The Department of Mathematics at the University of Wyoming seeks students who wish to pursue the Ph.D. in Mathematics. The department offers a vibrant and stimulating environment in which to learn higher mathematics and to pursue open questions at the frontiers of knowledge. With 24 faculty members and six lecturers, the department is large enough to offer broad expertise in pure and applied mathematics but small enough to enjoy close working relationships between professors and students. We recruit new graduate students from around the world, and we especially welcome applicants from underrepresented groups, including women.

The Math Department is housed on UW’s main campus, in Laramie, Wyoming. Perched in a scenic valley at 7200 feet above sea level, between two ranges of the Rocky Mountains, Laramie offers outstanding access to outdoor recreation. The city also serves as a hub for cultural activities, including several concert series, theatre and dance performances, an art museum, nationally recognized archives, and world-class scientific collections.

UW is a partner, with the National Center for Atmospheric Research, in operating the NCAR-Wyoming Supercomputer Center, which houses a leadership-class supercomputer available to UW researchers. The university also maintains a separate Advanced Research Computing Center and the Shell 3-D Visualization Center, housed in the School of Energy Resources.

The Math Department supports roughly 25 graduate students through teaching and research assistantships that carry full tuition support, stipends, and health insurance. In addition, the University of Wyoming offers graduate assistantships that are intended to increase access and opportunities to graduate education for U.S. students from underrepresented and underserved populations and to increase student diversity in our graduate degree programs on a competitive basis. For more information about the department or to apply for admission, please contact Ms. Beth Buskirk at bbuskirk@uwyo.edu.

The University of Wyoming is an affirmative action/equal opportunity employer and institution and does not discriminate on the basis of race, color, religion, sex, national origin, disability, age, veteran status, sexual orientation, or political belief in any aspect of employment or services. For more information see www.uwyo.edu/diversity/fairness.
