - Mobile Application Programming

Credits: 3

Introduces development of applications on mobile devices. Presents the principles, techniques, and tools for developing mobile applications. Differences between desktop applications and mobile applications are discussed.

Dual Listed COSC 5730.

Prerequisite: six hours of upper division COSC coursework.

COSC4735 - Advanced Mobile Programming

Credits: 3

Continues the development of applications on mobile devices. The focus is device sensors, such as camera, AR, VR, Bluetooth, embedded and connected devices.

Dual Listed COSC 5735.

Prerequisite: COSC 4730.

COSC4740 - Operating Systems Design

Credits: 4

Studies systems programming languages and computer systems design. Includes interacting processes, main storage management, procedure and data sharing, scheduling, deadlock problems and file management in batch processing and multi-programming systems. Operating system implementation.

Prerequisite: COSC 2150 and COSC 3020.

COSC4750 - Systems Programming and Management

Credits: 3

Comparatively studies features found in commercial and experimental operating systems. Discusses issues in system-level programming and administration, including shell programming, file management, resource control, configuration and security. Advanced topics include multiprocessor and real-time operating systems.

Prerequisite: COSC 2030.

COSC4760 - Computer Networks

0884

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

COSC4765 - Computer Security

Credits: 3

Introduces the topics of computer and network security and provides a foundation to allow students to identify, analyze, and solve computer security problems.

Prerequisite: COSC 3020.

COSC4780 - Principles of Programming Languages

Credits: 3

Introduces the methods of analysis and design of programming languages. Covers syntax, typing schemes and the semantics (denotational and operational) in the context of functional and imperative programming languages. Students build interpreters to explore the implications of the different constructs on computational behavior.

Prerequisite: COSC 3015.

COSC4785 - Compiler Construction

Credits: 1

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation from a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 5785.

Prerequisite: COSC 2150 and COSC 3020.

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

COSC4840 - Software Engineering

0885

Credits: 3

Extends the ideas of software design and development from the introductory programming sequence to encompass the problems encountered in large-scale programs. Topics include software engineering techniques from the technical and managerial perspectives, with a strong emphasis on software design.

Prerequisite: COSC 3020 and COSC 3011.

COSC4950 - Senior Design I

Credits: 1

Students choose a senior design project, investigate alternate solutions and submit a preliminary project design. Periodic oral and written project progress reports are required.

Prerequisite: COSC 3011 and COSC 3020.

COSC4955 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in COSC 4950. Successful communication of the details of the solution through written documents and oral presentations will be required.

Prerequisite: COSC 4950.

COSC5000 - Seminar in Computer Science

Credits: 1-3

Max Credit (Max. 10)

One or more current research areas in computer science are investigated.

Prerequisite: consent of instructor.

COSC5010 - Graduate Topics in Computer Science

Credits: 1-6

Max Credit (Max. 12)

Individual or small group pursuit of computer science research areas.

Prerequisite: graduate standing and consent of instructor.

COSC5050 - Research Writing in Computer Science

Credits: 3

Instruction in methods for performing and reporting research in the field of computer science. The primary task is preparation of a research paper; to that end, the class covers how to collect and analyze previously published work, generate and develop a

research topic, and present research results in acceptable written form.

Prerequisite: graduate standing, consent of instructor.

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

COSC5120 - Theory Of Computation

Credits: 3

Models of computation, the Church-Turing thesis, computable functions, decidable and enumerable sets, unsolvable problems, correctness of programs, and complexity of computation. The theory of computation provides precise answers to the fundamental questions of computer science: Which problems can be solved by machine computation and which can be solved using a reasonable amount of computer resources.

Prerequisite: COSC 4100.

COSC5200 - Computational Complexity

Credits: 3

Study of efficient computation and computational intracability. Time and space complexity; P, NP, and the polynomial-time hierarchy; reductions and completeness; randomized complexity; non-uniform complexity; approximation algorithms and inapproximability.

Prerequisite: COSC 4100 or COSC 4200.

COSC5220 - Languages and Automata

Credits: 3

The study of regular, context-free, and context-sensitive languages and their relations to finite-state, pushdown and linear-bounded automata. Context-free language recognition. The halting problem and decidability results.

Prerequisite: COSC 4100.

COSC5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and

0887

stability.

Cross Listed MATH 5310.

Prerequisite: MATH 3310, COSC 1010.

COSC5345 - Computational Methods in Applied Sciences III

Credits: 3

Third semester of a three-semester computational methods series with emphasis on numerical solution of problems displaying sharp fronts and interfaces (nonlinear conservation laws, Hamilton-Jacobi equations).

Cross Listed MATH 5345.

Prerequisite: MATH 5340/COSC 5340.

COSC5420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC/MATH 5420.

Dual Listed COSC 4420.

Prerequisite: PHIL 3420 or equivalent; graduate standing.

COSC5450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the world-wide web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 4450.

Prerequisite: COSC 3020, MATH 2250.

COSC5540 - Computer Vision

Credits: 3

Provides students with an understanding of applying computer methodologies to process two-dimensional and three-dimensional images. Primary areas of investigation are image preprocessing, knowledge representation, pattern recognition and motion understanding.

Prerequisite: COSC 3020, MATH 2205, MATH 2250.

COSC5550 - Introduction to Artificial Intelligence

0888

Credits: 3

A computational study of intelligent behavior. The focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 4550.

Prerequisite: COSC 3020.

COSC5555 - Machine Learning

Credits: 3

To program machines to learn and improve their performance on their own, based on experience and/ or data. The first part covers machine learning techniques. The second part covers applications.

Dual Listed COSC 4555.

Prerequisite: COSC 3020.

COSC5560 - Modern Robots and Softbots

Credits: 3

Begins with a presentation of popular agent designs: logic-based, biomimetic, and physicomimetc. Presents foundational issues on internal robot and softbot knowledge representations. Planning and control are then covered, followed by issues of how agents can reason and plan under real-world conditions of environmental uncertainty. Concludes with discussions about papers on modern robot and softbot applications, as well as invited lectures by graduate students and faculty in the UW COSC and ECE departments.

Dual Listed COSC 4560.

COSC5730 - Mobile Application Programming

Credits: 3

Introduces development of applications on mobile devices. Presents the principles, techniques, and tools for developing mobile applications. Differences between desktop applications and mobile applications are discussed.

Dual Listed COSC 4730.

Prerequisite: COSC 3020.

COSC5735 - Advanced Mobile Programming

Credits: 3

Continues the development of applications on mobile devices. The focus is device sensors, such as camera, AR, VR, Bluetooth, embedded and connected devices.

