

Thank you for your interest in our graduate programs.

We offer programs leading to Master of Science and Doctorate degrees in Civil Engineering. We currently have faculty with expertise in Architectural Engineering, structural engineering, geotechnical engineering, environmental engineering, transportation engineering and water resources engineering.

A Master of Science in Environmental Engineering is available in cooperation with the Department of Chemical and Petroleum Engineering. This interdisciplinary degree offers students an engineering perspective for solutions to unique environmental problems and is open to BS students in engineering, chemistry, and biological sciences.

The Department also offers an interdisciplinary degree in Water Resources. The core of this degree is in Civil Engineering with supporting coursework from the College of Agriculture.

Financial support for qualified graduate students is available mainly in the form of research and teaching assistantships. The University of Wyoming waives all tuition and fees for all graduate assistantships. All assistantships require course work and research activities that are usually coincident with the MS thesis or Ph.D. dissertation topic.

Admission is open to all students holding a bachelor's degree with at least a B average from an accredited engineering curriculum and having achieved a combined verbal and quantitative score of at least 900 on the GRE (1000 for Ph.D.) and a minimum score of 40% on the verbal portion of the GRE. International students must achieve a score of 550 on the paper-based TOEFL with a minimum of 58 on section I, a minimum TOEFL iBT of 76, or an IELTS minimum score of 6.0. Doctoral applicants are reviewed with regard to stated interests and objectives and the ability of the Department to provide a quality experience for the applicant.

Our preliminary application process is very easy. Simply complete the Preliminary Information Form and e-mail (Murynowi@uwyo.edu), fax (1-307-766-2221) or mail it to us (see our website for address). Your information on this form will allow us to make a preliminary assessment of your qualifications prior to completion of the Application for Admission to Graduate School. *There is no charge for submitting the Preliminary Information Form.* In addition, we may attempt to contact you by phone to review your interests and our program.

You may wish to learn more about the University of Wyoming from our home page on the World Wide Web <http://www.uwyo.edu/>

Sincerely,

Michael Urynowicz
Graduate Studies Coordinator
