Wyoming NASA Space Grant and the UW Department of Chemistry are offering summer research fellowships for students from community colleges in summer 2016! The fellowships provide students a unique opportunity to work in a research lab with a professor or graduate student mentor. This is a great opportunity to become familiar with the UW campus, meet other students from around the state and the country, and to get real-life, hands-on research experience!

Features

• Spend ten-weeks working in a University of Wyoming research lab under a faculty or graduate student mentor!
• Chance to participate in the NASA Community College Aerospace Scholars (NCAS) program!
• Optional extra-curricular activities such as a trip to Yellowstone/Tetons, a visit to the National Renewable Energy Lab (NREL), a Colorado Rockies Baseball game, and more!
• Apartment-style living accommodations (private room/bathroom with communal kitchen and living space)!
• $4500 stipend for the summer, plus $200 for travel and $900 for meals

Eligibility

• Must be a community college student; preferably from Wyoming, although students from around the country are welcome to apply.
• Must be able to come to Laramie, Wyoming for ten weeks during the summer of 2016; from May 23 - July 29 (Housing provided!)
• Must be majoring in a science or engineering field.

To Apply

• For more information, visit http://wyomingspacegrant.uwyo.edu/CCREU.asp or http://www.uwyo.edu/chemistry/undergraduate/reu.html
• Fill out the online application found at either of the above websites (which includes a statement of interest, transcripts, and general applicant info).
• Arrange to have two letters of recommendation sent on your behalf directly to the program coordinator by email (megdiane@uwyo.edu).

Deadline: March 18, 2016
