Abstract
There are many reasons for developing an accurate syllabus and daily schedule for each class. We investigate both the practical reasons for “why” as well as the mandated reasons (what the University Regulations say should be done). Examples are provided to demonstrate the spectrum of detail to consider, as well as a few “war stories” to fill in the discussion.

More Holistic Reasons for Syllabi/Schedules

From *The UW Handbook for Graduate Teaching Assistants*, by Prof. Emeritus Jim McClurg (out-of-print)

- The most important document for students is the course syllabus, not the course textbook.
- Think of the syllabus as the intellectual argument for the course.
  - When the students understand the argument, they have insights into the course and the instructor’s approach.
- The syllabus should help students use the textbook.
- Characteristics of good syllabi... 
  - Detailed precision.
  - Clearly stated course objectives.
  - A day-by-day schedule identifying specific reading assignments and due dates.
  - Clear statements regarding make-up dates, attendance, and grading standards.
  - Time identified when instructors are available.
The University Regulations

**UW Regulation 6-409 — Faculty Office Hours:** For the College of Engineering and Applied Science, a minimum of five hours per week, “open door” policy.

**UW Regulation 6-713 — Student Absence Policy:** Each instructor, at the beginning of the semester, must describe the attendance policy for each course.