Dual Listed COSC 4735.

Prerequisite: COSC 4730.

COSC5750 - Distributed Computing Systems

Credits: 3

Provides an in-depth study of distributed computing systems, including both architecture and software issues. Topics include concepts of distributed computing, communication primitives, distributed operating systems, distributed file management, and distributed programming languages. Particular attention is paid to modeling and analysis of distributed systems and algorithms. Programming projects and research papers are assigned.

Prerequisite: COSC 5740.

COSC5785 - Compiler Construction I

Credits: 3

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation for a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 4785.

Prerequisite: COSC 2150 and COSC 3020.

COSC5790 - Compiler Construction II

Credits: 3

Advanced topics concerning the front end of a programming language compiler, the description and implementation of features found in the back end of a compiler, and the run time environment. Topics include data type checking, global data flow analysis, flow graph reduction, local and global code optimization, and code generation. Reports on recent research papers.

Prerequisite: COSC 4785 or COSC 5785.

COSC5820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 3020.

COSC5825 - Advance Data Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database system design and an in-depth examination of contemporary structures and techniques used in modern database management systems and database applications.

Prerequisite: COSC 4820.

COSC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

COSC5940 - Continuing Registration: Off Campus

Credits: 1-16
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COSC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 3)

Designed to provide an enrichment experience in a variety of topics.

Note: credit in this course may not be included in a graduate program of study for degree purposes.

COSC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

COSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

COSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Construction Management

CM2000 - Introduction to Construction Management

Credits: 3

Introduction to the practice and principles of construction management as it relates to both vertical and horizontal construction projects.

CM2120 - Construction Materials and Methods

Credits: 3

Introduction to building materials and construction practices used in the construction industry to construct both vertical and horizontal construction projects.

Prerequisite: COM1.

CM2300 - Construction Safety

Credits: 3

Introduce students to the various causes of construction accidents and adopted strategies to prevent worksite injuries and illnesses with an emphasis on OSHA standards.

Prerequisite: CM 2000.

CM2400 - MEP Systems

Credits: 3

Introduction to mechanical, electrical and plumbing systems in site infrastructure and vertical construction projects.

Prerequisite: C in PHYS 1110.

CM2600 - Construction Documents

Credits: 3

Introduction to the creation and interpretation of construction documents used in the construction industry to build today's vertical and horizontal construction projects.

Prerequisite: CM 2000.

CM3100 - Construction Scheduling

Credits: 3

Principles of construction scheduling including analytical and quantitative scheduling and management techniques as they apply to both vertical and horizontal construction projects.

Prerequisite: C in CM 3120.

CM3140 - Built Environment Markets

Credits: 3

This course provides students with a broad exposure to the landscape of real estate markets, from single-family housing to large-scale commercial property markets as viewed from a real estate financial perspective.

Prerequisite: CM 2000 and CM 2120.

CM3160 - Construction Law & Contracts

Credits: 3

The course covers different contract methods, or arrangements, used by the Construction industry to contract and procure construction work. The course also introduces students to construction law in support of planning and the execution of construction work.

Prerequisite: CM 2600.

CM3180 - Evolving Technologies in CM

Credits: 3

The course introduces students to Leadership in Energy and Environmental Design (LEED), Building Information Modeling (BIM) and evolving technologies in construction.

Prerequisite/Corequisite: Grade of C in CM 2000

CM3200 - Structural Systems

Credits: 4

The course introduces students to the basic principles of statics and structural analysis and design. It provides students with a concise presentation of structural technology, from the determination of structural loads, sizing and design as it relates to timber, steel and concrete structures.

Prerequisite: PHYS 1110 and MATH 2200 with grades of C or better.

CM3210 - Construction Estimating

Credits: 3

The course introduces students to concepts in estimating including but not limited to labor and equipment calculations, the use of price databases, direct and indirect cost, bid preparation and computer applications.

Prerequisite: C in CM 2600.

CM3220 - Soils and Concrete

Credits: 3

This course will introduce students with the construction process that includes, site clearing, soil mechanics, testing, concrete foundations, concrete mix design, concrete construction practice, and concrete testing.

Prerequisite: GEOL 1110 with a grade of C or better and concurrent enrollment in CM 3200.

CM3230 - Construction Economics

Credits: 3

This course introduces students to construction economics in residential and commercial planning, developing, constructing, and managing projects.

Prerequisite: CM 2000 and CM 2120.

CM4100 - Project Management

Credits: 3

This course guides students through fundamental Project Management concepts and behavioral skills needed to success-fully launch and lead construction projects in the construction sector.

Prerequisite: CM 3100.

CM4140 - Heavy CM Methods

Credits: 3

The course provides student an overall understanding of construction equipment and selected construction methods used on large scale construction projects. With specific reference to selection, economy, and productivity of common construction equipment and construction procedures for site development and industrial, heavy and civil construction.

Prerequisite: CM 2120 and CM 3200.

CM4600 - Building Info. Modeling

Credits: 3

This course focuses on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a projectbased course where students develop skills on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction operations.

Prerequisite: CM 2600.

CM4900 - Capstone Project

0894

Credits: 3

This course requires students to participate in a "real" construction situation involving all aspects of managing a project; from initial planning to completion, including budgets, estimating, scheduling, financing and creating contracts and other construction forms as necessary. Case studies will be utilized to develop critical thinking skills.

Prerequisite: CM 4100.

CM4970 - Construction Management Internship

Credits: 3

Students may apply for credit for extended work experience (>10 weeks; full-time) in the construction industry, supervised by a professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

When Offered Offered summer only.

Counseling

CNSL1000 - Relationship Skills: Counseling in Action

Credits: 3

Content-based course that focuses on the critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry; introducing students to the role of counseling in diverse settings. Themes discussed include classroom human relations skills, counseling in a diverse society, legal and ethical issues in human relations fields, and various specialties in the practice of counseling.

USP Code [I,L<>(none)]

CNSL1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP Code [CS,L<>(none)]

CNSL2300 - Counseling Skills for the Helping Professions

Credits: 3

Presents instruction and practice in basic counseling and communication skills. Emphasizes listening, responding, encouraging and initiating change in interpersonal communication through mediation and conflict resolution.

Prerequisite: sophomore standing; permission of Coordinator of Counselor Education program.

CNSL2800 - Undergraduate Seminar in:

Credits: 1-3

Max Credit (Max. 9)

Reserved for academic course work related to student interest in classes associated with examining the discipline of counseling from many varied perspectives.

