*"Oh the places UW can take you...
insights from a utility leader"*

MARNE
JONES

School of
Energy Resources

Marne is the Vice President of Electric Utilities at Black Hills Corporation and is an established leader with over 20 years in the utility industry. Her experience spans across electric operations, regulatory, finance and accounting. As the current Vice President of Black Hills Energy's Electric Segment, she has responsibility for their three electric utilities, independent power generation and coal mine businesses. Her strategic mindset and passion for leading continues to keep her challenged especially through the energy transition and current economic environment.

As a member of the North Central Electrical League (NCEA), RMEL and as an executive committee member at Elevate Rapid City she continues to broaden her influence and is a continuous learner. Marne also enjoys helping the next generation of leaders and has spent many years as a classroom volunteer for Junior Achievement South Dakota. Marne is a graduate of the University of Wyoming earning her degree in Finance and currently resides in Rapid City, SD with her husband and three children.
