FALL 2023

*“The cost of U.S. rare earth element import dependence: An economic perspective”*

**12:00 - 1:00 PM**  
LUNCH  
PROVIDED

**FRIDAY**  
**SEPTEMBER 15**  
**2023**

**ENCANA**  
**AUDITORIUM**  
**ENERGY**  
**INNOVATION**  
**CENTER**

Charles Sims is the Director of the Center for Energy, Transportation, and Environmental Policy (CETEP) at the Howard H. Baker Jr. School of Public Policy and Public Affairs, and an Associate Professor in the Department of Economics at the University of Tennessee - Knoxville. His research interests center on environmental and natural resource economics with a specific emphasis on the role of risk and uncertainty in natural resource, environmental, and energy policy. A UW alum, Sims will discuss the costs of relying on foreign countries for economically and strategically important minerals.
