Probability and Statistics: Common Core and Beyond

- An in-depth look at the critical ideas in Probability and Statistics
- Time to work on infusing these to meet Common Core Standards seamlessly into your existing teaching.

June 9-13, 16-20 and 23-24 9-4 daily,

- group work for understanding in the afternoons, meet and work with your WY mathematics colleagues
- Stipends available to cover costs as well as free take-aways for content.

Instructors:

John Spitler, University of Wyoming, mathematics
Linda Hutchison, University of Wyoming, mathematics education

Both John and Linda enjoy teaching and learning mathematics and want to stretch your understandings of probability and statistics and experience in ways we want your students to enjoy. John will be leading the mathematics portion of the summer (8 days) and Linda will be facilitating the infusion of the CCSSM appropriate ideas (4 days) into your curriculum. School-year follow-up will be available for embedding and supporting these ideas.

Preference for registration, until May 15, is extended first to LCSD #1, #2 secondary mathematics teachers as part of the available MSP grant partnering, but we anticipate that many spots will be available for fellow WY Secondary Mathematics Teachers. We encourage you to e-mail lhutch@uwyo.edu to express your interest and we will use a first-come, first-serve basis until all spots are filled.

Secondary mathematics teachers have content expertise and can teach in middle school, junior high schools, or high schools as long as mathematics is the content area you are highly qualified to teach. We will be working hard to extend and expand your knowledge of mathematics in probability and statistics.
