Josef Pohl to present a poster at ICFP 2008 in Victoria, B.C.

Josef Pohl will present his poster Monadic Programming through Program Extraction at ICFP 2008: The 13th ACM SIGPLAN International Conference on Functional Programming to be held in Victoria, British Columbia, Canada on September 22-24. Joe’s talk will explain how to extract monadic code from formal proofs. Joe is a Ph.D. student in the Computer Science at the University of Wyoming and is working on extracting programs from proofs in constructive type theory.
