

**SUSTAINABLE DESIGN
AND RENEWABLE
TECHNOLOGIES**

For the Small Landowner

WORKSHOP IS FREE

Electric bills too high? Property too remote to bring in power lines? Just want to make your home more energy efficient? ***Come discover ways to make your existing or future home consume less energy and fewer dollars!***

- ◇ Explore renewable energy options available for WY homes: photovoltaic cells, wind turbines, and solar water pumps.
- ◇ Learn about landscaping to increase your home's energy efficiency, energy efficient design possibilities, and alternative building materials.

To sign-up or for more information, contact Terra Alpaugh or Kristin Sancken: 307-233-6755, kristin.sancken@wy.usda.gov

The University of Wyoming and the United States Department of Agriculture cooperate. The University is an equal opportunity/affirmative action institution.

***Tuesday August 14, 2007
