Consultant Qualtrics LTI

Topics for today's training

1. **What is Qualtrics LTI?**

    - How does it work? Where to find the app?

    - What can I use it for?

    - Available data fields

2. **Training**

    - Quick tour

    - Show example survey with embedded data

    - Survey settings & Labels

    - How to use a survey in a Canvas assignment

3. **User guides**

What is Qualtrics LTI?
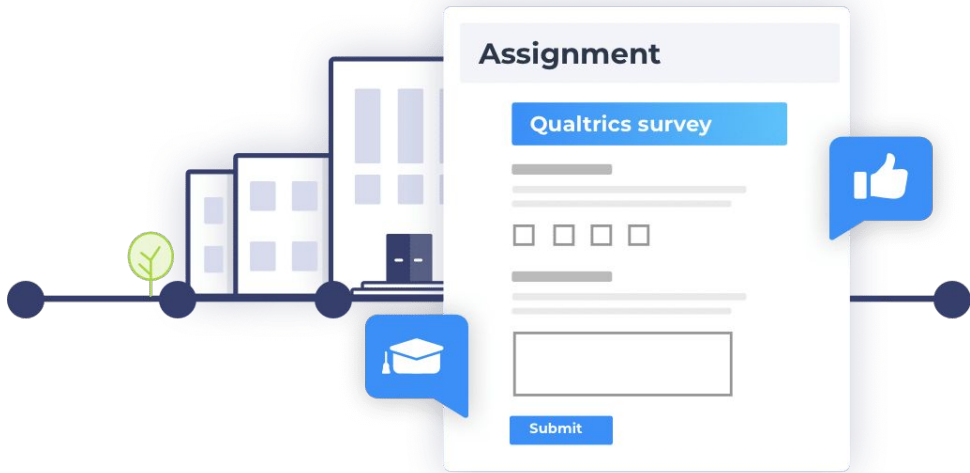

Qualtrics LTI seamlessly integrates Qualtrics into Canvas LMS, allowing Canvas users to **make Qualtrics surveys & evaluations part of the learning experience**.

How does it work?

