**November 10, 2017**

**Scorecard Key:**

**AS Degree >64 Hours**

A 2+2 plan is not appropriate since the path to graduation is likely to take more than four years because the associate's degree includes more than 64 credit hours. The two programs can be articulated, allowing students to move smoothly from the community college to UW, but students need to be aware of the extended time to graduation and the financial aid (Hathaway scholarship, federal grants, etc.) implications of that extension. Students can still earn the degree, just not through a defined 2+2 plan. Most UW degree require 120 – 128 hours for accreditation. Mechanical, computer, and electrical engineering degrees require 132 hours for accreditation and can't be completed in four years.

**Exploring Shared Program**

Program Leaders at UW and CCs are discussing whether a 2 plus 2 plan is feasible

**Final Stage**

Curriculum agreement has been articulated and is in place; signatures being sought.

**In Progress**

A 2 plus 2 plan is in the process of being developed, drafted, reviewed, or finalized.

**Plans in Process**

Community college has plans to develop curriculum in this area.

**No Shared Program**

Community college does not offer first two years of degree program

**Plan Completed**

A 2 plus 2 plan has been completed and a formal agreement has been signed.
