

CHS Travel Grant 2015

Wallhead, T. (\$750/yr/1yr). A didactic analysis of content development during Cooperative Learning. (Madrid, Spain)

Conference:

International Association of Physical Education in Higher Education (AIESEP)

Location:

8th-11th July, 2015, Madrid, Spain

Type of Presentation:

Oral Symposium

Outcomes

I received a CHS Faculty SEED Research Grant in 2011 to support my sabbatical work in Auckland, New Zealand in Spring 2012. This work involved the professional development of Elementary teachers' implementation of Co-operative Learning strategies with students in physical education. This presentation is a result of part of the data I collected during that project. The money awarded through the CHS Travel Grant facilitated my presentation of this data as part of a symposium on "Student interaction during physical education" at AIESEP international conference, 2015 in Madrid, Spain.

My data was subsequently included as one of the manuscripts of a special issue of "European Physical Education Review" which addressed this topic.

Wallhead, T. L., & Dyson, B. (2016). A didactic analysis of content development during Co-operative Learning in primary physical education. *European Physical Education Review*. DOI: 10.1177/1356336X16630221

This symposium also initiated a collaborative manuscript that was recently accepted to be published in the Journal of Teaching Physical Education:

Barker, D., **Wallhead, T. L.**, Goodyear, V., Brock, S., & Amade-Escot, C. (in press). Group work in physical education: Exploring the interconnectedness of theories and practice. *Journal of Teaching Physical Education*.
