

GAUSS\_Li ght\_8\_0\_Wi n32. txt

Please note that files can only be downloaded via a COMMAND LINE FTP, not a browser (such as Internet Explorer, Netscape, Firefox, etc.). You must use a command window to download the files. To open a command prompt window, click on Start, then Run, and type cmd.

GAUSS Li ght 8.0 for Wi ndows  
-----

Below is a list of files that you may wish to download and what each is:

GAUSS\_Li ght\_8.0\_Wi n. zip [GAUSS Li ght 8.0 software]  
GAUSS\_8.0\_Manual. zip [all documentati on zipped together]

Save the files that you download to either your root directory (usually C:) or a directory that you set up that has no spaces in the title; there can be problems saving the files to a directory such as C:\Documents and Settings\.

You *\*must\** know the name of the files you wish to download. DO NOT USE A BROWSER TO DOWNLOAD THE FILES. To download the necessary files via command line ftp, do the following at a terminal prompt:

1. Type the following at the ftp prompt:

```
ftp ftp. aptech. com
```

2. Once you are in the ftp. aptech. com site, type:

```
anonymous
```

then when prompted enter your email address as the password.

3. Type the following at the ftp prompt to get the files (ftp> represents the ftp prompt you should see, do not type that):

```
ftp> get  
(remote-fi le) /outgoi ng/GAUSS_Li ght_8.0_Wi n. zip  
(local -fi le) GAUSS_Li ght_8.0_Wi n. zip  
ftp> get  
(remote-fi le) /outgoi ng/GAUSS_8.0_Manual. zip  
(local -fi le) GAUSS_8.0_Manual. zip  
ftp> bye
```
