

The **National Renewable Energy Laboratory (NREL)** encourages undergraduate students to participate in internships in renewable energy and energy efficiency technologies by providing paid research experiences at NREL. Students work under the guidance of laboratory staff scientists or engineers on world-class research projects.

The **Science Undergraduate Laboratory Internship (SULI)** program encourages students to pursue science, technology, engineering, and mathematics (STEM) careers by providing research experiences at the Department of Energy (DOE) laboratories. Selected students participate as interns appointed at one of 17 participating DOE laboratories/facilities. They perform research, under the guidance of laboratory staff scientists or engineers, on projects supporting the DOE mission.

The SULI program is sponsored and managed by the DOE Office of Science's, Office of Workforce Development for Teachers and Scientists (WDTS) in collaboration with the DOE laboratories/facilities.

Applications for the SULI program are solicited annually for three separate internship terms. Internship appointments are 10 weeks in duration for the Summer Term (May through August) or 16 weeks in duration for the Fall (August through December) and Spring (January through May) Terms. Each DOE laboratory/facility offers different research opportunities; not all DOE laboratories/facilities offer internships during the Fall and Spring Terms.

Applications are open for the 2018 Spring Term and are due by October 2, 2017, at 5:00 PM ET.

How to Apply:

Apply online at <https://science.energy.gov/wdts/suli>