Prerequisite: Declared major in the social sciences, human services, or education.

CNSL3010 - Student Leadership Strategies

Credits: 2

Develops skills and competencies requisite to effective leadership. Provides student leaders with skills they will profit from, both while enrolled at the university and later in their chosen careers.

When Offered (Normally offered each spring semester)

CNSL4520 - Fundamentals of Counseling (B)

Credits: 3

Students learn some of the skills of counseling and develop an understanding of elementary principles of counseling theory, as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 5520.

When Offered (Offered on campus and online all semesters)

Prerequisite: junior standing; 6 hours of education or psychology and graduate standing to receive graduate credit.

CNSL4620 - Organization and Administration in Student Affairs

Credits: 3

An introduction to college student affairs practice, specifically exploring issues related to the organization and administration of student personnel services. Explores the history, the philosophy, and the skills utilized in student personnel services within the context of various higher education institutions and settings.

Prerequisite: department consent.

CNSL5020 - Workshop

Credits: 1-4

Max Credit (Max. 99)

Usually offered only during summer sessions, this course provides an opportunity for special consideration on particular areas of

counseling or pupil personnel services.

Prerequisite: graduate standing, nine hours of education or behavioral science.

CNSL5030 - Short Course

Credits: 1-2

Max Credit (Max. 12)

Provides opportunities for intensive study of some specific topic or set of topics in personnel work, to meet the special needs of a group of students with common interests. No more than six hours may be applied to any one degree program.

Prerequisite: graduate standing and 6 hours in education and/or behavioral sciences.

CNSL5040 - Relationship Skills

Credits: 3

Designed to help students and administrators develop their human relation skills to improve interpersonal effectiveness and communication as related to generic life skills.

Prerequisite: 12 hours of education and/or psychology.

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3

Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

CNSL5110 - Group Procedures

Credits: 3

Designed as an introduction to group work used in various organizational settings. Basic group techniques and procedures are covered using lecture/ discussion methods, video, observation, and participation in practicing group leadership skills. Participation in a group experience during the course is required.

Prerequisite: CNSL 4520/CNSL 5520, six semester hours of education and/or psychology, consent of instructor, and graduate standing.

CNSL5120 - School Counseling

Credits: 3

Provides specialized training for individuals preparing to be school counselors at levels K-12.

Prerequisite: graduate standing.

CNSL5125 - School Counseling II

Credits: 3

Explores the leadership role of the professional school counselor within the P-12 school setting and focuses on skills and experiences related to equity, advocacy, and social justice for systemic change, as well as program development, implementation and evaluation.

Prerequisite: Graduate standing, program admission and CNSL 5120.

CNSL5130 - Mental Health Counseling

Credits: 3

Encompasses specific counseling and professional development issues encountered by licensed counselors working in mental health agencies or private practice. Understanding the nature of the clientele and the issues, strategies for resolving client difficulties, collaborative practice, ethics, advocacy, knowledge and skills related to diversity and social justice are considered.

Prerequisite: enrollment in Counselor Education program, successful completion or enrollment in CNSL 5060, CNSL 5650 and CNSL 5310.

CNSL5140 - Counseling & Addictions

Credits: 3

Focuses on students acquiring specialized knowledge of assessment and multi-disciplinary treatment of chemical and other addictions.

Prerequisite: six hours in administration of justice, psychology, sociology, or social work at the 4000 or 5000 level.

CNSL5150 - Mental Health Counseling II

Credits: 3

Explores the leadership role of the professional counselor within a variety of mental health settings. Areas of application include program development, best practices, management, evaluation, consultation, social justice and supporting client advocacy.

Prerequisite: graduate standing, program admission and CNSL 5130.

CNSL5170 - Counseling and Career Across the Lifespan

Credits: 3

Offers an overview of human lifespan functioning with a primary focus on psychosocial development and counseling and career development across the lifespan. Additionally, this course presents the opportunity to examine the role of career and its influences on personal development.

CNSL5175 - Human Growth and Development

Credits: 3

Provides an understanding of the nature and needs of individuals at all developmental levels, across the entire lifespan, and in diverse multicultural contexts through addressing theories of individual and family development, transitions across the life span, theories of learning, personality development, and neurobiological behavior.

Prerequisite: Instructor permission and bachelors degree.

CNSL5180 - Assessment in CNSL

Credits: 3

Emphasis is on counselor development for facilitating client self-understanding through the application of various assessment procedures and knowledge about educational information systems and tools.

Prerequisite: graduate standing, 15 hours in education and/or behavioral sciences.

CNSL5200 - Couple and Family Theory

Credits: 3

Provides students with a foundation in conceptualizing and working with couple and family systems. Areas to be addressed include the history of couple and family counseling, ethical issues, professional orientation and an introduction to major systems theories. Participants are expected to explore their own family of origin.

Prerequisite: admission to program.

CNSL5210 - Group Experience

Credits: 1

Designed to provide a structured growth group experience through both in-class experience and reading. It is designed for students involved in human relationship fields. In-class groups are led by advanced group counseling students under the supervision of the faculty instructor.

Prerequisite: graduate standing and consent of instructor.

CNSL5310 - Pre-Practicum

Credits: 3

The first semester of a one-year sequence focused on learning, developing and practicing the fundamental process of counseling. Students do role-playing and have supervised experience with clients in a laboratory setting. Individual supervision is provided. Individual, live and observation of supervision is extensive.

Prerequisite: graduate standing, program approval.

CNSL5320 - Practicum

Credits: 3

Second course in a two semester sequence which includes class work, supervised counseling with clients in laboratory, extensive

individual, group, live and observational supervision.

Prerequisite: graduate standing, CNSL 5310, program approval.

CNSL5330 - Counseling Children and Adolescents

Credits: 3

Students increase knowledge and skills in the processes of counseling children and adolescents.

Prerequisite: six hours in education and/or behavioral sciences.

CNSL5340 - Play Therapy

Credits: 3

Provides students with an overview of the field of play therapy. The historical roots of play therapy and the importance of play in child development will be explored. Various play therapy theories and techniques for assessment and intervention and professional issues will be surveyed.

Prerequisite: graduate standing or consent of instructor.

CNSL5341 - Play Therapy and Expressive Arts

Credits: 3

This course is designed to provide students with an introduction to child-centered play therapy and expressive arts. Students will leave with an understanding of child-centered play therapy and how to facilitate and process a variety of expressive arts activities with clients throughout the lifespan.

