

New electronic resources added to *Barnyards & Backyards* Web page

A number of new electronic resources (publications, brochures, videos, etc.) have been added to the *Barnyards & Backyards* Web site (www.barnyardsandbackyards.com) "Resources" page!

These include new "Grazing Livestock on Small Acreages" brochures, which discuss grazing and provide guidance on how to calculate how many animals you can sustainably graze on land. These brochures, made possible through support by the Wyoming Private Grazing Lands Team, can be found under the "Forage/Pastures/Grazing" header.

The Web site is being updated for easier use to provide more interactive features. If you'd like to receive announcements on new publications, events going on in the state, and other cool items, visit the site to join our e-mail listserv!
