No.	Birth Weight	Weaning Weight	Yearling Weight	Milk	Marbling	Rib Eye Area	CHBS*
1	2.9	52	85	20	0.12	.33	24
2	5.4	56	85	22	- 0.05	.35	18
3	3.1	54	82	20	.07	.31	23
4	2.0	47	77	18	.09	.20	16
Breed Average	3.5	49	79	20	.05	.28	20

Rank these bulls for use in a commercial operation in Southwestern Wyoming. All progeny are retained, fed out and marketed on a Certified Hereford Beef grid. The bulls will be mated to both heifers and cows in large pastures.

*Certified Hereford Beef Index (CHBS)

2016 Wyoming State 4-H Livestock Judging Contest
Performance Wether Dams

No.	Date of Birth	Birth Type	Rearing Type	60 Day Weight	120 Day Weight	Scrapie Codon	Spider Codon
1	2/21	Twin	Twin	56	92	RR	NN
2	2/1	Twin	Twin	42	78	QR	NN
3	1/31	Triplet	Twin	54	86	RR	NS
4	2/15	Single	Single	62	96	RR	NN

These ewes are being considered as potential replacements for a progressive club lamb flock in Southeastern Wyoming. The owner would like to purchase a ewe to flush and produce embryos in an attempt to raise a new stud buck as well as replacement ewe lambs. This ewe will be mated to a nationally known buck from a reputable breeder that offers semen on a select few rams. Please rank these ewes in the order they should be selected to maximize profit potential of this operation.
