8.56.010 Findings.
A. The Laramie city council does hereby find that:
1. Numerous peer reviewed studies have found that tobacco smoke is a major contributor to indoor air pollution and that breathing secondhand smoke is a cause of disease in healthy nonsmokers, including heart disease, stroke, respiratory disease, and lung cancer. At special risk are children, elderly people, individuals with cardiovascular disease, and individuals with impaired respiratory function, including asthmatics and those with obstructive airway disease.
2. Health hazards induced by breathing secondhand smoke include lung cancer, heart disease, respiratory infection, and decreased respiratory function, including bronchoconstriction and bronchospasm.
3. A significant amount of secondhand smoke exposure occurs in the workplace. Employees who work in smoke-filled businesses suffer a twenty-five to fifty percent higher risk of heart attack and higher rates of death from cardiovascular disease and cancer, as well as increased acute respiratory disease and measurable decrease in lung function.
B. Accordingly, the Laramie city council finds and declares that the purposes of the ordinance codified in this chapter are:
1. To protect the public health and welfare by prohibiting smoking in public places and places of employment; and
2. To guarantee the right of nonsmokers to breathe smoke-free air, and to recognize that the need to breathe smoke-free air shall have priority over the desire to smoke.
(Ord. 1439 § 2, 2004: Ord. 879 § 1, 1986).
