**POSITION ANNOUNCEMENT**  
**Endocrinology**  
**Department of Animal Sciences**

**Position:**  Assistant Professor in endocrinology with expertise in epigenetics; tenure-track appointment in Department of Animal Sciences, School of Environmental and Biological Sciences, Rutgers, the State University of NJ, New Brunswick, NJ ([http://animalsciences.rutgers.edu/](http://animalsciences.rutgers.edu/))

**Responsibilities:** The successful candidate will be expected to (1) develop a vigorous, externally funded research program that focuses on endocrine control of health and disease with an emphasis on epigenetics. Research areas of interest include, but are not limited to, developmental programming of health and disease, environmental and toxicant dysregulation of endocrine systems, and investigation of endocrine disorders, such as obesity, diabetes, infertility and cancer including the normal physiology underlying these conditions; and (2) contribute to teaching in the Animal Sciences undergraduate program and the Graduate Program in Endocrinology and Animal Biosciences.

**Qualifications:** Ph.D. or equivalent degree in an appropriate discipline, relevant postdoctoral experience and a strong publication record. Preference will be given to candidates with interest in epigenetics as it relates to endocrine control of health and disease. The successful candidate will have an appreciation of systems-level integrative physiology and endocrinology that will complement one or more of the department’s emphasis areas in developmental biology, metabolism, neuroscience and reproduction.

**Application:** A single PDF that includes a cover letter, curriculum vitae, statement of research interests and teaching philosophy and the names and contact information for three references should be sent by email to endosearch@aesop.rutgers.edu. Questions can be directed to Dr. Carol Bagnell, Search Committee Chair, at bagnell@aesop.rutgers.edu or 848-932-6334. Review of applications will begin immediately and will continue until the position is filled.

**Proposed Start Date:** July 1, 2016

**Resources:** The Department of Animal Sciences is located on the Cook campus of Rutgers University in New Brunswick, NJ. Faculty research is focused on physiological mechanisms that regulate neuroendocrine and endocrine health with an emphasis on gene-environmental interactions using laboratory and domestic animal models. The Department is also home to the Rutgers Endocrine Program which promotes interaction between faculty across Rutgers including the Rutgers-Robert Wood Johnson Medical School, the NJ Institute of Food, Nutrition and Health, the Environmental and Occupational Health Sciences Institute and the Cancer Institute of NJ.

*Rutgers, The State University of New Jersey, is an Equal Opportunity/Affirmative Action Employer. Qualified applicants will be considered for employment without regard to race, creed, color, religion, sex, sexual orientation, gender identity or expression, national origin, disability status, genetic information, protected veteran status, military service or any other category protected by law. As an institution, we value diversity of background and opinion, and prohibit discrimination or harassment on the basis of any legally protected class in the areas of hiring, recruitment, promotion, transfer, demotion, training, compensation, pay, fringe benefits, layoff, termination or any other terms and conditions of employment.*
