

**KIN/HLED - 4015 INTERNSHIP  
KIN/HLED 4016 - RESEARCH EXPERIENCE**

**REPORT 1**  
**DESIRED GOALS AND EXPECTATIONS**  
(at least TWO typed pages, single spaced)

The Internship/Research Experience should help you meet your professional goals. However, **YOU** need to develop a clear definition of those goals, specifying what you would like to achieve with your experience. This will not only enrich your experience, but it will also provide your Site Supervisor with information on what you expect from the experience.

**Part I**

Please describe your short term and long term goals and expectations of this experience. Be as specific as possible, including exactly what you expect to learn and how much time you'd like to spend on each goal. Use the following questions to spark your thinking as to some possible things you may address.

- What kinds of modalities or equipment would you like to experience or operate?
- What new skills, exercises, manipulations, etc. would you like to learn or be a part of?
- What administrative duties would you like to be a part of (i.e. staff meetings, patient charting and progress reports, record keeping, etc.)?
- Keeping in mind the skills and knowledge you have learned from your classes, how can you apply these to your internship/research?
- What things do you NOT want to participate in?

**Part II**

Please answer ALL of the following questions related to your internship site.

- Why have you chosen this site?
- What are the philosophy and/or mission statement of the facility?
- Have you reviewed the policies and procedures of the internship/research site? Do you see anything that may warrant further explanation?
- How does this experience relate to your future profession?
- How can the site supervisor help you meet your goals and expectations?
- What are your impressions of the first two weeks of your internship/research experience?