3 Distribute survey in Canvas course as assignment

2 Link survey to Canvas

1 Develop survey in Qualtrics

4 Student completes survey within Canvas

6 Survey completion is registered in Canvas

5 Submission are stored in Qualtrics, reporting in Qualtrics
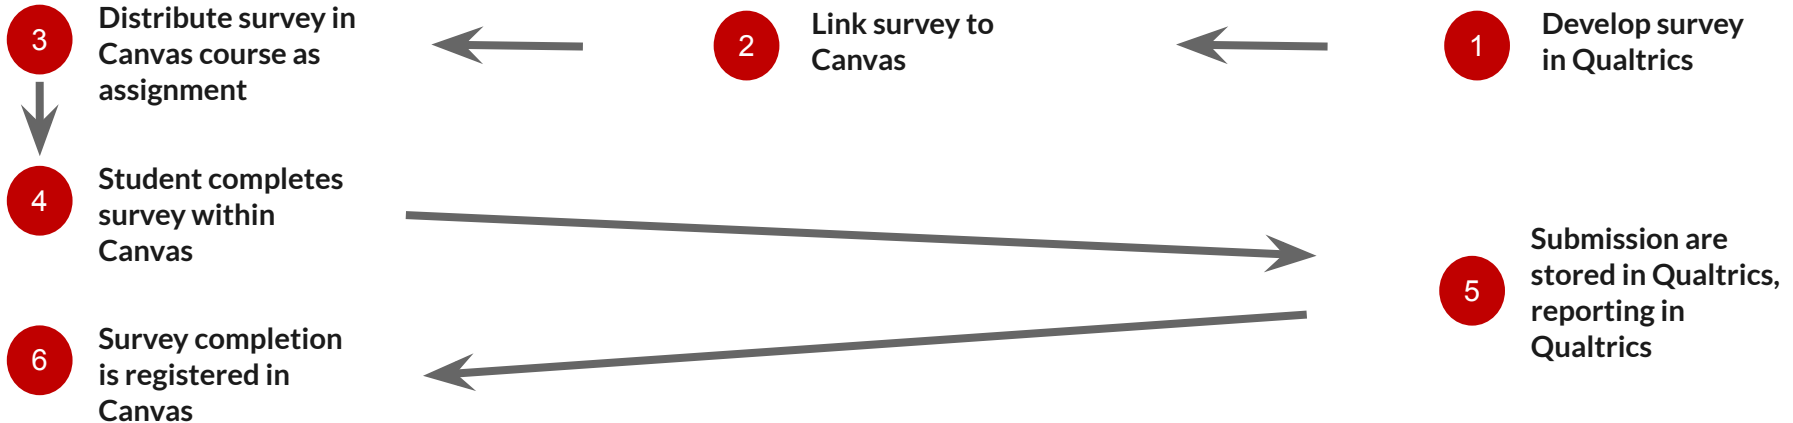

Where do I find Qualtrics LTI?

- Via your Canvas **'Account'** tab, accessible in the **global navigation** you'll find: **Qualtrics Integration**
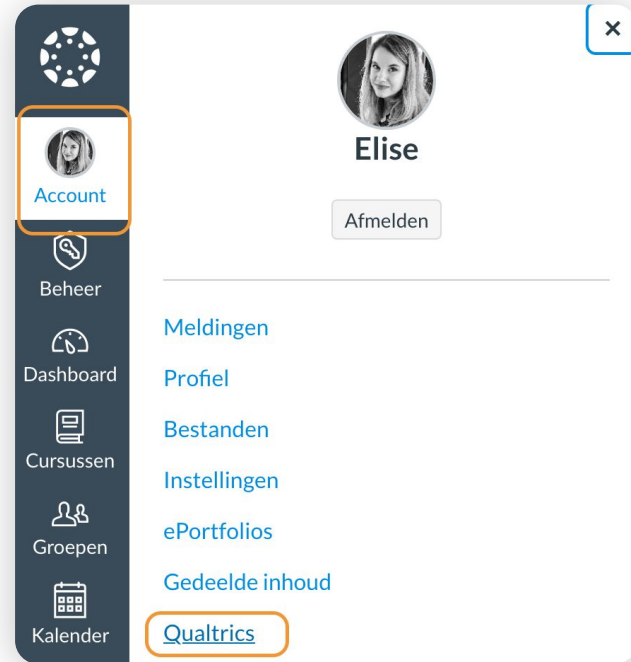

Use Cases

1. **Self and/or process reflections** where the teacher provides feedback

2. **Adaptive learning quizzes**

3. **Practice quizzes**

4. **Anonymous evaluations**

5. **Helpdesk questions** - form where students can ask questions

6. **(In-class) survey** for students to indicate which topics they struggle with

7. **Capture preferences** for available project topics

Use Cases in action

- A self reflection or form that requires feedback

    - *With submission, no grade and submission visible to both teacher and student*

- A form to ask questions (helpdesk style)

    - Questions are immediately redirected to the correct person

    - *No submission, no grade and submission not visible to teacher and student*

- A form to gather information on unclear topics to act upon before the course is over

    - Schedule extra session with only the participants or students that require it

    - Or simply ask what topics students want revised in classes towards at the end of the course

    - *With submission, max grade and submission visible to only student*

- Create a survey with branching to give a participant or student an indication of their progress and knowledge

    - *With submission, Qualtrics grade and submission visible to teacher and student*

- *Create a survey to capture preferences for the available project topics (or use it create groups)*

    - *With submission, max grade and submission visible to only student*

Available Data fields

Data directly pulled from Canvas which can you use in your surveys. Is the list complete?

*You can find an overview of the available data fields on the Qualtrics LTI **'Data fields'** page.*
