

Language I/O is looking for a entry level **Software Developer**, at **Cheyenne, WY**.

Company: Language I/O

Position: Software Developer

Job Type: Full Time

Location: Cheyenne, WY

Job Description:

The position requires at least three days a week working at our offices in Cheyenne. Provided that the applicant has verifiable experience working remotely, we can allow this individual to work from home the remaining days in cases where the applicant does not live in or near Cheyenne.

This position requires not only software development and OS-level scripting skills but also people skills. The position will involve interfacing with clients on the operations side as well as writing code. Operational duties will include meeting with clients to understand and document project requirements and using LinguistNow tools to automate the transfer of FAQ content from client CRM systems into our translation system and back again.

Minimum Qualification:

- Bachelor's Degree in Computer Science or a related field or equivalent in work experience

Preferred Qualification:

- Java software development
- MYSQL (or other RDMBS) DB administration and development
- UNIX/LINUX-flavor server administration
- Version control platforms such as git, svn, etc.

Nice-to-have Skills:

- JEE server development
- REST/SOAP API development
- AJAX, JQuery Javascript frameworks
- HTML, CSS
- .NET Windows Application development

How to Apply:

Submit your Resume and LinkedIn profile url to Heather Shoemaker at heather.shoemaker@languageio.com
