

Fueling Before Practice

Teenage athletes need enough calories to maintain their growth and an additional amount to accommodate their working muscles. Spreading meals throughout the day is a good way to get the fuel teens need.

Plan meals around carbohydrates and protein. Good food choices include:

- Peanut butter and whole-grain bread.
- Sliced turkey in a whole-wheat pita.
- Whole-wheat pasta topped with baked chicken.
- Scrambled eggs and whole-wheat toast.
- Sliced apple and peanut butter.
- Trail mix with dried prunes, raisins, almonds, cashews, and peanuts.
- Granola bar and apple, banana, or orange.
- Whole grain crackers, chopped broccoli and cauliflower, and hummus.
- Shredded carrots, raisins, granola, and low-fat yogurt.
- Oatmeal with blueberries, strawberries, and almonds.
- Peanuty energy bars (recipe provided) and banana, orange, or apple.

Add fruits, vegetables and dairy foods to all meals and snacks to round out the nutritional benefits and training needs.
