Data Incubator

If you're in a master's or PhD program and are looking for guidance to get into an industry career as a data scientist, the Data Incubator can help! The intensive, eight-week fellowship prepares masters students and above for an industry career. To apply and get more information, go to Data Incubator's [site](#).

Montana State University Research Experience!

For computer science and engineering undergrads considering grad school: through a National Science Foundation grant, the Montana State University is hoping to fill positions in its summer program in Research and the Development of Algorithms in a Software Factory. The program would last over 10 weeks, and include a \$5000 stipend, access to state-of-the-art research facilities, faculty-student mentoring and regular weekend outings and social events. Located in Bozeman, MT, MSU is close to awesome outdoor recreation and Yellowstone National Park.

Interested? **Applications close on March 21.** Go to this [link](#) to get more information or apply.

Job and Internship Opportunities Sent-in From Employers

GW Mechanical, Inc.

Position: Full-time

Location: Laramie, WY

Major: Engineer with experience in HVAC and MEP drafting

Application Deadline: ASAP

Minimum Required GPA: None

If you have your degree and want to stay in the Wyoming area, GW Mechanical may have a position for you. The Casper-based company is looking for a project manager assistant for various mechanical jobs, estimation, 3D coordination and O&M's. At least an Associate's degree or equivalent experience in drafting and design is required, and you must be over the age of 21. Knowledge and experience in AutoCAD, Revit and Excel is essential. GW Mechanical, Inc prefers candidates with some construction background who are well socialized, but can maintain a high attention to detail and level of organization.

Rate of pay is \$3,500 and up.

If you're interested, please submit your resume to gw@gwmechanical.com. For a copy of the job description, go to <http://www.uwyo.edu/ceas/resources/student-services/jobs/index.html> and look at the grid/list of *Recent Jobs and Internships* located part-way down the page.

Aecom

Position: Full time

Location: Colorado Springs, CO

Major: Architectural or Civil Engineer

Application Deadline: N/A

Minimum Required GPA: None

Aecom, one of *Fortune Magazine's* "Most Admired Companies" is searching for a "highly motivated" recent bachelor's graduate to begin immediate employment as a Structural Project Engineer. The position would entail projects including new building design and analysis; design of water and waste-water pump stations; and structural analysis and evaluation of existing structures, among others. As a Structural Project Engineer, you would be responsible for providing design advice and assistance with site selection, design and drawings. You would also provide consultation for facilities and contribute to a variety of design policies and construction projects.

A bachelor's degree with an emphasis in structural engineering is a minimum requirement. You must be a US citizen. A knowledge of Autocad and Revit is required as well as an understanding of "general structural engineering mechanics and material properties." Passing the FE is preferred.

Apply on Aecom's site [here](#).

Job and Internship Opportunities from Handshake

Peak Reliability

Position: Full-time employment
