Safety Data Sheet program sponsored by Research and Safety Offices at the University of Wyoming

The University of Wyoming will supply to all university personnel an E-binder program, called MSDSonline for Safety Data Sheets, SDS's formally known as Material Safety Data Sheets, MSDS's. The name change comes with OSHA passing a change to the Hazard Communication Standard on 25 March 2012.

A link to MSDSonline may be found on the main page of the EHS website to the left, then click on the MSDSonline Search Page, which will take you to the University of Wyoming E-binder MSDS search page. If you cannot find your material on the UW search page, click on the MSDSonline Search, which will take you to their search engine and more than 6 million SDS's. You can download the SDS for your material and please click the box to the left of the PDF symbol. This will open a new box to the right, which will ask you to add the material to your company list and ask for some information. This will allow the system to then add the SDS to the University of Wyoming E-binder and help populate the Universities E-binder.

If you any questions or concerns e-mail UW Safety at uwehs@uwyo.edu.
