- Help plan future project including development of owner scoping documents
- Assist in management of design consultants
- Develop order of magnitude construction estimates
- Assist in bid solicitation
- Perform construction observation
- Conduct safety walks of jobsites
- Aid in the development of construction management systems including cost databases, contracting strategy, and document control
- Monitor/update project schedules and budget
- Develop and present project status presentations to stakeholders
- Gain an understanding of Vestas construction standards

**Minimum Qualification:**

- Self-motivated with an ability to work independently and in teams
- Proficiency with Microsoft Excel
- Commitment to safety
- Good communication skills
- Willingness to occasionally travel between factory locations in Windsor, Brighton, and Pueblo, CO
- Valid driver's license

**Preferred Qualification:**

- Previous construction experience
- Working knowledge of modelling software including Revit and/or Civil 3D
- Microsoft Project proficiency
- High level of energy.
- MS Office proficiency
