Learn how to integrate Ecology, Hydrology, and Geophysics
to study how water moves through a system!

What you can expect: You will be out in the field exploring a high elevation mountain environment near Laramie, Wyoming. You will learn how to use cutting-edge tools, and combine disciplines to ask and answer complex question. This course is designed for students who will be entering into their junior or senior years of college. This class is also recommended for grad students affiliated with WyCEHG.

To Apply: To be eligible, you must be enrolled as a student in an EPSCoR state or attend a Historic Black College or University. We will begin to review applications April 14, 2016.

Application available here: https://form.jotform.com/EPSCoR/EHG

Funding: There are a wide range of grants available for students based on need, merit and interest. Students are eligible for coverage of travel, room and board accommodations at UW. University of Wyoming students are eligible for coverage of course credit expenses.
