

# School of Pharmacy

## Scholarship Profile

**Christina Wilkinson**  
Class of 2018  
Colorado Springs, CO

### Student Bio

Christina grew up in Colorado Springs and graduated from Liberty High School in 2012. After graduation, she moved to Laramie in order to pursue her dream of becoming a pharmacist. She says "I got the inspiration to go into the medical field when I was young watching my mom go to work as a nurse. During my high school career, my anatomy teacher not only introduced us to the structure and functioning of the human body, but also introduced us to the basics of toxicology and talked a little about how medications work in the body. This topic absolutely fascinated me so I decided that pharmacy was my calling within the medical field."

Christina chose UW School of Pharmacy because of the combination of excellent faculty, small class sizes, and its great reputation. She adds "my other passion is music and the School of Pharmacy has not only allowed me, but encouraged me to follow my passions and continue playing in the University of Wyoming Symphony Orchestra. I am currently in my fifth season of playing in the orchestra and the second season of being honored by the title of Co-Principal of the French horn section."

Following graduation, Christina plans to complete a PGY1 residency in a facility that offers both inpatient and ambulatory care experience. She says "I am undecided on whether I would like to practice as an inpatient or ambulatory care pharmacist, so based on my experience in rotations and in my PGY1 residency I will either complete a PGY2 residency in ambulatory care or will pursue a career in inpatient pharmacy care."

### Lindsey Reinhart Memorial Scholarship

The Lindsey Reinhart Memorial Scholarship is dedicated to the memory of Lindsey Reinhart (2000) by her fellow classmates. Dr. Reinhart, a graduate of the University of Wyoming, had a love for the University of Wyoming. Her friends felt that establishing this scholarship in her name would be a great way to honor her life.
