Seed Packets

Green Beans

This bush bean is renowned for its fine stringless texture. Good for late planting and tolerates dry weather well.

Days to Germinate | Depth to Sow | Seed Spacing | Row Spacing | Days to Harvest
---|---|---|---|---
8-16 | 1/2 in | 3 in | 2 ft | 54

Sow in sunny location in average soil after danger of last spring frost, when the soil is thoroughly warm.

Thin seedlings when they are 3 inches in height, with the final spacing of the plants 6 inches apart.

Garden Hints: Mature pods are 6 inches long. Pick beans when they are young and most tender. Keep beans picked regularly to keep the plants productive.

Tomatoes

Medium-sized, globe-shaped tomatoes are ideal for slicing or canning. Excellent flavor.

Days to Germinate | Depth to Sow | Seed Spacing | Row Spacing | Days to Harvest
---|---|---|---|---
15-20 | 1/4 in | 1/2 in | 3 ft | 55-60

Sow seed indoors in a warm, well lighted area, 8 to 10 weeks before last frost for earliest harvest. Seed may be sown directly outdoors in warm weather areas.

Thin seedlings when they are 3 inches in height, with the final spacing of the plants 3 feet apart.

Garden Hints: Keep moist. Your garden should receive about an inch of water per week.

Lettuce

Big, compact heads have succulent, curly leaves with a mild flavor. Tender and sweet, never tastes bitter.

Days to Germinate | Depth to Sow | Seed Spacing | Row Spacing | Days to Harvest
---|---|---|---|---
10-14 | 1/4 in | 1 in | 18 in | 65-85

Sow as early in the spring as the ground can be worked.

Thin seedlings when they are 1 inch in height, with the final spacing of the plants 6-8 inches apart.

Garden Hints: Soil should be well fertilized and kept moderately moist.

Peas

Early, dependable and bursting with refreshing flavor. These sweet, deep-green peas are a favorite with gardeners everywhere. Dwarf plants require little support. Easy to grow.

Days to Germinate | Sow Depth | Plant Spacing | Days to Harvest
---|---|---|---
8-12 | 1 1/2” | Row: 30” Plant: 2” | 61

Growing Tips: For best results, seed directly outdoors in full sun, in spring or fall, when temperatures are cool. Scatter seeds at the rate of 1-2 seeds every 2 inches. After germination, thin to 1 plant every 2 inches. Bush plants require little support. Harvest and use as soon as pods are filled out.

Uses: Delicious fresh from the garden, cooked alone or with other vegetables. Freezes well.

Suggestions: To save space after peas are harvested, plant beans, summer squash, carrots or another warm-season crop.
