re: Painting Parking Lines, Fraternity Mall

Dear Don,

Received your letter of October 27th with a copy of Senate Resolution #1459 enclosed.

While I appreciate what the Resolution intends to accomplish, I'm not in a position to help. My office has no funds for such work and no authority to direct an expenditure for such work unless it is in connection with a specific Capital Construction Project and included as a part of such a Project in its appropriation by the State Legislature.

However, I believe painting and re-painting parking lines, etc., falls under the jurisdiction of the Division of Physical Plant. Am guessing that both new lines and re-painting old ones on existing campus streets and parking lots are done by them under a fund or budget called "Street Maintenance." You might check with them to confirm this info though.

They may not have funds to do the work because when Governor Herschler announced budget cuts and freezes in August I seem to recall hearing or reading somewhere that our "Street Maintenance" funds were cut or frozen.

Another hurdle you may encounter, even if you find the funds, is the time of year. For most paint and painting you need about 70 degrees (F.) or warmer to get a good job that will last awhile. We may not see 70 degrees again until sometime next summer.

Am sorry that none of this falls under the heading of 'good news' because, as you know, I like to be positive and helpful, but I must be honest too.

Sincerely,

Morris C. Jones
 Univ. Architect