Prerequisite: Acceptance to the Online Play Therapy Certificate Program or consent of the instructor.

CNSL5342 - Theoretical Models of Play Therapy

Credits: 1

This course is designed to provide students with an overview of the field of play therapy theories and practices. Various play therapy theories and techniques for assessment and intervention will be surveyed with the intent of students developing a personal style for providing play therapy.

Prerequisite: CNSL 5341 or consent of the instructor.

CNSL5343 - Filial and Family Play Therapy

Credits: 3

Students will develop an understanding of the theoretical concepts of the filial play therapy. Students will gain the necessary skills to organize, implement, structure and facilitate filial therapy and family play therapy sessions. Conducting a filial group is essential to this course, current professional liability insurance is required.

0900

Prerequisite: CNSL 5341, CNSL 5342 or consent of the instructor.

CNSL5350 - Multicultural Counseling

Credits: 3

Increases counselor competency and skills with diverse clients.

Prerequisite: admission to the UW counseling program.

CNSL5510 - Trends and Issues

Credits: 1-4

Max Credit (Max. 4)

This course is used from time to time as a systematic means for students to explore a developing trend or issue related to personnel services. Students make in-depth studies of one or more issues, trends, practices, and applications, under the supervision of one or more instructors.

Prerequisite: graduate standing, and 15 hours in education and/or behavioral sciences.

CNSL5520 - Fundamentals of Counseling

Credits: 3

Beginning course in the basis and process of counseling. Exposes students to some of the skills of counseling and enables them to develop an understanding of the elementary principles of counseling theory as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 4520.

Prerequisite: 6 hours of education or psychology and graduate standing.

CNSL5580 - Supervised Internship

Credits: 1-6

Max Credit (Max. 16)

Provides a capstone clinical experience, preparing graduates to enter the practice of counseling PK-12 schools, mental health settings, and student affairs services in higher education. Students engage in professional counseling activities at approved placement sites.

Prerequisite: graduate standing, CNSL 5310, CNSL 5320 and consent of the designated field setting authority.

CNSL5610 - Advanced Practice in Group and Family Counseling

Credits: 3

Designed to provide a theoretical framework for understanding group dynamics and family systems, as well as offer intervention guidelines, best practices, and supervised experience in group leadership and family counseling.

Prerequisite: program admission and consent of instructor.

CNSL5630 - Trauma-Informed Counseling

Credits: 3

This capstone course helps prepare students to understand and work with clients around trauma issues in mental health and school settings. Previous learning will be reviewed and synthesized with knowledge about trauma-informed care across the lifespan, including psychological first aid. Research-based best practices, counselor wellness, and effective service delivery are emphasized.

Prerequisite: graduate standing.

CNSL5640 - Diagnosis, Psychopathology, and Psychopharmacology

Credits: 3

Introduction to the etiology, prevention, and treatment of mental and emotional disorders. Includes a focus on the skills of biopsychosocial case conceptualization and treatment planning, and multi-axial differential diagnosis using the current edition of the Diagnostic and Statistical Manual. Also addresses basic classifications, indications and contraindications of common pharmacological interventions.

Prerequisite: program consent.

CNSL5650 - Counseling Theories

Credits: 2-3

Max Credit (Max. 3)

Designed to increase understanding of major counseling theories, with an emphasis on the integration of theoretical and philosophical assumptions with personal viewpoints.

Prerequisite: previous or concurrent enrollment in CNSL 4520/CNSL 5520 or equivalent, admission to counseling program, consent of instructor.

CNSL5860 - Doctoral Practicum in Counselor Education

Credits: 1-8

Max Credit (Max. 8)

Enrollment is limited to five graduate students per instructor. In this practicum, advanced graduate students are given an intensive supervised experience in counseling students over an extended period of time. The actual counseling experience is supplemented by input and evaluation seminars for all enrollees and by supervisory conferences designed to improve sensitivity and skill in counseling.

Prerequisite: admission to the doctorate program in counseling, mastery of basic interviewing and counseling skills, and consent of instructor.

CNSL5865 - Supervision Theory

Credits: 3

Provides students with the theoretical, knowledge and research base of clinical supervision as it relates to the counseling profession.

Prerequisite: CNSL 5860.

CNSL5870 - Seminar

Credits: 1-6

Max Credit (Max. 12)

Advanced students work together intensively on current issues and problems and participate in systematic, critical interpersonal evaluation. Seminars are organized with various patterns of emphasis and provide for a variety of small group experiences related to curricular areas within the department.

Prerequisite: consent of instructor and graduate standing.

CNSL5871 - Doctoral Seminar I: Professional Identity and Ethics

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar I focuses on counselor education identity development and professional ethics for future counselor educators.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5872 - Doctoral Seminar II: Diversity and Social Change

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar II focuses on the role of diversity and social change in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5873 - Doctoral Seminar III: Research, Assessment & Scholarship

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar III focuses on the role of research, assessment and scholarship in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD student.

CNSL5874 - Doctoral Seminar IV: Leadership, Consultation and Advocacy

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar IV focuses on the role of leadership, consultation and advocacy in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5875 - Doctoral Practicum in Supervision

Credits: 1-6

Max Credit (Max. 6)

Designed to provide the prospective counseling educator or supervisor with an understanding of the learning process in counseling and the supervisory behaviors requisite for improving the competencies and professional growth of counselors. Specialized knowledge, skills, and attitudes related to the act of supervising are supplemented by various methods and techniques such as videotape, films, film-tape synchronization, simulation material, role-playing, group dynamics, communication games, interpersonal recall, interaction and content analysis, and micro-counseling.

Prerequisite: CNSL 5860, graduate standing, and consent of instructor.

CNSL5880 - Special Problems

Credits: 1-9

Max Credit (Max. 9)

Provides a broad perspective through selected reading material. Wherever possible the student collects and uses original information from a practical work situation. All work is done independently under the direction of a faculty member. A minimum of three conferences are held as necessary to assure successful completion of the project.

Prerequisite: consent of instructor and program, and graduate standing.

CNSL5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

Note: Note: credit in this course may not be included in a graduate program of study for degree purposes.

Creative Writing

CW1040 - Intellectual Community: Introduction to Creative Writing

Credits: 3

Focus on critical learning skills as they relate to creative writing. Read from a variety of genres, attend literary events on campus, acquire research skills, and produce creative writing. Will produce portfolios of creative work in these areas, along with a self-

0904

reflective essay applying the critical skills learned throughout the semester.

