**Position:** System Architect

**Job Description:**

A RuleTek System Architect will be responsible for analysis, design, and development of Pega (PRPC) solutions for our clients. We are looking for highly motivated, outside-the-box thinkers with the desire to continuously improve themselves and others. Our firm's success relies on our ability to find unique ways to deliver more efficiently and to make those around us better, faster, and smarter.

- Work as part of a team to design, build, and support BPM applications for our clients
- Work independently on technical and business tasks
- Analyze user requirements
- Develop system features and functionality out of user requirements. Designs and develops user interfaces
- Follow design methodologies, completing applications using languages and software products.
- Design and conducts test scripts
- Recommend system solutions by comparing advantages and disadvantages
- Complete applications development by coordinating requirements, schedules, and activities.
- Contribute in team meetings.
- Troubleshoot development and production problems across multiple environments and operating platforms
- Support users by developing documentation and assistance tools
- Enhance organization reputation by accepting ownership for accomplishing new and different requests
- Work on self-improvement by taking training and studying to take the next certification

**Minimum Requirements:**

- A positive attitude, self-motivated with a thirst for knowledge
- Good communication and interpersonal skills
- Experience with Object Oriented Design
- BA/AS in Computer Science, Information Systems or related technical degree / education
- Knowledge of SQL, XML, REST, SOAP, Java or C#
- Ability to travel
