

Responses from Vice President Neil Theobald and BOT Chair Dave True to parking and transportation letter from Staff Senate Executive Committee:

---

Renee:

Thank you for these well-stated, substantive responses to the initial Walker Consulting study. The results of the final Walker study will be data - - along with surveys that we are conducting - - which are being provided to our Master Planning Mobility Task Force for their deliberations over the next nine months.

On Wednesday, I will update Staff Senate on this issue and answer any questions or concerns that Senators may have. Any recommendations/proposals for campus parking will be included in the January, 2020 campus master plan final report.

Neil

---

Thanks, Renée, for passing along the Staff Senate comments which certainly merit careful consideration.

And, thanks Neil, for your reply and including me.

Again, thanks to you both,

*Dave*
