You can always call (307) 742-5555 if having questions.

## **JOB OVERVIEW**

As a Junior Software Engineer at Handel you will be involved in developing the RiteTrack framework as well as industry solutions built using this framework. We develop on the .NET platform using several technologies including C#, Silverlight, and SQL server. We are looking for an excellent problem solver with strong work ethic and the ability to think outside the box. As a Handel Junior Software Engineer you are part of a small, cohesive, team of Engineers where each person's input is heard. As a company of under 30 employees, we offer an unparalleled atmosphere that is results driven and fast-paced, yet laid-back. As a Handel Junior Software Engineer you are not just working on the greatest technology platform in the human services industry, but you are also having a long-term positive impact on the lives of the clients that our customers serve. If you meet the requirements for this job and you want an exciting career working for a fast-growing technology company in a small college town, then this may be the job for you.

## **REQUIREMENTS**

Required Experience and Skills:

6 months or more experience producing production level code in C#

6 months or more experience working with Microsoft® SQL Server

6 months or more experience working with Microsoft® Visual Studio 2010 or later versions

6 months or more of experience working on a development team utilizing Agile Development software practices

3 months or more familiarity with .NET framework, specifically version 4.5 or later

Client/server or web services application development, familiarity with Silverlight and web standards including HTML, CSS, JavaScript, and XML

Ability to read and understand technical design documents written in the English language

Ability to work in a team environment

Ability to work independently and provide accurate estimates of completion of tasks to maintain the Agile Development implementation strategy

**Currently pursuing or achieved a Bachelor's of Science in Computer Science similar field.**

## **Responsibilities:**

Writing of C# code including but not limited to the ability to produce production level code, review existing code written by other Engineers, and troubleshoot code utilizing Microsoft Visual Studio 2010 and later versions.

Utilize Team Foundation Server as our code source safe including following establishes policies for checking out, checking in, and quality control.

Write with proficiency in T-SQL, including but not limited to ability to create, update, insert, and delete items from database. Write T-SQL queries within C# code, and troubleshoot T-SQL in general.

Ability to gain within one year a Microsoft® MCSD: App Builder certification (paid for by Handel IT)

## **COMPENSATION AND BENEFITS**

Competitive salary based upon qualifications and experience
