Knowledge of:

• Computer technology and network and system architecture.
• Network security and firewall design.
• Specialized computer or other applicable devices, peripherals and equipment.
• Applicable University, state and federal regulations, policies and procedures.
• Network and system designs, structure, and configurations.
• Intrusion detection methods and techniques.
• Incident handling and reporting procedures and techniques.
• UNIX security methods, techniques and procedures.
• Development of security policy (ies).
• Investigative methods.
• Effective communication methods and procedures.

Skills and Abilities to:

• Develop and write policy (ies) affecting computer network and systems security.
• Effectively communicate clearly and concisely, both orally and in writing.
• Analyze, pay attention to detail, and troubleshoot problems.
• Recognize security breaches to network systems.
• Discover network users involved in illegal activities (copyright violations, virus infections, etc).
• Work within a large enterprise environment.
• Investigate problems and resolve conflict effectively.
• Work under time pressures, exhibit flexibility and adapt to change.
• Identify and solve business problems.
• Function both as a team member and work independently.

WORKING CONDITIONS:
Standard office environment; constant repetitive keyboarding and video terminal display exposure, regular
visual concentration at close proximity to computer screen; occasional exposure to electrical or mechanical
hazards.

DISTINGUISHING FEATURES:

**Network Security Analyst:** Works under limited supervision, assisting with the implementation of the
University's network and systems security policy, standards, guidelines and procedures, and assists with
discovery of and responses to security incidents and investigations of security breaches, as directed.

**Network Security Analyst, Senior:** Works under very limited supervision, making security
recommendations and implementing the University's network and systems security policy(ies), standards,
guidelines and procedures, discovers and responds to incidents of security breaches, investigates security
breaches, assists with disciplinary and legal matters, and assists with working with outside consultants.

**Network Security Analyst, Executive:** Manages and oversees the functions within this area, including
supervision of support staff, managing outside consulting work, managing the discovery, investigations, and
responses to security incidents and security breaches.

Authorized by Classification/Compensation, Human Resources

Employees may be requested to perform job-related tasks other than those specifically presented in this
description. Participating in the University's hazardous waste minimization program is part of the job of each
employee who uses (or may come in contact with) hazardous materials. Fair Labor Standards Act
(exempt/non-exempt) is designated by position. University of Wyoming actively supports Americans with
Disabilities Act and will consider reasonable accommodations.
