Pre-professional student should consult with advisor about appropriate elective coursework

<u>COURSE</u>	<u>TITLE</u>	<u>CR</u>	<u>SEM/YR</u>
	 	_	

JUNIOR-SENIOR YEARS (60 credit hours)

Only students who meet KIN 3021 entrance/pre-requisite requirements may complete 3000/4000 level KIN/HLED coursework and move forward in the last two years of the K&HP Professional Program. Exceptions to this policy that may be completed prior to meeting KIN 3021 entrance/pre-requisite requirements are: HLED 3020, HLED 4005, HLED 4020, HLED 4030, KIN 2050, KIN 3050, and KIN 3060, KIN 4090; only nine (9) credits from this list may be completed prior to entrance into KIN 3021.

Degree Requirements: 120 Credit Hours - to include 48 Credit Hours of 3000-4000 Level Coursework

K&HP UPPER-DIVISION PROGRAM CRITERIA

To be eligible to enroll in upper division coursework as part of the Kinesiology and Health Promotion (K&HP) program and to enter the program gateway course (KIN 3021/3022), the coursework listed below needs to be completed with a minimum 2.75 GPA¹ (preferred 3.00). With the guidance of your advisor, you will determine if you have completed the appropriate coursework in order to move on to the upper-division coursework in your junior and senior years of the K&HP program.

K&HP Program Criteria

1. Minimum GPA¹ of 2.75; Preferred 3.00

 Successful completion of: CHEM 1000 or 1020; ENGL 1010; FCSC 1141; HLED 1006; KIN 2040; KIN 2041; LIFE 1010; MATH 1400 or 1405 or 1450; PHYS 1050 or 1110; PSYC 1000; STAT 2050 or 2070; USP 2015 COM2; USP 2015 FYS; USP 2015 V; ZOO 3115; and 9-13 credit hours of elective coursework.

<u>Please note</u>: In addition to the minimum GPA¹ requirement of 2.75, enrollment in KIN 3021 (Physiology of Exercise) requires a grade of C or better in: Math, Anatomy, and Human Systems Physiology courses. Students who receive grades lower than a C in these courses will not be allowed to enroll in KIN 3021.

¹ GPA may be UW, transfer, or combination. UW GPA is the default but in borderline cases the Division Director or Professional Advisor may use the transfer GPA or grades earned in key courses from transfer institutions.

Elective Coursework (continued) ...

Elective Coursework (minimum of 17 credit hours - 5 credit hours MUST be at the 3000-4000 level)

Students must complete an additional 17 credit hours of elected coursework at the 1000-4000 level beyond the credit hours listed under FRESHMAN-SOPHOMORE YEARS. <u>This must include at least five credits of upper division coursework</u> (3000 or 4000-level courses) to meet the Division's minimum 48 credit hour requirement for the B.S. Degree in K&HP.

CPR Certification requirement

Complete the CPR requirement through a community college course or through the American Red Cross or through the UW Half Acre or through any other organization nearest you. Certification needs to be completed and current through the entire program. Present your card to the division registrar in Corbett 119 to be cleared of the requirement on your degree evaluation.

CPR Certification	Expiration Date	
	Agency (e.g., American Red Cross)	

Internship or Research Experience (6-12 credit hours)

NOTE: Student Criminal Background Check – This <u>must</u> be completed the semester *prior to* enrollment in KIN/HLED 4015 or 4016.

NOTE: You must be CPR certified prior to starting your internship/research experience. Standard CPR certification may be met through American Red Cross, UW Half Acre, or a community college class.

Students must complete an internship experience (KIN/HLED 4015) or research experience (KIN/HLED 4016) as part of the Kinesiology and Health Promotion major. The internship/research experience must be at least 6 credit hours, but no more than

12 credit hours. One credit hour of internship/research experience is equivalent to 40 contact hours. Your internship/research experience can be completed during the fall, spring, or summer. The selection of a site and arrangements for the internship/research experience should be discussed with your advisor and the internship/research coordinator once you have completed KIN 3021/3022 and KIN 3010. Some internship experiences will require the completion of KIN 4056, Advanced Exercise Testing and Prescription. Visit with your advisor to make this determination.

<u>COURSE</u>	TITLE	<u>CR</u>	GRADE	SEM/YR

PRE-PHYSICAL THERAPY

1. Common Prerequisite Coursework

Pre-professional coursework does <u>not</u> **constitute a major.** You may select a major from within any college at UW. You will need to complete university studies and degree requirements in addition to your pre-professional coursework.

<u>MATH</u>

After completing the equivalent of <u>MATH</u> 1400 (College Algebra), you are able to begin your basic science sequence. You should plan to take math every semester until you have completed <u>MATH</u> 1405 and <u>STAT</u> 2050 or <u>STAT</u> 2070. Some majors may require additional math courses.

