Civil Engineering Internship

The E-470 Public Highway Authority manages the construction, maintenance and operation of the toll road around the eastern portion of the Denver metro area. One of the few fully automated toll collection systems in the nation, we showcase the future of tollway administration.

The intern will have responsibilities in some or all of the following areas:

- Small scale highway projects. Assist with construction administration and supervision of small highway improvement or maintenance projects.
- Traffic control. Assist setting up lane closures and advanced construction zone signing.
- Road maintenance. Assist with routine roadway and structure maintenance duties. Make field visits to assess road infrastructure such as guardrail, signs etc., prepare work orders and supervise contractors as they repair or replace damaged assets.
- Annual Road Certification. Assist consultant performing field work to assess the condition of the toll road, bridges and buildings.
- Other duties as assigned. This may include assisting other departments such as Operations and IT in relation to installation and maintenance of toll collection equipment.

The successful candidate will gain useful working experience in civil engineering projects as well as an understanding of construction supervision and contract administration. The intern will be working under the direct supervision of a P.E. The internship begins mid-May and will end mid-August, depending on school schedules. The intern will be based in the HQ building located at 22470 East 6th Parkway, Aurora (E-470/6th Parkway interchange).

We prefer a 3rd year student in pursuit of a Civil Engineering, Construction Management or related technical degree.

Hourly Wage is \$15.50. This is a temporary position with no benefits. Tolls incurred while commuting to and from work will be reimbursed.

Interested candidates should submit a cover letter and resume to jkramer@e-470.com.
