Senior Technician/Engineer

Western Research Institute is seeking a motivated individual with strong mechanical skills to support heavy oil technology research.

Position will assist with the operation, maintenance and modification of a pilot-scale research facility to ensure accurate and reproducible test results. Perform maintenance on all systems, make modifications to enhance operability, collect and enter data into computers during test runs and assist professional staff in the monitoring of all systems.

Must have an understanding of mechanical systems and experience using tools. Associate’s degree or training from a trade school and one to three years’ experience demonstrating these skills or equivalent are required. Flexibility in working hours due to need for shift work and computer software experience (excel, word) are necessary.

Submit resume and application form by August 29, 2016 to Human Resource Manager, Western Research Institute, 3474 N. 3rd Street, Laramie, WY 82072. Application materials are available at www.westernresearch.org

WRI is an Equal Opportunity/Affirmative Action Employer
