

Harry Hill Graduate Excellence Award

The purpose of this award is to recognize **petroleum engineering graduate students**, who have achieved outstanding performance in course work, research, and service. The accomplishments of these outstanding students are demonstrated through their academic GPA, publications in archival journals, presentations at national & international meetings, service to the department, college, university and/or profession.

Nomination & Selection Procedure:

- Nominations should be submitted to the [Graduate Committee](#) no later than **April 15** of current year.
- The nomination packet should include the following:
 1. A nomination letter from a faculty member in Petroleum Engineering and two other support letters
 2. A current resume
 3. Evidence of excellence in course work, research, and service. This may include TA evaluations, a sample of published work, service and leadership roles in student and civic organizations, and other information indicative of excellence in these areas
- The Graduate Committee will review nominations and select the recipients of this award by **April 30** of current year.
- Two award recipients will be identified. The first recipient will be awarded \$1000, and the second will be awarded \$500. Each will receive a plaque celebrating their accomplishment.
