Excerpt from Essay

I've realized after being in college for almost a full year that everyone will have a different experience and everyone's on their own path to get where they want to be. The experiences that I have had this year that have helped me integrate into the UW campus community is first all the people I've met. I have met so many people and talked to so many different people. I learned that not everyone knows

what they want to do for the rest of their life right at Freshman Year. I've also realized that everyone struggles and even though it may seem that I am the only one having difficulty in class, someone probably is too. Another experience that has helped me into the campus community is being a part of 7220 Entertainment. I have met so many people, all with different majors but yet we all come together to create fun

events for students. I have learned so much from that club and experienced so much that I would have never thought to learn in college.
