CONSTRUCTION MANAGEMENT

ONE OF UW'S FASTEST GROWING PROGRAMS

Construction Management at the University of Wyoming is an exciting, new degree program offered through the Department of Civil and Architectural Engineering and Construction Management. Experience a state-of-the-art program that is tightly connected with industry experts. The Construction Management occupation is one of the fastest growing in the United States. We prepare future leaders capable of completing in and driving technological advancements in construction industries.

WHAT DO

CONSTRUCTION MANAGERS DO?

- Manage construction projects from inception to completion across public, residential, commercial and industrial domains.
- Create projects schedules and manage construction budgets.
- Create and manage construction cost estimates.
- Direct multi-disciplinary teams.
- Oversee construction safety on job sites.

EARN INDUSTRY RECOGNIZED

CERTIFICATIONS

Several courses allow students to obtain various industry recognized certificates as part of their degree experience, including but not limited to: **OSHA, LEED, DBIA and the Associate Constructor certificate.**