CW1101 - First-Year Seminar

Credits: 3

USP Code [(none)<>FYS]

CW2050 - Introduction to Fiction

Credits: 3

Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

CW2060 - Introduction to Nonfiction

Credits: 3

Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

CW2070 - Creative Autobiographical Writing

Credits: 3

Students read and explore autobiographical writing in various forms, potentially including: brief bio for publicity and job application purposes, memoir, personal essay, confession and fictional monologue. What you can reveal about yourself, when and how and for whom.

Prerequisite: completion of WA/COM1.

CW2080 - Introduction to Poetry

Credits: 3

Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

CW2125 - Writing in Popular Genres

0905

Credits: 3

Analyze and write in a variety of popular fiction and non-fiction genres. Study publishers' descriptions and read examples and critical analysis of the genres. Finally, produce a rhetorical description and an original text work in one chosen genre.

USP Code [WB<>(none)]

Prerequisite: ENGL 1010

CW4050 - Writer's Workshop

Credits: 3

Max Credit (Max. 6 at undergraduate, Max. 12 for graduate)

Students submit manuscripts in the short story, poetry, drama, etc. Includes class and conference criticism and consultation. Considers different types of creative writing in various semesters, as announced in class schedule.

Prerequisite: 3 hours of a 2000-level creative writing class in the appropriate genre and consent of instructor.

CW5540 - Seminar in Creative Writing

Credits: 1-4

Includes form and theory classes, publication workshops, and readings courses. Depending on the particulars, students review important texts about writing, review literary magazines and publishing houses, discuss publishing procedures with faculty and guests, participate in close readings of original texts, and produce an independent writing project.

Prerequisite: graduate standing or consent of instructor.

CW5550 - Independent Study in Creative Writing

Credits: 1-3

Max Credit (Max. 6)

Guided independent writing of poetry or imaginative prose at an advanced level. Limited enrollment.

Note: No more than 9 hours of ENGL 4050 and ENGL 5550 combined may be counted toward the M.A. in English.

Prerequisite: consent of instructor and graduate status or 6 hours of ENGL 4050.

CW5560 - Graduate Writing Workshop

Credits: 1-4

Max Credit (Max. 28)

Graduate level workshop that emphasizes reading as well as writing in a specific genre (poetry, nonfiction, fiction) or in relation to a theme that combines genres, at the discretion of the instructor.

Prerequisite: 12 hours of 4000-level creative writing or graduate status or consent of instructor.

CW5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students who coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

CW5990 - M.F.A. Internship

Credits: 1-12
Max Credit (Max. 24)

Internship.

Prerequisite: Enrollment in a graduate degree program.

Criminal Justice

CRMJ1001 - Introduction to Criminal Justice

Credits: 3
Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3
Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3
Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.

Prerequisite: SOC 1000.

CRMJ2685 - Research Methods in Criminal Justice

Credits: 4

Introduces students to fundamental issues associated with the application of scientific methods to criminal justice problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to criminal justice issues.

Former Course Number [3680]

Prerequisite: enrollment limited to criminal justice majors.

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3250 - Juvenile Delinquency

Credits: 3

Considers the nature of delinquency, including an analysis of treatment methods and the juvenile justice system.

Cross Listed SOC 3250.

Prerequisite: CRMJ 2400/SOC 2400.

CRMJ3350 - Correctional Theory and Practice

Credits: 3

Examines the various components of the correctional complex from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed SOC 3400.

Prerequisite: SOC 1000.

CRMJ3490 - Issues in Policing

Credits: 3

Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4150 - Community-Based Corrections

Credits: 3

Designed to provide students with an in-depth look at the community corrections complex. It will examine the history and growth of community corrections, the probation system, methods of post-incarceration supervision, intermediate sanctions, and correctional programming and treatment in the community.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3350.

CRMJ4151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 5151.

Former Course Number [3150]

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4200 - Ethics in Administration of Justice

Credits: 3

Introduces basic ethical theories, emphasizing how ethical theory can be applied to contemporary problems in law enforcement, corrections and adjudication. Students will be called upon to apply these various ethical frameworks to typical moral dilemmas in criminal justice.

Former Course Number [3200]

Prerequisite: CRMJ 3110, CRMJ 3350, and CRMJ 3490.

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

CRMJ4260 - Gangs

Credits: 3

Considers the nature and the characteristics of gangs and gang members. The theoretical and empirical evidence regarding the phenomenon of gangs is evaluated. Particular emphasis is placed on the social and policy implications of this social problem.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4280 - Comparative Criminal Justice

0910

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP Code [WC,G<>(none)]

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed SOC 4350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

CRMJ4370 - Criminal Psychopathology

Credits: 3

Provides an overview of current theories and empirical evidence concerning the relationship between psychological disorder and criminal behavior. Examines various clinical syndromes and their role in biological, social and psychological genesis of crime, as well as the concept of criminal responsibility.

Cross Listed PSYC 4370.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

CRMJ4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed POLS 4600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

CRMJ4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed INST 4705, POLS 4705, and SOC 4705.

Former Course Number [4700]

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4750 - Internship in Criminal Justice

Credits: 1-12

Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

Restricted Junior Standing.

Prerequisite: 2.5 cumulative GPA, completion of at least 6 upper division hours in CRMJ courses and consent of instructor.

Registration for more than six hours requires permission of the Department Head.

CRMJ4760 - Child Maltreatment

Credits: 3

Examines the phenomenon of child abuse and neglect. Includes an overview of attitudes towards and legal definitions of child maltreatment. Explores parental factors, contextual influences and developmental consequences of maltreatment. Relies heavily on current research in child abuse and neglect. Emphasizes policy implications.

Cross Listed PSYC 4760.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

0912

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

CRMJ4965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides undergraduates with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 5965.

Prerequisite: upper division standing and consent of instructor required in advance.

CRMJ4975 - Readings

Credits: 1-3

Max Credit (Max. 6)

Special programs of readings in criminal justice related subjects will be outlined to meet needs of individual students.

Prerequisite: consent of instructor.

CRMJ4990 - Topics:

Credits: 1-3

Max Credit (Max. 6)

Intended to accommodate various special subjects not offered as regular courses.

Prerequisite: as listed for housing department's topics course.

CRMJ5000 - Survey of Criminal Justice

Credits: 3

Provides an overview of criminal justice theory by providing critical evaluation and discussion of research in the criminal justice field. It will emphasize seminal works and review current research concerning the structure, function, operation, interaction of the criminal justice system's primary components, and future trends.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5100 - Public Policy and Crime

Credits: 3

This course is designed to take a multidimensional look at public policy issues related to the prevention and control of crime in the United States. Issues covered include the development, implementation, and evaluation of crime control policy.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 4151.