Common Prerequisites		Years 1-3	Grade	Semester
<u>MATH</u> 1400 <u>LIFE</u> 1010 <u>CHEM</u> 1020	College Algebra General Biology General Chemistry I	Semester 1 Semester 1 Semester 1		
<u>MATH</u> 1405 <u>LIFE</u> 2022 OR <u>MICR</u> 2021 <u>CHEM</u> 1030	Trigonometry Animal Biology General Microbiology General Chemistry II	Semester 2 Semester 2 Semester 2		
<u>PSYC</u> 1000 <u>ZOO</u> 2040 & 2041	General Psychology Human Anatomy & lab	Semester 3 Semester 3		
<u>ZOO</u> 3115	Human Systems Physiology	Semester 4		
<u>PHYS</u> 1110	General Physics I	Semester 5		
<u>PHYS</u> 1120	General Physics II	Semester 6		
<u>STAT</u> 2050/2070 <u>PSYC</u>	Statistics (additional, requirements vary)			

- 2. *Get involved*! Community service, health care experiences, and leadership activities are essential. You need lots of experience working with people for people.
- 3. **Observe Physical Therapists.** Not only do requirements vary between schools, but most admitted students will vastly exceed the minimum requirement.
- 4. **Develop a strong academic record.** Keep in mind that no one ever gets admitted with the minimum grades and scores. Competition assures that only the most highly qualified students are admitted. Most admitted students have GPAs over 3.5; some programs have considerably higher expectations and standards. Check your schools carefully.
- 5. **Develop relationships** with PTs, faculty, and work/volunteer supervisors. Not only can they open doors to new opportunities and present amazing opportunities, but you'll need letters of evaluation from them. These letters need to be from faculty and supervisors who know you well.

6. *Read and be informed.* Know what's going on in healthcare and in the world.

You should carefully research the professional school requirements, as some schools require additional coursework and experience. Information is available in the Pre-professional Health Advising Office, Health Sciences 110, (307) 766-3499 or online at www.uwyo.edu/preprof.

(or 1000 with a grade of B) <u>ZOO</u> 2040 & 2041 <u>ZOO</u> 3115 <u>PSYC</u> 2340 <u>NURS</u> 2240 <u>STAT</u> 2050/2070 <u>PSYC</u> 2300 OR <u>NURS</u> 2340 (check your programs to kn <u>ANTH</u> 1200 OR	Human Anatomy & lab Human Systems Physiology Abnormal Psychology Medical Terminology Statistics Developmental Psychology Developmental Influences on H	Semester 3 Semester 4 lealth		
SOC 1000 Sociological Principles Upper level science course				

*Schools may also require additional coursework such as, but not limited to: Introduction to Occupational Therapy – not offered by the UW, but available online from various schools including Eastern Washington University and the University of North Dakota.

PHYS 1050	Concepts of Physics
COJO 1010	Public Speaking
Studio Arts	

- 2. *Get involved*! Community service, health care experiences, and leadership activities are essential. You need lots of experience working with people for people.
- 3. **Observe Occupational Therapists.** Not only do requirements vary between schools, but most admitted students will vastly exceed the minimum requirement.
- 4. **Develop a strong academic record.** Keep in mind that no one ever gets admitted with the minimum grades and scores. Competition assures that only the most highly qualified students are admitted. Most admitted students have GPAs over 3.2; some programs have considerably higher expectations and standards. Check your schools carefully.

- 5. **Develop relationships** with OTs, faculty, and work/volunteer supervisors. Not only can they open doors to new opportunities and present amazing opportunities, but you'll need letters of evaluation from them. These letters need to be from faculty and supervisors who know you well.
- 6. *Read and be informed.* Know what's going on in healthcare and in the world.

You should carefully research the professional school requirements, as some schools require additional coursework and experience. Information is available in the Pre-professional Health Advising Office, Health Sciences 110, (307) 766-3499 or online at www.uwyo.edu/preprof.

Gaining Admissions to Medical School Developing the Academic Competencies to Begin Medical School

1. Academic Preparation

The American Association of Medical Colleges is reworking the medical school admissions in order to gain better information about applicants and to more accurately reflect the changing roles of communication, interpersonal skills, and scientific knowledge in the modern practice of medicine. As part of this process, beginning in 2015 you will be taking the new MCAT exam and need to begin developing the competencies (intellectual skills and knowledge base) necessary to be prepared for it as soon as possible. These recommendations will almost certainly change over the next several years, so please stay in touch with our office, and make sure you sign up for the UW's Pre-professional Health List Serve at: www.uwyo.edu/preprof/

Rather than simply asking you to take certain courses, and hoping you develop the necessary skills to become an effective doctor, the new MCAT exam will seek to measure intellectual competencies as well as knowledge of subject matter. You will need to master the factual knowledge that will be covered by these tests. Much of this knowledge will come from foundational science course work, but you may need to use elective courses, or study on your own, in order to master the knowledge needed to earn a competitive score.

