The above image shows the work zone at 30th and Grand Avenue in Laramie.

In order to minimize impact to traffic and business access, the 30th and Grand reconstruction project will use a unique detour system. This routing allows access to area businesses for the duration of the work. All travel movements will be signed and flaggers will be present during working hours.

All the areas in light green are a no-travel zone.

The orange arrows indicate allowed single-lane travel for entry and exit from businesses. Movement following the orange arrows will be counter clockwise and all flow into and out of business parking lots will be right turn only.

For travelers whose destination does not include a business within the project area, the recommended detour is indicated by the route shown in orange above.
