Graduating CVLE and/or ArchE engineers:

Beaudette Consulting Engineers, Inc. in Montana need to hire for entry level engineer positions in their Bozeman and Missoula Montana offices. This is Montana's biggest and best structural engineering firm.

Students with questions can contact Mark Leppert (recent UW graduate) with questions at markl@bceweb.com or submit an application per the instructions below.

Duties include structural design and engineering.

Responsibilities include:

- Perform structural design calculations for new and existing buildings
- Assist in preparation of structural drawings and specifications
- Observe construction work in progress
- Assist in preparation of reports

Qualifications should include:

- 0-3 years of experience in structural engineering of buildings
- Bachelor's Degree in Civil/Structural Engineering required, Masters in Structural Engineering strongly preferred
- Successful completion of Fundamentals of Engineering exam
- E.I.T./E.I. license or ability to achieve within 6 months of hire
- Experience in structural analysis and design including wood, steel, concrete, and masonry design
- Ability to work independently and in teams
- Ability to effectively manage time and prioritize tasks
- Excellent oral and written communication skills

To apply, submit application to hrdirector@bceweb.com.
