Melissa L. Hunter PharmD, R. Ph., Director of Drug Information at the University of Wyoming (UW) School of Pharmacy, has been selected as the Drug Information Editor for the American Pharmacists Association’s PharmacotherapyFirst: A Multimedia Learning Resource that will be published on PharmacyLibrary.com.

In her capacity as Drug Information Editor, Melissa will create and maintain a Top 200 Medication database as well as manage drug information content and questions for every disease state in PharmacotherapyFirst.

Melissa obtained undergraduate degrees (German and Zoology/Physiology) from UW in 2000, and her PharmD in 2004. She started as the UW Drug Information Director in late 2005 and has made a career of helping others with drug-related questions and information.

“I’ve worked very hard over the last decade to expand student and faculty access to databases, mentored dozens of students, and answered thousands of drug information requests from Wyoming residents and UW alumni and preceptors.”
