

UW INBRE UNDERGRADUATE RESEARCH FELLOWSHIPS for SPRING 2017

APPLICATIONS DUE 5 PM on FRIDAY FEBRUARY 3, 2017

GO TO: <http://www.uwyo.edu/wyominginbre>

**Links to application materials and instructions for UW undergraduates.
All application materials are to be submitted online.**

The Idea Network for Biomedical Research Excellence (INBRE) program is funded by the National Institute of Health (NIH). Every Spring, Summer and Fall semesters, the Wyoming INBRE program at UW puts out a Request For Applications (RFA) for an INBRE undergraduate fellowship to all UW undergraduate students wishing to engage in biomedical research. Each semester, the INBRE program offers 10 Undergraduate fellowships. Fellowships for fall and spring are \$800 (80 hours at \$10/hour) and summer fellowships are \$4500 (450 hours at \$10/hour). All hours must be completed during the award period.

INBRE undergraduate fellowship applicants must submit research proposals that deal exclusively with biomedically related questions and experimental research that seeks to improve human health.

Please direct questions to:

Scott Seville (WY INBRE Program Director)
Phone: (307) 268-2543
