

\$4,000 STUDENT RESEARCH COMPETITION HYDROGEN PRODUCTION IN WYOMING

SIGN UP NOW

9H Research Foundation has teamed up with the School of Energy Resources to offer a research energy competition!

Students entered in the competition will spend the spring semester developing an energy project that will be judged at the end of the semester for a cash prize by a panel of judges comprised of UW energy experts.

This year's topics is a techno-economic analysis of different routes for hydrogen production in Wyoming through either underground coal gasification or hydrogen from solar.

DEADLINES

Declare participation in competition: **Jan 21, 2022**

Concept papers due: **April 15, 2022**

Winner selection and awards: **May 15, 2022**

Win a cash prize and public recognition!

First Place: \$2,000
Second Place: \$1,500
Third Place: \$500

COMPETITION ENTRY AND RULES

- *To enter, email the School of Energy Resources with your intentions to compete at psteger@uwyo.edu
- *Teams must be comprised of 2 members
- *The competition is open to both undergraduate and graduate students

School of
Energy Resources

9H Research Foundation is building a non-profit Solar Facility on the 9H Ranch outside West Laramie. Construction on the first 0.5MW will be complete in Spring 2022 & include the latest state-of-the-art thin-film Series 6 panels donated by First Solar. The 9H Foundation is focused on being a hub for innovation, engaging students with practical research, elevating UW, supporting students, and stimulating the Wyoming Economy.