The new MCAT will consist of 4 sections:

Biological and Biochemical Foundations of Living Systems Chemical and Physical Foundations of Biological Systems Psychological, Social and Biological Foundations of Behavior Critical Analysis and Reasoning Skills

Recommended courses:

Biological and Biochemical Foundations of Living Systems & Chemical and Physical Foundations of Biological Systems:

- At least 3 years (6 semesters) of chemistry CHEM 1020, CHEM 1030, CHEM 2420, CHEM 2440 (Course Catalog for <u>CHEM</u> found here) and either MOLB 3610 & MOLB 4100 (option 1) or MOLB 3000, 4600 & MOLB 4610, and 4615 (option 2 & MOLB/MICR majors). (Course Catalog for <u>MOLB</u> found here)
- At least 1 full year of biology LIFE 1010 and MICR 2021 (preferred & physiology majors) or LIFE 2022. (Course Catalog for <u>LIFE</u> and <u>MICR</u> found here)
- At least 1 full year of physics PHYS 1110 and 1120. (Course Catalog for PHYS found here)

Psychological, Social and Biological Foundations of Behavior

At least one semester each of psychology (PSYC 1000) (Course Catalog for <u>PHYS</u> found here) and Sociology (SOC 1000) (Course Catalog for <u>SOC</u> found here). Many University Studies Classes (in the categories of Diversity in the U.S., Global Awareness, and the Cultural Context areas) will also reinforce material in these areas. Students may also consider upper division elective(s) to reinforce knowledge in these areas.

Critical Analysis and Reasoning Skills

Make a habit of reading a variety of challenging material on a regular basis (beyond what is required for your courses). Any course that requires rigorous thinking, extensive and challenging reading, and problem solving skills will be helpful. In terms of specific coursework, be sure to take at least one semester of statistics (STAT 2050 or 2070) and math courses until completing a least Calculus I (MATH 2200) **(Course Catalog for <u>STAT</u> and <u>MATH</u> found here). Please note:** These courses are solely recommendations for preparing for the MCAT. Specific medical schools may or may not require these courses to apply. Schools may also require additional courses as entry requirements. You are responsible for making sure that you are on track to fulfill individual school's requirements prior to application. **Additional Coursework:** Taking additional coursework in any of the above areas should re-enforce and extend your knowledge of the subject matter. You should focus on taking rigorous and challenging courses that interest you. Selecting courses based on them being "easy" is unlikely to result in the intellectual growth needed for you to do well on the MCAT, and become a doctor. Admission is highly competitive and there is a significant difference between meeting the minimum requirements and being a competitive candidate.

- 2. *Get involved!* Community service and leadership activities are very important.
- 3. Gain health care and shadowing experience you can't have too much!

Revised 08/01/2018

- 4. **Do some research** it's an expectation of most medical schools. Some value it more than others.
- 5. *Develop a strong academic record* most accepted candidates have a 3.5-4.0.
- 6. **Develop relationships** with physicians, science faculty, and work/volunteer supervisors. Not only can these people help you open doors to exciting new experiences, but you'll need letters of evaluation from people who know you well.
- 7. **Read and be informed** about health care issues and health care in the news. Know what's going on in the world as well. You are not expected to have the answers.
- 8. Develop competencies: https://www.staging.aamc.org/initiatives/admissionsinitiative/competencies/

Suggested course sequences:

es.	Fall MATH 2200 (1400 or 1405) LIFE 1010 CHEM 1020 SOC or PSYC 1000	Year 1 Grade	Semester
	Spring MATH (if necessary up to 2200) MICR 2021 (preferred & physiology majors) or LIFE 2022 CHEM 1030 SOC or PSYC 1000		
Year 2			
	Either semester – STAT 2050/2070, upper divisio Fall Math (if necessary up to 2200) CHEM 2420 MOLB 3000 (option 2 & MICR/MOLB majors)	n science (genetics, ce Grade	ll bio for WWAMI) Semester
	Spring CHEM 2440 MOLB 4600 (option 2 & MICR/MOLB majors)		
	STAT 2050/2070 upper division science		
		Year 3	
	Fall PHYS 1110 MOLB 4610 (option 2 & MICR/MOLB majors) MOLB 3610 (option 1)	Grade	Semester
	Spring PHYS 1120 MOLB 4615 (option 2 & MICR/MOLB majors) MOLB 4100 (option 1) MCAT prep—keep your load VERY LIGHT
