Welcome new employees!

Risk Management and Insurance strives to protect university resources, whether tangible, such as real and personal property, or intangible, such as human resources so that the University may pursue its mission. Our role is to minimize the adverse effects of loss due to accidents or unexpected events that jeopardize the well-being of the University community. We minimize the risk of loss through identification and analysis of risk, implementation of loss control programs, and contractual transfer or other risk reduction or financing techniques. We are here to provide support and services to all departments, faculty, staff, students and visitors. Fulfilling these responsibilities requires close coordination with the entire University community to identify risks and resolve losses.

**Our Safety mission:** Promoting health, safety, and environmental protection by providing exemplary programs and services in support of the University mission. Our Vision is: A university culture where safety and health are core values, embraced and acted upon at all levels. We provide services in order to accomplish this mission and assist the University in meeting safety requirements, including: consultation, hazard assessments, audits, regulated waste disposal and training. Courses include: Safety Orientation, Hazard Communication, Bloodborne Pathogens, Fire Extinguisher, Asbestos Awareness, Radiation Safety, Chemical Hygiene, Hazardous Waste Generator, and Respiratory Protection.