Prerequisite: graduate standing or consent of instructor.

CRMJ5280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 4280.

Prerequisite: graduate standing.

CRMJ5500 - Internship in Criminal Justice

Credits: 3

Educationally-oriented assignments for work in selected criminal justice agencies, with tutorial types of supervision.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 /GWST 5540.

Dual Listed CRMJ 4540.

Prerequisite: ENGL 1080 /WMST/GWST 1080 , WMST/GWST 2500 , CRMJ 2400 /SOC 2400 , or WMST/SOC 3500.

CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote

social justice will be the primary analytical focus.

Dual Listed CRMJ 4860.

Prerequisite: graduate standing or consent of the instructor.

CRMJ5965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides students with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 4965.

Prerequisite: graduate standing; consent of instructor required in advance.

CRMJ5975 - Graduate Readings

Credits: 1-3

Max Credit (Max. 3)

This course provides students the opportunity to engage in an in-depth inquiry into a criminal justice topic through a thorough review of the existing literature under the supervision of a faculty member.

Curriculum and Instruction

EDCI4050 - Minority Sexual/Gender Identity Issues in Education

Credits: 3

How youth of minority sexual and gender identities have been educated: the challenges they experience in U. S. K-16 schools, the risk factors related to academic success (health, safety, and emotional well being), and strategies to create safe, caring, and inclusive learning environments for all youth.

Cross Listed GWST 4050 .

Dual Listed EDCI 5050.

Prerequisite: completion of WA and GWST 2000 with C or better.

EDCI4120 - Literature for Young Adults

Credits: 3

Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. The course involves the reading and critique of literature.

Dual Listed EDCI 5120.

When Offered (Offered based on sufficient demand and resources)

0915

Former Course Number [LIBS 4120]

Prerequisite: senior level or graduate standing.

EDCI4140 - Storytelling

Credits: 3

An investigation of storytelling as an art and as an aid to instruction. Emphasis is on literature for preschool and elementary age children.

Dual Listed EDCI 5140.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [LIBS 4140]

Prerequisite: junior standing or EDCI 4120 is recommended.

EDCI4160 - Recent Trends in Children's and Young Adult Literature

Credits: 3

Important new developments in the subject matter, settings and style of children's and young adult books are identified and studied. Students in this course are expected to have a strong basic knowledge of children's and young adult literature.

Dual Listed EDCI 5160.

Former Course Number [LIBS 4160]

Prerequisite: EDCI 4120.

EDCI4300 - Clinical Assessment and Instruction

Credits: 3

Provides students with opportunities to work with school-aged students experiencing literacy difficulties. Students in this class tutor school-aged children for an entire semester under the direct guidance of the course instructor and director of the LRCC.

Prerequisite: Completion of COM1; background check on file.

EDCI4330 - Advanced Diagnosis, Corrective Reading Instruction

Credits: 3-4

Max Credit (Max. 4)

Designed to provide students with opportunities to work with children who have reading problems. Students in this class tutor under the direct guidance of the course instructor.

Prerequisite: EDCI 3100, EDCI 4300 and consent of instructor.

EDCI4350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Focus is on the classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and

evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 5350.

EDCI4390 - Literature and Reading/Writing Instruction

Credits: 3

Links the use of literature for children with instruction and practice in reading, writing, spoken language, and critical thinking skills. Students are expected to have a strong background knowledge of literature for children before taking this course.

Dual Listed EDCI 5390.

Prerequisite: EDEL 2280, or basic children's literature course work.

EDCI4450 - Issues In Multicultural Education

Credits: 3

Provides the future teacher and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group.

Dual Listed EDCI 5450.

Former Course Number [4250]

Prerequisite: students must have at least 12 credit hours in education classes.

EDCI4665 - History and Philosophy of American Education

Credits: 3

Provides cultural, philosophical, and historical perspectives drawn from the American experience and centered in the American ideology of equality of educational opportunity. Major trends and philosophies that have developed, and are developing, in American education will be shared through discussion, presentations, and written projects.

Dual Listed EDCI 5665.

Prerequisite: Completion of WA with C or better.

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480 .

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

EDCI5000 - Principles of Curriculum

Credits: 3

Provides an overview of general understandings fundamental to the study of all aspects of curriculum to include pre-school, kindergarten thru high school. Consideration is given to the various factors, institutions and societal issues that impinge on and affect the decision making processes of curriculum developers.

Prerequisite: graduate standing in education.

EDCI5010 - Supervision of the School Music Program

Credits: 2-4

Max Credit (Max. 4)

Two sections: vocal; instrumental. Designed for graduate students who have a background in music education and for other interested graduate students in education.

Prerequisite: 12 hours of education and graduate standing.

EDCI5020 - Curriculum Workshop

Credits: 1-4

Max Credit (Max. 4)

Two sections: vocal; instrumental. Designed for graduate students who have a background in music education and for other interested graduate students in education.

Prerequisite: 12 hours of education and graduate standing.

EDCI5050 - Minority Sexual/Gender Identity Issues in Education

Credits: 3

How youth of minority sexual and gender identities have been educated: the challenges they experience in U. S. K-16 schools, the risk factors related to academic success (health, safety, and emotional well being), and strategies to create safe, caring, and inclusive learning environments for all youth.

Cross Listed GWST 5050 .

Dual Listed EDCI 4050.

Prerequisite: completion of WA and GWST 2000 with C or better; graduate standing; completion/concurrent enrollment in ADED 5260.

EDCI5070 - Educational Trends

Credits: 1-6
Max Credit (Max. 6)

Provides reading, discussion, research, and appraisal of new methods, materials, equipment, and experimental programs concerned with the improvement of education as it pertains to curriculum and instruction. The maximum allowable credit applies to the total offerings under this number.

Prerequisite: 12 hours of education courses.

EDCI5090 - Plan B Research

Credits: 1-3
Max Credit (Max. 9)

Under the guidance of a committee chair, the enrolled graduate student will complete a scholarly Plan B project. Plan B projects emerge from practice, typically involving a problem of interest within a student's school, classroom, or work site. Admission in the Curriculum and Instruction graduate program required.

Prerequisite: graduate standing.

EDCI5110 - Foundations of American Indian Education

Credits: 3
Examines cultural, geographical, linguistic, spiritual, political and societal factors before, during and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed NAIS 5110.

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

EDCI5120 - Literature For Young Adults

Credits: 3
Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. Involves reading and critiquing literature.

