

BEST CLASS I HAVE TAKEN AT UW:

I really enjoyed Dr. Ludden's animal nutrition class! Not only is the class material very interesting, but Professor Ludden does an excellent job relating material to basic concepts, so it is easier to understand.

HOW I CAN HELP

Whether you need help finding a classroom building or are seeking how to get more involved on campus, no matter the question, I am here to help you feel welcome and transition as smoothly as possible.

PERSONAL INTERESTS

What I enjoy most is working outside and being surrounded by livestock. When I am not on the ranch or at the feedlot, I really enjoy watching college football and having backyard barbeques with friends and family.

CAMPUS INVOLVMENT

I am currently a member of the livestock judging team. I have always been interested in agriculture and because of great programs such as this, I have been able to chase my passion as well as learn valuable life skills along the way!

WHAT IS IT LIKE BEING A TRANSFER STUDENT AT UW

I understand, being a transfer student can be tough! Not only is the transition to a new location a huge life event, but learning how to live and study in a new environment is a challenge in itself. While it can be overwhelming, there are countless resources on campus, including myself, that can make the transition easier. Just remember, you are not alone in this process and try not to be afraid to get a little help.

WHAT I WAS NERVOUS ABOUT

I had made a lot of great friends in junior college who were transferring to different schools, so I was nervous to meet new people. Luckily, people at the University of Wyoming are some of the friendliest in the world and I have already made a ton of new lifelong friends!

BEST RESOURCES OFFERED BY UW:

To me, the professors are the best resource that the University of Wyoming has to offer. The stigma coming into a university is that the professors do not care about students. In my experience, that could not be further from the truth.

Most professors take a personal responsibility to invest in the education of their students and that shines through in their teaching methods and the effort they put forth to ensure success.
