

Sophomore Scholarship Winner

Cheyenne Dilley

Grade:	Sophomore
Major:	Political Science
Hometown:	Gillette, Wyoming
Synergy Classes:	FYS: Learning, Knowing, Being
Goal after College	To go to Law School

Excerpt from Essay

Being a part of the synergy program was an amazing experience and it made my transition from high school to college a lot easier. One of my favorite activities we did in Synergy was writing a five-page paper on whatever we wanted and everyone shared something personal. You got to know the people in your class better and it made the class not feel like a class anymore. To me a class is going into a room full of stranger where you might know one or two people. Slowly over the course of the semester my synergy class turned from a class to a community. We all were learning about each other, making friendships, waving or smiling at someone when you see

them outside of synergy. Having a community to go to instead of a class made my transition a lot better. College will be a positive impact on my future, I might not think it's a positive impact currently but it will most definitely impact my future. Going to the University of Wyoming and getting a bachelor's degree in Political Science will positively impact going to Law School. As well, it will help me work harder in the future and it will be an accomplishment that I can be proud of. Being a part of the synergy program has been an amazing and life-changing experience. I wish everyone could be a part of the synergy program. I will never forget

the memories, friendships and life-lessons I learned with being a part of the synergy program. Thank you for letting me be a part of such an astounding program and making the transition from high school to college easier.

My first year of college has been exciting, stressful, nerve-wracking and has had ups and downs. I am excited to no longer be a freshman but it's a little scary becoming a sophomore.