Dual Listed EDCI 4120.

Prerequisite: senior level or graduate standing.

EDCI5121 - History and Philosophy of American Indian Education

Credits: 3

Addresses the history of Indian education in the U. S. and Canada, examination of missionary initiatives, government programs, and tribal efforts. Review of documentary accounts of Native education, review autobiographical accounts of Native teachers and children. We will develop insight necessary for development of appropriate teaching methods and materials.

Cross Listed NAIS 5121.

Prerequisite: Post-Baccalaureate standing.

EDCI5130 - Cultural Foundations of American Indian Education

Credits: 3

In-depth study and analysis of the educational experiences of American Indians, focusing on contemporary educational issues and experiences, examining the impacts of cultural orientations, stereotypes, bias and other issues on the educational attainment of American Indian students. Critique instructional practices and programs developed addressing the needs of American Indian students.

Cross Listed NAIS 5130.

Prerequisite: Post-Baccalaureate status.

EDCI5140 - Storytelling

Credits: 3

An investigation of storytelling as an art and as an aid to instruction. Emphasis is on literature for preschool and elementary age children.

Dual Listed EDCI 4140.

Prerequisite: junior standing or EDCI 4120 is recommended.

EDCI5141 - Instructional Methods in American Indian Education

Credits: 3

Addresses culturally responsive methodologies for teaching American Indian students, review of documentary accounts of Native education and autobiographical accounts of Native teachers and children as students develop appreciation of the complexity and difficulties of Native education. Students acquire insight necessary for development of appropriate teaching methods and materials.

Cross Listed NAIS 5141.

Prerequisite: Post-Baccalaureate status.

EDCI5160 - Recent Trends in Children's and Young Adult Literature

Credits: 3

Important new developments in the subject matter, settings and style of children's and young adult books are identified and studied. Students in this course are expected to have a strong basic knowledge of children's and young adult literature.

Dual Listed EDCI 4160.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: EDCI 4120.

EDCI5205 - Methods of Teaching Middle-Level Mathematics

Credits: 3

Research based pedagogy and pedagogical content knowledge for teaching middle-level mathematics. Designed for practicing teachers of middle-grades mathematics.

Cross Listed NASC 5205.

Prerequisite: admission to the SMTC program.

EDCI5215 - Using Instructional Technology for Middle-Level Mathematics

Credits: 3

Covers the use of technology appropriate to middle-level mathematics teaching, such as microworlds, geographic information systems, spreadsheets, and other content appropriate technologies.

Cross Listed NASC 5215.

Prerequisite: admission to the SMTC Program.

EDCI5225 - Assessment for Middle-Level Mathematics

Credits: 3

Middle-level Mathematics Initiative teacher participants examine, analyze, and implement a variety of assessments that are aligned with standards and instruction appropriate to the middle level math learner.

Cross Listed NASC 5225.

Prerequisite: admission to the SMTC program.

EDCI5250 - Advanced Topics in Pedagogy

Credits: 3

A graduate level seminar to be taken concurrently with undergraduate methods courses in specific content areas (EDSE 425X-4260, EDEL 4309).

Restricted EDCI 5250 is restricted to students pursuing teacher certification leading to a Master of Arts in Curriculum and Instruction.

Prerequisite: Successful completion of EDCI 5550, EDST 3500, EDCI 5870, Seminar in Assessment, earned Bachelor's degree from an accredited institution.

EDCI5310 - Reading Comprehension Processes and Instruction

Credits: 3

Designed to acquaint the student with recent developments, research findings, and newer practices. Viewpoints expressed by experts are compared, and an emphasis is given to the objectives of knowledge and to an understanding of attitude and skills.

Prerequisite: graduate standing.

EDCI5320 - The Writing Process in the Classroom

Credits: 3

Designed to acquaint the student with recent developments, research findings, and newer practices in the area of composition. Viewpoints expressed by experts are compared and an emphasis is given to the objectives of knowledge and to an understanding of attitudes and skills.

Prerequisite: graduate standing.

EDCI5350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 4350.

Prerequisite: graduate standing.

EDCI5390 - Literature and Reading/Writing Instruction

Credits: 3

Links the use of literature for children with instruction and practice in reading, writing, spoken language, and critical thinking skills. Students are expected to have a strong background knowledge of literature for children before taking this course.

Dual Listed EDCI 4390.

Prerequisite: EDEL 2280, or basic children's literature course work.

EDCI5400 - Midpoint Portfolio Reflection

Credits: 1

Allows students to reflect, self-assess, and receive guidance related to their progress in the C&I Master's Program. Requirements include: self assessment of progress toward the C&I program outcomes, completion of a series of research abstracts, formation of the students' graduate committees and approval of programs of study.

Prerequisite: admission to the Curriculum and Instruction Master's Program and completion of at least 12 hours of EDCI coursework.

EDCI5430 - Theory and Methods of ESL I

Credits: 3

Provides an overview of theoretical and practical considerations in the teaching of English as a second/foreign language; acquaints students with different approaches, methods and procedures in TESL/TEFL; examines issues in the profession; requires a teaching/tutoring component.

Prerequisite: EDCI 5350.

EDCI5440 - Theory and Methods of ESL II

Credits: 3

Continues the theoretical and practical considerations in the teaching of ESL. Emphasis on Specifically Designed Academic Instruction in English (SDAIE) and literacy development for intermediate and advanced English language learners. Application of different approaches, methods, and procedures in TESL/TEFL. Development of curriculum. Issues in the profession. Requires teaching/tutoring component.

Prerequisite: EDCI 5430.

EDCI5450 - Issues in Multicultural Education

Credits: 3

Provides future and inservice teachers and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group. Additional assignments are required of students completing this course for graduate credit.

Dual Listed EDCI 4450.

Prerequisite: 12 credit hours of education classes.

EDCI5480 - Short Course

Credits: 1-6

Max Credit (Max. 6)

Provides offerings in special topics in curriculum and instruction on the basis of need. The maximum allowable credit is six semester hours.

Prerequisite: 6 hours of education courses.

EDCI5490 - Individual Problems

Credits: 1-6

Max Credit (Max. 6)

Provides flexible credit for seniors who may need the credit for graduation, or for students who wish to undertake intensive study of a special problem identified in a regular class.

Prerequisite: 12 hours of education courses and consent of instructor.

EDCI5500 - Classroom Assessment

0923

Credits: 3

Provides reading, discussion, and research examining a variety of classroom-based assessments with a focus on the alignment of teaching, learning, and classroom assessment at the P-12 level.

