SUMMER INTERNSHIP ON PROGRESSIVE COW-CALF OPERATION NEAR CHADRON NEBRASKA

We are looking for an intern to work on a commercial cattle ranch this summer. This opportunity would consist of working with all aspects of the cow herd, sorting and moving cattle to summer pastures, synchronizing and A.I.ing our replacement heifers, cutting and raking hay, stacking bales, checking water for cattle, fencing and monitoring pastures for a rotational grazing program. Some knowledge of cattle and horses, along with operation of machinery would be helpful.

The ranch is located in northwest Nebraska. We run about 650 cow calf pairs, 250 yearling replacement heifers and have 1000 acres of dry land alfalfa and hay to harvest.

We are located 12 miles from a town with a population of 5000. We are about an hours drive from the Black Hills of South Dakota. Rapid City South Dakota which has a population of about 75000 is located about 2 hours away.

Wages would depend on experience. Housing can be provided. For more information e-mail lesranch@bbc.net or call in the evening 308-432-5230.
