WHY UW?

- Continuing UW engineering students and high school seniors are offered more than 275 merit-based scholarships each year.
- Approximately 90% of CEAS courses are taught by tenured faculty, with graduate students assisting in the labs.
- The small size of the college, a student-faculty ratio of 20:1, and an average class size of 25 provides great hands-on learning and the opportunity to participate in undergraduate research.
- Fall and spring career fairs are attended by 50-60 local, regional, and national employers/organizations hiring UW engineering students for internships and positions upon graduation. Upon graduation about 55% of graduates have a job in their chosen field, at 3 months 75%, and 6 months 90%.
- UW College of Engineering and Applied Science (CEAS) seniors consistently pass the Fundamentals of Engineering Exam with scores 5-12% above the national average.
- Three UW residence hall floors with a computing laboratory house approximately 150 students and are designated for engineering students only.
- With more than 250 recognized student organizations, UW offers a wide range of opportunities to fit your interests and needs. Engineering students can choose to become involved in IEEE (Institute of Electrical and Electronics Engineers), TBP (Tau Beta Pi), SWE (Society of Women Engineers) and many more.
- The International Engineering Club, along with Engineers without Borders-Wyoming, was formed to facilitate students interested in study abroad, international internships or international service.

Electrical and Computer Engineering Faculty

John E. McInroy - Department Head
Ph.D., Rensselaer Polytechnic Institute, 1991

Jeff Anderson
Ph.D., University of Wyoming, 2004

Steven F. Barrett
Ph.D., University of Texas, 1993

Dongliang Duan
Ph.D., Colorado State, 2012

Eva S. Ferre-Pikal
Ph.D., University of Colorado, 1996

Jerry C. Hamann
Ph.D., University of Wisconsin, 1993

Robert F. Kubichek
Ph.D., University of Wyoming, 1985

Suresh Muknahallipatna
Ph.D., University of Wyoming, 1995

Domen Novak
Ph.D., University of Ljubljana, 2011

John O’Brien
Ph.D., Rensselaer Polytechnic Institute, 2001

John W. Pierre
Ph.D., University of Minnesota, 1991

Jon M. Pikal
Ph.D., Colorado State University, 1999

David Whitman
Ph.D., University of Wyoming

Cam Wright
Ph.D., University of Texas, 1996
The ECE Department at UW offers electrical engineering, computer engineering and a bioengineering option of electrical engineering. There is frequent opportunity for undergraduates to participate in research projects. ECE faculty members maintain a flexible open-door policy, making them extremely accessible to students. The qualifications of the ECE faculty members are excellent, with many in leadership positions in national and international organizations, several are textbook authors and all are active in their respective specialties. The department has well-equipped laboratories, offers free access to computer systems running software needed for studies, maintains small class sizes and provides a friendly, supportive environment for students.

Find out more at uwyo.edu/electrical

### Three Concentrations

**Electrical Engineering**—Provides depth of understanding necessary to meet the challenges of ever-changing technology and allow students to pursue comprehensive study in at least one specialization area of electrical engineering.

**Computer Engineering**—Similar to the electrical engineering program, but emphasizes computer-related technology.

**Bioengineering**—Applies the techniques of electrical engineering to problems of environmental science, wildlife studies, biology and medicine.

### Degree Programs

- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Electrical Engineering with Bioengineering Option
- Master of Science in Electrical Engineering
- Doctor of Philosophy in Electrical Engineering
- BS/MS Quickstart Program Electrical

The January 2014 Salary Survey reports computer engineering as No. 2 in average starting salaries.

### Careers in Electrical and Computer Engineering

For almost any area in which you might want to work (energy/power, aerospace, automotive/transportation, computer networks, robotics, satellite and cellular communications, music/video special effects, software design, microcomputers, biomedical instruments/imaging, electronic devices and many others) you’ll find that electrical and computer engineers make up a significant part of the team. Nearly 100 percent of our graduates have job placements or have been accepted to graduate school.

Forbes ranked biomedical engineering the most valuable college major. There is a projected 62 percent growth rate for the time period of 2010-2020 in this field.