Prerequisite: graduate status.

EDCI5515 - National Board Certification Seminar

Credits: 1-3

Max Credit (Max. 12)

Provides information and support for teachers in the National Board Certification process. Content includes: reviewing, understanding, and applying best practice research; development of differentiated instruction; integration of formative assessment and reflective practice; understanding problem solving across the curriculum; and focuses on writing strategies for National Board Certification success.

Prerequisite: graduate student standing.

EDCI5550 - The Art and Science of Teaching

Credits: 4

Students will engage in a variety of experiences related to teacher decision making. Students research a variety of curriculum and instruction topics to discern the range of theories and associated models and develop personal theories and methods they plan to employ in their classrooms.

Prerequisite: successful completion of EDST 4000 and earned Bachelor's degree from an accredited institution.

EDCI5551 - Practicum Graduate Certificate

Credits: 1

This 1 credit hour course provides practicum experiences for students enrolled in EDCI 5550.

Prerequisite: Successful completion of, or concurrent enrollment in, EDCI 5550 and earned Bachelor's degree from an accredited institution.

EDCI5560 - Seminar in Assessment

Credits: 1

One credit hour course is designed for students in the (post baccalaureate) teaching credential program with master's option. Covers important concepts of assessment such as teachers as graders, self-and peer-assessment techniques, standardized assessment instruments, challenges facing new teachers, using assessment for planning/modifying instruction to improve learning experiences, and differentiated assessment in diverse classrooms.

Prerequisite: successful completion of (grade C or higher) or concurrent registration in EDST 2550 or EDST 3500.

EDCI5580 - Internship1

0924

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

EDCI5600 - Diversity in Education

Credits: 3

Provides practicing teachers and graduate level students with an understanding of the macrolevel influences on diversity in education. Includes an examination of competing models of diversity in education as well as reviews critical scholarly work in the field (including alternative methodological frameworks for engaging in this research). Includes competencies for developing advocacy-oriented skills and dispositions.

Prerequisite: graduate level students only.

EDCI5665 - History and Philosophy of American Education

Credits: 3

Provides cultural, philosophical, and historical perspectives drawn from the American experience and centered in the American ideology of equality of educational opportunity. Major trends and philosophies that have developed, and are developing, in American education will be shared through discussion, presentations, and written projects.

Dual Listed EDCI 4665.

Prerequisite: Graduate student status; priority enrollment given to students registered in the C&I/Curriculum Studies area.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5730 - Learning and Cognition

Credits: 3

The purpose of this course is to explore and critically analyze various learning theories from 1900 to present, including, but not limited to, behaviorism, constructivism, information processing, situated cognition, meaning learning, and cognitivism. Focus is on applying learning theories to impact K-12 student outcomes.

Prerequisite: graduate standing or permission of instructor.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6

Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3

Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12)

Credits: 3

Critically examines reading-writing research for the express purpose of recognizing fundamentals of superior studies. Students

are encouraged to select and pursue a topic in reading-writing research for intensive examination. Students may pursue areas of emphasis in elementary, secondary, or higher education.

Prerequisite: Graduate standing in education.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3

Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

EDCI5790 - Learning Theories and Instructional Principles

Credits: 3

This course focuses on making connections between theoretical perspectives on teaching and learning, empirical work, and the actual practice of teaching. As a result, learners should expect to examine multiple learning theories, read research based on those theories, explore pedagogy that grows out of these theories, and integrate theory into practice in their own classrooms.

Prerequisite: graduate standing.

EDCI5800 - Curriculum Development

Credits: 3

The process of developing an early childhood through grade 12 curriculum are learned. Factors involved in initiating, developing, and evaluating curricula are studied.

Prerequisite: EDCI 5000 and 5650.

EDCI5810 - Writing for Professional Publications

Credits: 3

Designed to give students a structured experience with writing to publish in professional journals. Students will be expected to have written and submitted a publishable article by the end of the course.

Prerequisite: 8 hours of graduate coursework completed.

EDCI5870 - Seminar

Credits: 1-6

Max Credit (Max. 8)

Advanced students in curriculum and instruction work intensively on current issues and problems and participate in systematic, critical interpersonal evaluation. Students may pursue areas of emphasis in elementary, secondary, or higher education in the

seminar. Only six hours may be allowed in the curriculum and instruction program on a student's program under this number.

Prerequisite: consent of instructor and graduate standing.

EDCI5880 - Special Problems

Credits: 1-6

Max Credit (Max. 9)

Provides a broad perspective through selected reading material and, wherever possible, the student collects and uses original information from a practical school situation. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of the project.

Prerequisite: consent of instructor and school director, and graduate standing.

EDCI5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 9)

Provides additional opportunity for the student to pursue advanced graduate work through independent research. Projects are done under the direction of a graduate faculty member offered in the areas of business education and distributive education.

Prerequisite: consent of the instructor, the department head, and graduate standing.

EDCI5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

EDCI5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EDCI5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EDCI5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics

Note: credit in this course may not be included in a graduate program of study for degree purposes.

EDCI5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

EDCI5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

EDCI5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Decision Sciences

DSCI3210 - Introduction to Operations and Supply Chain Management

Credits: 3
An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 1400 or equivalent, STAT 2050 or equivalent, MATH 2355 or equivalent, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

DSCI4230 - Purchasing and Supply Management

Credits: 3

Examines how to manage supply function. Topics include organization, planning procedures, category management, supplier selection, quality, inventory decisions, ethical and profession standards, costing, and price determination.

Prerequisite: DSCI 3210, junior class standing, advanced business standing.

DSCI4240 - Computer Applications in Decision Sciences

Credits: 3

A study of decision science topics such as mathematical programming, Monte Carlo simulation, forecasting, project management and decision theory. The applications of computer techniques is emphasized.

Prerequisite: IMGT 1400 or equivalent, STAT 2010 or equivalent, and junior class standing.

DSCI4250 - Revenue Management

Credits: 3

Examines the tools used by many industries in the service sector to maximize revenue, including forecasting demand, overbooking customers, group decision making, how to allocate fixed assets, and control of the overall network.

Prerequisite: DSCI 3210, advanced business standing, junior class standing.

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

DSCI4270 - Logistics

Credits: 3

Presents a synthesis of the principles in logistics activities resident in the supply chain. The course emphasizes how to manage the operation and integration of transportation (inbound and outbound), inventory, warehousing, facility location, customer service, packaging and materials handling.

Prerequisite: DSCI 3210, junior standing, advanced business standing.
